The promise of God to Abraham, and which was renewed to Isaac, &c., was that in this and in thy seed shall all the nations and families of the earth be blessed. And Paul to the Galatians says this seed is Christ. (Gal. iii. 16.) But early in the history of man, we find that Adam permitted an evil spirit or seed to enter his heart, and in that condition he begat children in his own fallen and evil likeness. And the very ground which he and his posterity lived on became cursed for his sake. So good and evil have been in the world in a mixed condition ever since. But an enmity was put between the two seeds which still remains. And the commandment still goes forth to such as have the seed of the kingdom of God, "In the morning sow thy seed, and in the evening withhold not thine hand; for thou knowest not which shall prosper, either this or that, or whether they shall both be alike good."

Thus, if we are of the seed of faithful Abraham, we will sow our seed that it may increase to the glory of God; or we may suffer the cares of this world, the deceitfulness of riches, or the lust of other things, to choke the good seed, so as to render it unfruitful. And it is also said, he that observeth the wind shall not sow, and he that regardeth the clouds shall not reap. So it is the Spirit of the Lord that we must watch in the sowing the seed of the kingdom; and if He should call us out to sow in tears, we shall reap in joy. Then "blessed are they that sow beside all waters," and leave it to God to give the increase through the waters of life. But we must do our part in preparing the ground for the seed of the kingdom. For as in the parable of the seed, it was only such as fell on good ground that brought forth so abundantly—some 100 fold, some 60, some 30—according to the several abilities or talents that we have given us. But such as might be compared to the stony or thorny ground which is not prepared for the seed of the kingdom of God, although they may receive the good seed with joy; yet not having much depth for the root of life, it soon withers away and brings no fruit to perfection. Or we may have good seed sown in the field of the heart, and it may spring up we hardly know how, but we may be careless or go to sleep, and let the enemy come in with his tares, which so resemble the wheat, that we suffer both to grow together till the time of harvest, which is the end of the world. Then it is said the wicked shall be severed from among the just, and shall go away into everlasting punishment, but the righteous into life eternal.

We may have the seed of the kingdom of God and the seed of the enemy of all righteousness, each growing in our hearts at the same time; and increasing in proportion as we give them cultivation and room. But unless we have the good seed ourselves, and free from the mixture of cheat or tares, we cannot sow it to others. It is the same as the true light: if we have it not in our own hearts, we cannot let it shine on others.

But there has been enmity put between the two seeds ever since the transgression of man, and this enmity will continue until one or the other gets the victory, which will depend on our own obedience or disobedience. And it was according to the will and wisdom of God in the

first place, that man should be left to his own choice, so it is now. But we cannot serve God and mannan at the same time, and we become servants to whichever we yield ourselves servants to obey. Our first parents yielded to the voice of the tempter and lost their spiritual life, and so may we. Or we may through obedience to the law of the spirit of life in Christ Jesus, have the Divine life again restored. But if we prefer to sow to the flesh like they did, we shall of the flesh reap corruption. But if we sow to the Spirit we shall of the Spirit reap life everlasting.

So we have good and evil, life and death, set before us, and power of choice given us to follow whichever we will. And we have the Spirit and the Scriptures to instruct us. And in the Scriptures, our dear Redeemer in his parables, as given by Matthew, speaks of the kingdom of heaven as comparable to a grain of mustard-seed which a man took and sowed in his field. And in Luke it is spoken of as in a garden. But both the field and the garden seem to signify places where the plant might receive cultivation and care. Then it grows and becomes as a tree, so that the birds of the air lodge in the branches of it. And though the mustard-seed may be the least of all herbs, yet it has vitality and virtue like the still small voice, it will attract even those who may seem as the fowls of the air, to come and take shelter under it, and be made to partake of the blessing of the faith of faithful Abraham. Or may be of the wrestling seed of Jacob. For in this seed, and not out of it, all the families of the earth may be blessed, and made to partake of the Divine holiness by being helped to depart from all iniquity, and thus escape the pollutions that are in the world through lust, or through the seed of the evil one.

DUBLIN, 15th, Twelfth Mo. 20th, 1859.

FOR "THE FRIEND."

I am now nearly seventy-nine years old, and many trials and deep exercises have attended me from early life unto this day; but unworthy as I feel myself to be, I still feel a precious hope from time to time, in mercy vouchsafed, that He who visited me even in the days of my childhood with the "Day-spring from on High," will be with me unto the end. I had a birth-right membership in the Society of Friends, and, having a pious mother whose concern was to train her children to love and serve their Heavenly Father, I have often had cause to believe it was a means in the Divine hand to lead them to know the Lord for themselves, and to put their whole trust in Him.

I love the Society of which I am a member, and its principles, and all its testimonies—fully believing as I do that they are nothing less than Primitive Christianity revived; and greatly do I crave that we as a people may be increasingly engaged to be brought more fully into possession of them. I believe there are many throughout the whole heritage that do feel and see in that light which never deceives, that there is a spirit at work that would lower the standard of truth which our worthy forefathers were called upon by the Lord to maintain before an evil world. They endured great suffering for the Truth as they received it from the adorable Head of his gathered church; many of them even unto death in noisome prisons; and we are professing to be their successors, both in name and in doctrine.

I believe there are many who are not prepared to lower their standard, but I feel the

great need there is for us, poor and weak and unworthy as we may feel ourselves to be, to be very watchful over all our doings and our walk through life, that we do not offend either in word or deed. I mean that we do not yield to that which would mar our own peace or cause our Heavenly Father to withdraw his presence from us so that the glory should depart from our Israel. Friends have from the rise of our highly favored Society, been called upon to lead a life of self-denial and the daily cross; but I have often been led to fear that many under our name are indulging in practices and things which the Truth does not own. I have often remembered what is written in the Holy Scriptures concerning Ephraim, "That he had mixed himself with the people, and that strangers had devoured his strength and he knew it not." We may understand this as being mingled in with the vanities of the world, and alienated from the precious life of the Lord's chosen people. If a truly religious concern rests upon our minds from day to day, that all our actions and our walk before the world should be to the glory of God, I believe He would preserve us from evil and we would be restrained from falling into the ways of an evil world, either in eating or drinking, or in the vain amusements and pastimes so prevalent in the world.

And I fear that many under our name are too much falling into the practice of making the time called Christmas a day of feasting and mirth, instead of being engaged as we all ought to be, to be prepared for the solemn change that awaits us all. We have need, all of us, to be found watching so that that day may not come upon us unawares and find us unprepared. I do crave to be one with those servants who are found watching, whom our blessed Saviour pronounced "blessed," that shall enter with Him "into the marriage chamber."

I believe the Lord is turning his hand upon his people for good. Therefore how precious that we should yield to the operations of his holy Hand upon us, that He might make us a peculiar people, and preserve us in the brightness that we might be made as lights in the world, and as a city set upon a hill that cannot be hid.

We are glad to see our kind neighbors (not members) who are religiously concerned, come and sit with us in our public meetings; and I believe the nearer we are engaged to keep to the Lord and to be found worshipping Him in spirit and in truth, the more such will delight to mingle with us on such solemn occasions. But inasmuch as I do fully believe that the business affairs of our Society belong exclusively to itself, I much desire that we may carefully observe the advice of our Discipline. That "all our meetings for business be kept select;" and that Friends endeavor to manage the affairs of Society in the spirit of meekness and wisdom, with decency, forbearance and love to each other; laboring to "maintain the unity of the spirit in the bond of peace."

How precious is that bond when gathered in the life and power. It is "like precious ointment extending to the skirts of the garments." Under much concern for the welfare of our beloved and still highly favored Society, I have in a broken manner laid it before the readers of THE FRIEND.

R. M.

PENNSVILLE, Twelfth Mo. 15th, 1859.

BLESSED is the man who learns to profit by his wants and infirmities, and who, in all the privations he endures is submissive to the will of God.—Selected.

WALT.

BY WILLIAM BYRON FORBUSTE.

The rinking, trampling billows of the ocean
Press on like victors in majestic state;
The strand, inert, with neither might nor motion,
The strand says, "Wait."

Upward they hurl their potent, restless forces,
As if to storm and batter Heaven's gate;
The stars, which sweep in calm, perpetual courses,
The stars say, "Wait."

The human heart, fiery, impetuous, urges
Its waves of passion on the beach of Fate;
The old, sad world beats back the rolling surges,
The world says, "Wait."

Upward it pours its manifold petitions,
As if to force an answer at Heaven's gate;
God, who discerns all needs and all conditions,
God says, "Wait."

Unlike the sea, which beats with strokes diurnal
Against its rocky barriers soon and late,
The human heart in the great world eternal
Need no more wait.

COMMON THINGS.

We thank Thee for life's common things,
The limpid, lovely water springs,
The shining diamonds of dew,
The firmament's transcendent blue;
For the wild rose whose fragile cup
In field and hedge is lifted up.

For the shy tribes in glade and glen,
Whose sweet life is unseen of men;
For humble grass that marks the way,
The rough earth for thy children's feet;
For lowly moss that creeps and clings,
A drapery for unsightly things.

For love's sweet locks upon us bent;
For baby faces, innocent;
For helpless hands that reach and sue,
And make us patient, kind and true;
For youthful hearts un worn and bold
That keep our own from growing old.

We thank Thee for life's homely ways,
The discipline of working days;
For hearts made tender by trial;
For the stern teacher of the denials;
For pain that keeps thy quivering chord;
For joy and grief we thank Thee, Lord!
—New York Journal of Commerce.

SELECTED.

THE BROTHERHOOD OF MAN.

Two babes were born in the self-same town,
On the very same bright day;
They laughed and cried in their mothers' arms
In the very self-same way.
And both were as pure and innocent
As falling flakes of snow;
But one of them lived in the terrace-house
And one in the street below.

Two children played in the self-same town,
And the children both were fair,
But one had her curls brushed smooth and round,
The other had tangled hair.
Both of the children grew apace,
As all our children grow;
But one of them lived in the terrace-house
And one in the street below.

Two women lay dead in the self-same town,
And one had tenderness,
The other was left to die alone
On her pallet so thin and bare.
One had many to mourn her loss,
For the other few tears would flow;
For one had lived in the terrace-house
And one in the street below.

If Jesus, who died for rich and poor
In wonderful holy love,
Took both of the notes in his arms,
And carried them up above,
Then all the difference vanished at last,
For in heaven none could know
Which of them lived in the terrace-house
And which in the street below.

FOR "THE FRIEND."

James Vally.

This Friend resided at St. Gilles, in the south of France, one of that small body of Friends who, in that portion of France, have for many years held up a testimony to the spiritual principles of the Gospel of Christ. The following account of his death, which occurred on the 11th of Second Month, 1876, is extracted from two letters written by his daughter to friends of her father, residing in England:

The first part of his illness he suffered much; he had great fear of death; he said to me with much emotion, "Pray the Lord for me, my beloved daughter," and he continued asking God for the good and holy consolations of his good spirit. He very often prayed aloud. "My God," said he, "Thou who art all good and almighty, Thou who hast sustained, led and directed me during my lifetime, be now also with me to sustain me to the end, it is not in my name that I pray thee, but in the name of thy Son, Jesus Christ, our Saviour, who has died for us; for when can I go, and on whom can I call, if not on thee, almighty and all powerful God; all that I can do is to ask thee to give me of thy good Spirit, and I would ask it of thee until my end, that Thou mayest be willing or not to grant it to me, for Thou art the Master, and I commit myself to thy good and holy will." When I said to him all that I could to ease and console him, he replied to me, "My daughter, thou canst do nothing for me; it is God only who can do anything for me; all that thou canst do for me, is to pray to God in the secret of thy heart;" and indeed my prayers mentally were very fervent and ardent for him. I prayed God to grant to my dear father the mercy of glorifying Him, and to be one of his witnesses upon his deathbed, as he had been one of his faithful witnesses during his lifetime, for though my dear father was not a minister, he has been (like Noah) a preacher of righteousness in our little village, by all the good which he has done, especially to the poor, and by all the services of different kinds, which he has rendered to every one. His entire life has been the fulfilling of that sublime precept, "What ye would that men should do to you, do ye even so to them." He even overlooked himself for the sake of others. Any business that he had to do, whomsoever it might be with, he always did rather for the benefit of others than for his own. He never deducted from his poor work people quarters of days lost in consequence of bad weather, or from other circumstances; he said that the day of the poor workman was his bread, and that the proprietor could better and even ought always to bear the loss of all the hindrances, rather than the poor workman. If he did for him more work than was due, he paid them the surplus; also when he required a workman for any work almost all our peasants came forward. Everybody wished to serve him, everybody wished to have his advice and counsel upon matters of business, for his advice was always good, just and right.

I also asked God that He would grant him the mercy of dying like Jacob, surrounded by all his children, and our good God who hears all our prayers, and is pleased to answer them, heard our prayers and has answered them beyond what we had dared to hope. We had time to apprise my sister with all her children of his illness, who, with other relations living at a distance, have been able to visit him. Some days before his death, one time when I was alone

with him, he suddenly said to me, with much earnestness, "My daughter, God has heard my prayers, now I am upon the Rock—the Rock of Ages; now I am going to be with God; He has been merciful to me, and that, in order to take me to himself. He knows what is best for me; perhaps it will be to-morrow at the cock-crowing—but He knows himself when it will be. I am well-assured that I shall go to God." My eldest sister, with her youngest son, entering at that moment, my dear father then addressed us both and said to us, "Persevere, my children in all the good things which I have taught you for there is nothing more sure either in life or death. For a long time I have believed and practised the things of God; but not until this moment have I truly seen and felt their importance and reality. All things pass away from us—we shall all pass away—but the things of God shall not pass away; they are eternal, as He is. He was justly called when He called himself Eternal." Then he began to pray for us both and for all his family. "Holy Father," said he, "keep in Thy Name all those that Thou hast given me in this world; they are Thine, even as they are mine; I pray Thee that Thou wilt preserve them from evil, keep them, bless them, that we may all be one with Thee, here on earth and also in heaven." Then his countenance fell on our little Lewis, who had come near to the bed to hear what his grandfather was saying to us. He called him; my sister presented him to him, that he might kiss him, and he blessed him. We were both much affected. I remarked to him, that the precious inheritance of all the good things which he had left us was more precious to us than all the silver or gold in the world, and I thanked God from the depth of my heart that He had heard and answered our prayers. From this time he had more suffering, and we only heard him twice again speak of God. "I have fought the good fight of the very holy faith," said he, and also, "Let me die the death of the righteous, and let my end be like theirs;" and when his sufferings increased, and when he saw that nothing could be done to relieve him, he clasped his hands in prayer and said in a very solemn, very touching and very submissive manner: "That is my only refuge." During his agony, which lasted two hours, he had no other kind of suffering; he only complained of thirst, but he could not swallow more than a single drop of water at a time, and even that with difficulty. His sight failed; his voice gradually became weaker. He called us to his bedside; the room was shortly filled with all our friends and neighbors. He was raised upon his bolster, and was able to take the hand of each one, and joined in prayer until he died. When we were assembled in silence around his bed, he clasped his hands and said in a feeble voice, "Let Thy holy will be done!" and, after a short pause, he repeated it in a very firm voice, and making a sign towards heaven with his finger, said: "In the Name of God, may you never have any contention." Afterwards, he called my dear sister, who is so devoted to me and my children, as thou art, embrace me—may God reward thee for all the good which thou hast done for me; may the love of Christ dwell in thee, and mayest thou walk therein. I have nothing better to say to thee." All in the room softly wept. The death-bed of my beloved father seemed like one of the most solemn assemblies, which belonged to heaven rather than to the earth. Again, after a short interval of silence, he addressed my sister's

eldest son, "Be faithful," said he to him, "to the heavenly light which God has placed in thy heart, and it will keep thee and preserve thee from falling into temptation in thy journey through life, and the God who has protected, led and blessed thy grandfather, will also protect, lead and bless thee, and we shall meet again in heaven. My dear Samuel, receive my blessing;" and he attempted to place his hand upon his head; but it fell again upon the bed. After a short pause, in which Samuel wept much, and all of us with him, my dear father still holding Samuel's hand in his, said to him, "Farewell, my child—my children—I bless you all; may God bless you all; may God bless all those who are here; my heart overflows with affection for all. Farewell to you all, and may we meet in heaven." He also called my sister Anna, and spoke to her at some length in particular; also to my brother-in-law, Samuel Brun. He called, kissed, and blessed my sister's four other children, Elie, Paul, Justin, and little Louis, who all wept much. We all went, one after the other, to take leave of him: he again held us by the hand and bid us farewell. His voice faltered—for a moment he seemed to be in pain, and he cried in prayer to God. I asked him if I should pray aloud. He made a sign to me in the affirmative. Then I was led to thank God for all the blessings and precious consolations which He had granted to us all that time, and I desired that we might all profit by this solemn opportunity—that we might one day join our dear and beloved father in heaven. He seemed comforted, and a short time after he thanked God in that He had blessed him in his last hours beyond what he had dared to hope. Little Justine, who is ten years old, wished again to kiss him, and she wept much. He said to her, "Weep not, my child, but he appeared much affected himself. Then I said to him, "Father, thou hast two angels, two Justines, both the same age, one who waits thee in heaven and one to comfort thee here on earth." He made a sign to me, two or three times, with his head, showing that he understood me. Afterwards, when some one wished to try to speak to him, he lifted up his hands towards heaven, and tried to raise himself. He said, in a very low voice, but in a very sweet and touching manner, "Now, my children, leave me. Leave me, let me go, hold me no longer." Then we said no more to him—we all wept very softly and in silence around him. Once again he tried to speak, but there was only our little Justine near, who was leaning by him on the pillow, who heard him say, "Glorious glory." At another time he tried to join his hands in prayer, but he was not able; they fell upon the bed; and in a few minutes he departed, as if falling asleep. I cried out, "Lord Jesus, receive his spirit." It seemed to me that we were all in heaven with him. His features were radiant with a sweet and calm expression upon his countenance, like that of a child asleep in the arms of its mother. Some days before his death, being roused for a short time from sleep, he said to my sister who was then watching him, "In my sleep I have been with Abraham, Isaac and Jacob, and many other patriarchs, who crowded so closely upon me that I thought they would suffocate me, but instead of being suffocated, I awoke. I do not know whether I really slept, but I seemed to be in good health." Dear friend, that which now sustains us is the clearest and most precious consolation of having the assurance, that our dear and beloved father rests in heaven from his labor and works here below, in

the bosom of the God of Abraham, Isaac and Jacob, and that he now joins the multitude of the redeemed ones, clothed in white, who forever celebrate the immortal praises of the Lamb, sacrificed for the salvation of poor sinners.

Reasons for Total Abstinence.

About ten years ago, or more, I first became a total abstainer because I was easily convinced that the use of alcohol was not a necessity, and a great deal turns upon that. I saw, for instance, that whole nations had not only lived without it, but had flourished without it. I believe that the human race had existed and had flourished a considerable time before it was discovered. I saw the remarkable fact that there were some twenty thousand prisoners in England, and that though many of them had made themselves mere funnels for drink; though they had been accustomed to drink from their childhood; though most of them had been brought to prison, either directly or indirectly, through drink; yet the very day that they entered the gates of a prison all drink was entirely taken from them, and yet there was not a single instance on record in which any one of them had suffered in consequence. On the contrary, men who have entered prisons sickly and blighted, after a few months left prison hale and strong and hearty; and women who had been put into prison perfectly horrible and hideous in their loathsomeness and degradation, after a short period of deprivation from the source of their ruin, left prison with the bloom of health and almost of beauty.

Then, again, I saw in the carefully prepared statistics of insurance societies that total abstinence, as an indisputable fact, contributes to longevity. Then I saw that so far from alcohol being a necessity for great feats of strength, that many of the greatest athletes in the world, from Sanson downward, whose drink was only the crystal brook, had achieved without alcohol feats far more mighty than they could possibly have achieved with it; and as far as intellectual exertions are concerned, great writers, though they have not always said that water is best, have yet constantly drawn from temperance a far better inspiration than they could possibly have produced chemically from the fumes of wine. Then I found that a great number of our most eminent physicians had declared most positively that in hundreds and thousands of cases alcohol was the prolific source of disease, even those who took it in quantities conventionally deemed moderate; and, on the other hand, that other physicians who were opposed to total abstinence as a general rule still confessed that the young and the healthy, all who eat well, and all who sleep well, can do without it and are better without it.

Benjamin Franklin said, "Temperance puts wood on the fire, meal in the barrel, flour in the tub, money in the purse, contentment in the house, and clothes on the bairns."

Well, then, coming to these conclusions, believing that total abstinence would tend to simplicity of life, to health, to strength of body, to clearness of mind, to length of days, I then saw that for me, at any rate, it became a desirable thing to give up alcohol altogether; and I did so for these reasons, with perfect gladness, and without ever having suffered in consequence of the fact so much as even a single day. I might, perhaps, mention one other circumstance—it is this: Many have supposed that total abstainers have become so because they felt within them a

terrible temptation to drunkenness. Now I do not believe that one total abstainer in a hundred has adopted his practice for this particular reason; and yet it is surely a great thing that there is one temptation at any rate, from which we can be absolutely and forever exempt; and I, for one, do not feel so entirely self-satisfied of security as to feel no pleasure in the thought that I am exempt from the temptation which the good Father Matthew said, in consequence of it he had seen the stars of heaven fall and the cedars of Lebanon laid low. These, however, are not the reasons why most of us have become total abstainers. We have looked into the field of history, and from the day when that disgraceful scene took place in the tent of the patriarch down to the records of yesterday, we see that drink has been to the world a curse intolerable in its extent and interminable in its malignity.

Turn to Lecky's "History of European Morals," and all of you will see I am appealing not to books written in behalf of the temperance cause, but to literary works, and you will read that Lecky fixes upon the year 1724 as the most prolific in calamity to the English nation, because gin at that time had begun to be introduced to our people, and spread like an epidemic. Need I quote the authority of Milton in his magnificent lines:

Bacchus, that first from out the purple grape

Crushed the sweet poison of misused wine.

After the Tuscan mariners transformed.

Skirting the Tyrrhene shore as the wind listet

On Crete's island fell. Who knows not Crete,

The daughter of the sun, whose charmed cup,

Whoever tasted lost his upright shape,

And downward fell into a grolingling swine?

Need I give the testimony of one of the wisest judges, Sir Matthew Hale, who said that four crimes out of five even in his day were committed by men who had been drinking in taverns or in ale-houses? And coming down to this day, could I name any authors more refined, more fastidious, more eloquent, and less directly identified with the temperance cause than men like John Morley, John Ruskin, or Thomas Carlyle; and yet from their pages I could quote you words so burning and intense that, had they been used by any temperance reformer, they would have been put down at once as the best possible proof of intemperate language. I might quote from the able prelate, Archbishop of York, and the Bishop of London, both total abstainers, and almost every single judge who sits upon the bench, who have again and again borne witness, if we could get rid of drink we should almost totally get rid of crime, for drink is the same thing as crime.

I do not know any body in the world which is less susceptible to the sudden passion for social reform than the British House of Commons. Only twice, I think, in my life have I seen anything like the manifestation of a thrill of emotion pass through that very impassible body; but on one of those occasions to which I allude I did see a manifestation of a thrill of emotion pass through all those assembled members, just as the summer breeze sweeps the corn, when Mr. Gladstone, standing at the table of the House of Commons, in his position of Prime Minister, made use of the remarkable words, that the evils wrought by drink were more deadly, because more continuous, than the three great historic scourges of war, famine, and pestilence combined. Those words made me shiver, and I do believe they made the very coldest member of Parliament present who heard them, shiver. They were not original; they were not

spoken for the first time by Mr. Gladstone; they were spoken for the first time by a very eloquent and excellent man, a member of Parliament, Charles Buxton, who himself had been a brewer, and who, therefore, was able to give ample testimony to the truth of what he said. Still, Mr. Gladstone accepted them; he quoted and endorsed them with all the weight of his manifest authority, of his high position, and of his vast knowledge of mankind. He accepted and endorsed those words, and he has never withdrawn them.

I would ask you only to consider what those words mean, if words mean anything at all. Those who are older among you have had experience of war, and know what it really means. You know its horrors, its agonies, and its crimes; you know of lives of youths prematurely cut short; you know of men who are beloved and dear to thousands, sobbing their life away under the chill moonlight upon the crimson turf; you know of its widowed homes and of its orphaned children. And we know something, too, recently, especially in great tracts of Asia, of what famine means; we know how the spectre stalks among mankind. It alters the nature of the very hearts of men, and makes the eye of the mother pitiless to her own babe upon her breast. We know, from the record of this year, what pestilence is. We know it changes the inhabitants of cities into a mass of prostrated, who fly, panic-stricken, because of the dreadful plague. But here is a vice, perfectly preventable, stalking among us, which produces evils more deadly, because more continuous, than war, famine, and pestilence combined; and yet we are so cold, so neutral, selfish, immortal, and quiescent as to make no serious or united effort to grapple with that intolerable curse. Why, in ancient days, in times of war, a man received a civic crown if he saved the life of a citizen; and in times of famine, a man was regarded as a benefactor when he made two grains of corn grow where one had grown before; and in days of plague, we know of multitudes of men who stood between the living and the dead. If in times of war, blessed are the peacemakers; if in days of famine, it is a notable thing to feed the hungry; and if in time of plague, it is Divine to heal the sick; then, surely, we must be at the last gasp of national honor; we must be in the final paralysis of national selfishness if we can tolerate the fact that this vice, producing evils so deadly and so preventable, is to stalk among us. Indeed, many of us have not courage, passion or enthusiasm enough to grapple with it and to tremble it under our feet.—*Address by Arch Deacon Farrar in Chichester Hall, New York, Tenth Month 29th, 1885.*

Natural History, Science, &c.

Some Pleasures [?] of Life in the Tropics.—When a man arrives in Calcutta his acquaintance with the small red ants soon begins. I shall never forget the jump that a friend gave when he first saw a train of red ants on the floor. He was a stout Englishman, newly arrived from home, and with an innate horror of insect life. He thought the train of ants was a snake. They were merely a marauding party out on an expedition to plunder the sugar basin on the breakfast table. Some active ant scout had discovered that one end of the tablecloth touched the ground, and so afforded a passage to the sugar on the breakfast table. Instantly the expedition had been organized, and there was a continuous stream of ants from the hole in the

wall where they dwelt, along the floor, up the tablecloth, on to the sugar basin.

With a sideboard in which anything sweet is kept, it is usual to put brass saucers full of water under the feet, so as to keep the ants out. The water must be constantly changed, for if it gets covered with dust, or any debris that will carry the weight of an ant, the little creatures soon find it out and cross the moat. It is always expedient to have the feet of your bed planted in brass saucers full of water, so as to prevent the ants getting up into the bed.

I was acquainted with a lady who suffered severely from neglecting this precaution. The doctor had given her some ointment to rub on her arm for a rheumatic pain, and she applied it when she went to bed. During the night she suffered considerable pain, which she attributed to the working of the ointment. When daylight came, great was her horror to find that she was being eaten alive by a swarm of red ants, which had been attracted by some sweet ingredient in the ointment, and had bitten through her skin into her flesh, so that she carried the scars of the wounds to her grave. No doubt the rheumatic pain was cured, but the remedy was a good deal worse than the disease.

The large red ants, similar to those described in the *Queen's Scotch Journal* as attacking a royal princess, are usually met with out shooting. As you are passing under a tree in your loddah the elephant puts up his trunk, at the bidding of the mahout, to break off some projecting branch, and in an instant you find yourself covered with a shower of red ants, who have been pickicking on that particular branch. The rapidity with which they will attack you on your face and hands, get down the back of your neck and up your legs, is more easily imagined than described, and you will have a very unpleasant quarter of an hour until you can get rid of them all.

I had not many encounters with the large black ants, which affect a rather drier climate than that of Calcutta. But in a house where there is a colony of large black ants established no place is safe from their ravages, and their bite is quite as savage and painful as that of the large red ants. The white ants are the greatest nuisances of their kind. A white ant has several forms, but perhaps his most dangerous form is that in which he is more like a white maggot than an ordinary ant. In this maggot form the white ants work under cover of a tunnelling of soft mud, which they manufacture for themselves, possibly with the intention of concealing their mischief. But the tunnel fortunately betrays them and no time should be lost in breaking open the tunnel and destroying the working party that will be found inside.

If an unwary traveller, arriving late at night, leaves his portmanteau on the floor of his room in the vicinity of white ants, he will probably discover in the morning that the enemy have found their way in and made havoc of his garments. They will carry their tunnel up the leg of a table or sideboard to get at the contents of a drawer. Nothing is sacred to them. In the public offices of government the white ant is ready to make himself record keeper. He gets into a bundle of papers and eats them. If a reference is needed to some old paper, the clerk who goes to the bundle finds that it has been resolved into a mass of muddy pulp. I knew a case where they ate some bank notes in a native merchant's chest, but luckily for him, the fragments were identifiable.

More than once they have invaded a govern-

ment treasury, and have destroyed many precious sheets of the stamps manufactured by Messrs. De la Rue & Co., which were in the store of the district collector. As the collector is held personally responsible for the value of the stamps, his dismay at finding the white ants in his stamp chests, or almirahs, may be easily conceived.—*C. T. Buckland, in Longman's Magazine.*

Paper Railroad Ties.—Steel-tired paper car wheels are in use on nearly every railroad in the land. Before many years, it is probable, the tracks themselves may be laid upon paper and held together by paper ties. The inventor of a paper tie says that he can utilize in this way the ordinary paper board, which is made from straw, grass, or any cheap and coarse fibrous material. The straw boards are cemented together and pressed in moulds, making, he claims, a fire-proof and water-proof tie, which is not affected by atmospheric changes, holds the spikes firmly, is sufficiently elastic, and will outwear five wooden ties.—*Exchange.*

To Loosen a Rusted Screw.—One of the simplest and readiest ways of loosening a rusted screw is to apply heat to the head of the screw. A bar, or rod of iron, flat at the end, if reddened in the fire and applied for two or three minutes to the head of the rusty screw, will, as soon as it heats the screw, render its withdrawal as easy by the screw-driver as if the screw had only recently been inserted.

As there is a kitchen poker in every house, that instrument heated at the extremity and applied for a few minutes to the head of the screw or screws, will do the work of loosening; an ordinary screw-driver will do the rest, without causing the least damage, trouble, or vexation of spirit.

In all work above the common kind, where it is necessary to use screws, and particularly in hinge work and mountings, fancy fastenings or appliances affixed to joinery or furniture work, we would advise the oiling of screws, or the dipping of their points in grease before driving them. This will render them more easy to drive and also to withdraw, and it will undoubtedly retard for a longer time the action of rusting.—*The Tradesman.*

Rocks at Sioux Falls.—Nature has been very kind to Sioux Falls. Inclosing the city on all sides, the Big Sioux River winds in an S-like channel, falling from a series of magnificent rocks. In a run of half a mile the river falls ninety-one feet over six solid walls of Jasper. A water-power is thus rendered available for industrial purposes scarcely inferior to that developed by the Falls of St. Anthony at Minneapolis. In the river, and in the enormous quartzite formations that serve as its bed, and peep upward through the earth for many miles around, the future prospects of the city are largely found. This rock is a pure Jasper; and already four large firms employing 800 men are at work blasting and breaking it for building and paving stones. Geologists describe it as a metamorphic rock. The deposit appears to be about 3,000 feet deep and extends over twenty-five square miles of territory. Its hardness is such that saws make no impression upon it whatever. It simply chews them up. But that which renders the handling of it cheap and enables the quarries here to compete in Chicago markets, 600 miles distant, with Wisconsin granite, is its quality of breaking to a line, which it does as easily and neatly as chalk. With forty per cent. of the hardness of a diamond, this Jasper takes a perfect polish, and is used in all

The Western cities now for ornamental columns, pilasters and monuments. Such powerful machinery was required to obtain this polish that one of the firms handling Jasper was encouraged to attempt to utilize the petrified wood of Arizona in the manufacture of chalcidony. It is success was so perfect that it cornered the entire silicified forest, and now works out at its leisure wonderful specimens of this agate wood. Its smallest blocks contain interblended colors, vivid and startling in their marvellous richness, or pale and faint with the daintiest hues. Within a square inch are often to be seen the red of the rose, the pink of the salmon, the gorgeous yellow of the salamander, the green of a budding wheat-field, and the blue of an ink sea; and then, dying away from these milder colors, with perhaps a field of chocolate or snowy white to peep through, comes every tint, every shade the spectroscopist has dreamed of.—*New York Weekly Tribune.*

Items.

Mormon Citizenship.—Some Mormons recently applied to the United States Court in Salt Lake City, to be declared citizens of the United States. In the testimony produced on this occasion it is shown that every member of that church was expected to go through the Endowment House ceremonies, which included the taking of an oath, obligation or covenant by each, that they will avenge the blood of the prophets, Joseph and Hiram Smith upon the Government of the United States, and will live in this obligation unto their children and to the third and fourth generations; that he or she will obey the priesthood in all things, and will never reveal the secrets of the Endowment House under penalty of having their throats cut from ear to ear, their bowels torn out and their hearts cut out of their bodies. The right arm is anointed that it may be strong to avenge the blood of the prophets. An undergarment called an endowment robe, is then put on and is to be worn ever after. On this robe, over the heart, are certain marks or designs intended to remind the wearer of the penalties that will be inflicted in case of violation of the oath.

Judge Anderson in summing up the case said:—"There is a matter of foreign birth and lineage, and joins an organization, although professedly religious, which requires of him an allegiance paramount to his allegiance to the Government, an organization that impiously claims to be the Kingdom of God, to control its members under his immediate direction, and yet teaches and practices a system of morals shocking to Christian people everywhere, it is time for the United States to inquire whether such men as the applicants should be admitted to citizenship. The evidence in this case establishes unquestionably that the teachings, practices and purposes of the Mormon Church are antagonistic to the Government of the United States, utterly subversive of good morals and the well-being of society, and that its members are animated by a feeling of hostility towards the Government and its laws; therefore an alien who is a member of said Church, is not a fit person to be made a citizen of the United States. The applications are therefore denied."

Will Provisions.—The Chicago correspondent of the *Episcopal Recorder*, relates the provisions in a will of a deceased merchant of that place. It is cheering to observe the care felt by the testator, that his gift should not be so perverted as to injure the moral tone of the community:—"The will of the late John W. Ferrar has shown to the world what was known to thousands here, how noble, generous, just and wise was this man. It is a remarkable document in its wording. Of the \$3,500,000 left by the will, about \$1,000,000 is given to personal friends and relatives. Nearly another million is bequeathed to religious, charitable and educational institutions. The residue of his estate upwards of \$1,700,000, is to be set apart for the establishment and maintenance of a free public

library. Speaking of this subject, he writes: "I desire that books and periodicals be selected with a view to create and sustain a healthy moral and Christian sentiment in the community, and that all nastiness and immorality be excluded. I do not mean by this that there shall not be anything but hymn books and sermons, but I mean that dirty French novels and all skeptical trash and works of questionable moral tone shall never be found in this library. I want its atmosphere that of Christian refinement, and its aim and object the building up of character. And I rest content that the friends I have named will carry out my wishes in these particulars."

Capital Punishment.—The author of a recently published work, of a very interesting character, entitled "Scenes from a Silent World," by Francis Scougall (London: Blackwood & Sons), remarks:—"We feel bound to affirm, on the most substantial ground, that, so far from the Death Penalty being a deterrent from murder, it operates, in fact, as an actual encouragement to it, for it has the effect of destroying the intuitive sense of the sanctity of human life among the people." This was also the ground taken by John Bright in his speeches, on several occasions, against Capital Punishment. Again and again he asserted that whenever the punishment of hanging is inflicted, "we weaken, by so much, that security to society, resulting from the reverence with which human life is regarded."

SOME Friends, for whose best welfare she had been long concerned, coming to take leave of her when about to go on a journey, she testified the continuance of her solicitude by imparting much Christian counsel. She enjoined the young people of the family to value the privileges of their education, and not to be ashamed of the cross, even in what are termed little things; saying that she wished the standard of simplicity might never be lowered amongst us, and as their temptations to deviate would be likely to increase, she felt earnest in pressing what it was probable would be her last advice. This proved the case, for though she lived until their return, they never again met.—*The Life of Mary Dudley.* (1824.)

THE FRIEND.

FOR THE YEAR ENDING

CHICAGO, MARCH 11, 1890.

We find in a recent number of the *Christian Worker* the following argument for the training of preachers:—

If it be true that the Holy Spirit uses the knowledge and training possessed by a consecrated preacher in leading and anointing him for service, then the more education he has the better. Christ promises that the Holy Spirit will bring to our remembrance whatsoever He has told us. A truth is brought to our remembrance only when we have previously learned it. If we have learned much the Spirit has much for us to use. Knowledge, well arranged and preserved in the mind, will never come amiss in preaching. Training in consecutive thought, reasoning, logic are likewise useful of the Spirit.

While freely admitting the value of educational training for the general purposes of life, yet we feel that the paragraph quoted does not properly distinguish between intellectual and spiritual knowledge. The efficacy of gospel ministry does not depend on the learning or talents of the preacher, but on the measure of Divine anointing with which he is favored. Hence it has often been the case, that persons who were unlearned as to school education have been powerful ministers of the Gospel, because they have been taught heart-felt experience in

the school of Christ, and his power has rested upon them.

There is at the present time a tendency in several quarters, to promote the study of religious doctrines, somewhat on the same basis as any subject of scientific interest. It is very desirable that Friends should not lose sight of the true foundation of all spiritual knowledge—even the work of grace on the heart of each individual.

As to the tendency of professional study of holy things—we take the following extract from *The Christian Advocate*, the leading Methodist paper of this country, which says:

The constant study of holy things for professional purposes will produce spiritual indifference unless this result be prevented by great watchfulness and much prayer. The scribes and doctors of the law among the Jews delved into the mines of truth in the Old Testament as professional interpreters and expositors, but the exclusive exercise of their intellectual faculties in this way blinded their understanding so that they did not perceive or appreciate the truth with which they dealt. The characteristic infirmity of many great preachers is a want of spiritual perception and sensibility. They have bent their energies to comprehend the peculiar force of Greek verbs and Hebrew idioms and theological distinctions, to the neglect of the deeper spiritual significance and value of the word of the Lord. In proportion as the standard of ministerial scholarship is elevated this peril increases.

A request was received, some months ago, by the Book Committee of Philadelphia Meeting for Sufferings for some works setting forth the doctrines and history of the Society of Friends. This request was granted, and the books sent to the members of an association of young Friends in one of the Western States. The gift was accompanied by a letter, in which, while encouraging the recipients in the perusal of such works, a caution was extended as to the spirit in which they should be read. The following paragraphs from this letter seem appropriate at the present time:—

"Believing that a real knowledge of Divine truth is not to be apprehended by a process of study in the usual meaning of the term, but is to be obtained only by receiving and obeying the manifestations of Christ by his Holy Spirit inwardly revealed, agreeably to the Scripture declaration, 'He that doeth my will shall know of the doctrine,' we feel desirous that the young people everywhere should humbly wait for those openings of Divine wisdom which we believe our Saviour in mercy impresses upon the mind of every individual, and especially upon those who sincerely desire to know and obey his will.

"It was in this way that George Fox himself was convinced of those doctrines and testimonies which he was afterwards commissioned to proclaim. Robert Barclay, who became an able advocate and defender of these principles, thus speaks of the manner in which he was prepared to receive them: He says, that he did not come to receive the Truth by strength of argument, or by a particular disquisition of each doctrine, and conviction of his understanding thereby, but by being secretly reached to by this Life. "For, when I came unto the silent assemblies of God's people, I felt a secret power amongst them, which touched my heart; and, as I gave way to it, I found the evil weakening in me, and the good raised up—and so I became thus knit and united to them, hungering more and more after an increase of this Power and Life, whereby I might feel myself perfectly redeemed. And, indeed, this is the surest way to

become a Christian, to whom afterwards the knowledge and understanding of principles will not be wanting; but will grow up, so much as is needful, as the natural fruit of this root, and such a knowledge will not be barren or unfruitful. After this manner we desire, therefore, all that come among us to be proselyted, knowing that though thousands should be convinced in their understanding of all the truths we maintain; yet, if they were not changed from unrighteousness, they could add nothing to us."

"One of the descendants of Robert Barclay, the late John Barclay, writing in this present century upon the subject, declares that, 'though I have read many books which treat of and support our principles, believing that they are very comfortable and confirming to him that hath come to the Fountain head, whilst his mind is turned inward in reading them, and also useful in satisfying the simple-hearted in hearing, whose simplicity the Lord regards—and of service in stopping the mouths of gossayers.' I say, to this very day, I dare not sit down and study Friends' opinions and principles as a science, but find myself constrained to wait upon the Lord day by day, that so, as much strength, as much knowledge, as much satisfaction in regard to religious matters as is best for me in my present condition, may be handed. And, in truth, this is the surest way, with my very soul, from daily experience; for things have never been cleared up to my certain satisfaction in such a wonderful manner as since I have been under this discipline of the cross to all selfish wisdom."

SUMMARY OF EVENTS.

UNITED STATES.—Congress reassembled on the 6th instant. In the Senate the Vice President occupied the chair, but less than an hour was spent. Placed a copy of a constitution adopted at Boise City for the proposed State of Idaho, and it was referred to the Committee on Territories.

In the House, Representative Springer, of Illinois, introduced a bill for the admission of Arizona, Idaho, New Mexico and Wyoming into the Union as States.

The canvass of the wool supply in the United States, made by the *Boston Commercial Bulletin*, shows a total supply in dealers' hands of 70,000,000 pounds domestic, and 15,000,000 pounds foreign, against 50,000,000 domestic and 17,000,000 foreign in 1890. The New York and Philadelphia stocks are less than last year, but Boston shows an increase of 11,000,000 pounds of domestic wool. The imports of clothing wool coming from abroad show a decline of nearly 75 per cent.

It is stated that the acreage of about four thousand colored people in Oklahoma. Colonel Mason, of Mississippi, is advocating the purchase of the Cherokee strip for settlement of the colored race. President Harrison will be asked to appoint a commission of colored men to negotiate with the Cherokees for the purchase of the strip for homesteads in Eastern Washington exclusively. This proposition is said to be founded on the information that the Indians are willing to have colored people settle on the strip.

There is much excitement in Florida over a recent discovery of phosphate deposits in Marion County and the counties south of it.

The floods at Los Angeles, Cal., have changed the channel of the river below the city and turned the water on the fruit lands. The owners state that damage is estimated that the acreage of \$500,000, and claim that the city of Los Angeles is responsible.

Telegraph reports to the office of the Southern Pacific Railroad Company, received on the 5th instant, state that the fall of snow on the Sierra Nevada Mountains on the line of the Central Pacific Railroad is unprecedented in the winter of 1890. The snow in Washington are all delayed by snow storms. The weather is the coldest known there for years. At some places in Montana the thermometer registered 55 degrees below zero. Business was practically suspended in

Deadwood, South Dakota, owing to the intensity of the cold.

The New York correspondent of the Philadelphia *Lehigh* says: "The grip is now an undistinct fact. The increase in the death rate is not striking. The grip ceased to pave the way, in many cases, for attacks of pneumonia, bronchitis and consumption. Last week 1202 persons died in this city. The average for any week in January for years has been only 520. The death rate was higher than in any week for 1890 and last year. Pneumonia claimed 290 victims and influenza 90, while 19 deaths are attributed directly to influenza."

Influenza is now epidemic in the Eastern, Middle, and Central States. It seems to be most severe near the Atlantic seaboard, from Baltimore to Boston. The grip ceased to pave the way, in many cases, more than during the previous week and 126 more than during the corresponding period last year. Of the foregoing 260 were males and 232 females; 71 died of pneumonia; 69 of consumption; 37 of diseases of the heart; 30 of old age; 25 of typhoid fever; 22 of cholera; 17 of diphtheria; 16 of cramp; 15 of debility; 15 of inflammation of the bowels; 11 of inflammation of the stomach and bowels; 10 of diseases of the kidneys; 10 of inanition and 10 of marasmus.

Markets, &c.—U. S. 4½'s, 105; 4's, 126½; currency 6's, 116 1/4.

COTTON sold in a small way at 10½ cts. per pound for middling uplands.

FEED.—Winter bran, \$19.25 a \$12.75 for fair to prime; 100 lbs. for choice.

FLOUR AND MEAL.—Western and Pennsylvania super, \$2.50 a \$2.75; do., do., extras, \$2.75 a \$3.00; No. 2 winter family, \$3.25 a \$3.50; Pennsylvania family, stone ground, \$3.75 a \$3.90; Pennsylvania roller process, \$4.00 a \$4.25; Western winter, clear, \$4.00 a \$4.30; do., do., straight, \$4.25 a \$4.45; winter patent, \$4.50 a \$4.90; Minnesota, clear, \$3.50 a \$4.00; do., straight, \$4.25 a \$4.75; do., patent, \$4.85 a \$5.15. Rye flour was quiet at \$3.15 a \$3.25 per barrel. Buckwheat flour was quiet at \$1.70 a \$1.75 per bushel for new.

GRAIN.—No. 2 red wheat, 81 1/4 cts.
No. 2 mixed corn, 36 1/2 cts.
No. 2 white oats, 29 1/2 cts.

BEEF CATTLE.—Extra, 5½ a 5½ cts.; good, 5 a 5½ cts.; medium, 4½ a 4½ cts.; common, 3½ a 4 cts.; fat cows, 2½ a 3½ cts.

SHEEP.—Extra, 5½ a 6 cts.; good, 5½ a 5½ cts.; medium, 4½ a 5 cts.; common, 4 a 4½ cts.; culls, 3 a 3½ cts.

LAMBS.—Extra, 7 a 7½ cts.; good, 6½ a 6½ cts.; medium, 5½ a 6½ cts.; common, 5 a 5½ cts.

HOES.—Wagon, 5½ a 5½ cts.; good, according to condition.

FOREIGN.—A despatch from London, dated the 1st inst., says: "The boys' section of the Panpers' School in the District of Forestgate, in connection with the Whitechapel and Poplar Unions took fire last night while the inmates were asleep, and was burned with terrible results, 26 of the boys who were in the upper part being severely injured."

Fifty-eight other boys were safely taken from the burning building amid terrible excitement. Two of the matrons of the institution escaped in safety by sliding down the water pipes. Several of the boys escaped in the same way. The Superintendent of the institution, who had been in the building, was brought out a number of the inmates. There were 600 persons in the institution."

The British *Church Record* asserts that the Archbishop of Nicomedia has discovered a manuscript of the testament of the middle of the first century, containing the celebrated code of Sinaiticus.

The London correspondent of the *New York Times* says, respecting the prevailing influenza:

"Learned people have suddenly ceased to sneer at the popular belief that this malady is a precursor of the cholera, and that this weekly note increases the probabilities that it will come upon Europe through the familiar Caspian channels next summer, and warns people to put their houses in order against its advent. Cholera has now reached a terrible stage at Hamadan, and is progressing toward the Persian Gulf, and Teheran and northward into Kurdistan. Refugees are all flying toward the Caspian shore, and the frontier of the Caucasus, whence it will be a miracle if the contagion is prevented from spreading into Russia."

"The Paris correspondent of the *New York Herald*, on the 4th inst., says: 'In Paris the influenza has done its worst, which is bad enough. The sanitary condition of the city is still, however, far from satisfactory, as shown by the fact that no less than 425 funerals took place on one day. The significance of these figures will

be appreciated when one reflects that 200 funerals a day is a very large average ordinarily.'

The London correspondent of the *New York Sun* of the 10th inst., says: "The epidemic in Prussia, Germany and Austria, the epidemic, after showing signs of subsiding, has revived with almost its original vigor. According to an imaginative newspaper writer, half of Paris is sick and the other half is running to and from the doctors and druggists. Vienna has had a bad relapse, and Rome is worse than ever."

Dom Pedro's wife, Ex-Empress of Brazil, died in Oporto, the 10th month 28th, from heart disease. Her remains were brought to Lisbon on the night of the 6th inst. for interment.

The Spanish Ministry has resigned. Sagasta will attempt to form a new Cabinet on a basis that will reconcile the various Liberal groups.

Cable despatches received in Brussels from the Congo Free State, say that Governor General Janssens has succeeded the river Louanos and found it navigable as far as latitude 40.27, where large falls obstruct the further passage of boats. Affairs on the Upper Congo, the despatches say, are quiet, and the people are prosperous.

At a meeting of the "Consistory" in Rome on the 30th inst., the Pope said he was rejoiced at the building of Catholic universities at Washington, Ottawa and Fribourg. Catholicism, he said, prospered under the favorable laws of America and the equity of the men who administered them in that country. His joy at this prosperly rendered the river Louanos and found it navigable as far as latitude 40.27, where large falls obstruct the further passage of boats. Affairs on the Upper Congo, the despatches say, are quiet, and the people are prosperous.

There has been a skirmish between Turks and Cretans, in which many were killed and wounded. Sixteen wounded Turks were brought to Cana.

Great inclemency prevails throughout the agricultural district of Southern Russia, owing to the fact that the ground, which is ordinarily covered by three or four feet of snow at this season of the year, is entirely bare, while the temperature is even lower than usual. In these circumstances it is feared that the winter crops will be destroyed by a series of blighting frosts, leaving the inhabitants confronted by almost certain famine and disease next year.

Floods are reported in the northwest portion of Queensland. A part of the town of Normanton is submerged, the water in many places being 20 feet deep. Most of the adjacent country is under water. The floods cover an area of 500 miles.

There is said to be a feeling of considerable uneasiness in China as to the stability of the Government.

The young Emperor and Empress are believed to be 'unlucky' as they have been little but disaster since their accession. There is no loyalty in China, in our sense of the word, and there are great fears that troubles will arise from the general distress inevitable in this coming winter, and that if there were any man of eminence who saw advantage to be gained from such a rebellion, it would go hard with the present dynasty.

Dr. Barbosa, the Brazilian Minister, estimates that the total expenditure for 1890 will be 62,000,000 milreis; that the treasury balance will be 6,000,000, and that the balance from the Interior loan will cover the deficit and allow the completion of the interior contracts. The public debt is 1,072,000,000 milreis. (The par value of the milrei is about 56 cts.)

NOTICES

WESTWON BOARDING SCHOOL.—The Committee who have charge of this institution, meet in Philadelphia on Sixth-day, the 10th of First Month, 1890, at 11 A. M.

The Committee on Instruction meet the same day at 9 A. M., and the Committee on Finance at 10 A. M.

FOR "THE FRIEND."

Incidents and Reflections.—No. 206.

CONVERSION EFFECTED BY THE SPIRIT.

There is something very instructive and edifying in tracing the workings of the Spirit of God on the heart of man in order to his being turned from death unto life, and from the power of Satan to God. This change or conversion, when fully completed, is that regeneration or being born again, which our Saviour declares to be an essential experience of all those who would become partakers of eternal life.

The account of his "Christian Progress" which George Whitehead (one of the early ministers in the Society of Friends) has left on record, shows that the Lord followed him with judgment and reproof in his very young years, and renewed desires in him after the right way. He says: "In order to make us new creatures in Christ Jesus, the Lord's Spirit moves upon people's hearts, even when unstable as waters, and his Light shines in them before they know God or Jesus Christ, in order to give them the knowledge of the glory and power of God, and of his dear Son, Jesus Christ."

He was a soberly inclined lad of 17, when about the year 1653, he heard of the people called Quakers, then coming into notice in the North of England, where he resided, and attended one of their meetings. At this meeting he says: "There appeared to me a great work of the power of the Lord in the meeting, breaking the hearts of divers into great sorrow, weeping and contrition of spirit, which I believe was a golly sorrow for sin, in order to unfeigned repentance. I was the more confirmed herein, seeing a young maid go mourning out of the meeting, whom I seriously followed to observe her sorrowful condition; and beholding her, being sat down on the ground, with her face down toward the earth, as if she regarded no body present, she, mourning bitterly, cried out, 'Lord, make me clean.' O Lord, make me clean!" This did far more tenderly and deeply affect my heart than what I had heard spoken, and more than all the preaching that ever I had heard from man or men. It was a certain testimony to me, the Spirit of the Lord evidencing to my spirit, that it was a real work of his power upon her heart, which also operated upon the hearts of others, causing both trembling, sorrow and contrition, in order to bring them to true repent-

ance and amendment of life, and so truly to experience the work of regeneration and sanctification, from sin and uncleanness; and accordingly it proved so to many; glory to our God forever!"

Some time after this meeting, he was present at another, held in Westmoreland, where he first met with George Fox, and heard him preach. "I was there," he says, "very low, serious and intent in my mind, willing to see and taste for myself, for my own inward satisfaction; and I saw and felt that his testimony was weighty and deep; that it proceeded from life and experience; and did bespeak Divine revelation, and tended to bring to an inward feeling and sense of the life and power of Christ, and the sanctifying operation thereof in the heart. His speech was not with affected eloquence or oratory or human wisdom, but in the simplicity of the gospel, to turn the mind to the light and life of Christ; and the Lord abundantly blessed his ministry to many."

The reader will notice that on this occasion, as well as that previously described, George Whitehead's attention was turned to the work of the Holy Spirit on the heart, which is indeed the foundation of all true religion. The effect on his mind, he thus relates: "I was persuaded by the grace of God, to give up in obedience to follow Christ Jesus; to believe in and obey his Light given me; and to wait therein diligently, to receive power from Him to become a true child of God; for as many as truly receive Christ the Son of God, He gives them power to become sons of God."

His feet were now fairly turned out of the broad way that leadeth to destruction, into the narrow way which will bring all those who continue to walk in it to the end, to the Heavenly City. But he found that he "had a spiritual warfare to go through, and a body of sin to put off and be destroyed; and he was made willing to submit to the Lord's "fatherly chastisements and reproof of instruction." In passing through this dispensation, he says, the Lord "was graciously pleased often to renew his merciful visitations to my soul, and in the midst of judgments and chastisements, to remember mercy. The sense thereof did often break and tender my heart."

It is not the design of this article to trace the history of this dignified advocate of the cause of Christ to the end of his long career—for he died in the 87th year of his age, having been a minister of the gospel about 68 years. But the brief notice he gives of the meetings he usually attended in those early days is so instructively in harmony with the testimony already borne to the work of the Spirit in his conviction and conversion, that it may here be appropriately introduced. In them he speaks of "being much inwardly exercised in waiting upon the Lord, where we had little preaching; but our meetings were kept much and often in silence, or but few words declared. The Lord was pleased sometimes by his power and word of life to tender and open my heart and understanding, so that He gave me, among some others, now and then

a few words livingly to utter, to their and my own comfort, in Him who opened our hearts in great love one to another, which then increased and grew among us; blessed be the Lord our God forever!" It was out of these, and such frequently silent meetings, the Lord was pleased to raise up, and bring forth living witnesses, faithful ministers, and true prophets, in early days in Westmoreland, and other northern parts, in the years 1654 and 1655."

Charles Buck, in his collection of Anecdotes, tells us that when Flavel was in London in 1673, his bookseller gave him the following relation: "That some time before, there came into his shop a sparkish gentleman, to inquire for some play-books. The bookseller told him he had none; but showed him Flavel's little treatise of 'Keeping the Heart,' entreated him to read it, and assured him it would do him more good than play-books. The gentleman read the title, and glancing upon several pages here and there broke out into these and such other expressions—'What a fanatic was he who made this book!' The bookseller begged of him to buy and read it, and told him 'he had no cause to censure it so bitterly.' At last he bought it, but told him he would not read it. 'What will you do with it then?' said the bookseller. 'I will tear and burn it,' said he. He was then told, he should not have it. Upon this he promised to read it, and the bookseller told him, 'If he disliked it upon reading, he would return him his money. About a month after, the gentleman came to the shop again in a very modest habit, and with a serious countenance addressed the bookseller thus: 'Sir, I most heartily thank you for putting this book into my hands—I bless God that moved you to do it,—it hath saved my soul—blessed be God that ever I came into your shop.' And then he bought an hundred more of those books of him, and told him, he would give to the poor, who could not buy them." J. W.

John Howard.—"About the close of the year 1773," says Peter Bayne, "there might have been seen, on the highroads of the counties adjoining Bedford, England, a gentleman on horseback traveling at the rate of forty miles a day. At every town where he rested he visited the jail. There was no hurry in his motions; he never lost a moment; he never gave a moment too little to the business in hand; nothing escaped his eye, and there was no spot into which he did not penetrate. He went into places where the noisome and pestilential air compelled him to draw his breath short, where deadly contagion lurked, where physicians refused to follow him; unagitated, yet earnest, he measured every dungeon, explored every particular respecting fare, accommodation, and fees, and inquired after the prevalence of disease, with the means adopted for its prevention. He rested not until he had gone east and west, until he had carried his researches over the jails of Britain and Europe, until he could credibly declare what was the state of the prisons of the world. That gentleman was John Howard."

FOR "THE FRIEND."

The Burial Ground and Buildings at Arch and Fourth Streets.

Almost immediately after the arrival of the first settlers at Philadelphia, Friends acquired a burial place. It was an open lot without any enclosure whatever. In the Seventh Month, 1683, the Monthly Meeting ordered it to be fenced. This was done soon afterwards, and in 1686 it had been enclosed and had an entrance gate. It seems to have been a lot of small dimensions, as in 1690 it had "grown strait and too little," and Friends bought an adjoining piece for increased accommodations.

This burial ground does not appear to have been considered satisfactory, as in the Seventh Month, 1683, a committee was appointed to interview William Penn with reference to "a convenient place to bury the dead," which committee reported a month later that the Governor had decided "that the burial place should be in the middle of the city, in the same ground where the meeting-house was appointed." This would seem to indicate that Centre Square was contemplated. Whatever the scheme was, as late as 1687 it had not been carried out, for at that time another application was made to William Penn for the grant of "a more convenient place for a burying ground and other uses."

The location of this early burying ground cannot now be definitely settled, but it was probably within the limits of the present enclosure at Arch and Fourth Streets, as it seems likely that before that site had been settled on, it had become apparent that any such remote place as Centre Square was not desirable. No evidence has been found of the conveyance of any ground by Friends which can be identified with this first burial place.

Friends came into possession of the new burial place in 1693-4, and in the Ninth Month following steps were taken "to fence in the ground adjoining the burial ground for an interior piece for Friends." Title to the ground was not however obtained until 1701, when William Penn, being again in America, he executed a Patent to Edward Shippen and Samuel Carpenter for the ground in question; the plot being L shaped, 366 feet on Arch street and 353 feet on Fourth street, with an average depth of about 190 feet from both streets. The conveyance was in Trust "to the use and behoof of the people called Quakers, in Philadelphia, with whom I am now in communion, and who are and shall be in union and fellowship with the Yearly Meeting of the said people at London, for a burying place; and upon this further trust and confidence that the said Edward Shippen and Samuel Carpenter and their heirs, shall from time to time hereafter, transfer and make over the said two pieces of ground [it was described in two lots] and premises or any part and parcel thereof, to such uses intents and purposes as the Monthly Meeting of the said people at Philadelphia, shall at any time hereafter direct and appoint."

There has been much misapprehension, both as to the language and effect of this Patent. For a proper understanding of it, it must be remembered, that between the time that Friends came into possession of the lot and the date of the Patent, the Keithian separation had taken place. It is manifest that the object of the Founder was to cut off any claims which might be made by those who joined in that separation.

As respects the subsequent appropriation of the property, as the grant is for such uses in-

tents and purposes "as the Monthly Meeting of the said people at Philadelphia shall at any time hereafter direct and appoint," it is clear that the disposition of the property is solely in the discretion of the three Monthly Meetings in Philadelphia of the Middle, Northern and Western Districts, which stand in the place of the original Monthly Meeting.

The contents of the lot is nearly two and a-half acres, a space far more than sufficient for burial purposes at that early day, and for many years a large part of it was used as a pasture-field. Prior to 1727, a pale fence seems to have enclosed the ground, but about that time a substantial brick wall was built around the premises, which was probably coped with soap stone; but the height was not very great as there was frequent annoyance from boys climbing over it and using the enclosure for a play-ground. At this time there was a school-house on some part of the lot, probably at the south end fronting on Fourth street.

In 1731, the grave-digger was found to be conniving at "the setting up of grave-stones in our burial ground, and A. Morris and J. Warder were appointed to acquaint him that unless he be more careful for the future to prevent the setting up such marks of distinction, Friends will appoint some other person to that service in his stead, that will be more careful to observe the directions of this meeting."

If the Fifth Month, 1738, the question of the erection of a new meeting-house being under consideration, the Monthly Meeting came to the judgment that the burial ground was the proper place to build it. This subject was before the meeting for several years, and a subscription was started to raise funds to carry out the proposed design, to which friends in Barbadoes contributed £50. It was proposed to build the new meeting-house on the part of the ground which had been occupied by the school-house; but to this the overseers of the public school decidedly objected. The Monthly Meeting, however, insisted upon their right to use that part of the lot, but the project was afterwards abandoned.

In 1794 a committee reported to the Monthly Meeting "that the old ground was so full, that they did not think it advisable to continue to bury there longer than until another could be procured; and that it was expedient to provide new ground as soon as may be, and adopt the mode of burying regularly in rows." Prior to this time the method of burying seems to have been in family plots or without any regular plan. Burying in rows was an innovation introduced from England, and seems to have had its origin there in the overcrowding of grave-yards in the large cities.

In 1795 the project of erecting a meeting-house at Arch and Fourth streets, which had been held in abeyance ever since 1738, was revived, and although it was decided not to act upon it at that time, the judgment was clearly expressed that the site should be adopted when way opened to proceed. The following year it was concluded "to have that part of the ground on which it would be proper to erect such buildings marked out, and that no more interments should be admitted within the lines;" and it was further decided, "that by removing the earth from the part of the lot that was high, to other parts much lower, and hereafter burying in rows, it would answer the purpose of a burial place for a considerable number of years, besides accommodating those buildings." It was also deemed advisable "that a new wall should be built around the present grave-yard, of a proper

height to prevent boys and others from going into it. * * * the old wall being too low." Sufficient utility did not however exist to justify the latter part of these propositions being carried out, and it was not till 1801 that they were finally undertaken. It was concluded to build the wall nine feet in height from the pavement, as it now is. The estimated cost of these improvements was £1224 16s. 6d, but the actual cost reached nearly double that sum, which was defrayed by a subscription made by Friends.

The levelling of the ground caused much dissatisfaction with some. Elizabeth Drinker, wife of Henry Drinker, writes in her diary under date of Eleventh Month 9th, 1801, "They are levelling Friends' burying ground, as I saw from J. Downing's window. A shameful innovation in my opinion."

The highest ground was on Fourth Street, and was lowered about eighteen inches over a space about one hundred and thirty feet long by sixty-five feet wide. In the course of the work of grading and subsequently digging the foundations for the new buildings, some interesting circumstances were developed. It was necessary to remove the remains of some of the dead, and it was found in an interment of eighteen years, that the larger bones and skull with the hair only remained, being separated from each other, whilst the hair itself was not changed. At thirty years the larger bones were dry and all separated, and could have been, without difficulty, removed to a small space at the bottom of the grave. It may be added that the character of the soil in this ground is in the main such as to promote decay, being mostly dry and free from drainage from surrounding premises, as well as the surface being graded so as to throw the water off.

(To be concluded.)

The Wrecked Sailor's Consecration.

A ship, says John Blain, was wrecked amongst the rocks, near Cape Horn, and one seaman reached a lonely, barren rock. The day passed slowly away. He stretched his eye to the east and west, to the north and south, over the deep, dark, and ever restless waters—but no friendly sail appeared! The sun disappeared, and he sat down to pass in solitude the lonely night.

Hunger and thirst made strong demands, but he had no means to relieve them. The bread and the water were entombed with his companions. Nor had he any consolation to draw from a future world. The Bible and the Redeemer had been neglected and he was strangely indifferent. Another day came and passed, and another night. On the third night, as he lay on his back, gazing into the starry heavens, his past began to think about *God and eternity*, his past life and the interests of his soul. But all was dark. His skin was peeling from his face, his teeth all loose, his thirst almost intolerable, and death seemed to stand at his side. He had never prayed, nor did he know how to pray. A single commandment was all he remembered, and that commandment was his dear mother taught him when a child, And how should he meet that mother and his God in a future world?

His sins passed in review, and pressed on his guilty conscience, while bitter tears of repentance began to roll down his cheeks. Without knowing what the Lord required of him, he rose, *knelt on his knees*, lifted his feeble hands towards heaven, and there, on that lonely rock, he submitted all to God, and most solemnly promised, if his life was spared, he would *learn and do*

whatever God required. From that consecrated and blessed hour, peace flowed into his soul—Christ was his Saviour, and hope entered within the veil. The next day the life-boat from a passing ship took him from the rock. He landed in Boston, found the sailor's friend, and the "Sailor's Home," and listened to the gospel of peace. Father Taylor gave him a Bible, which he read with prayerful attention.—*Arvine's Cyclopedia.*

Pastoral System Among Friends.

Some persons who have favored the introduction into our Society of the plan of providing pastors or preachers for the different congregations by some regular system of church management, instead of leaving it to the drawings of the Spirit on the hearts of individual members, have been led to think that in so doing, they were reverting to a practice that was common during the early members of our Society. Such an idea was probably in the mind of Henry S. Newman, when he said in the Progressive Yearly Meeting of Kansas, as reported in the *Christian Worker*, "Come back to the good old times of Quakerism, before mysticism beclouded us, when every meeting was supplied with a minister." How inaccurate this assumption is, is shown by the following criticism on the above remark, which is taken from *The Western Friend*:

To aid and encourage the adoption of the Pastoral system, H. S. Newman asserts the above. It assumes a state of facts among early Friends, similar to the located and paid pastors and control of the ministry to-day; else it was dishonest to assert it at the time and place where it was uttered.

The ministry of early Friends was a "travelling ministry, and there is not a particle of evidence that any minister was ever located as a pastor in the whole history of early Friends. One of the frequently asserted distinctions between the ministry denounced by early Friends and their own, was that the false ministers went not "up and down like the apostles," but had a "settled place for money," while their own ministers travelled according to apostolic practice." The proof of this is abundant in such authors as William Penn, Edward Burrough, and Barclay the Apologist. In view of such statements as Newman makes, we reproduce a remarkable admission of the author of the "Inner Life of the Religious Societies of the Commonwealth." This author had access to the Swarthmore Papers, and his book is the most "destructive criticism ever made against early Friends. For this reason it is quoted in support of every modern innovation, to date, pastoral system and all. Yet this "destructive" author after twisting every scrap of evidence he could find to favor a paid, supplied or controlled ministry, at last says of the ministry of early Friends, "It was maintained as one of their distinctive principles that every minister should after apostolic practice travel," *Inner Life*, p. 379. On page 374 of same book, this "destructive" Barclay says of the same ministers, "They upheld a standard of thoroughgoing truthfulness."

If they taught and maintained as a distinctive principle, a travelling ministry, and opposed a ministry "settled in one place," and were "thoroughly truthful," they had no settled or located pastors.

Some idea of the authority of Barclay's Apology, as a statement of Friends' principles, may be gained from a fact stated on page 322

of the same author. He says that in the year 1700, Bristol meeting received and paid for three hundred copies of the Apology. In the Thesis to Proposition x, the Apologist says, "By the leading, moving and drawing of the Spirit ought every evangelist and Christian pastor to be led and ordered." See, 25, he says, "every true minister is sent of God." In Sec. 33, he closes his chapter on ministry by saying, "In a word we are, for a holy, spiritual, pure and living ministry where the ministers are called, ordered, actuated and influenced in all the steps of their ministry by the 'Spirit of God.'" If the minister was to be "ordered" in "all the steps" by the Spirit of God, if H. S. Newman could prove that they practiced some other way he would only prove that they had lowered their standard of thoroughgoing truthfulness.

To be in accordance with their own principles of a travelling ministry, and a ministry ordered only by the Spirit, if "a minister" for "every meeting" was supplied as Newman says, he was only a "travelling minister" and not sent by any man. A place might have been mentioned or suggested by one minister to another, but unless the minister felt ordered by the Spirit he could not go.

We felt this to be so important that an extensive search has been made in the writings of early Friends for cases to illustrate it; only a few can be given. William Penn says in the Preface to the Journal of George Fox: "He exercised no authority only over evil." Fox says in his Journal, page 96, "I was moved to send James Lancaster to hold meeting at John Williams," page 444, he says, "I laid this place before them, and they felt drawings to visit it."

Thomas Olliver in "Inner Life," who wrote to George Fox that three weeks before he had been told "that there was service for him at London," and says, "I have seen nothing against it, so to-day I was moved to write thee." Three weeks for consideration and then "moved to write" in this case; and they "felt drawings" in another; and the "moved" in George Fox's own case, shows that they were acting in strict accord with their principles of the ministry. There is no example showing that George Fox ever exercised any other authority. He himself says, "It is the greatest danger to go abroad except a man be moved of the Lord." *Journal Folio*, p. 269.

The author of the "Inner Life," &c., claims that George Fox turned his authority over to the London Morning Meeting, and gives an extract of one of its minutes in 1675, showing that ministers in London were "invited" to attend its meetings on Second-day morning, if not the minute says it is desired that "those who cannot, send a note signifying what meetings they intend to be at on First-day." This shows that no authority was being exercised, only a "desire" to know where the minister "intended" to be.

In "Reason Against Railing," written twenty-seven years after the Society was founded, and within two years of the above minute of the London Morning Meeting, William Penn replies to John Faldo who had charged that "we appoint ministers beforehand to speak at such a place" that it was, "A very lie I testify in God's fear," and adds, "we deny the suggestion, and renounce and judge such practice by the pure Spirit that has otherwise taught us. God preserve us from that dry heathen custom of Thomas Hicks." Such a testimony made by William Penn, in the midst of the period when the Pastoral advocates claim that "every meet-

ing was supplied with a minister" beforehand is overwhelming in its force. If William Penn was present in this day, he would need to pray, "God preserve us from the dry heathen custom of the Pastoral system," which "appoints most of its speakers beforehand."

Almost a strong rebuke of paying ministers is found in the Folio Works of Edward Burrough, page 156. Giles Fimin charged that a Friend minister had "collected five pound at a meeting." Edward Burrough replied, "This is a slander and false accusation. Thou hast heard and believed a lie. I testify against him, to be no Quaker who acted such a thing."

1. The ministry of Friends was a travelling ministry, and in no case a settled or pastorate ministry.

2. It was a ministry entirely ordered by the Spirit, with no exercise of man's authority, not even by George Fox or the London Morning Meeting.

3. It was a ministry not appointed beforehand.

4. It was a ministry that was not paid. In short it was a ministry as different from the pastoral, settled, man ordered, and directed ministry which H. S. Newman is aiding to establish in this country, as it was from the ministry which they everywhere denounced.

The assertion of H. S. Newman is unhistorical. There never was a time when Friends' meetings were "supplied" by a minister, as a pastor, as he would make believe.

CYRUS W. HARVEY.

FOR "THE FRIEND."

A Winter Walk.

A ramble through the woods on the afternoon of the 25th of Twelfth Month, confirmed the opinion I had long entertained that even in wintertime, the lover of nature can generally find matters of interest, if his eyes are open to see them.

One of the first things that arrested my attention was the peculiar manner of growth in the branches of some Buttonwood trees. Instead of gracefully dividing from the large limbs, like those of the Maple and other trees, they started out abruptly, sometimes almost at right angles with the limb which supported them. A similar irregularity was noticeable in the small branchlets. In most trees and shrubs the end of the branchlet, at the close of the growing season, is occupied by a bud, from which a new branchlet is developed the following year. There are also side buds which start in the axils of the leaves, and which sometimes grow and sometimes remain dormant. In the Buttonwood, the terminal bud generally dies, and the side buds develop, which gives the tree the appearance of the branches having been pruned and the growth thus forced into an irregular shape.

The winter thus far has been a mild one with us—so that the Winter Jessamine, a favorite vine in our village, is displaying its beautiful yellow blossoms in many of the gardens.

Yesterday in walking I met with a solitary flower of the Butter-cup. The common Chick-weed is also in bloom—and this afternoon I gathered a little clump of the Shad's Blossom (*Draba verna*). These specimens had anticipated the coming of the shad—and had been in bloom long enough to form a number of seed-vessels in the shape of small, flattened, oval pods. Although familiar with the plant for many years, I do not remember to have noticed before what is easily seen with a pocket lens, that the leaves are studded with little pimples from which

the hairs which adorn the surface start. They remind one of the appearance of the human skin called goose-flesh, which it assumes when chilled.

In the woods, where the path I followed led me, the dark green oval leaves of the Trailing Arbutus were frequent, and on plucking a small branch, I found the flower-buds sufficiently swollen to show the lighter colored corolla peeping out of the brown envelopes of the buds.

Some young plants of the Red Cedar (*Juniperus Virginiana*) had sprung up along the side of the lane, and the dark purple tint of the foliage was conspicuously unlike the green of the older trees. In the young Sweet Gums the bark was almost covered with the corky excrescences which are peculiar to this interesting tree. The slender vines of a species of Green Brier intertwined among the bushes, were ornamented with small clusters of shining black berries. Running over the ground in the sandy lowlands was a very slender, delicate little blackberry vine, whose leaves although still apparently alive, had become a beautiful red, which was brighter on the ribs on the under side of the leaves. It was the Running Swamp Blackberry (*Rubus hirtellus*).

One of the first objects that arrested the eye on entering the woods, was a beautiful bed of a tall green moss. Several other species were noticed, especially clinging to the roots or lower part of the trunks of trees. None of those seen were in fruit; but one species had pushed up fruit stalks which were yet in an immature condition.

A grayish-green mass-like plant, consisting of stems excessively branched and intimately interlocked, was growing here and there. It was a species of lichen closely allied to that called Reindeer-moss, which in winter-time forms an important part of the food of the Lapland Reindeer. It is found in nearly all parts of the world, but is most abundant in Arctic regions.

Growing on dead branches or on stumps of trees, were numerous species of Fungi. One of the largest of these was of a cream color, and possessed a most curiously complicated set of gills on the underside, which reminded one of the convolutions of the brain. Two other species were red, one of them of a very deep and rich shade; and one twig was closely covered with a growth of small white fungi, whose surface was covered with delicate hairs like the pile of velvet.

Several interesting traces of insect life were met with; and a nest of a species of Vireo, or Warbling Fly Catcher, from which it is to be hoped a brood of young birds were safely reared.

J. W.

"Let no reader be so fastidious as to censure the simple style of George Fox. Though unlettered, he possessed a sound judgment and a quick apprehension. But had he been, as were many more of the advocates for the inward light of Christ, and for a self-denyng life, deficient in acuteness of understanding, this would not detract from their virtue, nor from the purity and excellence of religion. If the offices of religion are often filled by persons not distinguished by superior mental acquisitions, one cause of it may be the too frequent refusal of talents and learning to be used in subjection to the humbling power of the cross. It seems difficult to quit this subject, without expressing an ardent wish, that, amidst the career of prosperity, and the captivating charms of indulgence, some reader may be found, who may be willing here to pause; to consider with Barclay, 'that the

height of all happiness is placed in the true knowledge of God, and to inquire seriously of the Divine witness in the heart: 'Am I really concerned to obtain and to preserve this knowledge, or is it the whole or the chief business of my life to pursue things of a temporal nature?'"

—J. Barclay.

BURNING DRIFT-WOOD,

BY JOHN GREENLEAF WHITTIER.

Before my drift-wood fire I sit,

And with every wail I burn,
Old dreams and fancies coloring it,
And folly's unalaid ghosts return.

O ships of mine, whose swift keels cleft
The enchanted sea on which they sailed,
Are these poor fragments only left
Of vain desires and hopes that failed?

Did I not watch from them the light
Of sunset on my towers in Spain,
And see, far off, uploom in sight,
The Happy Isles I might not gain?

Did sudden lift of fog reveal
Arcadia's tales of song and spring,
And did I pass, with grazing kelp,
The rocks whereon the sirens sing?

Have I not drifted hard upon
The unmapped regions lost to man,
The cloud-pitched tents of Prester John,
The palace domes of Kubla Khan?

Did land winds blow from jacinth flowers,
Where Yuth the gemless Fountain fills?
Did Love make sign from rose-blown bowers,
And Gold from Eldorado's hills?

Alas! the gallant ships, that sailed
On blind Adventure's errand sent,
Howe'er they laid their courses, failed
To reach the haven of Content.

And of my ventures, those alone
Which Love had freighted, safely sped,
Seeking a good beyond my own,
By clear-eyed Duty piloted.

O mariners, hoping still to meet
The luck Arabian voyages meet,
And find in Bagdad's moon-lit street
Haroun al Raschid walking yet!

Take with you, on your Sea of Dreams,
The fair, fond fancies dear to youth:
I turn from all that only seems,
And seek the sober grounds of truth.

What matter that it is not May,
That birds have flown, and trees are bare,
That darker grows the storming day,
And colder blows the wintry air!

The wrecks of passion and desire,
The castles I no more behold,
May fifty feed my drift-wood fire,
And warn the bands that age has chilled.

Whatever perished with my ships,
I only know the best remains:
A song of praise is on my lips
For losses which are now my gains.

Heap high my hearth! No worth is lost:
No wisdom with the folly dies;
Burn on, poor shreds, your holocaust
Shall be my evening sacrifice!

Far more than all I dared to dream,
Unthought before my door I see:
On wings of fire and steeds of steam
The world's great wonders come to me,

And holier signs, unmarked before,
Of Love to seek and Power to save,—
The righting of the wronged and poor,
The man evolving from the slave,

And life, no longer chance or fate,
Safe in the gracious Fatherhood,
I fold o'er-wearied hands and wait,
In calm assurance of the good.

And well the waiting time must be,
The brief or long its granted days,
If Faith and Hope and Charity
Sit by my evening hearth fire's blaze.

And with them, friends whom Heaven has spared,
Whose love my heart has comforted.
And, sharing all my joys, has shared
My tender memories of the dead,—

Dear souls who left us lonely here,
Bound on their last long voyage, to whom
We, day by day, are drawing near,
Where every bark has sailing room.

I know the soleran monotone
Of waters calling unto me;
I know from whence the airs have blown
That whisper of the Eternal Sea.

As low my fires of drift-wood burn,
I hear that sea's deep sounds increase.
And, far in sunset light, discern
Its mirage-lifted Isles of Peace.

—The Independent.

SELECTED.

NEARING THE END.

I'm growing old; the hopes and fears
That waged an ever varying strife,
No more awaken smiles and tears,
Disturbing my serene life.

The ardent love, the jealous throes,
Which burned and raged without sur-cease,
Have left me; and the gentle glow
Of sweet contentment, brings me Peace.

Strong passion owns my reason's sway;
Calm pleasure comes, where love's bestowed;
And quiet friendship smooths my way
Along life's peaceful autumn road.

No unknown future threatens ill;
No fierce ambition drives me on;
I gaze from life's sublime hill,
On dangers past, and victories won.

What though my natural powers decay—
My lessening time makes less demand;
The labor done, at close of day,
The farmer resting views his land,—

And sees the harvest waving fair,
The ridy rows with plow filed;
Sees fruitful fields erst barren bare—
The harrens bare his hands have tilled.

So looks life's landscape to my eyes;
My earthly work is nearly done;
A calm comes to me from the skies,
As slowly sinks life's setting sun.

—Jesse H. Lord.

Mistaken Kindness.—A recent writer illustrates the mischief of false tenderness in the training of children in the following manner. He says, a person who was greatly interested in entomology secured, at great pains, a fine specimen of an emperor moth in the larva state. Day by day he watched the little creature as it wove its cocoon about it, which is very singular in shape, much resembling a flask. Presently the time drew near for it to emerge from its wrappings, and spread its large wings of exceeding beauty. On reaching the narrow aperture of the neck of the flask, the pity of the watcher was so awakened by the struggle necessary to get through that he cut the cords, thus making the passage easier. But alas! his false tenderness destroyed all the brilliant colors for which this species of moth is noted. The severe pressure was the very thing needed to cause the flow of fluids which create the marvellous hues. Its wings were small, dull in colors, and the whole development was imperfect. How often we see similar results in character when parents, thinking to help a child over some hard place, rob him of strength of purpose and other qualities essential to the highest attainments in mental and spiritual life.

John Thomas.

"In this year [1682] died John Thomas of Gwynedd in Pennsylvania, who had removed thither with several others of his countrymen, from Larthgum in Merionethshire, whose character, Hugh Roberts, his friend, acquaintance and countryman, has drawn to the following portrait: He was a man distinguished above the generality of his neighbours in his native country for the solidity of his understanding and excellency of his natural parts. In the year 1672 he was convinced of the principles of the people called Quakers, and being a time of hot persecution, proved the sincerity of his motives for joining them in society; for immediately upon his first conviction he had his share of the sufferings to which the people, whose professions he had adopted were exposed. The first two meetings he was at he was informed against and fined, and for these fines, which could not legally exceed 15s. the informers took from him two oxen and an horse, and returned nothing back. But he seemed to feel less for his own sufferings than for those of his poor friends, inasmuch that he hazarded the loss of his own estate to save them and theirs; for the principal informer, a subtle man, and intent upon his prey, perceiving a reluctance in the high and petty constables to execute the warrants to the injury or ruin of their peaceable neighbours, had formed a project to get himself appointed high constable, in order to make his gain sure, and expedite the impoverishing or ruining of friends in their estates, and most of the magistrates of this age being disposed to give encouragement to the vilest characters, and invest them with power to do mischief to dissenting virtuous persons, would not give his man hopes of success in his application. John Thomas, hearing of his design, and foreseeing the great loss and distress likely to accrue to friends thereby, applied himself to one of the more moderate justices, and requested he might be accepted for that office, which was granted. The informer upon this continued his informations against Friends, and procured warrant after warrant for distrains, which he brought to the high constable to execute, but he being principled against it, told the informer he was responsible, and kept the warrants by him till they had got nine, expecting at the same time to be prosecuted by the informer, to his great loss or ruin in his outward circumstances; but Divine Providence, who directs the actions of men to his own wise purposes, rescued him from the impending sufferings; for now the king's declaration for liberty of conscience put a stop to the power and office of those informers.

"Being faithful, after some time he received a gift in the ministry, in the exercise whereof he became very servicable amongst his friends in his native country, by whom he was greatly respected and beloved during his residence amongst them. At what time he removed to America doth not appear, but it is most probable in the emigration of last year, and that he did not long survive his removal. His sickness was tedious, but the weakness of his body did not diminish the strength of his love to pure religion, or to the prosperity of his friends and family therein, to whom he imparted many lively exhortations, during his indisposition, to religious care of their conduct in fidelity to God and man. A little before his departure he said to some friends present, 'Friends, wait upon the Lord, for he is near;' and then expressed his resignation in this ejaculation:

'Blessed be thy name, Lord God everlasting, thy will be done in earth as it is done in heaven.' In this resigned temper he calmly took his leave of his friends present, giving his hand to them one by one, and in an heavenly frame of mind departed this life the Third-day of the Third Month, 1683."—*Vol. iii. of Gough's History.*

A young man does not always find it easy to get on in the world without education, or family influence, or personal friends, or property, or birth; but he will find, in the long run, that it is far easier for him to make his way among men without any or all of these advantages, than to make substantial progress in the world without the reputation of a good character, even though he has all these other possessions. Character stands for something everywhere, in spite of its frequent slights. Men who are themselves lacking in a good character appreciate and value it in others. A band of robbers would wait at a honest treasurer. The young man whose will cannot be believed, whose honesty is not above suspicion, and whose personal life is not what it ought to be, is not the young man that the business world has open places for. He may have health and wealth, an amiable family position, and a host of friends; but if he is without character, he is at a disadvantage in every position in life. When a young man who has lost his good name makes an honest effort to recover it, he finds that his way upward is a hard one,—a great deal harder, in spite of all other helps, than it would have been if he had made a right start without these helps. Friends are comparatively powerless in their efforts to win confidence for one who has proved himself unworthy of it on former occasions. Then it is that the young man is likely to realize as never before that "a good name is rather to be chosen than great riches"—even as a worldly investment. Because it is so hard to get on without a good name, or to regain it when once surrendered, every young man who has that possession ought to count it above price, and to have a care lest he lose it.—*Selected.*

CHRISTIANITY forbids no conceivable good motive, and permits no conceivable bad motive. Whatever fault or wrong may exist in the life of the individual Christian, or in the administration of the Church as an institution, that fault is just the part of that life or institution, which is not a part of its Christianity. No reform, or improvement is possible in any church, or to any individual, which is not within the lines of the Christian system. That which is Christ-ward is good and true. That which is good and true is Christ-ward. And yet there are evilers who are trying to find good in any direction that appears to them not to be Christ-ward. Anything would do for them, if they were just sure that the principles of Christianity did not include it, and that the Church did not teach it. Even Professor Huxley, the apostle of Agnosticism, says that he can conceive of the existence of an Established Church which should be a blessing to the community,—a church devoted to "the setting before men's minds of an ideal of true, just, and pure living; a place in which those who are weary of the burden of daily cares should find a moment's rest in the contemplation of the higher life which is possible for all, though attained by so few." Could Professor Huxley have found a better description so far, of the purpose of true Christianity, and of the true Church of Christ?—*Selected.*

A Chinaman's Charity.

Ah Doo, a Chinaman, very well known in Alameda, was sitting in a depot in that city lately, waiting for a train, when Charles Kaiser entered, and in an insolent manner asked the Mongolian for a cigar. The Chinaman replied that he had none to give, whereupon Kaiser became very abusive. Ah Doo knew his rights, and going outside, hailed a policeman, who arrested Kaiser for disturbing the peace.

He was brought before Justice Byler and pleaded guilty, but begged the mercy of the court, saying that he had a wife and two children dependent upon him for support in Oakland. The Justice believed his story, as he told it in a very pitiful way, and informed Kaiser that he would let him off with a \$5 dollar fine. Kaiser dug down into his pockets, but could find only \$3. Ah Doo had listened to the man's plea for mercy, and his heathen heart had become softened toward the prisoner. Putting his hand into his pocket the Mongolian drew forth \$2 and offered it to Kaiser to make up the fine.

Kaiser turned with a savage glance at the charitable Chinaman and poured forth a volley of abuse, saying that he was above receiving alms from a Chinaman.

"Take the prisoner to the lockup and I will pass sentence on him to-morrow," said the Justice, who became convinced that any sympathy for the man was misplaced. Kaiser will now probably spend several days in the County Jail.—*Oakland Evening Tribune.*

THERE are a great many sayings in the Bible which are not true, and which are not put there as truth. The record of them is true, but the record shows that they are not spoken by those whose word is entitled to be taken without question. Peculiarly is this the case in the Book of Job, where the sayings of Satan and Eliphaz and Bildad and Zophar, and others, are given in their order, and yet are rebuked as untrue by God himself. Yet detached texts from the Book of Job are often cited as if they must be in themselves, the utterances of inspiration. "All that a man hath will he give for his life," said one Christian worker in conversation with another. "What makes you think so?" asked the other. "Because the Bible says so" was the answer. "But who was the speaker of those words in the Bible story?" asked his challenger. "Well, I don't remember just who it was," replied the other. "It was the devil, and he lied when he used these words; and the whole book of Job is written to prove that he lied; but here you are quoting his lie as if it were God's truth." This illustrates the danger of taking detached texts from the Bible record as if they were all alike valuable in the presentation of important truth.

Some people have a great passion for outward display who are not at all concerned for their inward decency and respectability. They would consider themselves disgraced if they had to walk to church, but they do not appear to feel the slightest twinge of shame on account of their failure to pay for the fine carriage in which they ride. They wear the most fashionable clothes, and drive the fastest horses, and display the grandest equipage to be found in the community; but the price of all this grandeur is paid by others. They have a genius for cheating their creditors out of their dues which is marvellous.

A Western man, who carried on a flourishing business, and kept a splendid span of bays, and lived in the most luxurious style, but could not

he induced to pay his debts, was sued by a creditor, and in open Court he testified that he owned nothing, but worked for his board and clothes. Like many other knaves, he had taken the precaution to convey all his property to his wife, and then fire sumptuously at the expense of merchants whom he could induce to trust him. It is said that some church members have been guilty of these tricks. Certainly some who move in good society belong to this class of scoundrels. If the secret financial history of some apparently wealthy families were published, they would soon lose their exalted social position. External splendor is a poor substitute for real excellence. The true glory of a man is an upright heart and a good name.—*Christian Advocate*.

A Ruined City in Texas.

The surveys at present being made for the Kansas City, El Paso and Mexican Railroad, at a point north latitude 33 degrees and west longitude 106 degrees, have passed along the lava flow which by the local population is called the Molpais. It consists of molten black glass, agitated at the moment of cooling in ragged waves of fantastic shapes. These lava waves or ridges are from ten to twelve feet high, with combing crests. This lava flow is about forty miles long from northeast to southwest, and from one to ten miles wide. For miles on all sides the country is the most desolate that can be imagined. It has been literally burned up. It consists of fine white ashes to any depth which, so far, has been dug down. To the north of the lava flow, and lying in a country equally desolate and arid, the surveyors have come upon the ruins of Gran Guivera, known already to the early Spanish explorers, but which have been visited by white men less often even than the mysterious ruins of Palenque, in Central America. Only a few people at Socorro and White Oaks have been at Gran Guivera, because it is at present forty miles from there. The surveyors found the ruins to be of gigantic stone buildings made in the most substantial manner of grand proportions. One of them was four acres in extent. All indications around the ruins point to the existence here at one time of a dense population. No legend of any kind exists as to how this great city was destroyed or when it was abandoned. One of the engineers attached to the surveying expedition advances the theory that Gran Guivera was in existence and abundantly supplied with water at the time the terrific volcano eruption took place.

His Heart In It.

A manufacturer in Philadelphia lately told to a friend the story of one of his superintendents.

"Twelve years ago a boy applied to me for work. He was employed at low wages. Two days later the awards of premiums were made to manufacturers at the Centennial Exhibition.

"Passing down Chestnut Street early in the morning, I saw Bob poring over the bulletin board in front of a newspaper office. Suddenly he jerked off his cap with a shout.

"What is the matter?" some one asked.

"We have taken a medal for sheetings!" he exclaimed.

"I said nothing, but kept my eye on Bob. The boy who could identify himself in two days with my interests would be of use to me hereafter.

"His work was to deliver packages. I found that he took a real pride in it. His wagon must

be cleaner, his horse better fed, his orders filled more promptly than those of the men belonging to any other firm. He was as zealous for the house as though he had been a partner in it. I have advanced him step by step. His fortune is made, and the firm have added to their capital so much energy and force."

"Never buy a draught horse," says the *Farmers' Guide*, "which needs the whip to make him pull."

We find in a Southern paper a remark which points the same truth in other circumstances. A Northern man with a small capital settled ten years ago in a town in Georgia. He established a thriving business, started a library, a lyceum, street-cars, and a hospital, and became one of the most popular men in the town.

When he died last summer, the leading journal said: "The secret of the powerful influence which this stranger acquired among us was that he never said, 'I and mine,' but 'We and ours,' And he meant it."—*Youth's Companion*.

Scripture Illustrations.

BY H. B. TRISTRAM, CANON OF DURHAM.

Forced Labor in Israel.—We read that Solomon gave Jeroboam "charge over all the labor of the house of Joseph" (Rev. Ver.); that is, he had the direction of the forced labor for public works, the "heavy yoke" of which the people so bitterly complained to Rehoboam. This system of forced labor is still the curse of many Eastern nations. For all public works in all Eastern countries, the governor or pasha can demand the unpaid labor of every one. When a royal progress, for example, is in prospect, a *levee en masse* is made to clear the roads and furnish up the streets. But very often the exaction is enforced for works of luxury, as royal palaces, or for works of irrigation, from which the laborers are only a portion of those benefited. In Egypt, this cruel system ground down the peasantry up to the time of the English occupation. I have myself seen the whole male population of several villages driven together, at the bayonet's point, to toil at some *barrage* or irrigation work for weeks together, receiving only the barest rations, and their families left to starve or live as they could meanwhile, with no provision whatever.

A Sign in Abilene.—I have seen, in the pass of Abilene, a magnificent aqueduct and chariot road hewn in the sides of the rock, and at the end a long Latin inscription laudatory of the Roman emperor and the prefect under whose beneficent auspices the work was done. But below is added, in different letters and by a different hand, "at the cost of the people of Abilene." Even in the militarily governed portion of Algeria the system has been but recently abolished; and while travelling in the Algerian Sahara, under the sanction of the French Government, I found that all the camels and Arabs provided for me were under the *corvee*, and that payment was an act of free grace.

Monuments of Bondage.—The oppression of Israel in Egypt has had its counterpart ever since. Whenever we gaze admiringly on the stupendous structures of Egypt, or explore the mounds of Nimrod, we may not forget the hard bondage and the cruel serfdom which raised these monuments of selfish power and wealth. Even for the building of the temple, Solomon had raised a levy of 30,000 out of all Israel, whose labor was exacted for one month of every three; besides 150,000 serfs, laborers

and hewers. We may note that Adoniram, who was Solomon's officer over this levy or tribute (1 Kings 5:14), was the first victim of popular fury on the revolt from Rehoboam.

A Harmony of Records.—It is interesting to note that in Shishak, the King of Egypt, to whose court Jeroboam fled, we have the first Egyptian king who is spoken of in Scripture by his own special name, the Sheshonk of the Egyptian monuments. From these we obtain also his date, which would fix his accession in the thirty-second year of Solomon's reign, and thus we have the chronological harmony of the Hebrew and Egyptian records.—*S. S. Times*.

Natural History, Science, &c.

A Natural Arithmetician.—The *Louisville Commercial* mentions a negro named Sam Summers, 34 years of age, who is without education, can neither read nor write, is a common farm-hand, and seems to be about half-witted; but whose ability in solving arithmetical questions is simply wonderful.

The following are some of the examples submitted to him, and he never failed to give a correct answer: How much gold can be bought for \$972 in greenbacks if gold is worth \$1.65? Multiply 597,312 by 13%. If a grain of wheat produces 7 grains, and these be sown the second year, each yielding the same increase, how many bushels will be produced at this rate in 12 years if 1000 grains make a pint?

Those who have tested him as yet have been unable to find any example in the higher arithmetic, that, with a few moments' thought on his part, he is not able to correctly answer.

A Poison in Castor-oil Seeds.—A chemist has recently succeeded in separating a virulent poison from the seeds of the Castor-oil plant (*Ricinus*), after the oil has been pressed out. It possesses a remarkable power of coagulating the blood. The name *Ricini* has been given to this substance.

Flour Moth.—The *Toronto Globe* says that an insect has appeared in Ontario which promises to be very troublesome. It was imported, it is believed, in some preparation for children's food, from the Mediterranean, where it is a dreaded scourge. It was first seen in the Third Month of 1889 flying near the Ontario mill, but in the Seventh Month, the moths and worms became so numerous that the mill was shut down.

Bark Cloth.—Tapa, as the native cloth is termed in the Samoan language, is manufactured from the bark of the "Ca," or paper mulberry tree (*Pappijrifa Brossonnetia*), cultivated especially for the purpose. The tree is raised from cuttings, and has a very rapid and upright growth, putting forth few lateral branches. When it arrives at about four inches in girth it is cut down and carried into the village by the men. From this point it is handed entirely over to the women for preparation and manufacture. The bark is now in its entirety stripped off the sticks, from which, when freshly cut, it separates itself readily, as does also the inner white bark from the valueless outer skin. The former is then steeped in water, generally being anchored down in the river with stones all night to soften the fibre. The next day will be seen scattered in every direction along the stream, sitting in the water with all sorts of sunshade contrivances, picturesque groups of girls and women, of all sizes and ages, with sloping boards in front of them, on which each strip of bark is successively placed, and with constant application of water scraped with a

"pipe," or cockle-shell, until all the vegetable matter is separated from it, and there remains nothing but a spongy white material ready for the next process. It is now taken to the house, and, on a rounded hard-wood log kept for that special purpose, is pounded with wooden beetles, both ribbed and smooth, until the bark is greatly expanded, which can be increased to any reasonably desired extent, of course proportionate to the thickness wanted.

The sound of fifty or sixty of these mallets all going at the same time in one village is by no means unpleasant to the ear, the resonant clash of the hard woods producing somewhat musical notes. At times, the tapping will be very mixed, without the least suspicion of regularity; at others, more especially following a general lull, the performers will start afresh, keeping most excellent time, evidently in some previously concerted accordance, and with some generally known measure. Oftentimes, previous to knocking off work for the night, a regular concert will be arranged, in which all will join from one end of the village to the other, with a pleasant and most novel effect. Each piece, when hammered out to the requisite thickness, is spread on the stones in front of the house to dry; and when a sufficient quantity is ready, the women proceed to stick the pieces together with arrow-wood gum, layer over layer, and overlapping side by side, until a cloth of proper thickness and size is manufactured. It is then painted with the various pigments at their disposal, of any color and of any design that may be thought fit, made up into large rolls, and deposited among the roof-beams for future personal use or barter whenever it may be required.—*Churchward's "My Consulate in Samoa."*

Barrancos or Cañons in Brazil.—Imagine a track along the top of a gently sloping and undulating ridge of open plain, when suddenly you come to a place where the path dips a little, and has only a slight margin, with a total width of say 4 or 5 feet, while on each side there is a huge amphitheatre, from which the red earth has been washed away by the rains. I saw many of these *barrancos* in all stages of formation. They begin with a subsidence, caused by the undermining of the ground by springs; the rains then work upon the subsided portion, washing it gradually away, and the Cañon increases in size as the sides fall in, so that at length you have a huge area of many acres, in some cases, with more or less precipitous sides, often one to two hundred feet deep, the whole area being intersected by a hundred fantastic knife-shaped ridges and columns of bare red earth. The effect of coming suddenly on one of these chasms in the midst of an extensive grass-covered down is very remarkable.—*Dent's Year in Brazil.*

Carapato or Bush-Ticks of South America.—Dent, in his *Year in Brazil*, says the Carapato is a degenerate spider, and caused him more annoyance than any other animal, reptile or insect that he met with in that country. The Carapato lays an enormous number of eggs—not on the bodies of animals where they have lived, but on the ground. The young which emerge from them climb up the plants, holding on to the leaves, and wait until some animal passes. Bates, in his *Naturalist on the Amazon*, says that it occupied him a full hour daily to pick them off after his diurnal rambles. Nor is this surprising, for in some places "every blade of grass has its colony; clusters of hundreds adhere to the twigs; myriads are found in the

bush thumps. Lean and flat when growing on the leaves the tick catches man or beast brushing by, fattens rapidly, and at the end of a week's good living, drops off, full of blood.

"Their favorite habitat is the second growth, (after the virgin forest has been cut down), where the cattle graze."

Dent relates that one day, after returning from his outdoor work, he had 279 carapatos removed from his body, and during the night he got rid of 35 more. He had been too tired to sponge with his diluted carbolic acid (his usual practice).

This nuisance very much disappears on the coming of the rains, which wash the insects off from the bushes.

Items.

Friends of Pasadena.—There are two meetings under the name of "Friends," held at Pasadena, California. One is of a *Progressive or Past* character, and recently a number of its attenders, along with the person who had been employed as *Pastor*, were baptized in water.

The other meeting is held in a private house, and is composed of Friends who are members of Ohio, Iowa, Philadelphia, and perhaps other Yearly Meetings. It is held after the ancient manner of Friends. Recently some of those who attend, on behalf of the others, drew up a statement of their condition, a copy of which was to be forwarded to the different meetings for discipline from which the members came and where their right of membership still remained. On Second Mo. 30th, at Chester Monthly Meeting, Pa., to which two of the Pasadena Friends belong, a suitable reply to this document was produced by a committee to whom it had been referred a month before, and was adopted and directed to be forwarded.

The Tract Repository.—The Report of David Heston, publisher of this valuable paper, for the year 1889 says:—

"During the year, as in some previous ones, there has been much to cheer and encourage. Perhaps, since the first issue, there has not been a time when the usefulness of the publication has been more apparent than now. The number of communications which have come to hand since the last number was issued has been larger than usual, while each day brings a number of additional ones. These are quite generally profuse in the expression of thanks to Friends at the North for the packages of papers that have been entrusted to them for distribution in their schools and elsewhere, and also earnest in solicitations for their continuance, while not a few have spoken most encouragingly in regard to the influence for good the paper is having upon those who read it, some expressing themselves more fully than others, that this influence was becoming more and more apparent, especially among the young people, who had been its constant and interested readers. These letters also often state that the number of copies of *The Tract Repository* are looked forward to with much apparent satisfaction, and that there was a general eagerness to receive them.

The evidence that is thus afforded that this work is being blessed more and more as it goes on from year to year, must be cheering to all true and interested friends of the colored people in the South, who, it is to be hoped, are gradually being roused from their long degrading and ignominious condition, incident to long years of bondage and its attendant evils.

The publisher feels that the little we are doing in benefiting this poor and despised race of people by circulating among them *The Tract Repository*, is but as a drop in the bucket to what might be done, if more aid were bestowed for that purpose, yet this need not deter us from doing what we can with such means as we can spare without unduly burdening any, yet he deeply regrets that there is a necessity of still further curtailing the edition for the coming year to relieve the Fund from the debt that still rests upon it, and to prevent it from becoming still further indebted to the public for the printing of it, it must needs disappoint many more poor

colored people (largely children), who are so anxious to receive and read *The Tract Repository* monthly and the great bliss felt is heightened by the apparent and truly encouraging fact that the minds of these would-be readers, as well as those who have the opportunity afforded them, appear so open to receive these influences for good.

While earnest Christian people of other religious denominations are actively engaged in promoting a variety of missionary enterprises of a laudable character, they are generally not so fully alive to the loss or less out of harmony with our principles, which are founded, as we believe, in unerring Truth. As we cannot, in a general way, co-operate with these consistently, it may be well for us, as a people, to see to it that we are doing all we can, in embracing every right opening to promote the cause of Truth and Righteousness in the South. Friends so disposed may, we believe, promote a good work through an unobjectionable channel, by lending their aid in extending the circulation of *The Tract Repository* among the millions of colored people in the South, who might be glad to read it if they were regularly placed before them. Shall we not then endeavor, as far as we can, to extend still further its circulation among these people, rather than to allow it to lessen from year to year, when so ripe a field for good is undoubtedly opened before us?

The average monthly edition for the past year has been 11,400 copies, distributed much as in former years, most largely in the South Atlantic States, with a considerable portion in the Gulf States, and a smaller number of copies in other parts of the South.

The receipts and expenditures for the year have been as follows:

<i>Receipts.</i>	
Contributions of \$1.00 and over, received, up to Twelfth Mo. 15th, 1889,	\$805 87
Subscriptions and amounts under \$1.00,	24 99
	\$830 76

<i>Expenditures.</i>	
11,400 copies monthly, at 7 cents a year,	\$798 00
Amount in indebtedness, Twelfth Month 15th, 1888,	897 76
Excess of receipts for the year over expenditures,	32 76

Amount still due the publisher, Twelfth Month 15th, 1889,	\$61 00
---	---------

Very respectfully,

DAVID HESTON,

Frankford, Philad'a, Twelfth Mo. 15th, 1889.

Seamen's Friend Society.—The Annual Report of the Pennsylvania Seamen's Friend Society states that the Seamen's Home, No. 422 South Front st., has received 698 boards during the past year; that during the same period 65 libraries have been placed on board of ships; 383 Bibles and Testaments in 8 languages have been sent out, and a large number of tracts.

The Home for Aged and Infirm Colored Persons.—The 26th Annual Report of the Managers of this institution, presented at a meeting held Sixth Mo. 15th, 1889, states that the family in the Home then consisted of 121 persons. The number of deaths during the year was 16, and the average age of the deceased was over 52 years.

ONE reason why so many prayers are unanswered is, that so many prayers are those which ought not to be answered. We ask God to do what seems best to us, instead of asking God to do what seems best to Him. We ask God to give us help in the line of our plans, instead of asking God to show us how we can give help in the line of his plans. If only we are always ready to pray that God's will may be done, our prayers are sure to be answered, and we shall have reason for thankfulness accordingly.

I know of no state harder to reach than that of an elder, overgrown with the earthly nature.—*M. Ratliff.*

THE FRIEND.

FIRST MONTH 18, 1890.

It is a great and fundamental doctrine of all true religion, that the spirit of God visits the hearts of all men, to lead them in the way of holiness; and that to those who are obedient to its leadings, it becomes an ever-present and ruling principle of life. This is implied in the exhortation of the Apostle Paul to the Corinthians, "Examine yourselves, whether ye be in the faith; prove your own selves." Know ye your own selves, how that *Jesus Christ is in you*, except ye be reprobates?" And in a previous epistle to the same church, he uses this remarkable language: "Know ye not that ye are the temple of God, and that the spirit of God dwelleth in you?" And from this he presses the necessity of purity and holiness in the words, "If any man defile the temple of God, him shall God destroy; for the temple of God is holy, which temple ye are."

If all the professors of Christianity, my, more, if all men everywhere were sensible of this most solemn truth, that each one of them is in some sense a "temple of God," and that the Great Ruler of the universe will hold him responsible for the care with which he preserves it from defilement and injury, what a strong inducement would be presented to refrain from every unallowable indulgence of the appetites and passions!

The physiologist and the moralist may show with convincing clearness that a course of sensual indulgence will waste the vital powers, plant the seeds of disease and wretchedness, and lower the moral standing of him who yields to the temptations to which the flesh is exposed; but with a full knowledge of the risk he is running, the man of strong passions will not be deterred by such reasons. He will seize the present enjoyment, regardless of the future evil; even although he may

"Foresee

The fatal issue of his health, peace, fortune and dignity; the loss of all that can enable man, and make frail life, short as it is, enjoyable."

In the hour of fierce temptation, nothing but the fear of offending God, and the restraining power of his grace can be relied upon to enable such an one to resist the devil.

The attention of our readers is called to the annual report of David Hoston, the publisher of *The Tract Repository*, which will be found in the column of "Items," with the hope that Friends will liberally support this useful publication, which is doing good in an unobtrusive way, and enable our friend to increase the size of his edition, and thus benefit a larger number of persons. We hope many of the former subscribers will double their contributions.

SUMMARY OF EVENTS.

UNITED STATES.—Judge-William D. Kelley, member of Congress from this city, died in Washington on the evening of the 9th instant, in the 76th year of his age. He was called the "Father of the House," having been a member longer than any of his cotemporaries.

Captain Pickens, Hydrographer of the Navy Department at Washington, says there are no reports of observations to show that the course of the Gulf Stream has for a considerable length of time differed greatly from its mean position. This direct evidence that the mild weather along the coast is not caused by a change in the course of the Gulf Stream, he adds, is supplemented by the fact that continuous mild weather has

prevailed far in the interior, where the effect on the weather of even a considerable change in the course of the Gulf Stream must be inappreciable.

The seven great flour mills of Milwaukee, Wisconsin, have formed a combination involving \$5,000,000, and an annual output of nearly a million and a half barrels of flour. This action, it is said, will shut out the English syndicate which has been negotiating for them for several months past, and is intended to meet the threatened competition of the English capitalists who have secured the Minneapolis mills.

A telegram from Lexington, Virginia, says the peach and apple trees there are in full bloom. "The mountains are full of wild flowers in bloom and the blossoms." The temperature at Lexington on the 11th instant reached over 70 degrees.

The Sandusky (Ohio) Register says: "The actual amount of malt liquors consumed in 1888, was 7,587,056 gallons. This includes not quite 3,000,000 gallons of imported beer and ale. The manufacturer's price to the retailer is above rather than below 20 cents per gallon. At 20 cents the cost to the dealers would be \$153,517,411. The retailers get an average of 60 cents per gallon, which makes the cost to the consumers \$460,522,236, which the American people must carelessly expend in support of the distillery. The \$72,670,136, and of distilled spirits \$379,226,860. This gives us a grand total of \$912,449,129, nearly one billion dollars spent annually for liquor by the people of the United States. How few people realize the enormous expense incurred by the people of the United States from the tax imposed by the General Government the local tax on the trade is not five per cent. of the cost. The cost to Ohio is about \$60,000,000 per annum; the local tax is \$2,250,000, which is but a trifle over four per cent."

A tornado struck St. Louis on the past four on the afternoon of the 12th inst., making a pathway nearly three-quarters of a mile wide, in which buildings were wrecked, trees uprooted, &c. Three persons were reported killed in the city and two at the town of Venice, Illinois. The storm in St. Clair County, Illinois, was particularly severe, property being lost in East St. Louis, and at other points being destroyed.

A tornado struck the east side of Clinton, Kentucky, on the evening of the same day, killing 11 persons, injuring 53, and demolishing 55 houses.

The number of deaths in New York's city last week was the largest in the history of the city, with the single exception of the first week in Seventh Month, 1872, when the number was 1591. The average for the corresponding week of the past five years is 807. This difference is much more marked when comparison is made with records as respects the average record of deaths from diseases which the influenza affects. The number of deaths from pneumonia, bronchitis, phthisis and influenza last week was 808, while the average number is about 278.

Deaths in this city last week numbered 718; 226 due to influenza, 100 to pneumonia, 358 more. Of the whole number 362 were males and 356 females: 145 died of pneumonia; 101 of consumption; 43 of disease of the heart; 30 of debility; 33 of old age; 25 of typhoid fever; 23 of convulsions; 25 of inflammation of the brain; 19 of typhus; 18 of diphtheria; 14 of inanition; 14 of influenza; 14 of inflammation of the brain; 14 of congestion of the lungs; 13 of cancer; 12 of inflammation of the stomach and bowels; 12 of disease of the kidneys; 11 of Bright's disease; 10 of cholera; 10 of cholera infantum.

Markets, &c.—U. S. 4½, 105; 4½, 120½; currency 6's, 116 to 126.

COTTON was firm and ½c. higher, at 10½ cts. per pound for middling uplands.

FEED.—Winter bran, choice and fancy, \$13 a \$13.50; do. fair to good, \$12.50 a \$12.75; spring bran, \$11.75 a \$12.50.

FLOUR AND MEAL.—Western and Pennsylvania super, \$2.90 a \$2.75; do. do., extras, \$2.75 a \$3.00; No. 2 winter family, \$3.25 a \$3.50; Pennsylvania family, do. do., \$3.00 a \$3.25; Western winter, clear, \$4.00 a \$4.20; do. do., straight, \$4.25 a \$4.45; winter patent, \$4.50 a \$4.80; Minnesota, clear, \$3.50 a \$4.00; do. straight, \$4.25 a \$4.75; do. patent, \$4.85 a \$5.15. Rye flour sold in a small way at \$3.15 a \$3.25 per barrel, 100 lbs. weight. Corn meal at \$1.50 a \$1.60 per 100 pounds for new, as to quality.

GRAIN.—No. 2 red wheat, 80½ a 81 cts.

No. 2 mixed corn, 30½ a 36½ cts.

No. 2 white oats, 28½ a 29 cts.

BEEF CATTLE.—Extra, 5½ a 5½ cts.; good, 5 a 5½ cts.; medium, 4½ a 4½ cts.; common, 3½ a 4 cts.; fat cows, 24 a 25 cts.

SHEEP.—Extra, 6 a 6½ cts.; good, 5½ a 5½ cts.; medium, 5 a 5½ cts.; common, 4½ a 4½ cts.; culls, 3 a 4 cts.

LAMBS.—Extra, 7½ a 7½ cts.; good, 6½ a 7 cts.; medium, 5½ a 6½ cts.; common, 5 a 5½ cts.

HOGS.—Good Western, 5½ a 5½ cts.; heavy Western, 5½ a 5½ cts.

FOREIGN.—On the 11th inst., the English minister at Lisbon imparted to the Portuguese Minister of Foreign Affairs, England's ultimatum, demanding the recall of the Portuguese forces, officials and expedition of every kind from the banks of the Shire, beyond the region of the Ruo, and south of the Zambezi, and from Mashonaland. If Portugal failed to reply in 24 hours, the British Legation would board the Enchantress and await a reply at Vigo. The King immediately convened a Cabinet Council to consider the ultimatum. The Government replied to Minister (Glyn) Petre that Portugal, yielding to strong pressure from a power of the first rank, being too weak to withstand it, would order the withdrawal of the Portuguese from the Shire and Mashonaland, while reserving all rights to the Portuguese crown in those territories. On the 12th inst., the King resigned. On the night of the 12th instant, a mob of 3000 men attacked the British Legation and committed other riotous acts. Fifty persons were arrested. Minister Gomez has apologized to Minister Glyn Petre, and assured him all damage was met, and all persons concerned in the outrage punished.

The influenza is making great havoc with the health of people in all Western Germany. There are 15,000 cases at Manheim. The total number of cases in Berlin is estimated at 400,000. There have been 655 deaths due to the disease. In Paris the disease is abating.

The Dowager Empress Augusta, widow of the Emperor William of Germany, died on the 7th of the present month. She had been sick with influenza and had had a relapse.

The Anti-Slavery Society at Brussels is making arrangements for an expedition to Lake Tanganyika for the purpose of policing the lake and preventing the passage of slave caravans.

John Joseph Ignatius Döllinger, the head of the "Old Catholic" movement in Southern Germany, and one of the ablest opponents of the doctrine of Papal infallibility, died on the 10th instant. He was taken with influenza and was sick about 10 days. He was born in Bomberg, in Bavaria, in the year 1799.

Professor Otto Wilhelm Struve, the Russian astronomer, is about to retire from his post of director of the observatory Pulkova, owing to ill health.

A great flight of locusts, calculated to have covered about 2000 square miles, lately passed across the Red Sea, from the African to the Arabian shore.

A despatch from Shanghai, dated the 8th inst., says: "In the landing of a water-pipe in the province of Nanking a few days ago, upward of 1000 persons were drowned, a number of boats were wrecked and a large amount of property of various kinds destroyed."

The Provisional Government of Brazil has called upon the ex-Empress Tom Pedro to act as regent of the empire; she holds herself responsible for the safe-keeping of all the personal property of the Imperial family, including jewels, plate, furniture and pictures. The property is valued at \$1,500,000.

Kio Janeiro First Month 8th.—An official decree just promulgated provides for the separation of Church and State; guarantees religious liberty and equality, and continues the life stipends granted under the Monarchy.

NOTICES.

WESTTOWN BOARDING SCHOOL.—Wanted, a young man of experience and ability, to fill the position of Governor. Application may be made to

BENJAMIN W. PASSMORE,

Concordville, Del. Co., Pa.

WM. EVANS, 252 S. Front St., Philad'a.

TO GRADUATES OF FRIENDS' SELECT SCHOOL.—All graduates of Friends' Select School are requested to send to the undersigned the names of any graduates of the school whom they can recollect, with the year of their graduation and their present addresses. In the case of any graduates from former names, please send, both their present and former names, if deceased.

FOR "THE FRIEND."

Incidents and Reflections.—No. 207.

RECEIVED BY

HIGHLY OTHERS.

Some years ago, a Friend who was at a circular meeting, held at Newport, Monmouthshire, in Wales, saw in attendance there another Friend; and an impression fastened on his mind, to give that man a guinea. As he did not know the man, and was not acquainted with his circumstances, he hesitated about doing a thing which might seem like using too much freedom. So he put the impression by for a time; but on again meeting the Friend, the feeling revived so strongly, that he took him on one side, and told him how his feelings had been directed, that he did not know his circumstances, but he wished him to put the money in his pocket, and make whatever use of it he pleased. The Friend then told him, that when he left home all the money he had in the world was 14 pence; but he felt it to be his duty to come to the meeting; and now, through thy liberality, I am rich!

The faith in Divine Providence which enabled this poor man to leave home with such slender means to defray his expenses, is perhaps as impressive a feature in this anecdote, as the care of his Heavenly Father in putting it into the heart of a stranger to supply his needs.

It was through a somewhat similar impression, that the late Henry Cope, of Philadelphia, was led to relieve the wants of a worthy Friend, without knowing his peculiar need at the time. At one period there was considerable sickness in the family of Christopher Healy; and the physician had often attended upon them. When Christopher called upon him for the bill for his services, he replied, that if he would give him \$50, the bill would be considered settled, although that was a low charge for the labor performed. Christopher had not the money, but promised to give it to him, when it came into his possession.

Some time after he received through the mail an envelope containing a \$50 note and nothing else—nothing to indicate from what source it came. The money was paid to the physician and the debt discharged.

Having occasion to go to Philadelphia, and being at Henry Cope's house, he related the circumstance; and then asked Henry if his hand was not in this occurrence. Henry then ac-

knowledged, that feeling an impression to send Christopher \$50, he had done so.

The kind feeling which Henry Cope entertained for his friend Christopher would not have added much to the latter's comfort, if he had not performed the act which that feeling prompted. Indeed our Saviour said, that a tree is to be known by its fruit; and we may well doubt the sincerity or the reality of those professions of benevolence which never lead to corresponding efforts to relieve the distress of others. In a letter to Richard Reynolds who was a very liberal giver to the wants of the poor, John Thorp says: "I never had much to give, but I remember an instance, by which I was deeply instructed in the nature of Christian charity. One evening when I lived in London, as I passed by rather a retired corner of a street, a poor woman sat, (I think with a child in her arms) and very modestly asked charity. I felt pity strongly raised in my heart, and a language like this was feelingly raised in it, 'The Lord help thee;' but I passed by, and it very livingly arose in my heart, 'By what means?'—'by putting it into the hearts of such as can feel as thou now dost, to relieve her.' I turned back and gave her something."

Too many of those who are surrounded by outward comforts forget that they are only stewards of their possessions, for the right use of which they must give an account, when their Lord calls them to a reckoning. They now find many excuses for smothering the feelings of compassion which would prompt them to be liberal in relieving the wants of others; and either spend more than is needful and proper on themselves and their families, or keep on accumulating their means, adding farm to farm, field to field, or increasing the amount of their investments. Are not some of us too thoughtless and unconcerned about the warning conveyed by our Saviour, who said that at the day of judgment those should be turned away with the goats, who had neglected to feed and clothe and visit the hungry, naked and sick?

Not long ago the New York papers told of a little circumstance that happened in one of the elevated trains, which shows how "catching" an act of kindness is.

A little newsboy got on the train at Park Place, and slipping into one of the cross-seats, was soon asleep. Presently two young ladies came in and took the seat opposite. The child's feet were bare, his clothes ragged, and his face looked pinched and drawn, as if he were hungry. His face was dirty, but seeing that his cheek rested against the hard window-sill, one of the young ladies slipped her muff under his head. An old gentleman in the next seat smiled at the act, and without saying any thing held out a quarter to her with a nod towards the boy. She hesitated a moment and then took it; as she did so the next man as silently offered a dime, a woman across the car held out some pennies, and almost before the young lady realized that she

was taking a collection, every one in that end of the car had given her something for the poor boy. She added something here and there, and quietly sliding the money into the pocket of his ragged coat, took her muff gently from under his head without waking him, and giving to the passengers who were in the secret a nod of thanks, left the car at Twenty-third Street.

Years ago, I met with the following anecdote which interested me greatly at the time. I do not remember the paper in which it was originally published.

A merchant very extensively engaged in commerce, in one of our Atlantic cities, died intestate at the age of seventy-five. After his death, among his papers, a package of very considerable size was found, carefully tied up, and labeled as follows:

"Notes, due-bills and accounts against persons down along the shore. Some of these may be got by suit or severe dunning. But the people are poor; most of them have had fisherman's luck. My children will do what they think best. Perhaps they will think with me, that it is best to burn this package entire."

About a month after he died the sons met together, when the elder brother, the administrator, produced this package, read the superscription, and asked what course should be taken in regard to it. Another brother a few years younger than the eldest, a man of strong, impulsive temperament, unable at the moment to express his feelings in words, while he brushed the tears from his eyes with one hand, by a spasmodic jerk of the other towards the fire place, indicated his wish to have the package put into the flames.

It was suggested by one of the other brothers that it might be well first to make a list of the debtor's names, and of the dates and amounts, that they might be enabled, as the intended discharge was for all, to inform such as might offer payment that their debts were forgiven.

On the following day they again assembled, the list had been prepared, and all the notes, due-bills and accounts, the amount of which, including the interest, amounted to thirty thousand dollars, were committed to the flames.

It was four months after our father's death, continued my informant, that I was sitting in my eldest brother's counting-room, waiting for an opportunity to speak with him, when there came in a hard-favored, little old man who looked as if time and rough weather had been to windward of him for seventy years. My brother replied that he was administrator, as our father died intestate.

"Well," said the stranger, "I've come up from the Cape to pay a debt I owed the old gentleman."

My brother requested him to take a seat, being at that moment engaged with other persons at the desk. The old man sat down, and putting on his glasses, drew out a very ancient leather pocket-book, and began to count over his money. When he had finished, as he sat waiting his turn, slowly twirling his thumbs,

with his old gray, meditative eyes on the floor, he sighed, and I know the money, as the phrase runs, came hard; and I secretly wished the old man's name might be found upon the forgiven list.

My brother was soon at leisure, and asked him the ordinary questions—his name, residence, &c. The original debt was four hundred and forty dollars; it had stood a long time, and with the interest amounted to between seven and eight hundred dollars. My brother went to the desk and after examining the forgiven list attentively, a sudden smile lighted up his countenance, and told me the truth at a glance. The old man's was there! My brother quietly took a chair by his side, and a conversation took place between them which I shall never forget.

"Your note is outlawed," said he; "it was dated twelve years ago, payable in two years; there is no witness, and no interest has ever been paid; you are not bound to pay this note; we can never recover the amount.

"Sir," said the old man, "I wish to pay it. It is the only heavy debt I have in the world. It may be outlawed here, but I have no child, and my wife and I hope we have made our peace with God as we wish to do with man. I should like to pay it."

And he laid his bank notes before my brother, requesting him to count them over.

"I cannot take this money," said my brother. The old man became alarmed.

"I have cast simple interest for twelve years and a little over," said he. "I will pay you compound interest if you require it. The debt ought to have been paid long ago, but your father was very indulgent; he knew I had been unlucky and told me not to worry about it."

My brother then set the whole matter plainly before him, and taking the bank bills, returned them to the old man's pocket book, telling him that although our father had left no formal will he had recommended to destroy certain notes, due-bills and other evidences of debt, and release those who might be legally bound to pay them.

For a moment the worthy old man appeared to be stupefied. After he had collected himself, and wiped a few tears from his eyes, he said:

"From the time I heard of your father's death I have raked and scraped and pinched and spared, to get money for the payment of this debt. About ten days ago I had made up the sum within twenty dollars. My wife knew how much the payment of this debt lay on my spirits, and advised me to sell a cow to make up the difference, and get the burden off my mind. I did so, and now what will my wife say? I must go back to the City, and tell her this good news. She'll probably repeat the very words she used when she put her hands on my shoulders, as we parted—'I have never seen the righteous forsaken, nor his seed begging their bread.'"

"Giving each of us a hearty shake of the hand, and a blessing upon our old father's memory, he went on his way rejoicing.

After a short silence, taking his pencil, and making a cast, my brother said:

"There, your part of the money would be so much. Conceive a plan to convey to me your share of the pleasure derived from this operation; the money is at your service."

J. W.

It is the overshadowing presence of the Lord, that is the crown of all assemblies for worship; and it is his free gift and blessed help that enables any of his servants to do aught that tends to promote his kingdom in the earth.

The Burial Ground and Buildings at Arch and Fourth Streets.

(Concluded from page 194.)

Notwithstanding the efforts made at different times to prevent the erection of grave-stones, there is no doubt that a very large number of them were placed in the ground. Some were of considerable size, and it is known that there were instances in which inscriptions of some length had been cut upon them. One of these is mentioned in Watson's Annals. No doubt many of the stones have been sunk or otherwise put out of sight from time to time. It is thought that a row of grave-stones exists parallel with Arch Street, just west of the easternmost gate, the tops of which are about two feet below the present surface. In the readjustment of the grade and the preparation of a site for the proposed meeting-house, it was necessary to remove a great many grave-stones. It was a difficult matter to dispose of so large a quantity of material. They were ultimately buried in a large pit dug for the purpose just south of the present meeting-house, and close to the wall of the old Say Burial-ground which adjoins to the east. The approximate position of this pit is still known to a few living persons. About fifty years ago it caved in and disclosed the grave-stones piled one upon another.

Early in the year 1803 preparations were made for erecting the present centre building and eastern meeting-house on the burial ground. The main object was to provide more convenient accommodations for holding the women's Yearly Meeting. The foundations were dug and the cellars walled, in the autumn of that year. The structure above ground was proceeded with during the following year and finally completed in the spring of 1805. The date stone in the pediment of the centre building marks the year of erection as 1804.

Elizabeth Drinker records in her diary, that the first time the new meeting-house was used for a woman's meeting-house was on Fourth Mo. 15th, 1805, probably at the opening of the Yearly Meeting, and that it was so crowded that some persons went away. She also states that "A man who stood for the express purpose of counting the number of women who went into the new meeting-house in the burying ground, counted 1600—from another source we heard it was 1700; so that we may suppose there were about 1650—a great number of zealous women."

The western wing was first occupied in 1811, when the women's Yearly Meeting convened there on the morning of Third-day the 16th of the Fourth Month, the sittings of the previous day having apparently been held in the east wing. The men's meeting on the last named day was held in the old North Meeting-house on Key's Alley, which it had occupied for some years; and the afternoon sitting adjourned to meet the following morning in the east wing at Arch and Fourth streets.

The general design of the Arch Street Meeting-house is that of a centre building containing committee rooms, and two wings, each of which comprises a large meeting-room. The front is set back about seventy-five feet from Arch street and the east and west wings are about the same distance from the east and west lines of the lot. The cost of the centre building and east wing was nearly \$22,000. The whole of this amount was raised by subscription with the exception of about \$1300 derived from a legacy bequeathed by John Pemberton. The western wing which

is somewhat more commodious and in design an improvement on the plan of the east wing, was not erected until 1810. Its cost was about \$20,000, which amount was derived entirely from the proceeds of the sale of the old meeting-house property at Market and Second streets.

In 1820, an extensive alteration was made in the original eastern wing for the purpose of better accommodating the men's Yearly Meeting. The evidences of this alteration are apparent at the present time. The introduction of five raised seats facing the meeting instead of three, as is usual in our city meeting-houses, probably dates from this year.

In 1817 a general partition was made of property belonging to the Monthly Meeting in Philadelphia, which had previously been held in common. This partition does not appear to have been based upon an equitable valuation, but rather for the purpose of more convenient management. Under this arrangement all of the Arch Street front of the property at the corner of Fourth street was vested in Trustees to be appointed by the Middle District, with the reservation of the centre building and eastern wing of the meeting-house, for general Society purposes, and all of the surrounding ground was designated as being for yards for the common benefit of all the buildings in the enclosure; except that it was designed to continue to bury in that part which lies along the Fourth street side for about 100 feet south of Arch street. This part of the project does not however appear to have been adhered to, and it is probable that no interments were made there subsequently.

A fund was also allotted to the Middle District Monthly Meeting, out of which it was to defray the cost of taking care of the entire meeting-house building and providing wood and candles. All the Monthly Meetings were, however, to contribute to the cost of repairs. The residue of the property at Arch and Fourth streets, consisting of the front on the latter street of about 175 feet by about 200 feet in depth, and a small square plot at the south-east corner, east of the meeting-house, was conveyed to trustees appointed by all the Monthly Meetings, to be used for burial purposes. That portion fronting on Fourth street continued to be used as a grave-yard until 1833, when burials were discontinued there; the last interment having been made on the 31st of the Eighth Month of that year. The small plot east of the meeting-house was then opened, and its use was continued until filled; the last burial taking place in the Eleventh Month, 1851.

In 1848 a small strip, about seventy feet long north and south, and about 22 feet wide east and west, on the eastern side of the ground on Fourth street, was again allotted for burial purposes, and between that year and 1872 a few persons were buried there; but none since the last date—some have since been removed. It may be said that practically no interments have been made in the Fourth street ground for fifty-six years.

The dwelling-house on Arch street above Third, next adjoining the original burial ground site on the east, was purchased in 1804 as a place of residence for the caretaker, but it has since been rebuilt. The building immediately adjoining it on the west, occupied by the Bookstore and for other purposes, was erected in 1843, with funds donated by one or more Friends. It was built with the approval of all the Monthly Meetings in the city, as will appear from the following report of a joint committee appointed in the Fifth Month of the year above named, which also

designated its status and the purpose for which it was to be used.

"The proposition of the Monthly Meeting of Friends of Philadelphia [for the Middle District] contained in its minutes of 5th month 27th last, having claimed deliberate consideration, it was unitedly agreed to propose that liberty be given to erect a house on the east side of the lot on Mulberry street, near Third street, adjoining the house belonging to Philadelphia Monthly Meeting, to be used for the general purposes of the Society, such as the accommodation of the Library belonging to Friends, the deposit of books published or kept for sale or distribution under the direction of the Meeting for Sufferings, &c., and such other uses as may hereafter be deemed proper. Said house to belong to and be under the control of the Monthly Meetings in this city, as the ground on which it is proposed to erect it now is. The cost of building to be provided for without taking the funds of the Society, or calling on the Monthly Meetings for pecuniary aid."

In digging the cellar for this building a great many human bones were disinterred. It was the last structure erected on the original burial ground site.

A single brick from the ruins of Jamestown, Virginia, is built in the south wall of this structure. It was plainly visible for many years, being somewhat longer than the others and darker in color. But age has darkened the newer bricks and it is now difficult to distinguish this one from the rest.

The premises at Arch and Fourth streets have been designated by some as "The Westminster Abbey of the Society of Friends." Whether this be appropriate or not, within the enclosure repose the remains of many worthies who were prominent in their day and generation in the cause of Christ. The memorials of these are not found in carved monuments or lettered tablets, but are better preserved in the testimonies issued by their cotemporaries.

G. V.

"She is a sprightly, sensible woman, but would suit my taste much better if more of the diffident, the humble, the simple, entered into her composition. And even true genius and literary accomplishments receive a softness and luster from these qualities highly ornamental. I hope I am not apt to force the subject of religion into conversation (like poor Saul who would have the prophet conjured up for him); but advanced age, experience and parental affection, say, religion, my dear child, is the safety, the happiness, the glory of human nature. By its sanctifying virtue, natural and improved abilities are kept in due subjection, regulated and directed to useful purposes; by this we have counsel and wisdom in intricate concerns; by this we have counsel and resource, and consolation in distress; and by this we have (the greatest of all favors) the evidence, the assurance, earnest of a happy immortality.

"Aspire after the knowledge of it, my dear daughter! With all thy acquirements, endeavor to acquire this. Remember Moses was exceeding fair, who had the education of a court to polish his manners, who was wise in all the learning of the Egyptians, and whose poetical talents are left on record in his song, yet had he given preference to these qualities in his heart, he would never have been the leader of the Lord's people through the Red Sea and the wilderness. So no man knows where the visible part of him was buried, yet his memory

lives and preaches loudly to us this day."—*Richard Shackleton, 1787.*

Christopher Story.

In the year of 1648 there was born at Righead, in the parish of Kirklington, Cumberland, a child who was named Christopher Story. The wild border village was far remote from the centre, where a still more dark and ominous deed than had yet taken place was about to be accomplished, in the execution of the king; yet the sound of arms, of bloodshed, victory and defeat had reached it.

The child's father, Thomas Story, was a retainer in the service of Sir Philip Musgrave, of Elenhall, a staunch supporter of the king, in whose service both underwent "many jeopardies to the hazard of their lives." The events of the year in which Christopher, his only child, was born, and of the following year, must have brought into the household of the faithful loyalists distress and disappointment, but ill compensated for by the turn of fortune at the Restoration, when the Musgraves received from the hands of Charles II. "places of profit and trust under government," and in their turn amply rewarded Story for his former losses.

Christopher's mother was named Elizabeth Parrett. She was the eldest daughter of the clergyman of the parish, who, "being an industrious man in the creation," had acquired a small estate, which was destined to pass into the hands of his grandson Christopher. The boy was therefore sent early to school, and he was moreover the frequent companion of his father on the latter's visits to Elenhall, where he was shown into the presence of Sir Philip Musgrave. The old baronet took a fancy to the boy, and gave orders to his father to send him to the hall for certain periods of the year, at such times as he should think best, "to learn breeding and good manners, as they call them." These visits appear to have impressed the worthy patron still more in the lad's favor, for he proposed next to send Christopher with his own son, who was about the same age, to college, and to bear the charge, if his father would undertake to fit him with learning suitable for that place. This proposal seems to have been originally fallen in with, and the boy was kept diligently at school until such time as he should have gone away.

When the moment of parting came, however, his mother was unwilling he should go, for she thought, and no doubt truly, that if once the lad tasted of the pleasures of the intellect, of learning, and of the wider spheres of action, he would never again settle down to the plain life of a farmer; and the dread that he would then "sell the land," her father's estate, seems to have prevailed to keep her son at home, seeing, as she argued, that "he would have enough to live upon, without engaging in anything else." This decision the young man came afterwards to look upon as a wise one, for in his quiet country home he had become at a very early age the subject of deep religious convictions, which in all probability might not have held the same power over him in the busier life of the university. The description he himself gives of his early sensations is that he was one "called by the Lord's grace while he was young in years, and preserved from many evils, to which I as well as others was prone. I scarcely knew it was the Lord, but felt there was something near me and with me from a child that inclined my heart to seek after good and to read the Holy Scriptures." He tells us he was, as he

grew up to years of understanding, more sober and more moderate than some others, although the border country in which he lived was full of the grossest sorts of wickedness. His father and mother kept an inn, to which naturally a very mixed company of people resorted; and although the lad was not notorious in any way for bad conduct, yet he apparently went through alternate phases of deep repentance and sorrow for his shortcoming, and more or less successful soothing of conscience to sleep with the thought that he was still young, and would probably live long, and that it was time enough for him to be religious "when he was married."

Whether these arguments were known to his father and mother or not we cannot say, but when he was but 18, they became most desirous that he should marry "a young woman whose parents were of good repute in the country," and this to Christopher was a very "weighty matter," calling for many nights of anxious consideration and prayer. It seems, however, to have reached the right decision, for the marriage, in spite of the extreme youth of the pair, proved essentially a happy one. Bridget says, in the testimony concerning her deceased husband: "We lived together in the married state upwards of fifty years, in true love and sweet concord. . . . It is not within my capacity to set forth the worth of this my dear husband, yet I thought it my duty to pay this tribute to his memory, for he was not only an husband, but even as a nursing father to me, and a tender and watchful father to our children."

Not long after his marriage, Christopher went through a period of such "horror and trouble of mind," that he concluded if he should then die there was no hope of mercy for him. "A violent form of fever being prevalent in the neighborhood, his wife was stricken by it, and he was in great despair. He was persuaded to repair to a blind woman, who had the character of a witch, and who pretended to be able to do great things, and to foretell what should come to pass. This woman informed him that he would not take the distemper himself; he believed her, and when, very shortly afterwards, he was seized with the sickness, he was filled with shame and remorse at his mistrust and his credulity. For a time he seems to have been in despair, and at last sent for his priest, but "when he came he wanted his book," so Christopher, who no doubt knew the prayer-book as well as himself, was once more disappointed. He went diligently to church, determined to hear and observe every word the priest said; he consulted with divers other ministers, but with the same result. "How to come out of sin, which was the thing I wanted to know, they left me at a loss."

At this time a meeting of some Friends was appointed about a mile off, and Robert Barclay, who was on his way north, heard of it and was present. Christopher was somewhat impressed by his sermon, but when the meeting was over he was ready to join with a young priest present in arguing against the Friends; but Robert Barclay, perceiving "that there was little good to be done, for there was like to be an uproar among the people, some shouting and making a noise, there being many sorts of people, took horse and rode away."

After this Christopher was more than once thrown in the way of Friends, and was also lent a book of Francis Howells, which he says "drew him nearer to Friends." One night, in the middle of winter, he invited two Friends to go home with him to his house, and he tells us

that "the report going abroad that I had turned Quaker, and the Quakers gone to my house, in a few hours many neighbors came to hear and to see; and the house being pretty well filled, the two Friends [Thomas Carlton and Thomas Langhorn] advised me to speak to the people to sit down, and we would have a meeting." After this a regular meeting of Friends, consisting of about thirty, was held at Christopher's house, usually in an upper room; but when there was a "public Friend" they had the meeting out of doors. This was in the year of 1672. About four or five years after he had joined himself to Friends, Christopher began to travel about and visit other meetings, and in the spring of 1678 he offered himself as companion to Edmund Wier on a journey to Scotland. They visited Aberdeen, where they found most of the Friends in prison, but the magistrates "having grown weary," they took no notice of the newcomers.

The following autumn, after the harvest was over, Christopher set out to visit Wensleydale, having it also in his mind to go and see George Fox, who was at that time quite unknown to him, and who was then at Swarthmore. "Talking meetings in the way," he says, "I came to Swarthmore on the Seventh-day, and was at their meeting on the First-day, where was George Fox, Margaret his wife, and four of her daughters, and all very loving and kind. When we parted, George exhorted me to keep to the grace and I should grow."

The next two years were spent in travelling about and in attending to his flock at home, which by this time had grown too numerous to meet in their dwelling houses, much less in his small upper room. It was found necessary to build a meeting-house, and wood was purchased of Henry Daeres for that purpose; but the clergyman of the parish, supported by some others, petitioned the sessions not to permit them to build a new place of worship, for, they said, the church might as well then be pulled down, seeing that although the parish was five miles long, yet sometimes not above five beside the priest and clerk were there.

The magistrates, considering these premises, wrote to Daeres, who was also a justice of the peace, to let the Friends have no wood; he also refused them their money, which had apparently been already handed over, and as all the wood in the neighborhood was in the hands of large landowners, who, hearing of the injunction, would not sell, Christopher and his friends were forced to abandon their intention.

About this time, Story tells us in his autobiography, three young curates came among Friends. One of them, being very conscientious, told the priest, whose name was Robert Priestman, that he could not say "amen" to him, for he saw that he himself came short in many things. The priest replied, with a fine touch of humor, that he had better say "anend." This evasion seems, however, not to have satisfied the curate.

The little body of Friends continued to be much hampered by the efforts of an informer and by various distrains upon their goods and fines. Some or other of their number were constantly in prison until the death of Charles H., about three years after, when all who were in confinement were set at liberty, and the officers commanded to see that none molested them at their meetings, which consequently grew large, many flocking to hear. The former necessity now increased for building a larger meeting-house, and seeing no better way, they went

to Scotland and bought wood there, building a house to hold a third more than their numbers at that time, but in a few years, he tells us, it was filled.

"In the year 1698, towards the latter end of the Ninth Month [old style]," his narrative continues, "my wife and I went to visit Friends in Scotland, and the harvest being backward that year in divers places as we travelled, until we came to Aberdeen, people were but reaping their corn; and a storm of snow having fallen and lain upon it for a month before it was reaped, people made fires in the fields, it was so cold, which made both corn and fodder scarce. The poor people looked like death, some died in the highways, and more were supposed to die from the corn being unwholesome than from want of bread. As there had been more years than one that corn had been dear, many poor people were like to lose hope of having plenty again.

The next Yearly Meeting I went to London, and gave Friends an account [of them]; and as the brethren's care had been that Friends in that country should not suffer want, their care increased until plenty came."

The autobiographical notices of Story terminate in the year 1701, but the remaining years of his life were, we learn from other sources, spent in the same quiet services, visiting the scattered meetings of Ireland, Scotland and England, until in his seventy-second year he was attacked with "a lingering sickness which gradually wasted his natural strength," and on the 6th of Eleventh Month, 1720, he died at his own house at Righthand, and was buried in the Friend's burial ground adjacent, on the 8th of the same month.

FOR "THE FRIEND."

—1690.—

"Is there not a time of service to man upon the earth?"

We know not, whether joy more manifold
This year may hold
Or grief more deep and keen. This as it may,
In Everlasting Arms, let each heart lay
All that it loves the best,
For keeping, and for rest.

Man's anxious striving, and the ceaseless toil
For worldly spoil,
O'er crowd his higher aims. These are forgot.
He calls the New Year his! Considers not
Each day of cloud or sun
A gift from God. Each one

Made new and beautiful, and all complete,
And truly meet
To fill with faithful deeds of love for Him;
For 'e'en amid earth's conflict, and the din
O'er selfish motives, wrought—
God's truth, thro' lies, is taught.

Ah, no indeed! Not ours these passing days.
Our Master lays,
In the unfolding moments of each hour,
Some strong, sure evidence of his own power,
And man, oft dumbly stands,
O'er awed at what God's hand

Hath wrought. A voice within our home is still'd,
'T was He, that willed
Tired hands should fold'd be to lasting rest.
And though our hearts were torn, He knew the best;
Whisper'd mid storm—"Thy I: He is:
Be not afraid." "Rely

Upon my promise. In my enfolding
Now beholding
My tenderness and love, as ne'er before."
For, when our wounds are deepest, hearts most sore,
We seek his healing balm,
His comfort and his calm.

So not the smoothest paths, nor cloudless hours,
Nor thornless flowers,
Have brought us nearer joy, nor pierc'd his fellowship
With grief, has often caus'd our hearts to dip
Deeper in Shiloh's wave,
Most glad, at what this gave.

Fitting indeed the theme, for New Year thought,

That what is wrought
Within the heart of each tried trusting child
Whose "Abba, Father," proves them reconciled,
Doth add upon Christ's name,
Some—richer, fuller gain.

The Church,—his Bride,—hath clothing finer, purer,
Lengthen'd surer
Upon the strength of her Beloved One,
For all our wretched hours, and service done,
Desiring but his praise
Thro' all the passing days.

Only safe is each, in his kind keeping,
Who unsteeping,
Watches his flock: sees if their path should be
Thro' heights or depths. Dear Master, close to Thee
In humble trust, not fear,
Lead us, this new-born year.

Y. N. T.

First Month 1st.

NOT SHUT IN.

SELECTED.

[The following lines were written by a lady who laid down a bed of extreme suffering for many years.]

"Shut in!" did you say, my sisters?
O no! I only led away
Out of the dust and turmoil.
The burden and heat of the day,
Into the cool green pastures away,
By the waters calm and still,
Where I may lie down in quiet,
And yield to my Father's will.

Earth's ministering ones come round me,
With faces kind and sweet,
And we sit and learn together
At the loving Saviour's feet;
And we talk of life's holy duties,
Of the crosses that lie in the way,
And they must go out and bear them,
While I lie still and pray.

I am not shut in, my sisters,
For the four walls fade away,
And my soul goes out in gladness,
To bask in the glorious day.
This wasting, suffering body,
With its weight of weary pain,
Can never dim my vision,
My spirit cannot restrain.

I wait the rapturous ending—
Or, rather, the entering in
Through the gates that stand wide open,
But admit no pain or sin.
I am only waiting, sisters,
Till the Father calls, "Come home!"
Waiting, with my lamp all burning,
Till the blessed Bridegroom come.

FOR "THE FRIEND."

The Rocks North of Philadelphia.

Through the kindness of a friend who conveyed me in his carriage from Oak Lane Station on the North Penn Railroad, I had the opportunity on the 2nd of Twelfth Month of visiting several quarries in the southern part of Montgomery County, and of seeing some beautiful scenery. The most extensive view was the delightful one we obtained of White Marsh Valley, which suddenly opened before us as we reached the top of the ridge to the south of it.

A large amount of the land over which we travelled has been purchased at high prices for suburban residences of wealthy persons, and we learned that \$1000 per acre was no unusual price to be paid for a farm, especially if it had high rolling ground upon it, and was not far distant from a railroad station.

The first quarry we visited was a very hard, dark-colored, horriblencic gneiss, where a few men were at work, drilling a hole in the hard stone for blasting purposes; one man was sitting on the rock holding the drill, and two others were delivering alternate blows on it with heavy sledge-hammers. The progress was slow, and

the hole could only be made by long-continued patient labor. The stone, we were told, was used for making turnpike roads. The rock belonged to the same series of gneiss rocks as those at Frankford and other points near Philadelphia.

At Edge Hill we came upon a rocky ledge quite different in character. It was composed of quartz, with thin scales of mica interspersed, which gave it somewhat of a slaty structure. It is considered by geologists to be equivalent to what the New York geologists have named the Potsdam sandstone, the same rock which borders the northern side of the great limestone valley of Chester County, Pa.

The quarrying in this ledge appeared to be comparatively easy. The strata were very steeply inclined, and so intersected with cleavage planes, that the men were able to throw down great masses of it by prying them out with crowbars. As these rolled down to the bottom of the quarry, they split into slabs with flat faces. We were told that the principal use made of the stone was in lining furnaces, for its nature was such that it could withstand an intense heat. In one of the quarries the stone was ground into powder, to be used as one of the materials in making pottery or terra cotta ware.

The principal mineral we met with here was a titaniferous specular oxide of iron, which was more or less diffused through the quartz, but not in sufficient quantities to have any commercial value. On entering one of the quarries we were asked whether we were in search of gold. The owner had been approached some time before by a man interested in western mining operations, who had noticed a small vein of quartz in the general mass of the rock, which seemed to him to resemble the gold-bearing quartz of the Rocky Mountain mines. He had made certain business propositions to the owner, and told him if he would sink a shaft so as to follow the vein to a depth of one hundred and twenty feet or thereabouts, he would probably find gold in paying quantities.

There was some plausibility in his suggestion, because similar quartz veins in other sections of country are known to contain gold. But as no gold worth mining for has been found in this vicinity, the probability is that the search would be unsuccessful.

Such veins are believed to occupy fissures or cracks made by some disturbing force in the strata of rock previously existing. These cracks are oftentimes of great depth, and have mostly been filled by the infiltration of water containing mineral substances in solution, which have gradually been deposited. Quartz is the most abundant of these deposits, because it is everywhere common, and is readily taken up by heated waters from minerals which contain it. With this are often associated other minerals and metals. "By this process," says Dana, "materials that are scattered very widely, and only in minute quantities through the adjoining rocks, are gradually gathered into these open cavities." J. W.

Affectionate Counsel to a Young Man.

In the year 1818, William Allen, of London, in parting with a young man who had spent some time in his family, gave him a judicious letter of advice, from which the following passages are taken:

"DEAR E. C.—I feel anxious for thy welfare in every respect, and especially in thy going among perfect strangers, but if thou art careful

to attend to the Divine Monitor in thy own mind, the Spirit of Christ, thou wilt be under the notice and protection of the greatest of beings, and wilt be favored with that sweet peace in thy own soul, which is far beyond all other enjoyments. Accept, dear E., the following hints from thy sincere friend and well-wisher:

"1. Devote some portion of the day to the reading of the Holy Scriptures alone in thy chamber, and pray constantly to the Almighty that He would enlighten thy mind to understand them.

"2. Endeavor to keep thy mind in such a state that thou mayst turn it to think upon God many times in the course of the day, and pour out thy petitions to Him in secret for preservation.

"3. Never do anything privately, which thou wouldst be ashamed of if made public, and if evil thoughts come into thy mind, endeavor to turn from them and not follow up the train of them, or indulge them for a moment; always endeavor that thy very thoughts may be acceptable in the sight of God, to whom they are always open.

"4. Be careful not to read books of an immoral tendency, as novels, romances, &c., and endeavor to discourage it in others, they are poison to the mind.

"5. Be punctual in attending a place of worship.

"6. Be very careful what company thou keepst; have few intimates, and let them be persons of the most virtuous character, for if a young man associates with those of bad character, he infallibly loses his own.

"7. Be very circumspect in all thy conduct, and particularly towards females.

"8. Never do anything against thy conscience."

FOR "THE FRIEND."

Teaching and Leadings of the Spirit.

When our Holy Redeemer was personally among men, He told his disciples it was expedient He should go away; for if He went not away the Comforter would not come to them. That is, if I understand it, while they had Him for an outward leader and teacher to depend on, they would not know inwardly for the teachings of the Spirit. How is it now? If we look outwardly for his teachings and leadings, we need not expect to find Him inwardly. But He says, if I go away I will pray the Father and He will give you another comforter that He may abide with you forever. So He would not leave them comfortless, but promised to come again in spirit and guide them into all truth. And now the Comforter has come, as many can livingly testify, and He teaches as never man taught. So we no longer have special need that every man should teach his neighbor, and every man his brother, saying know the Lord, for we all may know Him in spirit, even though we should be so situated as to be deprived of all outward helps. Yet He said, when He was outwardly in the world, "these things have I spoken unto you, that my joy might remain in you, and that your joy might be full." So his sayings are left recorded for us, and like the balance of the Scriptures, are very profitable to us, that we through patience and comfort of the Scriptures might have hope.

But we have need to be more apt learners in the school of Christ, and not look too much outwardly. For that which may be known of God is manifest in man; for God has showed it unto us by his Spirit, and the spirit searcheth all

things, yea the deep things of God. I value the Scriptures above all writings; yet I think them subordinate to the Spirit. For it is only by the Spirit that the doctrinal parts are understood. And I believe that the saving truths of the gospel are taught by the Spirit to every intelligent son and daughter of Adam, whether they are blessed with the Scriptures or not. For it is the Spirit and not the letter that gives life to the soul.

But it appears that very early in the world an evil spirit was permitted to enter Paradise, and gain admittance into the heart of man; and by teaching lies in hypocrisy, lead them away from the teachings and commandments of God, as he was and is the enemy of all righteousness. But a third teacher was, in adorable mercy, soon promised for the salvation of poor, lost and fallen man. He was to have power over all the powers of the enemy, and was ushered into the world under the announcement from God: "This is my beloved Son, in whom I am well pleased; hear ye Him." So "God, who at sundry times and in divers manners spake in times past unto the fathers by the prophets, hath in these last days spoken unto us by His Son." And now we are to hear Him, for He teaches as never man taught. For He alone has the words of everlasting life. But we must have an ear to hear what the Spirit saith unto the churches; before we can understand the deep things of God; as they are only spiritually discerned. So the deep things of God are only understood by the teachings of the Spirit of God. And if our faith stands more in the wisdom and teachings and power of man than in the silent inward teachings and power of God, how can we believe in the teachings of the Spirit? And in proportion as we turn away from faith in the teachings of the Spirit, so far we renounce our faith in the spirituality of true worship, and return to ceremonial and figurative rites. But as our faith is, so it will be unto us. If we prefer to seek the living among the dead, we shall be left to our choice, but leanness will cover the soul. So turn ye, why will we die, spiritually, when life and immortality are set before us to accept if we will comply with the terms? But as in Adam all die under the teachings that he followed, so now, in Christ, and under his teachings, all are made alive and restored to the happy condition they were in before the fall; or in a more steadfast condition in Christ than never felt. But if I can see straight, there is an increasing tendency to turn away from the teachings of the Spirit to the weak and beggarly elements of the letter, and to those who teach for doctrines the commandments of men; and to substitute a human ministry and teaching and power, to supply the lack of the departed life and power. So a spurious ministry and teaching is arising, and attempting to take the place of the true one, by showing great boldness, with signs and wonders, inasmuch that if it were possible it would deceive the very elect. But it calls loudly for money, and outward help to carry it forward. So faith in an educated ministry, and a paid ministry, and a one-man ministry, like other denominations have, seems to be gaining fast foothold amongst us. Reminding me of the days of Simon, the sorcerer, who offered money for the gift of the Holy Ghost. But Peter said to him, "thy money perish with thee, because thou hast thought that the gift of God may be purchased with money. Thou hast neither part nor lot in this matter, for thy heart is not right in the sight of God." But now the delusion has got to be so great with some, that

they seem to think that money is the most essential part in carrying on the evangelistic work, or in saving souls, as they call it. So now the aspirations in many places seem to be to have each meeting supplied with a separate preacher or pastor as they call it, who receives his or her qualifications after the rudiments of the world, and not after the teachings or leadings of the Spirit. But as they are employed by man, they prepare a prearranged discourse, which they call the gospel; and with all the eloquence they can command deliver it to the credulous assembly, who receive it as if from the Spirit of the Lord. Thus the whole course of Society matters amongst us seems to be changing from the inward to the outward; and from the glory of God to the glory of man, and from the leadings and teachings of the Spirit to the leadings and teachings of man, under a mistaken notion that they are led by the Spirit of the Lord. Some as leaders seem to be aspiring to sit in the temple or synagogue as God and to rule it over God's heritage, being vainly puffed up in their own carnal minds.

I've seen the desolation long ago,

And silently have mourned because 'twas so.

And if I am old, I earnestly strive to see things as they really are. I am now, as I write this, near three months along in my eighty-ninth year; yet I have a thankful hope that my spiritual eye has not become dim, nor my mental force much abated. And I still have a faint hope that the time will come when "God will bring back the captivity of his people. Then will the aged and trembling seed of Jacob rejoice, and Israel be glad." (Psalms liii. 6.) But by whom shall Jacob arise for he is small!

D. HIDDLESTON.

DUBLIN, IND., First Mo, 4th, 1890.

Holy Writ Confirmed.

At the annual meeting of the Victoria (Philosophical) Institute, held at the Society of Arts House, under the presidency of Sir George Stokes, P. R. S., Dr. Wright read a valuable paper by Professor Sayce, describing the important cuneiform inscriptions which were discovered the winter before last at Tel el-Amarna, Upper Egypt.

The tale of these tablets is a truly wonderful one, showing that in the fifteenth century before our era—a century before Exodus—active literary intercourse was going on throughout the civilized world of Western Asia, between Babylonia and Egypt, and the smaller states of Palestine, Syria, Mesopotamia, and even of Eastern Cappadocia. The intercourse was carried on by means of the Babylonian language, and the complicated Babylonian script. In fact, Babylonia was as much the language of diplomacy and cultivated society throughout the regions as French has been in modern times. This influence explains, among other things, the existence of Babylonian names in Palestine while the Canaanite was still in the land." The newly-found tablets confirm the conclusions already arrived at by Egyptologists, that Palestine was Canaanite at the close of the eighteenth dynasty, the founder of the nineteenth dynasty being "the new king who knew not Joseph." The towns of the country were, moreover, garrisoned by Egyptian troops, and, though its governors bore Semitic names, they were officials of the Egyptian king.

One of the most interesting passages in the paper dealt with a question of the antiquity of writing. It has long been tacitly assumed by the critical school that writing was not only a

rare art in Palestine before the age of David, but was practically unknown. Little historical credence can be placed, it has been urged, in the earlier records of the Hebrew people, because they could not have been committed to writing until a period when the history of the past had become traditional and mythical. This assumption is now triumphantly shown to be opposed to facts. Long before the Exodus Canaan had its libraries and scribes, its schools and literary men. The annals of the country, it is true, were not inscribed in the letters of the Phœnician alphabet on perishable papyrus; the writing material was the imperishable clay—the characters those of the cuneiform syllabary. A new light is thus thrown on royal lists like that contained in Genesis xxxvi. Why should not this be an extract from the chronicles of Elom, originally written in the cuneiform syllabary of Babylonia? In what is asserted by the critical school to be the oldest relic of Hebrew literature—the song of Deborah—reference is made to the scribes of Zebulon "that handle the pen of the writer" (Judges v. 14), and we have now no longer any reason to interpret the words in a non-natural sense, and transform the scribe into a military commander.

Professor Sayce's paper concluded with some words on the rich reward which still awaits the explorer's toil beneath the soil of the Holy Land. Workmen and funds are found for excavating the buried history of Greece, but little or nothing is done to secure the treasures that lie beneath the surface of the sacred land of our faith. The tablets of Tel el-Amarna are, Professor Sayce holds, an earnest of what is yet to be unearthed in the Holy Land.—*London Christian*.

Natural History, Science, &c.

Habit of Ants.—Across a broad dry, sandy path, worn firm, some thousands of ants passing to and fro from their nest had left a slight trail. They were burrowing on in full work, when I drew the top of my walking-stick across their road, obliterating about an inch of it. In an instant the work of the nest was stopped, and thousands upon thousands of factory hands were thrown out of employment. The walking-stick had left two little ridges of sand like minute parallel earthworks drawn across the highway. Those that came out of the nest, on arriving at the little ridge on their side, immediately stopped, worked their antennæ in astonishment, then went up to the top of it, and seemed to try to look round. After a moment they ran back and touched those that were coming on to communicate the intelligence. Every ant that came did exactly the same thing. One ant that came passed the little ridge, but all returned. By and by the head of the column began to spread out and search right and left for the lost track. They scouted this way and they scouted that; they turned and doubled and went through every possible evolution, hundreds of them, sometimes a score at once, yet not one of them attempted to go straight forward, which would have brought them into their old path. Not one ventured to explore straight forward. The same actions were going on behind the other ridge of sand just opposite, an inch away. Once or twice an ant from either party happened to mount on the parallel ridge at the same time, and if they had strained forward and stretched out their antennæ they could have almost touched each other. Yet they seemed quite unconscious of each other's presence.

Some hours afterwards, towards evening, I found the ants were beginning to get over their difficulty. On one side an ant would go forward in a half-circle, on the other another ant would advance sideways, and meeting together they would touch their antennæ, and then the first would travel back with the second, and so the line was re-established.—*R. Jefferies in Field and Hedge Row*.

Rainy Season in South America.—Dent, in his "Year in Brazil," says that he had been told for some time that the rains would begin on the 15th of Ninth Month, and "with marvellous punctuality, during the grey dawn of that morning down came the first showers."

Lizards as Food.—"A few days ago Vicente shot a large lizard, it was three feet, eight inches long, and was killed while lying asleep, basking in the sun beside a small pond near our camp. We skinned and cooked it according to a recipe contained in a book called "National Cookery," and which gives directions how to prepare and cook monkeys, snakes, frogs, armadillos and, in fact, everything imaginable. The result of the experiment with the lizard was most satisfactory, the flesh being a delicate white and most delicious, rather similar to pork in flavor."—*Dent's Year in Brazil*.

Surveying in Brazil in the Rain.—At 6.30 A. M. the weather appeared rather finer with detached clouds, but no blue sky. At seven it was showery, but yearning to get out again, we determined to rally forth. The showers soon became settled rain, which fell with scarcely any intermission the whole day. It was fearful work. We were engaged in setting out lines through dense forests, and undergrowths on steep side-long ground. After a long morning spent in pushing and cutting my way, torn by thorns, drenched not only by the rains, but by the droppings from vegetation, I felt somewhat done up. I had been hacking away all morning, sometimes passing through lovely dells carpeted with various ferns, among which appeared tree ferns and handsome leaved plants, some with long, pale-green leaves, but all overrunning and intertwined with a network of innumerable thorny creepers, some very thick, without leaves, but with strong curved spines about three inches apart and half an inch long, similar, I dare say, to the African "wait-a-bit" thorns, besides many smaller. There were also many trees and shrubs, whose trunks and branches were studded all over by a mass of long, sharp spines, some of them sticking out from the trunks in bunches, branching out like the end of a lightning conductor, about three or four inches long by six inches across. I also met with thick clumps of long jointed, red-like grass or dense masses of feathery bamboos, through which it was impossible to see a yard in advance. So I went on, with my ranging rod in my left hand, and my long knife in my right, my mackintosh torn in a dozen places, shaking off fresh showers at every step, every stitch on me soaking wet, above my waist from perspiration, below with rain, my hands scratched and dotted over with many thorns."—*Dent's Year in Brazil*.

Items.

Italy and Peace.—From many sides, by voice or by writing, friends known or unknown, have for many years exhorted us to prosecute with redoubled energy our labors for Peace and European disarmament. These incitements, come to us, even more than from ideal humanitarians, from business men who admit more fully every day that the only remedy for the crisis amongst bankers, builders,

farmers and business houses (which, instead of lessening, continues in ever-increasing ratio), will be the substitution of trust for the armed trust which keeps up mistrust all round, and is leading to universal bankruptcy. The Governments themselves are beginning to be convinced of this, but they have not the courage, bound as they are by the past, to alter their path.

The impulse to change, needs to come to them from public opinion, and it remains to be seen whether men of intelligence and of heart, who long to see their countries brought out of the ruinous situation in which they are now placed, will follow the example of Senor Semenza, a highly-esteemed merchant, and of others.—*From the Milan "Secolo."*

M. Semenza's letter alluded to in the preceding article:—

"Milan, 19th November.

"Dear Signor Monca,—In reading the splendid speech of Mr. Blaine to the American Congress, my thoughts went to the work of Peace and Brotherhood which is begun in Europe, and to which you have dedicated so much zeal and activity.

"An American diplomatist may say that, if America too often sends to Europe unwelcome announcements of storms which are traversing the Atlantic, this is partly counterbalanced by the despatches which Europe sends her of so much of her waste, mixed up with good emigrants. But the speech of Blaine is the voice of a practical man and Minister of State, who speaks to a confraternity of the other American States the following words:—"We believe that the spirit of justice and mutual respect of rights will not allow of the establishment in the Americas of that artificial equilibrium which has covered Europe with war and with blood."

"However ambitious and sincerely practised in good faith, will from the American people from the necessity of surrounding their frontiers with soldiers."

"The idea of Blaine is much less distant from reality than that of those who in the distant epoch in which the cities of Lombardy lived in war between themselves, forgot an united Italy."

"However ambitious and sincerely practised by blinded governments, they can hardly fail to see that those who live by their own labor are beginning to be tired of the excessive weight of the taxes, which, destined in great part to support huge armaments, are ever narrowing, directly or indirectly, the benefits derived from agriculture, industry and commerce. I have often thought, and if the great mass of the people knew how much they pay to-day, under the veiled form of indirect taxes, they would be perfectly amazed. And even if our patience is unlimited, material resources have their limit."

"Financial crises, economica disturbances, general discontent, increase of emigration, ideas of anarchy, are all calamities which will go on increasing, we do not see how much, if the great mass of the people do not see the obstacle the action of the Committee of Peace has already, in its early days, obtained some practical result, as, for example, is indicated in recent speeches by some of the principal men in Europe.

Baltimore Yearly Meeting.—The printed Minutes of this body, which have been recently received, state that it convened at Baltimore on the 8th of Eleventh Month, 1859.

The Trustees of the Miles White Beneficial Society reported that they had distributed \$5,910, principally in promoting education, purchasing books, relieving the poor, and assisting various charitable institutions.

A report on the distribution of Friends' books was adopted; which, while recommending a more general acquaintance with the writings of Friends, discouraged the Yearly Meeting taking part in the sale of the Publishing Agency.

A memorial was read, prepared by the Western Yearly Meeting, and addressed to the Conference of American Delegates, recommending the adoption of arbitration as a means for settling international disputes. It was agreed to endorse this memorial on behalf of the Yearly Meeting.

Memorials were read from Nehemiah C. Thomas and John B. Crenshaw, deceased ministers.

Anti-Caste.—This is a Monthly Journal issued by

Catharine Incey, Street, Somerset, England. Price 25 cents per year. The number of Eleventh Month, 1859, contains some account of the barbarous treatment which the settlers in Australia have manifested towards the aborigines of that country, a nation which it states, "is still to be numbered by hundreds of thousands."

A Bridge Over Which We Must Pass.—"Will you ask my pardon?" said a master to his servant, with whom he had disputed.

The answer was a surly negative.

"Then I will ask yours," said the master, knowing that some one must always be the first to give in, and meeting his servant more than half-way with forgiveness and peace.

"What heart could withstand such a step toward reconciliation? Truly has it been said of forgiveness, that this is a bridge over which we all need to pass. Let us not break it down. A glimmer of light and comfort came to Martin Luther when the old monk by his bedside read aloud the solemn words: "I believe in the forgiveness of sins." Which of us could stand before the God of all did He not blot out our failures and dismiss our trespasses? If we are feeling concerning any fellow-creature, "I have sustained a wrong I cannot forget nor pardon," let us take the first right step by naming the name we dislike at the mercy-seat. In the time of Washington a Christian man journeyed to the general to beseech the life of a neighbor sentenced to death. He was told his "unfortunate friend" must perish. "He is my worst enemy," said the intercessor. "And have you," asked Washington, "walked sixty miles for your enemy's sake? I grant you his pardon." What a revenge was this!—*Quiver.*

THE FRIEND.

FIRST MONTH 25, 1859.

The general prevalence in the community of a suddenly developed influenza, attacking multitudes of people, causing much suffering to many persons, and proving very serious and even fatal to some whose vital powers were previously in an enfeebled condition, or who have imprudently exposed themselves while under its influence, has awakened a very general interest in the subject, and has produced much speculation as to the cause or causes of this mysterious affection. The prevalent opinion appears to be that there must be some malaria, or disease-producing material widely diffused in the atmosphere, which has affected the health of the people, both in Europe and on this Continent. As to the source of this poisonous constituent of the air we breathe, it seems probable that we shall long remain in ignorance. It is too widely spread to be traced to any local origin. It is possible, that in the progress of the solar system, through the infinite regions of space, we may have passed through a portion of the universe containing unwholesome materials which have been drawn to our globe by the power of its attraction.

But whatever theory may be suggested, we may rest securely in the conviction that the omnipotent Ruler of the universe keeps everything within his own control. If He sees meet to chasten the inhabitants of the earth, He has it at his command countless agencies with which He can effect his purposes. If men do not take warning and turn from the evil of their ways, when his rod is lightly shaken over them, it is

easy for Him to send more grievous afflictions. If it should be his will to increase the potency of the malarious influence which now prevails, how helpless would man be to oppose it. Hundreds might then be stricken down where only single individuals now perish.

What a blessed thing it is, in the midst of trial and sickness, to have our confidence firmly placed on the Lord—to feel that we are in his hands, and to be prepared to submit ourselves unreservedly to his will, knowing that all things shall work together for good to them that love God—that neither heights nor depths, things present or things to come, shall ever separate such from the love of God, which is in Christ Jesus our Lord.

We believe the present visitation, though not yet so destructive to life, as the Cholera, Plague, and other epidemics have been, is yet grave enough in its character to awaken serious thoughtfulness, and that it ought to have the effect of renewing, stimulating the people to seek the favor and protection of that Divine Being, in whose hands are the issues of life and death.

We have received a letter from a Friend in England, who is much troubled at the growth in America of the cruel practice of vivisection or the performing of surgical and other experiments on living animals. The writer has sent us a printed pamphlet on the subject, which contains some accounts of the tortures to which dogs, cats, rabbits, &c., have been subjected under profession of advancing the interests of science. These accounts are revolting to those who possess ordinary feelings of compassion, and we believe it right for public opinion to be so brought to bear on this subject as to greatly restrict, if not altogether prevent such horrible performances.

The letter referred to says:—"It seems especially fitting that the Society of Friends should come forward boldly and courageously against the scientific cruelties which are practised on these helpless creatures, and many hearts in this country would be greatly cheered if Friends in America would set themselves against them."

SUMMARY OF EVENTS.

UNITED STATES.—The Senate Committee on Territories decided to report favorably the bill making a State of Wyoming and establishing a Territorial Government in Oklahoma. It was agreed to postpone the bill for the admission of Idaho as a State until the Supreme Court has decided a pending case involving the constitutionality of a test oath for the Mormons, adopted by the people of Idaho.

On the 20th instant Representative Conger presented a bill, authorizing the issue of Treasury notes on deposit of bullion, as recommended by Secretary of the Treasury, Windom.

The Department of State has been officially informed that Italy will not permit the importation of plants coming from countries, such like the United States, more or more than the Anti-phyloxera Convention of Berne, except on previously obtaining authorization from the Royal Ministry of Agriculture and Commerce.

A telegram from Baltimore says, that city last year "exported four times as much corn as in 1858, four times as much cornmeal, twice as much cattle, twenty times as much oats, and four times as many dried apples, twice as much leather, 20 per cent. more oil, twice as much canned beef, twice as much tallow, three times as much bacon, nearly twice as many hams, 75 per cent. more corn, 47 times as much cheese, and four times as many cigars."

Local option was defeated in Lynchburg, Va., on the 14th instant, by 7 majority. A very large vote was polled.

The State Flood Commission, Governor Beaver presiding, was in session last week at the house of the Manufacturers' Club. An appropriation of \$40,000 was

made for a hospital to be built and equipped by the Commission, at Johnston. An arrangement has been made with the Girard Life Insurance, Annuity and Trust Company to pay \$50 annually for each orphan under five by the food in the Conemaugh Valley, until the child shall reach the age of 16 years. For this purpose an appropriation of \$165,000 was made. There are 322 such orphans. It was reported, and the investigations of the Commission show, that there are 116 widows, made as yet, and \$100,000 was paid \$179,493 and to whom an additional sum of \$95,250 will be given in annual payments. According to reports received, the number drowned was 2280; recovered, 1675; identified, 1021; unidentified, 643; missing, 605. The fish market in Florida, Jacksonville, has been given to annual payments. According to reports received, the number drowned was 2280; recovered, 1675; identified, 1021; unidentified, 643; missing, 605.

A fish dealer in Baltimore says that there are 116 widows, made as yet, and \$100,000 was paid \$179,493 and to whom an additional sum of \$95,250 will be given in annual payments. According to reports received, the number drowned was 2280; recovered, 1675; identified, 1021; unidentified, 643; missing, 605.

The fish market in Florida, Jacksonville, has been given to annual payments. According to reports received, the number drowned was 2280; recovered, 1675; identified, 1021; unidentified, 643; missing, 605.

There is a snow blockade in the West and North-west, and the snow was still falling. Travel has been stopped on the western division of the Central and Northern railroads, and the traffic is at a standstill, and is slowly coming down. The Western Union repairers are worked up at a dozen points. The Southern Pacific Road has been badly damaged in the Tehachapi Mountains by washouts, and beyond Los Angeles the floods have done great damage.

Deaths in this city were 1151 deaths in New York city against 779 in the corresponding week of 1889. The deaths from pneumonia were 296; from phthisis, 193; from bronchitis, 97; and from the influenza, 94.

Deaths in this city last week numbered 777; 59 more than during the previous week and 598 less than during the corresponding week of 1889.

Of the whole number 410 were males and 367 females: 182 died of pneumonia; 100 of consumption; 50 of influenza; 44 of diseases of the heart; 41 of old age; 23 of bronchitis; 23 of typhoid fever; 25 of convulsions; 18 of debility; 15 of apoplexy; 15 of Bright's disease; 14 of cholera; 12 of typhus; 12 of paralysis; 12 of inflammation of the stomach and bowels; 11 of inflammation of the brain and 10 of marasmus.

Markets, &c.—U. S.—4.85, 105; 4, 1263; currency 65, 116 a 129.

Wheat was firm and 1-16c. higher, at 10 13-16 cts. per pound for middling uplands.

FEED.—Winter bran, prime to fancy, \$13 a \$13.50; do, fair to good, \$12.50 a \$12.75; spring bran, \$11.75 a \$12.50.

FLOUR.—No. 1 Western and Pennsylvania super, \$25 a \$25.50; do., do., do., \$25.00 a \$25.75; No. 2 winter family, \$3.00 a \$3.50; Pennsylvania family, stone ground, \$3.75 a \$3.99; Pennsylvania roller process, \$4.00 a \$4.25; Western winter, clear, \$4.00 a \$4.20; do., do., straight, \$4.25 a \$4.45; winter patent, \$4.50 a \$4.90; Minnesota, clear, \$3.75 a \$4.00; do., straight, \$4.00 a \$4.25; patent, \$4.50 a \$4.75. Rye flour was in limited request, at \$3.15 per barrel for choice. Buckwheat flour was dull at \$1.50 a \$1.60 per good lb.

BEEF CATTLE.—Extra, 5 1/4 cts.; medium, 4 1/2 cts.; common, 3 3/4 cts.; fat, 2 1/2 cts.

SHEEP.—The demand was good, and with continued light receipts prices on all goods advanced 1/2. Extra, 6 1/2 cts.; good, 5 1/2 cts.; medium, 5 1/2 cts.; common, 4 1/2 cts.; culls, 3 1/2 cts.

LAMBS were in fair demand and firm. Extra, 7 1/2 cts.; good, 6 1/2 cts.; medium, 5 1/2 cts.; common, 5 a 5 1/2 cts.

HOGS were in fair demand and prices, in sympathy with the West, closed firm. Western, 5 1/2 cts.; State, 5 a 5 1/2 cts.

London correspondent of the New York Mail and Express, who leans far over toward the Liberals' side of the argument, says in his despatches of the 18th instant that:

"As soon as Parliament reassembles a Conservative conference will be convened to discuss the advisability of applying the same principle which is expected to result from Mr. Goschen's budget, to the scheme of free education. If this plan is carried out one effect will be to break one plank of the Radical platform—or, rather, to rip it out and use it to strengthen the rather weak structure on which the Government party will try to stand."

"Mr. Goschen is convinced that he has a scheme which will prove acceptable to all moderate politicians. At all events, all the intellectual and political strength of the Conservatives is being used to counter-

balance the powerful programme of the Opposition, and a desperate fight will be made to retain power." The object of the London "Inquirer" is the Powers unwilling to mediate in the dispute between Portugal and England, concerning territory in East Africa, will submit to Lord Salisbury's demands under protest, while at the same time it will try to conciliate Portuguese public opinion.

The "Inquirer" English trade in Lisbon is becoming a very serious matter. Many English firms have been compelled to close their doors, as a consequence Portuguese merchants are cancelling their English coal contracts in all directions and the spirit of ostracism is spreading over the land.

The Duke of Guis, ex-King of Spain, died at Turin, Italy, on the 18th instant.

Sagasta has formed a new Spanish Cabinet, with himself as Prime Minister and President of the Council.

The policy of Sagasta's new Cabinet will be similar to that of the last, the failure to form a Cabinet based on the fact that to policy being accepted as an evidence that the country favors it.

The Prussian Diet was opened on the 15th instant. The speech opening the session said it afforded the Emperor-King much joy to announce that the foreign policy of Germany was based on a Cabinet based on the fact that to policy being accepted as an evidence that the country favors it.

The Emperor also expressed the hope that lasting peace should be established between the mine owners and their employes.

During the second week in this month the death rate declined largely in Berlin, Königsberg, Danzig and Frankfort, while it increased in Munich, Cologne, Kiel and Stuttgart. It is now declining in most of the cities of Germany.

The Journal des Debats of Paris, referring to the Russian budget, says that it gives evidence of a pacific policy on the part of Russia. The St. Petersburg papers make similar comments.

A report from London mentions that the Czar of Russia is insane, owing to the chronic state of fear in which he lives. His bodily condition is known to be weak. He exhibits the deepest feeling of despondency, and insists that his death is drawing near. It is known that he is trying to alleviate his misery by the use of morphine.

A despatch from Cairo says that authentic news has been received of terrible mortality among the natives in the Soudan, due to famine, resulting from lack of rain during the autumn. The fighting forces have dispersed. Osman Digma has left Omdurman for Tokar. Said Pasha writes that the reports of death of the Khalifa are untrue.

Advices from Brazil say that the Provisional Government has ordered that the use of the calendar with saints' names for each day be discontinued, and that Comte's Festival calendar be substituted therefor.

The calendar substitutes the name of some eminent man for a saint's name for each day, divides the year into thirteen months, and dedicates the months to Moses, Homer, Shakespeare, Dante, &c., substituting these for the names now in use.

How much more simple and satisfactory it would be for Brazil and all other countries to adopt the Scriptural method of using the numerals to designate the days of the week and month as the Society of Friends has always done.

Government has decreed that all foreign companies doing business in Brazil must transfer to that country two-thirds of their entire capital within two years of their organization. Companies already in existence must do the same within six months.

The Government of Peru has just ceded a large tract of territory and necessary for its extension, to private capitalists for a term of sixty-six years. The result will be to open up immense agricultural and mineral fields in the interior.

NOTICES.

WESTWON BOARDING SCHOOL.—A special meeting of the Committee will be held on Sixth-day, First of December, at 10 o'clock, at the residence of Mrs. Street, to consider the report of Committee on the Treasurership.

WM. EVANS, Clerk.

WESTWON BOARDING SCHOOL.—Wanted, a young man of experience and ability, to fill the position of Governor. Application may be made to

BENJAMIN W. PASSMORE,

Concordville, Del. Co., Pa.

WM. EVANS, 292 1/2 S. Front St., Philadelphia.

TO GRADUATES OF FRIENDS' SELECT SCHOOL.—All graduates of Friends' Select School are requested to send to the undersigned the names of any graduates of the school whom they can recollect, with the year of their graduation and their present addresses. In the case of any graduates from the Girls' School, now married, but who have not been in the year books, please send the names of their husbands to the undersigned.

Howard W. Taylor, 140 N. Sixteenth St.

Anna Scattergood, 3515 Pechon St.

Katherine T. McCallin, 1823 Arch Ave.

DIED, on the 24th of Tenth Month, 1889, at the home of her daughter, Nancy S. Johnson, near Sherman, Texas, ELIZABETH H. HINDS, aged 71 years, born in New Jersey, but of late years a resident of Oskaloosa, Iowa. During the last year or more of her life, she felt best satisfied when in health to often sit down at home on First-days with her son, and sometimes others of her family would join them in their endeavors to draw near unto Him who hath promised "Where two or three are gathered together in his name, there He would be in the midst of them," instead of attending the regular meeting which she has been unable to attend for some time. She had been adopted with which she could not mite. When nearing her end she said, "If she had her life to live over again, she would more often tell her children of the love of Jesus," a duty she seemed to feel she had too much neglected. While bringing her to this world she was ever saying, "The Divine will during her last illness, and this with her earnest and frequent prayers for herself and children, and her desire that they might all meet her in heaven, give her family and friends a comforting hope that her purified spirit has entered into that "rest that remaineth to the people."

—, on the 13th of Eleventh Month, 1889, SAMUEL EMBREE, in the 73rd year of his age, a member of Pennsville Monthly and Particular Meeting of Friends.

From early life he manifested an attachment to the highest and purest of the Christian religion, and a faith in which we believe increased as he advanced in life. We believe that he was concerned to be found ready for the change when the end of life should come; and although he was suddenly taken from our midst, his friends and relatives feel a comfortable hope that his essence has entered into that "rest that remaineth to the people."

— at his residence in West Chester, Pa., First Month 5th, 1890, JOSEPH SCATTERGOOD, a beloved member and minister of Birmingham Monthly Meeting of Friends, in the 51st year of his age. On the morning of the First-day preceding his decease he was so weak that he was unable to attend the meeting at West Chester, fervently and affectionately commending the importance of taking up the cross to the natural inclination, and submitting to the yoke of Him who had laid down his life for our sakes, and thus become participants of those joys which are prepared for the righteous, earnestly pleading with some present in a memorable manner. During the afternoon and evening of that day he repeatedly alluded to the comfortable feelings of his mind in the enjoyment of his home and the company of his family, from whom he was so long separated, and to the kind remembrance of different meetings as a member of the Yearly Meeting's Committee. In the night he was taken with a violent illness, which soon developed into pneumonia, and ended his life in a little less than seven days. On being asked early in his sickness if he was ready to die, he replied, "Why, certainly, I don't feel ready to leave my precious family yet."

At another time he said in regard to a prospect of his death; "I have not been clearly shown, but if it is the Divine will I would like to live, but if not, I would not be prepared to die, but I would rather die than to be separated from my dear friends."

On one occasion he remarked, "I feel as if I had found an unprofitable servant, if a servant at all; that is what my dear father said on his death bed." In reply to the inquiry whether he was afraid of death, he answered, "No, I believe not, but it is an awful, sad, and fearful thing to be separated from my dear friends."

"I don't know why this is permitted, unless it is for a testimony." In this state of patient submission and humility, he appeared to have nothing to do but to die, and in great quietness of spirit, passed away to enjoy, we reverently believe, through mercy, into the joy of heaven.

—, First Month 7th, 1890, at Denver, Colorado, ARTHUR E. son of the late Joseph H. and Mary W. Roberts, a member of Easton Particular and Evesham Monthly Meeting of Friends, New Jersey, in the 32nd year of his age.

FOR "THE FRIEND."

Incidents and Reflections.—No. 208.

MEANS OF CONVERSION.

A few years ago, a Friend who resided in Baltimore related to me the case of Thomas Wilson, who, when young imbibed atheistical sentiments. After some years of a rather wandering life, he finally settled in Baltimore, and became a prosperous merchant and a respectable member of the community. On one occasion he spent a little time at York Springs in Southern Pennsylvania. A young woman there felt her mind drawn towards him, and under a feeling of religious duty gave him a tract which he promised to read. Some weeks afterwards he found the tract in his coat pocket, and remembering his promise, read its pages. It was blessed to the awakening of serious convictions in his mind. He sent for my informant and another Friend; and when they were introduced into his library, told them his situation; that he felt himself broken to pieces, and that he wished their advice as to what he should do.

Through submission to the visitations of Divine Grace with which he was favored, his understanding was opened to believe in the doctrines of the gospel; and he became a member of the Society of Friends.

A somewhat similar anecdote is told of Gilbert West and Lord Littleton, both men of talents, who had imbibed infidel principles, and who had persuaded themselves that the Bible was not a book to be believed and followed. West chose the resurrection of Christ, and Littleton the conversion of the Apostle Paul, as subjects for hostile criticism. On these points they expected to produce arguments which would overthrow the truth of Christianity. The result of their studies was, in each case, a conviction of the truth of the Scripture narrative; and each of the writers produced a valuable treatise in favor of Christianity—the one, "Observations on the Resurrection of Christ," and the other, "Observations on the Conversion of St. Paul."

When Dr. Coke, one of the early laborers in the Methodist Church, was in America, he missed the ford in crossing a river, got into deep water and was in danger of being drowned. He found quarters and kind treatment in the house

of a widow, at a neighboring village; and messengers were sent after his horse, which had been carried down the stream. Five years after, being again in America, he met with a young man, who asked him if he remembered the circumstance, to which the doctor replied, "I remember it well; and never shall I forget the kindness which the widow lady showed me." The young man then told him, that a tract which he had left with her, had been blessed by the Lord, and been made the means of her conversion, and of that of several of her neighbors and children, of whom he was one; so that there was now in that village a society of professing Christians. The account says, the tears of Dr. Coke showed how much this incident affected his feelings.

The Divine blessing has often rested on words spoken, as well as on words printed. Peter Mill, who was a zealous minister of the Gospel, during a pedestrian excursion in Yorkshire, came to the brink of a large pit, which was so concealed by snow that he was in imminent danger of falling into it. Just at that moment a young woman coming up, pointed out to him his danger. His gratitude to the instrument of his delivery from death led him to enter into conversation with her; in the course of which he expressed his earnest desire that she might be rescued from the still more awful pit into which those shall be plunged who live in forgetfulness of their Creator, and disobedience to his laws. It proved to be "a word in season;" and was made instrumental in awakening her to serious reflection, and an earnest seeking after pardon and peace. She lived not long after this, but died in the happy assurance that she would be received into the arms of everlasting mercy.

Among the cases in which the writings of the pious have been blessed to the religious awakening of those who read them, may be mentioned the late Jonathan Evans, for a long time a prominent member of Philadelphia Yearly Meeting. Looking into an old chest or box, which he found in the loft of a house, he met with a copy of William Penn's treatise, "No cross, no Crown;" and to the reading of this was attributed the turning of his mind to subjects of eternal importance.

His son, William Evans, for many years a minister in the Society of Friends, was first awakened to seek earnestly for salvation by reading the pathetic epistle to Friends, written by William Leddra, the day before he was put to death for his obedience to the Divine requirings, by the persecuting magistrates of New England.

His wife, Elizabeth, also a beloved minister of Philadelphia, was similarly awakened by reading a copy of the works of Isaac Pennington. She found it in a garret, and becoming absorbed in the book, its perusal was blessed to her.

It is recorded of Lillias Skein, wife of Alexander Skein, one of the magistrates of Aberdeen, in Scotland, in the early days of the Society of Friends, that she was a woman much esteemed for her religious attainments, and actuated by

an earnest desire to find out the way of truth, among the conflicting opinions of that day. She was discouraged from looking towards the Society of Friends by the notions and prepossessions industriously instilled into the minds of their hearers by the priests of that city against the Quakers, such as that they denied the Scriptures, and did not pray in the name of Jesus, of whom the Scriptures testify. But being visited with indignation, she kept her chamber in an apartment under the same roof with Barbara Forbes, one of that Society, at whose dwelling Friends sometimes met, so near the said Lillias's apartments that she could distinctly hear what passed: here, attentively listening, she heard two English women exercise both in preaching and praying, whose testimonies she observed to be replete with Scripture expressions, and their prayers put up in the name of Jesus, and attended with life and power. From this demonstrative confutation of the calumniating accusations of these priests, whom she formerly admired, and to whose representations she had given entire credit, she was freed from her prepossessions, and discovering the falsehood of their assertions, she withdrew from their communion, and in consequence of this discovery and the effectual reach of the testimony she had heard, she was fully convinced and joined in society with that people.

Gough, in his "History of the people called Quakers," mentions that William Gibson, an eminent minister of London, who died in the year 1684, was born in Lancashire in 1629, and enlisted as a soldier during the civil wars in England. Being in garrison at Carlisle, and hearing that a Quaker preacher had appointed a meeting in that city, he, in concert with three of his comrades, made an agreement to go to the meeting, with a design to insult and abuse the preacher; but William Gibson coming thither before his confederates, and the Friend, who was Thomas Holmes, being in the course of his ministry, it was attended with such demonstration of power, as almost immediately wrought an effectual change in William's disposition, for he was so affected therewith, that instead of executing his intended purpose, he stepped up near to the Friend to protect him from insult or abuse, if offered by any other. From that time, he frequented the meetings of this Society, and soon after quitted his military engagements and employed himself in the occupation of a shoemaker; waiting upon God in silence, under the refining operations of his saving grace for about the space of three years. He afterwards received a dispensation of the Gospel to preach to others.

J. W.

I may perhaps be preparing for some future service, but am at present, as I believe is requisite, stripped of all: some glimmerings of the Master's countenance at times appear, but, in the general situation of my mind, I feel even less than the least of all true disciples; may the name of my God be exalted, though I am abased to dust and ashes.—S. Fothergill.

A Noisome Weed.

The whispering breeze that at sunrise calls me out of doors, is laden now with the matchless odor of the blooming grape. Every draught of the vinous air intoxicates and the eyes rest upon the brilliant landscape, but is scarce content. A curious feeling of indecision meets me at the very outset. Meadow and upland are alike urgent; field and forest offer their choicest gifts; rugged rocks and sparkling river both beckon to me. Whither, then, of a bright June morning, should the rambler stroll? For is it not true that beauty, when in bewildering confusion, ceases to be beautiful? When a thousand birds, as a great cloud, shut out the sun, they are but a cloud; but a single one, perched upon a tree is a marvel of grace and beauty. So, the sloping hillside and the weedy meadows, brilliant with every shade of freshest green and starred with a hundred tints, roseate, golden, and white, call for an infinite power of contemplation, and leave the wanderer dazed.

Shutting my eyes to the wealth of bloom about me, closing my ears to the melody of every nesting bird, I start upon the doubtful quest of the commonplace, hoping to chance upon some neglected spot, that happily, generous June has overlooked.

As has happened so frequently before, where I least expected it, there stood the object of my search: a gem in a setting not so elaborate that its beauties were obscured. In a long neglected pasture, a wide meadow torn by freshets, foul with noisome weeds, and strown with the wreckage left by winter's storms, grew many a graceful vine that few have heeded; for it is not enough that the botanists should long ago have named it and that others should have besmired their proper fame by calling it "carrion flower." Can we not forgive the offense to the nostril when the eye is captivated? Does it go for nothing that a plant beautifies the waste places, and invites you to contemplate it as the acme of grace, because in self-defence it warns you to keep at a respectful distance?

Sitting in the pleasant shade of clustering thorns, I see nothing now that attracts me more than the leafy bowers of this curious vine. Every one has sprung boldly from the sod in full faith of finding the support it needs; at least, I see none that are standing quite alone. Two, it may be, but often three or four have started at convenient distances and when well above the tallest grass, each has sought out the tendrils of its nearest neighbor and these have closely intertwined. So, here and there, we have a leafy arch, and scattered among them, many a pretty bower. These may well have given the Indian a clue to a wigwam building. Had ever, in the distant past, a savage seen his child creep beneath the overarching branches of the despised "carrion flower," he would have seen how easily a summer shelter might be made. Perhaps upon some such hint, the stuffy caves and rock-shelters were abandoned, for the time surely was when even a more primitive dwelling than a tent was man's protection against the summer's sun.

But though despised by man, this vigorous plant has hosts of other friends. The summer long, scores of bugs, butterflies, and beetles crowd about. Whether when in leaf only, or later when in bloom, or in autumn, when laden with its wealth of blue-black berries, it is never quite alone, and many of its attendants are fully as curious as the plant itself. One or more minute beetles prefer it to all other plants, yet not because of the peculiar odor. At least, the same

creatures do not crowd decaying flesh. On the other hand, the dainty flies that linger about the ruddy plox, the blue iris, and purple pentstemon tarry likewise about the carrion flower, and find it a pleasant place, if one may judge by the length of time they stay.

I was somewhat surprised to find this to be the case, as I looked for a repetition on a small scale of what is recorded of those strange plants, the Rafflesiaceae found in the tropics. Forbes, in his "Wanderings in the Eastern Archipelago," records that once he "nearly trampled on a fine, new species of that curious family . . . ; it smelt powerfully of putrid flesh, and was infested with a crowd of flies, which followed me all the way as I carried it home, and was besides overrun with ants."

So far my own observation: what say others? Let us turn however to a more surveying subject. Undeterred by possible whiffs of sickening stench, I followed the example of my friend, the meadow mouse, and crept into the largest smilax wigwam I could find. It was sufficiently roomy for all my needs, and shed the sun's rays better than it would have done the drops of a summer shower. The east wind brought the rank odor of the marshes, and more fitfully the tinkling notes of the marsh-wrens that now crowd the rank growths of typha; but sweeter songs rang out near by, as the nervous Maryland yellow-throat, thinking me gone, perched within arm's length and sang with all its energy. The power of that wet creature's voice was absolutely startling. We seldom realize how far off many a bird may be, when we hear it sing; often looking immediately about us. Certainly this yellow-throat's utterances might have been distinctly heard a quarter of a mile away. Such shrill whistling is no child's play, either. Every feather of the bird was ruffled, the tail slightly spread, the wings partly uplifted, and the body swayed up and down as the notes, seven of them, were scooped.—I can think of no more expressive word. It was not musical; and yet this bird has long ranked, to my mind, as one of the most pleasing songsters. It needs a few rods distance however, to smooth away the rough edges.

But the great point gained in the day's outing was to find that even the carrion flower could be put to such good use. It makes a capital observatory, wherein and wherefrom to study the life of the open meadows. To these Nature-built shelters you are always welcome; the lath-string is always hanging out, and if perchance you do not share its single room with many a creature that loves the shade at noontide, and so while away many an hour in choicest company, you may lie at its open door and watch the strange procession that forever passes by. It may be a mink, a mouse, or a musk-rat may hurry by, bound on some errand that piques your curiosity. A lazy turtle may waddle to your den and gaze in blank astonishment at you; and better than all else, the pretty garter snake will come and go, salute you with a graceful darting of their forked tongues and then pass on, perhaps to tell their neighbors what strange sights they have seen. And as the day draws to a close, what myriad songs rise from every blade of grass! Hosts of unseen musicians pipe to the passing breeze; and crickets everywhere chirp so shrilly that the house about me trembles.

The day is done; but the night brings no end of novelty. The moping herons are no longer stupid; the blinking owls are all activity. Afar off the whip-poor-will calls—who knows why?—and the marsh-owls protest, as well it may, at

such unseemly clatter. How quickly into a new world has the familiar meadow grown! Through the half-naked beam and rafter of my leafy tent I watch the night-prowling birds go hurrying by, and follow their shadows as the weird bats flit before me, for the moon has risen, and in its pallid light every familiar tree and shrub and all the night-loving wild-life of the meadows is wrapped in uncanny garbs. It is fitting now that a filmy mist should rise as a curtain and shut out the view. "He is none of us," seems to shout every creature in my ear, and taking the hint, I pick my way homeward through the dripping grass. — Charles C. Abbott, in *The American*.

Rebecca Travers.

Rebecca Travers of London, died in the year 1688. She was born about the year 1609, received a religious education, and was a zealous professor among the Baptists. In the year 1654, James Naylor came up to London, and being engaged to dispute with the Baptists, Rebecca's curiosity drew her, with many others, to hear the disputation; and coming under the impression of the prevailing prejudices, which public rumor circulated to the disadvantage of the Quakers, she pleased herself with hopes of enjoying the satisfaction of beholding the conquest and triumph of her party over their simple and illiterate antagonist. For she had heard of a people in the North called Quakers, who were principally remarkable for their simplicity and rustic behavior; for a manner of worship strangely different from all others; and a strenuous opposition to all the public teachers; whereby they gave offence not only to the vain, but even the religious part of the people were ready to condemn them. Thus prepossessed, she came to hear the dispute, which turned out very differently from her expectation; for the plain peasant proved an over-matcher for the champions of the Baptists, making his replies and remarks so closely and so powerfully, that she thought she felt his words smite them. When one and another of them gave out, a third attacked him with confidence, as if he would have borne down all opposition; but producing Scriptures, which turned against him, he also, being confuted, was obliged to give up.

Rebecca was ashamed and confounded to find a man so simple in appearance should get the advantage of their learned men; which affected her with serious considerations, and abated her pre-conceived prejudice so far, as to beget in her a desire to hear him in the exercise of his ministry, who had managed the controversy so much beyond her expectation; she had soon after the opportunity of gratifying her desire, at a meeting at Bull and Mouth, and was at that time so fully convinced, that when she came home, she expressed her apprehension, "that since the apostles' days truth could not be more plainly laid down, nor in greater power and demonstration of the Spirit, than she had heard it that day;" and from that time forward she attended the meetings of this people.

Soon after she was invited by a friend to dinner with James Naylor, where one present being high in notions, put many curious questions to James Naylor, to which he returned pertinent answers; to which Rebecca Trayer giving close attention; James Naylor, perceiving her desirous to comprehend truth in her understanding, rather than apply it to rectify her heart and affections, taking her by the hand said, "feed not on knowledge; it is as certain forbidden to thee as ever it was to Eve: It

good to look upon, but not to feed upon; for whosoever feeds upon knowledge, dies to the innocent life." This admonition she received as truth, and found it so in her deepest trials; of which she had her share. The benefit she received from his ministry, and the profitable impressions made on her mind by the observations of his circumstances and self-denying conversation in those days, engaged her affectionate esteem for James Nayler; and although she was a woman of too much discretion and stability in religion to carry her regard beyond its proper limits, to such extravagant lengths as those weak people who contributed to his downfall; yet being a woman of a tender sympathizing disposition, she attended him carefully in his rigorous sufferings, washed his wounds, and administered every charitable service for his relief in her power.

After some time she received a gift in the ministry, in which she seems to have labored mostly in the city of London and its neighborhood. She was a partaker in the sufferings of these times. In the year 1659 she thought it her duty to go to the public worship house called John the Evangelist's, to which she formerly belonged; and after their worship was ended, she put a question to the priest, as she said, not to give disturbance, but for edification. The priest hurrying away without replying, his hearers assaulted her with violence, railing at, and pushing her down several times, whilst she had none to protect her, or take her part, though several of her relations were spectators of the abuse she received. She was committed to Newgate three times in one year, viz: 1664, this being the year wherein the conventicle act for banishment came in force; when the mode of short and repeated imprisonments was adopted, in order that the third offence for transportation might be expedited. She wrote sundry small tracts, in one of which, directed to the parishioners of the aforesaid parish, she gives the following account of her religious experience, "that though she had been a reader of the Scriptures from a child of six years old as constantly as most, yet when, by the power of the gospel, she was turned from darkness to light, they appeared another man in her view, being clearly explained to her state and her understanding, as she came to learn of that Spirit, which gave them forth."

She was a virtuous woman, discreet in her conduct, and much employed in acts of charity and beneficence; of sympathetic tenderness toward the afflicted; and therefore one of the first of these faithful women to whom the care of the poor, the sick and the imprisoned members of the Society was assigned, which care, in conjunction with others, she religiously discharged. And after a long life of virtuous and charitable deeds, she died in much peace the 15th of the Fourth Month, 1688, in the 80th year of her age.

It is the belief in the inward and immediate revelation of Jesus Christ to the soul, and the need of absolute dependence upon its guidance in our drawing nigh unto God, that leads Friends to wait upon Him in solemn silence when they assemble for worship, instead of at once entering upon outward exercises which may be utterly unsuited to the state of the person assuming them. It was this same belief that led the prophet to declare, that "They that wait upon the Lord shall renew their strength; they shall mount up with wings as eagles; they shall run and not be weary; they shall walk and not faint."—*Selected.*

From THE FRIEND.

Historical Notes, Respecting the Society of Friends.—No. 1.

The widespread conviction and the rapid accession of believers in the doctrines they promulgated, which followed the preaching and other labors of George Fox and his co-laborers at the time of the rise of the Society of Friends, was a remarkable event; and one of very considerable historical importances, when considered in connection with the consequences which have flowed from it. Owing to the care which those reformers manifested, to preserve records of all the more important incidents which occurred; and their zeal to permit no opportunity to pass unimproved for spreading a knowledge of the principles they held, and for refuting the malicious or mistaken charges made against them; we possess in their writings a pretty full narrative of the events in which they were concerned; and many statements of the doctrines and testimonies, in support of which they counted not their lives dear unto themselves.

The history of our Society is necessarily connected with the political history of Great Britain; and especially with the religious controversies which had agitated that nation.

The Reformation on the Continent of Europe of which Martin Luther was the most prominent instrument, was an effort to change certain corrupt doctrines and practices which had become established in the Church. But that in England, in the time of Henry VIII., was more in the nature of a political movement; and consisted principally in rejecting the claims of the Pope to supremacy. Henry quarrelled with the Pope, because the latter would not grant a divorce from his wife Katharine of Aragon, whom he wished to put away, so that he might marry Ann Boleyn. So he determined to suppress the papal authority in England, and induced the Parliament in 1532-1533, to pass an act prohibiting the payment to the Pope of certain moneys which had originally been granted as an aid in maintaining forces against the infidels. Another act prohibited any appeals to Rome, and directed that all causes of a religious nature, as well as civil, should be determined within the kingdom. This was followed the next year (1534) by another act, which declared the king to be the supreme head on earth of the Church of England, and that he was clothed with full power to exercise spiritual authority and jurisdiction.

This transference of spiritual allegiance from the Pope to the crown was acquiesced in by the clergy generally, but the monks were not so yielding. The king soon after appointed a commission to examine into the condition of the monasteries, which were eventually suppressed and their endowments confiscated. The colleges, chapels and hospitals, consisting of secular priests experienced the same treatment. The number of monasteries dissolved is computed at 645, of colleges 90, of chapels 2300, and of hospitals, 110.

Henry, in accordance with his despotic character, did not hesitate to put to death those who refused compliance. The laws at that time were very cruel and cruelly executed; so that during his reign 72,000 persons are said to have died by the hand of the executioner.

One of the royal "injunctions" was, that a Bible in English should be placed in every one of the regular places of worship, so that the parishioners might conveniently resort to and read it. A. W. Hone, of the Trinity College, Oxford,

in his work on the history of the English Church, says, "This translation of the Bible was received with the greatest delight; people, instead of as formerly, being obliged to read it secretly in woods and retired places, were now permitted to read it openly; those who could afford it, bought the book; sometimes several neighbors clubbed together and bought it in common; many aged people learned to read, in order that they might be able to read their Bible; the Bible became the great topic of the day."

Although the tendency of this study of the Scriptures was to undermine the authority of those false doctrines which had been held in the Church, and to pave the way for further reformation, yet many of the old Romish errors were retained by Henry VIII. and his advisers, such as the presence of images in the places of worship, praying to saints and angels, the observance of holy days, and of many rites and ceremonies, a belief in purgatory, the necessity of confession and the benefit of absolution, the forbidding of priests to marry, and the unreasonable doctrine, that in what is called the sacrament, there is present under the forms of bread and wine, "verily, substantially and really combined and comprehended, the very self-same body and blood of our Saviour Jesus Christ, who was born of the Virgin Mary, and suffered upon the cross for our redemption." Henry's belief in purgatory is shown by the fact, that in his will, he left a considerable sum of money to the monks of Windsor to be spent in masses for his soul. "His great object was to free England from the dominion of the Pope, and to establish his own supremacy; any one who opposed him must suffer for it. He would burn, and he actually did burn, on the same day (July 30th, 1540), six people, three for holding the doctrines of the Reformers; and three others, priests and doctors of divinity, for upholding the supremacy of the Pope."

Historians state that the persecution under Queen Mary was one of the chief causes which made England a Protestant nation. Hone, who is strongly High Church in his sentiments, remarks, "The folly of religious persecution cannot be better exemplified than in the history of the English Church at this period. Henry persecuted Romanists and Protestants alike; Edward persecuted Romanists; Mary persecuted those whom Edward favored; and we shall soon find Elizabeth persecuting Romanists again. We nowadays talk about the "bloody reign of Queen Mary," and so it was; so also were the reigns of her father, her brother and her sister. It was a period when little notion of religious toleration existed; yet the reaction of the public mind against the barbarity of burning goodly people for their opinions was one of the causes which made England anti-Roman."

When Elizabeth ascended the throne, Parliament passed an act restoring to the crown jurisdiction over the State Ecclesiastical—thus linking the Church and the State—an act which R. Barclay in his recent work on the "Inner Life of the Religious Societies of the Commonwealth," says, "has entailed on our country greater evils than either pen or tongue will ever be able adequately to tell." By the act of uniformity passed at the same time, "he who ventured to address his Maker publicly in other language than that of the Book of Common Prayer, was liable to severe penalties."

The new order of things was willingly submitted to by most of the laity, and of the 9400 clergy there were very few who refused to conform, and so lost their livings.

The change in Church government in England was principally political in its character. Elizabeth herself was fond of a showy ritual, and wished to preserve most of the old usages. But the influence of the Reformation on the Continent gradually spread into Great Britain; and the ideas of John Calvin who endeavored to frame a government on the basis of a Mosaic theocracy, influenced many minds. The Puritan party, who embraced his views, desired the abolition of the Episcopacy, and the substitution of Presbyterialism—church government by a system of ruling elders. To this, as well as to a fuller reformation of Popish practices, Elizabeth was strongly opposed, and with the despotic instincts of the Tudor family, exercised a vigorous control over her subjects; her great concern being to prevent religious discussions which might endanger the peace of her kingdom.

In the dissensions and struggles during the reign of her successor, James I., the doctrine of the Divine right of the king, which that monarch held, and which was opposed to the increasing demands of the people for political liberty, was upheld by many of the bishops; and thus Episcopacy became partially identified in the popular mind with absolute power, and Presbyterialism with civil freedom. The attempt of Laud, under Charles I., to force Episcopacy on the Scotch, who were mostly Presbyterians, met with determined resistance from that people, who bound themselves by a *solemn league and covenant* to resist all innovations, and entered into open rebellion. The efforts of Charles to maintain what he considered as the rights of the crown, and to restrain the growing spirit of liberty soon brought him into a conflict with the Parliament of England, which ended in his losing his kingdom and his life. In this conflict religious differences were mingled with political. The Puritan element was largely on the side of Parliament, and the Episcopal party favored Charles. In its efforts to reform the Church, Parliament ejected from their livings about 2000 of the Episcopal clergy, whose places were soon filled by Presbyterians. In 1645 they adopted as a substitute for the *Book of Common Prayer*, a new compilation, which was directed to be used by the clergy, and was called a *Directory for Public Worship*.

It was in those troublous times, when civil war devastated the country, and the minds of the people of England were in an unusual ferment over matters civil and religious, that George Fox came on the stage of action. He was born in 1624, and in obedience to a Divine call entered upon his public ministry about the year 1648, when Charles I. was a prisoner in the hands of Parliament, a few months before his public execution, and when the State religion was Presbyterial. Toleration, or the free exercise of religious worship according to the belief of the worshipper, was no part of the system of the ruling party. They followed in the path trodden by their predecessors from Henry downward, of their predecessors to all conform to the views of the ruling party. A synod of Divines at Ston College, in 1645, denounced toleration "as a root of gall and bitterness." Calamy on a sermon to the House of Commons in 1644, told them, "If you do not labor according to your duty and power, to suppress the errors and heresies that are spread in the kingdom, all those errors are your errors, and those heresies are your heresies; they are your sins."

Baxter thought unlimited toleration "was to be abhorred." Edwards, another Presbyterian writer of that period, called it "the grand de-

sign of the devil." It was not the *principle* of coercion in religious matters that they condemned in the Catholic and Episcopal powers, but that it was exercised on the *wrong side*.

(To be continued.)

THE PRAYER OF THE ENGINEER'S WIFE.

[Who thinks of the engineer on the railway train and of our dependence upon his character for sobriety and devotion to duty? Some of this calling are pious, prayerful men. A lady visiting the home of an engineer's family, was un- speakably moved by the account the wife gave of her anxieties and of her prayers and of her husband's reliance upon her intercessions. Night after night she was accustomed to await the whistle of his train as it flew by her little cottage. Its meaning and use between them this young Christian has turned into verse—the truly extracts poetry out of the railway.—A. Cleveland Coze.]

The Night has led her sparkling stars
Far up the evening sky;
Before me all the dewy fields
In peaceful silence lie.
The gentle murmur of the stream
Falls sweetly on the ear,
And evening lamps begin to gleam
In dwellings far and near;
Slowly the creeping, silvery mist
Veileth the woods in white,
Dear Lord, to Thee I lift my heart:
Protect my Love to-night.

For, as the sweet departing day
Looks backward with a smile
To tell us it will come again
To gladden us a while,
From yonder busy railroad town,
Where ceaselessly all day
The noisy engines, up and down,
Ply their restless way,
At this calm moment, clad in strength
And terrible in might,
Flies forth the train my Dearest drives
Along the track to-night.

I hear the thundering sound afar,
And through the darkness dim
I strain mine eyes—perchance I may
Catch one swift glimpse of him.
And hark! the friendly engine shrieks
Right loud and merrily!
Through it my Love, my Dearest, speaks,
Bidding "Good-night" to me.
And as the cheery signal sounds,
My anxious heart grows light.
It speaks so clear! "Pray for me, dear,
In my wild race to-night!"

He:

"Pray for me, dear; for all who drive
The swiftly speeding train
Need watchful eyes, courageous heart,
A steady hand and brain.
It is no light or common weight
The engineer must bear;
Hundreds of lives the burden great
Intrusted to his care!
But knowing that my wife doth pray,
I feel that all is right;
That God will guard me on my way
Along the track to-night."

SHE:

"As far amid the mighty hills
The distant rumbling dies,
From this dark earth I look above
To yonder starry skies.
While all is wrapped in gloom below
All shines in brightness there,
And He who dwells on high, I know,
Will grant my earnest prayer.
O Thou, to whom the darkness deep
Shines ever as the light,
Whose Watchful Eye doth never sleep,
Protect my Love to-night."

The Independent.

THE PROMISE.

"To him that overcometh will I grant to sit with me in my throne, and he shall overcome, and an set down with my Father in his throne." Rev. iii. 21.

To him that overcometh
Will I grant to sit with me
In my kingdom, saith the Saviour,
There his place shall be.

Blessed promise to the weary
And the tried and troubled soul,
When the billows of temptation
Like a tempest round us roll.

Can we think that one so loving
Ever can forget his own,
Or forsake his trusting children
Leaving them to strive alone?

Never through the endless ages,
Though the mother might her child,
Will our Father leave us seeking,
Selfcentered within the wild.

Though at times the shadows deepen,
And we cannot see his face,
Still abiding in the patience
We at last shall feel his grace.

For He never lays a burden
On our souls too great to bear,
And there's none that however tripping
Can escape his tender care.

And this promise true and faithful,
Let it strength and courage give!
For the soul that overcometh
With our risen Lord shall live.

IF WE KNEW.

SELECTED.

Could we but draw back the curtains
That surround each other's lives,
See the naked heart and spirit,
Know what spur the action gives,
Often we should find it better,
Purer than we judge we should—
We should love each other better
If we only understood.

Could we judge all deeds by motives,
See the good and bad within,
Often we should love the sinner
All the while we loath the sin.
Could we know the powers working
To o'erthrow integrity,
We should judge each other's errors
With more patient charity.

If we knew the care and trials,
Knew the effort all in vain,
And the bitter disappointment,
Understood the loss and gain,
Would the girl, external roughness
Seen, I wonder, just the same?
Would we help where now we hinder?
Would we pity where we blame?

Ah! we judge each other harshly,
Knowing not life's hidden force;
Knowing not the fount of action
Is less turbid at its source,
Seeing not amid the evil
All the golden grains of good;
O! we'd love each other better
If we only understood.

—Woman's Work.

PHYSICAL pain is not altogether evil. It serves at least two good purposes; it calls attention to the fact that an important law has been broken, and admonishes the transgressor to proceed no farther in that direction. It is the mission of pain to prevent suffering. There is a spiritual pain which is more poignant and more important than physical. Pangs of remorse admonish the transgressor to repent and seek pardon. The anguish of a guilty conscience is not the punishment of sin but a merciful warning that punishment lurks somewhere in the direction the sinner is pursuing. Pain is Nature's danger-signal.

FOR "THE FRIEND."

John ap Thomas.

In THE FRIEND of First Month 18th, 1890, page 197, is a brief account of John Thomas, taken from Gough's History of Friends, vol. 3d. This account though correct for the most part is not altogether so; and as it has more than once been copied from this standard history of Friends into this and other journals, it may be well to make here the needful corrections.

John Thomas, or as he was known in his own home, John ap Thomas, was one of the early converts to Quakerism in Wales. He is frequently alluded to in the journals of Friends travelling in the ministry, in the early history of the Society, his house and heart being freely open to them.

Like his friends Charles and Thomas Lloyd, John ap Thomas belonged to an ancient Welsh family, being seventeenth in descent from Marchweithian, one of the fifteen tribes of North Wales and Lord of Is-Aled. His paternal estate was *Llathgwyn* (not *Llathgwin* as Gough has it) pronounced so nearly as it can be written in English *Thathgwin*, a few miles from Bala in Merionethshire, North Wales. The old mansion is still standing, and is a large stone house with numerous out-houses, showing it to have been the home of a man of wealth and social position. Like Dolobran and Swarthmore it is sadly decayed from what it was two centuries ago.

Names of estates do not change in the old world with change of ownership as they too often do in the new, and there is little difficulty in finding the old homes of many of the early Welsh emigrants to Pennsylvania. Thus, in this immediate neighborhood, is *Ced y Foel*, the early home of Edward Foulke, who was one of the first settlers in Gwynedd, Pennsylvania. A few miles beyond is *Yron Goch*, once the home of Rowland Owen. *Citlathgarth*, though replaced by a new house, is on the site of the home of Hugh Roberts, one of the most eminent ministers in our early colonial history. *Hendri Mawr* the home, two centuries ago, of Robert Vaughan, near by which was built a meeting-house, for many years used by Friends, and from which came many a certificate of removal to Pennsylvania, is still standing in good preservation, a few miles from Bala. A little beyond *Llathgwyn* was another meeting-house and burial ground known as *Havod Vadog*, the first of which has long ceased to be used as such, and the latter is in that state of utter neglect in which so many of the older grave yards of Friends are in Great Britain and, I regret to say, even in our own country. Here John ap Thomas was buried Third Month 5th, 1683. For, contrary to the statement of Gough, John Thomas never came to America though he made preparation to do so, having purchased, with other Friends from his immediate neighborhood, five thousand acres of land (not in *Gwynedd*, as Gough has it, but) in what is now Merion, near Philadelphia. The original subscription list for this purchase and some of the writs committing Friends to jail, referred to by Gough, which John ap Thomas received while acting as high constable, but which, at the risk of his liberty and his estate, he refused to execute, have long been in my possession.

In a paper read before the Historical Society of Pennsylvania, published in its Magazine vol. 4, 1880, p. 301, *et seq.*, these papers are printed in full. Katharine, widow of John ap Thomas, and their children, sailed for Pennsylvania Seventh Month, 1683, and from them and from

John Cadwalader, son of Cadwalader ap Thomas, brother of John ap Thomas, have descended some of Philadelphia's most useful citizens.

JAMES J. LEVICK.

1200 Arch Street.

The Elixir of Life.

The warden of one of our large penitentiaries said, lately, "I have seen some remarkable changes in the men under my care. Old John C——, for example, had been, since boyhood, one of the most brutal roughts in the city, a professional thief, and twice, a murderer. He went out of the prison humbled and tamed. His old associates crowded about him, but he turned his back on them, though they showed him plenty of short cuts to fortune, and betook himself to his trade as a cobbler, at which he barely saved himself from starvation.

"He had been a liar, he was now truthful; he had been a thief since childhood, now old and famished, he was honest as steel; he had been fierce and brutal, he was now humble and gentle as a child.

"I have known the most vulgar and debased of women, after the turning-point of a moment, become pure, and the drunken sot rise out of the gutter a man of integrity and honor."

It was not a fear of public opinion that suddenly changed the whole lives of these men and women; it was not natural love of decency and goodness; it was not the entreaties or arguments of friends. It was a mysterious something which came into their minds and souls direct from Christ, as soon as they put themselves in his care.

"The water that I shall give him," said Christ, "shall be in him a well of water springing up into everlasting life."

It is this mysterious elixir which, out of brutal barbarism, has lifted the world into freedom and civilization; it is this draught which keeps the reader of these words out of meanness and crime. However strong may be a man's inherited tendencies to drunkenness and to dishonesty, however corrupt he may have grown through years of vice, this elixir will make him pure and faithful as in his early childhood.

Let him thank God, not only for the freedom, but for the strength of his salvation.—*Selected.*

My grandfather died on November 6th, 1879, when I was nearly seven years of age. I remember my father coming in greatly distressed. He had just witnessed his decease. He sat down on announcing the event to my mother, and gave way to a paroxysm of tears. I was much affected by the scene; and certainly moved by some influence beyond my childish mind, I went quietly away into a distant room, got a chair, and reached up to a book-case containing a large family Bible. I took it down and carried it, as a considerable load for me, into the room where my father was sitting sunk in his grief. The book seemed to open almost of itself, and I began to read the first words that caught my eye. They were in the 14th chapter of St. John: "Let not your heart be troubled; ye believe in God, believe also in me. In my Father's house are many mansions; if it were not so I would have told you. I go to prepare a place for you."

I was carrying the book away, when my father stopped me, took and opened it, and read the words in evident astonishment. He then said, "I was not aware there were such words." He dried his tears and seemed wonderfully comforted.—*Extract from Mr. Howitt.*

Debt.

A distinguished minister of the Protestant Episcopal Church in a Western city, a man of such eminence as to have been a candidate for the bishopric so lately as within one year with very fair prospect of success, is in disgrace, and has left his pastorate and gone into retirement. For the past three or four years he has been in the habit of borrowing sums of money, varying from \$50 to \$1,000, under the promise of paying in a short time, and then apparently forgetting all about it. He has borrowed a large amount of money, never paid it back, and through his borrowing has caused a trusted cashier and loaned bank funds to him to be discharged, and made a young tradesman fail. No one can tell how he spent so much, as he has appeared to live frugally, and so far as known had few or no extravagances and habits. Some think he has sensitive tastes and habits; others that he is insane. The parish had determined to ask for his resignation, but he anticipated it by resigning.

While debt unpaid and unprovided for to the satisfaction of creditors means speedy ruin to the satisfaction of the business world, it is ruinous to the reputation of a clergyman. Many ministers are this day declining in influence, undesired, and in some instances scorned, because of their indifference to pecuniary obligations. With some it is but a symptom of a general want of conscientiousness. In such cases untruthfulness and recklessness of conduct accompany it. In others it springs from an excess of the mendicant spirit which is as common among ministers with large salaries as among the very poor. Some of them are in the habit of receiving and expecting gifts, and even hinting for them; and those who can do that are in such a state of mind as not to feel strongly the obligations of debt.

To say nothing of some ministers with comfortable salaries who have friends had to meet at intervals for years and contribute money to pay their debts in order to save them from disgrace, of which we know in some instances in five different denominations, those who go from place to place leaving debts behind them are, in the aggregate, by no means few. It is impossible to have confidence in a man who borrows money, promises to pay it, and then pays no attention to his word. One of the most brilliant men who ever preached in the city of New York was ruined by his constant borrowing, and the lies he told about when he would pay. The immediate successor of the writer in the pastorate of a large church, a man in whom we had the utmost confidence, a grave, solemn, apparently pre-eminently sensible person—one to whom we would have sent to pray with us in the hour of death—astonished the community by absconding. It then appeared that he was in debt in every direction, had been robbing Peter to pay Paul, and had manufactured falsehoods and told them to Jude and Bartholomew. He had tried to make money by investing in various enterprises, had not succeeded, and fell into the habit of borrowing. Under an assumed name he began the practice of law in a Western State, and after eight or ten years of life there repeated the transaction. Where he is now we know not.

"The borrower is servant unto the lender." Debt to a professional man who has no legitimate means of accumulating except by saving, is a crushing burden. His spirit, if he be honorable, must break; and if he be dishonorable, his reputation is doomed.

We would not say a harsh word or grieve those whose debt is the result of misfortune,

Debt is not a disgrace, if thus incurred; provided a frank explanation of inability to pay is made to the creditor, and combined with the most constant and heroic efforts to do so. It is the borrowing and not *paying*, or *trying* to pay, that we denounce; the dressing, living, travelling as though one were financially at ease, while indifferent to the payment of honest obligations.

Many debts are contracted in the expectation of an improved condition, often a great delusion. The country pastor with a salary of six or seven hundred dollars reads of the thousands paid to a city minister, and hopes to get such a place that he may pay debts already contracted. As a general proposition, if a man does not live within the income he has, there is no certainty of his keeping out of debt anywhere. Hundreds of ministers and teachers, doctors and lawyers, in less favorable circumstances than most of those who run in debt, do conscientiously live within their income.

We cannot but fear that some debt-burdened person will say: "It is easy for those to talk whose income is sufficient to support them in luxury," to which it is sufficient to reply, in the language of an uncle whose nephew said to him: "If I had as much money as you have, I would not be so close with it as you are," to which the uncle replied, "That is the reason you will never have any."

Many give away money ostentatiously—money that they *owe*. Thus a minister who owed a tailor, one of his parishioners, for three suits of clothes, subscribed \$100 toward a new organ, and had the adamantine face to expostulate with the tailor because he gave only \$10, and received this reply: "Pay me for those clothes, and I will make it fifty." But this minister belonged to the class who make subscriptions and never pay them. Neither the clothes nor the subscription have ever been settled for.—*Christian Advocate*.

LOVE works the most wonderful transformations. Exclusive of animal decay, we can hardly arrive at a more absolute type of impurity than the mud or slime of a damp overtrodden path in the outskirts of a manufacturing town. That slime we shall find, in most cases, composed of clay (or brick dust, which is burnt clay), mixed with soot, a little sand, and water. All these elements are at helpless war with each other, and destroy, reciprocally, each other's nature and power—competing and fighting for place at every tread of your foot—squeezing out water, and clay squeezing out water, and soot muddling everywhere and defiling the whole. Let us suppose that this ounce of mud is kept in perfect rest, and that its elements gather together like to like, so that their atoms may get into the closest relations possible. Let the clay begin. Ridding itself of all foreign substances, it gradually becomes a white earth, already very beautiful, and fit, with help of congealing fire, to be made into finest porcelain, and painted on, and to be kept in king's palaces. But such artificial consistence is not its best. Leave it still quiet, to follow its own instinct of unity; it becomes not only white, but clear; not only clear, but hard; but *so set* that it can deal on the light in a wonderful way, and gather out of it the loveliest blue rays only, repressing the rest. We call it then a *sapphire*. Such being the consumption of the clay, we then give similar permission of quiet to the sand. It also becomes first a white earth; then it grows clear and hard, and at last arranges itself in mysterious and infinitely

fine parallel lines, which have the power of reflecting not merely the blue rays, but the blue, green, purple and red rays, in the greatest beauty in which they can be seen through any hard material whatever. We call it then *opal*. In next order, the soot sets to work. It cannot make itself white at first—but, instead of being discouraged, tries harder and harder, and at last comes out clear, the hardest thing in the world; and for the blackness it had, obtains in exchange the power of reflecting all the rays of the sun at once, in the most vivid blaze that any solid thing can emit. We call it then a *diamond*. Last of all, the water purifies or wastes itself, contented enough if it only reaches the form of a dew-drop. But if we persist in its proceeding to a more perfect consistence, it crystallizes into the shape of a star. So, for the ounce of slime we had at first, we have a sapphire, an opal, a diamond, set in the midst of a star of snow. We see then, the seeming trouble—the degradations of the elements of earth must passively wait the appointed time of their restoration. But if there be in us a nobler life than in those strangely moving atoms—if, indeed, there is an eternal difference between the *fire* which inhabits them and that which animates us, it must be shown by each of us in his appointed place—not merely in the pretense, but in the activity of our hope; not merely by our desire, but by our labor for the time when the dust of the generations of men shall be conformed for foundations of the gates of the city of God.—*Ruskin*.

Natural History, Science, &c.

Chinese Chestnuts.—Amongst the woods I met with the chestnut for the first time in China. This discovery was of great importance, as I was most anxious to introduce this to the Himalayan Mountains in India. Many attempts have been made to introduce it from Europe, but they had not succeeded. The seeds of such trees as oaks, chestnuts, tea, &c., retain their vitality for a very short time after they are gathered if they are not sown and allowed to vegetate. It is therefore useless to attempt to send these seeds in dry paper parcels or in hermetically sealed bottles from Europe to the north of India. The chestnuts which I had met with in the markets of China, although excellent for the desert, were generally too old for vegetating; but now, when I had discovered the locality where they grew, there was no longer any difficulty in procuring them quite fresh. There are two species cultivated on these hills. One is somewhat like the Spanish, and although probably a different variety, it produces fruit quite equal in quality, if not superior, to the Spanish chestnut. The other is a delicious little kind, bearing fruit about the size and form of our common hazelnut. Large quantities of both kinds were procured in the autumn of this year, sown in Ward's cases, and sent on to India. Part were sent to Government and part to the Agricultural and Horticultural Society. They vegetated freely during the voyage, and many hundreds of nice healthy young plants reached India in the most perfect condition. The chestnut may now be considered naturalized on the hills of India, and in a few years will no doubt make its appearance in the markets amongst other fruits.—*Forbue's Travels in China*.

Influenza.—As to its nature, we are much in the dark. In its mode of diffusion, influenza, in more than one feature, stands almost alone among epidemic diseases. In the first place, it spreads with remarkable rapidity once it is es-

tablished in a centre; as witness the recent accounts of its progress in St. Petersburg, Vienna and Berlin. Secondly, it tends more or less rapidly to become pandemic; for although minor and apparently limited outbreaks are often recorded, yet its liability to diffusion over whole continents, and indeed from one hemisphere to the other, is one of the best-known facts concerning it. The disease has, therefore, no geographical limitation; it is apparently un-influenced by season or climate, and its virulence travels over sea and land in a manner so baffling and contradictory to the ordinary conception of the transmission of infection as to render any simple explanation of its nature almost impossible. It has been compared with cholera in the manner of its diffusion; but the analogy is by no means exact, for influenza, unlike cholera, is not apparently confined to the lines of human intercourse, although there are not wanting some who claim both for cholera and influenza a propagation by contagion. But in the case of influenza the rapidity with which a whole population may be smitten appears to exclude contagion, which otherwise would seem so obvious an explanation of its spread; and a further point in disproof of this is the almost simultaneous outbreak of the epidemic at different parts of the same country.—*Lancet*.

No Man's Land.—That strip of land along the English coast which is covered by the sea at high tide, is left bare at the ebb, has been called "No Man's Land," from an early date. The strip varies in width, according to the shelving of the shores. It is peculiar in character, and the following description, given by the author of "A Sea Painter's Log," shows the fitness of its name:

"There is nearly always one figure to be seen upon No Man's Land, working his way to and fro along the windings of the smaller creeks and over the mud, walking with careful, measured tread, and never resting long upon either foot. This is the eel-spearer, who, with mud-pattens—or mud-shoes—firmly laced to his feet, tows behind him a box about two feet six inches long, and slightly rounded at the bottom. He works carefully over the ground before him with his spear, like a pointer in stubble.

This man knows every square yard of the mud for miles, and has earned a living upon it, and on nothing else, for the last forty years, his whole stock in trade being his mud-pattens, his spear and the box that slips after him. When his tide is over, he slings this box, with twenty or thirty pounds of eels in it, upon his spear across his shoulder, his pattens hanging in front, and so trudges to market.

Like the heron, the eel-spearer is nearly always alone, and only those who have spent an hour or two upon the mud in pattens, a mile or more from real land, can form an idea of how very much alone he is.

I have spent many an hour in a boat far out at sea, and know that the smallest boat in such a situation is as a house compared with the eel-spearer's two bits of elm plank, fourteen inches square. At every step they sink and suck in the mud, and tug at the lashings which secure them to the feet, so that both the quality of these cords and the way they are made fast, become quite important matters.

The pattens are fastened in a particular manner, which is seldom deviated from, for the safety of the eel-spearer depends too much on his footboards for him to venture on rash experiments with them.

The special skill, the local knowledge, required

in your parts feel like contributing something for that purpose, it will be thankfully received."

Those disposed to assist in this undertaking may forward their contributions to Edward Sharpless, No. 304 Arch Street, Philadelphia, or to Clarkson T. Penrose, West Branch, Iowa.

William W. Hazard, has been appointed Agent for THE FRIEND in the place of Nicolas Tripp, released at his own request. Address Poplar Ridge, New York.

SUMMARY OF EVENTS.

UNITED STATES.—The steamer *Friesland*, at New York on Seventh-day from Antwerp, reports that on the 17th ultimo she encountered a hurricane from southwest to north-north-west, with high seas. She was hove to 14 hours for her engines stopped. She used oil with the effect, keeping the seas from breaking over the bow. On First Month 30th, latitude 46.23, longitude 45.2, she passed an iceberg about 200 feet high.

Valente, the Brazilian Minister at Washington, has received from Roy Barboza, the Brazilian Minister of Finance, a telegram, dated Rio Janeiro, First Month 24th, to the effect: "The capital for the great national banking institution, to be known as the National Bank of the United States of Brazil, was subscribed to-day within four hours. The capital is one hundred million dollars." Valente regards this as "the crucial test of the confidence of the country in the stability and permanency of the new Republic. When the capitalists at the seat of Government would within four hours subscribe a hundred million dollars to a financial institution to be controlled and managed by a new provision of Government it argued absolute and unvaried confidence."

Representatives of the five civilized Indian tribes of Indian Territory have prepared at Washington a bill looking to a complete Territorial government for that Territory, and its ultimate admission as a State.

The Christian Temperance Union has issued an address on the 25th ultimo, to the effect: "To the South American, Central American and Mexican Commissioners of the Pan-American Congress," in which it was said that statements were read with surprise that during the round of banqueting to which the 25th was devoted, intoxicating liquors were served upon every occasion and indulged in by the Pan-American delegates. The W. C. T. U. expresses regret at this fact and assures the Southern delegates that no better end can be subserved by them in this country than to study the vast benefits of a prohibitory law as practiced in eight States of the Union.

The Union Pacific trains were again blocked by snow last week. Trains going east were delayed beyond Green River, and trains coming east were blocked at the same point, the latter being delayed 24 hours. On the Southern Pacific the prospect of getting the trains through snow are not encouraging. The whole country is covered with snow, and the telegraph lines in that direction were prostrated, so that but little information could be had from the west.

A telegram from Tacoma, Washington, says that at least ten men and thousands of cattle and sheep perished in the blizzard which began on the first of the year and raged for a week.

Fruit growers in Sussex County, Delaware, are complaining of the loss of buds over this year's crop.

Many peach and apricot trees were in full bloom. Petroleum has been struck on the farm of S. H. Kennedy, near Johnston, New York. The well was being sunk to discover natural gas. Experts say that the rock strata and the way of the land are similar to those of some of the best yielding wells at Bradford, Pennsylvania.

A mill operator in Providence, Rhode Island, is said to have succeeded in carding, spinning and weaving his own cotton and in doing so more heavily for 24 hours than by any manufacturer in an effort to obtain a substitute for wool.

More than \$100,000,000 of English capital has been invested in various American industrial enterprises within the last twelve months. Nellie By on the 25th ult., completed her task of putting a *World* globe around the globe in less than 75 days. She arrived in New York at 4 o'clock in the

afternoon, having made the circuit of the earth in 72 days, 6 hours and 11 minutes unofficial time.

A passenger train on the Louisville, New Albany and Chicago Railroad was thrown from the track near Carmel, Indiana, on the morning of the 27th ultimo. Four coaches were thrown from a trestle into a creek, and were set on fire by the stores. Five persons were killed or burned to death, and twenty-four injured, one fatally. It is said that the accident was caused by spreading rails on a curve.

Deaths in this city last week numbered 552; 255 less than during the previous week and 107 more than in the corresponding period last year. Of the whole number 272 were males and 282 females; 126 died of pneumonia; 88 of consumption; 25 of old age; 23 of influenza; 22 of diseases of the heart; 20 of typhoid fever; 16 of paralysis; 10 of inflammation of the lungs; 15 of cholera; 10 of diphtheria; 14 of emphysema; 14 of marasmus; 14 of bronchitis; 13 of cramp and 10 of congestion of the lungs.

Markets, &c.—U. S. 4 1/2's, 105; 4's, 125; currency 6's, 116 a 126.

COTTON was quiet but firm on a basis of 1 1/2 cts. per pound, including upland.

FEED.—Winter bran, prime to fancy, \$13.50 a \$13.75; do, fair to good, \$12.75 a \$13.25; spring bran, \$12.00 a \$12.00.

FLOUR AND MEAL.—Western and Pennsylvania super, \$2.25 a \$2.50; do, do, extras, \$2.50 a \$2.75; do, 2's, \$2.50 a \$2.75; do, 3's, \$2.50 a \$2.75; family stone ground, \$3.40 a \$3.75; Pennsylvania roller process, \$3.80 a \$4.15; Western winter, clear, \$3.85 a \$4.15; do, do, straight, \$4.20 a \$4.40; winter patent, \$4.50 a \$4.00; Minnesota, clear, \$3.50 a \$4.00; do, straight, \$3.25 a \$3.75; do, patent, \$4.85 a \$5.10. Rye flour is in limited supply. Buckwheat flour was inactive, at \$1.50 a \$1.60 per 100 pounds, as to quality.

GRAIN.—No. 2 red wheat, 80 a 80 1/2 cts.

No. 2 mixed corn, 35 1/2 a 36 cts.

BEEF CATTLE.—Fair, 5 1/2 cts.; good, 4 a 4 1/2 cts.; medium, 4 a 4 1/2 cts.; common, 3 a 3 1/2 cts.; fat cows, 2 1/2 a 3 cts.

SHEEP.—Extra, 6 1/2 a 6 1/2 cts.; good, 5 1/2 a 6 cts.; medium, 5 1/2 a 5 1/2 cts.; common, 4 1/2 a 5 cts.; culls, 3 1/2 a 4 1/2 cts.

LAMBS.—Extra, 7 1/2 a 7 1/2 cts.; good, 6 1/2 a 7 cts.; medium, 6 a 6 1/2 cts.; common, 5 a 5 1/2 cts.

HOGS.—Western, 5 1/2 a 5 1/2 cts.; State, 5 1/2 a 5 1/2 cts.

FOREIGN.—There was a great storm of wind and rain in Southern England on the 22nd and 23rd ult., and the result has been a great loss of property. The Severn has overflowed its banks. Gloucestershire is submerged. There is a great loss of property. The Lymington, Llanely, Portsmouth and South Wales Railways are temporarily stopped. A quarter of a mile of the sea wall between New Haven and Seaford has collapsed, and is expected to be a serious danger. Numberless houses have been roofed. The river Shannon, in Ireland, and a number of rivers in Wales have overflowed their banks, flooding the adjacent country.

Quebec, First Month 26th.—The easterly hurricane now prevailing is of unprecedented severity. The sea has caused much damage to the town. A number of small craft have been swamped. Outward bound line steamers report fearful weather in the Irish channel. The bark *Sidlaw*, from Pisagua, encountered a gale for ten days and lost her first mate by drowning.

A despatch from Vienna dated First Month 24th, says: "A terrific storm is raging all over Central Austria. There has been a heavy snowfall in Bohemia."

The Socialists won a notable victory over the Imperial Government in the 24th. The contest, which had been proceeding for days, the end being uncertain until the morning of the 26th. Up to that time it was still stated and believed that Prince Bismarck would speak in support of the Government's bill to expel the Reichstag from the Empire. But he did not appear, it being said in explanation of his absence that he was too ill to be present. Another explanation is given, however, to the effect that, being assured that even his voice could not stay the tide of opposition to his favoring of it, he did not think it worth his while to champion the bill, he concluded to stay away. By doing so he has gained the credit of not making the Government appear as interfering in person to coerce the conduct of the members of the Reichstag.

The Government has decided to abolish the autonomy of Finland. It also has placed restrictions upon the emigration of Germans into Southern Russia.

The Cruz has approved the project to construct a railway on the shore of the Black Sea.

Cholera is raging in Mesopotamia, Asiatic Turkey, and 2000 deaths are reported to have occurred from the disease.

A treaty has been signed with the Argentine Republic by Brazil which settles the protracted dispute regarding the frontiers of the Missions Territory. A Government decree establishes civil marriage.

The Brazilian Minister in London denies that the *Comitist Calendar* has been adopted.

NOTICES.

WESTOWN BOARDING SCHOOL.—A special meeting of the Committee will be held on Sixth-day, First Month 24th, at 10 a. m., in the Committee room, Arch Street, to consider the report of Committee on the Treasurer, and other matters.

WM. EVANS, Clerk.

WESTOWN BOARDING SCHOOL.—Wanted, a young man of experience and ability, to fill the position of Governor. Application may be made to

BENJAMIN W. PASSMORE, Concordville, Del. Co., Pa.
WM. EVANS, 252 S. Front St., Philad'a.

TO GRADUATES OF FRIENDS' SELECT SCHOOL.—All graduates of Friends' Select School are requested to send to the undersigned the names of any graduates of the school whom they can recollect, with the year of their graduation, and their proper addresses. In the name of any graduates from the Girls' School, now married, both their present and former names are desired.

Howard W. Taylor, 140 N. Sixteenth St.
Anna Scattergood, 3515 Poynton Ave.
Katherine T. McCollin, 1325 Arch St.

DIED, Eleventh Month 3rd, 1889, at his residence 292 Fairmount Avenue, Philadelphia, Pa., EDWARD R. BARBOZA, in the 66th year of his age. He was warmly attached to the Society of Friends, and while able, diligently attended the meetings; he was a member of the committee that supervised the building of North Meeting-house, Sixth and Noble streets; was for several years one of the Board of Managers of Friends' Asylum for the Deaf and Dumb, and one of the founders, and for many years Treasurer of the College of Pharmacy, and a Trustee of Haverford College. He was able to attend to business until his 91st year, and his declining days were marked by his cheerful acceptance of whatever was done for him, and without any bitterness he was able to resign and to sleep on earth, and we recently believe awoke in Heaven.

Eleventh Mo. 26th, 1889, at the residence of her son in Delaware Co., Pa., ELIZABETH S. GARRETT, in the 82d year of her age, a member of the Northern Meeting of Friends of Philadelphia for the Monthy District.

near Haddonfield, N. J., the 10th of Twelfth Month, 1889, MARK BALDWIN, aged nearly 69 years, a member and overseer of Haddonfield Monthly Meeting of Friends, and a member of the Northern Meeting of Philadelphia Monthly Meeting for the Northern District, where for some years he filled the position of overseer with fidelity and tenderness, mindful that it is a primary duty to reclaim the erring. During years of bodily infirmity and suffering, he was not unwilling to perform what was often arduous and tendered under a sense of the Lord's goodness and mercy. With happy serenity he continued to enjoy his remaining measure of strength, and with lamp trimmed and burning, stood ready for the summons, "Enter thou into the rest of thy Lord," with which we believe he was called home. He was often heard to petition for help and strength, and also to return thanks to his Heavenly Father for renewed favors and mercies. "The Lord is nigh unto them that are of a broken heart and saveth such as be of a contrite spirit."

First Mo. 19th, 1890, near Paulina, O'Brien County, Iowa, ELIZABETH, wife of Archibald Crosbie, in the 60th year of her age, a member of Paulina Monthly Meeting of Friends. Sensible of much blessing and favor along life's journey, this dear Friend labored near the close of her existence to be true about her, of possessing living faith in the mercy of God, as manifested in her Lord and Saviour, fully expecting, as she said, to make a happy exchange.

FOR "THE FRIEND,"

Incidents and Reflections.—No. 209.

The records of the Society of Friends abound with illustrations of the holy comfort and confidence in Divine mercy which have marked the closing period of lives that have been mainly spent in the service of God—in submission to his will.

Such an experience was that of John Camm, of Kendal in Westmoreland. He was a man blessed with religious inclinations from his childhood, which gathered strength as he approached maturity, whereby he was incited in a sincere inquiry after true religion, and the most certain way to salvation. He separated himself from the national worship of that time, and associated with some others in a select assembly at Firbank chapel. Here it was that he, with the greater part of the congregation, in the notable meeting which George Fox had there in 1652, was prevailed upon to turn his attention more closely to the measure and manifestation of the Spirit, which George Fox recommended as a certain guide from darkness to light. In obedience to this he was made willing to take up the cross to the glory and friendship of this world: and abiding in patience the refining operations of sanctifying grace, he had a share in the ministry committed to him.

He was among the first of those preachers who travelled into different parts of the nation to propagate the Gospel, according to the principles of the people called Quakers. Among other places, he visited Bristol in company with John Audland, where their united powerful ministry was effectual to the conviction and reformation of many hundreds. Through the fatigue and exercise of his travels and labor, his constitution, naturally weak, was reduced into a gradual decline. As the end of life approached, he was filled with a thankful sense of Divine goodness, under the impression whereof he exclaimed, "How great a benefit do I enjoy above many, who have such a large time of preparation for death, being daily dying; that I may live forever with my God in that kingdom which is unspeakably full of glory. My outward man daily wastes and moulders down, and draws towards its place and centre; but my inward man revives, and mounts upwards towards its place and habitation in heaven."

The morning he departed this life he called his wife, children and family, whom he advised to love and serve the Lord, and to walk circumspectly in his fear, adding that "his glass was run; the time of his departure was come; he was to enter into everlasting joy and rest." Presently after fainting, he seemed to pass quietly away, as falling into an easy sleep; whereupon some about him wept aloud. As one awakened out of sleep he expressed himself again in these words: "My dear hearts, you have wronged me and disturbed me, for I was at sweet rest. You should not so passionately sorrow for my departure. This house of clay must go to its place, but this soul and spirit is to be gathered up to the Lord, to live with Him forever, where we shall meet with everlasting joy." So again taking his leave of them, he lay down, and in a little time departed this life.

It was by the powerful ministry of Thomas Loc, that William Penn was first reached and afterwards convinced. He travelled in divers parts of England and Ireland, and was several times imprisoned for his testimony. His natural strength was impaired by his travels and labors, and coming to London in 1668, he was there seized with the disease that terminated his life. Being visited in the time of his bodily weakness by William Penn, for whom he cherished the best desires to the last, he addressed to him the following exhortation: "Bear thy cross, and stand faithful to God; then He will give thee an everlasting crown of glory that shall not be taken from thee. There is no other way which shall prosper than that which the holy men of old walked in. God hath brought immortality to light, and life immortal is felt. His love overcomes my heart: Glory be to his name forevermore."

At another time, Thomas Loc said to his friends that stood by his bed-side, "Be not troubled, the love of God overcomes my heart." And to George Whitehead and others, "The Lord is good to me, this day He hath covered me with his glory. I am weak, but am refreshed to see you." Another friend asking him how he was, he answered, "I am near leaving you, I think, but am as well in my spirit as I can desire, I bless the Lord! I never saw more of the glory of God than I have done this day." Thus rejoicing in hope till his end; his parting breath expressed a song of praise to that Almighty Being, whose goodness preserved him through life; and deserted him not in his end.

Josiah Cole, who resided near Bristol, England, was one of those convinced of the Truth through the ministry of John Audland. He walked for a time mournfully under judgment for sin, and that godly sorrow which worketh true repentance; and by taking heed to that which reproved him for evil, he received strength to get the victory over it. Thus, being purified by the washing of regeneration, he became prepared for the reception of a gift in the ministry, and proved an able and zealous minister of the gospel. To this service he devoted his life. It was the delight and principal engagement of his

soul, to testify with zeal against iniquity, and promote truth and righteousness amongst mankind; for which he was well qualified, his testimony being attended with an eminent power penetrating the very souls of the auditors.

In the course of his labors, he visited America, and travelled several hundred miles on foot through the wilderness. He also went to Barbadoes, and through most parts of England, and in Holland and the Low Countries.

Having by hardships in his travels and imprisonments, and his zealous labors wasted his natural strength, he finished his course at middle age, by a gradual decline. Near his end, being uneasy lying down, he rose with the help of his friends, and sitting on the side of his bed, with an affecting power, he addressed his friends with the following exhortation: "Well, friends, be faithful to God, and have a single eye to his glory, and seek nothing for self or your own glory! And if anything of that arise, judge it down by the power of the Lord God, that so you may stand approved in his sight, and answer his witness in all people; then will you have the reward of life. For my part, I have thus far finished my testimony, and have peace with the Lord; His Majesty is with me, and his crown of life is upon me." A little afterwards fainting, and being supported by his friends, he departed in their arms, as one falling into an easy sleep; full of consolation he passed into immortal life.

David Barclay was one of those who had been strengthened to seek first the kingdom of heaven. In the fall of the year 1686, he was taken ill with a fever. He was preserved in resignation and patience under pain, being supported by a lively hope of shortly obtaining admittance into the mansions of unalloyed bliss. His son Robert, who was watching by him, expressed the desire that *He who loved him might be near him to his end.* He answered, *The Lord is nigh me;* and added: "The perfect discovery of the day-spring from on high, how great a blessing hath it been to me and my family!"

The apothecary who attended him, visiting him, he took him by the hand and said, "Thou wilt bear me witness, that in all this exercise I have not been curious to pamper the flesh." To which the apothecary replied, "Sir, I can bear witness that you have always minded the better and more substantial part; and I rejoice to see the blessed end the Lord is bringing you to."

In the afternoon several of his friends came to see him. After some words were spoken, and Patrick Livingston had prayed, David Barclay lifted up his hands and said, "Amen, amen forever!" adding, "How precious is the love of God among his children, and their love one to another! Thereby shall all men know that ye are Christ's disciples, if ye love one another. My love is with you, and I leave it among you." His last expressions were, "Praises to the Lord. Let now thy servants depart in peace. Into thy hands, O Father, I commit my soul, spirit and body. Thy will, O Lord, be done, in earth as it is done in heaven." And soon after he breathed his last. J. W.

FOR "THE FRIEND."

Joshua Evans.

The MSS. account of Joshua Evans, contains so much of interest and instruction, that it is believed friends of it may profitably be inserted in THE FRIEND.

He was a Friend who resided near Newton, in New Jersey, and travelled extensively in various parts of America in the latter part of last century—having visited every meeting of Friends in this country then in existence, except four.

He was very plain and simple in his dress and manner of living, which probably gave additional force to the labors against superfluity and worldly conformity in which he was often engaged. From a belief that it was required of him by his Divine Master, he forebore to shave; his clothing was made in a very plain and simple manner from undyed wool, he abstained from sugar and other products of slave-labor, and from the flesh of animals; and as one of his contemporaries testifies, "he exhibited a commendable and very uncommon degree of mortification, patience and self-denial; which were manifest to all, not only in the remarkable simplicity of his dress and demeanor, but in the sparing and simple diet he partook of to sustain nature; and in the regular and steadfast submission to the discoveries which were made known to his watchful soul, from the source of pure light and knowledge, for his safe direction in the very singular path which, I have no doubt, was the will of his Divine Master to turn his feet into."

These singularities naturally awakened fears in the minds of his friends, lest they might have their root in some other motive than pure obedience to duty, and for a time stood in the way of his service as a minister. For experience has shown that some minds are so ill-balanced that persons will, *without sufficient cause*, deviate widely from the customs prevalent among sober people with whom they are associated. But after a time the sincerity, humility and consistency of his conduct removed these fears in large measure, so that he was often liberated with the unity of his meeting, to travel as a minister of the gospel; and the wearing of his beard, and the unusual simplicity of his appearance attracted many to his meetings out of curiosity, so that as he remarks in his memoranda, he probably had the company of thousands whom he otherwise would not have met with.

It is a Scripture injunction, "Be not conforming to this world, but be ye transformed in the spirit of your minds;" so that the sincere Christian must ever rejoice when he sees persons led by the power of Grace to lay aside those things which have their origin in evil, and to practice that self-denial into which religion leads its followers. Yet, at the same time, there should be a care not to be led into extremes by the suggestions of an evil spirit, for Satan sometimes assumes the garb of an angel of light—but his object ever is to lay waste the pure life, and to destroy the work of grace—so we cannot blame the friends of J. Evans for their concern on his account, and for their care not to lay hands rashly upon him, until he had proved that his conduct was not the offspring of a desire to appear singular.

The account above referred to was drawn up from his memoranda and diary, by one of his contemporaries, who signs a preface to it, with the initials "G. C."—possibly standing for George Churchman, a valuable elder of those days.

I was born in the year 1731, my parents were

Thomas and Rebecca Evans, under whom I received a religious education; but was much under the care of my mother, being her eldest, my father having several children by a former wife; yet I doubt not his prayers were put up in secret for me, as I was early inclined to folly and full of pranks, for which my mother often corrected me. She kept me to wait on her until I was nine or ten years of age. I often rode on the same horse with her to Evesham Meeting in West Jersey, of which we were members. Some of those meetings were seasons of favor never to be forgotten; the frequent sabbid sitting of some Friends reached me, and many times tendered my heart. This was also the case with me under some powerful testimonies which were at times delivered there. For even within the first ten years of my life, weighty thoughts attended my mind concerning the slender thread of life, the uncertainty of time in this world, and the length of eternity. On this account I was sometimes brought very low, and loved to be alone; very early believing there was a state of happiness for that part which never dies, to be enjoyed by those who are found to have done well, and likewise a place of woe and misery for the wicked.

Many were the favors conferred on me in tender years. Once, I remember, when bringing up my father's flock, I saw the glory of the Lord shine round me, which seemed to exceed the sun at noonday, (yet not an external light.) I stood still, beholding it with tears flowing from my eyes, and said in my heart, This is matchless mercy to me, a poor sinner! I was alone and no human eye beheld what I then saw, or was sensible of. I have often had to admire the early visitations of Divine love to my soul; and to consider that many little lads and lasses were summoned from time to endless eternity; and awful were these considerations in my young mind, which raised an enquiry: Am I ready for a change like this? Can I be happy if I go in the state I now am in?

Notwithstanding those favors and many more which are marvellous to think of, inclining me love Truth in my heart, and to hate sinful actions, forgetfulness of my great Creator prevailed, and disobedience to his inward law brought me under guilt. I write these things to warn boys and girls not to give way to inclinations for evil, and you will find peace in cleaving to that which is good; slight not the day of small things. The tender impressions of Divine grace in early life, if cherished, are likely to take the deepest root, and delays are dangerous. Let the good seed early sown in your hearts be deemed precious, that it may grow and bring forth fruit to your Maker's praise, who is the great Husbandman, in whose hand is your life, and who wills your preservation out of the snares of the enemy of your happiness.

Although watchful parents are not able to give their children grace; yet through holy help may be instrumental in preparing their hearts to receive and cherish the good seed. Therefore let all in that station maintain an unremitting religious care over their tender offspring, that if any of them should depart from the way of truth, those who are set as guardians over them may be clear of guilt on their account.

1741.—Although, as above hinted, I witnessed in a tender youthful state many favors from my gracious Redeemer; yet between the eleventh and fourteenth years of my age, through my unwatchfulness and disobedience, temptations to join with unsuitable company, and a libertine spirit prevailed, so that when out of my parents' sight I was not clear of using the corrupt lan-

guage of you, to a single person, could just and talk lightly; yea, I went so far as sometimes even to speak falsely and to swear, until a practice of this kind became familiar. O my God! it is astonishing, when sometimes I reflect on these things, and thy mercy is remembered, that thou didst not cut me off in my rebellion! At seasons when my sinful condition was brought into view, my spirit groaned within me. May my woful career in the way of known disobedience in the days of my youth, and the piercing sorrows which followed on that account, be a warning to young people and others who may read these lines, to flee from evil, and learn to do well. For oh! how the first nature, the strong and stubborn will of the creature, doth grow if given way to, in the hearts of the disobedient, and those who do not early adhere to the tender admonitions of Divine Grace inwardly afforded.

1745.—In the fourteenth year of my age, my father put me as an apprentice to a bricklayer. It was no small trial to me to leave my parents' house, but according to my custom, I endeavored to put on a cheerful countenance. As I went along, I was met by an aged man, and he enquiring who I was, and whither I was going, on being informed, he gave me some advice nearly on this wise, "Be sure be kind to your mistress, and keep in favor with the women." Although I knew not the man, I attended to his counsel, which was an advantage to me; and I do not remember ever refusing to go at the bidding of my mistress by night or day—which gained me favor in the family. I have often felt for apprentice boys, whose trade exposes them to ramble through the country, and causes them at times to be with vicious company. My inclination, when my situation was thus changed, increased for undue liberties; and as I was faithful in his business, my master did not restrain me. I then lay open to a wide world; as to dress and language, I departed from the way of my education; had my coat altered, and cross pockets put in; my tongue being also ready to suit almost any company: my situation became indeed lamentable, and truly sad would have been my condition had'st not thou, O Lord, been merciful; and instead of cutting the thread of my life in my transgression, followed me with thy righteous judgment, for slighting of, and departing from the way of my education. On this account I received many piercing strokes of conscience; walking often alone in the woods, where I had to bemoan my state, and pour out my cries and supplication to my offended and yet gracious God; greatly abating my degeneracy, so that my life was almost a birth then to me in this condition. Although I sometimes hated sin and folly, yet being captivated in the love of light company, and a large acquaintance with airy young people, it seemed as though I could not be alone unless I took to the woods. I often went there, and believe the Lord beheld me with compassion as a poor pilgrim, sometimes willing to retreat, yet unable for want of more stability and resolution. Thus for awhile my sins seemed to be increased; I could not then say I had one hour's comfort in the last ten years of my life. But judgments were mixed with mercy, so that my Maker supervising my life to be lengthened out. Oh how captivating is folly, even amongst those whom the world calls clever folk!

I have to confess the kindness of my heavenly Father was very great; He from time to time spread the canopy of his love over me, and did pluck me at length as a brand out of the burning, that He might refine and prepare me to sound an alarm for the cause of his Truth on

the earth. I might have adopted the language formerly expressed concerning those led captive to the waters of Babylon, who had to hang their harps on the willows, for there my portion seemed to be, to sit down and weep; and though those who wasted me (being strangers to my condition) might require of me a song, I had occasion to say in my soul, "How, indeed, can I sing one of the songs of Sion in a strange land!" My state seemed to be like one long tossed about at the pleasure of a fluctuating world. Oh that young people who come after me, may be warned and learn early to keep the Lord's fear steadily before their eyes, which preserveth from all the snares of death.

(To be continued.)

"A Garden."—The scene of the betrayal, the garden of Gethsemane, is one of the very few spots connected with the sojourn of our Lord on earth which can be identified with little doubt. The traditional spot, with its gnarled and ancient olive trees, exactly accords with the notice of St. John. He went forth with his disciples over the brook Kidron, where was a garden,—for Jesus oftentimes resorted thither with his disciples. We know it was near the city—it was across the Kidron, it was on the Mount of Olives. The gate by which the party went out of the city was that which led to Olivet and Bethany, now called St. Stephen's Gate, then the Sheep Gate. A steep slope led down to the generally dry bed of the occasional stream, after crossing which the road turns to the right, winding round the base of Olivet. On the left hand of this road is the enclosure now pointed out as Gethsemane. If it be not the exact spot, it must be very near it. To-day, as then, close as it is to the city, it is a peaceful and secluded spot, where only the constant hum reminds us that we are not far from the great centre. There are no straggling suburbs and villas outside the walls and gates of an Oriental town. The garden, which would be enclosed, as the word implies, was probably the property of some follower of Jesus, and so familiar a place of resort. Judas had either returned to the upper chamber, to find it empty, and then followed the little company to the place he knew, or had come thither direct from the hall of the high-priest.—*H. B. Tristram, in S. S. Times.*

Twelfth Month 17th, 1819.—On waking this morning, my mind was raised in aspiration to the Great Author of all; and as I was revolving the subject of those doubts with which the enemy at times endeavors to overwhelm me, and the question which those who are in the spirit of the world are so apt to ask, How do you know whether what you take for a Divine impulse may not be the working of your own imagination? it sweetly occurred, that it might be known by the same test that our Lord gave to distinguish his followers from those of the world—*by its fruits.* I would say, that I have a right to conclude that I am under Divine influence, when I feel my heart filled with love to God, and love to all men, with a desire that all, without exception, might be eternally happy; when I feel an abhorrence of all vice and sin; when I feel the peace of God which passes all understanding. This to me is evidence as conclusive as any demonstration in Euclid, and under this influence the Holy Scriptures are felt to be precious. It is only under this influence that we can bring forth the fruits of the spirit."

WM. ALLEN.

FOR "THE FRIEND."

Historical Notes, Respecting the Society of Friends.—No. 2.

During the war between Parliament and the King, Oliver Cromwell had raised a regiment of a thousand men, who were all professors of religion. No blasphemy, drinking, disorder or impiety were suffered in their ranks. "Not a man swears but he pays his twelve pence." These were the famous *Ironsides*, of whom their leader said at the close of the war, "Truly, they were never beaten at all." They went into battle singing Psalms, and many among them were accustomed to deliver religious exhortations to their fellows. Many of these men belonged to the Independent party, which had for some years been growing in numbers in England. They advocated full religious freedom, and the right of each congregation to appoint its own officers, and to govern itself in religious matters. In this and on some points of doctrine they held many views which approached those afterwards held by the Society of Friends—indeed, from their ranks came many of the early converts to Quakerism.

The late Robert Barclay in his "Inner Life of the Religious Societies of the Commonwealth," points out these points of resemblance, and suggests that George Fox derived from the Independents, Mennonites, and General Baptists, many of his doctrinal views, and his system of church polity. But the clear statements which Fox records in his Journal of the manner in which the truths of religion were gradually opened to his mind, proves that this suggestion does not rest on a solid foundation, as is clearly shown by the late Dr. Charles Cross in his review of Robert Barclay's work "*An Examen, &c.*" There appears to have been among the people in those early days a good degree of simple obedience to Christ, and of real religious feeling. Isaac Penington, who at one time was in fellowship with them, bears witness to this, and he mourns over the decay in the "savor of life" among them, and the substitution for it of "head-knowledge," and of "prayers, reading of the Scriptures, and preachings, and duties and ordinances," and he tells them, "Ye must come out of your knowledge into the feeling of an inward principle of life, if ever ye be restored to the true unity with God, and to the true enjoyment of Him again."

Many of the soldiers in the Parliamentary army were Independents, and sympathized with them. But in the Parliament the Presbyterian influence was predominant, and religious liberty was not in accordance with their traditions. They still held to the views which had long prevailed in Europe, and had been the generally accepted doctrine "that every realm through its rulers, had the sole right of determining what should be the form of religion within its borders." But the army, victorious over Charles and his adherents, had no disposition to submit to intolerant restraints, and finally ejected the members of Parliament, and Cromwell became the ruler of the nation, with the title of Protector. This, Green calls the beginning of the struggle "between the principle of religious conformity and the principle of religious liberty."

The sufferings of Friends during the protectorate of Cromwell, who died in 1658, did not proceed so much from the government, as from the ill-will of the clergy, to whom they refused to pay tithes, believing that they were a part of the Mosaic dispensation, abrogated by the coming of Christ, and that under the Gospel, the minis-

try should be freely exercised. Many were imprisoned for refusing to contribute to the maintenance of priests whose preaching they did not attend, and who, in consequence, had no just claims upon them. They suffered not only in this way, but were often beaten and abused by the mobs whom the priests stirred up against them, as heretics; and they were frequently brought to trial or condemned as blasphemers through the influence of the same adversaries. Thus the clergy of that day showed that they were like the prophets of whom Meath spoke,

"He that putteth not into their mouths, they even prepare war against him." Other causes of the dislike and persecution extended to the Quakers by their refusal to take oaths, their peculiarities of language, and their disuse of the customary titles of society.

One of the false accusations brought against some of the early members of our Society was, that they were Jesuits in disguise. In the contests of the reign of Elizabeth, religion and politics had become closely interwoven in the public mind. The rivalry of Mary, Queen of Scotland, who made claim to the English throne, and the political situation of England, as to the designs of Philip of Spain, in the previous century, had gradually brought Queen Elizabeth of England to be considered as one of the principal defenders of the Protestant cause, although she herself was governed by political far more than by religious feeling. The action of the Pope of Rome in sending over large numbers of disguised Jesuits to England, to further his projects had awakened alarm, and led to the passage of severe laws against such emissaries. The attempts of Philip of Spain to eject Elizabeth from her throne and to make the religion of the government Roman Catholic, roused the energies of the people in opposition, and made patriotism favor Protestantism. The public excitement was promoted by the cruelties of the Inquisition, the Massacre of St. Bartholomew in France, and later on, by the atrocities connected with an Irish uprising in 1641, when thousands of English people perished in a few days. Green says of it: "Tales of horror and outrage, such as maddened our own England when they reached us from Liverpool, came day after day over the Irish Channel."

It was on political more than religious grounds that the penal laws of Elizabeth's reign against the Catholics were founded. They were ejected from public offices by the enactment that all holders of office should take an oath of allegiance to the Queen, and of abjuration of the temporal power of the Pope. Those who refused to come to the public worship established by law were made liable to heavy fines. After the death of Cromwell and the restoration of Charles II., these laws were unjustly and unmercifully used to oppress the Non-Conformists, and especially the poor Quakers. For although the members of our Society were loyal to the government, and altogether repudiated the supremacy of the Pope, yet their conscientious adherence to the command of our Saviour, "Swear not at all," often subjected them to the severe penalties of the confiscation of their estates and imprisonment for life, because they refused to swear to statements which they were ready to affirm to as their settled conviction.

The reign of Cromwell had been virtually a government by military force, and the popular feeling was steadily in favor of the restoration of civil liberty; so that Charles II. was welcomed to the throne by general acclamation. The social change was startling. "Godliness became a byword of scorn; sobriety in dress, in

speech, in manners, was flouted as a mark of the detested Puritanism. Religion had been turned into a system of political and social oppression, and it fell with that system's fall." The new parliament, which sat in 1661, was made up for the most part, says Green, "of young men, of men—that is—who had but a faint memory of the Stuart tyranny under which their childhood had been spent, but who had a keen memory of living from childhood beneath the tyranny of the Commonwealth." "Their whole policy appeared to be dictated by a passionate spirit of reaction." In 1662 they renewed the Act of Uniformity in public worship. The effect of this was, to drive out of the parishes about 2,000 ministers, mostly Presbyterians, and Nonconformists. While this acted very injuriously on the spiritual interests of the established church, it was advantageous to the cause of religious liberty. At the restoration of Charles, "only the Independents and a few despised people, such as the Quakers, upheld the right of every man to worship God according to the bidding of his own conscience. The bulk of the Puritan party, with the Presbyterians at its head, was as one with its opponents in desiring a uniformity of worship, if not of belief throughout the land. The driving out of the Presbyterians from the church to which they clung, forced them into a general union with other sects. Persecution broke down before the numbers, the wealth, and the political weight of the new sectaries; and the Church, for the first time in its history, found itself confronted with an organized body of dissenters without its pale. The impossibility of crushing such a body as this wrested from English statesmen the first legal recognition of freedom of worship in the toleration act; but the immediate effect was to inflict upon our predecessors in religious belief an amount of hardship and suffering which nothing but the power of Divine Grace enabled them to withstand. They faithfully bore their testimony to religion, by meeting publicly for Divine worship, as if there was no law to prohibit it; by refusing oaths, though they knew imprisonment and loss of property would follow; and they continually plead their cause with rulers and with people, by showing, with tongue and pen, the injustice and unreasonableness of the treatment they received. Thus they performed an important work in assisting to prepare the people of England for the adoption of measures more consistent with religious liberty, after William of Orange came to the throne. J. W.

THE breaches of our testimony against going from amongst us in the weighty engagement of marriage, being often for want of an early care in parents, and those who have the important charge of educating the youth under their trust, early to admonish and to direct them in the principles of Truth, and to impress their minds with the duty of religiously observing them; as much as possible restraining them from such company as is likely to entangle their affections in an improper manner, we therefore tenderly advise Friends in all quarters to an increasing care over the youth, that the consistency of our principles in all respects with the nature of true religion, may be impressed on their tender minds, by upright examples, as well as by precepts; and that where there is apparent danger of the affections of any being improperly entangled, and the care of parents or guardians, or those who have the oversight of them, appears insufficient

to prevent their taking imprudent steps in the accomplishment of marriage, that timely application be made for the help of their friends.—1761.—*Philadelphia Book of Discipline.*

SELECTED.

THE CAPTAIN'S WELL.

The story of the shipwreck of Captain Valentine Bagley, on the coast of Arabia, and his sufferings in the desert, has been familiar from my childhood. It has been partially told in the singularly beautiful lines of my friend, Harriet Prescott Spofford, on the occasion of a public celebration, at the Newburyport Library. To the charm and felicity of her verse, as far as it goes, nothing can be added, but in the following ballad I have endeavored to give a fuller detail of the touching incident upon which it is founded.

From pain and peril by land and main,
The shipwrecked sailor came back again;
Back to his home, where wife and child,
Who had mourned him lost, with joy were wild,
Where he sat once more with his kith and kin,
And welcomed his neighbors thronging in.
But when morning came he called for his plate,
"I must pay my debt to the Lord," he said,
"Why did you dig here?" asked the passer-by;
"Is there gold or silver the road so nigh?"
"No, friend," he answered; "but under this sod
Is the blessed water, the wine of God."

"Water! the Powwow is at your back,
And right before you the Merrimack,
And look you up, or look you down,
There's a well-sweep at every door in town."
"True," he said, "we have wells of our own;
But this I dig for the Lord alone."

Said the other: "This soil is dry, you know,
I doubt if a spring can be found below;
You had better consult, before you dig,
Some water-witch, with a hazel twig."

"No, wet or dry, I will dig it here,
Shallow or deep, if it takes a year.

In the Arab desert, where shade is none,
In the waterless land of sand and sun,
Under the pitiless, brazen sky
My burning throat as the sand was dry;
My crazed brain listened in fever-dreams
For splash of buckets, and ripple of streams:
And opening my eyes to the blinding glare,
And my lips to the breath of the blistering air,
Tortured alike by the heavens and earth,
I cursed, like Job, the day of my birth.

Then something tender, and sad, and mild
As a mother's voice to her wandering child,
Rebuked my frenzy; and, bowing my head,
I prayed as I never before had prayed:

*Fly me, God! for I die of thirst;
Take me out of this land accursed;*

*And if ever I reach my home again,
Where earth has springs, and the sky has rain,
I will dig a well for the passer-by,
And none shall suffer with thirst us L*

I saw, as I passed my home once more,
The house, the barn, the elms by the door,
The grass-lined road, that riverward wound,
The tall slate stones of the burying-ground,
The belfry and steeple on meeting-house hill,
The brook with its dam, and gray grist-mill,
And I knew in that vision beyond the sea,
The very place where my well must be.

God heard my prayer in that evil day;
He led my feet in their homeward way,
From false mirage and dried-up well,
And the hot sand-storms of a land of hell.

Till I sat at last through a coast-hill's gap,
The city held in its stony lap.

The mosques and the domes of scorched Muscat,
And my heart leaped up with joy thereat;
For there was a ship at anchor lying,
A Christian flag at its mast-head flying,

And sweetest of sounds to my home-sick ear
Was my native tongue in the sailors' cheer.
Now the Lord be thanked, I am back again,
Where earth has springs, and the skies have rain,

And the well I promised, by Oman's sea,
I am digging for Him in Amsbury.
His good wife wept, and his neighbors said:
"The poor old captain is out of his head!"

But from morn to noon, and from noon to night,
He toiled at his task with main and might;

And when at last, from the loosened earth,
Under the spade the stream gushed forth,
And fast as he climbed to his deep well's brim,
The water he dug for followed him.

He shouted for joy: "I have kept my word,
And here is the well I promised the Lord!"

The long years came, and the long years went,
And he sat by his round-side well, content;
He watched the travellers, heat-oppressed,
Pause by the way to drink and rest.

And the sweltering horses dip, as they drank,
Their nostrils deep in the cool, sweet tank,
And grateful at heart, his memory went
Back to that waterless Orient,

And the blessed answer of prayer, which came
To the earth of iron and sky of flame.

And when a wayfarer, weary and hot,
Kept to the mid-road, pausing not

For the well's refreshing, he shook his head;
"He don't know the value of water," he said,

"Had he prayed for a drop, as I have done,
In the desert circle of sand and sun,

He would drink and rest, and go home to tell
That God's best gift is the wayside well!"

—J. G. Whittier, in the *New York Ledger*.

FOR "THE FRIEND."

NEW YEAR THOUGHTS—1890.

"Nevertheless we, according to his promise, look for new heavens, and a new earth, wherein dwelleth righteousness."—2 Peter iii. 13.

How sweet is the thought as time passeth away,
That, there cometh a holier glorified day,
When a scene not of earth, bursts into view,
For the old is transformed to the beautiful new!

Descend on our souls like a pure heavenly dove,
Thou Spirit most holy, of light and of love;
Dwell with us to comfort, to cherish and bless,
And clothe with the garb of thy own righteousness.

May the Spirit reveal, what thy servant foretold
Dispel then the clouds, that we henceforth behold
Our earth in its newness, a sanctified land,
Where her children are led by a Father's good hand.

—CAMPAÑA.

SAN JOSE, Cal., First Mo. Ist, 1890.

HE that has so many causes of joy, and so great, is very much in love with sorrow and peevishness, who loses all these pleasures, and chooses to sit down upon his little handful of thorns. Enjoy the blessings of this day, if God sends them; and the evils of it bear patiently and sweetly: for this day is only ours; we are dead to yesterday, and we are not yet born to the morrow. But if we look abroad and bring into one day's thoughts the evil of many, certain and uncertain—what will be and what will never be—our load will be as intolerable as it is unreasonable.—*Jeremy Taylor.*

UNLESS children are trained to recognize duty as more binding than inclination, they will suffer all their lives through from their lack of discipline in this direction.

FOR "THE FRIEND."

A Winter Walk.

On the afternoon of the First Month 11th, I walked to a swamp and woods, lying about a mile from our village. From the calendar it might be called a "Winter's" walk, but the unusual mildness of the weather seemed to belong to another season of the year. In passing along the streets of the village, the clusters of bright blossoms on the Yellow Jessamine were pleasing and attractive. This species (*Jasminum nudiflorum*), naked-flowered Jessamine, so named because the flowers precede the leaves, is a native of Northern China, from whence it was introduced into England by Robert Fortune. It was at first cultivated in green houses, because it was supposed too delicate to bear the cold and exposure of winter weather. But it was soon found to be hardy enough to endure not only the climate of England, but our own more severe winters. The flower buds are formed in the fall of the year, and require comparatively but few warm days to induce them to open and expand. My friend, Isaac Burk, writes to me, that he has seen the blossoms in every month of the winter, in the Woodland Cemetery, at Philadelphia, coming out whenever a few mild days came together. The leaf buds do not open till the arrival of spring; so that we do not find flowers and leaves in full perfection at the same time. This is the case with many other plants. In the Candle Alder (*Ahus serulata*), the long pendulous tassels of bloom decay before the leaves of the shrub appear. That universal favorite, the Trailing Arbutus, or May Flower (*Epileya repens*), has a similar habit of growth; and in the spring we should gather the blossoms only, were it not that some of the thick, enduring leaves of the previous year still remain attached to the stems of the vines.

The sweet scented garden violets were fully in bloom in some of the house yards I passed, and their delicious perfume was very agreeable.

Some Red Cedars (*Juniper virginiana*) grew on the side of the road, and the brown or fawn-colored swellings at the end of the minute branchlets showed that the flower buds were already formed, which in regular order would open in the following spring. Some of the small twigs of the cedar appeared to have been stung by an insect, or attacked by some form of fungus, which had arrested their natural growth, and transformed them into fleshy bodies somewhat resembling a small common potato in shape and appearance.

Somewhat similar excrescences were observed encircling the small branches of a young oak tree. The surface of these was rather thickly studded with short curved thorns or spines. These were hollow, and when traced inwards by dissection were found to start from near the central twig. They had probably been the habitation of the grub of some species of gull-fly, which had pierced the bark of the branchlet and laid its eggs in a position where they would be fed by the sap of the tree.

At the end of a branch I think of a black-berry bush, there was a somewhat similar cluster of oblong cells, the outer end of which was a mass of spongy fibres. On tearing it open, it was observable that a small round hole had been eaten in the side of each of these cells, through which no doubt the mature insect had made its escape, after having passed through its preliminary stages of existence.

In examining a hollow nut-gall, of which the outer cover was almost unbroken, while a shriv-

elled mass of fibres only partially filled the interior, I unwittingly disturbed a nest of spiders, which the parent had deposited in this snug home for the winter. As I write, some of the young spiders, smaller than a pin's head, are running about my desk, and the old one, which from its wonderful leaps I suppose to be one of the hunting spider family, is roaming about, as if at a loss what to do, now that its home has been thoroughly broken up. It is a very small insect, not much more than one-eighth of an inch in length, and proportionately slender; but I feel a degree of pity for the poor creature, which is not lessened by the fact that I am unable to do anything to relieve its troubles.

Attached to one of the bushes or vines by the roadside, was a brown silk bag, or cocoon, closely and strongly woven and securely fastened by numerous strands of silk. It was rather more than an inch in diameter. Internally, it was filled with a floss of brown silk, among which were multitudes of tiny spiders. It was probably the production of one of the larger species of field spiders which had deposited its eggs in this secure case, trusting to the warmth of the sun to hatch them, and to their own instincts to enable them to take care of themselves when warm weather should again become established on this part of the earth.

Robert Fortune, who introduced into Europe the Yellow Jessamine, about the year 1842 was a botanical collector for the Horticultural Society of London. He subsequently revisited China to procure tea-plants and persons skilled in their cultivation, being employed by the East India Company, who desired to improve the Government plantations in the Himalayas. He brought over to England a large collection of living plants of various kinds, many of which are now in general cultivation. In his accounts of his travels, he says:

"In the north of China there are a number of plants which have their flower buds very prominently developed in autumn, so much so that they are ready to burst into bloom before the winter has quite passed by, or, at all events, on the first dawn of spring. Amongst these, *Jasminum nudiflorum* occupies a prominent position. Its yellow blossoms, which it produces in great abundance, may be seen not unfrequently peeping out from amongst the snow. Nearly as early as this, the pretty daisy-like *Spiraea prunifolia*, the yellow *Forsythia viridissima*, the lilac *Daphne Fortune*, and the pink Judas-tree, become covered with blossoms, and make our northern Chinese gardens extremely gay."

FOR "THE FRIEND."

"Acquaint Thyself With God, and be at Peace."

As God is a Spirit, our acquaintance with Him must be in spirit and in truth; and not in the oldness of the letter, or in the head merely, but also in the heart—as that is the only saving acquaintance we can have with Him.

It is the Spirit that gives life. The more we live under the influence of the law of the Spirit of Life, the less we will incline to be governed by the law of sin and death. For the two laws and spirits do not dwell together—for what communion hath light with darkness? 2d Cor. vi: 14, 15, 16.

So we should become temples of the living God. For God hath said, "I will dwell in them and walk with them, and I will be their God, and they shall be my people." But we must forsake all that we have which belongs to

the old fallen nature, before we can become his disciples, and savingly acquaint ourselves with him. Luke xiv: 22.

"We may study the Scriptures as we would a school-book, and get all the instrumental aid we can, and have the head well stored with all the sublime of the gospel of God,

"Yet far remote from wisdom we may stray,
And midst stupendous systems lose our way,
In speculation a field may roam abroad,
And in dead words forget the living God."

or have no better acquaintance with Him than we had before. For it is with the heart that man believeth unto salvation.

The wisdom and knowledge that we may gain from outward research, if under the restraining grace of God, is all right in its place, but without care it is more apt to puff up than to edify; for it only satisfies the natural man, but not the secret longings of the immortal soul, which can only be filled by an internal acquaintance with God. And then it does abundantly satisfy; for it gives a peace that the world cannot give. But I fear a great mistake has come upon many of us as a people, and upon Christendom at large. And that is on account of our not being enough acquainted with God as to know his voice from the voice of the stranger. So, strangers have devoured our strength, and we know it not. We love the praise of men more than the praise of God. So many of our high-sounding and fluent speakers are industriously crying "peace, peace, where there is no peace;" and saying, thus saith the Lord, when He hath not spoken; and palming such like preaching off on the credulous hearers, for revelation, when it is only imagination. But we must swallow it for the gospel, or be called fault-finders. But such preachers are no better than blind leaders of the blind; so both are liable to fall into the ditch together. And in this dark state they take a transformed light for the true Light, and follow it through the mystical labyrinths of an empty profession, down to the gulf from whence there is no return.

Under the old law, similitudes, or likenesses, were forbidden; and are they not forbidden now? But we find that now, when the Divine life has left the ministry, there is a great tendency to substitute a human life and power to supply the lack, to the exaltation of man, but not to the glory of God. Is it not with us like it was in the days of Demetrius, the silversmith, who made silver shrines for Diana and the image that fell from Jupiter?—but not from God. And, as the Ephesians were worshippers of the great image, it made no small stir when Paul preached against it; for, they said, "it is by this craft" we get our wealth; and they feared also that the magnificence of their worship would be destroyed. So, they were filled with wrath, and cried out saying, "great is Diana of the Ephesians."

And, under the old law, the Lord said concerning his people, they "have changed their glory for that which doth not profit; and have committed two evils"—one was, they had forsaken Him, the fountain of living waters, and the next was, they had hedged to themselves cisterns, but they proved to be as broken cisterns that could hold no water of life. So, how could they satisfy the thirsty people?

It appears that, when man was first made, he had an immediate acquaintance and communion with God; but, when he of his own free will, opened his heart to the tempter, Satan became his teacher, and he lost his intimate acquaintance with God, and hid himself from

Him; so, he lost his right to the happiness and paradise of God and became as a vagabond in the earth, which then became cursed for man's sake. And no wonder that his peace departed from him. So, now the more we can get Satan and his teachings out of the heart, the more we can have our acquaintance and peace restored with God, and the more we shall be made partakers of the Divine nature. And as to this great change is to be made, the Holy Scriptures are clear, that it must be by submission and obedience to Christ, the second, the inward teacher who never fell; but who has now come into the heart of every one without sin unto salvation, and to seek and to save that which was lost in the fall: for He came to destroy the works of the devil and to finish transgression, and to make an end of sin—and to make reconciliation for iniquity—and to bring in everlasting righteousness, and that He might be anointed the Most Holy, ruling and reigning in every heart. Then, our righteousness would not be as a moving cloud or as the early dew, that soon goeth away; but would land us safe beyond the shores of time, where the wicked cease from troubling and the weary soul will forever rest with God.

DUBLIN, IND., Eleventh Mo. 5th, 1889.

FOR "THE FRIEND."

The Sun and Planets Now.

Every one can now see that the sun is further north, and the days perceptibly longer than at the Solstice, Twelfth Month 22nd. On Second Month 13th, the sun's declination south is 13° 12', which makes it rise 5 hours and 15 minutes before noon, and set as much after; so we already have 10 hours 30 minutes of sunlight in one day—an increase of 1 hour and 20 minutes since the shortest day. And the great luminary has but few spots of late to obscure its shining. A neat little group of seven sun spots appeared First Month 17th, not far from centre, and was slowly carried by the sun's rotation to the west edge, where it passed from view on the 22nd, again leaving the visible disk entirely clear of black spots. Along now, and for several months past, would seem to be a minimum, or least show of sun spots during the current eleven-year period. So I reckon they will likely increase some in 1890.

Mercury, the swift moving planet, and so near the sun that it is not visible much of the time, made us quite a fair visit during the middle part of First Month. It was at greatest elongation (farthest east of the sun) on the 13th, being an hour and a quarter high at sunset; and in the late twilight could be seen easily with the naked eye. I picked it up with a very small telescope mounted equatorially, before sunset, once or twice, and could thus view it quite well very soon after the sun went down. In a very few days the little planet disappeared to unaided vision; but I followed it with my little equatorial until the 23rd, when it was quite easy to find with the glass of one and a half inch aperture, power 27. I think it might have been seen two or three days later, but clouds prevented observation. It came to inferior conjunction (between the earth and sun) First Month 29th; after which it is a morning star, and will hardly be visible to naked eye for quite a while.

Venus, Mars, Jupiter and Uranus, are all morning stars; but Jupiter and Venus are too near the sun for observation, only with the equatorial. Venus is approaching the sun, and Jupiter is receding westward—or, rather the

sun is leaving it—so the planet will come into naked eye vision by about the middle of Second Month.

Mars is very conspicuous in the southern heavens during the early hours of morning. It is passing through the stars of Libra, and south about 6 A. M. The fine star about two hours west of Mars is Spica, in the constellation Virgo. The planet Uranus is a few degrees east of Spica, but too dim to be identified without a telescope.

Saturn is just now coming to be an evening star of much interest. It rises about 7 P. M. several degrees north of due east. It is the silvery star 4 degrees below Regulus, a bright star in the south end of the Sickle—constellation of Leo. Saturn's motion now being "retrograde" (backward, to the west) the planet is approaching Regulus, and they will appear very near together in latter part of Third Month. The ring of Saturn is now quite narrow, and growing still more so. It will disappear as a ring in 1892—and, indeed, entirely with any but very large telescopes.

Titan, the largest of Saturn's eight moons, can be seen with a good sized spyglass. It and the planet Neptune are about like stars of 8th magnitude. Neptune is a few degrees nearly east of the Seven-stars; between them and the bright red star Aldebaran, in the "V" or Hyades group—constellation of Taurus,

W. DAWSON.

SPICELAND, IND., First Month 27th, 1890.

An Indian Burying-Ground.—John W. Sanborn, pastor of the First Methodist Episcopal Church, of this city, is, perhaps, the best-versed on the antiquities of the Indian in this country. He has mastered the Seneca language, was made a member of the Nation, and prints hymns and songs for them. He heard of an old Indian burying-ground that belongs, as he afterward ascertained, to the Nation to which he belonged. On the farm of William Squires, in the village of Gorham, Ontario County, is a high mound, on which a barn was erected some seventy years ago. At the base of this hill runs Flint Creek, a pretty little stream. About a year ago W. Squires, whose barn had originally no foundation, dug for it, and in making excavation for a new one, came across some bones. Mr. Sanborn heard of it and hastened there. He readily obtained consent to superintend the excavation, and obtained seven skeletons; and these, with three he took out last week, make ten Indian skeletons he has obtained from this hill.

In the largest the femur was 19 inches long. The man must have been between 7 and 8 feet in height. The teeth were perfect. Evidently it was a very old man. On the left side of the skull is a long scar, showing that it was cut at one time and healed. In a child's grave there were two quarts of beautiful shells, and a skinning stone was found in one of the others. The graves must have been fully 200 years old. The oldest inhabitant in that section of the country has no recollection nor heard of any interments being made there. From the fact that the Seneca Indians ceased to bury in the sitting posture about 150 years ago, this gives some hint as to the age of the skeletons.

The ten skeletons already recovered have been taken out of a space of 15 feet long by 8 feet wide. They are eight adults and two children. All were buried in the sitting posture, and all with their feet to the southeast except one and his position was just reversed.—*Lockport Journal.*

Natural History, Science, &c.

Eating With Chop-Sticks.—I know few things more annoying, and yet laughable, too, than attempting to eat with the Chinese chop-sticks for the first time—more particularly if the operator has been wandering on the hills all the morning and is ravenously hungry. The instruments should, first of all be balanced between the thumb and fore-finger of the right hand; the points are next to be brought carefully together, just leaving as much room as will allow the coveted morsel to go in between them; the little bit is then to be neatly seized; but, alas, in the act of lifting the hand, one point of the chop-sticks too often slips past the other, and the object of all our hopes drops back again into the dish, or perhaps even into another dish on the table. Again and again the same operation is tried, until the poor novice loses all patience, throws down the chop-sticks in despair, and seizes a porcelain spoon with which he is more successful.—*Fortune's Travels in China.*

Influence of Dress on Health.—A certain class of young ladies is taking a course of lessons in Physical Culture and the "Delsarte System." This course, which has lasted now two or three months, has, among other good results, compelled the great majority of the class to enlarge their dresses—to put fancy pieces into their cloaks and outer garments, or to buy new ones. They cannot breathe within the limits that were formerly ample enough to allow all the chest expansion they cared for. The play of their muscles cannot go on in skin-tight sleeves, vice-tight corsets, tight, high heeled shoes. They cannot, while taking this course, get into the Moloch costumes of most of them previously wore. There is a war between Moloch and Hygeia, and who but wishes most earnestly that Hygeia shall win the day?

We talk of the weaker sex, and yet the weaker sex can live year after year on half the amount of air that men allow themselves, can carry heavy weights from their hips day after day for years that men suspend from their shoulders or carry not at all, and hug their burden and insist that it is not a burden at all.

It seems useless to argue against tight lacing. "Broad is the road that leads to death, and thousands walk together there." Yet there are those, and we must hope their number is increasing, who accept the symmetry of the body as God made it, and whose study it is to conform to the laws He framed for it, and to make it a temple worthy to be the abode of the breath of his own life which He breathed into it.

Abraham's Oak.—The old oak at Mamre, in Syria, or, as it is known everywhere, "Abraham's Oak," is one of the most famous and venerable trees in the world. It is revered alike by Jew, Christian and Mahometan, for it is supposed to mark the spot where the patriarch pitched his tent in the desert. There is a superstition in Jerusalem (and in all the country about) that whoever shall cut or injure this tree will lose his first-born son. So, for centuries it has been allowed to toss its gnarled and contorted limbs in the gales which sweep from the Mediterranean over the Syrian plains.

This tree was visited by Sir Joseph Hooker in the autumn of 1860; and in his paper upon Syrian Oaks, read the following year before the Linnean Society (Transactions, xxiii.) he gave a description of it and a portrait drawn by his own hand.

Abraham's Oak was found to belong to *Quercus pseudo-coccifera*, which, to quote from Sir

Joseph's paper, "is by far the most abundant tree throughout Syria, covering the rocky hills of Palestine especially with a dense brushwood of trees, eight to twelve feet high, branching from the base, thickly covered with small evergreen rigid leaves, and bearing acorns copiously. On Mount Carmel it forms nine-tenths of the shrubby vegetation, and it is almost equally abundant on the west banks of the Anti-Lebanon and many slopes and valleys of Lebanon. Owing to the indiscriminate destruction of the forests in Syria, this oak rarely attains its full size." The circumference of the trunk of "Abraham's Oak" is given as 23 feet, and the diameter of the spread of the branches as 80 feet.

Quercus pseudo-coecifera is an evergreen species, with the general appearance of the ilex of Southern Europe, and closely related, botanically, to *Q. coecifera*, a common and widely distributed shrub oak of Southern Europe and of Algeria; indeed, Hooker was of the opinion that the two plants were merely geographical varieties of the same species.—*Garden and Forest*.

Items.

Ritualism in the Protestant Episcopal Society.—In the Tenth Month last John McDowell Leavitt, who had been for more than 40 years an Argentinian in the Protestant Episcopal body, and had held several important positions, resigned his connection with that sect, and joined the Reformed Episcopalians. In giving the reasons which induced him to make this change he made the following statement, which is published in *The Press*.

"Let me put in one sentence the result of my long search and study. I believe the Anglican Communion to be a mixture of political compromises and irreconcilable contradictions. I turned to the calendar of the English Prayer-book and I see that January 30 commemorates Charles the Martyr, King of England, and May 29 commemorates Charles the Second, the royal adulterer, who polluted the court, polluted everything in England in his time. In the old Prayer-book a clergyman is called a minister; now a minister is called a priest. Tradition has come to overbalance Scripture. The Scriptures contain all things which are necessary to salvation—that's what the articles of the Church say—yet the Episcopal Church is content to think more of tradition than the Scriptures to-day.

"After years of effort to trust the truth, I can blind common sense and conscience no longer. The Scriptures are silent on the question of infant baptism. If the Scriptures do not tell me of this I do not know it, and what I do not know I should not affirm. I will not do to say that the Church creates the doctrine. If it can create me a deacon, it can create others, and then where do we stand? The crucial time came with me one day when I was expected to stand at the font and baptize an infant. I said then that my lips should never again utter what my heart disbelieved. So it is with the use of the word priest. In the new Testament the word minister is a matter of taste. But about that I should not say. It can be thought a small matter, but ritualism roots itself in this word priest. I renounce it forever; no man shall ever give me that title again. I enter the brotherhood of Protestant ministers.

Again, "the doctrine of the apostolic succession laid on me like an iceberg. This doctrine and priestly prerogative together, I can never understand. I should acknowledge as a Protestant minister a man who wears a scapular to protect him from lust and purgatory. Ritualism is stifling Protestantism in the Anglican Church. The bishops of the Episcopal Church now treat as servants, not as equals, the other Protestant ministers. They will sit on the same platform with these ministers, but they will not admit them to Episcopal altars. The General Theological Seminary of the Episcopal

Church in this city teaches that the Bible is to be revered on the authority of the Church. It makes the Church first and the Bible next. Now, nothing must come between me and my Bible but the Holy Ghost. The Roman communion puts the popes and fathers between me and my Bible, and the General Theological Seminary puts the fathers between me and my Bible. I will have none of either.

"The General Theological Seminary exalts tradition above Scripture. The money contributed to the Domestic Board of the Protestant Episcopal Church is used to send out graduates of this seminary, who, working especially in the West, are expected to develop a strength that in future diocesan and general conventions will tear all the Protestant elements out of the Prayer-book. In this city you can confess to an Episcopalian minister, you can be absolved by an Episcopal minister, you can hear mass said by an Episcopal minister, and you can have prayers said for the repose of the dead, if not actually have the dead prayed to by an Episcopal minister. Do you wonder that people who like this sort of thing in time get to prefer the coin to the counterfeit and go into the Roman Catholic Church?" I thank God that I am going in the opposite direction."

Fictitious Writings.—Edward J. Phelps, in a paper on "the Age of Words" in *Scribner's Magazine*, says of contemporary fiction:

"The everlasting repetition, through countless thousands of volumes, of the story of the imaginary courtship and marriage of fictitious and impossible young men and women; and when all conceivable incidents that could attend this happy narrative are used up, and the exhausted imagination of the narrator refuses any further supply, then in their place an endless flow of commonplace and trivial conversation, tending to the same matrimonial result, until it is clear that the parties, if they were real, would talk themselves to death—this is the staple of what is now well called fiction, because it never could exist in fact. What a food for an immortal mind to live on, year in and year out, as its principal literary nourishment! And what sort of mental fiber is it likely to produce?"

Choice of Rulers.—The propriety of printing a text of Scripture at the head of a secular newspaper is a matter of taste. But about the consistency of placing such a passage as this:

"Moreover, thou shalt provide out of all the people, able men, such as fear God, men of truth, hating covetousness; and place such over them, to be rulers of thousands, and rulers of hundreds, rulers of fifties, and rulers of tens."

at the head of a newspaper, and in the same number calling upon the people to vote for five *sellers for aldermen* of the city, we have a decided opinion, which is this: that the men do not answer to the description, and if such men are to be voted for, this would be more appropriate: "When the wicked bear rule the people mourn."—*The Christian Advocate*.

THE FRIEND.

SECOND MONTH, S, 1890.

The concern which has been felt by the Meeting for Sufferings of Philadelphia Yearly Meeting, for the religious welfare and the growth in grace of our members, led to the recommendation sent to all of the Monthly Meetings, as expressed in the following Minute adopted by the Meeting for Sufferings.

The Meeting for Sufferings, under a renewed concern for the welfare of our members, particularly those of the younger class, believing that advantage would arise from a more general acquaintance by our members with the compilation of the "Christian Adverses," which have been issued from time to time by the Yearly Meeting, and with the contents of the "Book of Discipline," desires to present to those families who may not be supplied with them, and to individuals at the discretion of Monthly Meetings, a copy of each of these books,

commending them to the careful attention of our members.

It is also the desire of this meeting to accompany the above mentioned books with a copy of the "Brief Account of the Rise of the Society of Friends," containing an historical sketch of the events attending the origin and early organization of the Society as a distinct body of religious professors.

We would also affectionately encourage all our members in the perusal of the approved writings of Friends, believing that the exposition of our doctrines and testimonies, and the records of the exercises and experiences of devoted men and women who have left accounts of the dealings of the Most High with their souls, set forth therein, may prove instructive; and confirming to their faith, and strengthening their attachment to the most precious principles which our predecessors in the Truth, often through much suffering, maintained and promulgated to the world.

In thus encouraging our members to a knowledge of the history and fundamental principles of our Society, and with the exercises and labors of dedicated and experienced members, we are well aware that this will be a most profitable and available. "If any man will do his will," said our Holy Redeemer, "he shall know of the doctrine whether it be of God or whether I speak of myself." It is by giving heed to the convictions of His Spirit in the heart, in obedience thereto, that we become able to understand the unfoldings of the mysteries of his heavenly Kingdom, and thus become like to those precious ones who, "by faith and patience inherit the promise."

In connection with this subject we think it may be reasonable to revive the following salutary advice particularly addressed to parents and heads of families, issued by the Yearly Meeting at a former period, viz:—

"Being well assured that the edifying practice of frequently collecting our children and families, in order for religious retirement, would be promotive of essential benefit, Friends are exhorted to seek after a right qualification, under which they may be enabled to maintain it, especially in the afternoon of the First day of the week, in such places where meetings for public worship are not held at the time; the due discipline of which duty and solidly reading the Holy Scriptures, and other religious books, with a steady watchful care over our young people, to discourage their visiting and rambling about on that day, and mixing with unprofitable company at this and other times, would, under the Divine blessing, be a means of their preservation out of many ensnaring temptations to which they are liable."

In accordance therewith committees have been appointed by many Monthly Meetings, who have been engaged in visiting families and making the proposed distribution. Some doubts have been felt as to the extent to which it is right to supply copies of those books in cases where there are several adult members in a family; and our attention has been called to the subject by a letter from a valued Friend. By the wording of the preceding minute, the amount of distribution is left to the discretion of the Monthly Meeting, which, in cases where it gave no additional advice, was but the discretion of the committee it appointed.

We see no better way than for the committees to judge for themselves in each particular case, bearing in mind the object of the distribution. In some cases it would be a waste of books to leave several copies in a family; but in others there may be young persons who have arrived at years of religious understanding, who would value a book which was given to them personally, and to whom therefore it might be additionally useful.

The caution contained in the 4th paragraph of the Minute—that "knowledge of itself will avail little," without obedience to the conviction of the Holy Spirit—brings to mind the ad-

vice given by James Naylor to Rebecca Travers' when he saw that she was more desirous to comprehend truth in her understanding than to apply it to rectify her heart and affections; he said to her "Feed not on knowledge: for whosoever feeds on knowledge, dies to the innocent life."

The mind may be stored with a knowledge of the Scriptures, and a person may be able to reason strongly and ably on the truth of and doctrines of religion, and yet be in "the bond of iniquity." For it is the Divine light revealed in the soul, and there effecting its gracious purposes of redemption, that is the essential thing which all most experience who would partake of God's salvation. The Scriptures and other books written under a measure of the influence of the Spirit of Christ, are profitable for doctrine, and pure, for instruction in righteousness, and are often made instrumental in stirring up the mind and awakening desires after holiness, yet they cannot take the place of or do the work of the immediate revelation of the power and life of the Redeemer, by which man is "washed, sanctified and justified."

SUMMARY OF EVENTS.

UNITED STATES.—On the morning of the 3rd inst., a fire occurred in the residence of Secretary Tracy, in Washington. The wife of the Secretary escaped by escape by dropping from her bedroom window. She fell a distance of 40 feet into an arway and died soon after being removed to the house of a neighbor. When the fireman arrived they took from the building the dead bodies of Mary Tracy, the Secretary's daughter, and a French girl who had been sleeping in Tracy's room. She overcame in sleep by the smoke, but was discovered and rescued, and at last accounts was doing well, although not appearing to realize his terrible loss, of which he had been informed upon regaining consciousness by President Harrison. The bodies were removed to the State House, and the funeral will take place from there.

The debt statement shows that the reduction of the public debt during last month amounted to \$15,245,895.19. Total cash in the Treasury \$617,053,54.54. Annual report of the United States of Brazil was completed on the 29th ultimo, when President Harrison received the credentials of J. G. de Amaral Valente, the new Minister accredited by the Provisional Government and also the credentials of Salvador Mendonca, as Envoy Extraordinary and Minister Plenipotentiary on a special mission to the United States. Secretary Blaine presented the two Ministers.

In the House of Representatives, on the 20th ultimo, Representative Dalzell, of Pennsylvania, called up the election case of Smith vs. Jackson, from the Fourth West Virginia District. Crisp, of Georgia, raised the question of consideration. Upon the question of considering the election case the Democrats, with three exceptions, refrained from voting. Two votes were allowed to be withdrawn, and the vote was then announced as yeas, 101; nays, 7. Crisp raised the point of no quorum, whereupon the Speaker, who had been noting the names of the Democrats present and not voting, directed the Clerk to record the names of members present and refusing to vote. This caused an uproar, and Breckinridge, of Kentucky, denounced the Speaker as a revolutionary. The Speaker was restored, and the Speaker, after making a statement in support of his position, ruled that there was a quorum present within the meaning of the Constitution. During the remaining sessions last week, scenes of turbulence and disturbance characterized the sittings of the House. Finally the Speaker carried his point, and on Second-day, the 3rd inst. by a vote of 166 to 6, a constitutional majority being present, Smith, Republican, was seated.

Miss Elizabeth Blandin, of the "Cosmopolitan Magazine," who, on a few hours' notice, started on a tour around the world in the opposite direction to that taken by Nellie Bly, of the *World*, arrived in New York on the steamship *Bohnia*, from Liverpool. Her time was 76 days, 16 hours and 30 minutes, which is over 4 days less than the time in which Nellie Bly accomplished the same trip. Three times around the world she had added little or nothing to the world's stock of knowledge, but it may be said for them that they have at least demonstrated the fact that it is possible for a

woman to travel around the globe alone, without insult or hindrance. That fact is creditable to modern civilization.

Senator Colquitt, of Georgia, in a lecture before the American Temperance Union in New York on the 2nd inst., among other things, said: "You will not object if I say that Democracy is clean to say that Democracy and drunkenness are not the same thing, and I don't wish any of my Democratic friends to entertain the idea that being in favor of temperance is being opposed to Democracy. Both parties are afraid of the liquor vote. There would be no talk of solving the liquor problem if the clergies were clean."

Amey C. Fowler is resting in Brooklyn for a couple of weeks, before leaving for San Francisco, whence she will sail for the Hawaiian Islands. This is the courageous young woman who has dedicated her life to the service of the lepers in the famous sanatorium on the island of Kalawau, containing 50 to 60 patients. She is well qualified for the work, having had training in the Paris hospitals, and under Pasteur. She fully understands the momentous step she is taking. After she enters the Island of Honolulu, she will leave it.

All overland trains which have been blocked in the Sierra's snow drifts, arrived at San Francisco on the 31st ult. The first train had on board 250,000 letters and about 10,000 pouches of papers for San Francisco. The greater portion of the letters were distributed, but the usual schedule has been resumed on the Central Pacific.

The New York Presbytery, by a vote of 93 to 43, has decided in favor of revision of their creed. It is proposed to blot out of the Confession of Faith: Reprobation, the annation of infants, the damnation of the heathen, the classification of Roman Catholics as idolaters, and the statement that the Pope is Anti-Christ. The Presbytery of Chicago have voted almost unanimously in favor of the change.

Northern Iowa is being flooded with what bankers regard as counterfeit money, a dollar that has been pressed in circulation for some time. It is a little lighter in weight than the genuine coin.

The name of Ole Oleson occurs 2000 times in the city directory of Minneapolis—almost twice as many times as that of John Smith—and there are 1910 Erick Ericksons.

Deaths in this city last week numbered 605; 47 less than during the previous week and 106 more than during the corresponding period last year. Of the whole number 256 were males and 249 females: 82 died of pneumonia; 7 of cholera; 29 of diseases of the heart; 24 of typhoid fever; 22 of old age; 21 of influenza; 19 of diphtheria; 17 of inflammation of the brain; 17 of bronchitis; 15 of crup; 14 of marasmus; 12 of paralysis; 11 of inanition; 11 of convulsions and 10 of debility.

Money, dec. 18, '81, reg. 104; coupon, 105; 4's, 124; currency 6's, 116 a 125.

COTTON was in limited request, at 1½ cts. per pound for middling uplands.

FEED.—Winter bar, choice fancy, \$13.75 a \$15; do, do, to prime, \$13 a \$13.50; spring bar, \$12.75 to \$13.50.

FLOUR AND MEAL.—Western and Pennsylvania super, \$2.25 a \$2.50; do, extras, \$2.50 a \$2.75; No. 2 winter family, \$2.90 a \$3.25; Pennsylvania family, stone ground, \$3.40 a \$3.75; Pennsylvania roller product, \$3.40 a \$3.75; do, extras, \$3.75 a \$4.15; do, do, straight, \$4.20 a \$4.40; winter patent, \$4.50 a \$4.90; Minnesota, clear, \$3.50 a \$4.00; do, straight, \$4.25 a \$4.65; do, patent, good to choice, \$4.75 a \$5.00; do, do, No. 2, \$4.65.

GRAIN.—No. 2 red wheat, 50 a 50½ cts.; No. 2 mixed corn, 36 a 36½ cts.

No. 2 white oats, 29 a 29½ cts.

BEEF CATTLE.—Extra, 5 cts.; good, 4½ a 4½ cts.; medium, 4 a 4½ cts.; common, 3 a 3½ cts.; fat cows, 2½ a 3½ cts.

PORK.—Extra, 6 a 6½ cts.; good, 5½ a 5½ cts.; medium, 5 a 5½ cts.; common, 4½ a 5 cts.; culls, 3½ a 4½ cts.

LAMBS.—Extra, 7 a 7½ cts.; good, 6½ a 6½ cts.; medium, 5½ a 6 cts.; common, 4½ a 5½ cts.

WHEAT.—No. 1 a 5½ cts.; State, 5 a 5½ cts.

FOREIGN.—On the 3rd inst., the trial of the suit for libel brought by Parnell against the *Times* was to have begun, but when the case was called, counsel announced that the suit had been compromised, the plaintiff paying Parnell \$5000 damages. The withdrawal was also announced at the action brought by Henry Campbell, Parnell's private secretary, against the *Times*, for damages for statements affecting Campbell made by Attorney General Webster, counsel for

the *Times* in his opening speech in the case of O'Donnell against Walter, proprietor of the *Times*, and for charges made against the plaintiff in an editorial published by the *Times* in 1888.

Baron Von Berlepsch, late Governor of Dusseldorf, has been appointed Prussian Minister of Commerce. For many years past this Ministry has been under the direction of Prince Bismarck.

Prof. Weichheilman of the University of Vienna, claims to have discovered the bacillus of influenza. He finds in it some similarity to the pneumonia bacillus, but is sure that it is a distinctly different microbe. The discovery of the Professor is doubted by other scientists.

The Czar has declined to act as arbitrator between Holland and France in their dispute regarding the boundary between the two countries in the Amazon basin. Advice received in Zanzibar from Mozambique states that the Portuguese are acquiring as much territory as possible, pending a delimitation of the boundaries of their districts on the Zambesi River.

A number of French priests have arrived at Malindi. They state that they recently met Dr. Peters, the German explorer, concerning whose death many conflicting reports have been received at Koki. He was in good health.

John Charlton, member of the Dominion Parliament for Norfolk, has given notice that he will move that a committee be appointed to inquire as to the extent of what he calls the "alarming" exodus of natural-born Canadians and settlers in Canada of foreign birth to the United States; as to the chief causes of such exodus; as to the best means to be adopted to counteract influences which have hitherto stimulated the cause; and to suggest measures for diminishing this drain upon Canada's numerical strength.

Reports received at the Canadian Indian Department states that the gripe has reached the Northwest, and that the Indians are simply terrorized.

Two British steamships, the *Halifax* and *Nova Scotia*, on the 1st inst., from Glasgow. On First Mo. 18th she was struck by a hurricane. The seas were tremendous and the vessel was almost continuously under water. The seas smashed three of her boats, stove in the deck house, forced in the iron side of the after hold house, tore the engine pipes from their fastenings, broke the engine-room skylights and flooded the saloon a number of times. On First mo. 27th she was struck fast in a field of ice which was dotted with numerous icebergs.

NOTICES.

WESTTOWN BOARDING SCHOOL.—A State Meeting of the Committee on Admissions will be held in the Committee room, Fourth and Arch Sts., on Seventh-day, the 15th inst., at 10 A. M.

JOHN W. BIDDLE, Clerk.

CORRECTION.—On page 213 in last number of THE FRIEND, an article in the second column is credited by a printer's error to Mr. Howitt." It should have been to "Wm. Howitt."

FRIENDS' TEACHERS' ASSOCIATION.—Lecture Room 140 North Sixteenth Street, 2d Mo. 15th, 1890, 2 P. M.

1. A Talk on Kindergarten, with Illustrations. M. L. VANKRICK.
 2. The Demands of an English course in Friends' Schools.—J. HENRY BARTLETT, CHARLES E. GAUSE, and others.
- All are invited.

WESTTOWN BOARDING SCHOOL.—Wanted, a young man of experience and ability, to fill the position of Governor. Application may be made to BENJAMIN W. PASSMORE.

Cornville, Del. Co., Pa.

WM. EVANS, 252 S. Front St., Philad'a.

DIED, on the 5th of Eighth Month, 1889, in the 67th year of her age, ISABELLA P. HUSTON, wife of Charles Huston, and a member of Caln Quarterly and Bradford Monthly Meeting. Of her it may appropriately be said, "Blessed are the dead which die in the Lord, from henceforth; yea, saith the Spirit, that they may rest from their labors and their works do follow them."

Incidents and Reflections.—No. 210.

LEADING THE BLIND.

In one of the beautiful chapters of the Book of Isaiah there is a promise given, that the Almighty will lead his people "in paths that they have not known." This is a promise that is continually being fulfilled in the experience of his children. How often is it the case, that persons are fitted for some service which the Lord designs them to perform, by passing through some particular trial or dispensation, the reason for which they may not at the time discern. I believe there are many thoughtful persons, who, in looking back over the course of their lives, can see how the studies they pursued, the business they were engaged in, the mental conflicts they endured, or even the accidents that befel them, have prepared them for the performance of duties which afterwards unexpectedly devolved upon them. In addition to the general guidance here referred to, we often meet with special illustrations of people being led "in paths they have not known." One such is described by a woman, a correspondent of the *Christian*, who writes as follows:—

"I want to tell you a little experience of my husband's, that is similar to many of those you see recorded.

"One warm afternoon in the summer of 1886, he was irrigating a patch of potatoes. While busy with his work he noticed a small water insect, and as he is an enthusiastic naturalist he traced it, or similar ones, from the side ditches into the main ditch, and forgetful of work, he followed the ditch up towards the head.

"Suddenly he looked up, and observing he had already gone quite a distance, he decided to go on up to the head of the ditch, where the water is taken from the river, to see if the gates needed attention. Arriving there, he worked awhile and then noticed an immense black cloud, a big storm close at hand, and he was a mile from the house, in his shirt sleeves. He ran hastily up the railroad—which passes through our ranch—around two short curves in the canyon, to a little stone house under the cliff, built to accommodate occasional watchmen. There he took shelter from the storm which was

now upon him. It was a 'cloud burst,' and the water poured in streams down the cliff. He said he thought the whole mountain was coming down.

"When the storm ceased the sun came out brightly at once, and he stepped out upon the railroad. After he had gone a few steps, he found a huge rock on the track. With some difficulty he got it off, rolling it down the steep bank to the river. A few steps further on he found another. He threw that off. He rounded a curve, and stopped as if paralyzed! There just above that short abrupt curve, with a high cliff on one side, and a steep bank and a swift river on the other, was an obstruction of rock and dirt, covering the track about six feet deep for about fifty feet.

"He recovered from his stupor enough to realize he must work fast or lives and property would be lost. He ran home as fast as he could. A train was due in twenty minutes. He must flag it around the curve, for it could not be stopped in time to avert danger after it came in sight of the mass.

"He dashed past the house, calling to me, 'A couple of red flags, quick!' He saddled the range pony, I handed him two pieces of red flannel I had hastily fastened on sticks, and he was off like the wind. He left one flag at the entrance of the canyon on our side, and tying his horse, ran up, getting beyond the curve *just in time!* The train halted close to the edge of the *debris*.

"The conductor turned pale, and shook hands with my husband. 'You've saved our lives,' he said, 'and over twenty thousand dollars' worth of property. Without warning we should have plunged right upon that mass, and been turned down that bank into the river.' Soon a train came up from below—for they pass each other at our siding. It was then stopped and backed down to the station below for section men. They worked hours before the road was free.

"Now if that was not Providence, what was it? My husband had not planned to go to the head of the ditch, he was led by the insects, and then took shelter in the canyon instead of coming home."

The *Pittsburg Commercial Gazette* relates the experience of Colonel Patrick Donan, a western officer, who some years before, during a journey by steamer from New Orleans to St. Louis, was invited to make one of a party of card-players in the cabin. It was a First-day morning, and the colonel, though making no profession of religion, objected. To cut off further pressure, he went to his stateroom. Feeling dull, he looked around for something to read. Suddenly he remembered he had received a present of a Bible from a cousin in New Orleans, and had promised to read it. This was a good opportunity, and he searched for and found the volume. He opened it almost at random, and was soon absorbed in its pages. He soon forgot the poker-players, and read on for some time. How long he sat there he does not know, but he was aroused by a terrific explosion. Hurrying on deck, he found

that the explosion had occurred just under the forward part of the cabin, where the card party was gathered, and every one of them was killed. The steamer was sinking, but Colonel Donan succeeded in getting on board one of the boats, with other passengers, and they were picked up three miles below.

Is there not reason to believe that it was the secret-restraining influence of the Spirit of Christ, which prevented him from joining the party at cards, and thus prolonged a life that would otherwise have been lost.

The late Samuel Irenæus Prime tells how, most unexpectedly to himself and contrary to his inclination, he was called upon to preach to a congregation on one occasion; in which the attending circumstances seem to indicate that the person who almost forced him to the performance of the service, was rightly led. He says, "Coming over from Mattewan one evening, I dropped in at the service in the lecture-room of the church. As he (Dr. Johnston the pastor) saw me come in, he came down from the desk and said to me, 'You must preach for me to-night.' 'Oh no, not at all,' said I; 'I beg to be excused.' After a good deal of persuasion, he brought me to the desk to sit with him and take some part in the service. I thought he would ask me to make the prayer before the sermon, but instead of that he went on and made it himself, and prayed for the young minister who was about to preach the Word." I thought that cool under the circumstances. However he was old, and I was young, and after he had completed his prayer, he turned to me, and said, 'Now, if there is any preaching due to-night, you have got to do it.'

"He then gave out a hymn, while I looked for a text, and the more I looked for it the more I couldn't find it. There was not a passage in the Bible, it seemed to me that I had seen before, or if I had, that I could make any thing out of. While they were singing I looked and looked, and when they had come to the end of the singing, I had not found a line in the Bible from which I could speak. I arose and recollect this expression, 'Who is on the Lord's side.' I rehearsed from memory the circumstances under which it was spoken, but I did not say where the words were uttered, because I did not know, and could not tell; only I knew it was from the Old Testament somewhere. I went on and preached as well as I could from those words. I never heard any thing from it until I went the other day into a meeting in the city of New York to engage in Christian work. It was at the opening of the Church for Strangers, and a gentleman who for years has been one of the prominent, leading, useful members in one of the largest and most influential congregations in New York came up to me and said, 'I never saw you that I did not want to put my arms around you,' and he did put his arms around me. Said he, 'Thirty years ago I heard you preach in Dr. Johnston's lecture-room. I recollect how you began by telling the

people that you did not expect to preach, and that you could not find a text from which to preach. But," said he, "you preached a sermon that then and there led me to devote my life to the service of God." And he has been a useful Christian, giving his time and his labors to God ever since. That is a pleasant reminiscence of father Johnston, because he pressed that sermon out of me under most extraordinary circumstances, and I rejoice that I suffered at his hands in that way that night."

Having no matter prepared for his sermon, it is most probable S. I. Prime felt that he had nothing but Divine help to resort to; and therefore was concerned to look unto the Lord for ability to speak to the people. This dependence on a Higher Power is an essential requisite for the exercise of true Gospel ministry; which requires on every occasion a renewed extension of the assisting grace of the Head of the Church.

An anecdote is told of the eminent French naturalist, Latreille, which shows how little we can foresee the chain of events, of which what seem very insignificant incidents may form important links. The account states, that as a member of an ecclesiastical body, he became an object of suspicion during the French Revolution, and was conveyed to one of the general depots of the city of Bordeaux, there to await *deportation*. The surgeon who visited the jail found him one day carefully examining a small beetle, and was informed by him that it was a very rare one. The surgeon expressed a wish to have the insect for two scientific friends of his, who were naturalists, and through this Latreille's critical and dangerous position became known to those outside, who were already acquainted with his worth and eminence as an entomologist. Efforts to secure his release were immediately set on foot, and these were ultimately successful. A month later his fellow-prisoners were shipped as convicts for Cayenne, and the vessel which conveyed them foundered in the Bay of Biscay, when every soul on board perished.

J. W.

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 219.)

1751.—As my master inclined to quit his trade, I was induced to agree with him for the remainder of my time; and fearing to get in debt, I still wrought for my master, in order that he might be paid. Whilst thus working to perform my contract, my clothes became much worn, and I thought then that scarce any one's condition was like unto mine. My mother was now aged and failing, so that to promote her ease, rather than go there I chose to make my home at my brother Jacob's house. I had many sorrowful hours which were not known to any but the Lord alone, for I kept my condition very much to myself.

In the Twelfth Month, anno 1752, I was taken with the pleurisy at Philadelphia; and having as yet wrought but little for myself, I was scant of money; and being too ill to be removed home, was taken to the house of John Collins; there I lay six weeks, my life being not expected to continue, and after that was carried to my father's house. Not soon recovering my health, my outward condition was no small trial to me; yet this was not to be compared to my inward exercises: thinking what would become of my poor soul if I should now be called to leave the world. My prayers, both by night and day, were for mercy; which at length was so far granted that

I thought I was willing to die; making a covenant then to amend my ways, if my life continued; yet, like too many others, as my health increased I was again tempted, and gave way, so as to return to my former wrong liberties; yea, I was even afraid I grew worse than before. It is shocking to think of, I was as one strolling hither and thither: full and empty, joyful and sorrowful, as things went well or ill with me; I seemed as one who had no inheritance, either on earth or in heaven. The weight of my sins increased so that my life again seemed a burthen to me. Having forsaken the fountain of living waters, I found no rest for my soul; in the evening I wished for morning, and when the morning came had the same desire for evening. I thought the anguish attending my condition seemed as deep as the sea; finding no resting-place at that time either for soul or body. Oh let all those take warning, who may fall under temptations to break those solemn covenants made with the Almighty in times of outward distress.

I had squandered away much precious time, in a manner that yielded no profit to either soul or body—a part of which was in passing from one young woman to another, in a thoughtless way, endeavoring to gain their affections, not considering the consequences. But the Lord, who followed me in mercy, was nearer to me than I was aware of; not dealing with me according to my deserts; but He held me by his hand (as it were) for I had about this time gained the affections of a virtuous young woman, to whom I was nearly attached before I was aware of it. This alarmed me, having not an expectation to marry so soon; I believe it was as a mercy from God to stop my career, for a proceeding in marriage became a serious thing. I therefore had to tell her I thought it might for her be running too great a risk, for in my unsettled condition I feared that marriage was an undertaking of a nature too weighty in my present state. The young woman's answer on this occasion was so discreet that a solemn weight came over us, and the matter became more serious to both. I was tried to a hair's breadth; she had my affections, and I thought it was below the dignity of a man to leave her thus, but it appeared difficult to undertake, in a matter of such consequence. However, unstable and vain as my conduct had been, I thought it was right to consult my father, and taking a suitable opportunity, I laid the matter before him; he, after a solid pause, gave his consent, and the young woman's parents approved of my address to her. Her name was Priscilla, the daughter of John and Elizabeth Collins.

A fear that I should not have strength, or enough resolution to break off from my associates in vanity was now a great concern to my mind. To continue in this way after marriage, which I had reason to think too many young people did, I thought I had an abhorrence to; concluding I had better never to marry than do so. I also had perceived inclinations to travel by sea and land, but the Lord in mercy chained me down, and made me willing to quit my libertine company. Thus becoming more settled, and witnessing more stability in mind, about the 22nd year of my age, or in 1753, I was joined in marriage to the same young woman, whom I loved sincerely; and to my astonishment was more easily weaned from my old associates than I had expected, being enabled to cleave to, and endeavor to be a faithful partner to my wife. But I found I was greatly indebted to the Lord my Saviour, and that I had a great work to at-

tend to, as He might enable me, in return for his manifold mercies to a very unworthy creature.

At first we settled near Mount Holly on a poor farm; I had some discouraging prospects, fearing I should not pay my rent, and found I must labor hard to accomplish things reputably; and using my trowel and hammer with industry I did make out; but was often under inward exercise that no mortal knew of: I frequently sought retirement in lonely places, by night and day. Sometimes my wife sat with me in silence shedding our tears together when no words were spoken, and pouring out our prayers to a gracious God in secret. I found I had been brought into customs which were become deeply rooted, and were not to be overcome, except through Divine aid; my own resolutions being weak were soon frustrated. My natural rest was much broken, feeling the righteous judgments of the Lord which were necessary to be inflicted because of my so greatly transgressing his holy law, which had been often revealed within me, I saw that nothing short of a full surrender to the Divine will could procure me peace with my Almighty Helper; and that my sins, having been as scarlet or a crimson color, must be purged away; my heart cleansed through the operation of the fire of his word, and my transgressing nature yield to the flames thereof, as dry stubble to a natural fire. I then came to see in the true Light, that newness of life was called for; that I must speak the truth from my heart; must use the plain Scripture language of thee, and thou, to a single person, and therein must not fail, even when in the company of my former companions. This, which some account a small matter, appeared at that time like parting with a right hand, or eye; but I clearly saw the Lord who had been merciful to my state in long transgression, must have the sole government in my heart, and that my conduct and conversation hereafter must be agreeable with the standard of his holy will. I had a hard struggle with my old taskmaster, the enemy of souls, whom contrary to my judgment, I had long served. O Lord, grant that this may be a warning to others, that they too may escape the snares of Satan, and that many may be induced to give up to thy service in the flower of life.

In the days of my sorrow for sin, I fully believed there was in God alone a rest for the righteous, and no true rest in any other way than in obedience to his holy requirements, whose promises are yes, and amen forever. He will be to his obedient children, "as the shadow of a mighty rock in a weary land;" but the weary of sin we must be, before we can obtain shelter here. I became sensible that if I was fully given up to the Lord's requirements, his power would sufficiently aid me in withstanding the strongest assaults of mine enemy. I therefore began to submit in earnest for Him to sway his sceptre, and to have the government of me in all things; endeavoring to be more and more conformable to his holy inward requirements, which I was made fully sensible of, even in small things; or what by many are accounted so. Thus the yoke of my dear Saviour became gradually more easy, and his burden light; his ways appeared in truth to be all "ways of pleasantness and all his paths were peace;" my love to my God increased, and the glory of the world became stained in my view. This heavenly love over-balanced all lower enjoyments; my situation became like a pilgrim's who had no inheritance here; I accounted no time lost which was spent in attending religious meetings to wait upon the Lord. Having

on my face, and she saw that I was her child, and that I was not, as they said, bewitched or transformed into some other likeness: *which was reported of Quakers then*, and that they bewitched people to their religion, &c. Thus they deceived them and many others with such strange stories; and we were accounted, with the apostles, deceivers—yet true. And when I discoursed with her out of the Scriptures, her heart was much tendered and affected with the goodness of God towards me." Soon after this he was imprisoned, in company with a young man, for some remarks made to the priest who had charged him with being distracted; and he states that "many far and near came to see us, expecting that we were some deformed creatures."

Some of R. Davies's former companions having been convinced of the truth, they concluded to meet for worship on a hill in a common, for, he says, "we were not free to go into any of the neighbor's enclosures, for they were so blind, dark and ignorant, that they looked upon us as witches, and would go away from us, some crossing themselves with their hands about their foreheads and faces."

George Fox mentions in his Journal that one of the Independent ministers who was about Cromwell's Court, published a report in the newspaper, "that I hung ribbons on people's arms, which made them follow me." This was one of the "lies he spread over the nation in the news, to render the truth odious, and to put evil in people's minds against Friends and truth." The idea this envious priest meant to convey was, that by means of the ribbons, G. Fox exerted a magical power over those who received them. Of a similar nature were "the wicked slanders" which, he says, a priest named Marshall "raised upon me, as that I carried bottles about with me, and made people drink of my bottles, which made them follow me. And, that I rid upon a great black horse, and was seen in one county upon my black horse in one hour and in the same hour in another county, threescore miles off. With these hellish lies he fed his people, to make them think evil of the truth which I had declared amongst them. But by these lies he preached many of his hearers away from him: for, I travelled on foot and had no horse at that time; and that the people generally knew."

On one occasion, going to the Isle of Walney to visit James Lancaster, he was attacked by a rude mob, knocked down and stunned. When he came to himself and looked up, he saw Jas. Lancaster's wife throwing stones at his face, and James lying over him to protect him from the blows and stones. The cause of her rage was, that "the people had persuaded James' wife that I had bewitched her husband."

On another occasion he narrowly escaped drowning, when passing over a dangerous place on the sands of the sea-shore. "Upon this," he says, "the envious priests and professors raised a slanderous report, that neither water could drown me, nor could they draw blood of me; and therefore I was a witch; indeed, sometimes, when they beat me with great staves, they did not much draw my blood, though they bruised my body very sorely. But all these slanders were nothing to me with respect to myself; though I was concerned on the truth's behalf—which I saw they endeavored by these means to prejudice people against; for I considered that their forefathers, the apostate Jews, called the Master of the House Bezalzebub; and these

apostate Christians from the life and power of God, could do no less to his seed."

J. W.

FOR "THE FRIEND."

A THRENODY.

IN MEMORY OF J. S.

Lowly we bow in the depth of our mourning;
Hushed into silence the questioning thoughts;
When He formeth a jewel of priceless adorning
Shall we dare to repine that for Heaven 'twas wrought.

Vainly the line of our human discerning
Falls thro' the deeps of the Infinite sea—
Only to us in our sorrow and yearning,
The triumph of faith consolation can be.

Yet, chastened and stricken, we can but deplore him;
(The Saviour had wept at the tomb of his friend),
So, fondly we thought a long future before him,
Ere the cord should be loosed, and life's pilgrimage end.

And we dreamed that his voice in its rich modulations,
All glowing with fervency, pathos, and power,
Might swell and resound with its pure inspirations,
Afar past the century's fast closing hour.

The thought is dispelled and the dream has been broken—
A truer than ours was the Hand on the helm;
And softly his bark, when the mandate was spoken,
Reached the haven of Peace in the Beautiful Realm.

Not waiting till nature grows weary and wasted,
And the "grasshopper's" weight is a "burden"
But now, in the prime of his manhood, he hastened,
And the warfare is over, the victory won.

Though the ways of the Church seem bereft and forsaken,
When the strong and the valiant are torn from her side,
And Israel's fold to its centre is shaken,
When the faithful are borne on eternity's tide;

Yet He who remembers the needs of our Zion,
Can raise and anoint, from her ashes anew,
Those who will shine like the "hands of Orion,"
In her firmament fixed, to her righteousness true.

May all we have known of the loved and departed,
Devote us afresh to the cause of his Lord,
Incline our allegiance, unswerving, whole-hearted,
To the Saviour he worshipped, the God he adored.

SELECTED.

A GERMAN TRUST-HYMN.

Just as God leads me I will go;
I would not ask to choose my way,
Content with what He will bestow,
Assured He will not let me stray.
So as He leads my path I make,
And step by step I gladly take,
A child in Him confiding.

Just as God leads I am content;
To rest me calmly in his hands;
That which He has decreed and sent,
That which his will for me commands,
I would that He should all fulfil,
That I should do his gracions will
In living or in dying.

Just as God leads I will resign;
I trust me to my Father's will;
When reason's rays deceptive shine,
His counsel would I yet fulfil—
That which his love ordained as right
Before He brought me to the light—
My all to Him resigning.

Just as God leads me I abide;
In faith, in hope, in suffering true,
His strength is ever by my side;
Can aught my hold on Him undo?
I hold me firm in patience, knowing
That God my life is still bestowing,
The best in kindness sending.

Just as God leads I onward go;
Oft amid thorns and briars seen,
God does not yet his guidance show,
But in the end it shall be seen,
How, by a loving Father's will,
Faithful and true, He leads me still,
—Lampertus, 1625.

CROSSING THE RIVER.

BY ALEXANDER R. THOMPSON.

The river ran with rush and reed
Of freshet-flood athwart the way
Of Israel, though the other shore
Was Canaan; in its beauty lay
The land of promise, fair and bright,
And winsome to their eager sight.

At length their weary feet have come
To Jordan's side; and, pausing there,
Beyond the river lies the home
Long promised, palm decked, fertile, fair,
How shall they cross to reach it? Lo!
The heavenly word is "Forward go!"

Into the water? But they shrink
From venturing the rushing flood.
Not here, as on the Red Sea's brink,
Stands Moses with his outstretched rod;
Yet they, like others long ago,
Shall find God in the overflow.

So they go forward till the shore
The priests have reached, that sunbright worn.
With steps unflinching, before
Their eyes the holy ark is borne;
The mercy-seat, the cherubim,
Come to the water's very brim.

But when the feet of them that bare
The ark of God stepped in the wave,
The floor shrank out, and there
A broad and open pathway gave.
And they may sing, as on they tread,
"The waters saw thee, Lord, and fid."

So will God help. Across our way
May run a river wide and deep,
And we may stand, and shrink, and pray,
May tremble, hesitate, and weep,
As if it never could be crossed,
And we forsaken are, and lost.

Sometimes it may be that his love
Will cleave the flood before our eyes,
And He will from our way remove
The hindrance which our courage tries,
And there, upon the other shore,
Timbral and song may Him adore.

And sometimes there will be the word,
His only answer, "Forward go!"
With us forever is the Lord;
The path of life his love will show.
Jesus before us, at our side,
Why should we fear the swollen tide?
—S. S. Times.

THERE is no error more common or more baseless than the idea that men's characters and conduct and destiny are shaped and fixed by their circumstances. Some of the very best men in the world have fought their way upward against moral obstacles at every step, and have found at last an environment that was suited to their aspirations and endeavors. And some of the very worst men in the world have fairly fought their way downward from an exalted starting-point in life, resisting at every step the moral influences and social restraints which tended to their good. They have not fallen, but have deliberately found their way from a good environment to a bad one, because they preferred the bad one. And as it has been, so it is to-day. Men are making their own choice, and are struggling upward or downward to their own place of destiny. And God permits to them, each and all, the privilege of this elective struggle—with its consequences.—S. S. Times.

FOR "THE FRIEND."

A Few Hours Spent Amongst the Relics of Antiquity.

The short account in THE FRIEND, of First Month 18th, entitled "A Harmony of Records," brought to mind a visit I paid Dr. Douglas, of Phoenixville, a few years ago, who had spent seven years of the active part of his life in antiquarian researches through Egypt and Palestine—and had stored his mind and cabinet with rich treasures of antiquity.

As we were passing through his laboratory, he called my attention to a cast he had taken in plaster from the walls of Karnac, one of the empires of Thebes—and then remarked, these characters stand for Sheshouk (the Shishak of the Scriptures); those under them spell Rehoboam, and these figures underneath represent one hundred and thirty of Rehoboam's captains and counsellors. He said that it appeared that Sheshouk was so much elated at having obtained a victory over the Israelitish king, that when he came home carrying with him the treasures of the house of the Lord at Jerusalem, he had the ancient hieroglyphs chiselled off the north walls of his temple, and the above illustration of his conquest placed in their stead. The doctor's collections of specimens, and his observations on the science of archeology, were intensely interesting to me.

There were gold-gilt books of papyrus, written with a pen in most beautiful characters, four thousand years old; fine linen from the looms of Egypt; bricks that there is no doubt but that they were made by the children of Israel during their servitude; water from the river Jordan; flowers from the Garden of Getsemane; and branches of olives, from the Mount of Olives.

I might go on for pages—as his house was literally filled with collections from almost all parts of the world. He celebrated his 19th birthday on board the ship Trafalgar, from Hull, in 81° north latitude. He was two years artillery-sergeant in India; seven years in Egypt and Palestine; was in Rome when the pope excommunicated Victor Emanuel, king of Italy, who, in retaliation, confiscated the property of the Roman Church, driving the monks and nuns from their abbeys, and exposing at public sale their wonderful and ancient collections of statuary in bronze and marble; carvings in horn and ivory; beautiful paintings on copper and canvas; a number of china busts of the rulers and philosophers of Greece and Rome—many of which went for a mere nominal value and were bought and brought home by the doctor.

Through these collections from Rome and Naples were objects of great interest and curiosity; but what claimed my most particular attention were the relics from the ancient Catacombs and from the ruins of the cities and temples of Egypt. Each Pharaoh, if he had a temple built or improved, a monolith raised, or a brick made, had it stamped with his name and the date of his reign.

On one side of me I noticed a pile of sundried brick; as I picked up one of them and was examining it, the doctor inquired of me if I noticed any difference in that one from the other bricks I had been looking at. I said, certainly—the others appear to have quite an amount of straw in their composition: in this one, the clay is mixed up with grass and bull-rushes. Well, said he, that brick bears the cartouch of the Pharaoh who placed cruel

task-masters over the Israelites, that would not allow them straw, but obliged them to gather rubbish and rushes from the banks of the Nile. And then, with great emphasis he remarked: "There is a most wonderful harmony in the chronology of the characters and inscriptions on the Egyptian monuments and the history as recorded in the Holy Scriptures."

As I was passing along, my attention was arrested by the figure of a small mummy—which the doctor noticed and said to me: "That little girl very likely played with Moses, as the date on the scarabeo on her neck corresponds exactly with the youthful period of that great Jewish lawgiver; and I got her nine miles northeast of Cairo, near the site of Heliopolis—the City of the Sun—the On of the Scriptures—where Moses was taught in all the wisdom of Egypt; where Joseph got his wife Asenath; where Jeremiah wrote the Lamentations, and where Plato taught the sublime doctrine of the immortality of the soul."

Now, all that is visible of that once renowned and splendid city, is one column, 70 feet high, thought to be the oldest in the world, and a few scattering sphinxes—the Nile having deposited at least ten feet of soil on these ancient ruins.

C. S. COPE.

WEST CHESTER, First Month 20th, 1890.

FOR "THE FRIEND."

The New Heart.

When Adam and Eve first partook of the forbidden fruit, they transgressed the Divine will, and, by this act of disobedience, brought on themselves spiritual death, and the possibility of that death being eternal. "As in Adam all die, so in Christ all are made alive;" and as a flaming sword was placed to guard the tree of life, so we now must submit to the operations of this flaming sword (the Holy Spirit) before we can be made heirs of eternal life.

It seems to me that the religious world of today lose sight to a great extent of the definiteness and completeness of this great change. The necessity of the *new heart* is not sufficiently preached.

That all have sinned and are by nature children of wrath, is Scripture truth. The prophet says, "The whole head is sick and the whole heart faint," but the blessed promise is given to those who will turn, and seek salvation, "A *new heart* will I give you, and a *new spirit* will I put within you. I will take away the stony heart out of your flesh, and I will give you a *heart of flesh*; and I will put my Spirit within you."

Thus we see the whole man is changed from a state of nature to one of grace—and if willing to led obedience keep pace with knowledge, is forever safe. In speaking of this great change, the Lord says: "Come now, let us *reason* together: though your sin be as scarlet, they shall be as white as snow; though they be red like crimson, they shall be as wool."

It was of the new heart that our Saviour spoke, when he told Nicodemus "Except a man be born again, he cannot see the kingdom of God;" and in this memorable discourse with him, followed on to explain to this ruler in Israel how *He* was *himself* the fulfilment of prophecy and the generator of the new birth.

This mysterious change is given and performed by God's Holy Spirit. It is beyond the comprehension of finite man how it is done. One thing the regenerate soul can say: "Whereas I was *blind*, now I see." Jesus said, in regard to it: "The wind bloweth where it listeth and

thou hearest the sound thereof, but canst not tell whence it cometh nor whither it goeth: so is every one that is born of the Spirit."

The child of God knows *some change* has been wrought within; *something* has changed the desires and intents of the heart. Things that before were a pleasure, become distasteful; evils formerly hard to overcome, are now easily shunned by means of some Divine influence.

What is it? what has wrought the change? It is this: the self-will has become slain, and our will has been given over to the will of God. "The Lord is working in the changed heart" to will and to do of his own good pleasure." This is where the submission is complete—hard things become easy, and the crooked paths straight; things once loved are now hated and those before hated are now loved.

It is my earnest prayer that we may all seek earnestly to know this great change to have been wrought, to know we are indeed born again. Yea! may we realize of a surety that the Day Star has arisen within us, even Jesus, in all his loveliness and reigning power. If *He* is there, *He* will be to us "strength in weakness," "riches in poverty," and a very present help in every time of spiritual or other need. If *He* has given us the new heart, then shall we know *Him* "whom to know is life eternal."

We shall know then, not because of some one else's saying, but because we have seen and tasted for ourselves and realize indeed that this great Deliverer can be none other than the Christ of God. When Jesus spake to the woman of Samaria, *He* told her, "If thou knewest the gift of God and who it is that saith unto thee, 'give me to drink,' thou wouldest have asked of *Him* and *He* would have given thee living water." Ah! methinks, how many there are now to whom this language would apply. "If thou *knewest* the gift of God," and who it is that is seeking an entrance into thy heart, thou wouldest open to *Him* and *He* would give thee "living water."

If we will but receive *Him*, *He* will come in and sup with us and we with *Him*, and "to as many as receive *Him*, to them *He* gives power to become the sons of God." These are they who have "eternal life abiding in them," and who "have fellowship with the "Father and the Son."

Reader! hast thou the *new heart*? Hast thou been born again? Art thou able to say thou hast put off the *old man* with his deeds and put on the *new man*, Christ Jesus?—and art thou now walking in newness of life, through the ability which comes from *Him*? *He* alone is able to build thee up in the most holy faith, and give thee peace now and an "inheritance among the saints in Light" hereafter. Dost thou ask how shall I obtain this? I would answer—Believe that the same Jesus which suffered on Calvary, and ascended, is now in another form, knocking at the door of thy heart, pleading with thee for an entrance into thy affections, and for the surrender of thy will to *Him*. Believe that *He* is mighty to save and able to deliver all that come unto *Him*. Believe *Him*, when *He* says, "Whosoever cometh unto me, I will in no wise cast out." Seek *Him* in earnest prayer, that thou mayest know that radical change to be wrought within thee—for it is a real thing and not a mystical imagination. Oh, if thou hast not found *Him*, seek *Him* now—delay not—for thou dost not know how long opportunity may be given thee. "Now is the accepted time; to-day is the day of salvation." To-morrow may be too late; throw thyself un-

reservedly at his feet and on his mercy, and ask Him to lift thy feet out of the miry clay and set them upon the Rock; and He will establish thy goings, and put a new song into thy mouth—even praise to thy God." If thou canst not say thy peace is made with thy God, oh! give thy soul no rest until thou hast sought for and found thy Redeemer. If thou seek Him, He will be found of thee—for "He has never said to the wrestling seed of Jacob, seek ye my face in vain." J. H. Y.

New York City.

Natural History, Science, &c.

Nesting of the Loggerhead Turtle in Florida.

—On the beach the turtles commence to lay about the middle of the Fifth Month. A full moon night is generally selected for a hunt. When a turtle has landed from the water, she mounts the sandy beach in a direct line; when she has reached a suitable spot, she commences to dig. First, one hind-foot removes some sand; then slightly shifting her body sideways, the other is used—until a hole from 12 to 20 inches deep and from 14 to 18 inches in diameter is formed. She now deposits her eggs, covering them loosely with sand.

During this time the turtle completely ignores our presence; she seems to have lost all fear in her anxiety to accomplish her maternal work. After depositing from one to two hundred eggs, she scrapes the sand back, heaping it higher over the nest than the surrounding beach. There is reason to believe that the same turtle lays several nests in a season.

In some of the nests the eggs were buried so deep by the drifting sands, that without assistance the young turtles must have perished, being unable to dig their way out. But a species of crab digs a tunnel to the nest, for the sake of the unfertile eggs, and perhaps young turtles, and of this the little prisoners avail themselves to make their escape.

Keeping Fish.—A writer in the *Lancet* shows that, owing to the peculiar character of the skin of fish, and the thickness of its flesh, the cold from ice in which they are packed often does not penetrate their bodies sufficiently to keep them from spoiling. Decomposition takes place in the interior, and their quality is thus greatly injured.

Post Office Twine.—Chambers's Journal says: "The immense business carried on by the Post Office Department of this country (Great Britain), is shown in a curious way by an alteration that has lately been made in the kind of string used for fastening up letter-bags, parcels, &c. The string hitherto used in the post offices was made of hemp and cost about ten pence a pound. It is now replaced by jute, which costs about one-third of that sum. The alteration represents a saving of ten thousand pounds a year."

Colored Lamps.—A new form of ship's lamp has recently been introduced, in which a hollow lens filled with colored glycerine is substituted for the bull's-eye of green and red glass formerly used. The increase of light is very marked.

A New Cotton Plant.—What singular and unexpected changes come about in this world. Before the late war, when "cotton was king," cotton seed was an unutilized waste product—being flung away, or at most turned into manure. Some time after the war, when cotton was so low-priced that the farmers and planters of it could scarcely make a living, cotton-seed oil came into use and helped out not only those

who grew cotton, but also the Southern railroads, which transport the seed to the mills, the oil to the consumers, and the oil-cake back to the farmers, to whom it is a great boon.

In the same period it occurred to a few intelligent planters to try to improve the cotton plant, and this has been done by creating varieties in which the boll ripens earlier, and thus has a better chance to escape frost.

And now comes a variety developed in South Carolina, in which the cotton plant produces no cotton at all, but a large quantity of seed. The *Atlanta Constitution* says: "This new variety of the cotton plant promises to give to the farmer a new product that will prove to be a valuable one. There is no limit to the demand for cotton-seed oil in its various forms—and if four hundred bushels of seed can be raised to the acre, the crop will prove to be more valuable than the lint cotton itself."

Thus what was a quarter of a century ago and less, a waste product, promises now to become a staple, and the Southern farmer may take his choice to raise cotton or to raise cotton-seed alone for the oil, as the market tempts him.—N. Y. Herald.

Strength of Woods.—The hard woods of which frame-work and carriage parts are made, possess different qualities. A piece of ash, one inch square, one foot long, secured at one end, will break under a weight attached to the other end of 168 pounds: while a piece of hickory of the same size, and under the same conditions, will break under a weight of 250 pounds. The ash, however, will deflect but 2.5 inches, while the hickory will deflect 8 inches—making the value for general use nearly equal—say 55 pounds of ash and hickory: that being what each will support without defecting enough to prevent straightening when the weight is removed. Locust breaks at 295 pounds, but resists deflection up to 80 pounds. Maple breaks at 202, but resists deflection up to 65 pounds. White-oak breaks under 230 pounds, but deflects at 50 pounds. Elm breaks at 140, and deflects at 40 pounds, and yet it is next to hickory and maple in resistance to crushing weight on end.

Dense Population.—It has been for a long time asserted and believed that the Island of Barbadoes, with 166 square miles and a population of 175,000, which is 1,054 persons to the square mile, was the most densely inhabited portion of the earth's surface. From a communication of John Worthington, the Consul of the United States at Valetta, Malta, it appears that in the matter of density of population, Barbadoes must yield the palm to Malta. That island contains 95 square miles of surface, and contains 142,500 inhabitants (exclusive of the British garrison and visitors and non-residents),—which is an average of 1,500 to the square mile. The city of Valetta contains a great plethora of population, its area being 0.218 square miles, and its population 21,854, a population of 78,157 persons to the square mile.—*Exchange.*

The Effect of Music.—While a gentleman was watching some spiders last summer, it occurred to him to try what effect a tuning-fork would have on the insects. He suspected that they would regard the sound just as they were in the halls of regarding the sound of a fly. And, sure enough, they did. He selected a large ugly spider, that had been feasting on flies for two months. The spider was at one end of its web. Sounding the fork, he touched a thread

at the other side of the web, and watched the result. The spider had the buzzing sound conveyed to him over his telephone wires, but how was he to know on which particular wire the sound was travelling? He ran to the centre of the web very quickly, and felt all around until he touched the thread against the other end of which the fork was sounding. Then, taking another thread along, just as a man would take an extra piece of rope, he ran out to the fork and sprang upon it. But he retreated a little way, and looked at the fork. He was puzzled. He had expected to find a buzzing fly. He got on the fork again, and danced with delight. He had caught the sound of the fly, and it was music to him.—*Harpes' Young People.*

Items.

Church Establishment.—When we learn as well that the depraved and utterly vicious Marquis of Ailesbury is the patron of twenty-one church livings, while he is debarred from all English race tracks for cheating, it must remain a perpetual surprise that so many men can yet be found to fight for the Established Church. Nothing but the intense conservatism which is so dominant in England can explain the continuance of things in that great country, and he greatly errs who thinks that such a force can be speedily overcome, no matter how strong are the arguments used, or the incongruities with which it is indissolubly connected.—*Selected.*

Christian Jews.—Rabinowitz, the learned Jew of Southern Russia, who some years ago announced his belief in Jesus of Nazareth as the Messiah, has lately been in Great Britain and has been welcomed here. He lives in Kischeneff, and preaches Christ constantly and with increasing success. It is a remarkable fact that, while no converted Jew would be allowed to enter Russia to proclaim the gospel, Rabinowitz, one of the sages, has been raised to the rank of a teacher for Christ. Others, it is said, have followed his example, and Russian Jews, who are leaving the country, visit Kischeneff to hear Rabinowitz, so that the place is becoming a centre for the dissemination of Christian literature, and Rabinowitz's printed sermons, pamphlets and songs are read and discussed far and near.

Ionizing Criminals.—Judge Gildersleeve, of New York city, has written an important communication to the *Mail and Express*, in which he denounces in unsparring terms the practice of ionizing criminals. He says there are multitudes of charitably disposed persons who expend their energies and sympathies, not on the needy and deserving, the sick and starving, but on the most notorious felons, furnishing them with tobacco, fruit, books, delicacies and flowers, and that most of those who are guilty of these misdirected efforts are women. This way of doing things, he says, is a crime against humanity, and highly immoral. It leads culprits to presumption and conversion in order to secure these attentions. An example is given of one notorious thief who boasted that by "doing the religious racket" every time he was imprisoned he secured better fare and treatment than he could find while at liberty. He always made a profession of religion within a day or two of his imprisonment, and he has not only had every luxury from charitable people during his stay in prison, but clothes and money on the expiration of his term. This sort of treatment also leads petty criminals to resolve to commit some graver offence next time, seeing that the more desperate the felon the more sympathy and help he receives. That a more judicious treatment should be accorded all classes of criminals, and that efforts should be made for their salvation, no thoughtful Christian doubts; but ionizing criminals and injudicious religious work among them are abominations which might well be stopped by legislative authority.

Editorial Responsibility.—The *Christian Advocate* contains the following paragraph: "In a daily paper which is rated by many among respectable journals

we note a paragraph in which the good luck of certain purchasers of tickets in the Louisiana Lottery is so paraded as to awaken the covetous desires of its readers. The item is copied from another paper, but a correspondent informs us that this is only one of a series of such paragraphs appearing recently in the same paper. Hundreds of young men are being led astray by this infamous Louisiana institution, and the papers which print such stories not only aid the gambling scheme, but lure the unwary into ruin. The thousands of cases in which lottery tickets have filled to draw prizes and the examples of those who have been utterly ruined, and whose business are not given in those papers so earnestly devoted to the service of the devil. Christian people cannot be too careful about the papers which come into their homes.

Address to Children and Others.—O! that children and all people would be careful in their very early years, and as they grow up and advance in life, to mind the "reproofs of instruction" in their own breasts: they are known to be "the way of life," Divine life to the soul. This something, though they know not what it is, that checks them in secret for evil, both before and after they yield to the temptation, warning them beforehand not to touch or taste, and afterwards condemning them if they do so—and inwardly inclining them to a life of religion and virtue—this is the very thing, dear young people, whereby God worketh in you to will and to do, and by which He will, if you cleave to it, and work with it, enable you to work out your own salvation with fear and trembling before Him. Despair it not, do no violence to its motions; love it, cherish it, reverence it; hearken to its pleadings with you; give up without delay to its requirings and obey its teachings. It is God's messenger for good to thy immortal soul; its voice in thy streets is truly the voice of the living God; its call is a kind invitation to thee from the throne of grace. Hear it, and it will lead thee; obey it, and it will save thee; it will save thee from the power of sin and Satan; it will finally lead thee to an inheritance incorruptible in the mansions of rest, the house not made with hands, eternal in the heavens.—*Job Scott.*

THE FRIEND.

SECOND MONTH 15, 1890.

Within a few days past, the Editor received from a Friend in Great Britain, the following communication:

On turning over some back numbers of THE FRIEND, I was struck by a few words under date of Seventh Mo. 1st, 1882, referring to the first appointment of the Home Mission Committee by London Yearly Meeting. "It gives the sanction of that important body to meetings held in a manner which would be unbecomingly false, condemned, and opens the way by a *free and early taken* steps to the establishment of a regularly paid ministry, such as exists in other denominations."

Those who have followed the history of London Yearly Meeting for the period named, can hardly fail to notice the extreme caution with which every change, apparently of a trifling character at the surface, but involving something radical underneath, has been introduced.

First of all doctrine, and scarcely any point of discipline or arrangement was successfully attacked. Then came the cry for more liberty to individual members in the matter of grave-stones, the plain language, marriage and tithes. "Our growth and prosperity were not to be in the slightest degree infringed on, it was to be a narrow and formal carrying of them out that had to be altered." So when the Home Mission Committee

came to be appointed as a kind of result of the mission and revival meetings held not long before—"no funds are at present to be placed under its control," it simply was to take up the work of George Fox in evangelizing the world.

Time has passed, and the question may well be asked, has it done, or is it doing, George Fox's work more than zealous Baptists or Methodists are doing it? Does it gather into a dispensation of Spirit and Truth, or is its work much in the outer court?

One thing it has done is to bring about a widespread dissatisfaction up and down the Society in this country. The dissatisfied ones would, in a great majority of instances, be scarcely known as Quakers in the world or be of the class which Friends at one time thought fit to uphold the discipline; but they feel at least that the standard of their profession demands something higher and better than they find in meetings under the influence of the committee.

A few days ago I attended the meeting to which a minister belongs who is now travelling in America. During his absence a person has been hired to carry on his work—take his class on First-days, &c. At the evening meeting there were first a hymn, then reading Scripture and exposition by the woman who read, then prayer and preaching by the hired man,—in the oldness of the letter rather than in the truth of the spirit. The same man, who has three other hired pastors attached to meetings which have been "revived" by mission methods.

It shows instructively the gradual process by which the principles and practices of a religious Society may be modified and changed, until things are tolerated within its borders which once would have been indignantly rejected; and until it ceases to bear a consistent testimony to those doctrines and testimonies which marked it in its beginning.

The most encouraging part of the article is the statement that there are many in England who are dissatisfied with the changes that have been made, although some of these do not themselves so submit to the restraints of the cross as to be good examples of the simplicity and self-denial into which it leads. Yet they are sensible of the weakness that exists in the meetings to which they belong. Would that such would more fully submit themselves to the government of that which has partially illuminated their understandings, so that their example might be like a city set on a hill that cannot be hid. Then there would be ground to hope for a blessing from the Head of the Church, and that others seeing their good works would glorify our Father in Heaven.

SUMMARY OF EVENTS.

UNITED STATES.—On the 10th instant, President Harrison signed the proclamation opening the Sioux Reservation, in South Dakota. A tender was also issued, establishing land offices at Pierre and Chamberlain. The reservation embraces 9,000,000 acres of land. Boomers who had been waiting for permission to enter the coveted lands, immediately started across the Missouri River and located their claims.

THE VALUE OF THE CROP.—The Bureau of Agriculture for 1889 places the valuation of the winter wheat crop of last year at \$19,842,573.77; the corn crop at \$51,495,876.10, and the oat crop at \$7,654,812.73. The value of all agricultural products of 1889 was \$104,572,428. The value of the live stock for the year 1889 is \$116,126,466, the figures being as follows: Horses, \$7,551,520; mules and asses, \$8,132,130; milch cows, \$13,036,036; other cattle, \$2,607,854; sheep, \$73,632,590; swine, \$10,607,707.50.

The whole country has been surprised to hear that a bill establishing a branch of the Louisiana State Lottery had passed the senate of North Dakota. Great opposition has been manifested against the proposed law, and on the 10th instant in the North Dakota House of Representatives, the friends of the bill moved its indefinite postponement and carried it to the senate. The committee was appointed to investigate the charges of bribery in connection with the lottery business.

The town of Burke, Idaho, in the Coeur d'Alene mining district, has been nearly destroyed by avalanches, which swept down upon it on the 4th instant. Three men were killed, and the inhabitants have fled to the towns of Wallace and Wallace. Burke lies in a narrow valley, through which a high mountain range leads about two hundred inhabitants. Later in the day another avalanche swept away a boarding house at the Custer mine, about five miles from Burke. Six miners were killed and a number injured.

During the Southern Oregon, in connection with the melting snows, have caused a great loss. Roads have been washed out, bridges and culverts demolished, barns, houses and fences swept away. The Oregon and California Railroad track has been washed away for miles, and the roadbed is badly damaged along the whole line. On the Coast between Astoria, Nuxon and Trout Creek, there have been several avalanches since the 1st instant. According to the latest information from Portland, the Union Pacific line is again closed, this time owing to the melting snow and slides along the Columbia River between Dallas and Portland, where the road suffered so severely two years ago from the same cause.

A furious storm of wind, rain, hail and snow raged on the 8th instant throughout western Pennsylvania, and was especially violent in the mountain districts. A furious storm of wind, rain, hail and snow, and throughout the mountains the snow-fall was to 10 inches on level. At Blairsville, Uniontown, Connellsville, Dunbar and other places great havoc was done by the high wind, many buildings being damaged or demolished.

Since the repeal of the prohibitory amendment to the Constitution of Rhode Island, drunkenness and crime have greatly increased. The criminal docket of the Court of Common Pleas of Providence County at its last term was the largest ever known in its history. In Providence, Pawtucket, Newport and every locality of the State the same evils are rampant.

The Goff-Fleming contest was decided by the West Virginia Legislature in favor of Fleming, Democrat, the vote standing 43 for Fleming and 40 for Goff. Carr, the Union Labor Senator, voted with the Democrats.

The municipal elections in Salt Lake City, Utah, passed off without any of the usual excitement. Only six arrests were made for illegal voting. When the polls were closed the Gentiles claimed a victory by a majority of 1200. The Mormons admitted their defeat, but by a much smaller majority, and said that fraud had been the order of the day, and that they would contest the election.

Deaths in this city last week numbered 461; 44 less than during the previous week and 53 more than during the corresponding period last year. Of the whole number 238 were males and 223 females; 56 died of consumption; 52 of pneumonia; 25 of diseases of the heart; 19 of cholera; 15 of influenza; 15 of influenza; 15 of old age; 15 of bronchitis; 14 of inanition; 14 of Bright's disease; 13 of debility; 13 of paralysis; 13 of typhoid fever; 13 of crop; 12 of inflammation of the stomach and bowels and 12 of inflammation of the brain.

Markets, &c.—U. S. 4½, rec, 103½; coupon, 105; 4½, 123; currency 6½, 110 & 126.

COTTON was firm and active; per cent pound higher. Middling upland cotton, 11½; per pound.

FEED.—Winter bar, choice, fair, \$13.75 a \$14; do, fair to prime, \$13 a \$13.50; spring bar, \$12.75 a \$13.50.

FLOUR AND MEAL.—Western and Pennsylvania super, \$2.00 a \$2.25; do, extras, \$2.25 a \$2.75; No. 2 winter family, \$2.00 a \$2.25; No. 1 winter family, \$2.00 a \$2.25; No. 1 extra, \$2.00 a \$2.25; No. 2 extra, \$2.00 a \$2.25; No. 3 extra, \$2.00 a \$2.25; No. 4 extra, \$2.00 a \$2.25; No. 5 extra, \$2.00 a \$2.25; No. 6 extra, \$2.00 a \$2.25; No. 7 extra, \$2.00 a \$2.25; No. 8 extra, \$2.00 a \$2.25; No. 9 extra, \$2.00 a \$2.25; No. 10 extra, \$2.00 a \$2.25; No. 11 extra, \$2.00 a \$2.25; No. 12 extra, \$2.00 a \$2.25; No. 13 extra, \$2.00 a \$2.25; No. 14 extra, \$2.00 a \$2.25; No. 15 extra, \$2.00 a \$2.25; No. 16 extra, \$2.00 a \$2.25; No. 17 extra, \$2.00 a \$2.25; No. 18 extra, \$2.00 a \$2.25; No. 19 extra, \$2.00 a \$2.25; No. 20 extra, \$2.00 a \$2.25; No. 21 extra, \$2.00 a \$2.25; No. 22 extra, \$2.00 a \$2.25; HOGS.—Western, 5½ a cts.; State hogs, 5 a 5½ cts.
FOREIGN.—A despatch from London, dated Second Month, 10th, says: "It is reported to-night, upon good authority, that the Government will propose to Parliament an appropriation of \$100,000,000 for the purchase scheme for Ireland; and that his bill is an extension of its powers given by Lord Ashbourne's act."

The extradition treaty with the United States awaits only approval in Washington.

On the 14th instant an explosion occurred in a colliery at Abercromby, in Monmouthshire, ten miles northwest of Newport. Four hundred miners were imprisoned, and for several hours no communication could be had with them. An opening was finally effected, and at noon 200 of them had been rescued. A number of them were killed, and the bodies of the last accounts one hundred and seventy bodies had thus far been taken from the pit, and it is believed that the total number of persons killed will reach 190.

The cause of the explosion was the flooding of pits adjacent to them, in which the explosion occurred. By the flooding of these pits, gas was dislodged and forced into the pit where work was in progress, and there it was ignited and exploded. There must have been a great quantity of gas, as the explosion had tremendous force. It was heard at the distance of a mile. All the gear in the shaft was thrown into the air as if from the mouth of a volcano, and simultaneously a vast bright volume of flame shot upward, followed by a dense, heavy column of smoke.

On the 7th instant, by prompt action, the French Government nipped in the bud a plot which was apparently intended to be a royalist coup d'état modeled after Louis Napoleon's descent upon Bonaparte, and the only consequence is, that the Duke of Orleans, eldest son of the Count of Paris, was taken in custody. During the examination before the Prefecture, the Duke stated that his object in visiting Paris was to offer himself for military service, having attained his majority, and that he had declared his arrival at the Mairie. The real object, according to the Ministry, was to provoke disorder and to awaken sympathy.

On the 10th instant, it was reported that the Government had decided to pardon the Duke of Orleans, but he is sentenced to two years' imprisonment; and that President Carnot will immediately pardon him, and he will be escorted to the frontier and shown out of the country.

The Duke of Montpensier, Antoine Marie Philippe Louis d'Orleans, died suddenly on the 4th inst., in San Lucas, Spain. He was the fifth son of Louis Philippe, and was 66 years old. He was the father-in-law of the Count of Paris, his oldest daughter married the prince in 1841. His third daughter was Marie de las Mercedes, the first wife of the late King of Spain. His estate is estimated at \$20,000,000.

It is authoritatively stated that the Czar of Russia has declared that he will not recognize the Brazilian Republic during the lifetime of Dom Pedro, the deposed Emperor.

Chinese newspapers from Hong Kong say there is belief among the mass of people in Corea that the reign of the present dynasty is growing to a close. The Emperors are in the interest of a family called the Hui. It is further reported that a conspiracy exists to assassinate the present king has ramifications throughout the entire Corean peninsula, and that several Ministers of State are implicated.

The Indians of the San Blas coast have defied Colombian rule, and raised the American flag. This is one of the outcomes of the recent attempt of the Colombian Government to destroy the American trade.

Influenza has reached Uruguay. Four thousand people have been ill with it in Montevideo.

Influenza is increasing in the City of Mexico, and it is said so many have died, that there is not a sufficient number of hearsees to carry the bodies to the cemeteries.

A telegram from Havana, Cuba, says that it is generally conceded that the sugar yield will be smaller than was first anticipated. This is due to two causes: the prolonged drought, which has considerably decreased the yield of the cane, and frequent fires on the plantations, which have destroyed much of the plant.

NOTICES.

WESTWON BOARDING SCHOOL.—A Stated Meeting of the Committee on Admissions will be held in the Committee room, Fourth and Arch Sts., on Sunday, the 10th instant, at 10 A. M. JOHN W. BIDDLE, Clerk.

WESTWON BOARDING SCHOOL.—The Spring Term will begin Third Month 18th, 1890.

Friends intending to send their children to the school will please make early application to

J. G. WILLIAMS, Sept.
Westwton, Penna.

WESTWON BOARDING SCHOOL.—A Stated Meeting of the Committee on Instruction will be held in the Committee room, Fourth and Arch Sts., on Sunday, the 22nd of Second Month at 10 o'clock.

GEORGE M. COMFORT, Clerk.

FRIENDS' TEACHERS' ASSOCIATION.—Lecture Room 140 North Sixth Street, 2d Mo. 15th, 1890, 2 P. M.

Programme:

1. A Talk on Kindergarten, with Illustrations. M. V. STRICK.
2. The Demands of an English course in Friends' Schools.—J. HENRY BARTLETT, CHARLES E. GAUSE, and others. All are invited.

WESTWON BOARDING SCHOOL.—Wanted, a young man of experience and ability to fill the position of Governor. Application may be made to

BENJAMIN W. PASSMORE,
Concordville, Del. Co., Pa.
WM. EVANS, 252 5th St., Front St., Philadelphia.

TO GRADUATES OF FRIENDS' SELECT SCHOOL:—All graduates of Friends' Select School are requested to send to the undersigned the names of any graduates of the school whom they can recollect, with the year of their graduation, and their present addresses. In the case of any graduates from the Girls' School, now married, both their present and former names are desired.

Katherine T. McCollin, 1823 Arch St.

DIED, on the 9th of Fifth Month, 1889, at the residence of her mother in Fishing, Belmont County, Ohio, REBECCA, daughter of Margaret and the late Stephen Hobson, in the 30th year of her age, a member of Fishing Monthly and Particular Meeting of Friends. She was taken seriously ill when absent from home, having undertaken the care of some of the Indian children on the reservation, in care of Friends in the State of New York. Her illness was attended with much difficulty and suffering; and she rejected to meet and mingle with her beloved family in the home circle, it was evident to her physician and friends that but a few months at most would be allotted her in this life. Her sufferings were very severe at times, which she endured without a murmur; and, realizing the fatal character of her disease, her patience under suffering, and calmness in view of her approaching dissolution were very remarkable to those about her. Though of a cheerful disposition, she was very despondent in her last days, and during her sickness refused to eat, and the great pain which she experienced no light or frivolous conversation was wished no light or frivolous conversation was wished. The evening before her decease, she felt the time had come to speak to her family; desiring the forgiveness of all, and was favored to impart much good counsel to them, for whom she felt a strong and tender affection. Her last words were, "I have taken care of me." We trust, through the redeeming love and mercy of our Heavenly Father, she is gathered to one of the many mansions prepared for those who look unto and trust in Him.

—, at her residence of her son-in-law, Samuel Embree, near Springville, Iowa, REBECCA, widow of the late Israel Heald, in the 77th year of her age, a member of Hickory Grove Monthly Meeting of Friends, Iowa. After a suffering illness of fourteen weeks' duration, she passed quietly away on the 29th of Eleventh Month, 1889. Her last words were favored to say, "Thy will not mine be done."

—, at her residence in Medford, N. J., Twelfth Mo. 12th, 1889, MARIA ELIZABETH REEVE, only surviving daughter of Maria S. Reeve and the late Josiah Heald, in the 62nd year of her age. She had long since had a renewed call to her preparation to meet her heavenly home at the time of his coming. Her illness was short and severe, and through the infinite mercy of God in Christ Jesus, her heart was touched by his Heavenly finger, producing strong convictions, saying, "I have not lived the religious life I should have done—I have done nothing for Jesus. Oh I am so sorry so sorry," &c. Great exercises and conflicts were her portion, that she might know a full repentance, pardon, and through cleansing from sin in the precious blood

of Jesus; and as she entered the dark valley she was mercifully favored to feel a living, sustaining hope to arise in her soul, that her earnest prayers for mercy would be answered—saying, "I think I shall be saved but I don't want to be saved." "I most earnestly hold of the hem of his garment." "Yes, death stings, but I am not afraid to die! Oh no! not one bit afraid." "The grave is cold but it has no terrors for me," &c. After taking a most affectionate leave of her weeping Christian friends, she was, in great calmness she gave directions for her funeral, and then exclaimed, "Now, dear Lord, not one more worldly thought! Come! Oh come take me quick! fold me in Thy arms! Let my dying lips praise Thee;" and as long as she could articulate "mercy was the theme. And as she was laid in the earth, she was, with a loud shout, bosom, she left us, and we reverently believe, through the washing of regeneration has been permitted to unite with those who have gone before, and who now surround the throne in singing hallelujah, "blessing and honor and glory, thanksgiving and power and might be unto our God forever and forever. Amen."

—, on the 17th of Twelfth Month, 1889, at the house of his son, Ole P. Tjossem, near Paulina, O'Brien County, Iowa, PETER TJOSEM, in the 75th year of her age, a member of Stanger Monthly Meeting of Friends, Marshall Co., Iowa.

—, on the 19th of First Month, 1890, RACHEL E. WORMALD, wife of Isaac Wormald, aged 70 years 10 months 10 days, at her residence, where she was a member of Hickory Grove Monthly and Particular Meeting of Friends, Iowa, and faithful in the line of her duty. From early childhood she was fond of reading the writings of Friends and other religious books, and was truly regarded as a mother in the Church. She was married to her husband, Isaac Wormald, in the 17th of the time with great suffering, which she bore with much patience—satisfying and instructive to those who waited on her. During the latter part of her illness she had considered to say to the members of her Church, "I have lived through weakness it was difficult to be understood; but on one occasion she said to her dear Lord, her Saviour thus: "Thou knowest what is required of me, thou knowest what I need; fit and prepare me to partake of thy grace, is what I most crave." She passed very quietly away, leaving her surviving friends a precious and a true blessing, and a number of the many mansions prepared for the righteous.

—, at his residence, near Viola, Linn Co., Iowa, on the morning of the 31st of First Mo. 1890, JOSEPH BATEY, in the 93rd year of his age, a member of Hopewell Particular and Springville Monthly Meeting of Friends. Through the various turnings and windings of Divine providence, he was a member of the Society during the present century, that friend stood firmly attached to our ancient doctrines and testimonies, satisfactorily filling the station of elder for nearly twenty years, previous to his removal to Iowa. During his long sessions, he was enabled, through the workings of Divine grace, to so far overcome them, as to be an example of humility, quietness and meekness. His last illness (which was short) was borne with becoming patience; and we trust, as a shock corn fully ripe cometh in, in his season, so through reverence and respect, he has gathered to the garner of everlasting rest and peace.

—, Second Month 4th, 1890, at her late residence, REBECCA J. wife of John S. Stokes, in the 70th year of her age, a member of Philadelphia Monthly Meeting of Friends for the Northern District. During her protracted sickness she was a striking example of Christian patience and resignation, often saying, "I have no will in this matter, but leave it to Him who seeth the end from the beginning, and I have not put off the all-important work until now." "I have felt my mission to give, as it were, a cup of cold water to the thirsty, to love and serve the Lord." After expressing a desire for the preservation of her husband and son she said, "Don't hold me, for the day breaketh, frequently alluding to the passage, "I know in whom I have believed, I know that my Redeemer liveth, and because He lives I shall live also." A few weeks before her decease she calmly bade her husband and son farewell; that she was ready to meet her heavenly home without any emotion quietly passed from works to rewards, leaving many evidences that through adorable love and mercy she has entered into everlasting rest and peace.

—, on the 11th of First Month, 1890, SARAH PENNELL, widow of the late Abraham Pennell, in the 86th year of her age, a member of the Springville Monthly, and West Chester Preparative Meeting of Friends, Pa.

FOR "THE FRIEND."

Incidents and Reflections.—No. 211.

TRUST IN GOD'S CARE, COMFORT IN TRIAL.

In conversation a few years since with a valued friend, who on one occasion had crossed the Atlantic Ocean, he gave me a description of his feelings on that occasion. He had had a great dread of an ocean passage, but before he left home he was favored, as he believed, with a Divine assurance that he would be protected and carried across in safety. So strong was his faith in the Divine promise, that, although the voyage was long and stormy, his confidence never failed. The mighty ship was tossed like a cork on the waves; and when rolling in the trough of the sea, the yards would seem to touch the waves, as if the vessel could not recover itself; but all this was to him a source of enjoyment, from the sense of safety with which he was favored; and he would sleep with the composure of an infant. He remembered the language of the Psalmist, "They that go down into the sea in ships; that do business in the great waters; these see the works of the Lord, and his wonders in the deep."

The servants of the Lord are at times favored with a sense of his supporting presence strengthening them for the spiritual conflicts they may be called upon to endure, as well as giving them courage to meet with outward dangers. Stephen Grellet says that when in North Carolina on a religious visit, in 1800, "I had gone into the woods, which are there, mostly, of very lofty and large pines; and my mind being inwardly rebelled before the Lord, He was pleased so to reveal his love to me, through his blessed Son, my Saviour, that my many fears and doubts were at that time removed, my soul's wounds were healed; my mourning was turned into joy. He clothed me with the garment of praise instead of the spirit of heaviness, and He strengthened me to offer up myself again freely to Him and to his service for my whole life. 'Surely,' said I, 'every labor, every trial, yea the bitterness and the gall I have so often partaken of, are but a trifle compared to the joys felt in the Lord's presence, and the grateful sense of his salvation.'"

When in Ohio, in 1809, S. Grellet mentions that he travelled from Cincinnati to Waynes-

ville through a heavy rain; but he adds, "The pouring down from the clouds was but a faint simile of the streams of heavenly love and life in which, during the ride this day, I was immersed, even as into the ocean of everlasting love; thus, this evening, notwithstanding the exposure and fatigue, I feel greatly refreshed."

Very similar to the above is an entry made in S. G.'s Journal, in 1819, at Koursk in Russia, "We travelled all night from Orlow, here; yet, on our arrival, we felt fresh in our bodies and in our spirits; for, on the road, our souls were prostrated before the Lord, who is a covenant-keeping God; we were sensible of the fulfilment of his promise, 'My presence shall go with thee, and I will give thee rest.' Under the feeling of the Lord's presence, how clear, how precious is the sense of his watchful care and mercy over us! What refreshings also flow from his holy presence!"

Sometimes the Lord is pleased to administer comfort to his servants in times of trial, through the impressions He makes on the minds of their friends. An instance of this occurred in the experience of William Kennard, a minister in the Society of Friends who resided near Barnesville, Ohio; who some years ago paid a religious visit in this section of country. Whilst in Chester County, Pennsylvania, he received intelligence from home that his son Eli was very ill, and was not expected to recover. A meeting had been appointed for William at Kennard; and he thought it would be right for him to fulfil his engagement by attending it; designing, when it was over, to decide whether to turn his face homeward or not.

After meeting, as he was standing among the Friends, Sidney Temple, a valuable Friend residing in that vicinity, came to him and said, "Thy son is better." He gazed earnestly at her, scarcely knowing how to accept the message; for, as he had not spoken of his family in that neighborhood, he did not suppose she knew that he had a son, or had any knowledge of his illness, or present condition. Seeing his earnest gaze, she qualified her assertion by adding, that she believed it was so.

Subsequently he learned, that, on that very day, the disease took a favorable turn, and his son began to mend.

This incident was narrated to me, when in Ohio in 1883; by this son, who has since deceased.

Even outward objects have been made the medium in the Lord's hands of conveying instruction, comfort and encouragement. When Mungo Park was making his explorations in Africa, and was much discouraged by want and suffering, his eye lighted upon a piece of moss, whose beauty attracted his attention. The thought arose, that the same Divine Power which had clothed it with so much of grace, was able to care for him in his distress. His faith was revived, and he was encouraged to struggle on.

"Somewhat analogous to this was the experience of a missionary. His field was isolated

and trying, and Satan made frequent onsets upon his faith. At first he loved his work, with all its trials, and was happy in it; but this change of feeling came, and he grew more and more miserable. He came to think that, after all, there might be no truth in what he had been believing and teaching. He had doubts about the truth of the Bible, and questioned, at times, if there were a God at all who made the world and all things. Still he went on with his work, though utterly unfitted for it. While riding on horseback, one day, to preach, and struggling with these intruded doubts, his way lay along a thickly shaded path. It was the autumn time, and a beautiful leaf attracted his attention as it came tumbling down from his branch and alighted upon the pommel of his saddle. He picked it up, looked it over, and turned it round admiringly in the sun again and again, as the beams stole quietly through the trees. How delicate its veining, and what a marvellous lace-work of beauty he saw in it; and he involuntarily exclaimed: 'Yes! that little leaf tells me there is a God; for none but a wise, good, merciful, and powerful God could have made a leaf like that. And he went on his way, having regained the old, sweet joy.'

Our Saviour cautioned his disciples against being unduly anxious about the future, because, as He told them, "Sufficient unto the day is the evil thereof." Do not the excessive forebodings in which some indulge manifest a want of practical faith in the goodness and protecting care of our Father in heaven? We know well enough that a portion of trial and suffering awaits us all, and it is right to exercise sufficient forethought and prudence to guard against so much of these as are within our control; but when that is done, it is a great favor to be enabled to exercise a cheerful trust that the Lord, who doeth all things well, will shield his servants from evil, so far as is consistent with his wise purposes; and will make those afflictions which befall them "work together for their good."

A pleasant anecdote is told of a woman who had met with a serious accident which necessitated a very painful surgical operation and many months' confinement to her bed. When the physician had finished his work and was about taking his leave, the patient asked, "Doctor, how long shall I have to lie here, helpless?" "Oh, only one day at a time," was the cheery answer; and the poor sufferer was not only comforted for the moment, but many times during the succeeding weary weeks did the thought, "Only one day at a time," come back, with its quieting influence.

Dr. Chamberlain, when laboring as a missionary in India, was brought into a situation of much peril. He related the circumstance after his return to America, at a public meeting held in New York city.

"While upon a tour, which lasted five months, he found himself overtaken by the rainy season and on the outskirts of the jungle. He applied

to the authorities for forty coolies or bearers. They were furnished, with a guard to prevent the others from forsaking him. They had not proceeded far before both guard and coolies ran away rather than face the terrors of the jungle at that season.

"Proceeding as best he could to the nearest station of the province, he demanded assistance. The Governor said 'no' with emphasis, adding that not a man could be obtained to enter the dreaded jungle, where the ground was covered with water, where lurked the fever and the man-eating tigers, more ravenous than usual since the flocks upon which they preyed had been driven to the uplands. The Doctor showed to the Governor a firman compelling everyone, under severe penalties for disobedience, to assist him all he needed. Under this pressure forty-four coolies were obtained. The coolies were paid full wages in advance, with the promise of as much more at the end of the journey. Their objective point was the foot of a cataract about sixty miles distant, where they expected to find a boat on which they might float down the river. Above the cataract not a boat could be found, and the river had overflowed its bank. All day they waded in the jungle under alternations of heavy showers and a broiling, sickening sun. Toward evening the Doctor met two hunters, and were now running to reach (if possible) before nightfall the highlands. In answer to questions the Doctor was told there was not a hill, not even a hillock, on which he could spread his tents for the night—nothing but water, water, and endless stretches of it, like that they were splashing through. What could he do for himself and the band that looked to him for leadership? Nothing. Where on earth could he find the means of reaching the cataract and boat? Nowhere. Must they then all perish?

"In this extremity the Doctor, on the bank of his river, prayed to God, saying in substance, 'O, Lord, I am helpless to extricate myself from this dangerous situation. Be pleased to show me where I am to go?' Immediately an answer came, as distinctly pronounced in the ear of his soul as ever any words were spoken to the ear of his body, 'Turn to the left, go to the river and you will find that which you need.' Immediately he consulted his guides, who assured him of the folly of proceeding in the direction indicated. Then came the voice the second time, repeating the direction first given. Consulting the guides again he was told that the river had overflowed its banks, and it was impossible that a rescue could come from that quarter. For the third time the voice came, saying, 'Turn to the left, proceed to the river and you will find that which you need.'

"Then, as master in command of the company, he gave the order to turn to the left, and coming to the river—what did he see? The very thing he needed most—a large flat boat, and in it two boatmen, who, mistaking him for an English officer, began to apologize for the boat's appearance in such a strange spot. They said the flood in the river had loosened the boat from its moorings, and that despite their efforts to the contrary it persisted in floating to the spot where it was found.

"Dr. Chamberlain, armed with authority from the English Government, took possession of the boat, which he found just broad enough to allow the spreading of his tent, under which they safely rested that night undisturbed by the hungry tigers, who were heard howling in the jungle. The next morning they began floating down the

river, and continued floating until they came to the next cataract, where they found another boat, and with it relief from all anxiety."

J. W.

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 227.)

After remaining two years as a tenant, and passing through sundry trials, my father gave me a house and lot in Mount Holly, wherunto I removed. Here at that time were several babes in Christ, and some fathers; namely, our valuable Friends, John Woolman, Josiah White, and William Jones. These were men of experience; several others, at times, spoke a few words in our religious assemblies, of whom I was one of the hindermost; for to me it appeared almost like death to give up in obedience to that intimation, which I believed required me to speak in that way. As it was desired that the old inhabitants should be subdued before Israel were settled in the promised land, so man, and must be removed out of the heart of man, and that cleansed, before the holy One should descend to make use thereof as a temple to dwell in. I had foresight, in that which might be called a time of prosperity, that I should have a lonely way, if not almost an untrodden path to walk in, if I was strictly obedient to what I believed would be required of me.

1757. In this year I removed to a house and lot which I purchased near to John Woolman's dwelling. It appeared as much as I could do to keep my head above water. The current of wickedness and corruption seemed to be strong, and I, like a little vessel easily tossed or driven, if the anchor-hold of faith should fail; yet some of us at seasons, as tried children of our heavenly Father's family, could feelingly speak one to another of his goodness in plucking us as brands from the burning; having been as the offscouring of all things, this seemed similar to my case in particular.

I wanted now to be what the Lord would have me to be, and to become in all things conformable; in order wherunto, however hard to flesh and blood, I found my own honor must be laid low; and the creaturely will, which would plead for a little liberty in this and that, must be subdued; for I saw that to love both the world and my holy Redeemer was as impossible as for a camel to go through a needle's eye. This excluded busy self from acting at all relating to the things of God. That to be born of believing parents will not do any more than formerly to be of Abraham's seed, without doing the works of Abraham. That I must serve God for myself, and that through the immediate influence and aid of his Spirit within me. That neither education nor tradition would avail in his sight; but that all "things must become new, and all things be of God." And although I had embarked for the land of promise, my trials appeared like "The Red Sea before me, and the Egyptian army behind;" my enemies within, and those who were without, caused me to fear lest I should some day bring a reproach on the blessed Truth, and so, perhaps I had better never to have set out.

Thus, for some years, I seemed as one struggling in the wilderness of the world; yet at times was graciously permitted to partake a little of the hidden manna, which kept my soul alive unto God, and enabled me to love the brethren. I had to believe my Saviour was often nearer to me than I was aware of, even in the hour of temptation, preserving me as out of the hands of

those who watched for my halting. Are not those who are as instruments of our adversary, one in nature with himself, and seem permitted to check the growth of the good seed, by striving to turn the righteous on the right way?

A sense of a disposition in some like this was very trying to me, who had but newly embarked in what I believed to be the cause of the Lord. I could scarcely reconcile myself to become a minister, as it seemed to be like taking me out of my element, and like poor Jonah, causing me to be plunged into the deep. To think of preaching to those with whom I once had rioted in folly, seemed to be like death. I also dreaded the consequence of giving out, or finching, lest in his displeasure, because of further disobedience to my God, He should cause a final separation from his favor; this I believed would be terrible in the day of account; which made me willing to endeavor to stand to his cause if his holy help was granted, however discouraging some things might appear to me—a final separation sighted creature. Without Divine assistance I knew I could do nothing to advance the Lord's cause, or procure peace to my own mind.

In 1759, I came to live within the compass of Haddonfield Meeting, with the full unity of my friends at Mount Holly, and believe I was favored to keep on my way Zionward. When the Lord puts forth His goeth before, fighting the battles of his dear servants to his own honor and their benefit. I was recommended to the next Quarterly Meeting as a minister, but thought myself very unequal to the weighty business of bearing. I should some day drop off. The Lord dealt with me in a way much hidden from me, in putting a trumpet to my lips (if I may so compare it) like a ram's horn, and (as it were) compelling me to blow the same, though seeming at the loss of all my worldly honor. Yet I may truly acknowledge, as I have endeavored to be faithful to the best of my understanding, He hath rewarded me an hundred fold. Therefore let all be encouraged to serve the Lord their Redeemer honestly; surely, for his abundant mercies, He is eternally worthy, saith my soul,—Amen.

In the year 1761, I purchased a farm, and removed within the compass of Newtown Township, nearly opposite to the city of Philadelphia. Still meeting with discouragements, both within and without. I was reputed a minister, yet not as one that used enticing words; believing the demonstration of the Spirit, (if I was not mistaken) led me to use plain dealing. With other exercised brethren, I became engaged to plead for liberty to the black people who were held in the bonds of slavery, amongst our fellow members; and from house to house we visited those who held such, particularly in the parts near us. This business at that time went hard with some, who thought it would cause uneasiness between them and their black servants, so would scarcely permit us to perform the visit. I saw it was the Lord's work, and that in performing it we had need be as "wise as serpents, and harmless as doves." Truth opened our way to proceed much in this manner, viz: To sit down in silence with the whole family; not to let our communications give the blacks any knowledge of our business with those who held them; but when the other parts of a family withdrew, we pleaded with the master and mistress; the Truth favoring us to do it in a way that gave general satisfaction. I thought I never felt a greater reward than in pleading the cause of those poor, injured, captive people.

Another trial after this came on. It seemed

FOR "THE FRIEND."

Historical Notes, Respecting the Society of Friends.—No. 4.

Among the sects which arose in England during the religious excitements of the seventeenth century, were the Ranters, who appeared about the year 1640. William Penn says of them: "They interpreted Christ's fulfilling of the law for us to be, a *discharging for us* from any obligation and duty the law require of us; instead of the condemnation of the law for sin past, upon faith and repentance; and that now it was no sin to do that which before it was a sin to commit—the slavish fear of the law being taken off by Christ; and all things good that man did, if he did but do them with the mind and persuasion that it *was so*; inasmuch that divers fell into gross and enormous practices—pretending, in excuse thereof, that they could without evil commit the same act which was sin in another to do." This, he adds, "was to make sin *superabound* by the abundances of grace, and to turn from the grace of God into wantonness; as if Christ came not to save us from our sins, but in our sins; not to take away sin, but that we might sin more freely at his cost, and with less danger to ourselves. I say, this ensnared divers, and brought them to an utter and lamentable loss as to their eternal state; and they grew very troublesome to the better sort of people, and furnished the looser with an occasion to profane."

These Ranters, William Penn says, "were the reverse to the Quakers (for they feared and quaked at nothing, but made a mock at fearing of God, and at sin, and at hell) who pretended that love made fear needless, and that nothing was sin but to them that thought it so; and that none should be damned at last; whose extravagant practices exactly corresponded with their evil principles." Yet, he adds, "Some ignorantly, and too many maliciously, involved us and ours with them; and many of their exorbitances were thereby placed to our account, though without the least reason, truth or justice."

Friends often came into contact with these wild people. In 1649, George Fox visited some of them who were in prison at Coventry; they began "to rant, vapor and blaspheme it which," he says, "my soul was greatly grieved." After showing them that the Scripture texts they adduced in support of their pretensions made nothing for their purpose, he reproved them for their blasphemous expressions, and went away.

In 1651, his Journal states, he visited a people at Cleveland, that had tasted of the power of God, but were then shattered to pieces and turned Ranters. His message unto them from the Lord was, "that they should all come together again, and wait to feel the Lord's power and spirit in themselves; to gather them to Christ, that they might be taught of Him." He adds, "Most of the people were convinced, and received God's everlasting truth, and continue a meeting to this day, sitting under the teaching of the Lord Jesus Christ, their Saviour."

In 1654, he met with many Ranters, "in the Peak-country." He reproved them for swearing. "The Word of life was fully and richly preached, and many were convinced that day."

At Reading, some of the Ranters entered into dispute, and contended that God made the Devil. This was in accordance with the doctrine, which a temperate writer of that time says they hold—that "there is but One Spirit

in the world, and those names of Good Spirit, and Bad Spirit, are mere searcrows." In reply, George Fox tells them, that God made all things good, and that Satan became a devil by going out of the truth.

The Ranters some-times came into Friends' Meetings, and made much disturbance, "singing and dancing in a rude manner." When William Edmondson was visiting the meetings in New Jersey, he says, "one Edward Tariff came into the meeting with his face blacked, and said it was his justification and sanctification; also sung and danced, and came to me, where I was sitting, waiting on the Lord, and called me old rotten priest, saying, I had lost the power of God; but the Lord's power filled my heart, and his word was powerful and sharp in my heart and tongue. I told him he was mad. I looked on him in the authority of the Lord's power, and told him, I challenged him, and his god that sent him, to look me in the face one hour, or half an hour; but he was smitten, and could not look me in the face, but went out. The Lord's power, and sense of it, was over the meeting, in which I stood up, showing them how the Ranters went from it, and were bewitched by a transformed spirit into strong delusions."

When Thomas Story was travelling in Connecticut, he found reproach had been thrown upon the Society of Friends, on account of the "wild and unaccountable behaviour" of some of the Ranters, whom the people of that colony confounded with Friends. Thomas told the people that the Ranters "held absurd and blasphemous opinions; and frequently came into our meetings and rant, sing and dance, and act like madmen, throwing dust in the faces of our ministers when preaching. Though they are called Quakers and have meetings of their own, as we have, yet they have no discipline or order among them, but deny all that as carnal and formal, leaving every one to do as he pleases, without any reproof, restraint, or account to the Society in anything, how inconsistent soever with civility, morality and religion; and are in mere anarchy."

In another part of his Journal, Thomas Story mentions attending a meeting at Westbury, Long Island, where a marriage was solemnized. To this meeting some of the Ranters came. "During the greatest part of the time they were pretty still, save only an old man, who sometimes hooted like an owl, and made a ridiculous noise as his manner is. The marriage being solemnized, he stood up, and bore his testimony as he called it, against our set forms."

In 1737, John Griffith was travelling into East New Jersey, and had a meeting near Black's River. He says, "None of our Society were thereabout, but there were some Ranters, who had taken upon them the name of Quakers, to the great scandal of Friends in that remote place; they came to the meeting, being mostly women. Their impatient, restless spirits would not suffer them to let us hold our meeting quietly; yet they did not seem inclinable to contend, but rather to flatter and applaud us. But we were not free to receive their testimony, any more than Paul and Silas could that of the maid who was possessed with an evil spirit; but rebuked them openly, and publicly declared our disunity with them, desiring the people not to look upon them as belonging to the Society of the people called Quakers, as we could assure the meeting it was not so. I thought the chief service we had at that place was, to testify against those wild, frantic people."

It is evident from the notices scattered through

as if the cries of the slaves in the West India Islands reached my ears both day and night for several months; in an especial manner when I partook of things procured through their labor. At length I did believe it was required of me, not any longer to use such articles as I deemed the fruits of their toil. Many suppose that in this respect I was going too far, they thinking we might use what we bought and paid for; and were not clear of eating reflections on me for my singular conduct; but being convinced my peace was surely concerned herein, I tried in simplicity to bear all I met with in Christian patience, until many of my opposers saw it, and the testimony appeared to spread to my admiration. Sometimes in my weakness, my faith had been strengthened to believe this concern would spread through all the opposition of mankind. For the Lord as a righteous Judge, his power was over all. This helped to support me in my feeble seasons.

(To be continued.)

FOR "THE FRIEND."

Affliction.

The Psalmist says, it was good for him that he was afflicted, for "before I was afflicted, I went astray." Many no doubt can adopt the same language, and look upon affliction as a blessing in disguise, being conscious that they have learned many precious lessons in this school of Christ, that will long be remembered.

Job says, that "affliction cometh not of the dust, neither doth trouble come out of the ground," that he learned lessons when afflicted that were a great blessing to him in after life; while he had known God by the hearing of the ear, yet now nine eyes see thee, and the last days of Job were his best days; it certainly is no evidence that we have done anything bad that we have to pass through the furnace of affliction, while it may be a means to bring us to look to the true source from which availing help comes. It has been my lot to pass through considerable affliction, especially of late, for the past seven years, having been largely confined at home, yet I realize it to be amongst the all things that will work together for good, if I only let it have its proper place.

How any one can feel satisfied to neglect assembling themselves together with their friends for worship when health will permit, seems strange; all that do are certainly losers, for they neglect those means of spiritual blessings; while it is true we may hold communion with our blessed Master at home, or when our hands are occupied with our lawful calling, let the outward surroundings be what they may. I have much to be thankful for, and whether I am ever permitted again to resume active life, is hid with Him who knows the end from the beginning. As time passes on, I feel no less interest in the spread of the truth as held by this people from the beginning.

GEORGE BRIGGS.

NEW SHARON, IOWA.

"Nothing not good is wanted," was one of the maxims of an eminent English teacher. And that is a safe maxim for one in any sphere of life. Its application would rule out a great many of the follies and trifles in speech and action, which are counted admissible even though they are not deemed admirable. There is no room in this world for anything that is worthless. "Nothing not good is wanted" by one who aspires to be at his best and to do as well as he can do.—Exchange.

George Fox's Journal, that many of the Ranters were convinced of the truth of the doctrines he preached, and joined the Society of Friends.

George Whitehead mentions that, at a meeting in Norwich, in the autumn of 1654, a company of persons came in, who were in the spirit of rantism. The power and dread of the Lord God fell so weightily upon me to bear testimony against sin and wickedness, root and branch—against the lust of the flesh, the lust of the eye, the pride of life, and the love of the world, that the powerful word of the Lord pierced through the meeting, and so wonderfully struck down the spirits of those Ranters and other loose spirits, that they came to me that evening like men greatly wounded and brought down from their high floating notions of rantism, so that they questioned their salvation, which before they thought themselves secure of.

"In compassion to their poor souls, I earnestly exhorted them to bear the judgment of the Lord and his indignation, with more such necessary counsel and warning as the Lord by his light then showed me was most suitable to their conditions. The most of them were convinced of the truth, and divers of them became reformed in their lives and conversations."

Did She Answer Wisely?—A certain minister's wife was approached by one of her husband's parishioners and urged to put her shoulder to the church wheel and assist in its revolutions. As this wife was a very capable and efficient woman, and could, if she would, be a power in the church, her reply was listened to with eagerness.

"When I married Dr. Blank," said she, "I married an orphan asylum. There were children by both his former marriages, and I have children. I cannot at present attend to duties outside my family without neglecting my duties at home."

This reply occasioned considerable comment and criticism among the church members, some indorsing Mrs. Blank's view, and some condemning it, adding that "charity should begin at home," but should not end there.

Some time after this matter was discussed, a gentleman of the congregation freely volunteered his views to Mrs. Blank. "You are exactly right," said he, "my mother, as you know, has been a church member all her life, and we children—there were ten of us—never had a home; never had a mother. We had a place to stay, and food and clothing, but mother was always off attending to somebody else's family and letting her own shift for itself."

Mrs. Blank had often heard the wonder expressed that the mother of this gentleman, a saintly woman, should have been so unfortunate in her children. They were not church members, and the sons all indulged in wine-bibbing and worldly amusements. If her view as to her duty needed confirmation, which it did not, she had it in the solution of the mystery afforded by the statement of this man.

There are women of so large a mold that they can mother a whole parish and not neglect their own families. There are others whose church work must by their own limitations be confined within a narrow area. The nearest duty it is for us to do, and then the nearest to that. Otherwise we may have to lament, "Mine own vineyard have I not kept."—*Selected.*

A straight line is the shortest in morals as in mathematics.—*Maria Edgeworth.*

GOOD HOLDS US ALL.

SELECTED.

BY ADALINE H. BERRY.

"Take me, papa," said my darling,
As we stood within the hall;
So I bore him up the stairway—
Scarcely felt the burden small.

In my other hand I carried
Books I wished to scan that night,
And the elfin begged me let him
Take them in his arms so slight.

Step by step to top we mounted;
Then he said with childish pride,
"Baby carried books for papa—
Didn't he?" "Yes," I replied.

Little innocent! ne'er dreaming,
As he bore the asked-for load,
That his father's strength upheld him,
Double-burdened on the road.

God is sometimes pleased to give us
Work for wondrous skill and thought;
Gleefully we don the laurels,
When his hand the triumph wrought.

WORDLESS PRAYER.

A SONNET—BY ANNE WINSTON.

"O Lord, my Father!" so I whisper low.
"Lord God," I breathe, in prayer that asks for
much—

As sometimes, when a little child, I sought
My mother's presence in the dark to know,—
As nestlings, waking when the night winds blow,
Half utter chirp with drowsy comfort fraught,
Then sleep content—So evermore inwrought,
With heart-beats rise dumb prayers; "O Father! show
Thy face, for it is dark;"—swift, broken cries
With hands outstretched.—"Father, art thou there?"
What need have I of half-rebellious prayer,
Entreating sore for that which I love deny?
My soul would rest on his unnumbering care,
Content that weakness strength-enriched lies.

—S. S. TIMES.

"THE LORD'S AYE TO THE FORE."

BY MARGARET E. SANESTER.

'Twas a homely Scottish dame, unrecorded is her name,
And her station was as lowly as her hut of thatch
was poor;
But her step was free and light, and her brave blue
eye was bright,
For she knew in whom she trusted, and believed his
word was sure.

Heavy fog on hill and dell, icy blasts across the fell,
Sneep that perished on the moorland, did not quench
her candle's gleam.
"Though there's your trouble at the door, yet the Lord's
aye to the fore."

Was her challenge to the tempter; and he vanished
like a dream.

Were the bairnies wan and ill, "mither's" heart had
courage still;

Heavy as itself was near her cottage, and its angels
blessed her life.

Not a pang could rend her soul, but the faith that
maketh whole

Hushed the clamor, soothed the anguish, gave her
peace instead of strife.

Yes! "The Lord's aye to the fore!" Let us trust Him
evermore;

Let us lose our foolish shrinking from the future's
vague "perilage?"

Let us take Him at his word. Is He not a gracious
Lord,

Filling both our hands with treasure, heaping largesse
in our laps?

Blessings on that Scottish dame, caring naught for
worldly fame.

Humble in her, earthly station, dwelling in a cottage
poor.

With her voice so blithe and free, she has sent a song
to us;

For she knew the Lord she trusted, and believed
his covenant sure.

—S. S. TIMES.

"SUNSHINE ON THE MORROW."

SELECTED.

My mind was full of troubles wold,
And all my mind was filled with sorrow,
When, by my side, a little child
Pointed toward the sky and smiled,
And said, "The sun will shine to-morrow."

Out in the palling golden West
The rosy clouds were slowly fading,
And softly, in her hidden nest,
The mother-bird, beneath her breast,
Her callow young from ill was shading.

I looked and all my pain had flown;
Would He, who often takes thought of sparrows,
Give me, instead of bread, a stone?
Or never heed my weary moan?
Or pierce my soul with many arrows?

Ah, no! I felt that could not be;
He would not leave my soul in sorrow,
But though the present dark may be,
And filled with fear and misery,
He'll send the sunshine on the morrow.

O, weary souls! I however blank
Your lives may be, this comfort borrow;
Look ever forward, look not back,
But keep upon the homeward track,
And look for sunshine on the morrow.

—Edith Helena Cooke.

FROM "THE STUDENT."

Sroggie.

WHERE AND WHAT IT IS.

The river Delaware, running slightly to the east of south until it reaches Trenton, here bends sharply to southwest, and gradually broadens into the Delaware Bay. This point of its turning, where the head of the tide still is, marks the inland limit of the ancient glacial or post-glacial arm of the Atlantic. Below this, at an average distance of three miles inland, there runs a hill parallel to the river, in a continuous line from Bucks County into the State of Delaware. This hill, the old shore line of that pre-historic bay, separates the flat lands along the present river,—the soil whereof is largely made up of clay and pebbles,—from a hilly region of micaceous and gneissic rocks, that is comparatively uniform in general character over the whole of Delaware County. This gneissic region has been carved into a continuous succession of hills and valleys, largely through atmospheric agencies, until the term "rolling" may be more fitly applied to no land on the revolving earth.

Geologists tell us that these rocks, now so hard and so crystalline save where disintegrated on the surface, were once soft and sedimentary; nay, that at one time in the remote past, a vast mass of carboniferous and later strata were piled on top of them; that previous to the great elevation which lifted this vicinity into the region of eternal snows, and brought the great continental glacier down from the pole to within sixty miles of Philadelphia, a tertiary ocean washed over Media's hill, and dashed its foam upon the ridges of Radnor. When a sinking of the earth's crust once more brought melting snows and blooming flowers, the beach of this ocean, during that long winter elevated far into the air, was again on the level of the sea, and as the sea retreated the sand and gravel went downward through the deepening valleys of our large brooks. In truth only here and there, on the very highest ridges of our country, do we find any remnant of this red shingle of the tertiary beach.

The thickest, but by no means the most extensive, of these remnants lies to the northeast of Media, and is called Sandy Bank. It is an abrupt little hill, where is situated the reservoir, and over

which runs the original Providence Street Road, laid out in Penn's time. Across the road from the reservoir is the oldest of Pennsylvania's burying-grounds, where the dead lie three deep in tertiary sand. A short distance up this road the gravel and sand disappear. One who stands near the northern edge of this gravel and looks southward, quickly understands the reason of this disappearance. There is an open valley, with a little stream running directly into the brook called Ridley Creek, which in turn pours into the Delaware. This is the state of this ancient beach all over Delaware County. The dust of Weyll is not spread abroad more widely than are these primeval pebbles. First through little cross valleys, then through Crum and Ridley and Chester, they have gone down into the deep. The few patches that remain show by their elevation the amount of erosion that has taken place in the body of the gneissic rock. They show, further, that such little valleys as this have been cut away by water. This little valley is Scroggie.

Scroggie is a narrow vale, opening into the broad bottom of Ridley's Valley through a slightly contracted mouth. The northwest wall is remarkably cylindrical in outline, and nearly devoid of trees. The southeast wall is not so straight nor so cylindrical, and is wooded continuously with oaks and chestnuts. This bank, which looks northwest, has that flora so characteristic of northern exposures,—the broad-leaved laurel, the hepatica, the arbutus, and all that tribe that are so uniformly among these hills the watchers of the pole star and of Charles' Wain. Why the other bank has been so long devoid of arbutus but pastureage has never been to me entirely clear. These opposing banks are nearly one hundred feet in height, and run in parallel lines for the distance of half a mile. At the upper end the integrity of the valley is lost in a number of branches, the hills of which are thickly wooded. Down the branches come rills of spring water, uniting to form Scroggie stream.

As has been already implied, this valley extends northeast and southwest. It is to be added that, although it is merged into the valley of Ridley, a continuation of it in the same line leads from the west bank of Ridley by easy ascent to the heights of Elwyn. This Elwyn valley is broader at top and narrower at bottom than Scroggie. Nevertheless, Scroggie and Elwyn valleys are one. Scroggie stream meets Elwyn stream face to face at Ridley Brook. A right line down Scroggie, if produced, arrives at the top of Elwyn valley. Here, then, is a line of erosion in the body of this gneissic rock, cutting the valley of Ridley at something less than a right angle.

Not only is Scroggie typical of a system of valleys; this double valley is also typical. Lines of erosion roughly parallel to this are found in great numbers both up and down the course of Ridley.

It is significant that Chester Valley is practically parallel to the nearest mountain range to the northwest, as well as to the Atlantic coastline, and to the hill-terrace that marks the ancient limit of salt water in Delaware County. These are all nearly parallel to Scroggie and Elwyn valleys, and to their numerous and nameless neighbors. These are the more noticeable features of the surface. But there are smaller, yet significant symptoms that show the inveteracy of this strange disease of the country side. In the great quarries of Avondale, the quarren who cut off slabs of gneiss that go to make curbing for the cities, find

curious feldspar veins running through the body of the rock. The smaller veins extend in every direction, and are nothing to the purpose. The larger, which vary from a few inches to six feet in thickness, are generally vertical, or nearly so, and very generally run in the same northeast and southwest direction. Now, these veins are ancient fissures in the rocks, filled up with quartz and feldspar, with tourmaline, mica garnet and beryl, by infiltrations of solutions of rock constituents. It is supposed that these cracks were produced by a giving way of the body of strata when the pressure under which they had been was removed. They are similar to faults, which consist of cracks and slippings of the rocks at right angles to the direction in which the force or pressure was exerted. Now, there is yet another sort of crack in our rocks which has this same northeast and southwest direction, parallel to Chester Valley, to the mountains, and to the feldspar veins. These are the trap dykes of Radnor and Springfield. A trap dyke is a crack similar to the feldspar vein, but running so deeply into the molten earth that the liquid rocks below came rushing up and hardened. All this parallelism points to a common origin. The force that made faults was the force that pushed up mountains. It was the pressure of the accumulating sediment off the coast, at a period when a weakness of the strata in the Alleghanies caused a giving way and a folding and twisting of this whole region. In one place a little crack would be made, which opened when the hot rocks cooled. This is our feldspar vein. At another the crack extended to the melted region below, and this is the trap dyke. At another place the crack neither extended deep enough to be filled with lava, nor became filled by percolation with the silicates that make the feldspar, the mica and the garnet. Such a crack might soon become filled with rubbish, but it would be a weak place where water could do its cutting to advantage. So it was that Scroggie was made possible. It was this that caused these lines of erosion to cut Ridley valley at an acute angle, and finally for troughs through which rolled the pebbles of the tertiary beach into Ridley Brook, and down which still trickle a score of rills from a hundred hillside springs. The rough corners of the rock became rounded under the influence of water and various other agencies, until in the course of centuries the beautiful result was obtained. I have elsewhere called our hills the smaller brothers of the mountains. It is no mere figure of speech. The promise of Scroggie Ridge was given in the day when the face of Pennsylvania was wrinkled into mountains.

T. C. PALMER.

The Child and the Lion.—John Campbell, relates a singular escape of a Bushman child from being devoured by a lion. The child was only four years of age, and was sleeping beside its parents, in a half open hut. About midnight the child awoke, and sat by a dull fire. The father happening to awake about the same time, looked at his child, and while looking, a lion came to the opposite side of the fire. The child, ignorant of its danger, was not afraid, but spoke to it, and sportingly threw live cinders at it, on which the lion snarled, and approached nearer, when the child seized a burning stick, and playfully thrust it into its mouth, when the lion scampered off as fast as it could run. The father witnessed all this, but was afraid to interfere, lest he should have been torn to pieces by the ferocious animal.—*Archie's Cyclopaedia.*

For "The Friend."

The Fulness of the Godhead.

Colossians II. 9.

When Christ came outwardly among men, He took not on Him the nature of angels, but the seed of Abraham, and came in the form of a servant, that his humanity might experimentally know how to succor them that are tempted. So He became a man of sorrow and acquainted with grief. And his humanity was touched with a feeling of our infirmities, and was tempted as we are, but was never overcome, like we often are, because in Him dwelt all the fulness of the Godhead bodily; so sin could not enter. And of his fulness we all have received a measure. And this measure is increased in proportion to our diligence and obedience in using what we already have. It is like the parable of the talents in Matthew. They were given in a twofold amount to fill the place of the talents that had been used—like grace for grace—and accompanied by the Master with the consoling language of "well done, good and faithful servant, thou hast been faithful over a few things, I will make thee ruler over many things; I enter thee into the joy of thy lord;"—while the negligent and disobedient were sentenced to the punishment and discomfiture from the presence of the Lord and the glory of his power; and to realize while here that tribulation and anguish are often the portion of every soul that sinneth. For the way of the transgressor is often hard.

But all who live godly in Christ Jesus often suffer persecution and experience that many are the afflictions of the righteous; yet they find, by patient continuance in well-doing, that the Lord is over them in their good, and that He, in his fulness, will in due time deliver them from all. So the deliverance is not of man, but from all. So the deliverance is of Him, in whom we live and move and have our being; and who is head over all things unto his Church. And of his fulness we all have received—and grace for grace—and by obedience to the measure which we have received, and which will be renewedly supplied as we use what we have, we shall be preserved from falling a prey to the snares of the enemy. But in this world we are to have tribulation, to try our fidelity. Paul, as dedicated a servant of the Lord as he was, and who had received so large a portion, or measure of the fulness of God, found it needful for him to have something which he compared to a thorn in the flesh, or, the messenger of Satan, to buffet him, lest he should be exalted above measure, through the abundant revelations which he had. For he was a chosen vessel of the Lord; and required a large measure of his fulness, both in purging and in blessing, to qualify him to go among the gentiles, and to turn them from darkness to light and from the power that Satan had over them, to the power of God. But when Paul sought to God to be released from the buffetings of Satan and from the severity of his sufferings, the answer of God to him was, My grace is sufficient for thee. So he gladly submitted to his infirmities, that the power of Christ might rest upon him. Then, he says, he took pleasure in reproaches and persecutions and distress, for Christ's sake; for, he found that, when he was weak in the flesh, he became strong in the Lord, as he partook more largely of his fulness. For he learned both how to abound and how to suffer want; how to be full and how to be hungry; and that, in whatever state he was, therewith to be content. For he seek-

oned that the sufferings of this present life were not worthy to be compared to the glory that would be revealed hereafter. For the things that are seen while here below, are temporal and of short duration, while the things that are not seen, are eternal. So he, near his last, could say, "I have fought a good fight, I have kept the faith," &c. So he knew there was a crown of righteousness awaiting, not only him, but also all that love his appearing—both when He comes as a Comforter and a Refiner with fire. So we must love the baptism of the Holy Ghost, and also of fire.

So now, my aged fellow-travellers, as well as those in the younger walks of life, let us hold fast the profession of our faith without wavering: for faithful is He that has promised. And

"There is a power amidst each sinking scene,
Can keep the soul unshaken and serene;
Can sweeten every prospect to the taste,
And make amends for all that time can waste;
Can reach with irresistible control
Through nature's finest feelings to the soul:
Make manifest what'er is wrong or right,
And shine, the just man's everburning light."
To this great power, my readers, I commend
Our comfort now, and glory in the end.

D. H.

DUBLIN, Isth, First Mo. 17th, 1890.

Watch Dials.—In numbering the hours on the dial-plates of clocks and watches, it is the general custom to mark them with four 1's instead of IV, as usual elsewhere. The *Christian Advocate* gives the following explanation of the origin of this custom:

"The first clock, made in 1370, was made by Henry Vick for Charles V., of France, who was called 'The Wise.' The title may have been deserved so far as his being a wise ruler was concerned, but certainly he was not 'wise' in book-learning, and yet was anxious to be so considered.

"When the clock was brought to him he wanted to find fault with it, for he fancied, as a good many people do in these days, that to criticise a thing shows great learning and shrewdness. Now, Charles V did not understand all the wheels and machinery of the clock, but the figures on the dial he could comprehend—and so said, condescendingly to Mr. Vick:

"Yes, the clock works well enough, but the figures on the dial are wrong; where you have IV it should be four 1's."

"Your Majesty is wrong!" said Vick.

"I am never wrong!" thundered the king.

"Take it away and correct the mistake."
"Corrected" it had to be, and from that time till now the 4 of a clock or watch has been IIII instead of IV—a lasting monument to the ignorance of 'Charles the Wise.'"

Natural History, Science, &c.

Collecting Insects in China.—The children in the different villages were found of the greatest use in assisting me to form these collections, and the common copper coin of the country is well adapted for such purposes. One hundred of this coin is only worth about four-pence, half-penny of our money, and goes a long way with the little urchins. A circumstance connected with transactions of this kind occurred one day, which appears so laughable that I must relate it. As I went out on my daily rambles, I told all the little fellows I met that I would return in the evening to the place where my boat was moored, and if they brought me any rare insects there, I would pay them for them. In the

evening, when I returned and caught a glimpse of my boat, I was surprised to see the banks of the stream crowded with a multitude of people of all ages and sizes, old women and young ones, men and boys, and infants in arms, were huddled together upon the bank, and apparently waiting for my return. At first I was afraid something of a serious nature had happened, but as I came nearer I observed them laughing and talking good-humoredly, and guessed from this that nothing had gone wrong. Some had baskets, others wooden basins, others, again, hollow bamboo tubes, and the vessels they carried were as various in appearance as the motley group which now stood before me. "Ma jing! ma jing!" (buy insects! buy insects!) was now shouted out to me by a hundred voices, and I saw the whole matter clearly explained. It was the old story—"I was collecting insects for medicine,"—and they had come to sell them by the ounce or pound. I had unintentionally raised the population of the adjoining villages about my ears; but, having done so, I determined to take matters as coolly as possible, and endeavor either to amuse or pacify the mob. On examining the various baskets and other vessels which were eagerly opened for my inspection, what a sight was presented to my view! Butterflies, beetles, dragonflies, bees-legs, wings, scales, antennæ—all broken and mixed up in wild confusion. I endeavored to explain to the good people that my objects were quite misunderstood, and that such masses of broken insects were utterly useless to me. "What did it signify?—they were only for medicine, and would have to be broken up, at any rate." What, with joking and reasoning with them, I got out of the business pretty well.

As in all cases, I found the women most clamorous and most difficult to deal with; but by showing some liberality in my donations of cash to the old women and the very young children, I gradually rose in their estimation, and at last, it being nearly dark, we parted the best of friends.—*Fortune's Travels in China.*

Depopulation of France.—The "Depopulation of France" is the title of a recent article by the Protestant pastor, Alexander Chouillet, in a prominent French journal. Unfortunately for that fair land, the facts advanced are as true and sad as the title is sensational. The burden of the article is, that in proportion to the nations surrounding France, that country is receding constantly and remarkably in point of population. While one hundred years ago, at the time when the revolution took place, the centennial of which has been celebrated with so much *revel*, France in population and power stood at the head of the European family of peoples; the danger now is, that through a lack of increase in population, France may in the few years become a second-rate power.

The further fact that the French are a home-loving people, have lost but a small contingent through emigration, participating even less than Italy in the recent emigration of the Latin people of Southern Europe particularly to South America, makes this status all the more a singular social and political problem.

Chouillet draws attention to the startling data that a century ago France had a population of thirty millions, Germany of only twenty-six, Russia of twenty-five, England of twelve. Now, France has been surpassed by all these nations, having increased her population only thirty-three per cent., while England has increased hers by three hundred, Russia by four hundred,

Germany by two hundred. The writer declares that the matter is becoming one of life and death for the French people, noting especially the fact that the hereditary enemy across the Rhine increases by five hundred thousand more each year than does France, where the average number of children to a family is only three—while in Germany it is five. Indeed, the deplorable two-child system which is becoming more and more in vogue in France, is undermining its morality and family life. There has been a steady decrease in the number of children born in recent years, the statistics for the years 1884 to 1888 being 937,758; 924,558; 912,880; 890,333, and 882,639, respectively.

The Government is not blind to these significant data, and among other measures has recently enacted that all families having seven children shall be exempted from the chattel taxes. Four years ago the Government also decided to revise an old law according to which the State offers to pay for the education of all children where they number more than six in a family. In both cases the number seven was taken because this was at the basis of a former law proposed by Colbert. The latest official family statistics are these: 248,188 families with seven children; 313,400 with six children; 549,683 with five children; 936,653 with four children; 1,512,054 with three children; 2,265,317 with two children; 2,512,612 with one child, and 2,073,205 with no children. Accordingly, almost one-half of the families of France have either no children or only one.

A Fire Land.—The poor fishermen who wish to leave the Island of Iceland from a chronic lack of fuel, should be permitted to settle on the shores of the Caspian, where combustible minerals are as free as water and air. On the road from Tiflis to Baku large beds of cannel coal crop out on every hillside, besides naphtha, bituminous pitch and a material resembling the scum of our petroleum refineries. A peasant, wishing to amend the winter temperature of his cabin, never dreams of applying to a coal merchant, but just starts his cart and in half an hour returns with fuel enough to last his good-wife half a week.

Muscular Development.—Several years ago an artist of Dresden persuaded a locksmith there to give up his trade and become an artist's model. It was a good thing for the locksmith, who is now the famous "muscle man of Dresden," whose magnificently developed body makes him probably the most renowned model in the world. In order to preserve for future artists an exact duplicate of his extraordinary figure, the director of the Royal Saxon Porzellan-fabrik, at Meissen, recently invited him there, that a cast from life might be taken of the upper part of his body. It is said that "his muscular development is so complete and detailed that even the least and slightest cord of every muscle stands forth prominently, and his whole body looks as if it were woven together or plaited like basket-work. His muscles have such a hardness, that they feel to the touch as if they were carved in wood.

Light the Sick Room.—Dr. B. W. Richardson, in his lecture on "Disease, and How to Combat It," speaks of the custom, which in spite of modern sanitary teaching still prevails, of keeping the occupant of a sick room at all hours in a darkened room. There is nothing, he says, so bad as a dark sick room; it is as if the attendants were anticipating the death of the patient, and, if the reason is asked for, it is

as inconsistent as the act. The reason usually offered is, that the patient cannot bear the light; as though the light could not be cut off from the patient by a curtain or screen, and as though to darken one part of the room it were necessary to darken the whole of it. The real reason is an old superstitious practice connected with small-pox and other terrible diseases, which involved the exclusion of light. A more injurious practice really could not be maintained than that of darkness in the sick room. It is not only that dirt and disorder are the results of darkness—a great remedy is lost. Sunlight is the remedy lost—and the loss is momentous. Sunlight diffuses through a room and warms and clarifies the air. It has a direct influence on the minute organic poisons, a distinctive influence which is most precious, and it has a cheerful effect upon the mind. The sick should never be gloomy, and in the presence of the light the shadows of gloom fly away. Happily this fact is now recognized in hospital practice, and it should be equally so in private practice. The by-word of the physician or surgeon should be the old saying words of Goethe, "More light, more light."—*N. Y. Commercial Advertiser.*

The Inquisition.—One of the worst misnamed institutions known to history is the so-called "Holy Tribunal of the Inquisition." It was any thing but "holy." It was cruel and Satanic. It was a blot on our humanity. It was a disgrace to the Church which started and sustained it. The present age will not tolerate it, yet there are Roman Catholics who profess to discern the signs of its restoration, and to regret its holy deeds. The *Canadian Advance* quotes the *Catholic Banner*, a Roman Catholic journal, as soliloquizing after this fashion: "Thank God we at last have turned towards the times when those who propagate heretical doctrines were punished with exemplary punishment. The re-establishment of the Holy Tribunal of the Inquisition is to be expected. Its reign will be more glorious and fruitful in results than the past. Our Catholic heart overflows with faith and enthusiasm; and the immense joy we experience as we begin to reap the fruit of our present campaign exceeds all imagination. What a day of pleasure will that be for us when we see anti-clerical writing in the flames of the Inquisition." This gratulation and exultation no doubt express the feeling of British Ultramarines, or Jesuits; but we cannot think that it will receive the endorsement of liberty-loving Romanists. Thousands in the Romish Church will wish the *Catholic Banner* had not been so outspoken in its enthusiasm. But we imagine it will be many a long day before the horrid Inquisition is again set up in any land.

By boldness and bloodshed. This present inquiry has no use for it. Look at its damnable record! Do not take the Protestant figures, but study the following startling revelation of its agents of cruelty and the number of its victims, as given by this same *Catholic Banner*.—"By Torquemada—Men and women burnt alive, 10,220; by Inquisition, 1,840; condemned to other punishments, 97,371. By Belandier—Men and women burnt alive, 2,592; burnt in effigy, 829; condemned to other punishments, 32,852. By Cardinal Jimenez de Cisneros—Men and women burnt alive, 3,664; burnt in effigy, 2,282; condemned to other punishments, 48,059. By Adrian de Florencia—Men and women burnt alive, 1,820; burnt in effigy, 560; condemned to other punishments, 21,835. Total number of men and women burnt alive, 20,106; total number of men and women burnt in effigy, 18,637; total number condemned to other punishments, 293,533. Total, 347,704." Here is something to weep over rather than to gloat over. Rome should throw a cloak over this dark page in her history instead of bringing it out into bold daylight as a matter to rejoice over and to desire to see re-acted.—*S. S. Times.*

London Meeting for Sufferings.—At a meeting of this body, held in the First Month, report was made of a distribution of nearly 440,000 tracts (mainly we suppose, on the subject of Peace) in Paris during the time of the Exposition.

A memorial was adopted to the Anti-Slavery Conference at Brussels, calling attention to the importance of the abolition of the legal status of slavery in those parts of Africa under the control of the different parties interested in the Conference; also to the evils flowing from the introduction of alcoholic liquors and the indiscriminate sale of firearms and munitions of war.

Meetings in England.—The *British Friend* says, the annual Book of Meetings shows that "Of the 323 regularly constituted meetings in England and Scotland, the membership of 29 does not exceed 5; in 35 it does not exceed 10; in 72 cases the numbers run between 11 and 20; whilst 112 have a membership ranging from 21 to 50. Ascending the numerical scale, we find 38 others do not rise above 100; 17 from that to 150; six between 150 and 200; two from 200 to 250; whilst four fill the gap between that and 300. Stoke Newington, Westminster, and York range between 300 and 350; whilst Darlington, Manchester, and Leeds exceed between that and 400. There are only remain the two to complete the list—*ancient Bristol and modern Birmingham*, the former with 450; the latter, Saulkie, head and shoulders above his brethren, with figures reaching 629."

The Progress of a Year in Italy.—This year which is drawing to its close has been quite an eventful one for those who are endeavoring to rescue Italy from the spiritual bondage which has made her so miserable in past ages. The inauguration on the 9th of June of the monument to Giordano Bruno, Fra Paolo Sarpi, John Wiclif, Aomo Paleario and John Huss, and other martyrs for freedom of conscience, whose names stand only too prominently on the great victory of the Roman democracy over the Vatican, which had worked hard in order to prevent this solemn proclamation made by the Italian nation of the first among the "rights of man"—religious liberty. Documents establishing the fact that Bruno was burned, are soon to be published; and they will show that the denial of his fact by the organ of the Pope was not well founded.

Another encouraging fact in the history of the year was the gift and the letter sent by King Humbert to the Waldensian Church, a few months ago, for the celebration of the second centenary of the "glorious return of the Waldensians," and his appointment of the Governor of the province of Turin to attend this celebration as his personal representative. The papal press was greatly disturbed by it, as it is the first time that the king of this country has so unmistakably manifested his sympathy and admiration for the Waldensians. Is it that our rulers begin to see clearly that a religious reform is greatly needed by the nation, and that the twenty-five thousand descendants of the true reformers of the Vatican are best fitted to lead in this national reform?

At any rate, this is certain, that those in power are more decided than ever to work out the emancipation of Italy from the clerical yoke, as may be seen from the splendid speech delivered recently in Palermo by the Italian Minister, signor Crispi, in the presence of a very great number of members of both Houses of Parliament. Indeed, he said, that it was not enough for Italy to have abolished the temporal power of the Pope; she should now also disentangle herself from his spiritual power. He said more yet; he went so far as to foretell the downfall of the papacy, saying that as Rome did not possess the power to reform itself, and as it will continue to exist and be great when the papacy shall have disappeared. And the king sent him at once a telegram congratulating him on his courageous discourse. I cannot help thinking that the close alliance with Protestant Germany has some bearing on this more decided and vigorous attitude of our rulers towards the reform of Italy.

The elections which have just taken place all over Italy for the municipal councils, have resulted

in a general victory of the Liberals; and in his opening address at the Parliament, the king congratulated himself on this result, and announced that the Cabinet would in this session introduce a bill transferring the administration of the "opere pie" from the hands of the clergy to lay committees. This is a most important measure which will be a deadly blow to the baneful influence of the clergy. The "opere pie" are immensely rich, this accumulated through centuries, giving a yearly income of £37,000,000, which should be entirely appropriated for benevolent purposes to the needy people at large. An inquiry made by the Government has proved that the clergy who have the upper hand in this administration do not use the whole of the income for the right purpose, but use it to benefit those people who follow them blindly. This fact explains why it is that so many people in Italy, though generally unbelievers at heart, still keep going to mass and confession. Now, when these funds are in the hands of honest laymen who will distribute the whole, impartially, to all needy citizens, whatever be their creed, a great many will cease to follow the priests.—*Troilo Gay, in The Independent.*

THE FRIEND.

SECOND MONTH 22, 1860.

Friends of Ohio Yearly Meeting have recently published a Memoir of Mildred Ratcliff, a valued minister of that Yearly Meeting, who deceased many years since, but who is still borne in loving remembrance by many among us.

The late Nathan Kite prepared from her papers a biographical account of her history and experiences, which was published in the columns of *THE FRIEND*, in vols. 44 and 45.

We are glad to see the Memoir in book form, and hope its instructive contents may be useful to many of its readers—enforcing as they do, the necessity of thorough submission to the Divine will, and of walking in humility and watchfulness, as in the presence of the Saviour.

Our own Meeting for Sufferings having purchased part of the edition, the Memoir may be obtained at the Book Store, No. 304 Arch Street, Philadelphia. Price 40 cents. It is a nearly bound volume of about 212 pages.

Under the head of *Items* on page 199 of *THE FRIEND*, it was said that at Chester Monthly Meeting, Pa., a reply to a communication from Friends at Pasadena, California, was adopted on Second Month 30th. The date should have been printed Twelfth Month 30th.

The friend who forwarded the obituary notice of Rebecca Hobson, published in our last number, says, "I learn she was in her 31st year, instead of 30th, as therein stated."

We have received a communication, referring to a "new Sunday-Rest Bill," introduced into Congress by Senator Blair of New Hampshire, which the writer fears is going beyond the proper limits of civil legislation, and intruding into the province of ecclesiastical law.

Not having seen the bill referred to, we cannot speak of its particular provisions. But when we consider the intimate connexion between moral righteousness and the real welfare of a community, we can see sufficient reasons for enactments calculated to secure to the laboring classes one day of rest in seven; for prohibiting the opening of places where liquor is indiscriminately sold, and for the prevention of lotteries, gamings, and other evils. These subjects all have their civil as well as their religious aspects;

and we believe on the grounds of political economy alone, the statesman and the Christian may join hands in their efforts to restrain what is evil, and to promote what is good.

We have been informed that the members of Pasadena Meeting, Cal., who were baptized some weeks ago, have left that meeting.

SUMMARY OF EVENTS.

UNITED STATES.—On the 17th instant the President issued a proclamation directing the removal of all cattle from grazing upon what is known as the Cherokee outlet, in the Northern part of the Indian Territory. The removal must be completed by the first day of Tenth Month next. The President also directs that, in case negotiations now pending for the cession of that territory to the United States shall have been completed before next Tenth Month, the cattle must be removed forthwith upon notice. He also directs that no additional herds be permitted to enter the territory after this date.

In the House of Representatives, the new rules were finally adopted on the 14th inst., almost exactly as reported from the committee, by a vote of 161 yeas to 145 nays, a strict party vote.

The bill to provide a Territorial Government for Oklahoma was considered on the 13th, and the amendment including No. Man's land in the Territory was agreed to—27 to 16. An amendment was offered by Senator Vest prohibiting the Legislative Assembly from authorizing the issue of any bonds of the Territory, or any county, city, or town in aid of railroads. This amendment was also agreed to, and the bill, as amended, was passed.

The Supreme Court has decided that the Idaho test oath against polygamy is constitutional.

The House Committee on Territories has decided to report favorably the bill of Delegate Cary for the admission of the Wyoming Territory as a State.

Postmaster General Wanamaker has discussed before the House Committee on Post-offices, the proposition in his annual report for the establishment by the Government of a limited postal telegraph. He submitted a plan providing for a lease by the Government, for 10 years, of wires for carrying on the business, and for the delivery of the telegrams by the carriers in the first delivery following the receipt of the telegram. He proposed different rates for different distances, and proposed to make the system applicable to the free telegraph system in the country. The scheme, he insisted, was practical and free from valid objections.

Judge Wiley P. Harris, the most eminent lawyer of Mississippi, favors the passage of the memorial to the Legislature for the repeal of the Fifteenth Amendment.

The Supreme Court of Colorado has delivered an opinion in the Heintzen liquor case, affirming the decision of the lower Court, that the State has jurisdiction over saloons in Denver. The defence claimed that by the special charter granted Denver by the Legislature, the city had sole control over saloons and houses of ill-repute, and that neither County nor State had jurisdiction. The case had been bitterly contested.

Senator Farrabee, of Iowa, in his message, urges the adoption of the Australian ballot system, and that women be permitted to vote at municipal elections. He argues against the licensing of liquor saloons in any form. According to the Governor, the drinking of intoxicants has been diminished to one-tenth the former rate by the Prohibition law. This argument in favor of these laws is irrefragable.

Incoming steamers from transatlantic ports report having sighted a large number of icebergs and large fields of drift ice. The steamer Maraca arrived in Philadelphia on the 12th inst., from Hamburg, after a 32 days' passage. For four days she was in the ice, with huge bergs towering all around her. The vessel had her crank shaft broken and sustained other damages.

Dispatches from several widely separated towns and cities in Texas state that an unprecedented snow-storm has prevailed over a large area of the State, and that snow lay on the ground last week, from two to fourteen inches deep. It is thought that the grain crops will be greatly benefited.

There is in this city but last week numbered 385; 76 less than during the previous week and 32 less than

during the corresponding period last year. Of the foregoing 205 were males and 180 females; 59 died of consumption; 35 of pneumonia; 28 of diseases of the heart; 19 of typhoid fever; 17 of old age; 16 of consumption; 15 of cholera; 15 of inflammation of the brain; 13 of debility; 12 of inflammation of the stomach and bowels; 11 of Bright's disease; 11 of diphtheria; 10 of inanition; 10 of marasmus and 6 of influenza.

Markets.—U. S. 4½, re. int. 1033; coupon, 105; 4½, re. currency 6's, 116 to 126.

COTTON was firm and 1-16 cts. per pound higher. Small sales of middling uplands at 11 9-16 cts. per pound.

FEED.—Winter bran, choice, \$13.50; do. fair to prime, \$13.75 to \$14.25; spring bran, \$13.50 to \$14.

MEAL.—Western and Pennsylvania super, \$2.00 to \$2.25; do., do., extras, \$2.25 to \$2.75; No. 2 winter family, \$2.80 to \$3.10; Pennsylvania family, stone ground, \$3.35 to \$3.40; Pennsylvania roller process, \$3.50 to \$4.00; Western winter, clear, \$3.75 to \$4.00; do., do., straight, \$4.10 to \$4.35; winter patent, \$4.40 to \$4.90; Minnesota, clear, \$3.50 to \$4.00; do., straight, \$4.25 to \$4.65; do., patent, \$4.65 to \$5.00. Rye flour sold in a small way at 89 per barrel for choice. Buckwheat flour was inactive and weak at \$1.25 per 100 pounds for choice.

GRAIN.—No. 2 red wheat, 80 to 80 1/2 cts.

No. 2 mixed corn, 35 1/2 to 38 cts.

No. 2 white oats, 28 1/2 to 29 cts.

BEEF CATTLE.—Extra, 5 cts.; good, 4 1/2 to 4 3/4 cts.; medium, 4 to 4 1/2 cts.; common, 3 to 3 1/2 cts.; fat cows, 2 to 3 1/2 cts.

SHEEP.—Extra, 6 1/2 to 6 3/4 cts.; good, 5 1/2 to 6 cts.; medium, 4 1/2 to 5 1/2 cts.; common, 4 to 5 cts.; culls, 3 1/2 to 4 1/2 cts.

LAMBS.—Extra, 7 1/2 to 7 3/4 cts.; good, 6 1/2 to 7 cts.; medium, 6 to 6 1/2 cts.; common, 5 to 5 1/2 cts.

HOGS.—Western hogs, 5 1/2 to 6 cts.; State hogs, 5 1/2 to 5 3/4 cts.

FOREIGN.—Parliament reassembled on the 11th instant. The Queen's speech, opening the session, was read by commission.

The report of Judges Hanney, Day and Smith, the agents appointed to investigate the charges made by the Times against the Parrells members of the House of Commons, was laid upon the table in the House of Commons on the 13th instant. It is signed by all the Judges, and occupies 121 closely printed pages. It is signed by all the Judges, and occupies 121 closely printed pages. It is signed by all the Judges, and occupies 121 closely printed pages. It is signed by all the Judges, and occupies 121 closely printed pages.

The London press and provincial papers express their disapproval of the findings of the Parrell Commission based on their political views. The Gladstonian papers hold that the report is a triumphant acquittal, while the Unionist papers declare that it is an emphatic condemnation of the Parrells.

A despatch received in London on the 14th, confirms the report of the death of the Sultan of Zanibar. His demise was sudden. Seynoid Ali, the brother of the late Sultan of Zanibar, succeeds him.

The Duke of Orleans, the son of the Count and Countess of Paris, who came to Paris with the avowed intention of enlisting in the French army, and who was then arrested on the charge of being an agent in procuring from France all pretenders to the French throne, was again arraigned before the Tribunal of the Seine on the 12th instant. He was adjudged guilty of violating the law, and was sentenced to two years imprisonment.

Portugal proposes that a Commission of five representatives to fix the limitation of African territory, two delegates from England, two from Portugal, and one to be chosen by mutual consent. Lord Salisbury is because the fifth delegate should be an American, and the Commission is a mission to Africa, and is affected by the dispute. Portugal prefers that the fifth delegate should be French, but will not oppose an American provided the principal terms of arrangement be settled in Lisbon and London.

On the 12th inst. the German Straatsrath was opened by Emperor William who in his address to the council was to consider measures to regulate the position of the working class before submitting them to the legislative bodies with which rested the final decision. The Straatsrath is to attend to the protection of workmen against arbitrary action on the part of employers, and it also should seek to protect women and children against protracted labor. At the same time due regard should be given as to how far German

industry will bear the increased burdens thus placed on the cost of production without jeopardy to Germany's position as a competitor in the markets of the world. The settlement of these questions was essential as being in upon the agreement on labor questions which it was proposed to establish through international conferences. He relied upon the devotion of the council to give earnest attention to the work before it.

On the 11th instant, a cipher letter was received by the Russian refugees in Paris, dated Twelfth Month 28th, giving the details of an awful tragedy in the political prison at Kara, Eastern Siberia. Nadya Sibilda, of noble birth, was found with revolutionary pamphlets in her possession and sentenced to penitentiary. On her arrival at Kara she attracted the attention of the director of the prison, who insulted her.

Nadya Sibilda resented the insult, and the Director, in revenge, had her stripped and flogged in the presence of all the men in the prison. It is stated that the woman died. This led to suicides of other women and to a revolt of the men. To suppress the revolt the troops were called out, and shooting, flogging and torturing followed. It is reported that 41 were killed.

News of the affair has now been circulated in Russia and has inspired the Nihilists with new vigor. Upon learning the particulars the Czar despatched an officer to replace the director, and ordered that official to report at St. Petersburg.

An important scientific exploration is about to be made of the less known portions of Yucatan and Mexico, regions which have not hitherto been scientifically explored, except in so far as archeology is concerned. It is the expedition of Professor Pennington, as a continuation of former explorations in Florida, the general structure of the basin of the Gulf of Mexico. A geological examination of the region and a close examination of its zoology and botany. The party left New York Second Month 15th, under the leadership of Professor Angelo Heilprin, of the Academy of Natural Sciences.

NOTICES

WANTED—A young woman Friend to assist in light household duties, and sewing, and in the care of children. Apply at the Office of THE FRIEND.

WESTOWN BOARDING SCHOOL—The Spring Term will begin Third Month 18th, 1880.

Parents desiring to send their children to the school will please make early application to

J. G. WILLIAMS, Supt.
T. J. WESTOWN, Penna.

WESTOWN BOARDING SCHOOL—A Stated Meeting of the Committee on Instruction will be held in the Committee-room, Fourth and Arch Sts., on Seventy-day, the 22nd of Second Month, at 10 o'clock.

GEORGE M. COMFORT, Clerk.

WESTOWN BOARDING SCHOOL—Wanted, a young man of experience and ability, to fill the position of Governor. Application may be made to

BENJAMIN W. PASSMORE,
Concordville, Del. Co., Pa.
Wm. Evans, 252 S. Front St., Philad'a.

TO GRADUATES OF FRIENDS' SELECT SCHOOL—In order that an Alumni Association may be formed, all graduates of Friends' Select School are requested to send to the undersigned the names of all graduates of the school whom they can recollect, with the year of their graduation and their present addresses. In the case of any graduates from the Girls' School, now married, both their present and former names are desired.

Howard W. Taylor, 140 N. Sixth St.,
Anna Scattergood, 3515 Powelton Ave.
Katherine T. McCollin, 1823 Arch St.

DIED, at his residence, near Suffolk, Va., on the 4th of Second Month, 1890, ALEXANDER L. FELL, aged about 52 years. He was a native of Pennsylvania, and moved to Nansemond County, Va., the year after the close of the late civil war. His last illness was one of much suffering, but he endeavored to bear with patience. At one time he said of his family, "I am happy. Look to the Lord. Leave it all with Him." He gave good advice to his children, and soon after passed away without a struggle.

Incidents and Reflections.—No. 212.

TESTIMONY BEARING.

To the watchful Christian the way sometimes opens at unexpected times, and in unlooked-for places to bear a testimony for his Master, to plead with others to come unto Christ, or to open the doctrines of salvation.

A friend not very long since related to me a case of this kind which occurred in his own experience. Having called at the office of the Tax Receiver in Philadelphia, he paid the taxes which were due by giving a check to the clerk, with whom he was well acquainted. This check was made payable to the clerk's order. Through haste or some other cause, he did not receive the receipt to which he was entitled. The clerk did not make the proper entry of the payment on the office books, nor did he place the check among the funds belonging to the tax office; but probably deposited it with his endorsement in his own bank account. The result was that my friend was called upon to pay a second time the tax which he had already discharged.

He understood the cause; but being filled with compassion for the young man who had thus wronged him, and who was the child of a wealthy and high-spirited father, he made no public complaint; preferring to labor with him in private. But the suspicions of the officials at the Tax Office became awakened, and he received a message from the Receiver to meet the man to whom he had paid the money at his office. In the meantime the clerk called on my friend, expressed his penitence for his neglect of duty in not having entered the amount on his books, and promised to refund the money as soon as he was in possession of funds. They went to the Tax Receiver's office in company. The law in such cases was read, imposing a heavy penalty in fine and imprisonment. The Receiver thought it was my friend's duty to prosecute the offender, but this he utterly refused, saying that he believed such a step would lead to the ruin of the young man; and that his mission was to save men, not to destroy them.

During the discussion which followed, one of those present said the man ought to have had honor enough to have kept him from committing the offence. This remark opened the way for my friend to unfold to the clerks who were

in attendance what it was that alone could preserve man from falling into evil. All are exposed to temptation, and nothing can keep us from falling but the Grace of God, the Light of Christ, which shows to every one the way in which he should walk, and will lead to salvation those who faithfully follow it. As he was speaking, the Divine anointing of the ministry was poured upon him, and ere he was well aware of it, he found himself preaching the Gospel to those present. All business was laid aside for the time, and the clerks turned in silent reverence to listen to his words. The opportunity was not of long continuance, but the circumstances must have made it unusually impressive to the auditors. It was probably the first religious meeting ever held in that office.

This article commenced with the statement that "to the watchful Christian," the way sometimes opens unexpectedly to bear testimony for his Master and to plead with others, but this is not likely to be the case with those whose thoughts and affections are engrossed with worldly matters, and who therefore pay but slight heed to the constrainings of Christ's love. Anna Shipton illustrates this point in an incident related in her work entitled, "The Lord was there." She says:—

"When the light of revelation had broken on me, and I knew something of the love that had delivered me from death and hell, I sought out an artist who in my girlhood had instructed me in painting. She was a lady of superior attainments and winning manners; I had always felt attracted to her, I knew not why.

"Years had gone by; but I had never forgotten her. I found her in the prosperity to which her talents and great business capacity had raised her; and I hastened to set before her the unsearchable riches of Christ as the true riches, and rest in Him as the only abiding rest.

"She heard me to the end, with crimsoned face and tearful eyes; and then replied mournfully, 'All this I have known from my childhood, through a devoted Christian mother.'

"In a reproachful tone I enquired:

"Why then did you never point me to your Saviour, whom you say you have known from your earliest years? Could you listen to my folly and not reprove me? and see where I was standing and not stretch forth your hand to save me?"

"She answered sadly, 'I did not live in the power of Christ's salvation; and so I could not win others to believe what I knew.'"

The testimony borne by the servant of Christ for his Master's cause, whether by word or act, may be without any apparent fruit at the time, beyond that reward of peace and growth in grace which ever attend a faithful discharge of the duties which the Lord appoints. But this is no just cause for discouragement. The seed sown may be like bread cast on the waters and found after many days; and it may never be the lot of the patient sower to witness the sprouting and

growth of this precious seed. But all is under the notice and care of the Lord of the harvest-field, who carries on his work in the way that pleases Him. In the same little book, from which I have already quoted, A. Shipton gives a word of encouragement to the Lord's laborers in the following incident:

"A faithful follower of the Lord once stood alone amid the boisterous crowd of a race-course, distributing tracts and texts judiciously assailed by those who rejected both the Word and the witness. Patiently he waited for some evidence of blessing; and Satan stood by to resist him, pointing to the little acceptance of his testimony, and the insufficient return for his work. Faith was beginning to falter, when a man appeared before him, and in a voice of encouragement and power said, 'No man can tell of what use he is, in this world,' and then passed from his sight.

"The servant of the Lord took courage, and the words of the stranger have nerved many a heart since then to suffer, and wait, and be patient; for He who calls us to work for Him will guide us with his counsel; and every thread entrusted to his Divine Hand will be woven into the mysterious tapestry of our life's history by ways we know not, but all showing forth the power, wisdom and love of Him who sees the end from the beginning."

Dr. S. A. Matchmore, in his letters to *The Presbyterian*, describing his travels in foreign countries, gives a pleasant description of the firmness of a Scotchman named M-Kenzie, in carrying out his testimony against selling spirits: "He was a man of fortune, but unmarried; he gave it all away in benevolence, except a comparatively small sum, with a part of which he bought a large piece of property in the suburbs of Belgrade. This he has utilized to the good of the poor laboring classes by building houses under his own supervision, and for the least possible expenditure which they can meet and thus own their own homes. Soon-hill, and such is the name of the people that he is regarded in honor almost next to the throne. He has been prostrated by a severe illness, which it was feared, by many of his friends, will prove fatal. During his illness he was visited by the kings and nobles, and the people stood in multitudes about his house to hear the last news of the doctors about him. Preparations were actually in progress, when it was thought his case was hopeless, to give him a right royal burial, but he did not relish this chance of royalty enough to give his friends a phase. He clung to life to the amazement of all, and to the disgust of some. He had made provision in his conveyance of the properties sold, that no one of them should be used for the sale of ardent spirits. One man defied him and carried on his miserable work under the Scotch Presbyterian's nose, but he did not know his nettle or he would never have ventured on that prank. M-Kenzie took the case to the courts, and had carried it to the

high courts when he was taken so ill that the "rum-sellers," as we would call them, thought death had come to their aid. But they did not know the contrariness of a Scotchman when principle is at stake. The king tried to get him to let up on the publican, but he had been taught by John Knox not to yield to either the fawnings or preachings of kings, and so he kept on steadfast in his purpose.

"When he had had intervals he inquired of his physician about the suit, and when he could not speak he pondered as to whether there was a possibility of a Scotchman's dying when principle was at stake or on trial. When he was but a little convalescent, scarcely enough on which to hang a hope, and the people of the city were sending in delicacies, both high and low vying with each other to honor the good foreigner, he said one day in whispers to his physician that while most of the people were no doubt sincere in desiring him to live, and that their delicacies were beautiful tributes of their affection, it would be to the interest of some that he should die, referring to his law-suit, and said he, "I will taste none of them." The suit was decided in his favor; principle, so dear to his heart, was maintained, and he improved daily. Later on he sent for the recalcitrant publican and forgave him the penalty, but not until he was adjudged a transgressor. The good foreigner is loved dearly for both his severity and gentleness, and both have made him great in the eyes of the Servians. But it is feared that he will never be well again, and he has just returned to his native land either to be restored or to sleep with his fathers. It is to be hoped that the man of justice and simple piety will live to carry on his good work and enjoy the confidence which he has inspired. But if God orders it otherwise men will pause at his grave to drop a tear over one who loved to stand with the right, to help his fellow-men, and be ready to enter the rest that remaineth for the people of God, the men of his generation reverently pronouncing the Divine formula, "Well done good and faithful servant, enter into the joy of thy Lord."

J. W.

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 235.)

I was little in the ministry, and often led in such a rough manner, it was hard for me to open my mouth in that way, and I suppose it was as hard for some to hear it. I tried to make as little suffice as I well could do, which was sometimes too little for my own peace. An ancient worthy Friend, at one time feelingly dropped some hints to me, which were strengthening; but my trials were so uncommon, I thought it best humbly to look to my heavenly Master for help and counsel principally; having to testify against many things which were generally approved of, even amongst brethren and sisters who were my esteemed friends. This caused my way to be exceeding difficult; although I was thus led by precept and example, I was much reproached by some for my testimony against war, because I could not pay my money in a way which I believed was to defray, in a measure (at least) the expense of shedding human blood. This exercise came on me in the year 1756. At that time a bloody war existed between France and England.

On a certain occasion a number of our young men were drafted to go as soldiers on an expedition; but some of the inhabitants concluded on opening a subscription to hire volunteers in

their stead. This seeming plausible, even to some under our profession, a number were taken therewith; but when it was proposed or demanded of me, I felt a scruple; and told them if, on considering the matter, I could be free to pay money for such a purpose, I could have it forward. I had none to confer with on this occasion; but it was opened clear to me, that to hire men to do what, for conscience sake I could not do myself, would be very inconsistent. This led me in deep humility to seek for wisdom to guide me rightly, whereupon I found it best for me to refuse paying demands of war; and although went to pay the expense as a drop in though my part might appear but as a drop in the ocean, yet the ocean, I considered was made up of many drops. Thus I had to pass through reproach because I had insisted under his banner who declared "his kingdom was not of this world, or else his servants would fight." When my words were taken to answer demands of a military nature, (which I was not free to pay voluntarily,) and sold, perhaps much under their value, some would pity me, supposing it likely that I should be ruined; others would term it stubbornness in me, or contrary to the doctrine of Christ concerning that of rendering to Caesar his due. But endeavoring to keep my mind in a state of humble quietude, I was favored to see through such groundless arguments; as there is not anything on the subject of war to be found in that text; and I have been willing to pay my money for the use of civil government when legally called for; though restrained by a conscientious motive from paying towards the killing of men, women and children, or laying towns and countries waste. Through each of my trials in these cases, my wife encouraged me to be faithful, saying, "If we suffer in a right spirit, we shall obtain that peace which the world can neither give nor take away." I found when closely attentive to the pointings of the true light, I was at times enabled to pray for my opposers and persecutors, and to magnify the name and power of my God. So let all be encouraged to hold on their way, who are given up to serve Him in sincerity. In this situation, "no weapon formed against you shall prosper."

After the tribulations I have last mentioned, some of my greatest opposers came to own my testimony; and great was my peace in attending to my tender scruples. I passed through many baptizing seasons, and have not seen how to reconcile war, in any shape or color, with the mild spirit of Christianity, nor that devouring disposition with the peaceable, lamb-like nature of our blessed Saviour. It seems to me, we might as well suppose that theft and murder do not contradict his royal law, which enjoins the doing unto others as we would have them do unto us. Whilst these storms were permitted to continue, I endeavored to keep close to the heavenly gift within. In time it was said (as I heard) that as I gave myself very much up to the service of Truth, it was improper I should be troubled on account of such demands; and I understood my name was erased or taken from the list.

My tongue is too short to set forth thy goodness to the full, O my God! Let living praise and thanksgiving be rendered unto thee, for thou art worthy forever; and may everything in me be brought to bow, and continue to be low.

1762. About this time the Lord was pleased to turn my mind under its various exercises, to consider the vanity and loss of time which is taken up in dyeing of different colors, the materials and cloth intended for making our garments, &c.

The result of Joshua Evans' reflections on this subject was similar to that arrived at by John Woolman, that the process of dyeing often injured the material and lessened its value for wearing—that if the money spent in dyeing so as to conceal dirt, was expended in removing dirt, greater cleanliness and purity would be obtained; and lastly that "giving way too indisconsiderately to indulgences in divers outward matters and things has more or less a tendency to check, suppress or wear off, those quiet, inward sensations, through which, in a still, small voice is communicated the pure language of the Spirit of Truth to the attentive soul of a true Christian."

My exercise under the considerations above hinted became very weighty, and increased so much, that at length I believed that peace of mind that I had been induced to pursue for several years past, would now be lessened if I should refuse to submit to further singularities relating to my outward appearance in dress. The cross seemed very great, even more than I thought I could be able to bear if I gave up to wear a white or uncolored garment on my back. I pleaded in secret with my Heavenly Father, who knew my condition, that I was insufficient for a trial of such an uncommon nature, and how I could bear the reproach I should be likely to undergo by becoming in this simple matter so singular from my beloved brethren in general, I did not see. But my pained soul seemed not likely to get ease until I submitted to what I believed was really required of me, in some alterations; yet I kept my exercise to myself in a great measure. The Lord was pleased to deal with me as a tender father, and to lay no more on me than I could bear in my weak state. To get a white hat, and to wear white stockings, was going as far into a change of my dress as I could clearly see to be right at that time.

(To be continued.)

Characteristic—The memoir of Edmund Driggs, Esq., which appeared some weeks ago, leads the writer, once his pastor, to say that he was a man of great executive force, and of immense physical strength and courage.

We will give a startling incident to illustrate his strength, courage, presence of mind, and promptness. He was one day standing on the deck of a Hudson River steamboat. Not far from him on a settee sat a young married couple. Suddenly Mr. Driggs sprang toward them, seized the settee, throwing the frightened couple almost to the deck in his haste, and hurled it overboard. He had seen a gentleman fall overboard, and threw this with a rescue. The current bore it toward the drowning man fast drifting astern. He clung to it and was saved. Mr. Driggs was the lion of the occasion, and none admired him more than the young couple who at first thought themselves attacked by a maniac, and were thankful that he had not pitched them overboard. This was characteristic of the man, quick to see, prompt to decide, strong, and fearless in execution.—*Christian Advocate*.

COURTESY is said to cost but little, while it gives its possessor great gain. In one sense this is true, but in another sense courtesy costs the subjection of self; and that is not a little thing, by any means. The essence of courtesy is the instinctive giving to others the first place in one's thoughts and words and actions. The attainment of this grace costs a great deal; and it is worth more than it costs.

FOR "THE FRIEND."
 Historical Notes, Respecting the Society of
 Friends.—No. 5.

It was at a time of great religious ferment in England, that George Fox was prepared and sent forth by the Lord to declare "the right way to peace with God." For as William Penn says in his "Rise and Progress of the People Called Quakers," he directed people "to the light of Jesus Christ within them," "a faithful and true witness and just monitor in every bosom; the gift and grace of God to life and salvation that appears to all." "God owned his own work, and this testimony did effectually reach, gather, comfort and establish the weary and heavy laden, the hungry and thirsty, the poor and needy." The early converts "were strong and bold through faithfulness; and by the power and Spirit of the Lord Jesus became very fruitful; thousands in a short time being turned to the truth in the inward parts, through their testimony in ministry and sufferings. They were diligent to plant and to water, and the Lord blessed their labors with an exceeding great increase."

As to the doctrine taught by those early ministers, William Penn says, their main distinguishing point or principle, was "the light of Christ within, as God's gift for man's salvation; that, I say, is as the root of the goodly tree of doctrines that grew and branched out from it." "The bent and stress of their ministry was conversion to God, regeneration and holiness."

In the rich literature of the Society of Friends are preserved many narratives of the religious experience of its early members; and these very interestingly illustrate and confirm the preceding statements of William Penn.

George Whitehead, one of the most prominent among these, tells us that when about 14 years of age, having been educated under a Presbyterian ministry, he could not cordially join with them, and was at a loss in his spirit. Some time after this he attended for the first time a meeting of Friends, of which he says: "There appeared to me a great work of the Lord in the meeting, breaking the hearts of divers into great sorrow, weeping and contrition of spirit, which I believed was a godly sorrow for sin, in order to unfeigned repentance." Some time after this, he had the opportunity of seeing George Fox preach. "I saw and felt that his testimony was weighty and deep; that it proceeded from life and experience, and did bespeak Divine revelation, and tended to bring to an inward feeling and sense of the life and power of Christ, and the sanctifying thereof in the heart."

In the life of Richard Davies, of Wales, it is stated that the first meeting of Friends which he attended was held in silence, but "though it was silent from words, yet the word of the Lord was among us. It was a hammer and a fire; it was sharper than any two-edged sword, it pierced through our inward parts, it melted and brought us into tears, that there was scarcely a dry eye among us."

John Crook, who was an eminent minister among Friends, had long been a serious, religiously-minded man, but had not attained to a state of settlement and peace. In the year 1654, being providentially cast where William Dewsbury was preaching, his eyes were opened by the power which attended the ministry of that servant of the Lord, to see what it was that had long been striving in his heart. He says: "This kind of preaching appeared unto me, at the first hearing thereof, like as if the old apostles were

risen from the dead, and began to preach again in the same power, life, and authority, in which they ministered."

William Edmundson in his journal mentions that being in the north of England, he and two of his relatives attended a meeting of Friends. He says, "We were all three convinced of the Lord's blessed truth; for God's witness in our hearts answered to the truth of what was spoken, and the Lord's former dealings with me came into my remembrance."

Many of the early converts to the principles of our Society were persons who were earnestly seeking the way of truth; so that the messages of the ministers fell on prepared ground. It is recorded of William Dewsbury, that about the year 1646 he felt an inclination to go forth as a preacher, but the Lord said to him to wait until 1652, for then there would be more hungerings and thirsting after the Lord raised in the hearts of the people. Thomas Thompson relates that in the summer of 1652, he heard of a people called Quakers, who were by most persons spoken against, as fantastical and conceited, who burnt their lace, ribbons and other superfluous things, and that they fell into strange fits of quaking and trembling. Soon after, William Dewsbury, coming into that part of the country, he went in the evening to see him. He found him writing, but in a little time he ceased writing, and "many of the towns people coming in, he began in the power and wisdom of God to declare the truth. And O! how was my soul refreshed, and the witness of God reached in my heart! I had never heard or felt the like before; for he spoke as one having authority, and not as the scribes; so that if all the world said nay, I could have given my testimony, that it was the everlasting Truth of God."

Although the state of the people at the time of the rise of Friends was favorable to the reception of their doctrines, yet the extensive conviction which attended the labors of the early preachers must be largely attributed to the outpouring of the Holy Spirit, which rested abundantly on those devoted servants of the Lord, and touched the hearts of their hearers. It was indeed a time of peculiar visitation of God's love to the people of England, in which, as William Penn says, "He was pleased in his infinite love, to visit this benighted and bewildered nation with his glorious day spring from on high; yea, with a most sure and certain sound of the word of light and life."

In considering the labors of George Fox and his fellow servants, two things are especially noteworthy. First, the thoroughness of that preparation which they experienced for the work to which they were called, through the transforming power of Divine Grace operating on themselves. As William Penn remarks, "They were changed men themselves before they went about to change others. Their hearts were rent, as well as their garments changed, and they knew the power and work of God upon them. Charles Marshall relates, that "by the powerful ministry of John Audland, I was reached and turned to the spirit of God; and as I kept to this spirit I saw a separation made between the precious and the vile. And as my mind loved the light, judgment was set up in my heart, even laid to the line; I was brought into great dread, fear and awe of God, and had great esteem and regard to his messengers. I now saw a long travel through the administration of condemnation, which, indeed, was glorious in its time; and as I kept down to the judgment of the Lord in my heart, the operation whereof

was sword, a fire and a hammer, the evil nature was in some measure overcome; and then something of Divine refreshment and love flowed in, which refreshed me in my travels." "After many years travel in spirit, God Almighty raised me up by his power, that had been working in my heart many years, to preach the everlasting Gospel of life and salvation." Somewhat similar testimonies could be quoted of many others.

The other point to be noted, was the Divine power which accompanied the ministry of these persons; of this, a multitude of illustrations might easily be collected.

George Fox mentions that at Kendal, he spoke through the town on a market day. "So dreadful was the power of God upon me, that people flew like chaff before me into their houses. I warned them of the mighty day of the Lord, and exhorted them to hearken to the voice of God in their own hearts, who was now come to teach his people himself."

In a memorable meeting held near Firbank chapel in Westmoreland, he says, "I declared God's everlasting truth and word of life freely and largely; directing all to the spirit of God in themselves; that by it they might be led into all truth; and might all come to know Christ to be their teacher to instruct them, their counselor to direct them, their shepherd to feed them, their bishop to oversee them, and their prophet to open Divine mysteries to them; and might know their bodies to be prepared, sanctified, and made fit temples for God and Christ to dwell in." The Lord's convincing power accompanied my ministry, and reached home to the hearts of the people; whereby many were convinced, and all the teachers of that congregation (who were many) were convinced of God's everlasting truth."

James Dickinson, who travelled in Ireland in company with Thomas Wilson, testifies of his beloved companion, "The power of the Lord was wonderfully with him, and made him as a cloud full of rain." Thomas himself speaks of attending the Province Meeting at Castle Dermot, in Ireland, which was large. He says, "I was very low in my mind, and did not go up into the gallery, but sat down a little within the door, and many people came in, it being a time that the rabble sort of people were very rude; several such were there that day, and I being under a great exercise of spirit, the powerful word of the Lord filled my heart, so I stood up and preached the Gospel in the demonstration of the spirit and power that was upon me. The rude rabble were astonished and became very quiet, and the Lord's heavenly power did shine forth gloriously, under a weighty sense whereof the meeting held and concluded."

Of the character of the early ministers among Friends, Robert Barclay bears the following beautiful testimony:

In our day, God hath raised up witnesses of himself, as He did fishermen of old; many, yea most of whom are laboring and mechanic men; who, although without that learning, have, by the power and spirit of God, struck at the very root and ground of Babylon; and in the strength and might of this power, have, by reaching their consciences, gathered thousands into the same power and life, who as to the outward part, have been far more knowing than they, yet not able to resist the virtue that proceeded from them."

THE END OF THE ministry is to awaken people from a state of indifference, and to turn their attention to the Heavenly Teacher in their own minds.

The Liquor Problem.

WILL IT BE CALLED THE HAPPY REIGN OF HIGH LICENSE?

In that closely built section of the suburb of Germantown known as P—, about as far south of the residence of the State Representative whose name is coupled with our High License Liquor bill, as it is north of the home of the writer, there are three licensed places for the making or sale of intoxicating drinks—a corner brewery, a corner retail saloon and a corner grocery store with a wholesale license. All well placed for carrying on the traffic.

My daily walk to the railway station leading me near these three places, I observe that the rear of the brick brewery has just had another story added to it, and that now nearly every morning a brewer's massive wagon may be seen backed up before the grocery store and the retail saloon, while driver and dealer take on the emptied beer barrels and roll the full ones off upon the sidewalk or lower them into the cellar. In the old time, the barrel distributing and collecting wagon was noticed there but once a week. But times have changed—very much 'for the better'—with these favored holders of permits to carry on an undisturbed business in strong drink. Towards evening artisans and day laborers with their dinner baskets and tin cans may be seen filling into the saloon in constant succession, yet the curious passer by is not permitted to rudely gaze at the drinking going on at the bar, the proprietor taking extreme care to keep the inside lattice shutters well closed lest it be seen how those well-paying, regular customers of his, husbands and fathers of families and grown up sons, drop their hard earnings into his greedy till.

That policeman pacing a square or two away will tell—as he did not long ago when interrogated—something of the wholesale drinking that is going on right under his eyes, and what comes of it; and the intelligent lady teacher at the new school house beyond, is prepared to give a candid view of what she thinks of High License as affecting whole families in the immediate neighborhood. There, too, is the Irishman who does garden work—ordinarily a very reticent man in his speech, but who, grown loquacious by reason of repeated imbibings, expressed hearty approval of a law which made it convenient for him and his cronies to buy the liquor by the keg and have a merry time drinking it turn by turn at their homes, instead of, as formerly, swallowing their single drams alone.

It is true, we are told that the Coroner's and Registrar of Death's statistics show fewer deaths from alcoholism than previous to the enactment of High License, yet many wives, mothers, sisters and daughters could tell as sorrowful tales as ever in the past about the *lingering deaths* to themselves as well as to the unhappy devotees of the bottle and beer mug. An attaché of the Coroner's office said to the writer, that the display of drunkenness on last Christmas day exceeded anything in that line he had ever beheld. Desiring to give an entirely unprejudiced view of the situation and to note any improvement which has accompanied the law, where such can be done, it may be well here to insert a letter written by the undersigned, late in the year just past, to the Mayor of a Southern city, in response to a request from him for information upon the subject before us. The letter is as follows:

"In reply to thy inquiry of the 6th inst.,

relative to the operation of the Brooks' High License Act, I will say that upon some points and in some directions it has shown quite an improvement over the order of things which obtained under the free license regime. The number of arrests on the first day of the week has been less—so have been the commitments to the House of Correction. The number of retail licenses granted in the discretion of the Court of Licensing Judges, is about one-fourth of what it was formerly. In the matter of *wholesale* licenses, by a ruling of the Supreme Court of the State upon the wording of the statute as it stands, the discretionary power of the Judges, in the absence of direct remonstrance, is said to be inoperative, and hence many new licenses to 'wholesale' dealers and bottlers have lately been asked for and granted, and very great mischief is resulting. This of course can be remedied, and it is generally believed will be remedied upon the re-assembling of our (biennial) Legislature. In the meantime hundreds, perhaps thousands, of unlicensed houses have sprung up all over the city, known as 'speak easies,' where liquor is purchased by the quart or gallon, taken home and drunk there, and so drunkenness tends to become a family evil instead of an individual one. A great deal that is not reassuring could be cited on this point.

"The four Judges comprising the Licensing Court (who have just been designated for the third year by the whole Board of Judges), are certainly well chosen, and they have succeeded in wiping out many low dives which for years set at naught the uncertain processes of Grand Jury hearings and jury trials. Likewise, the saloons which were formerly almost invariably to be found contiguous to the theatres and other places of amusement have all been refused licenses, while the evidence of the exposure of indecent pictures or posters in drinking-places (including large hotels), has operated to cause the withholding or absolute refusal of licenses. So in the matter of the exposure of indecent prints the *tobacco dealers* have nearly free course, and, as a class, are rapidly placing their shops on the same debasing plane as the lowest liquor saloons and the opium joints. With the closing up of several thousands of drinking places and the abatement of so many nuisances, there would have been an appreciation of property values in many quarters, had it not been that the cigar shops, with their unsavory associations, have in numerous cases taken the place of what went before.

"That there is any *less liquor sold* I am not prepared to say. Some of our breweries have added greatly to their productive capacity, and many of the liquor saloons have largely increased their accommodations and supplied extra furnishings and attractions; and, as the Commissioner of Internal Revenue reports a decided increase in intoxicants manufactured the last fiscal year, I am inclined to believe that Philadelphia takes its full proportion. High License homicide cases appear to be as many and as revolting as under the old conditions. There has been a large increase in the number of private clubs for convivial purposes, though the courts appear to be careful about granting charters to suspicious applicants, but then, like the 'speak easies,' they compass their object unlicensed. If the Brooks Act, or any other high license restrictive measure, continues, or is put in force, it needs, as I said before, to be differently worded in the matter of the provisions relative to wholesale dealers, manufacturers and bottlers, and to include the requirement which obtains in Massachusetts

relative to blinds and screens. I understand that there are some restrictive features in the recently enacted Arkansas Act which are held to be exceptionally good and efficacious, but I have not seen a full copy of the law." The writer then offers to procure for his correspondent any suggested amendments to the present Act which the experience of the past two years would seem to make desirable, yet frankly avows his conviction that the "only equitable, ultimate solution of the problem" is to be found in *prohibition*.

Since the foregoing was written, having incidentally met a counsellor who has opportunities for knowing—perhaps as well as any other individual in the city—the true state of the case in relation to the observance or non-observance of this law, he was asked as to his views upon the matter. He said that he was fully persuaded the unlicensed places far exceed in number those which are licensed, and further, that a member of a Liquor Dealers' Association had assured him that in a certain ward where there were but 60 holders of licenses, there were nevertheless 300 others who were selling in violation of the law.

What has been accomplished of good in our city by the operation of the Act, including the closing of the notorious "low dives," and of saloons contiguous to theatres, as above referred to, was through the restrictive features of the Act, and would similarly follow or accompany an absolutely prohibitory measure. Knowing the evil example, temptation, pecuniary loss, wretchedness and crime, which signal mark the whole traffic, what is the professing Christian's duty in this matter? Let others do as they will, but "as for me and my house we will serve the Lord." Let us keep clearly in view, with the valiant, straightforward Joshua, that which is *right* and makes for righteousness, and not be led back or falter in our course through considerations of mere *expediency*.

It is not a light matter in exchange for money paid down—the money much or little—to give moral support to those who put the bottle to their neighbors' lips. To affirm that the business is a dangerous and an unwholesome one and then to give to one the privilege to sell while withholding that privilege from ten others, is to fasten a sense of unfairness upon the rejected ones, prompting them to defy and violate the law at all hazards. The one equal rule of prohibition should prevail.

Meanwhile, our own government taking large toll from the wealthy producers of the whiskey, the wine, the beer and tobacco, and license fees from the dealers at retail, has filled its treasure vaults with accumulated millions of blood-money, and the end of the iniquity is not yet. Lifted up with the sense of our riches and power, we have begun the building of immense line-of-battle-ships, armored cruisers, torpedo-boats, and other vessels for offensive war service. The Secretary of the Navy, in the magnificence of his plan, asks for hundreds of millions more of money to properly build and equip this nation's ocean armament, while the further recommendation is made and applauded that our merchant marine be so fashioned and adapted as in any emergency to be able, in alliance with the navy itself, to effectually "sweep the seas."

Oh, that our people would repent them of this fateful purpose of war, and refuse, as States and a nation, any further participation in the unwholesome traffic in intoxicants and tobacco, lest we bring upon us the dreadful portion of Tyre so truthfully foreseen by Ezekiel.

the prophet, when he declared that utter desolation should follow the defilement of the Lord's sanctuaries and the iniquity of the traffic of the people.—*Joiah W. Leeds, in Christian Statesman.*

FAITH.

FOR "THE FRIEND."

The sky of blue,
With the sun peeping through
The white clouds floating overhead,—
The bright, chilly air
Of a day that is fair
Though the wind-swept trees look dead.

The twilight falls
From the azure walls,
And the moon beams calmly down:
With the hush of voice,
Our hearts rejoice
At the night's resplendent crown.

Fit time to raise
The soul in praise
At devotion's sacred shrine
With tributes due
The whole year through,
To the soul of love Divine,

Throughout the years
Of hopes and fears
And blessings manifold,
Our Father's hand
Has ever planned
What good our lives could hold.

If we would climb
To heights sublime,
And Christ says: "Sit thee here;"
His love can fill
The soul, until
No place is half so dear,

As that low seat
At Jesus' feet
Where souls commune with Him,
And hearts renew,
Like morning dew,
Their faith, erst cold and dim.

Thanks for the gift
Which souls uplift,
To worlds of highest bliss;
With saints above,
Whose songs of love
Come echoed down to this.

R. H.

FROM MOORE'S LIBRARY GAZETTE, WEST Chester Normal School.

THE UNSEEN.

"I'll believe what I can see,"
Said my merry friend to me.
"I'll believe what I can see,"

Nothing more."
While the air his words were riding
All the time remained in hiding—
Through its force, between us gliding,
Closed the door.

"I'll believe what I can see!"—
Spoken lightly, thoughtlessly,
But the words remained with me
Food for thought.
Meadre share should we receive
Of earth's store did we believe
Only what our eyes perceive—
Trusting naught.

Fans the face a gentle breeze;
Erecing winds disturb the trees;
Fierce tornadoes lash the seas;
Everywhere.
Yet the power we never see,
Breeze or cyclone though it be,—
For all trace their ancestry
To the air.

Floats the perfume from the flower
Through the forest, through the bower—
Doling pleasure hour by hour:
Far and wide.
Keenest eye hath ne'er surveyed it;
Smallest scale has never weighed it;
Secret as the power that made it

Over land and under ocean
Speeds a mystery without motion.
Never necromancer's potion
More obscure.
Yet, a wire is all we see
Lightly spanning land and sea,
That doth speak to you and me
Swift and sure.

But believe the things we see
Stronger of the powers that be
Run their great machinery
Under screen.
Only from result we know
Lightning has its dynamo.
Earth revolves, and flowers grow
All unseen.

Close around us—at our door,
Lies a realm we can't explore.—
Though we're nourished from its store
All our days.
So we learn to trust a Power
All unseen, that, hour by hour,
Guides us safe, twixt thorn and flower,
Through hidden ways.

L. W. W.
SELECTED.

A BIT OF WISDOM.

"Grasp the nettle with both hands,
And it shall not sting."
Take this bit of wisdom, dear,
Into every thing.
If the lesson's long and hard,
At it with your might!
Do not let it conquer you
While you've strength to fight.

Foolish people stand and fret,
Wonder what to do,
Bear their trouble twenty times—
Such a silly crew!
Get the trial over, dear;
Never frown and pout;
With a brave and steady look
Put the foe to rout.
Carry not to-morrow's load,
Little heart, to-day;
Trip with happy feet along
Life's uneven way.

"Grasp the nettle with both hands,
And it will not sting."
Take this bit of wisdom, dear,
Into every thing.
—*Harper's Young People.*

FOR "THE FRIEND."

Sound Doctrine.

Paul, in writing to the Christian Church in its early days, while it was yet in its primitive purity, says, "The time will come when they will not endure sound doctrine; but after their own lusts (or carnal desires) shall they heap to themselves teachers having itching ears; and they shall turn away their ears from the truth, and shall be turned unto fables." As if he had a fear that when the church got to be older, and more independent, they would depart from the faith and give heed to seducing spirits, and to those who taught lies in hypocrisy, and for doctrines the commandments of men.

How is it with the churches now? Have not many of us who are turning away their ears from the living and substantial truth, and embracing that which is fallacious and fictitious, and has no salvation in it. But it seems to satisfy the natural man, who having itching ears, is ever seeking after something new, though it leads further away from sound doctrine, or from the ways of salvation. So we must take heed not to give an ear to seducing spirits or doctrines of devils. For we have sound doctrine to guide us if we will be led by it, and be obedient to it. For Christ himself says: "If any man will do his will, he shall know of the doctrine, whether it be of God, or whether I speak of myself." He that speaketh of himself, or of his own acquired

seeketh the glory of Him that sent him, the same is true, and no unrighteousness is in him.

Are not many now, under the light of this glorious gospel day, seeking their own glory; and holding on, under a mistaken tenacity to the glory and doctrines and practices of the old figurative and ceremonial law. Are they not reading Moses with a veil over their eyes? Not looking steadfastly to the end of that which is abolished. I mean, more especially, in relation to sensational and ceremonial rites, which figures are done away in Christ. For where the substance has come, the shadows flee away.

"Thou awfully grand was thy majesty then;
Yet the worship thy gospel discloses,
Less splendid in pomp to the vision of men,
Far surpasses the ritual of Moses.

And by whom was that ritual forever repealed?

But by Him unto whom it was given
To enter the oracle where was revealed,
Not the cloud, but the brightness of heaven,

For God is a Spirit; and they who aught
Would perform the pure worship He loveth,
In the heart's holy temple will seek with delight
That spirit the Father approveth."

And if the ministrations of condemnation was glorious under the old law of sin and death, much more doth the ministrations of righteousness excel in glory, now under the law of the spirit of life in Christ Jesus. And if that which was done away was glorious, much more that which remaineth is glorious. And the figures which point to the living substance are temporal, while the body itself is eternal. And God who commanded the light to shine out of darkness, hath shined in our hearts, to give the light of the knowledge of the glory of God in the face of Jesus Christ. And He will continue to shine while we are obedient to it; and we shall do his will, and know of the doctrine whether it be of God or of man. But if we suffer the cares of the world, or the deceitfulness of riches, or the lust of the flesh, the lust of the eyes, or the pride of life to choke the good seed it will become unfruitful. Then we cannot do God's will nor know of his doctrine, because we have become darkened; as our eyes we have closed, and leanness and death and darkness are covering our souls. For as we yield to temptations and the alluring things around us, the greater the darkness will be, until we cannot discern evil from good, nor good from evil, nor a transformed light from a true light. And that which has come upon us as individuals, is also disturbing our meetings and making discord there. So that some of our once favored ones are becoming more like Babel-buildings, or an airy structure of confusion that seems ready to totter and fall. But our busy ones are hunting up props from the Methodists or others around us, and trying to keep it from falling, so as to hold up the form of godliness awhile longer. But I fear it will ultimately fall unless it is repaired or rebuilt on the original foundation, which the prophets and apostles and our forefathers built upon; and which has been proved through ages by the just and good, and signed and sealed by many a martyr's blood. And I believe this foundation will still stand sure: having this seal, the Lord knoweth them that are his. But the storms of a deluded though highly professing world, are now beating vehemently against it, causing many rents and divisions amongst us, who were once a persecuted but a highly favored people. But

"Thou' seeds divide and sub-divide again,
Like parting rivers seeking still the main,
The nice distinction lies but in the name,

wherever we find them. For they that fear God and work righteousness are accepted of Him, whether Christian, savage, Turk or Jew. So let the tribulated remnant thank God and take courage, remembering the language of our Saviour where He says: "In this world ye shall have tribulation, but be of good cheer, I have overcome the world." D. H.

DUBLIN, IRE., Second Mo. 10th, 1890.

Real Estate Rented for the Liquor Traffic.

Wherever a saloon, a distillery, or a wholesale liquor establishment, a brewery, or rum-selling grocery, or a drug store where liquors are sold as a beverage exists, there real estate is necessary, for these establishments are not in the air.

Take New York City, with its, say, 8,000 saloons. Many of these are very large, but allowing an average width of but twenty-five feet, gives a frontage of thirty-eight miles. In a town of ten-thousand inhabitants within forty miles of the city of New York there are fifty saloons whose average width is forty feet, which is more than a third of a mile of real estate devoted to this purpose. While some of these are in the worst parts of the city, many of them are in business sections where land is held at a high figure. All this real estate is owned by the persons who occupy it or it is rented to them. It is known that the vast majority is not owned in fee simple by rum-sellers. Brewers and distillers of course own much, but by no means the larger proportion. Also a large part of what is owned by saloon keepers is mortgaged, and the money loaned to them on bond and mortgage by persons not otherwise connected with the traffic. Inquiry and observation have convinced us that a great deal of such real estate is owned by Christian people, and that a large amount of money is loaned by persons who are understood to be opposed to the liquor traffic, to persons who are engaged in it, being secured by a mortgage upon the real estate which stands in the name of the liquor dealer. Considerable of this property is owned by estates in process of administration, managed by trustees, and by life insurance companies, savings-banks, and other corporations, which have vast sums to invest.

The effects upon Christians and persons themselves otherwise unconnected with the traffic, of the renting of property for the use of the liquor-traffic, and loaning money secured by mortgages upon such property, are exceedingly bad. It is not possible to have an acute conscience upon any evil business with which we are voluntarily complicated. The liquor-traffic is essentially abhorrent to a total abstainer on principle, to a Christian who recognizes his responsibility, and to a patriot who has an intelligent view of his relations to his country. Such a man deliberately investing his money in it, or renting his property for it, repudiates and resists this sentiment. If he falls into it inadvertently, the effect of being upon terms of more or less intimacy with the dealers is bad. He gradually becomes either indifferent or opposed to the agitation of the subject. Higher rents are received for property to be used for saloons than for any other business; and this is especially true if the property is located in decent parts of towns and cities. Those therefore who rent their property for such purposes are practically under the influence of a bribe. They may not be aware of it, but its effects are the same. This is, in our judgment, a more weighty reason why capitalists are not inclined to act vigorously against the liquor-traffic than the benefits which taxpay-

ers fancy that they derive from the revenue from license. In one community with which we were very familiar the indifference of several highly moral, wealthy, gentlemen to all efforts to suppress, or materially to restrict, the sale of liquor, was inexplicable, until it was discovered that they owned property or had loaned large sums upon property used in the business. One of them after a time awoke to the fact that his property interests were the real cause of his indifference.

Investments in connection with hotels and other property often produce this effect. The case of the Vice President of the United States is in point. So distinguished and honorable a gentleman as he, could not be expected in his present and proved relations to the sale of liquor, even though it be in an indirect way, to have any great zeal in its general suppression. The process of reasoning is very short. He who hates the traffic and considers it evil, and only evil, and that continually, will not voluntarily be connected with it in the slightest degree. If he sees no method of entirely eradicating it he will see to it that his own hands are pure from all contact with it. But he does allow the sale of liquor upon property which he owns, therefore he has not an acute conscience upon the subject, and is not likely to be mentally disturbed concerning it. There are thousands of others, some loaning their money, others renting their property, whose eyes are not open to the fact that they are directly connected with the traffic. They certainly give aid and comfort to those who are engaged in it, and they derive a voluntary personal revenue from the proceeds of it.

We exhort all members of the Methodist Episcopal Church who may in any way be connected with the traffic by the known use of their property or of their money in the way specified in this article to examine themselves and see whether they have any real moral indignation against it. We exhort them to do this for their own souls' sake and for the sake of the country, and not merely because the Discipline of the Church condemns and renders actionable such rental of real estate. These considerations also show what a mighty army must be conquered before this traffic can be outlawed. Not only the direct and avowed liquor interest, but those whose personal revenues depend upon such use of their property, will be found in the ranks of the apathetic or hostile.—*Christian Advocate.*

Natural History, Science, &c.

The Influence of Climate on Cotton Manufacture.—For one reason or another, the art of spinning cotton centered in Lancashire, England, first starting in and around Manchester. It stays in Lancashire. Manchester remains the centre of the trade, but the trend of the spindles is away from Manchester proper. The spinners have for some years built nearly all the new mills at Oldham and other towns, seven or eight hundred feet above the sea-level, on the crest of the ridge beyond which the moors stretched away to Scotland. They may not have known why they went there, but it is the point where the relative humidity of the atmosphere is most constant. The rainfall is only about half what it is in Massachusetts, but the relative humidity of the atmosphere is very high, and you are always looking out for a shower. The dry, bad days for spinning are when the wind is from the east—that is, the dry wind in England coming over the land.

Our textile factories first gathered in centres where there was water power. It happened that Samuel Slater landed in Rhode Island, midway

in the section, where, I think, the cotton manufacture will stay. But water power carried many mills away up into New Hampshire, down into Maine, and elsewhere. That influence has gone by. Steam has taken the place of water power.

My judgment has been for a long time that, barring one element which I will treat later, the greater part of the cotton spinning and weaving of this country will tend to concentrate along the south shore of New England, from New Bedford by way of Fall River, Narragansett Bay, and so on along the Sound, at the points to which coal can be carried in barges at very moderate cost, to which the cotton can be brought at diminishing rates of transportation from the South, and where the conditions of life are comfortable, the supplies abundant, and where all the subsidiary arts will gather or have gathered around the factories.

It is along this shore that the Gulf Stream exerts an influence somewhat like that which affects Lancashire. Although perhaps less in degree, the humidity of the atmosphere is more constant and more nearly consistent with the best conditions for spinning and weaving than it is in any other section of this country within my knowledge. I will not speak dogmatically upon this point, because I do not think we yet know enough of atmospheric conditions to be able to determine this question. It is one of the elements of the case. As this concentration takes place, as you so well know, the relative number of spare hands and the number of repair hands in each factory will be diminished; thus the general expenses will be reduced. The draft for help will be made upon the whole population, and the work will be subdivided in the way which is the most conducive to the very closest economy.—*The American.*

Defective Eyesight.—Near-sightedness is developing to such an alarming extent among the school children in France, that the Academy of Medicine has taken up the subject and discussed it at one of its recent sittings. It appears that near-sightedness is generally noticed among the young men who are preparing to enter one of the large special schools, such as the Polytechnic School, the Normal School, the Mining School, etc. Nearly all the students admitted to these institutions have a beginning of near-sightedness, which afterwards increases and becomes hereditary. In the army there is said to be many young officers who, without eye-glasses or spectacles, are unable to distinguish objects at the distance of 100 yards. The general average of near-sighted students in the rhetoric and philosophy classes in the colleges is 35 per cent. In Germany the average is 57 per cent., and in Switzerland 30 per cent. To remedy this state of things, the Academy suggests several changes in the arrangement of the school buildings, so as to give better light, the appointment of an oculist for each State institution of learning, and a regular and careful inspection of the scholars.

Chinese Varnish.—The tree which yields the Chinese varnish is a species of *Rhus*, which, although producing an article of great value, is extremely dangerous. The varnish is largely used in the country for giving a fine polish to tables and chairs used in the houses of the wealthy. The beautiful lacquer-ware so extensively exported from Canton to foreign countries, and which is so well known and justly admired, is produced by this tree. It has the valuable property of being less liable than French polish to be injured by a heated vessel

which may be placed upon it; but it is very poisonous, and requires to be handled with great care by the workman who uses it. Indeed, after furniture is dry, it is very unsafe for certain constitutions until it has been in use for some time, and the smell entirely gone. A friend of mine, Mr. Jones, American consul at Foo-chow-foo, used some furniture which had been acquired some time and was apparently quite dry, and yet was very ill for a long time from its effects; so ill that he thought he should be obliged to leave the country and go home. And this is no solitary instance, for I have known several persons to suffer most severely from the same cause. —*Fortune's Travels in China.*

Plants Antagonistic to Insects and Vermin.—It has been shown by repeated experiments, says the *Revue Horticole*, that the nasturtium, planted about the trunks of apple trees infested with the woolly aphid, will eventually rid the tree of this pest. The insects are much reduced in number the first year, and all disappear the second season, if the planting is repeated. The roots of the black henbane placed in granaries will drive away rats. The *Lepidium ruderale*, a plant belonging to the same genus as the garden pepperglass, will free beds of bugs.

The common tansy, used as a litter in the kennel will rid dogs of fleas. The oxeye daisy, mixed with the litter of stables, will drive away flies from the horses. The fresh leaves of black elder will rid cabbages of caterpillars.

The castor oil plant has been successfully used to protect the grapevine from injury by moles. The buckwheat protects cabbages and radishes from the flea beetle.

The leaves of the chamomile rubbed upon the skin of horses protects them from the annoyance of flies. A decoction of leaves of the walnut answers the same purpose.

In addition to these it may be mentioned that a decoction of the leaves of the common burdock appears to have considerable value for protecting the roots of cabbages and onions from injury by maggots, and of the strawberry plant from damage by the white grub.

Items.

Secret Societies.—William H. Seward, in a speech in the Senate, said: "Secret societies, sir? I believe I would put them between the hands of other men, in a secret lodge, or in a secret council, or bending on my knee before them, enter into combination with them for any object, personal or political, good or bad, I would pray to God that that hand and that knee might be paralyzed, and that I might become an object of pity and even the mockery of my fellow men. Swear, sir! I, a man, a citizen, a Christian, swear to submit myself to the guidance and direction of other men, surrendering my own judgment to their judgments, and my own conscience to their keeping! No, No, sir, I know quite well the fallibility of my own judgment, and my liability to fall into error and temptation. But my life has been spent in breaking the bonds of the slavery of men. I, therefore, know to well the danger of confiding power to irresponsible hands, to make myself a willing slave."

Increasing the Navy.—Andrew Carnegie, in commenting on the proposal of the Secretary of the Navy, says: "Secretary Tracy's proposal to increase the navy I read with pain. It would be far less injurious and less dangerous to create a large standing army than a formidable navy intended to cope with the huge armaments of European powers. Give us war ships and we shall have wars. The cost of maintaining these useless instruments of destruction will be enormous."

Slavery vs. Rum.—The Anti-Slavery Congress of Brussels has had its counterpart in the Anti-Rum Congress at Khartoum. While Christians are ear-

nestly considering how they can crush out slavery, Moslems are considering how they can preserve slavery and crush out intemperance. The means suggested are curiously similar, if we may trust the somewhat vague reports that come from the Malodi's camp. Europe on the one hand is to draw a cordon of her ships of war around Africa and capture every Arab dhow that can be found, release its prisoners and send them to the Gulf. The Moslems, on their part are also to draw a cordon of dhow around the continent and capture every vessel that contains the abominable firewater that is eating away the strength of the natives, and thus depriving them of the material for their trade. Boston rum, English gin and German schnapps were doubtless not represented at Brussels, as the purveyors for Eastern lands are Khartoum, so that the parallel is not quite complete. There is enough of truth in it, however, to set us to thinking.

Morality of Trade.—Last Spring when the liquor licenses were being filed, a man, a carpenter by trade, who was tired of making an honest living, came to a gentleman here in Philadelphia with a petition for a saloon license, which he asked the gentleman to sign. The gentleman asked him why he did not stick to his plane and bench. The answer was, "The saloon business is a most lucrative trade." "I want to make money faster than I can get rich." "Well, but do you not think you will be affording additional facilities to drunkards to destroy themselves?" "Perhaps I shall." "Do you not think or believe that at least five men every year will die drunkards if you succeed in getting a license?" "Why, I never thought of that before; but I suppose it would be so." "Then, if the Lord will, I will give you ten years, fifty men will have died through your agency; no what becomes of the drunkard? Does he go to heaven?" "I suppose not." "I am sure he does not, for no drunkard shall inherit the kingdom of heaven. What becomes of them then?" "Why he must go to hell." "Well, do you not think it would be just if the Lord, in his mercy, should send you down to hell too, to look after the souls of the drunkards?" The man threw down his petition, went back to his honest occupation, and he was never tempted since to desire a license again.—*The Mennonite.*

Avoiding Conscription.—In continental Europe aversion to compulsory military service has ceased to explode in open revolts, but is still apt to manifest itself in various tricks of self-disablement. The Prussian *Mirror Zeitung* enumerates not less than twenty-six different devices by which recruits manage or try to insure rejection by the boards of medical examiners. One favorite plan is to produce an appearance of hectic (pulmonary) complaints by hard work, sexual excesses and unwholesome food. Others develop goitres, potbellies, artificial dropsy, and tremendous varicose veins by tricks known to desperate and rather illiterate men. Occasionally if the decision is aided by the testimonial of an accommodating family physician. Baldness and the loss of a certain percentage of teeth likewise insures immunity from the clutch of the recruiting-officer, but the ancients were less fastidious and peace-loving citizens of the Mediterranean republics often could produce exemption only by desperate mutilations. The very word *poltrone* has by some etymologists been derived from *pollice trancere*, in allusion to the thumb-chopping expedient of Roman cohorts.

Demoralizing Effect of the Liquor Traffic.—As in the overthrow of slavery the slave holders were the principal gainers, so in the overthrow of the liquor-traffic the manufacturers and dealers would receive the largest benefit. Any institution that inflicts injury on any class of men must necessarily be demoralizing in its influence on those by whom it is supported. The demoralizing influence of the liquor-traffic is immediately engaged in it are manifest. The contempt for law, the disregard for the interests of others, the blindness to the ravages of the rum-traffic, the selfishness seen in liquor dealers, and the diabolical spirit with which they assail the noblest institutions and interests of society, show how their brains are so much inferior from other men, and transforms them into enemies of the race

to which they belong. One of the strongest arguments in favor of the utter overthrow of the rum-traffic is founded on the condition and needs of rum-sellers and their children.

Where the Money Goes To.—Not long ago I called at a country store. Soon after a woman of very limited means entered with a small basket of articles she wished to exchange for merchandise. Her goods were a small roll of butter and one dozen and a half of eggs, both of which came to ninety cents. She made the following purchases: Half a pound of coffee, 10 cents; one pound of sugar, 10 cents; one box of matches, 3 cents; one spool of thread, 5 cents; one yard and a half of calico, 12 cents. This came to 45 cents. The remaining 45 cents were spent for tobacco for her husband, who, she said, was out of the weed. She almost split the pennies in purchasing necessary articles that she might get tobacco for her husband.—*A Subscriber in the Christian Advocate.*

ECONOMY is the parent of integrity, of liberty, and of ease; the sister of temperance, of cheerfulness, and health. Profuseness, on the contrary, is a cruel and crafty demon, that gradually involves its followers in dependence and debt; that is, fetters them with iron that enters into their souls.

THE FRIEND.

THIRD MONTH, 1, 1850.

To the lover of his country, who believes in the Scripture doctrine, that the prosperity of a nation depends on the favor of the Almighty, and that it is righteousness which exalts a nation,—there is something very saddening and depressing in the increased expenditure for warlike purposes—especially in ships of war and military defenses, which our nation for some years past has been incurring, and which seems to be growing in an ever-increasing ratio—till now we have plans advocated which involve an outlay of hundreds of millions of dollars.

The immediate waste of money contemplated by these schemes is not the most objectionable feature of this military policy. If a large fleet of war vessels is built, the care and maintenance of them, and their equipment with men and materials will involve an immense annual outlay. Further, a large body of men will be brought under the demoralizing influences which are so strong in military and naval circles. The very possession of these means of attack and defence will inevitably increase the danger of the government being tempted to use them in an arbitrary spirit, and hence we may become plunged into wars which might have been avoided by a more conciliatory policy. This view is well expressed by Isaac T. Gibson, of Iowa, in an article in *The Christian Worker*, in which he says—

"In brief it is safe to say, without a navy and so-called coast defenses the peace of this country is assured, as wise and conservative rulers could prevent the foolish and rash from involving us in serious trouble with other nations; but with a navy and coast defenses the military pride and arrogance would become the dominant force, and war would be always imminent or present."

May the Almighty Ruler of nations rebuke this military spirit, and cause the peaceable spirit of his Son to govern the hearts of the people, so that his blessings may continue to descend upon this country, and it may become an

example to other nations in all that affects the real welfare of mankind!

IN THE FRIEND of last week, reference was made to an account of Mildred Ratcliff published in vols. 44 and 45, which it was stated was prepared by the late Nathan Kite. We have since learned that most of the labor of that compilation was performed by another Friend.

SUMMARY OF EVENTS.

UNITED STATES.—In the House of Representatives on the 18th ult. a bill was taken for a site for the World's Fair of 1892. After eight ballots were taken, Chicago was selected as the place for the fair, the vote standing: Chicago, 157; New York, 107; St. Louis, 25; Washington, 18.

On the 18th ult. the Senate, in executive session, ratified the British Extradition Treaty.

The New York Senate, on the 19th ult., passed the Saxton Ballot Reform bill by a vote of 19 to 9. On the same day the Senate of North Dakota adopted the Australian Election System, and the House passed a bill offering a bounty during the next five years for the production of potato starch and beet sugar to North Dakota. The iniquitous lottery project appears to have been abandoned.

The Territory of Idaho, which it is proposed to bring into the Union on the 1st of July, 1892, contains 29,000 miles, or 53,329,160 acres, of which it is estimated that 16,000,000 are agricultural, 10,000,000 forest and 30,000,000 grazing and mineral. The assessed value of property in the Territory, not including mining property, is about \$25,000,000, the actual valuation being estimated at \$85,000,000. The population is estimated at a little over 117,000.

A Legislative Committee finds that 524 fraudulent ballots were cast in the first Assembly District of Madison County, N. J., at the last election.

Mississippi.—The House of Representatives on the 21st ult., defeated by a vote of 85 to 74 a motion to adopt a memorial to Congress relative to the repeal of the Fifteenth Amendment to the Constitution of the United States.

South Dakota.—One of the leading citizens of Pierre, South Dakota, on the 21st ult. crossed the river, and going to a point about one mile above Fort Pierre, founded a new town on the Sioux Reservation, to be called Stanley. Twenty wagon loads of lumber went with the party, and by the next evening nearly 20 new houses were almost completely completed. A suspension bridge, a pontoon bridge. Negotiations having been made for the purchase of an Indian claim, there was no trouble.

A despatch from Prescott, Arizona, says that the storage dam built across Hassayampa River by the Walnut Grove Storage Company two years ago, at a cost of \$300,000, gave way on the 22d ult., under the great pressure of a heavy flood, and swept everything before it.

A courier arrived at Phoenix, Arizona, on the 24th ult., from the Lower Hassayampa, and reported that a tremendous mountain of water came down the Hassayampa about 2 o'clock in the morning, and that the men lost their lives at the lower dam, where they were at work. Thirty-one were whites and three Chinese. The courier reports the town of Wickenburg all right. The loss of life in the valley, between Wickenburg and the dam, may be known for some days, but is without doubt, considerable, and the number may possibly reach 30 or 40. The courier states that the upper dam had undoubtedly broken and carried the two dams below down with it. The loss of property in the dams alone will probably be in the neighborhood of \$1,000,000.

Deaths in this city last week numbered 370; 15 less than the previous week and 23 more than during the corresponding period last year. Of the whole number 188 were males and 182 females: 57 died of consumption; 44 of pneumonia; 27 of diseases of the heart; 17 of inflammation of the lungs; 16 of old age; 14 of convulsions; 12 of cancer; 12 of inanition; 10 of typhoid fever; 10 of cramp and 2 of influenza.

Markets, &c.—U. S. 4s, reg., 103; coupon, 105; 4s, 123; currency 6s, 116 to 126.

Cocoa was sold but steadily at 11-9-10 cts. per pound for middling ups.

FEED.—Winter barn, choice, 15; do. fair to prime, 12.25 to 14.75; spring barn, 13.75 to 14.25.

FLOUR AND MEAL.—Western and Pennsylvania super, \$2.00 a \$3.00; do., extra, \$2.25 to \$2.75; No. 2 winter family, \$2.50 a \$3.10; Pennsylvania family,

stone ground, \$3.35 a \$3.50; Pennsylvania roller process, \$3.50 a \$4.00; Western winter, clear, \$3.75 a \$4.00; do., do., straight, \$4.10 a \$4.35; winter patent, \$4.40 a \$4.90; Minnesota, clear, \$3.50 a \$4.00; do., straight, \$4.25 a \$4.65; do., patent, \$4.65 a \$4.90; do., favorite brands, \$5. Eye flour was quiet and barely steady at \$2.85 a \$3 per barrel, as to quality. Buckwheat flour was dull and weak at \$1.25 per 100 pounds for choice.

GRAIN.—No. 2 red wheat, 81 a 82 cts.

No. 2 mixed corn, 53 1/2 a 55 cts.

No. 2 white oats, 28 1/2 a 29 1/2 cts.

BEEF EXTRA.—Extra, 5 1/4 cts.; good, 4 1/4 a 4 1/2 cts.; medium, 4 1/4 a 4 1/2 cts.; common, 3 1/4 a 4 cts.; fat cows 2 1/4 a 3 1/2 cts.

SHEEP.—Extra, 61 a 63 cts.; good, 5 1/4 a 6 cts.; medium, 5 1/4 a 5 1/2 cts.; common, 4 1/2 a 5 cts.; culls, 3 1/4 a 4 1/2 cts.

LAMBS.—Extra, 7 1/2 cts.; good, 6 1/2 a 7 cts.; medium, 6 a 6 1/2 cts.; common, 5 a 5 1/2 cts.

HOGS.—Western, 5 1/2 a 6 cts.; State, 5 a 5 1/2 cts.

FOREIGN.—Joseph Gillis Biggar, the well known Iowa Rider and member of the House of Commons for the West Division of County Cavan, died on the 19th ultimo, at Clapham, a suburb of London. He was 62 years old.

There was little in British politics during last week past to excite national, much less international interest. The liberal and especially the radical element of our race, who are represented by Labouchere and Bradlaugh, express confidence in their ability to defeat the Government before the session goes much older, but the parliamentary divisions which occurred during the week do not give us satisfactory assurance of the realization of their prediction. The debate on the address from the throne has proceeded with more or less vigor, and on three different occasions the Government and its opponents have tried conclusions, but the former was not defeated; on the contrary, it showed itself to be of great strength. The most important contest was provoked by Parnell's motion to free all parts of Ireland from the operations of the Coercion Act, and it was thought to be one that would most probably be successful. It was, however, defeated by a large majority, and when Labouchere questioned the Government with regard to the proposition to do in relation to the Parnell Commission's report, the contemptuously indifferent reply made by Smith, the Tory leader of the house, gave good reason for the belief that the Government felt itself to be so strong as to enter upon its task being driven out. Lord Randolph Churchill, speaking in Paddington, on the 22d, said he would give a general support to the Government during the present session of Parliament, but would reserve the right of liberty of action on certain subjects.

The *Temp* says that the Russian loan was seven times covered by subscriptions made in Paris alone. Forty-three bodies have been taken from the colliery at Decize, in which an explosion occurred on the night of the 18th ult. In addition 83 miners, who are badly injured, have been rescued.

The elections in Germany on the 21st inst., showed large gains for the Socialists. In many cases a second ballot will be needful to elect. The Carle parties have as yet secured only 74 seats in the new Reichstag as against 213 held by them previously. The following is a list of the parties: The various parties in the Reichstag and their strength: Socialists, new body so far as definitely known: Conservatives, formerly 78, now 48; Imperialists, formerly 39, now 12; National Liberals, formerly 92, now 14; Centerists, formerly 103, now 56; Freeindependence party, formerly 35, now 20; Socialists, formerly 10, now 71. The report of the Central Committee has ordered that all voters of the Socialist party shall support the German Liberal candidates on the second ballots wherever the issue is between the German Liberals and the candidate of any other religious party. The committee of the National Liberals has ordered its party to support the German Liberal candidates against the Socialist candidate.

A Government bill has been introduced into the Reichstag to extend the boundaries of Vienna. The measure will double the population of the city.

A report was received in London on the 21st ult., that the cholera is spreading in Mesopotamia.

Mail advices from Hong Kong and Yokohama, received in San Francisco, report that the storm along the coast of the first Monday night 24th, was very disastrous. About 1000 fishing boats, 1000 fishermen, 2500 and 3000 fishermen, drifted out to sea. Nine hundred of these boats, with all the men aboard, were lost. Most of the bodies drifted up on the beach. The same

day 11 boats were wrecked in the sea off Tobishan and 50 fishermen were drowned. On First Month 23 23 fishermen were drowned on the coast of Maschow

NOTICES.

The Annual Meeting of FRIENDS' ASYLUM FOR THE INSANE, will be held in the Committee Room Arch St. Meeting-house, on Fourth-day, Third Month 18th 1890, at 3.30 P. M., at 8 o'clock the annual election of the above trust, which consist of several Scripture texts. Price, two dollars per 100 copies. A full attendance of members is requested; no special notice will be sent.

THOMAS SCATTERGOOD, Secretary.

WORDS OF COMFORT AND CONSOLATION.—Helen Longstreth, No. 740 Sanson St., has just issued a large edition of the above tract, which consist of selected Scripture texts. Price, two dollars per 100 copies.

Edward Sharpless acknowledges having received from kindly interested friends, one hundred and seventy dollars for the Norwegian Friends' School, Stavanger, Iowa, which he has remitted to Charles T. Penrose of West Branch, Iowa, the Clerk of that Yearly Meeting. Any further donations will be gratefully received and forwarded as above.

Philad., Second Mo., 20th, 1890.

WESTVALE BOARDING SCHOOL.—The Spring Term will begin Third Month 18th, 1890.

Friends intending to send their children to that school will please make early application to:

J. C. WILLIAMS, Supt.
Westvale, Penna.

WANTED.—A young woman Friend to assist in his household duties, and sewing, and in the care of children. Apply at the Office of THE FRIEND.

DIED, at the residence of his son, Dr. Gustav North, Springville, Iowa, Second Month 4th, 1890, JESSE NORTH, aged 79 years, 7 months and 5 days, member of Springville Monthly and Particular Meeting, and Hickory Grove Quarterly Meeting of Friends, in the 47th year of his age. He died since the death of his beloved wife, which occurred Third Month 20th 1888. Although a great sufferer for the past few months, he was confined to his bed but a few days previous to his death. He was always true to the doctrine of non-resistance, and when his death was to his family a loss of life faithful members of the highest favored Society of Friends.

He resided in Westfield, Ind., Second Month 9th, 1890, STEPHEN A. GAUSE, son of Nathan and Mary Gause, aged nearly 63 years. He was warm attached to the principles and testimonies professed and practised by Fox, Penn, Barclay, Whitehead, and others, who suffered for Truth's sake; he was deeply interested in the cause of Peace and Temperance, and in his life and conversation strongly advocated the same and other reforms. A few days before his death, he expressed so some Friends, that he felt that that a time was coming that would try the foundation of every one, and at the same time expressed a fear that many professors were heaving them out cistern broken cisterns that would hold no water. The history of his life would afford ample evidence of his other religious feeling, and when the death of Joseph Scattergood was read to him, he remarked, referring to his prospect of death: "That is just my experience that is just the way I feel." He was ever ready and willing to acknowledge his wrongs and ask forgiveness; often saying, "He was safe only when on that watch that the enemy was always ready to take advantage of his weakness." On one time of suffering manifesting some impatience, when alone for a short time in his room, he rang the bell to summon a attendant; and his wife coming in, he raised his hands and said, "I am ready to thank thee that I have been praying, and am forgiven; that I have been blessed by the name of the Lord, He knoweth my weakness, and my dust." A few minutes before his departure, being asked if he still felt Jesus near him, emphatically answered "Yes, those who mourn but are comforted in their sorrows, shall be filled through the atoning blood of Jesus, and the cleansing and sanctifying influence of the Holy Spirit, he has been permitted to join the Church triumphant.

THE FRIEND.

FOR "THE FRIEND."

Incidents and Reflections.—No. 213.

SYMPATHY WITH POOR AND DISTRESSED.

Sympathy with the poor and distressed—even when poverty and suffering are due to the errors of their victims—are among the traits of character which flow from the prevalence of Divine love in the heart. Our Heavenly Father causes his sun to rise on the evil and the good; and sends rain on the just and the unjust. Those who, through the visitations of his grace, are brought into a degree of fellowship with Him, know that they have been dealt with more mercifully than they deserved; and in their intercourse with others they must acknowledge the obligation to act in the same spirit.

The Journal of Stephen Grellet contains many evidences of his deep feeling for the wretched and the prisoners. Although during his religious visits, he had more intercourse than usual for ministers of the Gospel with the wealthy and powerful; yet he seldom felt at liberty to omit visiting the prisons and hospitals. The sufferings and abuses which he thus witnessed he was often led to lay before those in authority; and was thus frequently made instrumental in lightening the burdens and relieving the severity of distress of those who had before had no one to plead their cause.

When at Abo, in Finland, in 1818, he visited the prison, and found the chains with which the prisoners were fettered, were unusually heavy. He says: "I felt so distressed last night under a sense of the sufferings and misery which I had beheld, that I could not sleep; my soul was poured forth before the Lord that He would open the way for the mitigation of so much distress."

After reaching Petersburg, he makes this record: "Yesterday and to-day I have been under sore distress from what we have seen and felt in abodes of wretchedness and misery. The prison near the Admiralty is so filthy, and the air so impure, that it much affected our heads and stomachs. The prisoners by their emaciated countenances, show that they also suffer by it. Ten of them were fastened, two and two, to a long chain, marching out to Siberia; what sufferings must these poor creatures have to endure, during so long a journey, to be performed on foot, and in the severity of a winter like this!

May the Lord be pleased to open our way, in due time, to plead for so many sufferers, that their distress may be relieved."

It is pleasant to add the representations made by S. Grellet to the Emperor Alexander, and to the Governor in charge of the prisoners at Petersburg, so affected their minds, that the chains were removed from those at Abo, and steps taken to add to the cleanliness and comfort of the others.

At Naples, the statement he made to the Prime Minister of the wretched condition of the places of confinement promptly led to much improvement. In reference to this he remarks: "Should my deep sufferings in these visits have no other effect than thus to mitigate the bodily tortures under which some of these, my fellow-beings, have suffered for years, I am richly repaid; may it not be for one of these evils that the Lord is opening a door of access for me to plead with men in authority? Or, that whilst the hearts of some of these are tendered, under a sense of the Lord's mercies towards them, they may become disposed to acts of mercy towards others? I hope also, that some of the poor prisoners will find consolation in the Lord Jesus, whose mercies have been proclaimed to them."

Similar results followed from Stephen Grellet's labors in other places; so that he could say, "I am richly paid indeed for my sufferings in my visits to afflicted humanity, by being able to obtain some relief for the destitute, and I hope also the liberation of some of the penitent ones."

When at Smyrna, he found in the prison a young Greek, whose offence was, that he was found in the night without a light. He says: "We succeeded in having him released, by paying to the keepers of the prison twenty piasters, about two dollars. In another prison we found many confined for small debts, mostly Greeks. Several of them claimed much of our tender feeling and sympathy. By paying 150 piasters we had most of them released from their confinement. We could but smile at ourselves, being among Turks, and bargaining with them for the liberty of those poor Greeks and Armenians, which we obtained for about two-thirds or three-fourths less than first asked."

The benevolent feelings of Stephen Grellet in like manner flowed forth to the slaves in the Southern States, whose condition shocked his feelings of justice, awakened his sympathy, and led him to faithful labor with their masters. Of a meeting which he held at Fredericksburg, in Virginia, he says, "The prospect of having a meeting at that place, where I have repeatedly seen the poor slaves treated with great cruelty, felt awful to me. But the dear Master helped his poor servant to do the work required. I was engaged in setting forth the love of Him who loved us whilst sinners, and has commanded us to love one another as He has loved us. His love is to all men: He has died for all, and we must love all, and do to others as we would they should do to us. Were this the case, could men oppress one another? Could they wage war against one another? Could they hold their

fellow men, of any color or nation, in a state of bondage? The Lord's power came over the meeting in such a manner as to bring conviction to the minds of the people, and seriousness prevailed over all."

His meetings in Virginia were numerous attended by slave-holders, and although he felt called to proclaim the truth without disguise to the masters, their hearts appeared to be open towards him. At Lynchburg, he fully set before his audience the unrighteousness of slavery, and the guilt of slaveholders, reasoning after this manner. Our Redeemer "has commanded us to love one another as He has loved us. Can we say that we love Him if we observe not his commandments? Can we say that we love our fellow-men, if we act towards them contrary to what we would they should act towards us? Should we think that those who are now held under the galling yoke of bondage, acted justly towards us, were they to rivet the same heavy chains upon us, that they are now laden with?" Similar service was required of him in various parts of the South; for he felt that he must plead the cause of the oppressed, if he proclaimed with faithfulness the truth as it is in Jesus.

The Philadelphia Methodist gives the following pleasing and touching narrative of sympathy with those in want, and the blessing that attends its exercise:

"A dejected-looking man and his frail, careworn wife sat in one of the seats of a crowded car, each holding a child. The elder was a little girl of about four or five years, pale and delicate, as though she had been fed all her life at a scanty table. A few bundles neatly wrapped up in newspapers filled the rack above them, while two old valises that had seen their best days, and now holding family possessions, were crammed into a seat with them.

"It was no unusual sight, and the well-fed passengers gave them hardly a passing notice. Whence they came or whither going, no one knew or cared. The poor man and his family were lost in the crowd. The train rushed on, and the passengers talked on, as if there could be no case of distress within a thousand miles. Directly the little girl leaned over and asked her mother for something. The mother shook her head, and looked quickly away. The father pressed his child's head to his heart as if to stop its pain. But the child began to cry, and soon her voice attracted the attention of all the passengers. Some wondered what could be the matter; some felt annoyed at the crying.

"In the rear of the car sat a lady who had been riding all day. She had noticed the poor man's family, and had seen the traces of suffering and want in their faces. She heard the child cry. She, too, was a mother. She had heard her own children cry, and she knew what it meant. She took the lunch she had brought to break her own fast on the train, and, going forward, handed it to the mother as she sat holding her child. As their eyes met, both mothers' eyes filled with tears; they had read each other's hearts. The child stopped crying, and eagerly

began to eat. The lady walked back to her seat in the rear, but her act had opened the hearts of her fellow-passengers. Here and there lunch-baskets were opened, and food was brought from all over the car, and laid in their laps. Pocket-books were loosened and silver pieces came pouring into the poor man's hand in a grateful stream. But they could not eat. The mother bent over her child and wept. The father sat looking blankly at the money and the food. He had been thinking bitterly of the cold, indifferent world, till his faith in man and in Divine Providence had almost gone. No work, no food, no money, and this wife and these children to be provided for. Suddenly he breaks down. God has sent his angel into the car to meet him with cruse and cake, as He did Elijah, under the juniper.

"He soon after left the car, with the gleam of a new-kindled hope in his face. His wife looked back to smile her gratitude. They were gone, but they had left a blessing behind them.

"Thinking only that she had done a little more for her Lord, the mother in the rear rode on homeward, happier in her fasting than the richest meal could have made her. For God fed her that day as she had rarely been fed before, and gave to her, as a precious memento, the remembrance that she had lifted a load from a father's heart and dried a mother's tears, and that she had touched the springs of fellow-hearts till they, too, had opened to feel the happiness of giving."

The *America*, of Chicago, mentions a delicate act of charity in a gruff, taciturn old physician in a mining town in Colorado. "A poor, aged person was carefully attended by the irritable doctor. When the preacher had sufficiently recovered to dispense with further medical attention, he asked for his bill. 'Your bill? Here it is,' said the doctor, opening his pocket-book and handing the minister's wife a \$10 bill.

"Blessed is he that considereth the poor. The Lord will deliver him in time of trouble."

J. W.

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 232.)

After wearing my old hat until it began to look too mean, I went to the city intending to get a white one, but returned without letting my exercise be known. Not attending to the pointings of the inward monitor the first time, I had to make another trial; but again through weakness, my resolution failed me, and I procured a black hat. This pretty soon brought on me such trouble for my disobedience to Him who waited to be gracious, that I thought I felt the terrors occasioned by guilt, both day and night, until I became willing to be accounted a fool, to confess my fault to the man I got the hat of, and offered to pay him for the damage done, if he would take it again, and inform me where I could get a white one—which he complied with. My mind was then much bowed, but not enough so yet; for again I returned home without buying one. My supplication was to the Lord to have mercy on me, a poor, weak creature. But I felt his righteous chastisement, until (deeply in the cross) I went to the place I had been informed of, and bought a white hat. I then returned under the enjoyment of sweet peace of mind; more so, perhaps, than some would think it proper for me to mention; procuring stockings of white wool also, I wore them and my new hat, and was so far easy; but I still felt there was inconsistency in my dress, until a

further step was taken. My gracious Master dealt kindly, and as I kept quiet and attended to his gift within, He furnished me with strength to give up, so that I declined wearing dyed garments. Although my reproach now seemed great, the Lord was my hiding-place and refuge. He knew my change to a white dress was in obedience to his will, and that it was much in the cross to my own. I was thus aided to adopt in sincerity that prayer, "I thank thee, O Father, Lord of heaven and earth, for thou hast hid these things from the wise and prudent, and revealed them unto babes!"

Among the scruples felt by Joshua Evans was one to the use of East India Tea. He says:

I had to consider that our fields and gardens were, or might be, (in the country parts especially) plentifully stored with herbs that might really suit our constitutions better than those herbs and shrubs which grow in so distant, and very different climates; particularly as they come hither to us at so very great expense. I thought that perhaps, at first, foreign tees were produced in some families to honor great folks. Was it not deemed genteel to have a dish of tea, &c.? And now, alas! how universal! even amongst those who scarcely know where to get the next meal; so powerful is custom.

The effect in many instances, he thought was weakness of nerves, and a train of other evils which "might be more escaped through a humble observation of becoming temperance."

I kept to my little gift in the ministry, desiring I might faithfully discharge it, though in a stammering way, unpolished; having had little knowledge in the learning of schools. I had often to testify against the spirit of this world, which I feared too many were wedded to. Sometimes I was ready to compare myself to a simple shrub, among many tall cedars, whose appearance seemed comely and topping. I feared I should fall; I was instructed not to look far backward nor forward, but to my inward guide, which gave counsel superior to all the counsel of men or wisdom of the world. It afforded understanding and strength. My exercises were of such a nature I had but few to consult with.

It was once a prevailing sentiment that I was led astray; some said I should come to nothing. I found that a remnant nevertheless silently believed the Lord was on my side, and was able to carry me through, if I was faithful. I was favored to see that "the foundation of God standeth sure," and that, if I could but be preserved in building thereon, nothing could harm me. And, blessed be his name. He pleads the cause of those little ones, who have none in heaven or earth, whom they love in comparison of Him. He will indeed "cast up a way" for these, where there seems to be no way to walk in.

I felt the spring (if I was not mistaken) of pure gospel love flow through me, a poor instrument, at times to my admiration; and have been led in a way very uncommon in this age; which has had a tendency to keep me down, so as to have a fellow-feeling with the tribulated everywhere. My mind was enlarged in love to God and my brethren, with my neighbors and fellow-creatures throughout the world. My soul was often bowed in awful reverence, and covered with harmonizing sensations, under which I had to believe we ought to attend to Divine instruction, even in disposing of and governing the inferior part of his creation, that all might be done

as much as may be, to the Lord's honor. I considered that life was sweet in all living creature the taking away of which, for some time, has been a tender point with me.

I believed my dear Master was pleased to try my faith and fidelity, by teaching me that ought no longer to partake of anything which had life. This indeed was in the cross every way. My appetite seemed to crave flesh more than ever; I seemed to be tried even to a hair's breadth. For a time, my chiefest friends stood aloof from me, and those among the wise of the world despised me. Yet, blessed and magnificent be the name of the Lord, He owned me; sweetened my bitter cups, and not forsaking me in my deepest troubles, He kept my head above the swellings of the waves, when I had to travel in the deeps by day and night, and to partake troubles unknown to mortal man. At times almost despaired of keeping my ground; at other seasons I enjoyed a quietude that none was able to interrupt, and had to partake of that living water which fully satisfies the thirsty panting soul. In times of weakness, I was (as it were) looking back to the "Garlic and onions of Egypt." Having a hard gift of affliction, both with my own nature, and feeling the opposition of those who would scarcely admit of others going into things further than they saw. But I was favored with a staff to lean on, superior to all the friendships of this world. I find it to be a truth, that victory over our first nature is gradually to be obtained by little and little. The growth of pure religion requiring steady watchfulness day by day. To depend to-day on yesterday's experience or exercise, will do no better than to manna wherewith Israel was fed in the wilderness; that, when left until the morrow, stank and bred worms. So it is in trusting to form experience in religion.

I did believe it was the Lord's requirements for me, for causes best known to Him, that I should be cautious of taking life, or eating any thing which life had been. And although evil spoken of by many, I was often somewhat like "a lamb dumb before his shearers; having little to say, and sometimes not a word, when bitter reflections were cast on me in plenty. I endeavored to retire to the sure foundation, the Divine gift within, whilst those storms were passing over here. I found safety, as my mind was humbled; having faith to believe the very gates of hell could not prevail, as I kept in this situation. When my mind experienced the seasoning virtue of Truth, I could love them that loved not me, and wish well to those who reviled me.

(To be continued.)

Mary Alexander says, our beloved friend Martha Routh did not communicate much during her last illness; yet, sufficient fully to evince that her mind was steady upon the Divine power, though at seasons under unspeakable conflict. Utterance was very feeble and broken, but her expressions were strong and lively in substance. "My mind," said she, "is fast anchored to the Beloved of souls." "I want my fellow pilgrims to know, that there is a rest prepared for the people of God." She rejoicingly acknowledged, that she witnessed a state comparable that of a morning without clouds; but, said she, "I have known many plunges both by sea and land. I think the end is not far off." Her repeated, solemn request to those present, was, "crave the release of my spirit, in the Divine will, not otherwise." There was a sweetness and solemnity on her countenance very comfortable to those present. The separation of her spirit

from its earthly house was so easy as scarcely to be perceived.

Patience Messer and the nurse only were present at the close. She died at the house of Simon Bailey in the Seventh Month, 1817.

FOR "THE FRIEND."

Historical Notes, Respecting the Society of Friends.—No. 6.

In the last number of this series, mention was made of the remarkable power that attended the preaching of some of the early ministers in the Society of Friends. Richard Hubbertorn in writing to Margaret Fell from London in 1658 says, "The Lord is gathering in many in this city daily; there are many meetings full and large, where there is any to declare the Truth amongst them; and they that are great in the earth, the power of Truth shines through them, and is drawing them in daily. The priests confess that there is such a power amongst us, that none who come to us can escape; and they exhort people not to come to us." The ministers among Friends were conscious that their success depended on the extension of this power, and therefore were careful to move under its influence. Of this Thomas Wilson gives an instructive example. He was paying a religious visit in Ireland, when he felt the motion of life in him for travelling to cease, and he durst go no further, but felt that he "must wait on the Lord to know his blessed will and good time," so he employed himself in honest work, until the way again opened to go forward in his religious service.

The experience of all ages has shown that whatever strongly affects the mind, often acts on the nerves and muscles of the body. It was therefore a thing to be expected, that outward trembling and nervous agitation should accompany the convicting power of Divine grace, which attended the ministrations of the early preachers among Friends. John Banks says, that when he attended a meeting of Friends at Pardshaw, "the Lord's power so seized upon me in the meeting, that I was made to cry out in the bitterness of my soul, in a true sight and sense of my sins, which appeared exceeding sinful; and the same day as I was going to an evening meeting, I was smitten to the ground with the weight of God's judgment for sin and iniquity."

Thomas Wilson also relates, that, on one occasion, "The Lord's power arose in the meeting, and fell mightily upon me, to the breaking and tendering of my heart, and a glorious time it was, as the mighty day of the Lord; so that great fear and trembling seized me, inasmuch that the table whereon I leaned was shaken." Such experiences seem to have been very frequent; and it was owing to these that Friends became known by the popular nickname of Quakers. In 1655 George Fox published a paper to those who made a scorn of quaking and trembling. In this he shows by the testimony of the Scriptures that the prophets and holy men of old trembled at the power of the Lord; The apostle Paul, when he came among the Corinthians, was with them "in weakness and fear and much trembling that their faith might not stand in the wisdom of men, but in the power of God;" in that power which made him to tremble. This power, George Fox tells them, it is that the world and all the scoffing teachers scoff at and scorn; so that they that witness trembling and quaking wrought in them by the power of the Lord, can scarce pass up and down

the streets, but with stones and blows, fists and sticks, or dogs set at them, or they are pursued with mockings and reproaches."

Similar effects were produced a century later, when John Wesley, George Whitefield, and other zealous men proclaimed to a backslidden people the necessity of repentance and reformation.

John Wesley thus describes the effects produced by the preaching of Berridge: "I heard many cry out, especially children, whose agonies were amazing. One of the eldest, a girl of 10 or 12 years old, was full in my view, in violent convulsions of body, and weeping aloud, I think incessantly, during the whole service. Great numbers wept without any noise; others fell down as dead; some sinking in silence; some with extreme noise and violent agitation."

"Scenes of this kind," says Lecky, "continually accompanied the preaching of Wesley in the first years of this movement, and he has himself recorded them in his journal. Thus, preaching on one occasion among the criminals at Newgate, he tells us, 'they dropped on every side as thunderstruck.' . . . At Baldwin street, my voice could scarce be heard amidst the groanings of some and the cries of others.' At Wapping, 'some sank down, and there remained no strength in them; others exceedingly trembled and quaked; some were torn with a kind of convulsive motion in every part of their bodies, and so violently that often four or five persons could not hold one in their arms.' One woman was offended greatly, being sure they might help it if they would. . . . and was got three or four yards when she also dropped down as violent an agony as the rest."

Indeed similar results have generally been seen where any intense and long continued feeling affected the public mind. The Christian can rejoice at anything which shows the operations of God's power on the heart of man; but it must not be forgotten that such physical manifestations are not a certain proof of the exercise of that power, because they may be produced by anything which deeply affects the mind, or may be, and often are, the effects of nervous sympathy, and are symptoms of disease more than of grace.

Our Saviour gave us a text of the value of professed conversions when he told his disciples, "By their fruits shall ye know them." Unless the converts manifest by their godly, self-denying lives that they are really living under the government of the spirit of Christ, but little or no good will be accomplished by their participating in the excitement of a revival.

Our early Friends did not build much upon these unusual outward phenomena, but their writings abound in exhortations to a holy life and conversation.

In McMaster's description of the great religious excitement which arose in Kentucky about the beginning of the present century, by which numbers fell to the ground overcome by their emotions, in the course of the meetings, there is a statement which shows how much was owing to the surroundings which acted on the nervous system of the patients: "At no time was the 'falling exercise' so prevalent as at night. Nothing was then wanting that could strike terror into minds weak, timid and harassed. The red glare of the camp-fires reflected from hundreds of tents and wagons; the dense blackness of the flickering shadows, the darkness of the surrounding forest, made still more terrible by the groans and screams of the 'spiritually wounded,' who had fled to it for

comfort; the entreaty of the preachers; the sobs and shrieks of the downcast; the shouts and songs from the happy ones, were too much for those over whose minds and bodies lively imaginations held full sway. The heart swelled, the nerves gave way, the hands and feet grew cold; and, motionless and speechless, they fell to the ground."

J. B. Finley, afterwards a Methodist preacher in the West, having a desire to witness these curious scenes, when he was a young man, visited a meeting at Cane Ridge in 1801. He had great confidence in his manhood and courage, and had no fear of being overcome by any nervous excitability. But, when he arrived on the ground, and saw a vast crowd agitated as if by a storm, some singing, some crying for mercy, some shouting vociferously, a strange sensation came over him. "My heart beat tumultuously, my knees trembled, my lips quivered, and I felt as though I must fall to the ground. Indeed, I became so weak and powerless that I found it necessary to sit down."

A writer, commenting on such scenes, judiciously remarks: "The excitement that at times pervades great throngs of people and crowded meetings is as merely physical as are the effects upon the muscles of the human body, which have at times accompanied it. The stimulation of religious emotion by arrangements of this kind is a means to which religiousists of all classes—pagans as well as Christians, and Roman Catholics as well as Protestants—have had recourse. But 'that which is born of the flesh is flesh;' and the magnetic force which pervades crowded assemblies is but a refined sort of intoxicant, which no transmutation of forces will ever convert into spiritual energy. Like all merely natural forces, and unlike those which are of the Spirit, it is followed too often by a powerful reaction resulting in torpidity and deadness as great as that out of which its subjects had been awakened. An experience of this sort must be exceedingly injurious to the person who undergoes it."

The experience and observation of many have confirmed the truth that a deadening reaction generally follows times of nervous excitement of those who partake of the emotions that prevail in crowded revival meetings and are numbered among the converts. It is often the case that a large proportion, as the excitement subsides, fall back into their old ways, and show no real change of heart and life. The whole process has a hardening effect upon them and renders them less susceptible to the convictions of the Spirit. It also has a hurtful influence on the community in which they live, tending to produce the impression that religion is little more than a nervous excitement, and its professors either weak-nerved or deluded people. Nothing but the grace of God, the Spirit of Christ operating on the heart, can effectually change a man, redeem, sanctify and make him a fit temple for the indwelling of Christ. It is the continued extension of this Divine Grace which keeps him from again falling into sin, and finally establishes him as a pillar in the house of God, which shall go no more out.

It is good to be zealously affected in a good cause. And there is no better cause than turning men from darkness to light, from the power of Satan to God. But in this work we should bear in mind that it is only as the Spirit impels, leads and qualifies; in other words—uses man as an instrument—that he can labor successfully. William Penn, in addressing his fellow-ministers, says: It is the Spirit of the Lord, imme-

diately, or through the ministry of his servants, that teacheth his people to profit; and to be sure, so far as we take Him along with us in our service, so far as we are profitable, and no farther. For, if it be the Lord that must work all things in us for our salvation, much more is it the Lord that must work in us for the conversion of others." J. W.

FOR "THE FRIEND."

Removal of the Southern Utes.

C. C. Painter, agent of the Indian Rights Association, has made a report, based on personal examination of the premises, on the subject of the removal of the Southern Utes from the State of Colorado, from which the following is extracted:

"The Southern Utes, composed of three bands, the Muanche, the Capotes and the Weeminche, some nine hundred and fifty in all, are now living upon a part of their original lands, under an agreement ratified by Congress in 1880, which, greatly reducing their boundaries, entitled them to allotments in severalty of 'an abundance of good agricultural land,' with horses, wagons, agricultural implements, and stock cattle for their reasonable wants; also, 'such saw and grist mills as may be necessary to enable them to commence farming operations,' and their *pro rata* share of perpetual annuities amounting to \$75,000, and schools for the education of their children, in addition to the provisions of previous treaties for food and clothing.

"Their reservation, lying in the southwestern corner of Colorado, is 110 miles long by 15 miles wide, and is described by the Commissioners, who negotiated an agreement with them for its surrender, as 'traversed by the following rivers, to wit: the Navajo, San Juan, Blanco, Piedra, Pine, Florida, Animas, La Plata and Mancas, besides other smaller streams, and containing about 350,000 acres of rich farming land, which can be irrigated from the above streams at but small expense.' The agent in charge of the Indians at the time of their removal to this agency estimated the agricultural land at about 24,000 acres, but the larger estimate is doubtless the more correct.

"There is no question as to the quantity or quality of their land being adequate to the needs of these people. There is no question as to their right to hold it as their own. On the other hand, it is well known that no agent in charge of these people since the arrangement of 1880 has been furnished the means promised in that agreement to carry out its provisions."

As to the lands proposed to be given to these Indians in Utah, in exchange for those they now inhabit, the report says:

"If it is the design of the Government to place the Indians in a country where they must here—agriculture being impossible—this proposed reservation has been wisely chosen. Of its 3,000,000 acres of land there are not more than 400 or 500 acres that can be irrigated, not including the Valley of the San Juan. What can be done there depends upon the liberality of Congress. The Mormons have worked at the problem for a number of years, have expended, according to Bishop Hammond, \$100,000 in the attempt to irrigate from that stream, but the effort, Dr. Childs, one of the Commissioners, says, is 'a failure.'"

"The settlements attempted along that river have been for the most part abandoned, and the settlers would gladly take pay for their improvements.

"Between the Blue Mountains and the Colo-

rado line is a dry valley which, with an abundant supply of water, would be valuable for agriculture, but it is a barren desert, without a drop of water that can be used for irrigation. Flowing from the Blue Mountains to the northwest, is Indian Creek, which can be made to irrigate some 90 to 125 acres. Flowing toward the south and southeast from the mountains, are the north and South Montezuma, along which are some valuable lands, but there is water for only about 300 acres. These streams drop into box cañons, and disappear in the sands for the greater part of the year. To the southwest is Headquarter Creek, which furnishes water for the headquarters of a cattle company, but not for irrigating purposes. To the north is Hatch's Run, which is near the northern line of the proposed reservation. It flows from a spring and makes a wet place of a few acres, but furnishes no water for agricultural purposes.

"Excepting the San Juan River on the south, which the Mormons have failed to control after a long and expensive experiment, these are the only waters for irrigating purposes on this land after the snow has melted. If the Indians are removed to it, they must, *per force*, become herders, for their opportunities for agriculture would be small indeed. Allotted farms for the tribe here would be an impossibility. If brought here they must continue to be a tribe, holding tribal lands. They must continue to be nomads, following tribal herds over tribal ranges, and just as at a time when the cattlemen all over the country agree in saying that the day of large herding is coming to a close; that herding as an exclusive pursuit cannot be made profitable; that cattle must be raised on farms which are devoted to a variety of products."

"Briefly stated, the case is simply this: It is proposed, at a large expense to the general Government for present arrangement, and for permanent future support and military police control, to gratify a part of the people of Colorado at the expense and against the protest of another portion of her people, as well as of those of Utah, to remove the Utes from these confessedly good lands, which belong to these Indians, and on which they could, without great expense, if the Government will fulfill its treaty obligations, be made self-supporting citizens, to a country in which this can never be done—to a country which is by nature adapted, in the language of an army officer who is well acquainted with it, "only to be the hiding-place of renegades and outlaws."

FOR "THE FRIEND."

Earth-Worms.

Among the many indications of the peculiar mildness of the present winter, must be reckoned the unusual activity of the common earth-worms. These humble, but interesting inhabitants of the soil appear to be sensitive to cold, and in the winter season ordinarily retreat to the bottom of their holes, which are often several feet in depth, and sink beyond the reach of frost. As a further protection the worms are in the habit of stopping up the entrance to their holes with pieces of leaf or other materials which they find on the surface of the ground.

For some weeks past I have been often noticing their castings, which had been freshly deposited about the mouths of their holes, proving that the occupants had been active and feeding, according to their habit in warm weather.

The body of a worm consists of a large number of almost cylindrical rings or segments, each furnished with minute bristles. By the aid of

their affixed tails worms can retreat with extraordinary rapidity into their burrows. They are semi-aquatic, and have been known to survive four months submersion in water, while the exposure for a single night to the dry air of a room has proved fatal. They are nocturnal in their habits, and at nights may be seen crawling about in large numbers, but usually with the tails still inserted in their burrows. When film of mud has been left after a heavy rain, traces of the worms are often to be seen in considerable numbers.

In the spring of the year, they often lie just beneath the mouth of their burrows; and many of them are seized upon by robins and other birds.

Charles Darwin, who made many interesting observations on these animals, says their food consists of decayed leaves of cabbage, horseradish, onions and other plants. They are also very fond of raw fresh meat. They swallow also an enormous quantity of earth, out of which they extract any digestible matter which it may contain. The residue is thrown out in little piles about the mouth of their burrows. It is this habit which makes the earth-worm so important an agent in the formation of soil.

Of the magnitude of the operations of the little animals, probably few persons are aware. Among many illustrations of it, Darwin relates that in 1842 a quantity of broken chalk was spread over a clay field near his house, which had existed as a pasture for many years. Twenty-nine years afterwards a trench was dug about that part of the field, and a line of white nodules of chalk could be traced on the sides of the trench, at a depth of 7 inches from the surface. The mould therefore, excluding the turf, had been thrown up at an average rate of .22 inch per year.

Another field was ploughed in 1841, and the harrowed and left to become pasture-land, was so thickly covered with large and small flints (some of them half as large as a child's head), that it was known as "the stony field." Darwin says: "I remember doubting whether I should live to see these large flints covered with vegetable mould and turf. But the small stones disappeared before many years had elapsed, as did every one of the larger ones after a time; so that after 30 years a horse could gallop over the compact turf from one end of the field to the other, and not strike a single stone with his shoes. This was certainly the work of the worms."

When a stone of large size and irregular shape is left on the surface of the ground, rests, of course on the more protuberant parts, but worms soon fill up with their castings all the hollow spaces on the lower side, for they like to shelter of stones. As soon as the hollows are filled up, the worms eject the earth which they have swallowed beyond the circumference of the stones; and thus the surface of the ground around them is raised. As the burrows excavated directly beneath the stone after a time collapse, the stone sinks a little. Hence it is that boulders which at some ancient period have rolled down from a rocky mountain or cliff to a meadow at its base, are always somewhat imbedded in the soil; and when removed, leave an exact impression of their lower surfaces in the underlying lime mould.

Heusen, a German naturalist, calculated from the number of worms which he found in a given space in a garden, that there are 53,767 in a acre. But in the fields, he believed they are no more than half so numerous. Many observa-

tions on the amount of soil brought up by them show that it varies—sometimes being as much as 15 tons to the acre annually.

Darwin closes his observations with the following remark:

"When we behold a wide, turf-covered expanse, we should remember that its smoothness, on which so much of its beauty depends, is mainly due to all its inequalities having been slowly levelled by worms. It is a marvellous reflection that the whole of the superficial mould over any such expanse has passed, and will again pass every few years, through the bodies of worms. The plough is one of the most ancient and most valuable of man's inventions; but long before he existed the land was in fact regularly ploughed, and still continues to be thus ploughed by earth-worms. It may be doubted whether there are many other animals which have played so important a part in the history of the world, as these lowly organic creatures." J. W.

It is a great mercy truly to be fitted for the companionship of the "spirits of the just made perfect," and this is only effected through suffering, either mental or physical, and many times both. J. S.

FOR "THE FRIEND,"
GOD'S PROMISE.

"While the earth remaineth, seed-time and harvest, and cold and heat, and summer and winter, and day and night shall not cease."

The earth, a portion of God's universe,

Turns, pausing never in its onward path;

And by his wisdom, all its times and seasons,

Their sure appointing hath.

They, who lift our sand-hills on its surface,

Blind—lacking faith—and deaf from noise of strife,

Forget the Father's love-kindness ever

Runs through all plans and purposes of life?

When'er I sit and read the Bible stories

Gilded by promises so firm and true,

That still their glory falls across the ages—

Lighting all darkness up for me and you;

And that our hearts are never to be true,

Our eyes grow dim with mingled doubt and fear,

For never yet hath any promise failed us—

No sea hath opened but our God was near.

Year followeth year! Seed-time and golden harvest

Await the toiling of our hands to bless.

Fair summer dwells with us in queenly beauty,

Folding all nature in her warm caress.

Our woodlands hear the music of her coming

And tinkle their halls with freshest tones of green;

The meadows weave their carpets bright with flowers,

And polishes the brooklets silvery sheen.

Year followeth year. The winter's cold and sternness,

Work on the miracle of life through death.

Always there comes the comfort of their teaching

That traps with keenest bliss each failing breath.

They come, and lock the store-house of the nations—

Holding the next year's bounty safe from barn;

Moving in silence, with unerring fingers

Forming anew the spring-time's gladdening charm.

Year followeth year. No day is ever missing

From out its place in all the centuries long.

No night forgets to keep her quiet terrors,

Lulling the tired earth with tenderest song.

Though storms may come and tempests darkly lower,

All flesh may see the rain-bow's promised light—

May rest in arms whose strength a sheltering tower,

Doth offer timid hearts in life's dark night.

O fools and blind! To grope in outward darkness

To cry: "The Spring doth tarry, toil were vain!"

To fold strong hands, when, since creation's dawning

They're failed the early and the latter rain!

Enough is sent to feed earth's hungry millions

With earthly bread, and bread of Life Divine,

When human hearts and hands and wills combining,

The Heavenly Will in earthly life inscribe.

L. C. RAY.

SELECTED.
THE LIVING GOD.

BY MARGARET E. SANISTER.

The old, old cry, the heart-cry of the ages,
When flesh and soul are spent, and life runs low!
No dead word graven on the mystic pages,
But throbbing yet with longing, strife, and woe,
For God, the living God, we try in yearning,
In need, in weakness, in pain, in death!
"Stoop down, far heaven above!" behold us, turning
To heaven for strength, from these low valleys of earth.

We are like children in a strange great city,
And one, whose hand we held, is left away!
Lo, in the crowd we wander orphaned! Pity
And care for us, O living God, to-day!
We are like sailors on the black waves tossing,
The stars above come, the ship is strained apart!
Behold, O living God! what gulfs we're crossing,
Behold and hear! cry fainting flesh and heart.

We thought, awhile ago, our hands were laden
With such sweet fragrance, leaf and flower and vine,
That to our eyes could come no vision strident,
That our lips would press no bitter wine!
Illusions vanish! Empty hands we offer,
And tear-dimmed eyes gaze upward to Thy seat.
O living God! though we have naught to proffer,
Ourselves we fling, face downward, at Thy feet!

For Thou, thyself, art comfort and salvation;
Art food and strength and light and sure defense;
Come to our souls in blessed revelation,
Flood with Thy tenderness our fainting sense.
O living God! though we be spent and dying,
In Thee is shelter, in Thy love is rest,
And so the age-old cry our hearts are crying:
We cast our weakness, Father, on thy breast.
—Christian Advocate.

FOR "THE FRIEND,"

The Forum.

The Second Month number of *The Forum* contains several thoughtful articles which embody views and sentiments that are interesting and valuable.

One of these articles is on "The Ethics of Property," by W. S. Lilly. The writer asserts that the moral law is the foundation of civilization—"to obey it is the great good of nations as of men; to violate it, the chief evil;" and to it must the appeal be made in the great controversy respecting property now agitating the world.

The right to private property he regards as a natural right; and quotes from Aquinas: "The possession of riches is not unlawful, if a man possess justly what he owns, and use it in a proper manner for himself and others." But to get out of men the utmost exertion of which they are capable, for the smallest wages which they can be induced to accept, is not just. "If I give him less than an equitable price for his work, I do in fact rob him. And this is at once the most common and the most disgraceful form of theft."

"But suppose that a man's property has been justly acquired; to render his possession of it valid according to the moral law, there lies upon him the obligation of employing it in a proper manner for himself and others. A man has no right to do what he likes with his own. He has only a right to do what is right with his own. Of the material surroundings which he calls 'mine,' he is but a trustee. The ultimate and inalienable ownership is in the human race. The community is the over-load, not merely of the manufacturer of the soil, but of the manufacturer, the shop-owner, the banker. The very constitution of civilized life gives rise to the duty that ownership must be made a common good to the community."

Henry Charles Lea, in a paper headed "Key-Notes from Rome," comments on a statement made by Daniel Dougherty at a Roman Catholic congress held in Baltimore in the Eleventh Month last, in which the orator complained that "We American Roman Catholics have silently submitted to wrongs and injustices in manifold shapes, and from time immemorial. The highest honors of the Republic are denied to us by a prejudice that has all the force of a constitutional amendment. Political parties in the past have sought to deprive us of our constitutional rights, and we are branded as tools of a foreign potentate."

In reply to this, H. C. Lea shows that the severance of Church and State is a fundamental principle of the American Constitution. But that the papacy claimed, and still claims, the power to override all merely human laws. Its history "from the time of Gregory VII, in the eleventh century, is a history of political intrigues and wars, in which every kingdom in turn was obliged to struggle to retain control over its own internal affairs." Pope Pius IX, in the syllabus of "December, 1864," condemned as an error the assertion that the popes had ever exceeded the limits of their authority or had usurped the rights of princes.

"Thus the papacy of to-day is not simply a spiritual power, but possesses, according to the received doctrines of the church, an indefinite jurisdiction over temporal affairs throughout Christendom, which can be enforced at pleasure. The pope claims the right to intervene in the domestic concerns of any nation, and to abrogate its laws when he considers that the interests of the church are at stake; and that all citizens owe him obedience in whatever he may command."

In view of the political activity of the papacy, the probability is great that the time will come when our Catholic citizens will be put to the strain of electing between the allegiance due to the state and that due to the church. The *prejudice* of which D. Dougherty complains may therefore fairly be regarded, not as intolerance, but an instinctive precaution against dangers which grow out of the claims of the papal system.

L. Woolsey Bacon, in "A Political Paradox," shows that men outside of a political party have more power over its movements than inside of it. The course of a party is determined, not by its members, but by its leaders; and the course of the leaders, in close elections, is determined by the necessity of getting votes. The wishes of the man who "belongs to the party," and whose vote is certain anyway, count for nothing at such times. But much will be done to secure the votes of outsiders, or to retain the votes of those of whom there is a serious danger that they will bolt, if these remonstrances are not heeded. "So that it is a rule of practical politics, 'The way to influence your party is to get outside of it.'"

FOR "THE FRIEND,"

On page 198 of present volume is an article entitled "His Heart in it," telling of a boy who had only been two days in the employ of a firm, and yet was so interested in its success that on seeing notice posted on a bulletin of their being awarded a premium for some of their manufactures, threw up his cap with a hearty cheer, saying, "We have taken a medal." That firm could not afford to part with that boy, nor with the man who was once the boy, for his heart was in it. His fortune followed.

There is a spirit in man, and the inspiration of the Almighty giveth understanding (Job xxxiii. 8). And this same instructor that Elisha speaks of is still with the sons of men, and if heeded will lead in paths of blessing even in this world, and afterwards in glory.

When reading the article referred to above, the writer's mind turned back some forty years to a case somewhat similar, of a tall, angular young man and wife with two or three children from the north of Scotland. They settled in a growing town on the shore of Lake Michigan. In those days, money was almost an unknown quantity in many a mechanic's and laborer's family, the currency being *store orders*. Truly the prospects ahead for a young man with small family were anything but encouraging. But Tom, or "Long Tom," as his chums often named him, was nothing daunted. His mind was made up, although often refused admittance, and often admonished by his friends not to debase himself by persistent asking for employment from one certain manufacturer in the town into whose employ he was bound to get, although every-thing seemed to oppose. But success at last crowned his Scotch obstinacy, and Tom was hired at a small pittance to do odd jobs around. He started in with a will, and in a short time his employer found that he could not do without him, for late and early he was at it. He was soon promoted, and in about two years was foreman of the place.

The proprietor we are told died some time ago, but Tom now owns and runs the same business in the same place, but on a far larger scale, being now a man full of days, surrounded by a family of some 10 children and 22 grandchildren; and the same little wife that came with him (both Christian professors) from the far north Orkney Isles, still graces his family. The sequel of both these men's lives gives us reason to believe that it was by obedience to the leadings of the spirit of God that they were led to lay a firm hold on the worldly calling set before them, and thereby were blessed, honored and prospered. But on account of disobedience to the leadings of the spirit of the Creator within us, our world is strewn with wrecks of our race, over which even angels may weep. How many a proud father and mother takes a son, "a horn blacksmith," and will go to work with a will to make a doctor of him, and when made, by him many a one fills an untimely grave. Or the mother takes a beloved boy, a born carpenter, or a mason, and makes a preacher of him.

No wonder that infidelity abounds, when men mistake their calling and undertake to preach without the power of the Holy Ghost. They read manuscripts written too often by their own will and wisdom. But in these days of progress, science has come to the relief of these poor creatures, and manufactures have been started in a quiet way in our leading cities, where sermons are written and folded in fine style, all ready to be opened on the "sacred desk," and preached to the congregation. (The writer was informed by one who is a minister in the M. E. Church that he has seen packages of these manufactured sermons come by express to leading ministers here on this Pacific coast.) And this comes through not seeing their calling, whilst those who were called of God were told to stand aside unless they could show a *college diploma*. And through thus prostituting their calling, how many a fine farm on our wide domain is covered yet with thistles and thorns, also blacksmith forges are standing cold, and carpenter's benches not occupied.

[The remarks of our correspondent on preaching apply particularly to those who follow that employment as a means for making a living. There is nothing in the nature of true ministry which renders a skilful blacksmith, carpenter or farmer, unable to act at the same time as an efficient and useful minister of the gospel].—Ed.

This same want of knowing one's calling, or willingly ignoring it in all the walks of life, is causing to-day untold miseries. From the Judge on the bench, and the lawyer at the bar, down to the menial cleaning our street gutters, everywhere, though not in all cases, we find men placed in wrong positions, and their unfortunate wives and children suffering with them the consequence. When, O Lord, when will men learn that there is a spirit in man, and that the spirit of Thee, the Almighty, giveth inspiration.

T. D.

SAN LEANDRO CAL., Second Month 10th, 1890.

Natural History, Science, &c.

The Extinction of the Buffalo.—In the settlement of the West much was done to which, let us hope, the historians of the future will be a little blind. The brave and somewhat terrible men who crossed the Alleghenies into a then apparently illimitable wilderness developed and transmitted to their children a certain disregard for the rights of the natives, brute and human, with whom they came into contact, which has only now begun to disappear. A sad and bitter lesson had to be learned by the Western people before they were able to appreciate the sentiment which should have availed to make the progress of civilization less uncivilized. This lesson was sternly enforced when they suddenly realized five years ago that of the uncounted millions of buffalo which had roamed the prairies at any time prior to 1870 in dense herds, covering acres on acres of land, scarcely a thousand were left. An industry that might easily have earned \$25,000,000 annually to the Northwestern and Southwestern sections had been literally destroyed, and destroyed in a way as stupid as it was brutal. No event resulting from Western settlement is more shocking or more unfortunate than the extermination of the American bison.

In a recent publication issued from the Government Printing Office, Superintendent Hornaday, of the National Zoological Park, has given an exhaustive account of this magnificent animal, certainly the noblest ruminant that has ever trod the earth, of his habits, his haunts, his place in American zoology, and of the wicked manner of his taking off. It is a highly interesting book, but it can only be read with an ever-increasing sense of pain and shame. It is a reasonable estimate that the great southern herd of buffalo contained in 1870 at least 6,000,000 animals, and the northern herd about twice as many. In fifteen years all these majestic beasts have been killed.

It was the "still-hunt" that exterminated the buffalo. He was taken at a complete disadvantage and murdered by tens of thousands. The buffalo was stupid. He could not understand a rifle shot. He was dependent, too, upon the leader of his band, and did nothing except what the old cow suggested. The hunter, approaching the herd to leeward, had only to get a stand where he was out of sight, and he could go ahead and slaughter the cattle as fast as he could drop cartridges into his rifle. The buffalo would hear a noise they could not locate, see a little puff of white smoke they could not under-

stand, and would watch each other drop to the earth without the slightest appreciation of the cause. In this way a few thousand hunters in a dozen years were enabled to destroy forever an animal of the highest economic value to the country. To-day there are less than 700 wild buffalo in existence.

Mr. Hornaday makes some very valuable suggestions. He points out the danger of the extinction of the species by crossings and inbreedings, and urges that steps should be immediately taken for the protection and care of a little band of 200 now in the Yellowstone Park. Experiments in breeding buffalo bulls to domestic cows have been highly successful, and a now going on to an extent which justifies the fear that in another score of years the genuine buffalo will not exist at all. Congress should give heed to this warning, and should keep ever in view the lesson of the great crime which has made it necessary. Similar "sport" has reduced the bands of elk, moose, caribou, and other big game that was once so plentiful in our forested mountains and plains to a pitiful few. It threatens our seal, walrus and other marine air-bearing animals. Its result is inevitable unless Congress strikes such a blow at it as will break it up forever.—*New York Tribune*.

Indian Relics in Connecticut.—Discoveries of Indian relics in abundance in all parts of Connecticut, save in the extreme northeast, within the last twelve months, have been more numerous than ever before, and of great importance to historians and antiquarians interested in the State. The latest explorations were made at the royal cemetery of the Pequots, in India town, between Ledyard and Stonington, in New London County, where, on the Pequot Reservation, are the royal sepulchres of the tribe. In past years many old graves have been torn open and rifled of bone lanceheads, shell jewelry and the like. But the heavy and almost incessant rains of this winter have washed out quantities of long and sharp arrow-heads of a peculiar white stone not found in Connecticut, and some roughly made little receptacles of crushed oyster shells and clay, mixed and baked. These cups, it is said, were deposited offerings of food for the dead. Where these cups came from is a mystery, as it is not known that the Pequot ever practiced the art of pottery. A cup of the description was found on the banks of the Thames River, near Mohegan, some years ago together with a large quantity of wampum. Near by was exhumed the skeleton of a large framed man. It was believed that the vessel was stolen from some of the tribes of Southern Indians.

Narcotics and Anesthetics.—Alcohol is the most deadly of all drugs which destroy body and soul; but there is an enlarging list of others that claim their victims. Chief among these is, of course, opium or morphine, whether used or taken habitually. Then comes chloroform, chloral, and, later, cocaine. A physician often prescribes one of these medicines to relieve acute pain in sickness, or to secure sleep. Perhaps recovery is delayed, and the patient continues the use until he gets to the point of death. Very often he recovers, and then, when he feels a recurrence of pain or sleeplessness, takes the medicine without prescription. He works favorably, and he repeats the dose; and before he knows it, he becomes dependent on The fearful thing about these drugs is, that they enfeeble the will, or even the moral nature. A man or a woman becomes a slave before the

know it, and it is only by physical constraint or by an almost impossible heroism of self-control that one regains his freedom. It is better to suffer long and lie awake many nights with pain than to become a victim to these deadly and most seductive drugs.

Items.

Hoing Evil that Good may Come.—Samuel L. Wagner, of Chicago, sued a broker on the Board of Trade to recover \$3,000 which he had invested in grain. The plaintiff said that he told the broker that he wanted to make the money to give to Foreign Missions, and that he had doubts about the propriety of speculating; said he thought God would forgive the means in consideration of the end sought. The defendant's counsel said that it made no difference whether the speculation was for the benefit of the heathen or for Mr. Wagner himself; the rules and practice were the same in all cases; and Mr. Wagner took his chances just like any body else. The lawyer added, "that the broker only had Mr. Wagner's word, anyhow, that his motive was unselfish." We are glad to hear that the verdict was for the defendant. Of all persons connected with religion, the hypocrite is the worst; next comes the man with character who attempts to make money under religious pretenses. We never deal with a man who advertises as a means of getting custom, that he gives one-tenth of all he makes to the Lord; and we are a little afraid of the man who puts at the end of his business advertisement "Prepare to meet thy God"; but a man who goes into speculation thinking that it is wrong, but that he will communicate with God by his gifts, and expects a broker to treat him in a way different from that of an ordinary investor, is not a lamb, but a wolf in sheep's clothing.—*Christian Advocate.*

Incompatibility of Temper no Ground for Divorce.—Judge Arnold, in Common Pleas, No. 4, refused to grant a divorce in the suit of a man against his wife, on the ground of desertion. The parties are 34 years of age, the oldest of their children being 55 years, and the youngest 15 years. The Judge is commenting upon the following sentence:—"It forms a sad story of family jars by parties who seem to have neglected, if indeed, they did not positively avoid, their duties and obligations. The testimony is a burden of small complaints by persons at their time of life. It indicates a disposition on both sides to breed and foster contention rather than the affection and concension which should exist between husband and wife. There is, however, neither a willful and malicious desertion without cause, nor a case of cruel and barbarous treatment proved. Neither is moral wrong nor personal violence proved. What is shown is incompatibility of temper, which is not recognized by our law as a cause for divorce. If these parties had given some of the strength which was wasted in disagreement in an honest effort to agree and live together, they would succeed beyond their most extravagant hopes. They must do this, for we see no reason to divorce them. What they want is not a divorce, but a reconciliation; not the decree of the law, but the ministrations of the church, to which we commend them." The report of the Master in favor of a divorce is not set aside, and the decree of divorce refused.—*Exchange.*

Epidemic Evence.—The New Year's resume of the Crozin trial will establish the proof of some of the deliberate attempts at jury-bribing, but also the fact that a considerable portion of the evidence offered had its sole foundation in the imagination of the witness, and its only conceivable motive in the dramatic attraction of a personal connection with a great sensation. Start the rumor of "a middle-aged man, with a beard, of Third Street and W. Avenue," and an ever-increasing number of vulnerable citizens inhabiting the vicinity of those thoroughfares will manage to remember that they heard the sound of curses and stifled cries on the night of the alleged tragedy, and on their return from a Third street club house noticed two suspicious-looking men sneaking along in the direction of the hotel above named, and answering in all details of their appearance the description of the pre-

sumptive murderers. If the history of the crime should prove more than usually melodramatic, the supply of such evidence is apt to become phenomenal, but may subside as suddenly if the supposed victim should, after all, turn up safe and alive. The jurist Pitaval, in his *Ceuses Celebres*, quotes a case where one Henri Labastide, a citizen of Marseilles, was convicted and executed on the testimony of half a hundred different witnesses—mostly women—whose detailed accounts of their experience were afterwards found to have proved nothing but the exuberance of the myth-making penchant.—*Exchange.*

A ripe scholar appears stupid in a company of small-talkers; a small-talker appears stupid in a company of scholars. Many a child is backward in talking because it knows enough to be timid about expressing itself; many a child talks early because it does not know enough to keep silent. Thought is as likely to be a bridle as a spur.

THE FRIEND.

THIRD MONTH 8, 1890.

Sixty years ago the lottery system seemed so firmly established in this country, and so widely prevalent, that it required much moral courage on the part of the statesmen and philanthropists of that day to attack so gigantic an evil.

The report of a committee appointed by the Legislature of Pennsylvania to investigate the subject, in 1831, states that there were 177 offices for the sale of lottery tickets in the City of Philadelphia alone; that the tickets were drawn on an average more than once a day; and that the system presented "an appalling picture of vice, crime and misery in every varied form."

The publicity given to the evils of lotteries about that time, led to their abolition in Pennsylvania and other States; so that, latterly we believe, Louisiana has the bad pre-eminence of being the only State in the Union which still tolerates the system.

The charter under which the Louisiana Lottery Company operates, still has a few years to run; and so profitable are its privileges, that it is asserted that the managers of the scheme offer to pay off the Louisiana State debt of \$12,000,000, and to build a large public library, on condition of their charter being extended for fifty years.

Some recent developments render it probable that they are feeling their way to secure lodgment in other places, if public opinion should be so much aroused in opposition as to prevent the renewal of their charter in Louisiana. The enormous revenue derived from it is a strong temptation to unscrupulous men to use great efforts to keep in their hands such a source of wealth—regardless of the poverty and misery it inflicts on thousands of their dupes. We do not know what inducements they used to prevail on some of the members of the North Dakota Legislature to vote in their favor. The surprise and indignation felt in the community generally at this action, is well expressed in the following comments of *The Independent*, of New York:

Extraordinary beyond explanation and atrocious beyond characterization is the proposition which has passed one House of the North Dakota Legislature, to sell the State to the Louisiana State Lottery. It is simply amazing. The indignation of the citizens of this State do not doubt, will overwhelm the legislators who have voted for this in-

famous bill, which transfers the lottery of Louisiana to that young and promising State. Think of it. That young and promising State; temperance and gambling; protection of homes and their destruction; the State honestly refusing to enrich its treasury by the license of saloons, and then filling it from the license of lotteries! It is simply astounding that there can be such division in a State like Dakota between the men of the churches and the panders to vice that the lottery should have no knowledge of what the former will endure at their destruction; to believe that even in the turmoil of organization, where the State has not yet got rid of the unruly element that rush in with the first settlers, it can possibly be given over to be the nursery of a vice, which, outside of Louisiana, the public sentiment of the whole country repudiates. We believe better things of North Dakota.

The Governor of North Dakota, it is expected, will veto the Lottery bill, if it should be passed by both branches of that Legislature; so that, at present, the probabilities are, the State will be saved from the disgrace of endorsing such a monstrous evil. But the following despatch to the *Public Ledger*, of Philadelphia, indicates that the Lottery Company are seeking to get a foothold elsewhere, if they fail in Dakota.

"WILMINGTON, Del., Feb. 10. It is rumored in this city that the Louisiana State Lottery company proposes, through certain influence it has secured in Delaware, to have a bill introduced at the next session of the Legislature legalizing the lottery business in this State. The present term of the company expires in 1895, and it is stated that the lottery company desire to remove to some Northern State.

"It is well known that the tickets used by the company have been printed in this city for years. The company printing them recently purchased new property, and has erected a large four-story building, into which the plant will be removed soon.

"It is alleged that money, which the Re-Republicans used in Kent and Sussex counties during the last elections, came indirectly from the Louisiana Lottery Company, and that, in return for the 'boodle,' promises were made that the legalization of the business in Delaware should be supported. In the event of the success of the scheme against the business in North Dakota, an effort will be made to do it in this State, on which the headquarters of the Louisiana Lottery would be removed to this city."

The Lottery Company, it is said, has numerous influential attorneys and agents at Washington, who are paid large sums annually to look after its interests, and to defend it against any attacks made upon it in Congress or in the courts.

Our friend, Josiah W. Leeds, informs us that two bills have been brought forward in this Congress—one by Senator Wilson of Iowa, shutting out of the mails all newspapers containing lottery advertisements; and the other by Senator Colquitt, providing for the forfeiture of charters of National banks that guarantee the payment of lottery prizes.

We hope that all the friends of morality and the lovers of their country will exercise vigilance and zeal in opposing every effort for the longer continuance of this hydra-headed evil; and will promote every judicious measure that aims to lessen its power of doing mischief, and to shorten its existence.

SUMMARY OF EVENTS.

UNITED STATES.—The debt statement shows that the decrease of the public debt during the Second Month amounted to \$6,159,486. Total cash in Treasury \$622,673,015.

Representative Buckeale, of Penna., has introduced in the House a joint resolution authorizing the President to cause a "reconnaissance" to be made for a line of railroad extending south through the Central American States, Colombia, Ecuador, Peru and Bolivia to

the City of Suer, and to detail officers in the public service to prosecute the same.

The bill to discontinue the coinage of one and three dollar gold pieces and three-cent nickel pieces has passed the House; also the bill to permit the Director of the Mint to make changes in the designs on current coins of the United States.

In the United States Senate, on the 3rd inst., Senator Vane ordered a resolution calling on the Secretary of the Treasury for all the papers connected with the lease of the Alaska fur seal islands to the North American Commercial Company, and directing that the Secretary to refrain from executing the same until the subject is inquired into by the Senate. At his instance, the resolution was referred to the Finance Committee. The Government would get about a million dollars a year under the new contract.

The case of the Louisville, New Orleans and Texas Pacific Railroad Company, in the State of Mississippi was decided by the United States Supreme Court on the 3d instant. The question involved was the power of the State to compel railroad companies to provide within the State separate accommodations for the two races. The Louisville, New Orleans and Texas Pacific was indicted for failure to do this under the provisions of an act passed Third Month 2d, 1889, was convicted and fined and appealed. The Supreme Court of Mississippi held that the statute applied solely to commerce within the State. The United States Supreme Court affirmed the judgment of the Supreme Court of Mississippi.

It is reported by the *Manufacturers' Record* that Boston capitalists have bought 33000 acres of land in Lexington County, South Carolina, said by Professor Hitchcock, of Dartmouth College, to be one of the best for making kaelin. Large pottery works for the manufacture of white table ware will be erected on the tract.

Mayor Bently, of Bismarck, North Dakota, has sent out circulars containing the following: "There are strong rumors that the legitimate Lottery bill will be introduced in the Senate, to be given a second reading, and that M. S. Dauphin, President of the Louisiana State Lottery Company, is now in the city. Circulate and forward protests to the Secretary of this Committee at once. Arrange to have leading citizens ready to come to Bismarck to exert their influence against the bill."

Indian Agent Bennett, located in the Indian Territory, has reported to the Indian Bureau that it has just come to his knowledge that an act was passed by the Legislative Council of the Choctaw Indian Nation, about two months ago, authorizing the Choctaw Orphan Asylum Lottery Company. The agent reports that great secrecy was maintained concerning this act, and it was with the utmost difficulty that he succeeded in securing a copy of it.

The Liquor Committee of the Massachusetts Legislature on the 27th ultimo, reported unanimously against enacting a straight prohibitory law, and also against reducing high license from \$1000 to \$500. The same committee reported it inexpedient to appoint a commission to investigate the workings of the license laws of other States. In Prescott, Arizona, says the death list has grown until now it is known that no less than 150 persons lost their lives in the dam disaster. Wickenburg was destroyed, every building falling before the awful assault. Seymour, 12 miles further on, was also wrecked.

The weather on the 1st instant was the coldest of the season throughout Louisiana and the greater part of Mississippi, the mercury at all points outside of New Orleans going below 32° and doing great damage to crops, corn, wheat, &c., and the State of Illinois. The Illinois Central Railroad, between New Orleans and Jackson, are heavy sufferers. Reports from Northern Texas say that hundreds of cattle have been frozen to death during the present cold spell. Ice formed at Savannah, Georgia, and vegetables are killed. At St. Augustine, Florida, the temperature fell to 25° on the night of the 2nd. "Bananas, guavas and early truck gardens are badly damaged. Orange trees are dipped, and, in some localities, the trees have been killed. There will be a great loss on next season's crop, as the trees are now in bud."

One thousand three hundred and forty-six immigrants arrived in New York on the 20th ult.

Last week 737,401 bushels of corn were exported from this port a total of 4,128,854 bushels since First May, at comparison with 2,295 bushels during the corresponding period last year.

The number of deaths in this city last week was 44; being 64 more than the previous week and 18 more than the corresponding week last year. Of the

foregoing 233 were males and 210 females; 74 died of consumption; 38 of pneumonia; 25 of diseases of the heart; 25 of old age; 17 of convulsions; 15 of bronchitis; 15 of Bright's disease; 12 of typhoid fever; 12 of cholera; 12 of inflammation of the brain; 11 of inflammation of the stomach and bowels; 11 of inflammation of the stomach and bowels; 10 of inanition.

Markets.—U. S. 4½'s, reg., 103½; coupon, 105; 4's, 122½; currency 6's, 116 a 126.

COTTON sold in a small way to spinners on a basis of 11.9-16 cts. per pound for middling uplands. **Flour.**—Winter hard, choice, \$15; do fair to prime, \$14.25 a \$14.75; spring bran, \$13.75 a \$14.25.

FLOUR AND MEAL.—Western and Pennsylvania super, \$2.00 a \$2.25; do., do., extras, \$2.25 a \$2.75; No. 2 winter family, \$2.80 a \$3.00; Pennsylvania roller product, \$3.50 a \$4.00; Western winter, clear, \$3.75 a \$4.00; do., do., straight, \$4.10 a \$4.35; winter patent, \$4.40 a \$4.90; Minnesota, clear, \$3.50 a \$4.00; do., straight, \$4.25 a \$4.65; do., patent, \$4.65 a \$5.00. Rye flour was all sold weak at \$2.85 a \$3.00 per barrel, as to quality.

GRAIN.—No. 2 red wheat, 82½ a 83 cts. No. 2 mixed corn, 35 a 35½ cts.

No. 2 white oats, 28½ a 29½ cts.

BEEF CATTLE were in good demand at higher at \$30 a 31 cts. **HILLY CATTLE** were in fair request at 5 a 7½ cts. **PAT COWS** were in moderate demand at 2½ a 3½ cts.

SHEEP were in poor demand, but firm at 2½ a 6½ cts.

LAMBS were in poor request and low at 2 a 5 a 7½ cts.

WOLVES were inactive but firm at 5½ a 6½ cts. for Western, and 5 a 5½ cts. for State.

FOREIGN.—Delegates representing the Home Rulers in Scotland and delegates representing the Liberals of South Wales held a conference in London last week. The conference agreed to co-operate with the Home Rulers in Scotland and Wales, subject to the supremacy of the Imperial Parliament.

The most striking political incident of the week in England was the suspension of Labouchere, the Radical-Liberal leader from Parliament because of his proposed attack upon the Prime Minister. He charged the Government with interfering with the course of justice, with respect to certain London scandals, in which members of the nobility were involved. One charge, to the effect that Lord Salisbury had connived at the escape of one of the persons of the above mentioned scandals, was met with a demonstration in Hyde Park, throwing aside all the time-honored traditions of Parliament, which decree that the word of no member, of high or low estate, shall be questioned, refused to accept as true the Prime Minister's denial. Labouchere's suspension followed, as a matter of course, as did the written Parliamentary statement laid the Speaker no other alternative.

The British steamer *Quetta*, which sailed from Cooktown, Queensland, 11th Mo. 27th for London, has been lost at sea. The steamer struck a rock, but showed no chart, and struck on the rocks at 2½ a. m., near the extremity of Australia, and sank in three minutes. Two hundred and eighty souls were on board, of which 116 were saved, including the captain and several officers.

A committee has been formed in London, with branches at Newcastle and other places, for the purpose of endeavoring to secure a mitigation of the severe treatment accorded to political prisoners in Siberia. A number of workmen's clubs and radical and socialist associations will hold a demonstration in Hyde Park on the 19th inst. in favor of the prisoners now in exile in Siberia.

On the 3d instant returns had been received from all the districts in which second ballots for members of the Reichstag were held with the exception of the districts in which elections occurred on the first ballots, show the election of 106 members of the Centre party, 74 German Liberals and Democrats, 62 Conservatives, 23 National Liberals, 13 Imperialists and 55 Socialists.

The Socialists have now made their way to the front, and are qualified for forming a party in the Reichstag, and are qualified under the rules which govern that body, to introduce bills—a privilege which they have never before enjoyed. The results of the elections promise to place the Socialists in the front rank, as representatives of every populous centre of industry throughout the Empire.

The Russian Government, it is stated, has announced its intention to begin operations soon on the great railway across Siberia. Work will begin at Vladivostok

and at the present eastern terminus of the Russian railway system at the same time. The total length of the line is to be 4075 miles.

The Ontario Government has introduced a new license law, which provides that no liquor shall be sold to boys or girls under 18 years of age, and that no liquor shall be sold to a person under 18 years of age if a hotel keeper receives notice from the parent or guardians of such person forbidding such sale. No liquor shall be sold by any club whatever without a license. Bars on steamboats are to be abolished, but the bill does not prevent the supplying of liquor at tables, or in any other manner than at a bar. The officers may demand the names of frequenters of unlicensed places, and refusal to give such information is punishable.

NOTICES.

The Annual Meeting of FRIENDS' ASYLUM FOR THE INSANE, will be held in the Committee Room Arch St. Meeting-house, on Fourth-day, Third Month 18th, 1890, at 3.30 p. m., at which the annual election of officers of the corporation will be held. The names of members is requested; no special notice will be sent.

THOMAS SCATTERGOOD, Secretary.

The Committee of Westtown Boarding School has appointed James G. McColin, Treasurer of the Institution, in place of Joseph Scattergood, deceased. His office is at No. 119 South Fourth St., Philadelphia.

WESTTOWN BOARDING SCHOOL.—The Spring Term will begin Third Month 18th, 1890. Friends intending to send their children to the school will please make early application to J. G. WILLIAMS, Supt. Westtown, Penna.

WORDS OF COMFORT AND CONSOLATION.—HEN LONGSTRETH, No. 74 Sansom St., has just issued a large edition of the above tract, which consists of selected Scripture texts. Price, two dollars per 100 copies.

DIED, at Hathors' Pa., on the 14th of Ninth Mo. 1889, MARY ANNA KITE, wife of James Kite, in 62nd year of her age.

—on the 19th of Tent Month, 1889, ANNA COPE, wife of Oliver W. Cope, in the 31st year of her age, a member of Abington Monthly Meeting Friends.

—in Philadelphia, at the residence of her brother-in-law, Josiah L. Haines, Twelfth Month 29th, 1889, CAROLINE BENTING FOLWELL, in her 80th year. She was a consistent member of Chesterfield Monthly Particular Meeting of Friends, Burlington Co., N. J., in which her presence and liberality in the meeting were greatly missed. With her it indeed seemed "more blessed to give than to receive," for her charities were many. Her love of nature and literature were markedly, and the sweet lines penned by her husband will be treasured by her many friends. Her funeral was held on the 27th inst., and the comforting power of Saviour leaves the comforting assurance that her will be peace.

—on the 2nd of Second Month, 1890, HANS CORNELL, relict of the late Gervas Cornell, a beloved member and elder of Pickington Monthly Meeting of Friends, who became a daughter of Peter Deborah Taylor, of Clonmel, Ireland, from whence removed with her father and his family to this country, after receiving her education at Newtown Boarding School. Having yielded with a whole heart to invitations of redeeming love and mercy, she was distinguished by a bright example of self-denial, steadfastness and faith in the doctrines and principles of Friends, with a spirit that was ever clothed with charity which embraces as one all who love the Lord Jesus in sincerity; often expressing her belief that it is thoroughly good of heart to be ever ready to all to experience. She was a diligent and experienced attendee of meetings, even when suffering physical health, which she bore with great patience. The last few days of her life, while confined to her bed, were days of great physical suffering, but her mind was preserved in quiet composure, with a sweet and peaceful covering, frequently saying to those around her: "I hope you will all meet me in heaven; intimating there must be a striving therefor. That she quietly passed away without a struggle, at her home in Pickington, on the 8th inst. of her age.

Incidents and Reflections.—No. 214.

FRUITS OF REPENTANCE.

When any person really comes under the power of the Spirit of God, and is led to repentance for their sins, but little confidence can be placed in their sincerity and in the permanent nature of their conversion unless it is accompanied with a corresponding change of conduct. Our Saviour himself has told us, "By their fruits shall ye know them."

In accordance with this principle, is the following statement made by the *New York Sun*: "There is a religious revival in Calhoun, Ky., and Sheriff White, of McLean County, has been among the converts. He is a convert of the right kind, for as soon as he got religion he began to put it into practical shape. He confessed that he had stolen a thousand dollars from the county treasury thirteen years ago, and, after telling of the crime that he had perpetrated and so long concealed, he proceeded to show his repentance. He also thought that something else than repentance was necessary. He did not rest satisfied with bewailing his guilt or shedding tears over it, or asking Divine pardon for it, or warning the brethren against following his example, or promising that he would never again do wrong. The Sheriff of McLean County took another way of showing the genuineness of his repentance and conversion. He restored to the treasury of the county the thousand dollars of which he had defrauded it in 1876! That was the thing for him to do. That looks like practical religion in accordance with the Scriptures. The case is worthy of consideration by any convert who has ever been guilty of a deed like his without pursuing the course that he adopted after repentance."

It is recorded of Titus Africaner, a chief of Southern Africa, that he bowed under the convictions of the Holy Spirit, and confessed his sins. He went to his garden and pulled up the Dukka which he formerly smoked, and stamped its seed into the salt ground, where he knew it would not vegetate. He then returned to his hut, brought out the vessel in which honey-beer was made, and broke it. Both these intoxicating articles had been snare to him. Thus he obeyed the advice, "Bring forth fruits meet for repentance."

A writer in *The Independent* mentions meeting a gentleman who was evidently under deep conviction for sin, and was much troubled about his soul. In vain it was tried to point him to Christ as the "way, the truth, and the life." He seemed to know the truth perfectly. He was a cultured man and was familiar with the Scripture. Some surprise was expressed at his thorough knowledge of the way of salvation. "Oh, yes," he replied, "I know the way. I have been taught in the Scriptures from my youth up. I am the son of a clergyman." Finally, the writer said to him: "My dear friend, for the sake of your own soul, for the sake of the father who taught you, for the sake of Christ who died for you, be reconciled to God; why hold out against Him when you are convinced of your need; when you know the way so well, and are in such deep anxiety for your soul." "Ah," he replied, "I appreciate all these reasons; You say for the sake of my father. There is the trouble. I quarreled with my father and left his house in anger twenty years ago, and have never seen or communicated with him since. Here, indeed, was the pinch. He saw that before he could be reconciled to God he must, at least in his heart, be reconciled to his father, and that he must, as the first fruits of his new life, seek him out and settle the old quarrel."

A child who, like all children, was excessively fond of sweets, disobeyed her mother and helped herself to a plate of rich cake, of which she ate freely. She soon grew feverish, and complained of headache, and was obliged to go to bed for the remainder of the day.

Her mother was anxious about her condition and feared she was going to be ill. On entering her closet, however, the empty plate and the crumbs on the floor explained the mystery of the sudden attack. She went to her child's room.

"Have you been eating anything you ought not, Nellie?"

Nellie looked in her mother's face and saw that she had found out about the cake. It would do no good to deny it.

"Yes, mamma, I ate some cake."

"No wonder you are sick. You took the cake without leave, which was stealing; you disobeyed me by going into the closet when I have repeatedly told you not to do so. Now you are being punished for your sins. Are you sorry, Nellie?" she asked, seeing the child's tears falling fast.

"Yes, mamma," she sobbed. "I'm sorry the cake made me sick, and sorry you found it out."

Her repentance was very much like that of many older people: she was sorry that her sin was found out, and that she had to suffer in consequence; but that was all.

True repentance is accompanied with the forsaking of sin. It is recorded of a Yorkshire preacher, that on one occasion, when he was delivering a searching, practical sermon, one of his hearers, who used in his business a short measure, a yardstick which had once been 36

inches long, but which he had used as a walking-stick—was so wrought upon by the power accompanying the discourse that, interrupting the preacher, he *snapped the measure in two*, and then said, "you can go on now, sir."

The apostle declares that "if any man among you be led by religious and bridleth not his own tongue, that man's religion is vain." The same principle may be stated in more general terms—that a profession of religion, without bringing forth the fruits which it ought to produce, is insufficient. A business letter from a manufacturer of cloth, concluded with a high-flown rhapsody about revivals, and some sermon that had been to him, as he said, "wines on the lees." At the conclusion of reading it, the recipient remarked, "I only wish the fellow would put his religion into his cloth instead of his invoices."

In contrast with this manufacturer may be cited the mason under whom Hugh Miller served his apprenticeship, and of whom he said, "he put his conscience into every stone that he laid."

In Coleridge's "Table Talk" there is narrated an incident which illustrates the power of conscience. A stranger came recommended to a merchant at Lubeck. He was hospitably entertained. In the room where he lodged a portrait was hung with so uncommonly frightful an expression of countenance that it filled his imagination. In the morning the merchant gave him the following history of it: "My father was at Hamburg on business, and, whilst dining at a coffee-house, he observed a young man of remarkable appearance enter, seat himself alone in a corner, and commence a solitary meal. His countenance bespoke the extreme of mental distress, and every now and then he would turn his head quickly round, as if he heard something, then shudder, grow pale, and go on with his meal, after an effort, as before. My father saw this same man at the same place for two or three successive days, and at length became so much interested about him that he spoke to him. The address was not repulsed, and the stranger seemed to find some comfort in the tone of sympathy and kindness which my father used. He was an Italian, well informed, poor but not destitute, and living economically upon the profit of his art as a painter. Their intimacy increased; and at length the Italian, seeing my father's involuntary emotion at his convulsive shudders and turnings, which continued as formerly, interrupting their conversation from time to time, told him his story. He was a native of Rome, and had lived in some familiarity with, and been much patronized by, a young nobleman; but upon some slight occasion they had fallen out, and his patron, besides using many reproachful expressions, had struck him. The painter brooded over the disgrace of the blow. He could not challenge the nobleman on account of his rank; he therefore watched for an opportunity, and assassinated him. Of course he fled from his country, and finally had reached Hamburg. He had not however passed

many weeks from the night of the murder, before, one day, in the crowded street, he heard his name called by a voice familiar to him; he turned short round, and saw the face of his victim looking at him with a fixed eye. From that moment he had no peace: at all hours, in all places, and amidst all companions, however engaged he might be, he heard the voice, and could never help looking round; and whenever he so looked round he always encountered the same face, staring close upon him. At last, in a mood of desperation, he had fixed himself face to face and eye to eye, and deliberately drawn the phantom visage as it glared upon him; and *this* was the picture so drawn. The Italian said he had struggled long, but life was a burden he could now no longer bear; and he was resolved, when he had made money enough to return to Rome, to surrender himself to justice, and expiate his crime on the scaffold. He gave the finished picture to my father, in return for the kindness which he had shown to him."

"Of course the phantom visage which thus haunted the poor painter was but the effect of imagination, excited by the consciousness of his crime; but it was to him like a reality.

J. W.

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 257.)

The narrow path in which Joshua Evans was led necessarily attracted much attention from others. In a recent conversation with an aged friend, now in her 97th year, she mentioned that she distinctly remembered him, and the concern her mother (his niece) felt on one occasion when she was expecting a visit from him, as to what she should provide for his dinner—as he did not eat meat, or sugar. Finally she decided to make a batter-pudding—all the ingredients of which were raised on their own farm.

The memoranda continued:—

I found I must not look out at others, who perhaps may not have the same work to attend to, and yet may be in favor with our Heavenly Father, attending to their proper business in their own allotment. I believe those who are sincerely aiming to follow our holy Pattern, should be careful not to judge or censure one another. It may in wisdom be so ordered for carrying forward the Lord's work, that some may be called to one service, and some to another. Therefore to maintain love to Him, and one towards another, is like the capstone of all, or the crown of our labors: "By this (said our Saviour) shall all men know that ye are my disciples, if ye have love one to another."

I have apprehended I have sometimes felt that love which proceeds from the inexhaustible fountain, to flow in my heart to all people; craving that all through Christian vigilance may be prepared to harmonize in singing praises to Him, who in the beginning made all things good: whose pure influence I have longed for, that it may spread more and more, until it comes "to cover the earth, as the waters cover the sea." Oh! the sweetness that would be thereby introduced: the hungry would be fed, and the naked clothed, liberality would be found among those possessed of outward substance, extend towards the different situations of the oppressed and distressed poor; then no hard thinking one of another. Nothing like jangling or contending, in lawsuits, or otherwise, about worldly interests, either amongst near connections or others; these animosities would disappear, with the unchristian spirit of strife, whereby so many "garments

come to be rolled in or stained with blood; many houses, great and fair left desolate; and so many souls. I fear whose number is not to be described, that, unprepared, are hurried into eternity, through the unrighteous means of potentates and rulers, many of whom are willing to be called by the name of Him who is Prince of Peace, whilst actuated by a cruel Anti-Christian spirit. Under these considerations, which have been alarming and awful to think of, I have, as before hinted, been induced to refrain from any voluntary contributions, either in the way of taxes on my property or other demands, except I was clearly informed such demands had no connection with the expenses of warlike proceedings, let the consequence of loss of goods or property taken and sold under value, be whatever it might be.

1774. It seems with me to leave a brief account of some further exercise which attended me about this time, on hearing some people speak or complain of a scarcity of bread; I remembered that our crops in many places were not so much failed as to yield a cause for complaining. But the circumstance of sending out so much of our best flour, &c., to the West Indies, and in return, importing from thence no small quantity of rum, brought my mind under weighty considerations on the traffic, whereby so much of that, and other strong distilled spirits were introduced into our land; whether it could be safely called a righteous traffic; and as we had for many years back been much in the practice of using rum plentifully in harvest, which is the season of cutting and gathering in of our choicest grain, with other things; whether that was a justifiable practice or not. As I viewed the subject, divers circumstances with serious thoughts upon them presented: Such as first, The rioting, drunkenness, vanity, foolish and loud talking, sometimes wicked words, and even quarrelling, which we see and hear of in harvest time; a season when particularly, our minds should be humbly thankful to the author of all things, for the continued blessings which the earth produces in return for our labor. Secondly, In addition to unbecomingly folly, do we not see sometimes a considerable waste of precious grain scattered among the stubble in our fields, which might in a good measure tend to helping some of those to bread, with whom it is scarce? And are not such wanton folly, and such wasteful work very frequently occasioned through the use of rum? whereby too many of those that work in our fields, meadows, &c., are apt to get inflamed and agitated by partaking freely of it. My concern on the subject, the more I pondered matters, often became still more weighty. At length as my mind was quietly turned inward to my guide, to be instructed what was best for me to do, as I possessed a farm and had a crop of grain and grass to cut, &c. I received a plain gentle intimation in a silent language inwardly spoken, on this wise,—"Use no more rum: it is a great evil in the country, and thou shalt have peace in declining it." This seemed to try me closely. It had been a custom long practised, and was become deeply rooted.

It was generally believed to be of great service to drink rum, as thereby men were supposed to be supported under the fatigue of hard labor in time of harvest, hay-making, &c. I had been of the same mind myself, and had used it pretty liberally heretofore; for some entertained a notion that men's health was in danger without the use of it; I heard of some who were said to die instantly when they had drunk cold water, for want of rum in it, &c. A considerable strug-

gle and exercise attended me on this occasion appearing threefold: 1st, To testify against my own conduct in using rum as I had done. 2d, To withstand custom, thus to endanger the laborer's health. 3d, And to stand alone in the refusal of rum. I could not see my way clear at first, supposing I must sacrifice my harvest, for I fear none would reap for me if I denied them the liquor. But my mind became resigned not to use any more, nor give it to others. I had the a larger harvest than common, and concluded my neighbors refused to help me without it. I would gather what I could accomplish, and let the remainder go. I kept this exercise all to myself, having none to confer with; yet my wife willingly united with me, though my friends were against me.

When the time came, I was free to offer additional wages to those who labored for me, lieu of strong liquor; and told them they need not drink water or a little milk in it, and need not expect the other from me. Although some were reluctant; others assented on hearing the reason. I gave them for my declining that of using giving out rum, with hinting the bad consequence which often follow a practice of the kind. I obtained assistance sufficient to answer my purpose; for those who wrought for me were convinced that I declined the former practice from a better motive than covetousness. I endeavored afterwards to continue steadfast in my resolution on this account; and found my work made easier than I expected; although some reflected on my singular conduct in this matter of whom I might have obtained rather a sympathy; because I might compare them to such "who dipped with me in the dish." I had occasion to believe many disclaimed my proceedings herein; yet I was convinced it was with our Divine Master's approbation I acted as I did, and that He would bless this testimony concerning the disuse of distilled spirits, and carry my own work forward gradually. And glory be to his great name, I have since had to observe my opposers convinced; and many advocates raised up for the establishment of such a practice gospel temperance among Friends and others.

(To be continued.)

Betraying with a Kiss.—The betrayal by kiss, as we all understand, intensified, if possible the black act of treachery. A kiss on the cheek is still, in the East, the salutation of intimate friendship. Kissing is very much more usual than among ourselves, as a mark of affection, respect, of condescension, of homage. Ordinary acquaintances touch each other's hand, a then kiss their own, and apply it to their forehead, lips and breast. Inferiors kiss the hands of the hand, or, if above the position of a servant, the palm. Slaves kiss the foot, and so supplicants, deprecating anger or begging pardon. Kissing the hem of the garment expresses great reverence, and holy men or devishes are especially so saluted. But the kiss on either cheek is the sign of close intimacy and warm affection among equals. It is the mark, not gratitude, nor of homage, but of unfeigned love and esteem. Thus the mode of betrayal aggravated the treachery. It is only paralleled the treacherous assassination of Amasa by Josiah taking him by the beard as if to kiss his cheek while holding the sword with which he bestrangled him. I remember a sheikh of the Adwa tribe assassinating a rival in a similar manner professing reconciliation, and holding his beard with his left hand to kiss him, while he suddenly stabbed him over the shoulder with a dagger

his right hand. I must add that the murderer was outlawed by his tribe, though the wildest and least scrupulous of these robber bands of Milan. One survival of the abject homage of the East, as symbolized by kissing, has come down to us in the kissing of the pope's toe, and of the toe of the bronze image of Jupiter which does duty for St. Peter, in the church of St. Peter's at Rome.—*H. B. Tristram, in S. S. Times.*

FOR "THE FRIEND."

Historical Notes, Respecting the Society of Friends.—No. 7.

The Society of Friends appears to have continued increasing in numbers in England to the close of the reign of William III, who died in 1702. After that time, it would seem that there were no such large accessions to its membership as had marked the earlier periods of its history. For this, several reasons may be assigned. One was the lowered conditions of vital religion in Great Britain, which historical writers speak, as a marked feature of the early and middle part of the 18th century. Of this period Green in his *History of the English People*, says:

"In the middle class the old Puritan spirit lived on unchanged, and it was from this class that a religious revival burst forth at the close of Walpole's administration, which changed for a time the whole tone of English society. But during the fifty years which preceded this outburst we see little save a revolt against religion and against churches in either the higher classes or the poor. Among the wealthier and more educated Englishmen the progress of free inquiry, the aversion from theological strife which had been left behind them by the Civil Wars, the new political and material channels opened to human energy, were producing a general indifference to all questions of religious speculation or religious life. In the higher circle 'every one laughs,' said Montesquieu on his visit to England, 'if one talks of religion.' Of the prominent statesmen of the time the greater part were unbelievers in any form of Christianity, and distinguished for the grossness and immorality of their lives. Purity and fidelity to the marriage vows were sneered out of fashion.

"The masses of the poor were ignorant and brutal to a degree which it is hard to conceive; for the increase of population which had followed on the growth of towns and the development of commerce had been met by no effort for their religious or educational improvement. The rural peasantry were left without much moral or religious training of any sort. Much of this social degradation was due to the apathy and sloth of the priesthood. Bishop Burnet brands the English clergy of his day as the most lifeless in Europe, the most remiss of their labors in private, and the least severe of their lives."

It was but reasonable to expect that the Society of Friends would be to some extent affected by the causes which operated on the other inhabitants of England. In Abbey and Overton's *History of the English Church in the 18th Century*, it is said "the sect threw under persecution;" and "between the passing of the Toleration Act and the end of William III's reign it made great progress. After that it began gradually to decline. This was owing to various causes. Some share in it may perhaps be attributed to the continued effects of the general religious lethargy which had set in some years before, but may now have begun to spread more visibly among the classes from which

Quakerism was chiefly recruited." "It may be added that as the century advanced, there gradually came to be within the confines of the National Church a little more room than had lately existed for the upholders of various mystical tenets." Although the authors of the work from which I am quoting thus refer to the spiritual views of Friends as "mystical," yet in the remarks which follow they show that they were not insensible to their truth and importance. They speak of the faithful witness borne by the Quakers to the "sense of a present life-giving spirit, when it was feeblest and most neglected elsewhere." And they add, "If Quaker principles, instead of being embodied in a strongly antagonistic form as tenets of an exclusive and often persecuted sect, had been transfused into the general current of the national religious life, they would have contributed the very elements of which the spiritual condition of the age stood most in need. Not only in the moderate and constantly instructive pages of Barclay's Apology for the Quakers, but also in the hostile expositions of their views which we find in the works of their opponents, there is frequent cause for regret that so much suggestive thought should have become lost to the Church at large. The Church would have gained in power as well as in comprehension, if their views on some points had been fully accepted as legitimate modes of orthodox belief. English Christianity would have been better prepared for its formidable struggle with the Deists, if it had freely allowed a wider margin for diversity of sentiment in several questions on which the Quaker opinion almost universally differed from that of the Churchmen of the age.

"They had been among the first to turn with horror from those stern views of predestination and reprobation, which until the middle of the 17th century had been accepted by the great majority of English Protestants without misgiving. It was doctrine utterly repugnant to men whose cardinal belief was in the light that lighteth every man. The same principle kept even the most bigoted among them from falling into the prevalent opinion which looked upon the heathen as altogether without hope and without God in the world. They almost, alone of all Christian missionaries of that age, pointed their hearers to a light of God within them which should guide them to the brighter radiance of a better revelation. Nor did they scruple to assert that 'there be members of this Catholic Church, both among heathens, Jews and Turks, men and women of integrity and simplicity of heart, who, though blinded in some things of their understanding, and burdened with superstition, yet being upright in their hearts before the Lord, . . . and loving to follow righteousness, are by the secret touches of the holy light in their souls, quickened and quickened, truly secretly united to God, and thereby become true members of this Catholic Church.'" "Such expressions would be generally assented to in our day, as embodying sound and valuable truths, which cannot be rejected on account of errors which may sometimes chance to attend them. At the beginning of the 18th century there were few except Quakers, who were willing to accept from a wholly Christian point of view the element of truth contained in the Deistical argument of 'Christianity as old as the creation.'"

"When Quakers found that its more reasonable tenets could be held, and find a certain amount

of sympathy in the Church of England, it quickly began to lose its strength. A remark of Bessel's in 1776, that many a man was a Quaker without his knowing it, could scarcely have been made in the corresponding year of the previous century. At the earlier date there was almost nothing in common between the Church of England, and a sect which both on its strongest and weakest side was wracked by conspicuous antagonism to established opinions. At the latter date Quakerism had to a great extent lost both its mystic and emotional metaphysics. After a few years' hesitation, Southey concluded that he need not join the Quakers simply because he disliked 'attempting to define what has been left in deficit.'"

The testimony borne in the preceding extracts to the spread in the community of some of the principles advocated by the Society of Friends is interesting in itself, as an illustration of the remark that has often been made—the among professors of Christianity there has been a gradual approach to the spiritual views of religion, held by early Friends. And it is very possible that it has been one of the causes which have hindered the increase in the number of its members, as suggested in the above extract from Abbey and Overton's work.

John Hunt, in his *History of Religious Thought in England*, speaks of the rise of the Quakers as a recoil against mere ceremonial. "The steeple-houses against which George Fox cried out as temples of idol worshippers, were the churches of England when in possession of Presbyterians, Independents and Baptists. They had cast down Laud and his priests. They had rejected them and their pretensions to be channels of grace and conduit pipes of the Divine favor, but these sects were still clinging to the dead letter of a book. They were still trusting in ordinances, to some extent unconscious how much they were retaining of what they really supposed they had rejected when they put down the bishop. The church was their idol temple, and the Bible the idol which they worshipped. 'We have a sure word of prophecy,' said the minister of the church at Nottingham; 'it is the Scriptures by which all doctrines, religions and opinions are to be tried.' George Fox was present. He cried out: 'It was not the Scriptures, but the Holy Spirit by which holy men and women gave forth the Scriptures, whereby all opinions, religions and judgments are to be tried.' That Spirit, he said, leads into all truth. The Jews had these Scriptures, and yet rejected the Holy Ghost. They rejected the 'Bright and Morning Star,' and persecuted Him and his disciples. They professed to try their doctrines by the Scriptures, but they did not try them aright, because they did it without the Spirit of God."

"This error of trusting to the mere letter of the Bible, Fox detected in every detail of belief and practice. There might be external worship in the Church; there might be preaching, sacraments, sacrifices, but what are these if there is no Spirit in them? God dwells not in temples made with hands. It is not the water baptism which saves, but the answer of a good conscience. It is not ceremonies which justify, nor even belief in an external Christ. It is Christ within who is to us both justification and sanctification. The battle of the Quakers was for the reality against the shadow, for the substance at the expense of the form, for the law in its Spirit even at the risk of sacrificing the law in the letter. The Quaker was the only thorough opponent of the Churchman of Laud's school. The

* Barclay's Apology for the Quakers.

principle of that school was to take care of the external body or form of the Church, for in so doing we take care of the life of the Church. The Quaker said, let us make sure of the life or spirit, and the body or form will take care of itself."

The journals and the writings of faithful members of the Society of Friends in the early part of the 18th century show that they were very sensible of a falling away from the zeal and earnestness which had previously been marks of Friends. In writing to Joseph Pike in 1717, Deborah Bell, of London, tells him "a living ministry is almost lost amongst us." "It seems to me the true Church is returning into the wilderness again." And the next year, she writes: "The cross is very little borne nowadays, except by a small remnant; and these are by the others accounted a narrow-spirited people, who say they make the way more narrow than there is need for."

In 1731, Thomas Story mentions being at Bristol, when he said: "There are two great meetings of Friends; but greatest part being young, many of them are hardly distinguishable from the world by any outward appearance, either in speech or habit."

In 1732, at London, he remarks: "At this time Deism was much advanced in the city and nation, and the former zeal of all sects nearly expired; yet our meetings were much crowded on First Days, and though the generality of Friends in the city were young people, they delighted to have the principles and doctrines of truth published with authority and demonstration."

In 1735, he says: "At this day we have among us some traditionalists, the children of such faithful friends of truth, who did, in the early part of this dispensation of God we are under, not only believe, but suffer for the same; and these children have for a time taken up and continued in the doctrines and examples they have seen and heard among us; but when they have come up into the state of men and women, being only in their natural state, and looking out to the world, have been taken by the lust of the eyes, with the vain and sinful fashions, customs and notions of the world, and become deists, some freethinkers, other profane libertines, and others atheists; denying all revealed religion as contained in the Holy Scriptures, and asserting that there never was, is, or shall be, any other guide given unto man by God but his own reason. And thus renouncing Christ, shake off his cross and despise it, with all its discipline, and yet come to our meetings as if they were Friends. But though some such there be among us, to the great grief of those who know and follow the truth, yet there are but few in comparison of the numbers among other professors."

In 1736, he remarks of the meeting at Leeds that it "consists, for the greatest part, of young people; sober, but few of them yet baptized of the Lord by his sanctifying baptism, which is much the case and state of our young people at this day throughout the world, being in danger, as others have done, of sitting down under the profession of truth in a traditional way, as to the doctrine and form of the discipline of it, and yet short and ignorant of the life, light, virtue and power of truth essentially in themselves."

"Jesus said unto him, Thomas, because thou hast seen me thou hast believed; blessed are they that have not seen, and yet have believed."

SELECTED.

THE LITTLE MARTYR OF SMYRNA.

It was in the fatal ages when the Christian martyrs died
And the gods of high Olympus in their glory were defied,
When throughout the Romæ empire there were festivals and feasts
Where great Jupiter was lauded by his pontiff and his priests,
It was in those tragic ages that with bacchalian songs
Through the streets of fair Smyrna surged one day the maddened throngs.
"Find us Polycarp, the Christian!" rose the wild, discordant cries,
"To the lions with the Christian! By the gods of Rome, he dies!
Drag him forth to the arena! Let the beasts devour their prey
'Less he swear by Rome's great Cæsar to forsake the Christ this day!"
So the mob, in growing fury, surged the streets with swelling roar,
But the bishop of old Smyrna found they not at any door,
It was then a soldier pointed to a sunny-headed child
On whose boyish face the beauty of his dozen summers smiled.
"Ask of him!" the ruffian shouted. "Ask the lad; he knows him well:
In his home the man sought refuge. Ask the lad, and he shall tell."
So they turned like wolves upon him, fierce for prey and hunger-mad,
And he stood a lamb among them, though a lion-hearted lad.
"Knowest thou of any Christian or where Polycarp be found?"
Cried a Roman soldier, fiercely, as upon the child he frowned,
And the boy his pale face lifted, with his fearless, fair blue eyes,
In whose deep life's hopes were dawning like the morn in cloudless skies,
And there seemed a sudden halo round the brave but youthful head.
"If thou seekest but for Christians, I am one," he fearless said,
"What's that to thee, thou bold-tongued nursing!" cried the first, with fiercer frown,
"Make no boasts, or, by Olympus, thou shalt burn e'er sun go down!"
Lead us hence. We seek thy bishop, Polycarp, that eye a knave:
Dare refuse and to the lions thou shalt go, and naught can save!"
Then the boy's face flashed indignant. Call him not a knave," he cried,
"He of Smyrna is the bishop—servant of the Christ that died."
Then a cruel arm uplifted smote him sudden to the ground,
And the soldiers, mad with fury, gathered eagerly around.
"Fool! Thy hasty blow hath slain him," cried the next, as he
"Nay," another, sneering, answered. "Drag him forth; he doth but swoon."
"Doth he think to move our pity by his tears and weakling cries?"
Drag him forth! His lips shall answer, or from worse than this he dies.
See! He moves; he was but feigning. He shall tell us all he knows.
What! Defeated by this youngling—we who brave the fiercest foes?
Now, when, spite of thou stubborn traitor! Where shall Polycarp be found?
Say the truth, lad, or thou diest where thou liest on the ground."
Then a gleam of saintly beauty lit the simple childish face
And the look of pain and anguish to a heavenly calm gave place:
"Him ye seek to slay is noble, and he serves the Christ that died;
Kill me if ye will, but never will I tell where he doth hide."
Turn away, O ye that witnessed, ye who saw that deadly blow.
Was it man who struck, or demon? Answer not: God's angels know.
So the awful lot was chosen, so the cruel fate was told,

And that even, when the sunset ringed fair Smyrna hills with gold,

On his weeping mother's bosom, with the smile that death had given,
Lay the bruised and martyred body; but the spirit was in heaven.

—Youth's Companion.

KEEP TRYING.

It boys should get discouraged
At lessons or at work,
And say, "There's no use trying."
And all hard tasks should shirk,
And keep on shirking, shirking,
"Till the boy became a man,
I wonder what the world would do
To carry out its plan?"

The coward in the conflict
Gives up at first defeat;
If once repulsed, his courage
Lies shattered at his feet.
The brave heart wins the battle
Because, through thick and thin,
He'll not give up as conquered—
He fights, and fights to win.

So, boys, don't get disheartened
Because at first you fail;
If you but keep on trying,
At last you will prevail;
Be stubborn now against failure;
Try, try and try again;
The boys who kept on trying
Have made the world's best men.

—Advance.

FOR "THE FRIEND."

Pine Street Meeting-House.

The Pine Street Meeting-House, sometimes called "the Hill Meeting," had its origin in a devise by Samuel Powel, Jr., to Philadelphia Friends, of a lot on "Society Hill," as a site for a building of that character.

At the monthly meeting held on the 30th of the Eighth Month, 1747, an extract from the will of this Friend was read as follows:

"And I do hereby authorize and direct my executors to grant and convey unto such persons as the monthly meeting of the people called Quakers in Philadelphia, shall nominate to their heirs and assigns for ever, sixty feet ground on the south side of Pine Street, and near the middle between Front and Second Streets as may be, and the whole depth of a ground there, to build a meeting-house upon, the members of that meeting shall agree build a meeting-house there, and not else."

The monthly meeting "gratefully received the devise and referred the consideration building a meeting-house to a future meeting. No active steps were, however, taken for the erection of the proposed building until the Eighth Month, 1752, when a committee was appointed to view the ground and to collect the sentiments of Friends in relation to proceeding. Two months later this committee reported that they had viewed the lot and thought it a convenient place for a meeting-house, if forty feet more on Pine Street of equal depth with the original lot were added to it, and that Samuel Powel the elder had engaged to secure this additional piece to the Monthly Meeting, it being the property of the children of his son Samuel. By this addition the whole front of the lot on Pine Street would be one hundred feet. This committee also prepared a plan for the erection of a house sixty feet long and forty-three feet broad, exterior measurement, which they deemed of suitable dimensions to hold the Yearly Meeting in, to accommodate which seemed to be the principal inducement to undertake the work at that time. It was also thought that Friend

might so increase in numbers in the future, that it would be expedient to authorize a Weekly Meeting in such house. The estimated cost of the proposed building was about £800, and at the time the committee made their report, they had obtained subscriptions to the amount of £724.10, and they thought that any useful sum in addition could easily be raised among Friends.

The children of Samuel Powel, Jr., being minors, a difficulty occurred in relation to procuring a proper conveyance of the additional forty feet of ground which it was esteemed essential to have, to make the site devised by him available for meeting house purposes. This was finally arranged by Samuel Powel, Sr. (father of Samuel Powel, Jr.) giving a bond in £600, conditioned that his grand-children should make conveyance when they came of age, of two lots twenty-feet wide each, on the east and west sides respectively, of the sixty-feet wide lot devised by the latter to build a meeting-house upon.

The elder Samuel Powel to further insure the meeting in acquiring the two additional pieces of ground, in his will enjoined upon his grand-children (the devisees of his son Samuel) to convey these lots to trustees to be appointed by the meeting; and annexed a condition to the provision made for them that they should within thirty days after they respectively came of age convey the same. Pursuant to these directions, the grand-children granted the two side lots to the nominees of the Monthly Meeting.

In 1768 an additional piece of ground to the eastward twenty feet front and one hundred and two feet deep was purchased from Samuel Powel and a bond given for £240 by Isaac Greenleaf, James Pemberton and Samuel Wetherill on account of the Monthly Meeting, in payment of the purchase money. This bond remained unpaid for many years, but was finally settled in full in 1783 by the payment of the principal and unpaid interest for some four or five years, then amounting to £295.4.

As late as 1814 a further addition was made on the south side of the lot, increasing its depth the further distance of twenty-two feet for sixty feet eastward of the west line, thus making that part one hundred and twenty-four feet deep from Pine Street.

Possession of the two side lots first named was obtained at the close of 1752, and at the same time it was decided to proceed promptly with the building, so as to have it ready for occupancy by the Yearly Meeting (then held in the Ninth Month) in the following year. This was accordingly accomplished, and the Yearly Meeting convened there, though the structure was not entirely completed.

The Pine Street Meeting-House was built of brick, the dimensions being sixty feet from east to west and forty-three feet from north to south, as originally agreed upon, occupying the full breadth of the lot devised by Samuel Powel, Jr. The roof sloped towards Pine Street, but was also hipped both at the east and west ends, and in some particulars the structure resembled in its external appearance the old Bank Meeting-House. The building stood back from the street about twenty feet, and underneath it were commodious cellars. There were porticoes on the west, north and east sides, over corresponding entrances. The interior was provided with youths' galleries around three sides, the approaches to which were by stairways at the north, west and northeast angles. The minis-

ters' gallery (over which was the usual "sounding-board") was on the south side, the main body of the meeting facing south; though there were a few benches on either side facing each other. The women sat on the east side of the house.

A brick wall with two gates in it separated the grounds from Pine Street.

(To be concluded.)

[A Friend in Canada sends the following letter written some years ago by a minister in that section of country. The tendency of it is to stimulate the reader to a closer walk with God, and a more steady indwelling with the Spirit of Christ, which is indeed as "ointment poured forth" to the seeking soul.—Ed.]

Ontario.

My Dear Friend:—As I have no meeting to attend, no friend to converse with, feeling somewhat lonely as to the outward, it seems a great privilege to me to mingle in silent converse with my friends through the silent language of the pen.

Notwithstanding the many things that look unfavorable as to the outward, I trust I have been brought low enough to find the pure stream of Life, that satisfies thirsty souls, and waters the whole heritage of God. I trust living desires have been begotten at this time for the welfare of our beloved Society everywhere.

As it is about the time for Friends to assemble at their several places of worship, the prayer of my spirit did arise to the Father of all our sure mercies that He would arise with healing in his wings, that his children might arise in the beauty of holiness, prepared to sing the Redeemer's praise, and crown Him Lord of all.

We read when the Lord led Israel in the wilderness, He directed Moses to make a holy oil for the purpose of anointing the Tabernacle and the priests. It was to be made of pure myrrh, sweet cinnamon and cassia; it was to be a holy ointment, and thou shalt anoint the Tabernacle of the Congregation and the Ark of the Testimony the command.

David, speaking of the King of Glory, says he was anointed with the oil of gladness above his fellows, and his garments are said to smell of myrrh and aloes and cassia. The sacredness of that holy oil, and the solemn injunctions by which it was separated from the common oil, teaches us its spiritual and typical importance; as the priests of old were anointed with this perfumed oil, so Jesus the Great High Priest was anointed by the Holy Ghost or Spirit, for the work to which God had appointed him, nor was He the alone partaker of this anointing, for the Apostle John says, "Ye have an unction from the Holy One, and ye know all things." The anointing which ye have received of Him, abideth in you, and ye need not that any man teach you, but as the same anointing teacheth you of all things, and is truth, and as it hath taught you, ye shall abide in Him. And as the spices in the sacred oil shed fragrance all around, so the power of the Holy Spirit given to abide with the people of God, diffuses its sacred fragrance through every act in life. O let us ever seek this anointing; let us seek it at the throne of Grace; for there is a place where Jesus sheds the oil of gladness on our heads, a place more sweet than all else beside. It is the blood bought, mercy sent! O may I know of dwelling more closely under the mercy seat, that I may not only know of the anointing oil to be poured upon my head, but as the night of death is fast approach-

ing, that my lamp may be trimmed and burning as I pass through the valley and shadow of death, where the Cross will be exchanged for the Crown. With love to all —

Fourth Month 4th, 1875.

FOR "THE FRIEND"

Lottery Advertisements, Speculation and Sports.

There are evasions many, contained in advertisements admitted into many religious papers (as I have very recently had occasion to show) and the present is a time, it seems to me, when there is need for a great deal of self-acknowledgment of complicity in transgression, and the "turning over a new leaf" by editors and publishers who have too readily lent their columns to the furtherance of what are no better than lottery and gambling schemes. It is occasion for satisfaction that THE FRIEND has happily no self-reproach to administer on this score, and hence it stands in the right position to speak out with clearness, and to help others.

A multitude of daily and weekly papers would do well if they would treat the applications for advertising space for schemes of chance, as was done by the editor of a California paper lately. He elicited his position thus:

"Evidently an Eastern lottery company thinks this paper in financial distress, as we are in receipt of a most seductively worded advertisement, which we are requested to insert and send bill at regular rates. Of course the offer was rejected. These lotteries are more demoralizing than whiskey or opium. They are robbing the poor people of this State of more than \$1,000,000 a year. We want nothing to do with any such swindling schemes, and will not give them publicity in any way. If this paper cannot be sustained without being obliged to have recourse to swindling aids, it will cease publication, and that very speedily."

Another sign indicative of the favor manifested towards gaming devices, in a quarter where one would not expect such things to be tolerated, is shown in the prevalence of "church raffles." In this city, during last year, Judge Biddle uttered some very severe words touching the guilt of the managers of a certain fair which was held in a church building. Since then, in Nashville, some women of the Roman Catholic persuasion, announced that they would "hold a holy raffle at a church fair." The Judge (Ridley) of the Criminal Court, instructed the grand jury to summon before them the secretary of the fair, and to hold every one of the sellers and buyers of tickets accountable under the law for gambling. He rightly remarked that the churches ought to assist the courts in suppressing gambling; yet instead thereof they were violating the law and encouraging law-breakers.

The *Mid-Continent*, remarking upon the above incident, said: "We need decisive, stout, brave words spoken against gambling in every shape. The popularity and wide prevalence of progressive euchre and other forms of card playing where money or gifts are won by venture with cards, is rapidly demoralizing respectable society in many places. The disguise is very thin; the gambling is perfectly transparent. Our ministers and other leaders should be outspoken in condemnation, speaking the truth in love. They have the brave example of a just judge to lead and encourage them. A pious gambler is far worse than a godless gambler. If we must have gamblers, for the sake of decency and in the name of all religion, let us have them in the form of sinners, and not as gambling saints."

In direct connection with this matter comes the following information, quoted in one of our dailies from the *Memphis Avalanche*. It is an instructive, though sorrowful revelation in the course of our inquiry.

"That the city is now thoroughly demoralized from the influence of gambling, openly and defiantly carried on in the heart of Nashville, can no longer be denied. The city's best people are becoming alarmed. This morning five leading merchants, four of them being wholesale men, say that the gambling craze was leading their young men to neglect their duties.

"Last week the authorized agent of a guarantee company came here to investigate affairs, having heard that many of the young men holding responsible positions were patronizing the pool rooms. As is well known, this company furnishes bonds for men holding positions in banks and other institutions. He found the reports to be true, and informed the employers of these young men that unless the gambling habit was immediately stopped the company would refuse to renew the bonds at expiration. In accordance with this report a number of business men having young men in their employ have laid the matter clearly before their employees, telling them that if the guarantee company declined to renew their bonds they might look for positions elsewhere."

And here I think it well to repeat the view twice expressed to me by the vice-president of a flourishing Trust Company of this city,—that in order that institutions of the kind should meet their heavy expenses and pay interest to depositors (which formerly the regular banks did not) it was customary to loan large sums of money to brokers and private bankers, which it was known would be used for speculative purposes in dealing in stocks. Were it not for this feature, he remarked, he believed that we would not have near so many city banks and banking institutions as we have at present. While I have no doubt, notwithstanding the above statement, that there are some institutions, perhaps a considerable number, which would discourage loans of the character referred to, yet I believe that the fact of the making of such loans (which unquestionably does exist to a large extent) is a factor to be taken into account when we consider the number of trusted officers and other employees of institutions acting in a fiduciary capacity, who have within a few years violated their trust, and the immediate cause was found to be *gambling*. As a passing comment, for personal application, let us look with favor upon a low rate of interest, or none at all, on our bank deposits, rather than do ought to promote the unrighteous and unsatisfying spirit of speculation.

The mania for *sports*, however, which has developed so amazingly within a decade, has had a great deal to do with the increase of gambling in the community. Having not long ago presented in this paper some considerations on horse-racing, I need go no farther into that subject at the present time than to call attention to the statement of the *Tribune* of New York, that "the amount of money distributed during the season [six months] in the betting ring on race tracks near New York, is estimated at thirty million dollars."

The public has been treated for months—through the daily papers—to a flood of unprofitable talk and scandal about various organizations, as the League, the Brotherhood, the Association, and their professional and non-professional players. There has been a constant

succession of quarrels, with charges of bribery and other corruption. We learn, too, that some of the players are paid thousands of dollars for their services. The leading educational institutions appear to be both actively and intensely interested in the business, and the topic "intercollegiate athletics" has come to be among the foremost to be considered. A writer in the *Nation* summarizes the objections to these contests under the heads of gambling, liquor drinking, the spirit of brutality and unfairness engendered, the expense, the prevention of general systematic physical culture among the students, and the drawing of a class of students to college who bring it into discredit.* But there is one point not specifically included in the above, which enhances greatly the evil, and that is the *publicity* accorded it. The newspapers appear inclined to grant unlimited space to the particulars of the contests; and the students finding that, in a manner, they have the whole country for an amphitheatre, and a nation for audience, make the most of the opportunity. And so we may contemplate these games in the light of our civilization and our Christianity, and we may compare them with the spectacles of pagan Greece and Rome. We may take note that in our cities there are dozens of places where the telegraphed scores of the plays are displayed as they progress, and are watched by expectant crowds upon the side-walks. Many of the watchers have staked money upon the result. We may observe that the daily papers give up more and more space to the particulars of these matters, and it is fair to presume the interest in the subject correspondingly widens, and greater become the number of readers of the "Sunday" sheets which so cater to everything popular and worldly. These things do not promote growth in the religious life. Let us judiciously encourage "general, systematic physical culture among the students," let us keep it, so far as may be, right there, with the other studies and exercises, upon the school or college grounds, and, having convincingly beheld the unsatisfactory fruit of the opposite course, let us not dread the reproach of appearing to be singular and of being deemed very much behind the times.

JOSHIAH W. LEEDS.

Natural History, Science, etc.

The Banyan.—Though much is known in regard to the banyan trees of India, novel and interesting matter is being continually contributed to their history. The *Annals* of the Royal Botanical Garden of Calcutta, of which Volume I has recently been issued, gives much space to

* Such recitals are common as that which described the savage incidents of a game in Indian last season, between two universities' clubs, where one of the players had his jaw fractured, and another was so badly injured in one eye that he was expected to lose it. Also, nearer home, and late in the year, the scenes of brutality that were enacted between the representative players of Yale and Princeton Colleges, and those of Lehigh and Lafayette.

Likewise, in the brief space of time intervening between submitting this article, and its being sent to press, there has been public mention made of at least three disgraceful contests between rival classes of college students (or of sections, as sophomores and freshmen, in the same college), the scenes of gross disorder and fighting being transferred from the play-grounds to the college buildings. Surely, if the schemes for a great engagement of our navy, and for coast defenses, which seem so popular, should be carried into effect, the rising generation will furnish no lack of spirited recruits to prove our prowess, while I greatly fear that the zealous advocates of the peaceful arbitration of differences will be few indeed.

the species of *ficus* to which genus the banyan belongs. It appears they always begin life as an epiphyte, finally killing the tree to which they attach themselves, and then establishing an independent existence in the ground. The seedlings sometimes begin life by growing in the crevices of buildings, which, in the end they usually manage to destroy. The great banyan tree in the Botanic Garden of Calcutta in 1886 one hundred years old, began life on a date-palm tree, of which all trace has long since disappeared. The parent trunk of this tree forty-two feet round, and the circumference of the leafy crown is 857 feet. It increases by sending roots down from the branches to the ground, and these become trunks. Some of them are twelve feet in girth, and there are 232 of them all told. A single specimen will therefore eventually form an entire forest, by these dropping roots from the end of the branches. One is known that has a head of branches averaging 500 feet in diameter.—*Exchange*.

A New Bitumen.—A newly discovered peculiar bitumen has recently been discovered in the Uintah Mountains, in Utah, and has been described by Prof. W. P. Blake, named Wurtzite, in compliment to Dr. Henry Wurtz, the chemist who has made many contributions to the knowledge of hydro-carbon compounds. The new substance differs essentially from any hitherto described. It is firm, black solid, a little heavier than water and breaks with a brilliant conchoidal fracture. It is sectile, and cuts a little like horn or whale bone. Thin flakes, or shavings, have a degree of elasticity which led at first to the supposition that the substance was a mineral form of rubber; but chemical tests soon dispelled this illusion. It is allied to the bitumens and asphaltum and can be used for purposes to which they are applicable. It is not, however, so easily dissolved in thick oils. It is insoluble in ordinary alcohol; but ether extracts about four per cent of a yellow oil. It is a good electric and it is believed will make a good insulating material if it can be so mixed with other substances as to give a flexible and tough compound.—*Exchange*.

Where the Birds Go.—It is, after all, no wonder that dead birds are so rarely found in the woods. They get no chance to die a natural death. In the treeless plains stretching along the northern border of the Mexican Republic millions of quail and other migratory birds are every year killed by pot-bunters, just as the quail of the Red Sea desert were by the notorious children of Israel. In Italy nine out of ten farmers keep owls for the special purpose of clearing small birds to alight on lime-twigs, and in France fashion decrees every year the death of myriads of feathered pilgrims to the summer land of the southern Mediterranean. Swallow especially are taken by sacks-full on the sea-coast by being enticed to alight on wires, when they are killed by means of electric currents.—*F. L. Oswald, in the Voice*.

A Curious Plant.—The Falkland Islands have a very damp and chilly climate, and are so swept by the south polar winds that they seem always cheerless and uncomfortable. Snow may fall at any time of the year, and yet it is never really very cold. The cattle and sheep thrive well the year round without hand-feeding, or shelter, and the inhabitants, mostly of English or Scotch origin, have thus far found stock raising a profitable and safe investment. It

such a windy climate no tree can grow, but nature has provided immense supplies of excellent peat, which serves well as a substitute for wood or coal as fuel. But, though the Falklands produce no trees, they do produce wood—wood in a very remarkable shape. You will see scattered here and there singular blocks of wood that looks like weather-beaten, mossy, gray stones of various size. But if you attempt to roll over one of these rounded boulders you will find yourself unable to accomplish it. In fact, the stone is tied down to the ground—tied down by roots; or, in other words, it is not a stone, but a block of living wood. If you examine it at the right time you may be able to find upon it, half hidden among the lichens and mosses, a few of its obscure leaves and flowers. You try to cut it with an axe, you will find it extremely hard to do so. It is entirely unworkable—being made up of countless branches which grow so closely together that they become consolidated into one mass. On a sunny day (if you are lucky enough to see a sunny day in Falkland) you may perhaps find on the warm side of the "balsam-bog" (for so the living stone is called), a few drops of a fragrant gum, highly prized by the shepherds for its supposed medicinal qualities. This wonderful plant is the *Bolax gleeberia* of botanists, and belongs to the same family as do the parsnip and carrot.—*From American Notes and Queries.*

The Birds' Drinking Fountain.—In June of 1889 I had occasion to be out a mile or threeabouts from the town of Kentville, and was for some time detained in a strip of clearing about 40 rods wide. While there I noticed woodpeckers continually crossing this clearing from one block of woods to the other. I thought nothing of it at first, as these birds are very common here, but after a constant stream of them had been going and coming for some time I determined to go across a small field to a point of hard woods, where they all seemed to be going, and, if I could, find the cause, expecting, of course, to find an old dry tree containing a couple or more nests of young birds, as I supposed the old birds were carrying food. On reaching the hill I looked around for the dry tree, but could see none. On further examination I discovered that the woodpeckers were flying to and away from the top of a living white birch tree. Selecting a convenient seat, I waited there for some time to see what was going on. About 45 feet up this tree the woodpeckers had thickly perforated the bark a space of about ten inches around the trunk, causing the sap to flow freely. I soon discovered that this was a drinking fountain, not only for the birds that had so diligently worked to bore these holes, but it seemed that all the small birds in the neighborhood were coming here to get a share of the sweet sap that was continually flowing from the wounded tree. At intervals when there would be no woodpeckers present, the little flycatchers and warblers would come for a drink, as well as to capture insects that had been attracted there by the sweet sap. At a time when there were no other birds occupying the drinking fountain, two little humming birds improved the opportunity of quenching their thirst, but darted away on the first appearance of any of the larger birds. I have often noticed our common red squirrel nip the bark of the maple in spring and drink freely from the sap. I have also seen the yellow-bellied sapsucker bore a single hole through the bark of a birch tree and drink the sap. I do not

think they return to the same place when they want another drink, but instead they make another hole in the nearest suitable tree.

These perforated spots on trees have often come to my notice, but I had supposed it was done for insects that might be found in or under the bark, and was not aware that the work was done wholly for the purpose of making a drinking fountain.—*From Forest and Stream.*

Items.

Extracts from the Forewell Message of Governor Larabee to the Legislature of Iowa. His Testimony to Prohibition.—"Thousands of those who voted against the Constitutional Amendment in the belief that such a law would prove a dead letter, are now convinced that it can be enforced, and demand its retention. Sioux City, Des Moines, Cedar Rapids and Ottumwa have banished the saloon, and yet are among the most prosperous cities in the State.

"The benefits which have resulted to the State from the enforcement of this law are far-reaching. It is a fact that the crime of intemperance in the United States, but Iowa does not contribute to that increase. While the number of convicts in the country at large rose from one in every 3,442 of population, in 1850, to one in every 809, in 1880, the ratio in Iowa is at present only one to every 3,130. The jails of many counties are now empty during a good portion of the year, and the number of convicts in our penitentiaries has been reduced from 750 in March, 1886, to 694 on July 1, 1889. It is the testimony of the Judges of our Courts, that criminal business has been reduced from 20 to 75 per cent., and that criminal expenses have diminished in like proportion.

"There is a remarkable decrease in the business and fees of sheriffs and criminal lawyers, as well as in the number of requisitions and extradition warrants issued. We have less paupers and less tramps in the State in proportion to our population than ever before.

"Breweries have been converted into oatmeal mills and canning factories, and are operated as such by their owners.

"The report of the Superintendent of Public Instruction shows an increased school attendance throughout the State.

"The poorer classes have better fare, better clothing, better schooling and better houses.

"The deposits in banks show an unprecedented increase, and there are everywhere indications of a healthy growth in legitimate trade. Merchants and commercial travelers report less losses in collections in Iowa than elsewhere.

"It is safe to say that not one-tenth, and probably not one-twentieth as much liquor is consumed in the State now as was five years ago. The standard of temperance has been greatly raised, even in those cities where the law is not yet enforced. Many a man formerly accustomed to drink and treat in a saloon has abandoned this practice in deference to public opinion.

"Our Courts show a marked improvement in dealing with this question, nearly all of the Judges being now disposed to enforce the law, whether they are in sympathy with it or not. In those counties where the law is not enforced the fault lies almost invariably with the executive officers."

Science alone will not Support Under Affiliations.—Mhegard, Professor of Philosophy in the University of Copenhagen, was recorded in Denmark as one of the first to have taken to it in a serious manner. In the introduction to a second edition of one of his works, he thus refers to his recent conversion to Christianity: "The experience of life, its sufferings and griefs, have shaken my soul, and have broken the foundations upon which I formerly thought I could build. Full of faith in the sufficiency of the I thought to have found in it a sure reliance from all the contingencies of life. This illusion is vanishing; when the tempest came which plunged me in sorrow, the moorings, the cable of science, broke like a thread. Then I seized upon that help which many before me have laid hold of. I sought and found peace in God. Since then I have cer-

tainly not abandoned science, but I have assigned to it another place in my life."

Prophetic Reasoning.—The discussion in the Presbyterian Church over the proposed revision of the creed, brings to view several points by its members against the doctrine of reprobation. The Independent quotes some of the remarks of Dr. Henry Van Dyke, who favored a new creed for several reasons—among them the following:

"Because it will be more Scriptural. We want something that will be the outward present of the New Testament; something less like a law paper and more like a creed, which can be read in the churches without chilling the spirit of devotion; something that will uplift and warm the heart.

"We want a creed that will lay a massive emphasis upon the love of God for the whole world, the atonement of Christ for all mankind, and the free, sincere offer of the Gospel to every creature."

"But suppose we cannot get this; suppose this Presbytery and the Church at large, under the alleged influences of this Presbytery (which perhaps we exaggerate), declines to make this change and refuses either to leave reprobation out of the Confession or to move in the direction of a new statement of doctrine? What do you suppose the New Testament tell? One thing is certain. This debate will not leave the Church where it found her. She is either going forward or backward. If we cannot admit that reprobation is non-essential to our system we must declare practically that it is essential, and abide by the consequences. I know not what course others may pursue, but for myself there is but one course. I intend to keep right on ignoring that doctrine, and if necessary denying it by teaching that there are no infants in Hell, and no self-imposed limits upon God's desire to save men. I intend to teach that his love is universal, and that Jesus Christ is the Saviour of the world, and that whoever will may come unto Him and take of the water of life freely. Is that Calvinism? I do not know. I do not care. It is Christianity."

"Christ says, 'the broad road leadeth to destruction, the strait to eternal life; surely meaning the broad and easy road of conformity to custom contrasted with the more difficult one of self-denial and care in choosing our path.'"

THE FRIEND

THIRD MONTH 15, 1890.

The communication which follows comes from one who has been an active worker in the progressive movement. It was accompanied by a letter, in which the writer states that the meeting of which he is a member, is one of the most conservative in Western Yearly Meeting; and he adds, "I write this that you may know in the East just what we are doing, and how we are holding what a large majority would call a Friends' Meeting."

The writer further says, "I have a heavy heart;" "this no longer gives me that peace I once enjoyed;" "when I go to meeting and sit down to worship God in spirit and in truth, I am troubled with the thought that we are not the humble-minded people that we once were; that we are too much outward and formal, and, must I say, mechanical, in our devotions."

While the reading of this plaintive letter awakens feelings of sympathy for the Friend who has been brought under exercise, and feels drawn to walk in a path different from that trodden by these about him; it also kindles a hope that the same Spirit of Grace which has opened his eyes to behold the truth may similarly operate on many others, who are now so bewildered by the influences around them as

not to see the inconsistency of their proceedings with the true spirit of worship. The time may come in which there will be a returning of many under our name to those principles and practices from which they have in measure departed, so that there will be a rebuilding of the walls that have been broken down.

The communication referred to is as follows:

TO THE EDITOR OF THE FRIEND:

After coming home from our meeting to-day and sitting down in my room and writing out some notes of the address given by me, I thought perhaps it might be of interest to the readers of thy valuable paper, if so, thou art at liberty to publish it. At the sitting of our meeting a song was sung by the company gathered. After singing, three prayers were offered up for the blessing to rest upon us. After prayer, a minister spoke about fifteen minutes; after he had taken his seat, a woman Friend arose and spoke about fifteen minutes, exhorting the believers in Christ to be steadfast, &c. After she had sat down, a song by the company; then a Friend spoke a few words exhorting all to be faithful in testimony; then a minister read a few verses from the Song of Solomon; then five testimonies; then song after song; then testimonies; then song; then a woman Friend arose and closed a few minutes after 12 o'clock. Meeting convened at 11 o'clock.

SUMMARY OF EVENTS.

UNITED STATES.—In the U. S. Senate on the 4th instant, the resolution offered by Senator Voorhees in regard to the Alaska, Fiji, and Island territories, was postponed. The Finance Committee, on the ground that the committee had no power to interfere in the matter. It was indefinitely postponed.

United States officers have seized three illicit distilleries, together with a large amount of machinery and tools. The officers were engaged in the distilleries were doing an enormous business, not only supplying the neutral strip and Northern New Mexico with whiskey, but also shipping hundreds of barrels into that portion of Kansas that surrounds No Man's Land.

A deposit of lead ore has been discovered on a farm near Dubuque, Iowa. It is said that there is now in sight in the mine, one great sheet of lead over 30 feet high and 14 inches thick. Experienced miners say there is over 1,000,000 pounds of galena in sight, and that 100,000 pounds can be mined in three days.

A train on the Lake Shore Railroad from the West broke in two near Hamburg, New York, on the evening of the 6th instant. The accident was caused by a coupling breaking on a down grade. The rear cars came down with a great speed and crashed into those ahead. The air brakes were tried, but would not work. Six persons were killed.

It now transpires that the loss of 160 lives in the terrible Massayampa disaster in Arizona, where a dam burst away and let a huge mountain of water rush down the valley, sweeping everything before it, was due to the fact that the engineer in charge of the train was sent in ample time to warn the people in the valley below, but who stopped at a saloon and forgot to deliver the message.

The Louisiana Lottery is now trying to capture the legislators of the State of Nevada.

A so-called "Anti-Saloon Republican" movement has been started in Iowa, to bring the saloons back to that State.

What is supposed to have been the last bill of the session was on the 8th instant introduced in the Legislature of South Carolina. It is No. 294, and is a memorial to Congress asking that body to submit to a vote of the people of the United States the question of the prohibition of the liquor traffic.

According to the New York correspondent of the Philadelphia *Register*, on Friday last, the New York *World* had 84 pages of printed matter, distributed to the page; 133 columns were reading matter. The *Herald* had 34 pages, of which 18 were reading matter; the *Sun*, 24 pages and 127 columns of reading matter; and the *Evening Post*, 22 pages and 92 columns of reading matter. The *Times* had 34 pages.

In this city last week 411 deaths were reported, being 32 less than in the preceding week and 24 less than the corresponding week one year ago. Of the foregoing 59 died of consumption; 37 of diseases of the heart; 35 of pneumonia; 21 of old age; 20 of inflam-

mation of the brain; 19 of convulsions; 16 of cramp; 16 of apoplexy; 15 of typhoid fever; 14 of bronchitis; 14 of diphtheria; 13 of inanition; 11 of paralysis and 10 of death.

Markets.—U. S. 4½'s, 103½; 4's, reg., 122; coupon, 122; currency 6's, 116 ½ 25.

COTTON was quiet but firm at 11½ cts. per pound for middling uplands.

FEED.—Winter bran, choice, \$15.50; do, fair to poor, \$14.75 to \$15.25; spring bran, \$14 to \$14.50.

Flour and Meal.—Western Meal, Pennsylvania super, \$2.00 to \$2.40; do, do., extras, \$2.50 to \$3.00; No. 2 winter family, \$3.00 to \$3.20; Pennsylvania family, stone ground, \$3.30 to \$3.50; Pennsylvania roller's super, \$3.50 to \$4.00; Western winter, clear, \$3.75 to \$4.00; do, do, straight, \$4.10 to \$4.55; winter patent, \$4.00 to \$4.50; Minnesota, clear, \$3.50 to \$4.00; do, straight, \$4.25 to \$4.65; do, patent, \$4.45 to \$5.00. Eye flour was dull, but steady, at \$2.00 for choice.

GRAIN.—No. 2 red wheat, \$2½ a \$3½ cts. No. 2 mixed corn, 35½ a 36½ cts. No. 2 white oats, 28½ a 29½ cts.

BEEF CATTLE.—Extra, 5 cts.; good, 4½ a 4½ cts.; medium, 4½ a 4½ cts.; fair, 4½ a 4½ cts.; common, 3½ a 4 cts.; fat cows, 2½ a 3½ cts.

SHEEP were in fair demand and with lighter receipts, prices closed firm. Extra, 6½ a 6½ cts.; good, 6½ cts.; medium, 5½ a 5½ cts.; common, 4½ a 4½ cts.; culls 3½ a 4½ cts.

LAMBS were in fair request and good stock advanced. Extra, 7½ a 7½ cts.; good, 6½ a 7 cts.; medium, 6 a 6 cts.; common, 5 a 5½ cts.

HOGS were in better demand, on account of the colder weather, but prices did not advance, although stout corn more West. Good Western, 6½ a 6½ cts.; heavy Western, 5½ a 6 cts.; State, 5 a 5½ cts.

FOREIGN.—The Parliamentary election in the north division of St. Pancras on the 4th instant, resulted in the return of Bolton, the Gladstonian candidate, who polled 2,549 votes against 2,549 polled by the Unionist candidate, Graham.

At the last evening election Bolton was defeated by 261 votes.

Abraham Lincoln, son of Minister Lincoln, and grandson of President Abraham Lincoln, died in London on the 5th instant.

A mass-meeting was held in London on the 9th instant, to protest against the Kara excited speech. John Burns made a long and somewhat excited speech. He asserted that public opinion would force the British Government to interfere with Russia. The meeting was dispersed, and admitted that the letter in the *London Times* written by a Nihilist was the absolute truth.

A terrible explosion occurred on the 10th instant, in the Mors colliery, in Glamorganshire, Wales, which it is feared, has caused the death of about 160 lives. The work of recovering the bodies is going on slowly.

It is stated that the Portuguese Minister in London has failed in his negotiations with Lord Salisbury for the settlement of the African Territorial dispute, and will withdraw to Lisbon immediately. The people in Lisbon are clamoring for the death of the minister.

To mark the anniversary of the death of his grandfather, Emperor William I, the Emperor of Germany, on the 9th instant, sent an aide-de-camp to Boetticher, the Minister of the Interior, with the decoration of the Order of the Black Eagle. In return, Boetticher sent a letter in the Emperor's own handwriting, in which he associates the honor with the memory of the late Emperor, to whom he refers as the pioneer of the social reform movement, which he says has resolved to pursue with all persistence.

In his effort to care for the reform, the Emperor says he has found Boetticher his main support. The incident is much remarked in connection with the rumors that Boetticher will succeed Prince Bismarck in the office of Chancellor.

In his effort to care for the reform, the Emperor says he has found Boetticher his main support. The incident is much remarked in connection with the rumors that Boetticher will succeed Prince Bismarck in the office of Chancellor.

In view of the increasing intrigues between Bulgaria and Armenia, which in Turkish eyes portend a new Russian war, the Porte has decided to invite a European conference to discuss the Bulgarian and Armenian questions be kept separate.

A telegram from Havana says that, owing to the persistent drought, all the sugar cane that was planted during the spring and fall has been either destroyed

or injured to such an extent that next year's crop must be seriously affected.

NOTICES.

TRACT ASSOCIATION OF FRIENDS.—The Ann Meeting of the "Tract Association of Friends," will hold in the Committee-room of Arch Street Meeting-house, on Fourth-day evening, the 29th instant, at 8 o'clock. Friends generally are invited to attend.

EDWARD MARIS.

Third Month, 1890.

Clark.

CORRECTION.—In the notice of the death of Carol Bunting Folwell, on fifth line, it should read "in its monetary needs thereof."

It is proposed shortly to issue a book of Quaker Pedigrees; and the compiler would welcome it a great favor if every member of the Society of Friends who may so incline would kindly send full particulars their own genealogy, or that of any other member of the Society of Friends with which they may be acquainted, and, further, full particulars of any arms, crests, mottoes, &c. so far as they are entitled to use.

There will be no charge whatever for the insertion of the above, and all pedigrees communicated of this or more generations will be included.

In asking for the above, the compiler wishes to draw attention to the especial importance of accuracy with respect to dates and other particulars.

Loose copies of any pedigrees contained in the book can be obtained printed at the head of folio sheets.

Please address all communications on the subject ARTHUR C. FOX DAVIES, Coalbrookdale, R. S. Shropshire, England.

THE ANNUAL MEETING OF FRIENDS' ASYLUM FOR THE INSANE. will be held in the Committee Room Arch St. Meeting-house, on Fourth day, Third Month 19th, 1890, at 3.30 P. M., at which the annual election of officers of the corporation will be held. A full attendance of members is requested; no special notice will be sent.

THOMAS SCATTERGOOD, Secretary.

The Committee of Westtown Boarding School appointed James G. McCallin, Treasurer of the Institution, in place of Joseph Scattergood, deceased. His office is at No. 119 South Fourth St., Philadelphia.

WESTOWN BOARDING SCHOOL.—The Spring Term will begin Third Month 18th, 1890.

Friends intending to send their children to school will please make early application to

J. G. WILLIAMS, Supt.

Westtown, Penna.

DIED, Twelfth Month 11th, 1889, at the residence her son-in-law, Jason Neuge, Springdale, Iowa, A. C. GRUWEL (widow of Moses Gruwel) in the 71st year of her age, a member of West Branch Monthly Meeting of Friends, Iowa. Her family and friends have the comforting assurance that she has been taken to rest among the redeemed that have gone before.

—, First Month 27th, 1890, at the residence her son-in-law, William H. Oliphant, West Branch, Iowa, SARAH B. BROWN (widow of Benjamin B. Brown) in the 89th year of her age, a member of West Branch Monthly Meeting of Friends, Iowa. She was gathered, we reverently believe, as a shock corn fully ripe for the Heavenly garner.

—, at West Grove, Pa., on the 18th of Second Month 1890, EVANS BROWN, in the 82nd year of his age. He was a member of New Garden Monthly Meeting of Friends.

—, at Poplar Ridge, Cayuga Co., N. Y., on the 19th of First Month, 1890, WILLIAM R. HAZARD, the 87th year of his age. From early life he was strongly attached to the principles of Friends, and faithful to the maintenance of their testimonies, and in the time of his death was a member of Spring Monthly Meeting. His last sickness was about a month's duration, during which he was remarkable patient. The day he was taken ill he said, "I am liable to go at any time;" and afterward he expressed his resignation to the Divine will, and his desire to be found ready at the solemn close. And we humbly trust that, through the mercy of God in Christ Jesus, his redeemed spirit has been received in one of the Father's mansions.

FOR "THE FRIEND,"

Incidents and Reflections.—No. 215.

TEMPERANCE.

The *Presbyterian*, of Philadelphia, gives the following anecdote which illustrates the folly of the habit of "treating" friends and companions to draughts of intoxicating liquor. The narrative is stated to be a true one:—

"Mr. Perry was a Southern gentleman, exceedingly polite, and also a very temperate man. One day he met an acquaintance, who called out:

"Hello, Perry! I was just going in to get a drink. Come in and take something."

"Thank you," said Perry; "I don't care for anything."

"But," persisted the other, "come in and take something just for sociability's sake."

"I want to be sociable," answered Perry; "I am anxious to be sociable; but I can't drink with you."

"All right," growled the friend. "If you won't be sociable I'll go without drinking."

"The two men walked silently along for a minute or two, the sociable man in a state of great irritation, until Perry suddenly halted in front of a drug store.

"I'm not feeling very well to-day," said he, with a pleasant smile, "and I think I'll go in here and get a dose of castor-oil. Will you join me?"

"What?" exclaimed the other. "In a dose of castor-oil?"

"Yes; I'll pay for it."

"E-hem!" cried the sociable man with a very dry face, "I hate the stuff!"

"But I want you to take a glass of oil with me just to be sociable, you know."

"I won't do it!"

"Indeed! My friend," said Perry, gravely, "your sociable whiskey is just as distasteful to me as my sociable oil is to you. Don't you think I have as much reason to be offended with you as you have with me?"

"The sociable man saw the point, and it would be money, health and morals if the lesson could be firmly implanted in the mind of every young man in the land."

Dr. Horatius Bonar was a total abstainer, and his story is told concerning the event which led him to take the pledge: The head of a family

in his congregation was addicted to drink, and the doctor advised him to abstain. "Have you taken the pledge?" inquired the poor man. Dr. Bonar went immediately, hunted up a pledge, signed it, and returned to say to his unfortunate parishioner: "Yes, I have signed the pledge for your sake." Some men insist on their right to drink moderately, and refuse to commit themselves to total abstinence lest they should lose a fragment of their rights and their freedom. But do they owe nothing by way of example to the weakest and most needy class of human beings? To stand stubbornly on one's rights in a case like this, and at a time like the present, is an effectual way to break the bruised reed and quench the smoking flax.

In a letter written for the encouragement of young people, John H. Duke, a successful merchant of New York, who has worked his way up from poverty and obscurity, relates some chapters in his own experience. He says:—

"I may add for the benefit of boys and young men an account of how I was led into drunkenness. The first that I recollect of taking a drink was in going to a place where the women of the neighborhood were celebrating the birth of a child, according to the custom in my native land; to do this without a drop of whiskey and a little punch was out of the question, and they insisted on my taking a little. 'Twill do you good, child, dear.' I might have been at that time ten or eleven years old, but this was my starting-point. I soon came to like whiskey and punch. My mother always told me that it was not right to get drunk, but that 'it was no harm to take a little to help digestion, and in case of getting a cold it was the best thing to break it up'; and many a time when I would get a glass I used to get funny or a little heady; but I knew that the mothers of the neighborhood did not call any one drunk so long as he could stand up on his feet, and I was often sent into town for a pint to break up a cold or for any kind of sickness.

(Had I not been sent for it I would not have been tempted to take some of it.) I grew so fond of it that at the least bad feeling I must go and get a drink about eleven o'clock in the day. To make matters worse a grog-shop was established in our neighborhood. Then it was customary for young boys when they met friends in town to ask them to have a drink. I worked hard and had a little money, rather more than other boys, and thought it made a man of me to invite any one I knew in to take a drink. I heard them say, 'What a little man he is, and how he treated me in town.' But in process of time I did not have enough money to treat any one of them any longer. I became so fond of drink that I spent all my spare money for it, and never had enough.

"I continued in this way until I was about nineteen years of age, when it came to a crisis, which happened in this wise: I went to see a young friend about three miles away from my home, and that on the [First-day], instead of going to church or meeting. He was very skill-

ful with an old crooked gun; he could hit any mark, because he had learned to know the crook; so when we got through with this sport, and I was ready to go home, he got a shilling from his master to treat with, and the first drinking-place we came to we went in. Although it was against the law to sell on that day, yet the bar-tender gave us all we could pay for. In the evening, before it was quite dark, I made my way toward home, and I recollect well acting very foolishly along the road. Instead of going round the road I thought I would go across the fields with hedges and ditches dividing. At five o'clock I met a man as I was going through a gap, and at eleven o'clock I was in the same field, having lain there six hours insensible! This was in March, 1850.

"How I became a sober man and how I have maintained it till now I will proceed to tell. After lying six hours insensible I revived a little and began to think upon my ways. The Spirit of God said to me, 'If you die in your sins, where I am you can never come.' I confess I was much frightened, and had reason to be, and in my distress cried aloud. The same gentleman whom I had met drew near and asked what was the matter. I told him the truth was that I had gone away from home on [First-day] and got drunk, and I had shouted to see if there was no one who would bring some one to me that I might know where I was. I wanted him to take me home and to keep me until I was sober; but he could not do that. He had hard work to get me out; I didn't dare to go to my home, but had him take me to the house of a relative, and I stayed with him the next day. The Spirit of God still strove with me, and as soon as I got home I commenced to read my Bible with new eyes and spent two years reading it on my knees all the spare time I had, and while I was weaving in the factory I kept my Bible beside me. Now, as fond as I had been of the drink, I was equally as desperate against it, and I am thankful that I spent those two years alone with God and the Bible, for He made a total abstinence man of me.

"Within three weeks from the time that I had left off drinking I was led by the Spirit of God to give up smoking and chewing tobacco. It was in this way: There was in the neighborhood a young man lying on a bed of straw, and I felt it a duty to visit and pray with him. Conscious of inability to pray in public I committed some prayers from a church book; but when by his side I found they would not do, and prayed out of a warm heart, using the words that came to my lips. When I ended I felt that I must show my faith by my works and give something to his mother (for they were poor) to get him nourishing food. Just before I had been wishing to get more money for tobacco.

"There and then I gave it up, by the help of Him whose Spirit strove with me. Now I was not nearly so strongly tried to give it up as I had been to form the habit and love of it; for when I first began to smoke, all nature rebelled.

"Many times, since 1850, have I thought that

had I belonged to some Church which would have allowed me to go on with these sins I should have long since been ruined.

"Whatever we do, whether we eat or drink, we should do it to the glory of God; and that one principle carried out contributes as much to a man's prosperity in this world as it does to his eternal salvation.

"Now, in a very short time after I took to reading my Bible I had saved \$250, borrowed as much more, set up a web of my own, in a few weeks I had two, then three, and then the providence of God opened a way for me to come to America, where I have resided ever since, though my business often takes me across the sea, and I have found my highest joy in endeavoring to warn others from the follies into which I fell, and to show them the way of salvation."

In Jones' Annals of Oneida County, New York, there is related an incident of the effect produced by a free use of intoxicating liquor, which might have had a tragic ending, if it had not been for the courage and presence of mind of a woman. The account is as follows:—

"While John Post kept a tavern, upon one occasion, the celebrated Indian Chief, Joseph Brant, became his guest for a night. Brant was on his way to Canada, from the seat of government, where he had been to transact some business with Congress. A Mr. Chapin and another gentleman were also guests at the same time with him. The chief called for one bottle of wine after another, until they were all in a pretty happy mood, when the two gentlemen declined drinking any more. After being repeatedly urged to drink, and as often declining, they were told by Brant sportively, that unless they drank he would pour it down their necks. Becoming somewhat nettled at their decided refusal, Brant made some other proposition to Mr. Chapin, and from something said or refused to be done by the latter, the Indian flew into a towering passion. Angry words passed, and Brant dared Chapin to fight him, which the latter refused, and then tried by fair words and persuasion to satisfy the chief that no insult had been intended, but failing in this, he made an effort to leave the room—and the rest of the company also attempted to calm the excited passions of the great Mohawk warrior. Brant, however, drew his sword, and drove Chapin into a corner of the room, and there by the most bitter taunts and reproaches, by making passes at him with his weapon, and by rushing furiously towards him, attempted to compel him to fight. Chapin coolly bared his breast and said, I will not lay hands upon you, but there is my bare breast, pierce it with your sword, if a victim you wish." Mrs. Post, at this crisis, recollecting to have heard that an Indian could be moved by the sight of an infant, instantly took her youngest child, but a few months old, and holding it in her arms, placed herself in front of the infuriated Brant, telling him that he must destroy her and her child before he injured their guest and friend. "How would it have looked," she continued, "if several ladies had met here for a social visit, and they had ended it in strife? Put up your sword, and here, take my babe and hold it as you often have the others—see, it smiles and you look so angry!" The heart of the savage Thayendanegea was touched, he, who had revelled in scenes of blood and cruelty at Oriskany, and in the whole extent of the Mohawk Valley, was now conquered by the smiles and innocence of an infant. The expression of his features was instantly changed, and laughing he exclaimed,

'what a fool I have been! Chapin, let us forgive each other.' After this reconciliation they retired."

J. W.

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 258.)

An exceeding close trial of my faith and love towards Him who had formerly been merciful, came upon me some years after the mentioned; and which nothing short of a full belief that it was my Master's requireing, would have induced me to have declined a general prevailing custom, in that of shaving my beard. In coming down into deep meditation after my mind was brought into thoughtfulness thereon, I had to conclude that shaving the beard was a changing of the simplicity in which his allwise Creator formed and left man, for causes known to himself, which (no doubt to me) was with a beard, or likely to grow. It weightily appeared to me (I must leave others who come after me, to feel, judge, and act for themselves in the way they find solid peace) that my continuing to shave my beard would require a more substantial reason than that which is only founded on prevailing custom. It seemed to me probable, or most likely that our blessed Saviour and his immediate followers did wear their beards. If so, I concluded their example might be followed by Christians, and that without any one giving just occasion to be treated with as an offender by his brethren. Great offence was taken by some of my fellow-members; bitter reflections were uttered, and false reports spread; yet a remnant sympathized with me, which was encouraging upon my trials. These were not offended at the simplicity of the beard, though they did not see their way to forego custom in refraining to shave their own. They also stood by me in many solid conferences which were held, so that some who appeared as mine adversaries could not have their desire against me.

I was convinced my best way was to lay low, and let all the tempests beat. I had in other trials witnessed this truth, "that the foundation of God standeth sure; and that there is a refuge for humble souls, although the strong will of man in others, is permitted to afflict the body for a season." Some who could not find sufficient occasion against me, when I had a concern to travel in the service of Truth, raised objections on account of my singularity and stopped my getting a certificate; yet owned I was a useful minister at home, and that the objection was in relation to my beard, and if I would shave it, they would think well of my travelling as proposed.

I believe in this situation (although I was willing to go if it might be consistent with the order established amongst us) the Lord whom I desired to serve, accepted the will for the deed. I was restrained from conforming to the custom of shaving to get in favor of men, and thereby to lose peace of mind; so was made easy, feeling my situation to resemble that of a prisoner; or one measurably in bonds for the sake of maintaining a conscience void of offence to Him whose yoke was made easy and his burthen light. By the Arm of Almighty power my head was borne up through all; so that I could praise his holy name, for his paths were pleasantness, and in them I had peace. Though a spirit unfit, as I believe, to judge in his cause, hindered my going forth in God's service for a time; yet my case became known far and near, inasmuch that many sympathized with me that never had seen

me. Some of these coming to see me, said, "Thy friends were agreeable to the sensations they had of me when in their own houses, which seemed like meeting with an acquaintance. I did believe though I might lay hidden as in the cleft of the rock, if I was favored to keep my place, my service would not be lost. And blessed be his name, I have been made sensible the lofty would be brought from their seats.

I wish to write with proper caution; for though it may be permitted for fallible man to be forward in judging the conscience of another, I have preferred some of my opposers to myself, for apprehension they had nothing to do with those singular testimonies; yet I tenderly wish all such not to censure or judge those who have lest any should be found fighting against a superior power. My love for the brethren has helped to steady me in my deepest trials; fixing the contents of that lesson was expedient be minded: namely, "Bless them that curse you, and pray for them who revile and persecute you," &c. My soul desires feebly to record this to all tribulated ones every where, whatever name, nation or color; for if we to humbly stand in our allotments, and to faithful, love will surely harmonize true disciples together, and nothing will be found to "hurt or destroy in all God's holy mountain."

1791. About this time I understood a letter was made for the raising of money to defray the expenses of war, by a duty laid on imported articles of almost every kind. This duty I hold to believe, was instead of taxing the inhabitants as had been done sometimes before. I had found myself restrained for 50 or 40 years from paying such taxes, the produce whereof was applied a great measure to defraying expenses relative to war; and as heretofore hinted, my refusal from a tender conscientious care to keep clear in my testimony against all warlike proceeding. When the matter was brought under my weight consideration, I could see no material difference between paying the expenses relating to war, taxes, or in duties; and although I had many very little use of goods which were imported from foreign countries, for several years past because of the corruption attending the trade of these things; on hearing of this duty, and considering the cause of its being laid on imported goods, my mind was much exercised. I saw clearly (as I had to believe) that the blessed Truth stood opposed to all wars and bloodshed, teaching us to do unto all as we would have them to do to us. I have said above, I have much refrained from using imported goods generally, but as I was engaged in travelling much in Truth's service, I saw great difficulty in refraining from the use of salt; people generally using it in almost every kind of food, &c. An exercise of this kind again led me into the deep endeavoring to apply for counsel, and preservation upon the right bottom, as at the footstool of my Heavenly Father, and was made sensible would be better for me to live on bread and water than to bank my testimony; I believed likewise. He would not lead me forward, though an uncommon path, without giving me strength to maintain my ground, as I humbly put my trust in Him. And therefore I found it best make a full stand against the use of all things upon which duties of that kind are laid. As I have to confess my way has been made much easier than I looked for. Blessed be the Lord my Redeemer, He hath renewed my faith and confidence in Him, and hath preserved me hitherto; not leaving me to the will of those who waited for my halting, but hath given me the

tory through patient suffering: Inasmuch that now in general people appear more loving towards me than ever, and bear my plain doctrine much better than formerly. I can with thankfulness say, I love the brethren, with mankind universally, and the Lord above all. Let his great name be praised and magnified forever and ever. Amen, saith my soul.

(To be continued.)

FOR "THE FRIEND."

Historical Notes, Respecting the Society of Friends.—No. 8.

The doctrines preached by George Fox and his coadjutors, especially those in reference to worship and ministry, necessarily separated his adherents from the organized churches of that day, and led them to meet together to wait upon God in worship. As their numbers increased, the need of some provision for the care of the poor, for the oversight of marriages, and for the relief of those who were suffering from persecution, was soon felt, and led to the establishment of meetings of discipline; which grew up because they were needed.

As a matter of course, the preachers through whose ministry the people had been convinced of the truth of the principles held by Friends, were the most influential members of the new Society; although these were careful to enlist in the service of such meetings others whose religious experience and purity of character qualified them for usefulness.

An interesting account, signed by Edward Burrough, is preserved, of the growth of the Society in London, in which, after speaking of the gospel labors of the early ministers and the conviction which followed, mention is made of divers matters of a more outward nature, which required attention—such as "providing convenient meeting places, for the publishing of Truth, how the poor people that believed should be honestly taken care for—that no want should be amongst them—and that the sick and weak and impotent should be visited and provided for; and that such servants as were put away out of their services for receiving the Truth, should be looked after, and placed in some honest employments." These occasions and services not being regarded as so proper for the ministers as for the Friends of the city, "we, for the furtherance of the gospel and prosperity of the work of the Lord, did appoint that the men Friends of the city, or the ancientest of them in the Truth (not excluding any) should meet together once in a fortnight, or once in a month, for the management of Truth's affairs."

The document referred to goes on to say that "the meeting do consist of just and righteous men, all believing in the Truth, and walking in the same. But, if any person out of the Truth and of another spirit, come to the meeting, such are excluded from having their advice and judgment taken in matters pertaining to the service of the Lord."

George Fox mentions, that in 1653 the elders in Cumberland desired that they might have a Monthly Meeting to look after the poor, and to see that all walked according to the Truth," etc.; and they had a meeting settled there for the same purpose." After speaking of the establishment of other Monthly Meetings, he adds, "And then there was a Yearly Meeting settled at Skipton-in-Yorkshire for all the northern and southern counties, where in the wisdom of God, they did see that all walked according

to the glorious gospel of God, and that there was nothing wanting among them." This meeting was moved to London in 1661.

Although the foundation of the disciplinary system which prevails in the Society of Friends was laid thus early, yet the development was gradual. From time to time, as circumstances arose which rendered it necessary, the Yearly Meetings have issued advices to their subordinate meetings and members which have the force of rules for the regulation of their proceedings. It was many years before the orderly connection and subordination which now exists was established and recognized. The Yearly Meeting of London originally was composed of ministers only; and as these were the instruments through whom the churches had been gathered, their advices were regarded with great respect by those who had been convinced of the principles of Friends through their fervent preaching. Since 1677 it has been attended by representatives from the Quarterly Meetings—but these representatives appear originally to have been such only "that are concerned in the public service of the Truth," i. e., ministers.

George Fox mentions in his Journal, under date of 1666, "I was moved of the Lord to recommend the setting up of five Monthly Meetings of men and women in the City of London, besides the women's meetings and the Quarterly Meetings, to take care of God's glory, and to admonish and exhort such as walked disorderly or carelessly, and not according to Truth. For, whereas Friends had only Quarterly Meetings, now truth was spread and Friends grown more numerous, I was moved to recommend the setting up of Monthly Meetings throughout the nation." His Journal contains frequent notices of his labors in effecting this organization, which was attended with much difficulty, owing to the opposition it excited among those who regarded it as an unnecessary infringement on their personal liberty. It was opposed also for a time by many well-disposed persons, who were influenced by the reasoning of those who claimed that, as all Christians were furnished with the Light of Christ as their leader, they ought to be left to its guidance, and not be subject to outward rules, etc.

William Penn, in speaking of these, says: "They would have had every man independent that, as he had the principle in himself, he should only stand and fall to that, and nobody else; not considering that the principle is one in all—and though the measure of light or grace might differ, yet the nature of it was the same; and being so, they struck at the spiritual unity, which a people guided by the same principle, are naturally led into; so that what is evil to one is so to all—and what is virtuous, honest, and of good report to one is so to all, from the sense and savor of the one universal principle which is common to all."

It is very apparent that the conflict over the introduction of the discipline and the establishment of an organized system of meetings, was the most severe trial of its stability, which the infant Society of Friends had then met with. John Story and John Wilkinson, prominent ministers in the early history of our Society, joined with those who advocated the independency of the individual meetings from the control of any superior body such as the Yearly Meetings, and took part in the separation which ensued. More than one hundred pamphlets are said to have been issued in the controversy that was excited; yet, finally the change was effected, and the most of those who were at first

dissatisfied, saw their error and returned into unity with their brethren.

It was this controversy which led Robert Barclay to prepare a treatise on Church Government, which he termed *Anarchy of the Churches*. In this work he shows that Christ did ordain order and government in his Church; that the apostles and primitive Christians practised such order; and, as the same necessity for it now exists, the Church now has the same power as ever.

Most of the ministers by whose labors the Society had been gathered, united with George Fox in his belief that the introduction of a regular order and discipline was of the Lord; and helped him in the heavy labor which fell upon him at that time. As an illustration of this, the following extract from the "Life of Richard Davie" is inserted:

"At a Quarterly Meeting [in 1682] not far from Aylesbury, it opened in me to advise Friends to keep to those rules and methods agreed on among us in our men's and women's meetings. As I was declaring, came in an opposite party; however, I went on and showed them how it was agreed among the Apostles to send chosen men, endued with the Holy Ghost, to set up good order and method among them. I delivered unto them that it seemed good to the Holy Ghost, and to us also, to set up our men's and women's meetings—that the care and concern of the Church of Christ might be upon holy, self-denying men and women, who might take care of the fatherless and widows in their afflictions and keep themselves unspotted from the world, etc."

The troubles which a few years before had grown up in connection with the views of John Perrot, had a similar origin to the opposition afterwards made to the establishment of the discipline. In both cases there was the carrying to an unreasonable extreme the doctrine of the individual enlightenment and merely personal responsibility of each individual. Perrot objected to taking off the hat in times of public prayer, as a mere traditional custom; and he declined attending religious meetings except when he felt a special drawing to do so. Many incautious persons, deceived by the show of spirituality in these professions, were taken for a time in the snare: among these was Thomas Ellwood, who, however, soon came to see his mistake. In his Journal he says, in 1667, a memorable meeting was held in London, appointed "through a Divine opening in the motion of life in that eminent servant and prophet of God, George Fox, for the restoring and bringing in again those who had gone out from Truth, and the holy unity of Friends therein, by the means and ministry of John Perrot. This error of his being broached in the time of my infancy and weakness of judgment as to Truth, I was taken with the notion, as what then seemed to my weak understanding, suitable to the doctrine of a spiritual dispensation.

"But, when that solemn meeting was appointed at London, for a travail in Spirit on behalf of those who had thus gone out, that they might rightly return, and be sensibly received into the unity of the body again, my spirit rejoiced, and with gladness of heart I went to it, as did many more of both city and country, and with great simplicity and humility of mind, did honestly and openly acknowledge our outgoings, and take condemnation and shame to ourselves. Thus, in the motion of life, were the healing waters stirred: and many, through the

virtuous power thereof, restored to soundness; and indeed not many were lost."

J. W.

Pine Street Meeting-House.

(Concluded from page 261.)

In the Eleventh Month, 1754, it was agreed to have evening meetings in the Pine Street Meeting-House until the next Monthly Meeting. These meetings do not appear to have been successful, as it is recorded the following month, that they were of doubtful expediency, and their continuance was left in the care of the Morning Meeting of Ministers and Elders. The meetings were, however, probably continued, as we find that in the Fourth Month, 1756, an afternoon meeting was held there.

The first Monthly Meeting of Philadelphia for the Southern District, which ultimately occupied the Pine Street Meeting-House, convened in the Meeting-House on Fourth Street below Chestnut (the present site of the Forrest Building) on the 25th of the Eleventh Month, 1772. At this opening sitting it was agreed that a meeting for public worship should be held at the Pine Street house on the Fourth day of the week at ten o'clock in the morning, and that the next Monthly Meeting should also be held in the Pine Street house. At the same meeting a committee was appointed to confer with the overseers of the Public Schools, with reference to the use of a part of their school-house, also on Pine Street, to hold either the men's or women's Monthly Meeting in.

In the Third Month, 1773, a committee was appointed to consider what steps should be taken to provide a proper place to hold the Monthly Meeting in, and the following month they were "desired to form a plan of a suitable building, make an estimate of the expense and endeavor to obtain subscriptions for as much money as may be necessary" to build it. This committee produced a plan to the Monthly Meeting held in the Fifth Month following, which was approved, and authority was given to proceed with and complete the work as early as possible. A final report was made in the Twelfth Month, 1773, that the additional room had been completed, and it appears then to have been specifically appropriated for the purposes of the Women's Monthly Meeting.

This room was about forty feet square, and was erected as an addition to the south side of the original building. It communicated with it by two doorways, one of which was between the galleries for the men and women members. There was also an entrance on the east from the outside.

Some changes were subsequently made as indicated by the following minutes:

"Eleventh Month 26, 1794, Thomas Hough being present and requesting the liberty of opening two windows in the west wall of his house adjoining the lot eastward of this Meeting-House in Pine Street, it is agreed to, provided he always keeps fixed to the said windows reversed blinds, so as to prevent the exposure of the ground and yard belonging to Friends."

"In 1802 the same Friend having offered us the privilege of opening two windows in the south end of the Women's Meeting-House, for the admission of light and air, Thos. Hough and others are named to have it done, and procure from Thomas a proper deed of conveyance of said privilege."

After the erection of the Meeting-House on Orange Street in 1832, meetings were discontinued in the Pine Street house, except that a weekly evening meeting was held there until 1835, when it also was given up.

In 1836 the old house and lot were offered for sale and sold, but the contract was not perfected. In 1841 it was sold again, but the purchaser refused to take it because of defective title.

Subsequently ejectment was brought by the heirs of the younger Samuel Powel, against Henry Cope and others, trustees, in the Supreme Court at Nisi Prius, the ground taken being that the property had been diverted from the purpose for which it was originally given. The judge directed a verdict for the plaintiffs, reserving the right to the court in banc to modify the judgment, or to enter judgment for plaintiffs or defendants.

The case was argued before the court in banc at "December Term, 1850," and the opinion of the court was delivered the following year by Judge Lowrie, confirming the title of Friends to the property. By this decision it was held, 1st, That the devise was of a fee simple, and not of a qualified estate. 2d, That the trustees might sell and convey, applying the proceeds to the same uses as those on which the land was devised, and that the heirs of Samuel Powel, Jr., had no title. This settled not only the question relative to Pine Street Meeting-House, but established the important principle of law that property given for specific purposes may be sold and the proceeds applied to similar uses, without its being a violation of trust. In other words, it is not the particular property given, but the substantial value which is bound by the condition imposed by the donor. The particular property may be alienated clear of the conditions, but the conditions attach to the proceeds of sale.

The title to the property having thus been fully established, a sale was effected in the summer of 1861. The old building was removed and a row of six dwelling houses erected on the site.

THE ANGELS' SONG.

SELECTED.

It came upon a midnight clear,
That glorious song of old,
From angels bending near the earth
To touch their harps of gold:
"Peace to the earth, good will to men,
From heaven's all gracious King"
The world in solemn stillness lay
To hear the angels sing.

Sill through the cloven skies they sing,
With peaceful wings unfurled,
And still celestial music floats
O'er all the weary world;
Above its sad and lowly plains
They bend on heavenly wing,
And ever o'er its battle sounds
The blessed angels sing.

O ye beneath life's crushing load,
Whose forms are bending low,
Who toil along the climbing way
With painful steps and slow
Look up for glad and golden hours
Come swiftly on the wing;
O, rest beside the weary road,
And hear the angels sing!

For lo! the days are hastening on
By prophet-bards foretold,
When with the ever circling years
Comes round the age of gold—
When peace shall over all the earth
Its final splendors fling,
And the whole world send back the song
Which now the angels sing!

THE OLD SCHOOL-ROOM.

SELECTED.

BY HEZEKIAH BUTTERWORTH.

My spring-time of life has departed,
Its romance has ended at last;
My dreamings were once of the future,
But now they are all of the past.
And memory oft in my trials
Goes back to my pastimes at school,
And pictures the children who loved me,
In the beautiful village of Yule.

The school-house still stands by the meadow,
And when it is the first of May,
And flecked with the sun is the shadow
Of the evergreen woods where I strayed,
The thrush in the meadow plays
Still sings in the evergreens cool;
But changed are the fun-loving faces
Of the children who met me at Yule.

I remember the day when, a teacher,
I met those dear faces anew;
The warm hearted greetings that told me,
The friendships of childhood are true.
I remember the winters I struggled,
When care worn and sick, in my school;
I remember the children who loved me,
In the beautiful village of Yule.

So true in the days of my sadness,
Did the hearts of my trusted ones prove,
My sorrow grew light in the gladness
Of having so many to love.
I gave my own heart to my scholars,
And punished severity's rule;
And happiness dwelt in my school room,
In the beautiful village of Yule.

I taught them the goodness of loving
The beauty of nature and art;
They taught me the goodness of loving
The beauty that lies in the heart.
And I prize more than lessons of knowledge
The lessons I learned in my school—
The warm hearts that met me at morning,
And left me at evening, in Yule.

I remember the hour that we parted;
I told them, while moistened my eye,
That the bell of the school room of glory
Would ring for us each in the sky.
Their faces were turned to the sunset,
As they stood 'neath the evergreens cool;
I shall see them no more as I saw them
In the beautiful village of Yule.

The bells of the school-room of glory
Their summons have rung in the sky,
The moss and the fern of the valley
On some of the old pupils lie;
Some have gone from the wearisome studies
Of earth to the happier school;
Some faces are bright with the angels',
Who stood in the sunset at Yule.

I love the instructions of knowledge,
The teachings of nature and art,
But more than all others the lessons
That come from an innocent heart.
And still to be patient and loving,
And trustful I hold as a rule,
For so I was taught by the children
Of the beautiful village of Yule.

My spring-time of life has departed;
Its romance has ended at last;
My dreamings were once of the future,
But now they are all of the past.
Methinks, when I stand in life's sunset,
As I stood when we parted at school,
I shall see the bright faces of scholars
I loved in the village of Yule.

—American Holidays

FINALLY, brethren, whatsoever things are true, whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report; if there be any virtue, and there be any praise, think on these things. Phil. iv. 8.

FOR "THE FRIEND."

The Symplocarpus Fetidus.

On the 19th of Second Month, as I was walking along a lane that leads from the main street of our village to the lower ground to the south, I noticed that the mottled purple flower of the skunk cabbage had pushed its way up through the soil. This curious plant belongs to the Arum family, the most of whose species are natives of the tropics. In it the spike of flowers is shortened into a globular mass, the individual florets being crowded close together on a receptacle. This form of inflorescence is called by botanists a *spadix*, and the cluster of flowers is protected by a floral leaf or bract called a *spathe*, which is wrapt around it, leaving an opening on one side. In the skunk cabbage this spathe is thick and fleshy, as was the case with the allied tropical plant, the *Monstera*, described some weeks ago.

The *Calla* or Egyptian Lily, and the common Indian Turnip of our woods, furnish well-known examples of a *spadix* and *spathe*.

The flower I found had a strong musky odor similar to that of the skunk, whence it derives its common name; and its specific name *fetidus* (stinking) has been given to it by botanists for the same reason. Its full name is *Symplocarpus fetidus*. The leaves, which have not yet developed, are large and smooth.

The disagreeable odor of the *symplocarpus* is common to several of the Arum family, some of which far surpass our plant in offensiveness.

There is a large and interesting group of the Arum family (the genus *Anthurium*), natives of tropical America, of which more than 180 species are known. In these the bract or leaf which in the true Arum forms the spathe, is flattened out and does not enclose the spadix. In some of them this is of a brilliant scarlet color and has a polished surface.

The *Anthuria* vary from herbs a few inches high to gigantic climbers that by their weight bring forest trees to the ground. They are well adapted to hot house culture because their bright glossy foliage attracts no insects and harbors few.

FOR "THE FRIEND."

What is Silent Worship?

Silent prayer, adoration, communion with our Divine Lord by means of his presence in our hearts, is getting to be an acknowledged fact among other denominations than our own.

These are accepting this blessed privilege, and in many of their gatherings they are, in numerous instances, setting apart a portion of the time spent in worship for *silent prayer*. Some of other church members who have occasionally dropped into our meetings on First day morning, have remarked something like this: "Oh! how sweet and truly precious was the *silent* part of your worship."

There are two things which it seems to me threaten the standing of the Society of Friends to-day.

One is, in allowing this precious silent part of our worship to lapse into a mere formal silence in which there is no life—a spiritual deadness.

We must not think because we are at meeting at the stated time, and then sit there all through the hours of worship, that this is acceptable in itself. The mind may be employed about many things besides a reverent seeking to know the Master's will and to listen for his voice. It has been said by some one that "silence is vocal if we but learn to listen well." Oh! for the inward ear when we are thus gath-

ered before our Father in heaven. "I will hear what God the Lord shall speak unto me."

The second danger in marked contrast to this, is in a creaturely activity, a danger of doing away with silence altogether, and having the whole time taken up with vocal service of some kind.

In the first, I have mentioned there is no life; in the second, there is (without the blessing of the Lord) no power. May the Lord preserve us from settling down in a state of complacent ease on the one hand, or of running ahead of our Guide on the other.

Wherein is the remedy? Is it not in this: In our *daily* obedience to the leadings of the Divine Spirit to live a life of prayerful dedication day by day to our Master, seeking to know his blessed will at all times?

"Laying on the breast-plate of righteousness, our hoins girt about with truth, our feet shod with the preparation of the gospel of peace, and having the helmet of salvation and the shield of faith and the sword of the Spirit, wherewith we shall be able to quench all the fiery darts of the wicked."

Let our home life show our loyalty to Christ, and our love for Him. Let the family be gathered before Him daily to seek a blessing and for spiritual strength to follow Him.

If we thus keep the Lord ever before us, and think of Him during the day with individual concern to be found faithful to Him, I think we need have no fear but that when meeting day comes we shall be prepared to be, not merely *apparently*, in God's presence, but his presence would be *in us*, and we could worship Him in deed and in truth in whatever way He should direct.

Oh! that our *silence* might be a *living* silence. Oh! that our *activity* might be of the *Spirit's* ordering with hearts turned to the Master's praise. I long to see the waste places in our Zion built up. My heart yearns to see her stakes strengthened and her cords lengthened. I long to see the church every where coming up out of the Wilderness of all entanglement and leaning upon the Beloved.

But all that is done to advance Christ's kingdom must be done in the strength of the Lord God.

In his name alone can we truly go forward, and by his power alone can we prevail. "Without me ye can do nothing," and "except the Lord build the house they labor in vain that build it, except the Lord keep the city the watchman waketh but in vain."

Geo. Fox said, "Friends, let all your meetings be held in the power of God." We should strive to live day by day so that when we go to meeting, the heart would be in a state prepared to offer acceptable worship, with a feeling of adoration to the Giver of every good and perfect gift.

Thus, if we come and sit down as under the canopy of his love and listen with the inward ear, He will speak to us, and we shall be blessed, let the service be vocal or silent.

Coming together in this way under a sense of the covering of the Wing of Emmanuel, we should be ready to do his bidding in silent communion, prayer or praise, exhortation or confession, all under the immediate guidance of the Holy Spirit.

Inward communion is what the soul feels upon, getting strength from Him who is himself the Bread of Life, which cometh down from heaven.

If we as a body of believers do not believe in

the *inward*, but *wholly* in *spiritual* communion—where, may I ask, are we going to get our nourishment if we do not have this inward retirement before the Lord? In this busy life the soul needs to come apart from the hurry and worry and *rest* awhile, not in our meetings—only, but *daily* in our homes. If we are going to sit aside silent communion as a *part* of our worship, where are we going to get a substitute?

An eminent minister of another denomination has recently said: "If the Society of Friends are going to depart from their distinctive feature of silent worship as a part thereof, some other body of Christians will take it up."

We want then to be continually on the watch tower, to seek to wholly know the Lord's will, yielding unto Him faithful obedience, so that in all these things we may move at his bidding, and his alone. If we do this we know that we have the promise that when "He putteth forth his sheep, He goeth before them," and also "his word shall not return unto Him void, but it shall accomplish the thing whereto He sent it."

Pumice Stone.—Where the Supply of the White Kind Comes from.—We often hear it remarked, and particularly after the eruption of a volcano, that pumice stone ought to be plentiful and cheap, as quantities must have been ejected during the volcanic disturbance. As a matter of fact, however, none of the white stone in general use is obtained from active volcanoes. It comes from deposits of the article discovered in one or two quarters of the globe, the best of which is at present to be found in the island of Lipari, situate in the Tyrrhenian Sea. The island is mountainous in character, and consists of tufts and lavas and of highly silicious volcanic products. The district where the stone is found is called Campo Bianco or Monte Petalo (1500 feet above the level of the sea).

After riding a considerable distance, partly along precipitous paths sufficiently dangerous to be interesting, and partly through vineyards and over grassy plains, one almost suddenly comes upon a seemingly snow-clad, narrow valley, enclosed by hills, also quite white, and the whole glaringly bright on a sunny day. Into these hills workmen are ceaselessly digging deep burrows, working within by candle-light. In their excavations they come across many lumps of pumice stone, which are placed in baskets, subsequently being conveyed along the valley to the seashore, where small boats are loaded and sailed to the seaport near by, where the stone is sorted, packed and shipped to distant parts, either via Messina or Leghorn.—*St. Louis Globe-Democrat*.

Discoveries on Mercury.—Some very interesting discoveries have lately been made on the planet Mercury by Schiaparelli, the great Italian astronomer. Such remarkably acute eye-sight has this man, that he is able to discover spots on the planet where other astronomers see only a blank surface. By watching and studying these spots during a period of several years, Schiaparelli was able to determine the time of rotation of the planet on its axis and the angle which its equator makes with the plane of its orbit.

Schroeter, a hundred years ago, noticed a blunting of the horns of the planet when crescent, and from those observations Herchel computed that the planet revolved once in twenty-four hours. Schiaparelli's observations show

this to be entirely wrong, for he observed the spots repeatedly on the same day without seeing any signs of rotation. However, from day to day he noticed a slight change in the position of the spots, and finally found that the planet revolved on its axis in the same time that it rotated around the sun, i. e., in about 88 days. It therefore always turns the same surface toward the sun, just as our moon does toward the earth.

Hol Milk.—A doctor says that "it is worthy of reiteration that milk heated to as high a temperature as it can be drunk or sipped, above 100°, but not to the stimulant in case of over-excitation, bodily or mental. To most people who like milk it does not taste good, but it is a small matter compared with the benefit to be got from it. Its action is exceedingly prompt and grateful, and the effects much more satisfactory and far more lasting than those of any alcoholic drink whatever. It supplies real strength as well as exhilaration, which alcohol never does."

—*Exchange.*

Cocoanut Butter.—Within the last few months, says a correspondent, a new trade has arisen in India, and has attained extraordinary dimensions. About two years ago a German chemist, Dr. Schlunk, discovered that excellent butter could be made from cocoanut milk. It is according to a Bombay newspaper, pleasant to taste and smell, of a clear, whitish color, singularly free from acids, easily digestible, and an incomparably healthier and better article of diet than the European markets. The manufacture is carried on in Germany, where one firm turns out from 3000 to 4000 kilograms daily. The cocoanuts required are imported from India, chiefly Bombay, in large and increasing numbers, and the trade seems likely to attain still greater importance.—*Public Ledger.*

Indiana Yearly Meeting on the Ordinances.—At a meeting of the Committee on Ministry of Indiana Yearly Meeting, held First Month 28th, 1890, a minute was adopted which, after referring to the decision of the Yearly Meeting, says:—"We earnestly protest against any member of this committee, or any minister or meeting of this Yearly Meeting, inviting or encouraging any minister or member of this committee, or of any of our Yearly Meetings, who holds or teaches views or doctrines contrary to the well-known doctrine of Friends on the so-called 'Ordinances,' to teach or preach within our limits, and that those who do this are openly disloyal to the church."

We have received from London a copy of *Night and Day*, a periodical published by Dr. Barnardo, the founder of a set of non-sectarian homes for poor physical and moral destruction a class of neglected children in London, whose parents are unable or unwilling to care for them properly.

Some time ago we published an interesting account of the manner in which the Doctor's attention was first drawn to this distressed class. To the end of his career he has been engaged, and he has gradually grown since he commenced his labors in 1865, until no less than 14,500 children have been admitted, more than 3,000 are now under the care of the institutions; over 4,000 have been placed in the Colonies; 39 distinct institutions exist in connection with these Homes; and in 1888, the expenditure and cost of the non-sectarian homes shown by free-will offerings to the extent of £90,000.

Dr. Barnardo is a Protestant, and the training received at his Homes is in accordance with his own sentiments. Yet his institutions are not designed to proselytize others to his faith, but simply to rescue those who have no other helpers. To avoid coming into collision with the Catholic clergy,

he has been in the practice, when Roman Catholic parents or relatives applied to him for the admission of children, of advising them to apply to priests or institutions of their own faith; and of refusing to receive such children, unless it was evident that they were likely to suffer from such refusal.

Notwithstanding his care in this respect, there are a considerable number of Catholic children among his wards. Recently there has been much trouble caused by the efforts of relatives, stimulated by the priests, to withdraw from his control children who had been for a considerable time receiving training at his schools. As this was contrary to the rules laid down for the government of the institution, it has been steadily opposed, except in such cases as gave the relatives a legal right to make such a demand. In the latter part of 1888, a demand was made for the transfer of a boy to a Catholic home, who had been sent to Canada to be placed with a gentleman of that country. The case was brought before the Court, which decided against Dr. Barnardo. This led to much hostile criticism in the public press, and many charges against the Doctor. To meet these, and to assure the public of their continued confidence in the management of his Homes, a large and important meeting was held in Exeter Hall, London, on the 10th of Twelfth Month last. At this meeting a resolution was adopted affirming "unabated confidence in the management and work of Dr. Barnardo's Homes for Destitute Children."

Samuel Morris and Thomas P. Cope.—The London Friend of Third Mo. list, reports that these Friends had been visiting meetings in Cornwall, England. They were at Plymouth on First-day, the 17th of Second Month.

THE FRIEND

THIRD MONTH 22, 1890.

Through the kindness of a Friend we have been furnished with some remarks on the doctrine of the atonement. They were elicited by an article published in the *Friends' Intelligencer and Journal of Philadelphia*, a paper published by members of the Society sometimes termed "Hicksites," to distinguish them from the Society of Friends, in whose interest THE FRIEND is published.

The doctrines held by our Society recognize the importance of both the outward coming and sufferings of Christ and his inward work on the heart of man, as elements in his salvation. There have been many whose attention has been so exclusively directed to one of these, that they have been inclined to undervalue the other. But it is important to hold the truth in an even balance; and so we are well satisfied that our friend has placed at our disposal his comments on a doctrine, which some may be in danger of disregarding, in their strong sense of the necessity of knowing the work of grace to change the heart and prepare for the reception of spiritual gifts and enjoyments. As the article is a long one, we propose to insert a part in the present number, and the conclusion next week. It is as follows:

Our attention has been called to an article in the *Friends' Intelligencer and Journal* of this city, reprinted within a few months from a former number of that paper under the caption of "A Conversation on Doctrine," which is endorsed by the editor of the journal, in which an account is given of an interview between a "Friend" travelling in the service of the Society of which the *Journal* is an organ, and a minister of another denomination, who had

called upon the former and asked him this question, "Please tell me, if you can, what is the difference between you, who are called Hicksites, and the Orthodox Friends, or Orthodox Christendom generally." In reply to this, the "Friend" alluded to gave several expositions of his belief in certain points of doctrine, some of which appear to us quite sound and scriptural. One of them, however, is stated in the following form, and contains, it seems to us, a mode of reasoning and conclusions which are not consistent with either New Testament theology, nor the views of Friends as set forth by Fox, Penn and Barclay, viz:

Our Friend then proceeded: "The atonement means the same thing. It is simply reconciliation. It is said in Scripture, 'God was in Christ, reconciling the world unto himself.' As He said, 'This is my beloved Son in whom I am well pleased.' Now, what was it that pleased the Father? Was it not his full submission to the workings or influence of the Divine spirit, which was given to Him without measure. Now, it is simply the *life of Christ*, that we recognize as being given to man from sin, or from him to the Father. Here, then, is the difference between us. We say it is the *life of Christ* that reconciles the Father or atones for the sins of the world. You say it is his *death*, and that that death was brought about by the great Omnipotent Being calling upon his enemy to help him accomplish the work; but according to Scripture record, 'The devil put into the heart of Judas to betray him' into the hands of sinners, and a wicked and unbelieving people put him to death. Now, if God designed to save the world by a sacrifice, why did He not have that sacrifice prepared by the hands of good men, as he had done under the Levitical priesthood. Can we suppose that the all-wise and all-powerful Father needed to employ evil agencies in the work of man's salvation?"

While we cordially assent to the statement here made that the life of the Lord Jesus Christ is a most essential element in the work of man's redemption from the fall, and that without the impartation of that life by Him to man, there could be no spiritual regeneration nor salvation, yet it is evidently laying aside or ignoring a most important Christian truth to say that the death or sacrifice of the human body of the man Christ Jesus is not an integral and essential part of that salvation and reconciliation which comes through Him. The "Friend" alluded to seems to have regarded the death of Jesus on the cross as merely the result of the malice of his enemies, and that because they were wicked men, the Almighty could not have designed to save the world by such means or employ such agents to effect his ends.

The Old Testament prophecies concerning the Messiah, the declarations of the Lord Jesus himself when on earth, and the teachings of his Apostles as recorded in the Sacred Volume, all seem to us to contravene such an assumption. The first account we have of any religious rites in the Scriptures records the acceptable sacrifice of a lamb to the Almighty by Abel. When Noah went forth from the ark he built an altar unto the Lord and took of every clean beast and every clean fowl and offered burnt offerings on the altar; "and the Lord smelled a sweet savour."

Abraham and his descendants by express command of the Almighty, practised such sacrifices, so that Paul tells us "without shedding of blood there was no remission of sins until the law." The annual atonement made for the whole people of Israel by the High Priest as recorded in Leviticus 16th is a beautiful type of the final atonement made by the

Lord Jesus for the sins of the whole world, and is fully recognized as such by Paul in his Epistle to the Hebrews (9th chap., 7th to 13th verses) who compared them, and adds that the former "was a figure for the time then present;" but, says he, Christ being come, an high priest of good things to come . . . neither by the blood of goats and calves, but by his own blood, he entered once into the holy place, having obtained eternal redemption for us. For if the blood of bulls and of goats and the ashes of an heifer sprinkling the unclean sanctifieth the purifying of the flesh, *how much more shall the blood of Christ, which through the eternal Spirit offered himself without spot to God, purge us from unrighteousness from dead works to serve the living God.* And for this cause He is the Mediator of the New Testament, *that by means of death,* for the redemption of the transgressions that were under the first testament, they which are called might receive the promise of eternal inheritance. "Now once in the end of the world hath he appeared to put away sin by the sacrifice of himself."

The Prophet Isaiah in his 53d Chapter plainly foretells of the vicarious sacrifice of the Messiah, whom the nation of Israel looked for as their deliverer. "He was wounded for our transgressions, He was bruised for our iniquities; the chastisement of our peace was upon Him, and with his stripes we are healed. All we like sheep have gone astray; ye have turned every one to his own way; and the Lord hath laid on Him the iniquity of us all. He was oppressed and He was afflicted, yet He opened not his mouth: He is brought as a lamb to the slaughter, and as a sheep before her shearers is dumb, so He opened not his mouth. . . . Yet it pleased the Lord to bruise Him, He hath put Him in grief; and He being bruised by sin, many made inquisition for the transgressors." These prophecies were applied to the Lord Jesus by Philip, the evangelist, in preaching to the Ethiopian treasurer for Queen Candace, as recorded in the Acts 8th, 26 to 35.

That our Lord Himself expected to be offered as such a sacrifice and with the gracious design thereby voluntarily to assume the penalty due to man for his transgressions and save him both from the condemnation and future power of sin over him, is, we maintain, fully attested by his own words. Matthew records (17th chap., 22-23) "Jesus said unto them, Behold the Son of man shall be betrayed into the hands of men, and they shall kill him, and the third day he shall be raised again." When the Apostle Peter had given the noted reply to Christ on the matter, inquiring whom the disciples believed him to be, "thou art the Christ, the Son of the living God." He charged his disciples that they should tell no man that He was Jesus the Christ; and from that time forth began Jesus to show unto his disciples how that He must go up to Jerusalem and suffer many things of the elders and chief priests and scribes, and be killed, and be raised again the third day." Then Peter took Him and began to rebuke Him, saying, "Be it far from thee Lord; this shall not be unto thee." But He turned and said unto Peter, "Get thee behind me, Satan; thou art an offence to me, for thou savourest not the things that be of God, but those that be of men."

It is not evident from these words that the Lord Jesus not only anticipated his death, but that He designed it for a special object; and when Peter, under the pressure of his natural feelings of abhorrence at the thought of such an end to his innocent life, rebuked Christ for ad-

mitting its possibility our Lord imputed that disrespectful but shallow view of the coming of the Saviour into the world to Satan's suggestions, and not to Divine wisdom. Several times again we find such allusions to his hastening death predicted; let us note what He gives us in his purpose of such death. John records in his gospel account, chap. 3d, these words of Christ: "As Moses lifted up the serpent in the Wilderness, even so must the Son of Man be lifted up; (on the cross) that whosoever believeth on Him should not perish, but have eternal life." When the woman of Samaria told Him that she expected the coming of the Messiah, Christ said to her, "I that speak unto thee am He;" thus laying claim to that office and all that pertained to it in the Hebrew prophecies; and He told the unbelieving Jews, "if ye believe not that I am He, ye shall die in your sins." In the 10th chap. of John these features of the design and purpose of Christ coming in the flesh, and the sacrifice he had in relation to these great designs, are most explicitly set forth. Here He benignly unfolds to his weak yet earnest disciples his relation to them in the character of the good Shepherd; and assures them that "the good Shepherd giveth his life for the sheep."

"I lay down my life for the sheep. Therefore doth my Father love me because I lay down my life, that I might take it again. No man taketh it from me, but I lay it down of myself. I have power to take it down, and I have power to take again." This commandment have I received of my Father." It seems to us that no language could more plainly set forth the truth than it was in the counsels of the infinitely wise God, that his only begotten Son should be manifested in the flesh as an evidence of infinite love to man, both as sacrifice and as the source of spiritual life to his creation; that his physical life was laid down by the Son voluntarily and, under the circumstances which attended his crucifixion, by Divine appointment, and not merely as an accident. The Son of man "must be lifted up." It was a part of the Divine plan, and of infinite value in the redemption of man from sin. Human reason is not able to fathom it.

It is our part to receive this and all other doctrines of the Saviour as little children sitting at the feet of the All-wise, in the humble confidence that He doeth all things well. If we are in another spirit, He warns us that we cannot enter the kingdom of heaven.

After Christ's resurrection we find that He appeared unto the eleven disciples as they and other followers of his were gathered at Jerusalem and said unto them, "These are the words which I spake unto you while I was yet with you, that all things must be fulfilled which were written in the law of Moses, and in the prophets, and in the Psalms concerning me. Then opened He their understandings, that they might understand the Scriptures, and said unto them, thus it is written, and thus it behooved Christ to suffer, and to rise from the dead the third day, and that repentance and remission of sins should be preached in his name among all nations."

When the Apostle Peter preached on the day of Pentecost, he spoke of Jesus Christ as being "delivered by the determinate counsel and foreknowledge of God; Him ye have taken and by wicked hands have crucified and slain." Again, Peter in his sermon after the healing of the lame man in the temple, addressed the very men who had been instrumental in the crucifixion, and said, "And now, brethren, I wot through ignorance ye did it, as did also your

rulers, but those things which God foreknew had showed by the mouth of all his prophets that Christ should suffer. He hath so fulfilled. Repent therefore, and be converted, that your sins may be blotted out, when the times of refreshing shall come from the presence of the Lord." Paul gave Acts 13-27 a similar testimony after his miraculous conversion in preaching at Antioch, where he said, "They that dwell at Jerusalem and their rulers, because they knew him not, nor yet the voices of the prophets, which are read every Sabbath day they have fulfilled them in condemning Him."

Thus we find concurrence of testimony to the view that these "wicked men" were made the instrument of executing the "determinate counsel and foreknowledge of God," and fulfilling the ancient prophecies; yet the offers of Divine grace and repentance were still open to them, and we may readily suppose that among the thousands who did repent and accept the gospel message in those days, some of these murderers were included. Whilst it is not to be supposed that the Almighty foresees any man to do that which is sinful, but will have all men to be saved and to come to the knowledge of the truth, yet it is not inconsistent with his infinite justice that when any so far resist the softening influences of his grace and good spirit as to persist in wicked courses and condemn his rightful laws after repentance is offered to them and rejected, He may use them as instruments of his wrath, or even of his gracious designs, whilst they are ignorant of their secret results.

(To be continued.)

IN THE FRIEND of last week, a notice was published of a proposed issue by a Friend in England of a book of "Quaker Pedigrees." We have received a communication on the subject from a well-concerned Friend, who says in reference to it:—

I have felt a little uneasiness respecting it, lest such a proposition might tend towards that which would feed the vain mind, rather than be of any practical use or benefit.

While it may be quite allowable for any who have a taste or talent in that direction to keep a private record of their ancestry for family use, or with the object of knowing something of their kindred or connections; yet even this it seems to me needs to be done with care, for there is in many of us a tendency to feel proud of belonging to old families or of being descended from the great ones of earth; and this is a feeling that we ought surely to endeavor to mortify rather than encourage, as being unbecoming to the professed followers of a meek and lowly Saviour who has exalted and rejected of men who declared respecting his disciples, "They are not of the world even as I am not of the world."

Then as to asserting a right or title to use "armorial bearings" it seems peculiarly undesirable for those professing the principles of Friends to claim such vain worldly titles and distinctions as they are connected with, and to request, many having obtained these distinctions because they were successful warriors, or the companions of unscrupulous usurers.

Our forefathers in the Truth felt it right that those titles of honor or nobility, which some of them had hitherto borne in compliance with general usage, should be relinquished, and it is to be regretted that some of their descendants appear inclined to retrograde in this respect and to accept of worldly honors and titles.

SUMMARY OF EVENTS.

UNITED STATES.—It is understood that the Senate Committee on Irrigation will recommend an appropriation of several hundred thousand dollars for the boring of experimental artesian wells in the semi-arid

regions of the West as a preliminary step in the work of reclamation of the arid lands in the far West.

Engineer Lindbergh received before a subcommittee of the House of Representatives some interesting statistics regarding the projected bridge between New York and Jersey City. It said its central span would rise and fall eight feet, owing to changes of temperature. The anchors would be half as large as the piers at each end, and each would contain 50 per cent. more masonry than the largest of the Egyptian pyramids. The cables would be four feet in diameter (the Brooklyn bridge cables are 15 inches), and the towers would be 500 feet high. The bridge proper would accommodate 10 railway tracks. Foot passengers could be lifted up to its level by elevators in the anchorages, but if it was desired to provide for the passage of vehicles, they would have to ascend the Palisades to reach its level.

The Supreme Court of Mississippi has decided that wild game in that State grows grown therein may be sold anywhere in the State, even in the counties which have adopted prohibitory provisions under the local option law.

The Louisiana Lottery bill was introduced in the Senate on the 24th inst. It offered the State \$50,000 for a franchise and an annual tribute of \$150,000. Its opponents moved to lay it on the table, and that motion was defeated by a vote of 11 yeas to 19 nays. "However, as a test vote, it sealed the fate of the bill, for it developed the fact that in the Senate, which has no means of amending a bill, a vote of thirds, necessary to pass over the Governor's veto, was not forthcoming. This really sealed the fate of the bill, but it also went through the mill—or part of the way—in the House, where it met the same fate as in the Senate."

A despatch from Louisville, Kentucky, says that the Frankfort Lottery is making a great effort to prevent the State Legislature from putting an end to its existence. It is charged that its agents have been attempting to bribe Legislators.

The Federal Criminal Investigating Committee has finished the recount of the Hudson County vote, and revealed the fact that 1,747 fraudulent ballots called "elections" were cast in the county. A quantity of other election frauds was discovered.

Deaths occurred in the following places: In the Bowen-Merrill bank store in Indianapolis, while a number of firemen were on the roof falls while it, and they were buried in the debris. Ten were taken out dead, and 16 were injured, several fatally. There are still a number missing. The loss on the stock was \$125,000, and the building owned by S. W. Bowen, \$80,000.

A despatch from Alamosa, Colorado, says that the Rio Grande Railway has 250 snow shovellers at work opening a snow blockade across the San Juan range at Cumbres, on the east side of the divide. The snow is reported to be 60 feet above the tops of the telegraph poles, and for miles on each side it is 25 to 40 feet deep, the deepest ever known in that locality. The weather is very severe, the temperature being 22 degrees below zero on the 13th instant. This is the third time the pass has been snowed up this winter, and it will probably be repeated.

Peach growers in Michigan expect from one-third to one-half an average crop during the coming season, notwithstanding the recent cold snap, which damaged the buds.

Reports received from the tobacco growing countries in western North Carolina show that the crop of the plants in the fields has been killed by the cold weather which prevailed on the night of the 15th and next day. The peach and apple crops are also almost wholly destroyed.

Deaths in this city last week numbered 289, 22 less than the previous week and 16 less than during the corresponding period last year. Of the foregoing 197 were males and 192 females; 48 died of consumption; 42 of diseases of the heart; 41 of pneumonia; 19 of convulsions; 19 of old age; 14 of cancer; 12 of marasmus; 12 of inflammation of the brain; 12 of typhoid fever; 11 of Bright's disease; 10 of apoplexy; 10 of inflammation of the stomach and bowels and 10 of typhoid fever.

Reports, &c.—U. S. A. 115, 104; F. R. reg., 1221; coupon, 1221; currency 6, 116, 215.

COTTON was quiet but steady, at 11 11-16 cts. per pound for middling uplands.

FREED.—Winter bran, choice and fancy, \$16.25 a \$16.50; do., fair to prime, \$15.50 a \$16; spring bran, \$17.50 a \$18.50.

FLOUR AND MEAL.—Western and Pennsylvania super, \$2.00 a \$2.40; do., do., extras, \$2.50 a \$3.00; No. 2 winter family, \$3.00 a \$3.20; Pennsylvania family,

stone ground, \$3.30 a \$3.50; Pennsylvania roller process, \$3.50 a \$4.00; Western winter, clear, \$3.75 a \$4.00; do., straight, \$4.10 a \$4.35; winter patent, \$4.35 a \$4.50; Minnesota, clear, \$3.50 a \$4.00; do., straight, \$4.25 a \$4.60; do., patent, \$4.65 a \$5.15. Rye flour moved slowly at \$2.90 per barrel for choice.

GRAIN.—No. 2 red wheat, \$14 a \$5 cts. No. 2 mixed corn, 10 cts. No. 2 white oats, 29 a 29 1/2 cts.

BEEF CATTLE.—Extra, 51 a 51 1/2 cts.; good, 41 a 5 cts.; medium, 44 a 44 1/2 cts.; fair, 41 a 41 1/2 cts.; common, 33 a 4 cts.; fat cows, 24 a 31 cts.

SHEEP.—Extra, 51 a 62 cts.; good, 55 a 6 cts.; medium, 28 a 31 cts.; common, 25 a 25 cts.; culls 4 a 4 1/2 cts.

LAMBS.—Extra, 71 a 73 cts.; good, 63 a 7 cts.; medium, 6 a 6 1/2 cts.; common, 5 a 5 1/2 cts.

HOGS.—Western, 61 a 61 1/2 cts.; State, 51 a 6 cts.

FOREIGN.—On the 11th instant, Lord Randolph Churchill made a speech in Parliament on the Report of the Parnell Commission. He violently assailed the Ministry, although he admitted he ought to have spoken in the debate on the second reading of the Commission bill. In the course of his remarks he said:

"In appointing the Commission the Government violated its Constitution. In appointing it the Government was violating its own law. The report condemned certain persons and acquitted others. But did it condemn all the guilty parties? It condemned the Parnellites on certain charges. Did it condemn the *Times*? If the Government insisted upon its motion, and called for a vote on it, it, he would insist upon his right to vote to condemn not only the Parnellites but also the *Times*, which had been found guilty of an atrocious and unexampled libel and slander."

To seek the motion of Smith, the Government leader, that Parliament should adopt the Parnell report and place it upon the record, was, after a debate which continued nearly a fortnight, approved by an overwhelming majority. During the first week of the debate Louis J. Jennings introduced an amendment to the effect that no confidential agent should be near the close of the heated debate of the 11th instant, and Lord Randolph Churchill had made his vigorous assault upon the Government, Jennings explaining that he had no desire to "stab the Government in the back" withdrew his amendment. Caine, a Liberal Unionist, introduced a resolution condemning the Government, which was defeated, the Government's majority upon its rejection being 64.

On the night of the 12th instant the Government suffered defeat on a measure, which was opposed by Caine, the Chancellor of the Exchequer, to increase the grant to the Chamber of Commerce in favor of the measure being 125 to 102. This is the first defeat the Government has had during the session. It was not, however, the result of a difference upon a political question, but upon a purely military one, and is, therefore, without any significant importance.

A great strike throughout Great Britain has been commenced among the coal miners and others associated with them. In North Wales ten thousand miners have joined it. Twenty thousand Tyne-side engineers have also done so. Much apprehension is felt.

An election was held at Stoke-upon-Trent on the 14th, to fill the Parliamentary seat made vacant by the resignation of W. Leatham Bright. The poll resulted in the return of Gower, the Gladstonian candidate, who received 157 votes, against 2925 cast for Albion, the Liberal Unionist nominee. Sir James Bright, who stood as a Home Rule, received 3255 votes, and Corser, Conservative, 2593.

It is now known that 88 persons lost their lives by the explosion of an unlocked lamp, in the Morsa colliery, on the 11th inst., the largest loss of human life in any nation in the world. It is \$6,200,000,000 in summing at the rate of \$100,000,000 a year.

A despatch from Paris, dated the 14th inst., said: "The Chamber of Deputies tonight rejected a vote of confidence asked by Premier Tirard on the subject of a commercial treaty with Turkey. The motion was defeated by a vote of 163 to 85. M. Tirard was much displeased with the result, and it is rumored that he has threatened to resign. On the same day M. Tirard did resign, but he has not yet tendered his resignation. He cannot continue in office for a brief while longer. Should, however, he reconsider his promise to the President and the Ministry retired."

A despatch from Berlin dated the 17th inst., says it has been decided by Prince Bismarck and Count Herbert Bismarck that the Emperor will accept the resignation of the Emperor William has accepted the resignation of

the Chancellor. The immediate and ostensible cause of the resignation of Prince Bismarck is a divergence of opinion between the Chancellor and the Emperor concerning factory inspectors. It is reported that the Emperor has refused to accept Count Herbert Bismarck's resignation.

The International Labor Conference is in session in Berlin, and has organized for work.

PESH, Third Month 13.—Notwithstanding the positive statement that Von Tisza had resigned the office of Hungarian Prime Minister, and that Count Von Szapary had been appointed to succeed him, Von Tisza, after a meeting in the Lower House of the Hungarian Diet, that he had today asked the Emperor to accept his resignation.

On the 13th inst., in Teheran, Persia, an epidemic of influenza was causing 70 deaths daily. Several of the Shah's household are among the sufferers. An epidemic resembling influenza is spreading in India.

The influenza is raging with great violence throughout the State of Hidalgo, Mexico.

NOTICES

WESTTOWN BOARDING SCHOOL.—The Committee in charge of this Institution met Third Mo. 28th, 1890, in the Committee-room, Fourth and Arch Sts., at 11 A. M.

The Committee on Instruction met the same day, at 9 A. M. WM. EVANS, Clerk.

TRACT ASSOCIATION OF FRIENDS.—The Annual Meeting of the "Tract Association of Friends," will be held in the Committee-room of Arch Street Meeting-house, on Fourth-day evening, the 29th inst., at 7 o'clock. Friends generally are invited to attend.

EDWARD MARIS, Clerk.

Third Month, 1890.

NEW PUBLICATIONS.—The Tract Association has just prepared the following new Tracts:

The Power of Truth, 4 pages.

Fore-ordination, 4 "

Incidents in the life of David Sains, a minister of the Gospel in the Society of Friends, 12 "

Also the following old Tracts from new electrotype plates:

The true Christian Baptism not that of Water, by Enoch Lewis, 12 "

Wm. Tyler Barling, aged nearly 11 years, 4 Covetousness; or the prevalence and sinfulness of an inordinate desire for gold, by William Penn, 8 "

Memoir of Thomas Chalkley, chiefly extracted from his Journal, 24 "

Gay and Costly Apparel, (enlarged by the addition of Adornam' Judson's Appeal to Christian women in America, on dress,) 12 "

MARRIED, Second Month 13th, 1890, at Friends' Meeting-house, Cropwell, Burlington County, N. J., MARK B. WILLS to ELIZABETH M., daughter of Charles and Hannah E. Ballinger, both of the above place.

DIED, at her residence in Colerain, Belmont Co., Ohio, on the 14th of Twelfth Month, 1889, ASENATH, widow of the late Asa Raley, in the 86th year of her age, a member of Shortreck Monthly and Concord Yearly Meetings of Friends. This dear Friend was remarkable for the impartial interest she manifested in all classes of society, whether rich or poor, old or young, which endeared her to a large circle of friends. In conversation she was cheerful but careful to make it instructive and elevating. The language of our Saviour addressed to his disciples, "But I am among you that shall serveh," seemed applicable to her untiring efforts to make those about her comfortable by any act of kindness she could render. As her increasing bodily infirmities rendered it probable that the time of her dissolution was near, she frequently expressed herself as being desirous to be released from the trials of time; and said at different times she could see nothing in her way, though she felt unworthy to join that innumerable company who surround the throne. Although the final summons came suddenly, we doubt not, but she has entered into the rest mercifully granted to those who put their trust in the "Lord Jehovah, in whom is everlasting strength."

She was born in West Chester, Pa., on the 18th of Second Month, 1803, ELIZABETH SANKEY, in the 66th year of her age, a member of Birmingham Monthly Meeting of Friends.

Incidents and Reflections.—No. 216.

"I WAS IN PRISON AND YE CAME UNTO ME."

Stevens' History of Methodism contains an interesting account of the labors among the prisoners in London of a pious Methodist, named Silas Told. "Attending with his scholars at one of Wesley's five o'clock morning sermons, the text 'I was sick and in prison, and ye visited me not,' struck the heart and conscience of this generous man. He sunk even into despondency for several days, under the impression that he had neglected the sufferers of Newgate; and he resolved thenceforth to do his duty toward them: but he knew not the measures requisite to be pursued for his good purpose. A devout Methodist woman, who visited the prisoners, soon reported to him that ten men, in one of them, were about to die. He found them out, got them together in one cell, and preached to them repentance and hope, declaring that 'the King of glory had laid down his life for the chief of sinners'; that 'He certainly died for them'; and quoting the examples of the repentance and salvation of David, Mary Magdalene, Peter, and the thief on the cross. Eight of these criminals were hung at once; Told riding with them in the cart, and praying for them under the gallows. His faithful ministrations had led them all to repentance, and they died with comite hope of the mercy of God. Having thus begun his new career of usefulness, he never slackened in it till he was called to his reward in Heaven.

For more than thirty years no man was better known or more welcome in all the prisons of the metropolis, and the neighboring towns, than Silas Told. All sorts of criminals, Papists and Protestants, educated men, officers of the army and navy, as well as the poor who had no other friend, not only respected him, but clung to him in their anguish for counsel and consolation. He seems to have had, by his deep piety and also-like generosity and simplicity, a peculiar power over the rudest minds; notwithstanding no little opposition at first, from not only prisoners, out keepers and ordinaries, or chaplains, he persisted till he won his way; for through 'all his' he writes, 'I burst the more vehemently, so that I became in the name of God resolute

in that point, and would take no denial.' Turnkeys, sheriffs, hangmen wept as they witnessed his exhortations and prayers. They sent for him when new cases occurred, which his tireless zeal had not yet discovered. They opened passages through the clamorous and ribald crowds to the gallows for him; hardened men as they usually were, they came to know and love him as the good Samaritan whom death alone could separate from the objects of his sympathy. The ordinaries of the prisons, who often read their prayer-books as a mere ceremony on these harrowing occasions, seem to have been his chief opposers. During three years one of them frequently stationed himself on Sunday mornings, a few doors from Newgate, to obstruct his entrance, and breaking up a society of thirty members which he had formed among the poor debtors, stopped his preaching on that side of the prison; but still he found access to the capital felons, and he formed another Methodist society of thirty-six members among the debtors, who were brought under such discipline that 'they would not suffer any individual among them to live in any outward sin.' He preached in every prison, as well as many workhouses, in and about London, and frequently travelled to almost every town within twelve miles of the metropolis.

The enormous number of capital condemnations, the haste of the judicial process in such cases, the indisposition of the responsible Government officers to inquire into them, occasioned by their social distance, led to appalling abuses of the law, and to frequent and agonizing sufferings in instances of comparative and sometimes of complete innocence. He wept with them, and followed them with his blessing to the grave, and remained sometimes the sole protector of their wretched families. He gives but occasional examples, yet too many for a man of sensibility to read. One of them was a young and guiltless woman, apparently amiable and Christian in her character; Told besought her on the morning of her execution to confess if she were guilty, warning her that there was no hope for her beyond the grave if she did not. She answered him 'with meekness and simplicity, protesting her innocence. She was brought out amid the shouting scoffs of the crowd, and placed in a room, where she stood against the wall, a statue of sorrow but resignation, and with no friend but the sympathetic mariner and the executioner, who 'thanked God with tears' that the good Methodist 'had come.' Borne thence to Kennington Common in a cart, the populace jeered at the helpless maiden with oaths and obscenity, mistaking her religious resignation for hardness of heart. The popular fury was so great that, in order to protect Told from it, the sheriff, who rode by the side of the cart, directed him to take hold of the bridle of his horse and walk between him and the victim. He thus accompanied her to the gallows, comforting her as they went. 'My dear, look to Jesus,' cried the good man. She lifted her eyes, and joyfully said, 'Sir, I bless God that I can look to Jesus

to my comfort.' Under the gallows he prayed with her; her conversation with him there respecting the murder, heard by the sheriff, convinced the latter of her innocence. 'Good God!' exclaimed the officer, weeping; 'it is another Coleman's case.' But it was too late for redress. The cart was drawn from under her; and Told, standing by her to the last, had the wretched consolation of knowing that she died without a struggle, for her body dropped against his side, he published the facts which proved to him she was guiltless.

He relates another illustration of the times, the case of a poor but virtuous man, who was 'hung for a sixpence.' With a sick wife, a little daughter, and without money or a place to sleep in, being turned out of his house by a creditor, the friendless sufferer went down to the quay, saying, as he left his wife, 'It may be the Lord will provide me with a loaf of bread or some employment.' He failed, and a 'sudden temptation entered his mind' to obtain relief for his perishing family by robbery. He accosted two women in Hoxton Fields, and demanded money. One gave him twopence, and the other fourpence. Scarcely knowing what he did, he walked before them into the city, when they related the fact to a policeman, and the starved and bewildered man was immediately thrust into prison. His wretched wife found him there, as did also the volunteer missionary. 'During the many years that I attended the prisoners,' says the latter, 'I have not seen such meek and loving spirits as appeared in the countenance and deportment of this poor man and his wife. Indeed they were naturally inclined to few words; but the woman frequently seating herself by her husband's side, and throwing her arms round his neck, they would shed floods of tears to mitigate the anguish which overwhelmed them.' The suffering man confessed his crime, wept bitter tears of repentance, and died with more than resignation. When an appeal was made for him to the Privy Council, he was hastily con-founded with a noted highwayman of the same name and sent to the scaffold. His wife, terrified by the merciless, slunk away in despair. He could not, on the morning of his execution, inform Told where to find her; but the latter spent 'three days in grovelling through almost every dirty alley of Bishop-gate Street,' till he discovered her in a miserable room with a 'poor old woman, and with no other furniture than a piece of an old rug whereon they both laid themselves to sleep.' He told her sad story to a Methodist society after preaching, and obtained their aims for her. In the midst of her many sorrows she was about to give birth to another child. After being repelled by several churchwardens, to whom he applied for a recommendation for her admission to a hospital, Told procured her shelter in one of those asylums. On her recovery he took her to his own home, clothed her, and 'as she was a woman of sobriety, and cleanliness,' obtained a house-keeper's place for her and a home for her child."

J. W.

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 267.)

The reader of this narrative will have observed that Joshua Evans believed that a degree of self-denial in dress, food, and other things, was required of him, greater than his friends generally saw to be their duty. It is one evidence of his being on the right foundation that he was preserved from a disposition to find fault with others who felt greater liberty in these respects than he did.

His whole course of life was consistent with his self-denial in these matters, and showed that he was devoted to the service of his Divine Master, and that he endeavored to act in obedience to the injunction, "Whether ye eat, or whether ye drink, or whatsoever ye do, do all to the glory of God."

It would be of no value to any one to imitate his singularities, unless they were actuated by the same motive that he was—i. e. a desire to be obedient to the Divine will. In such a case, there ought to be manifest in every part of their conduct the same humility and obedience, which would convince their friends that their actions were not the manifestation of an ill-balanced mind, and did not spring from any inferior motive. The memoranda proceeds:—

Having thus endeavored to leave an account of the divers exercises under which I was remarkably tried, and wherein I learned it was best I should fully submit to what was manifested to be the will of Him who had called me into service, I may now turn back and mention some other matters relating to my progress through life.

About the year 1754, I witnessed great anguish and bitterness of soul, until I was made willing to resign my own will; I thought I would fain have given up my natural life, if that would have done; but I saw my work was not finished. In due time my Saviour accepted of my submission, saying to my troubled soul, "Peace, be still!" This was a time never to be forgotten by me, I felt (as it were) new heavens and a new earth, all of the Lord's creation; the thoughts of my heart seemed chained to the cross, and I was helped reverently to worship Him with abasement of soul.

In or near the year 1755, I had some remarkable dreams, which I believed were applicable to my condition afterwards. One of which was in substance thus: I thought I was wandering in a dreadful wilderness, not knowing where to go; and all on a sudden was brought to a plank or path-way, one end of which seemed to be on the earth, and the other had a gradual ascent up towards heaven: on each side were people of all sorts, but I was alone: I thought a voice spake to my inward ear saying, "Walk in this way." The way was attended with a shining light, wherewith I was animated and not willing to be turned to the right or the left; though I thought I was strongly opposed by some, who said I should not go in that way. But in much fear I pressed forward, feeling inward support, so that I mended my pace until I ascended out of the reach of them all, and so I awoke.

At another time, I dreamed I was walking alone in the common high-way, when suddenly I came to a deep valley, with a high hill on either side; as I descended near the middle (it being a considerable distance across) I heard the sound of a rushing mighty wind; I also heard therewith a flood of great waters; I saw for terribleness as I had never seen before, at

which I thought I was very much alarmed, supposing I should be swallowed up quickly. In my surprise I seemed to run about in confusion, to no purpose; for the flood appeared to come with rapid force within a small distance of the place I was in, and to be as upright as a wall, and high as the tallest trees; a flaming which attended was terrible. I found my own striving availed nothing, there not seeming any human probability of my escaping. I thought I then tried to have my mind retired in perfect resignation to the Divine will, and to trust in God's salvation, which seemed to be granted instantly, for all vanished away, and a serene calm ensued. Those floods thus disappearing, my soul seemed to melt like wax, and as it were, translated into another world, where I was led to a mountain on the other side of the valley; which for situation was glorious, laid out in streets or lanes, fair and wide, so far as my eyes could see, and the light seemed bright as noon-day. I then thought and after I awoke my soul admired the loving-kindness of my God for such deliverance, &c.

Several others are omitted, but another remarkably instructive manifestation was in the night season, in the year, 1788, viz: I thought I was travelling in a barren wilderness, the way was narrow, or just wide enough to walk in; I saw as I went, the appearance of more light, as an opening. When I got through the wilderness, it seemed as though I came to the foot of an high mountain; here was an increase of light, almost to perfect day. I being struck with wonder, standing still, said, Lord, where am I? Then I heard a voice say, "This is the Lord's holy mountain: go forward." I did not see any one from whom the voice proceeded, but perceived an unusual calm, and so advancing the light seemed to increase until it was very bright, though not like sunrise, but for the glory of it, such as I cannot describe. When I came to the top, it became still more bright and glorious; and there appeared to be a house, such as I never saw before, for situation and beauty; I observed also a door to it, into which I was invited, and so went in. It seemed as though it rang with praises and melody, though I did not see any body: I am unable to describe the excellency of the place. It seemed all over as if one glorious brightness shone there. I seemed now to be as one every way happy, but not quite ready to join the heavenly host. After a short stay, I was bidden to go out, which I thought alarmed me much, I then cried, Lord, why may I not stay? and was answered thus: "Thou must go out a short space, and hew stones for this house." My mind was then more easy, as the time was not to be long. I thought I went out, and near the door I saw a large stone lying. This I concluded would make a good corner-stone, if well hewed: so I went to work on that first; and having hewed two sides, I stooped down to turn it over, and thus I awoke.

As the share of labor assigned to me seems much towards those who are rough and stony-hearted; the remembrance of this dream has often been a comfort to me, and I desire none may be discouraged, but endeavor to press through rough and smooth; for as we abide in faithfulness, the Lord is a rich rewarder for those mortifying labors.

I believe it best to leave an account also of what was represented to me in a dream or vision in the night before the 30th of the Sixth Month, 1790: I thought I was summoned for a trial before an awful tribunal, where the judgment was likely to be so just and true that no plea would

be available with my judge; I stood in open view before him. Things transacted twenty or thirty years past, were brought fresh and plain to remembrance; so plain that my mouth was stopped, and I had nothing to trust in but the Lord's mercy. I thought I heard a voice uttered, saying, "As the sun on the dial varieth not, so thy trial is." I remembered his mercies, yet at the same time believed there was "no variableness or shadow of turning with Him;" thus I stood trembling to know the event, for I understood to be to be tried by a straight line; this seemed to pierce my very soul; there was no avoiding Divine justice. Mercy was all I had to depend on, and as I stood trembling and deeply affected, I thought I saw the sun just strike the line from end to end; and so I awoke before my trial was finished. It deeply affected my mind the day following, which caused me to preserve the substance thereof.

Those prospects I have related, with others similar, and the feelings which accompanied them, impressing my mind with much awfulness, they seemed to give me a foresight of some things, and in measure helped to support me in some of my deepest trials and baptisms. May I render thanksgiving and all praise to my God: He being worthy thereof, who keepeth his little ones under the hollow of his Almighty Hand; for nothing can harm those who live in his fear and love. O that He by his power may be pleased to turn and overturn, until the hearts of the disobedient become subject to his holy requirings.

It appears that our valued Friend, in the year 1793, began more particularly to make notes of the way in which he spent his time, with occurrences which happened, somewhat in the form of a diary. Out of which it is apprehended many instructive sentiments and remarks may be extracted, with useful and entertaining accounts of his extensive travels and almost incessant labors to advance the cause of truth and righteousness amongst his friends and many other people on the wide American continent.

1793. Third Mo. 19th.—I have had a prospect of that rest where all troubles cease; love flowed to all men. Oh that men would prize pure religion beyond gains of gold.

24th.—The enemy at one time lately came in like a flood through worldly objects. I labored with Divine aid to cast them out of my mind, this was graciously afforded.

I obtained relief at our select Quarterly Meeting, by communicating close hints respecting a worldly spirit, and against Friends running with the multitude into extortion.

Some edifying conversation, after meeting concerning fasting at these times, rich furniture gaudy apparel, &c.

30th.—I have lately felt that power which subdues naughtiness; yet one evening I was too light in conversation and laughed. Oh that ministers and elders may watch well.

Fourth Mo. 1st.—Met with other Friends to confer on reformation. It was proposed to visit some of our extravagant youths; I let them know I thought that would be cutting the work too short, and perhaps it would be proper to consider whether stumbling-blocks were not among the aged, shining furniture, large looking-glasses rich and party-colored hangings, fine carriages &c., &c.

(To be continued.)

OUR SAVIOUR taught his disciples to return good for evil, not to retaliate, or use violence to others.

For "THE FRIEND."

Historical Notes, Respecting the Society of Friends.—No. 9.

A marked characteristic of the business-meetings of the Society of Friends has ever been their distinctively religious character. The advice of George Fox: "Hold all your meetings in the power of God" applied to these as well as to those designed only for worship. In the establishment of these meetings, he claimed to be influenced by the same Divine command which at an earlier day had sent him forth to proclaim the doctrines of salvation.

The testimony of Robert Barclay is to the same import: "We can boldly say, with a good conscience in the sight of God, that the same Spirit which leads us to believe the doctrines and principles of the Truth, and to hold and maintain them again, after the apostacy, in their primitive and ancient purity, as they were delivered by the Apostles of Christ in the Holy Scriptures; I say, that the same Spirit does now lead us into the like holy order and government to be exercised amongst us as it was among them."

From this view of the nature of meetings for discipline, it was a natural consequence, that in the management of the business which came before them, the members were governed by the impressions on their minds which they believed to come from the Head of the Church, and not by efforts of their own reasoning powers. An illustration of this may be found in the Journal of Richard Davies, who mentions that at a Quarterly Meeting where he had exhorted Friends to the observance of the order, then recently introduced, of holding men's and women's meetings for the care of Church matters, some one, who was opposed to these meetings, opposed what he had said. When he had done, our friend, Thomas Ellwood, proposed to the meeting that all should sit down and wait to feel the power of God among us, and that let decide whether I did speak in the name and power of God among them this day; to which the meeting agreed, and all were silent. After which, several Friends, as they were moved by the Lord, gave tenderly their testimony that what was delivered that day was in the name and power of God. There stood up a young man that I knew not, whose heart was affected, and much broken in spirit, and said on this wise: "There is a man come this day amongst us, I know not from whence he came nor where he goes; but this, I am satisfied, the Lord sent him here, and his power and presence is with him and his testimony for the God of Truth."

In the early days of our Society the young and inexperienced were not expected to attend meetings for business—but only those who were so far advanced in spiritual growth as to be able to discern what was in accordance with the Divine will. A "Testimony, or Epistle," sent out by the Brethren in London in 1666, says: "We advise that not any be admitted to order public business of the Church but such as are felt in a measure of the universal Spirit of Truth." It appears to have been the practice for young Friends not to attend such meetings until invited by the older members. Joseph Pike mentions his own experience: "When about twenty years of age, I was invited by Friends to be a member of the men's meeting in Cork, at which time I was under a religious exercise of mind. My conversation was sober, and my exterior plain, according to Truth—all which drew the love of Friends towards me. I thought myself

very unworthy, being low and weak in mind, thinking I could do no service; but hoping to receive some benefit myself, I did with fear and caution accept their offer, and sat among them some years before I presumed to speak mind to what came before them. Yet I joined in heart and soul with those who were exercised for the Truth; and as I grew more and more concerned for its prosperity, when occasion offered, I spoke more to subjects in meetings." After some further remarks on the subject, Joseph Pike expresses his judgment, "that the affairs of the Society cannot be conducted in the unity of the Spirit without due care be taken in the admission of qualified members." In accordance with this view, in 1740, a query was adopted, to be answered by inferior meetings: "Is care taken that no unfit persons sit in meetings for discipline?"

William Edmondson, in an epistle "Concerning Men's and Women's Meetings," says: "It is of absolute necessity for all the members to know in what authority they sit in those meetings—for the service thereof must be performed in the wisdom and counsel of the Lord Jesus Christ, and in the authority of his blessed Spirit and power." "In all such meetings about the Lord's business, the Lord must be chairman, ruler and judge—for it is in the gift of the Lord's good Spirit that the ability stands to perform that service."

It would be easy to multiply similar testimonies. Since the principles of our Society require the decisions of its meetings to be based upon the judgment of the Spirit—this judgment, whether it speaks through few or many, must be acquiesced in by the others. Hence, as R. Barclay states, Friends do not decide by pluralities or majorities. The question as to deciding by votes, was prominently brought forward in the course of the trial of a cause in the New Jersey Court of Chancery, involving the rights of Friends and of the Hicksites to a school fund about the year 1830. The first witness examined on behalf of Friends was Samuel Bettle, Sr., who made the following statement:

"Our mode of deciding questions is peculiar. It is intimately connected with our religious principles and doctrines. When an individual or a religious assembly is gathered into a reverent, inward, waiting state of mind, that we are sensible at times of the presence of the invisible and Omnipresent One, qualifying the heart for secret communion and approach unto God. Hence, the Society believe and it is one of their peculiar and distinguishing doctrines, that there may be secret approach to and worship of God, without any ceremonial outward act or service; and in our meetings for business, we also hold that it is needful to experience the same power to qualify us for right discernment and to restrain our own spirit and will; and we do believe that when our meetings have been thus in degree influenced, there have been wisdom and judgment better than our own: consistent with the prophetic declaration respecting the blessed Head of the Church, that 'He should be a Spirit of judgment to those who sit in judgment.' With these views, and a corresponding practice, our Society has been favored to come to its decisions and conclusions at its various meetings, with a remarkable degree of harmony and unity. These conclusions, thus prevailing in a meeting, or, in other words, this *sense of the meeting*, is often attained to with very little expression; and the member acting in the capacity of clerk records this sense, feeling or conclusion of the meeting. And it has never been come to by a

vote, or the opinion of the majority; no question is ever taken by a reference to numbers, or votes, or a majority, or anything like that. It is obtained upon religious principles, which we understand very well, but which it is difficult to explain. We have got along in this way for near two centuries very well."

In reply to a query whether, by the ancient practice of the Society, the young and inexperienced are permitted to take part in the transaction of the business of the meetings, Samuel Bettle stated that in ancient times the young did not attend those meetings unless specially invited to do so; but that the present practice is to admit all who choose to come. This change of usage has been made with the hope that the attendance of these meetings, and witnessing the religious exercise of those on whom the services of them rested, might have a useful influence over the younger members, and tend to prepare them for taking a part in the business of the Church. This could scarcely fail to be the effect if, as Joseph Pike said was the case with him, they "joined heart and soul with those who were exercised for the truth."

It is apparent that the high position taken by our Society—that the transaction of Church business should be under the direct guidance and government of Christ—can only be maintained when its members are in good measure brought under the regulating power of his Spirit. If they know but little of this power, they will necessarily be governed by their own reason and will; and the meetings will come to be occasions somewhat similar in character to other public gatherings, which are not professedly religious. A Friend who visited England in 1804, and attended the Yearly Meeting of London, says: "It was deeply affecting to my mind, as I sat in those meetings, to observe men rising up and taking an active part in the concerns of Society, who appeared to act and speak exclusively from the mere powers of their own natural capacities. Hence, when a subject was under consideration, their method of coming to a conclusion seemed to me to be principally by argument. I inquired of the meetings whether, in the judgment of Friends, it was most in agreement with our religious profession, to decide upon cases that came before them by argument, or by simply attending to the sense of Truth in the minds of Friends, and accepting the generally prevailing sense of the conclusion. The Meeting took up the subject; and, after considerable discussion came to the conclusion, that it would be better in all cases to be guided by the general sense of the Meeting."

J. W.

For "THE FRIEND."

We think this letter was probably addressed to our grandfather, John Hoskins, or one of his family.

S. PIKE.

I have often looked at a life conformable to the wisdom and policy of man where our wills have an open field to move in, and I have looked at a self-denying humble life, where the creature falling upon the true Corner-Stone is broken. This latter way of life to me appears most precious, and this day it came upon me to look attentively to the manners, the spirit, and disposition that appears common amongst the people, and I said in my heart, how few dwell deep enough. How few amongst the young men live in self-denial, and manifest true heavenly-mindedness; and I was careful for thee, that thou, when looking towards them, might prize that which is most valuable, and understand that the

nearest approach to pure celestial happiness is the farthest distance from the ways and spirit of this world.

I felt a little engagement which arose, not from enquiry nor from hearing, but from unfeigned love.

JOHN WOOLMAN,
Mount Holly, 1761.

FOR "THE FRIEND."

In *The Forum* for the Third Month, Frederic Harrison presents an interesting comparison of the condition of rural France in 1789 and in 1889—showing that there has been a wonderful improvement in the condition of the farmers and farm laborers in the intervening one hundred years. The condition in 1789 is shown by the travels of Arthur Young, in 1787-8 and '89.

The former depressed condition of the peasantry was largely owing to the privileges claimed by the aristocracy, and the consequent oppression of the working classes. The sweeping away of these abuses, and the consequent opening a door for improvement, was one of the blessings that flowed from the French Revolution.

There are now in France some eight million persons who own the soil, the great mass of whom are peasants. This peasant proprietorship is of ancient date, but has largely developed since the revolution which rendered it possible for every laborer to acquire laud.

Senator Dawes reviews the political movements of the year which has transpired since the result of the last presidential election placed the government of our country largely under the control of the Republican party. His object is to show that that party has to a reasonable extent carried out the promises contained in their platform of principles. One of these he states was "to rebuild the navy, and to fortify the defenseless coasts of the country." It is too sadly true, that an enormous waste of money is being made, and likely to be made in the near future, in carrying out this,—one of the most vicious and hurtful planks of the Republican platform.

Archdeacon Farrar furnishes a paper on the monkish system, in which he states that in his approval of "brotherhoods" in the Christian Church, he had no intention of advocating a revival of *monachism* "which at the best was a form of religion that tended to shift the soul's centre of gravity from love to selfishness. Galeotto Malatesta, Lord of Rimini, in the 15th century, was regarded as a marvellous saint by most of his co-temporaries; yet, leaving his miserable people to the horror of a triple sack, he went to the monastery of Arcangelo, and there, pale, emaciated, bleeding perpetually with self-inflicted wounds, half-crazed by his austerities, with his young virgin wife drooping by his side, he passed in seclusion his mutilated life, "Serene, scathless in the midst of peril; and neither for himself nor his kingdom took he any thought." Could sincere superstition have invented more complete perversion of the true ends of human life?"

"Monasticism," says Farrar, "was valuable for certain purposes, but it involves so many elements of danger that its promiscuous revival would be an unmitigated curse."

A *Protest against Dogma* is an argument for the throwing aside all dogmas and religious beliefs, as tests or qualifications for church membership, which the author would have to depend upon character and purpose. He rejects the idea of Divine inspiration and revelation, and has no faith in the reality or truth of the miracles recorded in Scripture. Yet there are thousands of persons whose own experience has taught

them that the voice of God is heard in the secret of their souls, convincing them of the evils of their ways, inspiring them to renewed efforts to forsake sin and follow righteousness; and often pointing out to them with unmistakable clearness what steps they must take. Such persons have within themselves a witness of the truth of religion, which is a sufficient answer to all the suggestions and arguments of the most acute reasoner amongst sceptics or infidels. They cannot doubt the truth of that which their own hands have handled of the word of life. Although this is so, yet we are sorry to see such an article in *The Forum*, because it may have a bewildering effect upon another class, who have had less religious experience, and are not so firmly built on the rock of eternal truth.

SELECTED.

STOP AND THINK.

My boy, when they ask you to drink,

Stop and think.

Just think of the danger ahead;

Of the hearts that in sorrow have bled

Or 'hopes that were drowned in the bowl,

Filled with death for the body and soul

When you hear a man asking for drink,

Stop and think.

The draught that he drinks will destroy

High hopes and ambitions, my boy;

And the man who the leader might be

Is a slave that no man's hand can free.

O, this terrible demon of drink!

Stop and think

Of the graves where the victims are laid,

Of the ruin and woe it has made,

Of the wives and the mothers who pray

For the curse to be taken away.

Yes, when you are tempted to drink,

Stop and think

Of the danger that lurks in the bowl,

The death that it brings to the soul,

The arrest of sin and of woe,

And spur back the tempter with "No."

—E. L. Reyford in *The Presbyterian*.

SELECTED.

IMPERISHABLE REMEMBRANCE.

They say, if our beloved dead

Should seek the old, familiar place,

Some stranger would find there instead,

And they would find no welcome face.

I cannot tell how it might be

In other homes; but this I know:

Could my lost darling come to me,

That she would never find it so.

Ofttimes the flowers have come and gone,

Ofttimes the winter winds have blown,

The while her peaceful rest went on,

And I have learned to live alone.

Have slowly learned from day to day

In all life's task to bear my part;

But whether grave, or whether gay,

I hide her memory in my heart.

Fond, faithful love has best my way,

And friends are round me true and tried,

They have their place—but hers to-day

Is empty as the day she died.

How would I spring with bated breath,

And joy too deep for word or sign,

To take my darling home from death,

And once again to call her mine!

I dare not dream—the blissful dream,

It fills my heart with wild unrest;

Where yonder cold white marbles gleam,

She still must slumber—God knows best!

But this I know, that those who say

Our best beloved would find no place,

Have never hungered every day—

Through years and years—for one sweet face!

CRAWING.

Dear Saviour will I ever learn

To give up all for Thee?

To yield my own strong will to Thine,

And feel my spirit free—

Free from the galling chain that binds

My heart to this life's joy,

Where every wish and every hope

Is mixed with earth's alloy?

Oh! that my soul could yield each thought

Each longing, each desire

For trivial, fading earthly things,

To seek for something higher!

E.

SELECTED.

A WASTED DAY.

The day is gone,

And I, alas! have wrought no good,

Performed no worthy task of thought or deed.

Albeit small my power, and great my need,

I have not done the little that I could.

With shame or 'erf day is hours I brood—

The day is done.

One step behind,

One step through all eternity—

Thus much to lack of what I might have been,

Because the temptress of my life stole in,

And rapt a golden day away from me!

My highest height can never be,—

One step behind.

I cannot tell

What good I might have done, this day,

Of thought or deed, that still, when I am gone,

Had long, long years gone singing on and on,

Like some sweet fountain by the dusty way,—

Perhaps some word that God would say,—

I cannot tell!

O life of light,

That goes out, I know not where,

Beyond night's silent and mysterious shore,

To write thy record there forevermore,

Take on thy shining wings a hope, a prayer,—

That henceforth I unflinching fare!

Toward life and light!

—James Buchanan, in *S. S. Times*.

FOR "THE FRIEND."

Gather the Fragments.

Some Account of Sarah Bailey, of Stillwater, Ohio.—It is instructive to contemplate the lives of those who, through faith and patience have inherited the promises—having, by submission to the power of Divine Grace, been enabled, to advanced age, by an upright walking before the Lord, to show forth the practical excellence of the Gospel of Christ; and in the end to receive the crown of righteousness, which, through the merits and mediation of a crucified and risen Saviour, is conferred on all who love his appearing. To those who are in like manner engaged in the work of their day, it affords the encouraging invitation to follow on to know the Lord; while a testimony is held to the reality of the Christian religion and its power on the mind, in the language of an apostle, "We have not followed cunningly devised fables when we made known unto you the power and coming of our Lord Jesus Christ." It therefore rests on my mind to bear this testimony concerning our dear deceased friend, Sarah Bailey, of Stillwater; to which is added some of her expressions during her last illness.

She was born the 6th of the Fourth Mo. 1778, in Chester County, Pennsylvania. Her parents, Daniel and Mary Williams, were concerned to train her up in the way of Truth, as professed by our religious Society.

They removed while she was young to the State of Georgia, where she was married to Robert Milhous; and in 1804 she with her husband removed to the State of Ohio. After the

death of her husband, which took place in the year 1810, the care of a young family entirely devolved upon her. She was, however, favored to conduct her domestic affairs with reputation, manifesting a lively concern for the preservation and prosperity of her children in the way of her Truth.

In 1823 she was married to our friend Jesse Bailey, by which the objects of her parental solicitude were increased; and the prudence with which she was enabled to govern them, gave evidence that she was in no small degree under the influence of that wisdom which is "first pure, then peaceable, gentle, easy to be entreated, full of mercy and good fruits; without partiality, and without hypocrisy. Through a surrender of her will to the Divine Will, she received a qualification for usefulness in the exercise of the discipline of our religious Society, in the station of an Elder, which she filled from about the meridian of her life. She was peculiarly gifted for service—being endowed with a sound judgment, adorned by the meekness and gentleness of Christ, and by the quickening effect of the one baptism, she was made serviceable to her brethren and sisters in the ministry. Not only by the united exercise and travail of spirit in our religious meetings, but by the suitable and reasonable counsel communicated to them, wherefore it may be said, "She was a mother in Israel," concerned for the prosperity of Truth, and the faithful support of our Christian testimonies, careful also to observe the apostolic exhortation "Take heed to yourselves and to the flock over which the Holy Ghost hath made you overseers." In that godly care and jealousy over herself, which she was careful to maintain, she had a humble view of her own attainments, sensible that what she was she was by the grace of God. Hence, in the exercise of true Christian charity, she was enabled to watch over and take care of the flock in that love that would gather all to a faithful attention to the Voice of the Good Shepherd.

In conversation in social circles she was generally free and communicative, and particularly on passages of Holy Scripture her remarks were instructive and edifying; which gave evidence that her pious mind dwelt much upon the truths therein contained, with peculiar interest and consolation; having, through Divine mercy, experienced an establishment on that foundation which God hath laid in Zion; the foundation of the prophets and apostles, Jesus Christ himself being the chief cornerstone.

She was favored amidst the trials which have recently been permitted, to attend our religious Society, to stand unshaken in the scriptural views of Christian doctrine and Christian practice, which have ever been believed in and maintained by us, since the Lord first gathered us to be a people; cheerfully uniting with concerned brothers and sisters in the service of her Divine Master; unto whom the language of the Psalmist might be applied: "Those that be planted in the house of the Lord shall flourish in the courts of our God; they shall still bring forth fruit in old age; they shall be fat and flourishing."

She, in company with her husband, left home to attend the Yearly Meeting at Mount Pleasant, which began the 3rd of Ninth Month, 1837, and was able to attend the several sittings thereof, until the evening of the 7th of the month, when she was taken ill at the house of Benjamin Bundy, at Concord; and being of a slender constitution, her great bodily suffering soon prostrated her strength; yet her spirit was

borne up in living faith in that Arm which had been her support through life; and she was favored to utter divers weighty and comfortable expressions, some of which are as follows:

On Third-day, the 12th, whilst in conversation on her situation, a hope was expressed that she felt peaceful. She replied, "I think I may say I do; I feel nothing in my way." At another time, she said to one of her daughters, "I hope I shall go to rest, and I do not want thee to be anxious about me, so as to prevent thy comfort. I think I can give myself up now, as well as I can expect ever to do; I have long been endeavoring to be in readiness." On Fourth-day, a hope being expressed by one of her children that she should pray for them, when permitted to find access to the Throne of Grace, she replied, "I hoped my children would pray for me; I feel very poor; not able to put up prayer as at some other times; and as though my safety consisted in being still. I have often prayed for you, and not for my own children only, but for my husband's." On its being observed to her that she did not feel forsaken, she answered, "O! no—I feel that which I have prayed for more than I feel." At another time she said, "I desire that my confidence may be placed in the Lord for support in this trying time; I can truly say He has dealt gently with me, or I could not have been separated as I have; to Him be the praise."

On Seventh-day, the 16th, her daughter expressing the comfort it afforded to see her in such a state of resignation, she said, "It is all of mercy—nothing in me; I am nothing; Christ is all. He has done wonders for me since lying on this sick bed."

Third-day morning, the 19th, on being asked if she felt comfortable, she said, "I must not complain; everything considered, I feel pretty comfortable. Mercy is near at hand. I have thought there was much included in the words of King David, when he said 'Thou wilt make all my bed in my sickness,'" and added, "In the latter part of the night and fore part of today, it has seemed as if I could do no more than cast myself upon the care of a merciful Creator." Fourth-day she said, "I have desired to give up all and be gone; the Lord has been near; I have nothing of my own to trust to; it is all of his mercy." Again, she said, "I have been wanting to say something to you about my sons, and have been trying to do it all day, but did not feel able. I wish you to tell them to take Christ's yoke upon them, and wear it to the end. I have often written to them after that manner, and it is still my theme." Fifth-day, being in much suffering, she said, "I look around me every way and see no relief, except my great and good Disposer would be pleased to release me. All my might is gone. I have none to look to but Him." At another time: "My dear Heavenly Father, be pleased to let me depart in peace."

Sixth-day afternoon, she broke forth in divers short ejaculations, manifesting that her entire confidence was in her Lord and Saviour Jesus Christ; though her bodily strength was so much exhausted as to be unable to connect sentences together. Seventh-day morning, being considerably revived, and seeing some of her relations about her, she said, "When I am so that I can enjoy your company you are very sweet to me." She was very affectionate to those about her, often speaking of their attention and kindness in terms of gratitude.

About 10 o'clock in the evening, with impressive countenance, she said, "Oh, I want all to

know how good it is 'to be still and know that I am God,'" alluding to the 46th Psalm. After a pause, she said, "Oh, my sufferings, my sufferings; I think they will soon be all over; and I shall be glad how soon my dear Master would be pleased to take me to himself."

Thus she continued, in humble confidence, waiting for her change, until Second-day morning, the 25th (being in the 65th year of her age), when her purified spirit was released from its earthly tenement. I trust to join the Church triumphant in Heaven.

SELECTED.

LET it ever be borne in mind that religion is an inward work; a work of the heart, and not of the head; and that to live and walk in the Spirit with Christ, comprehends its essence.

There may be a great danger of turning from this inward work, which is crucifying to self, and attended with many humiliations and mortifications; and substituting for it the more easy routine of specious religious activity, and thus suffering great loss—becoming lean and dwarfish in a spiritual sense, instead of growing in grace and daily waiting on the Lord, and inwardly watching against sin, so as to be perfecting holiness in his fear.

There is room in the Church for the exercise of every gift, which the holy Head of it sees meet to dispense to his servants, and there is no shortness or stinting on his part. What is wanting is humble submission to those fiery baptisms which purify the soul, and prepare it for the reception of the Lord's gifts.

Where these baptisms are patiently endured, until the times are fulfilled, and the period for being shown unto Israel is fully come, then "a man's gift maketh room for him," whatever that gift may be; and a door of usefulness in the Church is opened to him under the leading and government of the great Giver, who will always help every obedient servant to occupy the gift profitably and acceptably in his fear.

THOMAS EVANS.

Natural History, Science, &c.

Curious Shell Deposits.—The great deposits of oyster shells on the upper banks of the Damariscotta River, in the State of Maine, have long been known to science, and have for many years been objects of interest to the tourist.

Ever since the whites settled the coast of Maine numerous deposits of shells of both the clam and the oyster have been discovered from time to time. Naturally these shells were found either on the coast itself or on the banks of rivers not far from the sea. The oyster-shell heaps on the western bank of the Damariscotta River early attracted the wonder of the settlers, and became many years ago celebrated throughout the surrounding region.

A mile above the village of Damariscotta indications of shells appear on the river banks. From the point of their first appearance the shells are in small and straggling heaps. As one ascends the river, however, the heaps become larger and the intervals between them become shorter. Soon a continuous white mass of shells appears, extending several hundred feet along the river. The mass assumes the form of bluffs whose tops are covered with trees and shrubbery, but whose precipitous faces have never been covered, but have been kept exposed by the erosive action of the tides and by the frosts of unending years. Exact dimensions of these deposits cannot be given, for the reason that no extensive mining of the shells has ever been

undertaken. In general they occupy a peninsula of several acres area. In the interior of this shelly peninsula the heaps are scattered and small; along the edge of the water they are almost continuous and of greater dimensions.

The largest mound extends 100 feet along the shore, rises 40 feet back, and has a depth varying in places from six to twenty-five feet. Other smaller banks also fringe the shore, both above and below this great bank.—*Boston Globe*.

Contest Between a Bear and a Sheep.—A fierce encounter between a sheep and a bear took place in the pasture of Farmer Porter, near Lewistown, this State. Porter, who has had numerous sheep carried off this winter by bears, knew nothing of the struggle until, on going to the pasture, he found the sheep huddled together in a corner and one of their number lying on the ground near by, close to a large bear. Both the sheep and the bear were dead. A special to a Pittsburgh paper says that "the head of the sheep, which was a Cotswold ram, was thrust clear to the base of the horns in the bear's mouth, which was forced so wide open that it was split back more than an inch. Further investigation showed Porter that the ram's heavy horns were firmly locked on the bear's head behind the ears. There were numerous other signs of a struggle, and it was evident it had terminated by a charge of the ram. The impetus of the charge was only checked by the interference of the ram's horns—but for which, Farmer Porter believes, the ram would have split its antagonist clear to the shoulder, and come out alive and well."—*Public Ledger*.

An Imported Pest.—The rise and progress of the Gypsy moth, and the possibilities of exterminating that insect, are soon to occupy the attention of the Massachusetts Legislature. The moth gained its foothold in the State very peculiarly. About twenty years ago an entomologist of Medford secured some of the insects from Europe to experiment with them in the line of possible silk production. They escaped from him by accident—their progeny have become acclimated, and their increase has been such as to cause alarm. Agriculturists and scientists agree that the time for thorough and energetic measures for the extermination of the pest is at hand. That the insects are likely to become a pest is evident from what has already occurred at Medford and from present indications there. During last season an area in the town, about six miles long and three miles wide, was literally stripped of every green thing by the insects in their caterpillar stage of existence. Now, the limbs of all the trees in this district are covered with eggs, hundreds in a bunch, protected by the coverings common to this stage of insect production.—*Warehamer (Mass.) Gaz.*

Dr. T. J. Wolfe, of New York, has discovered the site of an Indian village and burying-ground in Winsted, Litchfield County. Many fine instruments of warfare and industry have been unearthed by him, some of which are so finely polished as to lead him to believe that they are metal—those that were done by the mound-builders, who preceded the Indians in this part of the country. Fifty-eight arrow-points, eighteen lance and spear heads, and twenty other finished articles have been taken out. Fragments of clay vases or cups were found. The stones were of beautiful shape and color, and came from out of the State.

At Seaside Park, in Bridgeport, workmen employed about the new residence of P. T. Barnum, in excavating, have found Indian pipes,

heads, arrows, tomahawks, drills, pestles and knives in plenty.

In Stratford curious pieces of pottery, bearing rude ornaments, are taken from numerous graves of dead savages. The Indian settlement was close to the Sound, and in some places the clam and oyster shell deposits about it are two feet deep, indicating a long occupation of the place by the Indians.

Southport, Fairfield and Sandy Hook have furnished many relics within the year. Charles Gray, of Southport, has found several Indian pipes, an Indian dinner-pot, and a samp mill, mortar and pestle. The hair found on the heads of some of the skeletons remains long, black and glossy. The finding of stones that are not known in the State is accounted for by the fact that oftentimes the finer work of the earlier Indians or mound-builders was appropriated by their ruder successors, and in this way was distributed to districts which the aboriginal artisans never visited.

Items.

Philadelphia Meeting for Sufferings.—Among the subjects claiming attention at the meeting held on the 21st of Third Month, was a bill now pending in the Legislature of New Jersey, the effect of which would be to legalize horse-racing in that State. A committee was appointed to visit Trenton and recommend in behalf of the Society against the passage of such a law, giving the sanction of the State to this fruitful source of gambling and demoralization.

The Book Committee informed the meeting that it proposed publishing in a separate form, and with some additions, and omitting some of the epistles, the Memoirs of Edward Burroughs, as contained in the 14th volume of Friends' Library. This proposal was approved.

A committee was appointed to examine a collection of biographical accounts which a Friend had prepared as a continuation of the well-known series—*Petry Promoted*.

Laura Quarterly Meeting.—Laura Quarterly Meeting, according to direction of Western Yearly Meeting, was opened at Laura, Miami County, Ohio, on the 21st of 1st Month, 1859. This being the first Quarterly Meeting established by the Conservative Friends, in the limits of Indiana Yearly Meeting, it was felt to be a matter of universal interest.

The committee appointed by Western Yearly Meeting to attend the opening, was represented by Joel Newlin and wife, Albert Maxwell and wife, and Natan Binson, of Cyrus W. Harvey, of Kansas, who were present with a minute of unity from Spring River Monthly Meeting, endorsed by Spring River Quarterly Meeting. It was felt to be a favored occasion. The public meetings on First-day were largely attended by the surrounding community.

The Friends of Laura who have left the larger body on account of dissatisfaction, have been incited by additions until now they have a comfortable meeting. They have completed a nice frame building, so that it looks as if the Lord had planted them as a witness to bear his testimony to the principles of Friends, in the midst of the formalism that has covered the Society of Friends in this Ohio.—*Western Friend*.

Visit in Ohio Yearly Meeting.—The Editor of *The Western Friend* has just completed a general visit, to all the meetings of Friends in Ohio, who are in fellowship with the Smaller bodies; and thinking that some account of the visit might be of interest to Friends, offers the following:

Salem Quarterly Meeting, held at Salem, Ohio, on the 8th of Second Month, was the first visited. The meetings held at Salem, Danassus, Winona, Middleton and Carmel, comprise this Quarterly. The reports from the three Preparative Meetings of Ministers and Elders, to the Quarterly Meeting of Ministers and Elders, were in each case, "No recorded minister amongst us." It was the first time we ever heard such a report for a whole Quarterly Meeting; and the query, Has the Head of the

Church withheld his gifts, or have the individual members been so disobedient and unfaithful, in days past, that this starvation has come, because the messengers entrusted with his word have robbed the church, by burying the heavenly talents in the earth? Or have the nursing fathers and mothers neglected their calling, and let the children perish for want of needed care? The meeting was a comfortable time. Encouraging a comfortable hope that the time of visitation had come, when the Lord's hand being laid long on those young in years, they will submit to take the yoke of Christ upon them, and lean of Him, and be led out in the ministrations of Friends were in the minority.

On the way to Laura, Ohio, we stopped and held two meetings at Mt. Gilead, near Cardington, Morrow County.

From Laura Quarterly Meeting we went to Wilmington, Ohio. Here three meetings were held in the city, in the house of the Larger body. And by an opening, very kindly offered by the Professor of Wilmington College, an opportunity was had to good satisfaction with the students, about one hundred in number, of this college.

Leaving Wilmington we reached Chester Hill, in time for Pennsville Quarterly Meeting. This was largely attended; the Quarterly Meeting-house being about filled; this Quarterly Meeting is composed of meetings held at Colerain, in the counties of Plymouth and Southland. The meetings were largely attended by those not members, many of whom had once been Friends, or were descended from Friends. They manifest much interest in the principles of Friends.

From Pennsville we passed to Barnesville, to Stillwater Quarterly Meeting. Two meetings were held in the Ebenezer Baptist Church. The meetings of this Quarter, four in number, were attended, and a large public meeting held in the City Hall in Barnesville. The meetings held at Colerain, Harrisville, Flushing and Smyrna, in Short Creek Quarter, were also visited.

The fewness of ministers was noted all through Ohio Yearly Meeting; so much so, that the thought was present often that one generation of ministerial gifts had been lost, probably, on account of the discouragements connected with the troubles during the last thirty years. But many and comforting were the encouraging evidences, in various parts of the Yearly Meeting, that the youth had, in good measure, submitted to the influence of Divine grace, and were being prepared for laborers in the Lord's vineyard. If these are only faithful, certainly a day of growth and spiritual revival is store, in the future, for Ohio Yearly Meeting.—*From The Western Friend*.

THESE are, in the truest sense, no great things and no little things in the sphere of duty. Whatever is to be done is the one thing in the world to be done by him who ought to do it. Of itself it is, at the best, but a trifle. In its linkings its value is incalculable. All that any one of us has to do in this world is his simple duty. And an archange could not do more than just that to advantage.

"THE CHURCH needs more power rather than more machinery. It is a malignant paradox of ecclesiastical history that as power declines, machinery increases." The machinery now deemed necessary to carry forward the work which was originally committed by Christ and his apostles to the loyalty, devotion and philanthropy of individual Christians, is something appalling. New plans to do things that require no plan are constantly broached. Not very long ago a committee, with a president, secretary and treasurer, was gravely appointed to bring about a revival in a church. They held meetings and appointed several sub-committees and a corresponding secretary. No results have as yet been tabulated, and the sub-committees have reported progress from time to time, and ask leave to continue their work.—*Exchange*.

THE FRIEND.

THIRD MONTH 29, 1890.

The efficacy and relative parts that the sacrifice and resurrection or life of Christ have in the plan of salvation are clearly indicated by the apostle Paul in his epistle to the Romans, fifth chap. 8th and subsequent verses, viz.: "But God commendeth his love toward us in that while we were yet sinners, Christ died for us; much more shall we be saved *now justified by his blood*, we shall be saved from wrath through him; for if when we were enemies, we were reconciled to God by the death of his Son, much more being reconciled we shall be saved by his life."

These views were abundantly preached and testified by the early Friends, as will appear by a collection of extracts from their writings in Evans' *Exposition of the Faith of the Society of Friends* in Section 2nd. "On the Divinity and offices of our Lord and Saviour Jesus Christ." A few of these testimonies will be transcribed. George Fox in his Journal says: "This priest Stevens asked me why Christ cried out upon the cross, 'My God, my God, why hast thou forsaken me?' and why He said, 'If it be possible, let this cup pass from me; yet not my will but thine be done.' I told him at that time the sins of all mankind were upon Him, and their transgressions and iniquities, with which He was wounded, which He was to bear and to be an offering for as He was man, but died not as He was God; so in that He died for all men, tasting death for every man. He was an offering for the sins of the whole world. This I spoke, being at that time in a measure sensible of Christ's sufferings." Again George Fox writes in his "Great Mystery": "Christ gave himself, his body, for the life of the whole world; He was the offering for the sins of the whole world; and paid the debt, and made satisfaction; and doth enlighten every man that comes into the world, that all through Him might believe; and he that doth not believe in the offering is condemned already." In an epistle written by George Fox to Friends in America in 1679, he says: "And also you most instruct and teach your Indians and negroes and all others how that Christ by the grace of God tasted death for every man, and gave himself a ransom for all men to be testified in due time, and is the propitiation, not for the sins of Christians only, but for the sins of the whole world; and how He doth enlighten every man that cometh into the world with his true light, which is the life in Christ by whom the world was made."

Robert Barclay in his Apology thus declares the doctrine of the Society of Friends on the efficacy of Christ's death: "Nevertheless, as we firmly believe that it was necessary that Christ should come, that by his death and sufferings He might offer up himself a sacrifice to God for our sins, who his own self bare our sins in his own body on the tree, so we believe that the remission of sins which any partake of is only in and by virtue of that most satisfactory sacrifice, and not otherwise. For it is by the obedience of that One, that the free gift is come upon all to justification." Again: "Christ by his death and sufferings hath reconciled us unto God, even while we are enemies; that is, He offers reconciliation to us; and we are put into a capacity of being reconciled. God is willing to forgive us

our iniquities, and to accept us as is well expressed by the apostle, 2 Cor. v. 19."

"We consider then our redemption in a two-fold respect or state, both which in their own nature are perfect, though in their application to us the one is not nor can be without respect to the other. The first is the redemption performed and accomplished by Christ for us in his crucified body; that is, the redemption wrought by Christ in us; which no less properly is called and accounted a redemption than the former. The first then is that whereby a man as he stands in the fall is put into a capacity of salvation, and hath conveyed unto him a means of that power, virtue, spirit, life, and grace that was in Christ Jesus, which is the free gift of God is able to counterbalance, overcome and root out the evil seed wherewith we are naturally, as in the fall, leavened. The second is that whereby we witness and know this pure and perfect redemption in ourselves, purifying, cleansing and redeeming us from the power of corruption and bringing us into unity, favor, and friendship with God."

William Penn's views on this subject having been misunderstood, because of his advocacy of the Scripture doctrine of the spiritual work of Christ in the hearts of men; his adversaries alleging this fact as proof that he lightly esteemed or denied the efficacy of the outward sacrifice and death of the Lord Jesus in his manhood, he wrote a declaration of his belief in a letter to Dr. John Collinges, from which the subjoined extract is taken: "In short, I say that Jesus Christ was a sacrifice for sin; that He was set forth to be a propitiation for the sins of the whole world; to declare God's righteousness for the remission of sins that are past to all that repent and had faith in his Son. Therein the love of God appeared, that He declared his good will thereby to be reconciled; Christ bearing away the sins that are past as the scape-goat did of old, not excluding inward work; for till that is begun none can be benefited, though it is not the work, but God's free love that remits and blots out, of which the death of Christ and his sacrificing of himself was a most certain declaration and confirmation."

In William Penn's "Primitive Christianity Revived," he thus writes: "We do believe that Jesus Christ was an holy sacrifice, atonement, and propitiation; that He bore our iniquities, and that by his stripes we were healed of the wounds Adam gave us in his fall; and that God is just in forgiving true penitents upon the credit of that holy offering made of himself to God for us, and that what He did and suffered satisfied and pleased God, and was for the sake of fallen man that had displeased God. * * * In short justification consists of two parts, or hath a two-fold consideration, viz: justification from the guilt of sin, and justification from the power and pollution of sin; and in this sense justification gives a man a full and clear acceptance before God. * * * The first part of justification we do reverently and humbly acknowledge is only for the sake of the death and sufferings of Christ; nothing we can do, though by the operation of the Holy Spirit, being able to cancel old debts or wipe out old scores; it is the power and efficacy of that propitiatory offering upon faith and repentance that justifies us from the sins that are past; and it is the power of Christ's spirit in our hearts that purifies and makes us acceptable before God."

Isaac Pennington in a work entitled "The Holy Truth and People Defended," thus answers the charge of denying redemption by the

blood of Christ, viz: "And as for denying redemption by the blood of Christ, oh! how will he answer this charge to God, when none upon the earth, as the Lord knoweth, are so taught, and do so rightly and fully own redemption by the blood of Christ as the Lord hath taught us to do! For we own the blood of the Lord Jesus Christ both outwardly and inwardly; both as it was shed on the cross and as it is sprinkled in our consciences, and know the cleansing virtue thereof in the everlasting covenant and in the light which is eternal; out of which light men have but a notion thereof and do not truly know or own it." In another work I. Pennington says, [the Quakers] for many years, and I have often heard them, even the ancient ones of their own Christ both inwardly and outwardly."

"Glorious was the appearance and manifestation of his Son in the flesh; precious his subjection and holy obedience to his Father; his giving himself up to death for sinners was of great esteem in his eye. It was a spotless sacrifice of great value and effectual for the remission of sins, and I do acknowledge humbly unto the Lord the remission of my sins thereby and bless the Lord for it; even for giving up his Son to death for us all, and giving all that believe in his name and power to partake of remission through Him."

Many more of such statements of the doctrine held by the early Friends on the subject of the sacrifice offered by the Lord Jesus when personally on earth for the redemption of man, are quoted by Evans in the work alluded to, agreeing in substance therewith, but enough have been given it is believed to show how important they considered it.

"Our risen and glorified Redeemer speaking in a vision to John the Apostle, as recorded in Revelation 1. 18, declared, 'I am He that liveth and was dead, and behold I am alive forevermore,' and He told his disciples, that because He lived they should live also. The humble believer in Him can indeed rejoice that death hath no more dominion over Christ to whom he looks for that daily food which gives spiritual life, yet he can no less feel grateful to this mighty Saviour that through death He has destroyed him that has the power of death, that is the devil; and that in taking upon Him the human nature He has become a merciful and faithful high priest in things pertaining to God to make reconciliation for the sins of the people."

An aged and beloved Friend in western Ohio, expresses a concern that Friends may bear in mind our dear friends, Samuel Morris and companion, who are now laboring in Europe for the advancement of Truth; and be willing to feel an exercise for them, that they may be ended with wisdom and love whilst amongst the brethren, so that their services may be to the comfort and edification of those they are visiting.

In this concern we can heartily concur, and desire not only that they may be helpful to those among whom they go, but that they may be preserved from receiving any spiritual harm themselves, and be restored to their native land, deepened in religious experience.

SUMMARY OF EVENTS.

UNITED STATES.—On the 24th instant, President Harrison issued a proclamation warning all persons against entering the waters of Behring Sea, within the dominion of the United States, for the purpose of violating the provisions of Section 1856 of the Revised

Incidents and Reflections.—No. 217.

Among the incidents connected with the early settlement of Oneida County, New York, there are some which interestingly illustrate the peculiar customs and characteristics of the Indian natives.

"James Dean was the pioneer settler of Oneida County; he was the first Yankee who had the hardihood to commence a settlement west of the German Flats, on the Mohawk. While but a lad nine years old, he was sent by his father to reside with a branch of the Oneida tribe of Indians, then living at Oquago, on the Susquehanna. He soon learned their language, and became a favorite with the Indians. He was adopted as a son by a squaw, in the place of one she had lost in battle, and to this woman he ever afterwards gave the endearing appellation of mother. After a few years' residence, his father took him home and finished his education at Dartmouth College.

"About this time the Oneidas broke up their settlement on the Susquehanna, and joined the main body of their tribe at Oneida Castle. The war of the Revolution now broke out, carrying with it many of the horrors of a civil war, added to the cruelty of the tomahawk and scalping knife of the Indian.

"Judge Dean was stationed during the whole of the war, at the Oneida Castle and Fort Stanwix (now Rome) with the rank of major, on account of the influence he possessed over the Indians. He succeeded in keeping most of the Oneidas from any acts of hostility. He was very useful in ferreting out and giving useful information of many plots of the less friendly tribes. After the peace of 1783, the Oneidas gave him his patent of two miles square, which was subsequently ratified by the State. In 1784, he removed from Connecticut and commenced the settlement of Oneida County.

"Two or three years after this, a party of the Oneidas went to the Cahoes, on their annual fishing expedition. The fishery belonged to the Mohawk tribe; yet they gave their neighbors the privilege once in each year of repairing thither to catch what fish they chose—this privilege having been handed down from time immemorial. The party had the means of procuring the fire-water of the white man, of which they made too free a use. On their return, some-

where in the valley of the Mohawk, they took possession of a blacksmith's shop, in the absence of the owner, using the fire for the purpose of cooking. On the return of the owner, he sat about dispossessing his noisy tenants. They objected and refused. A scuffle and fight ensued, in which our son of Vulcan plied his hammer so freely as to cause the death of one of the party. They then took their dead comrade, brought him to the Oneida, and he was buried in the same ground where the grass had for ages grown on the graves of his fathers. A council fire was now lit up, the well-known conch sounded, and the tribe were soon collected in council. By an ancient law of the Oneidas, if any of their tribe were murdered by a member of another tribe with whom they were at peace, the first person of the tribe passing through their territory was to be executed, to appease the relatives in the tribe of the murdered. The council, after a full consultation and mature deliberation, decreed that said law should be enforced on the whites.

"Ignorant of the murder, or doings of the council, Judge Dean, having business to transact in the vicinity was the first white who passed through Oneida Village. Again the smoke arose over the council cabin, and the tribe again assembled in council. After a lengthy sitting, in which the friendship of Judge Dean to the Indian, and his having been adopted by their tribe, had been duly considered, and after the council had expressed their regret that he should be so unfortunate as to bring himself within their law, it was resolved that their ancient law must be enforced. In pursuance of their resolution, Powlis, one of their bravest warriors, and long known as the personal friend of the judge, was selected as the executioner, together with the requisite assistants, and was instructed to do his duty faithfully. Soon after this last council, some friendly Indian conveyed to Judge Dean the circumstances which I have detailed, and he without mentioning it to his wife, or any friend, proceeded to settle and arrange his business, under a strong conviction that, at best, the tenure of his life was very precarious. Fleeing from the execution of the law, is an act of meanness and cowardice, of which in the opinion of the savage, none but the pale faces, or women would ever be guilty.

"Judge Dean was therefore determined to convince them he could meet death like a Christian, which religion he professed. But a few days intervened, when, after he had retired to rest with his wife and infant child, he was startled from his slumber by the well-known death whoop near his dwelling. He then briefly stated the case to his dearly beloved wife, exhorting her to fortitude, in the trying scene he was confident would soon commence. The space was brief ere his accustomed ear caught the soft and stealthy step of the Indian, at his door; the door opened, and Powlis, with his tomahawk, as his badge of office, entered, followed by three or four assistants. The judge met them on the threshold, and calmly, without a relaxation of a muscle, invited them into another room.

"He then commenced in the Indian tongue, and told them he had been informed, and well knew their errand. He told them it was wrong to put him to death for the crime of another, a person he did not know, and over whom he had no control; that it would displease the Great Spirit for them to visit on the innocent, the punishment due the guilty, that he had ever been the friend of the red man. He then made a pause,—Powlis and his assistants went apart and held a consultation. Powlis then informed him, as the result of their deliberations, that he must die, that his face was pale, that the murder was committed by a pale face, they belonged to one nation, and of course came within their law. Judge Dean told them their words were all wrong, that the murderer was a Dutchman, and did not speak the same language he did, that he could not understand their talk on the Mohawk, that he, Powlis, might as well be called a Seneca or Tuscarora, because his face was red, that they must not make him responsible for the doings of all bad white men. Furthermore, he told them he belonged to the Oneida tribe, that his adoption had been sanctioned by the council of their chiefs and braves, and of course he could not be responsible, nor come within the rule. Another consultation was then held by the Indians, when Powlis informed the judge that his arguments had all been thought of, and considered by their council, and his words were like the bark of the beech tree, very smooth, yet they did not heal their wounded nation, the blood stain was on their tribe, and must be washed away—die he must.

"As a last resort, the judge appealed to Powlis on account of the friendship that had long subsisted between them, that they had warmed at the same fire, and eat of the same venison, and would he now raise his hand to take his life? Powlis here interrupted him, and said that when he thought of his friendship, his heart was soft, it was like a child's. But shall it ever be said of Powlis, that he will not do his duty to his tribe, because it is his friend that stands in the way? No brave will enter the door of Powlis, if he does not do his duty, but will point to his dwelling and say, that is the wigwam of a woman, and as he speaks his black eyes began to light up with excitement; already had the tomahawk began to raise for the performance of its work; already had the judge reckoned his course on earth as run, and his mind bade farewell to all he held dear on earth—when the quick and almost noiseless tread of the mooseskin caught his ear, the door opened and in rushed his adopted mother, with a friend and stood between him and Powlis. After observing the judge for a moment she commenced—'My son I am in time, I am not too late, the tomahawk is not yet red with your blood.' She then turned to Powlis, and after eyeing him closely, if possible to scan his feelings, she again commenced and said that 'Soon after he and his assistants had left the Oneida, she got information of the doings of the council, and of their departure to execute its decree, that she immediately summoned her

friend, and followed with the swiftness of the deer, that she had come to claim her son, that she had adopted him to fill the place of her young brother who had died in battle; that his adoption had been sanctioned by the council; that the law would not take a son from her for the crime of a white.' She was calm, she quailed not at the fierce look of Powlis, when he told her to be away, to be gone, that she was a squaw, that the decision of the council should not be defeated by a woman; that she had better be at home pounding corn, and waiting upon her husband, and again began to brandish his tomahawk as if impatient of this new delay in the sacrifice of their victim. The mother and her friend now each produced a knife, bared their bosoms, when the mother said, 'If you are determined to take his life, you can only do it by passing over our dead bodies, if the floor is to be stained by his blood, it shall be mingled with ours; his blood shall not run alone.' When Powlis saw the determined and courageous bearing of the women, he beckoned his companions one side, and the result was to defer proceedings for that night, and refer the matter again to the tribe in council, when the mother should have an opportunity to be heard, and as the subject was never again heard from, it was presumed the mother's entreaties prevailed.

"While the name of Powhontas has been handed down to posterity, and is familiar to every school boy, for her noble daring in preserving the life of Captain Smith, the name of this heroic mother, who saved a life equally valuable and dear, has been lost. The part which Powlis took in the transaction never caused any interruption to the friendship alluded to; for during the remainder of his life he made the judge an annual visit, enjoying without restraint his hospitality for three or four days at a time."

J. W.

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 274.)

Fourth Mo. 8th.—I have visited the Preparative and Monthly Meetings at Evesham, with others, on the subject of discouraging the use of spirituous liquors. Deep thoughts attended respecting Truth's service, I am willing to spend and be spent therein if it be the Lord's will, and with his help I have for some years past given up and almost left all, to follow his requirings.

I have been at Haddonfield and Woodbury Monthly Meetings, laboring against the use of distilled spirits in hay-time and harvest; had to tell my experience herein for more than twenty years past. Brought a minute of concurrence of my friends to Woodbury, having a prospect of visiting families there, which has gained their concurrence, several have given in their names to assist.

10th.—After several days' favor, I am now so reduced I feel no ability to proceed; but finding a little strength again, we went to some families, and have not daubed with untempered mortar.

12th.—The Lord renewed his bow in my hand, and several have seemed much tendered when a worldly spirit was spoken to.

14th.—Through favor some have been humbled who appeared as bulls of Bashan for stoutness.

21st.—The visit to families of Woodbury now ended. I have had hard labor, and feel peace of mind; met with some sincere-hearted Friends, we encouraged those who are of tender spirits;

cautioned against grandeur in meats, drink, furniture and apparel; warned some lukewarm ones; also some rich and proud. I returned home thankful for the Lord's mercy and goodness in assisting to labor where so many wrong things prevail. Hear oh Heavens, and be astonished, oh earth! how great is the hurry and bustle to acquire worldly greatness! Are not the poor oppressed, whilst the world's ways are followed, and excess promoted?

Oh parents! how will you answer when inquisition is made concerning your conduct and care in exemplifying and governing the children? How do some stretch out in procuring things tinged with luxury far beyond the produce of our plentiful country! How many things do we see and hear of, that in their origin are calculated to please a vain mind! Oh! where will those appear who have balked the testimony of Truth, when many are called from the East, West, &c., to sit down in the kingdom with Abraham, Isaac and Jacob!

Fifth Mo. 4th.—I was, through the bodily indisposition of a near connection, confined at home for some time; this a trying day, though somewhat comforted in observing the quiet frame of mind of one who is now departed to her long home.

It appears that from this time for about eleven months, he was mostly, and sometimes daily engaged either in visiting the sick and distressed, those who drank to excess, or those who made too much show in copying after the world's fashions; sometimes at neighboring meetings, and engaged in visiting families.

In the course of his visits to the sick, he often lamented the common use of opium or laudanum; believing it not to be proper to give people this medicine near their end, on account of its stupefying nature, depriving of sense and reflection at a time when they were most necessary to be occupied in preparing for another world; being apprehensive that without prudence and religious caution, doctors have been, and may be, in the way of committing a great evil in this respect.

In many years of the life of our friend, J. E., he appears to have been a man of sorrows on account of the many deviations from the self-denying path in which our worthy ancestors walked. He had to bear testimony often against many particular things in dress, the furniture of houses, the costliness of living, the use of many foreign articles, some whereof are before noted, as well as coffee, wearing fine silks, lawns, muslins, &c., and the common use of tobacco. He believed that many things were incautiously given way to, and suffered to prevail and come into practice among Friends, which had a tendency to divert or raise the minds of men and women above the pure witness of truth; captivating the soul out of its proper watchful state, and thus hindering the work of the new birth in us. His self-denying and exemplary life, with his unremitting labors of love for many years in the spirit of meekness and wisdom, greatly opened his way in the hearts of his friends and fellow-members, as well as the people at large. And after the year 1793, he believed it was required of him to disengage himself from nearly all the incumbrances of life, and dedicate the remainder of his time, as far as ability might be afforded him, to the service of the Lord, and the benefit of his fellow-creatures. In the course of his travels and labors in the work of gospel ministry, it seems evident he was much respected, well received in general by those of all ranks,

and treated mostly with remarkable kindness—even in places where another kind of disposition might have been supposed as prevalent. People in all stations where he came, seemed willing to hear the counsel he had to impart, though it was often attended with very plain dealing.

After patiently passing through many trials of a very close and uncommon nature, as heretofore briefly expressed, those who for some time seemed to disapprove of his singular conduct, came to be affectionate and friendly, and were some of them very helpful to him afterwards heartily concurring with his labors.

What follows is an abridgment taken from his continued and often daily notes and memoranda, in the latter years of his life.

1794. Fourth Mo. 20th.—I have been preparing to set out on a journey to the eastern governments, feeling great poverty of spirit; yet being in full unity with my friends, as far as appears.

24th.—I parted with my wife in dear love, and went to Burlington, where I had a favored meeting and felt an increase of strength. I said, who is so blind as thy servant, O Lord. I proceeded on and reached the Quarterly Meeting at Rahway. At Plainfield Meeting on First-day, it was a time of favor. After this Quarterly Meeting, I reached New York the 30th, and next day attended the Monthly Meeting held at Flushing, on Long Island. This was a season of deep heart-searching, but I felt an inward support, and my mind was quiet.

Fifth Mo. 2nd.—I went to Westbury Meeting with very kind Friends; the next day, had several solid sittings in families; which were seasons of Divine favor; I wish I may be humbly thankful.

4th.—On First-day I was at Westbury Meeting, large and highly favored; I believe the Truth was over all: blessed be the Lord, who bringeth the lofty from their seats, and exalteth them of low degree. I had some solid seasons also in families.

5th.—I have no cause to murmur, being favored with inward quiet, though at times have great poverty of spirit. I was at meeting at Cowneck, not large nor lively, for want of more zeal; I received some strength to labor for the cause of Truth.

At Maticoneck was a large, solid and good meeting. I felt such a degree of inward quietude, as caused thankfulness to the author of all good.

7th.—Had a large meeting at Oyster-bay, consisting mostly of those not of our Society, which was favored; the people behaving solid and quiet.

8th.—At Jericho, though the meeting was large, it was dull and heavy; a lukewarm spirit here, but I received strength to labor in a close way. On the 9th a large meeting was held at Jerusalem, mostly of other societies; solid and favored, I believe, to the tendering of many hearts.

The two following days, meetings were held at the Halfway-Hollow, and at Bethpage, the first not large, though the latter was; yet an exercising time. I was almost ready to give over; but being refreshed, sitting in some families afterwards, was helpful.

12th.—A meeting at Jacob Smith's, pretty large, and mostly not of our Society; the meeting was thought to be favored, and it was remarked the people sat solidly, though not accustomed to our way. I have gone as an empty vessel from meeting to meeting, sometimes my heart is filled with Life and Power. God over all is worthy of blessing forever.

13th.—I had a large meeting (though not many Friends attended); it was held at Hempstead in a barn, a favored season; the Lord was mouth and wisdom, tongue and utterance. I was enlarged, and desirous after it, to return "to the king's gate," like Mordecai.

(To be continued.)

FOR "THE FRIEND."

Historical Notes, Respecting the Society of Friends.—No. 10.

FREEDOM OF GOSPEL MINISTRY.—TITHES.

It is probable that no one of the doctrines published by our early Friends caused them more suffering at the hands of persecutors than that of the nature and freedom of Gospel ministry. They regarded ministry as a Divine gift bestowed by the Head of the Church upon such persons as He saw fit; and they taught that "they who have received this holy and unspotted gift, as they have freely received it, so are they freely to give it, without hire or bargaining." This testimony struck at the root of the system of a *clergy*, as a separate class to be maintained by the rest of the community; and naturally enough awakened the enmity of those who were affected by it. Of the effect thus produced, Robert Barclay says: "God having shown us this corrupt and antichristian ministry, and called us out from it, and gathered us into his own power and life, to be a *separate* people, so that we dare not join with our hear these antichristian hirelings, neither yet put into their mouths or feed them;—oh! what malice, envy and fury hath this raised in their hearts against us!—That though we get none of their wares, neither will buy them, as knowing them to be naughty, yet will they force us to give them money; and, because we cannot for conscience's sake do it, our sufferings upon that account have been unutterable. These avaricious hirelings have come to that degree of malice and rage, that several poor laboring men have been carried hundreds of miles from their own dwellings, and shut up in prison, some two, some three, year, some seven years together, for the value of one pound sterling and less. I know myself a poor widow, that for the tithes of her *gese*, which amounted not to five shillings, was about four years kept in prison, thirty miles from her house. Yea, hundreds have hereby spilled their innocent blood, by dying in the filthy, noisome holes and prisons. And some of the priests have been so enraged, that gods thus ravished could not satisfy them, but they must also satisfy their fury by beating, knocking and wounding with their hands innocent men and women for refusing (for conscience's sake) to put into their mouths."

The Journals of Friends who lived in those days abound with statements of the sufferings by loss of property and imprisonments to which they were subjected for their faithfulness in refusing to pay preachers who had not ministered unto them, and who had no equitable claim upon them, and whose forced maintenance was a violation of the principles laid down by Christ and his apostles.

The word *Tithes* means a tenth part. Among the Jews it was given to the tribe of Levi, as a substitute for their share of the land, when the land of Canaan was divided among the tribes of Israel. There was no similar provision among the early Christians. Indeed, in the earlier period of the Christian Church, there was no separate order of *clergy*, but in their meetings every one was at liberty to exercise

the gift of ministry as the Lord called them to the service. It soon became common to raise a church fund, and Tertullian shows the purposes to which it was applied—"in relieving the poor, and upon children destitute of parents, and in the maintenance of aged and feeble persons, and of men wrecked by sea, and of such as have been condemned to metallic mines, or have been cast into prison professing the Christian faith." In the distribution of these funds, no doubt, the ministers in need would share as well as the other members, not because they were ministers, but because they were poor or in distress.

These funds were derived from voluntary contributions, and were under the care of the deacons—the bishops having nothing to do with them, until the Council of Antioch, in the year 340, ordained that the bishops might distribute them, but that they should take no part of them to themselves, or for the use of the priests who lived with them, unless necessity required it. With the progress of declension in the Church, the payment of all ministers was gradually introduced between the fourth and eighth centuries; and the proportion of the funds devoted to its original object—the relief of the poor—was lessened. In the year 1200, Pope Innocent the Third ordained that every one should pay tithes to those who administered to him spiritual things in his own parish; and thus the fund of the poor was converted almost wholly into a fund for the maintenance of the Church.

By an act passed in the reign of Henry VIII, of England, the right of the clergy to tithes was confirmed, and the priests could claim a legal title to them. Friends refused to obey this law, because, if tithes were due to anybody, they were due to the poor. Secondly, because they had been originally free-will offerings, and now by violence had been changed into dues to be collected by force. It was clear, from the instructions of Jesus to his disciples, that ministers of the Gospel were not authorized to demand a maintenance from others; and that any constrained payment of these demands would amount to an acknowledgment of the right of the civil magistrate to interfere in matters which lay solely between God and man. Thirdly, the tithes were claimed by the act of Henry VIII as being due by Divine right, as were the Levitical tithes. To this Friends objected that the Levitical priesthood and all its belongings ceased with the coming of Christ; and therefore they would be acquiescing in a false principle, if they paid tithes founded upon it.

The objection to the payment of tithes by Friends being a matter of conscience and founded on a religious principle, they suffered great hardships rather than sacrifice their peace of mind by paying them. One of the most outrageous of these cases was that of a poor widow and her son, who were imprisoned eleven months on a verdict for *one penny* for tithes. Under a feeling of the avaricious spirit which prevailed in many of the ministers of the established Church, George Fox says: "The black, earthly spirit of the priests wounded my life; and when I heard the bell toll to call people together to the steeple-house, it struck at my life; for it was like a market-bell to gather people together, that the priest might set forth his wares for sale. Oh, the vast sums of money that are got by the trade they make of selling the Scriptures, and by their preaching from the highest bishop to the lowest priest! What one trade else in the world is comparable to it? not-

withstanding the Scriptures were given forth freely, Christ commanded his ministers to preach freely, and the prophets and apostles denounced judgment against all covetous hirelings and diviners for money."

It was not only in the collection of tithes and similar charges that Friends suffered by the hands of the priests, but these were great instruments in stirring up the civil magistrates to persecute them. Not only so, but in collecting the tithes which they claimed, many of them maliciously resorted to forms of legal proceedings which involved their victims in great expenses and often tedious imprisonments, when at the time there were easy methods of discharging the amount. To procure relief from this grievance a petition was presented to Parliament in 1736, praying that prosecutions for tithes might be restrained so as to follow only the less oppressive methods. In this petition it was stated that above £800 had been taken from ten persons, when the original demand did not collectively amount to more than £15; and that nearly 300 had been committed to prison on such prosecutions, of whom several had died prisoners. Notwithstanding the reasonable nature of this petition, it was strenuously opposed by the clergy, and through their influence defeated.

For many years the Annual Epistles issued to the Society by the Yearly Meeting at London, mention the number in prison and the amount distrained for tithes. In 1691 there were 80 in prison on this account; in 1692, 111; in 1694, 132; in 1695, 134; in 1696, 52; and it is mentioned that 97 had been discharged from prison by a late act of pardon. After this the number of prisoners gradually declined. In 1723, after mentioning that the sufferings on account of tithes for the year amounted to £4,369; the epistle says: "There are at present only two Friends prisoners on Truth's account, and seven Friends have been discharged from imprisonment since last year; on which occasion we think meet to observe to you the goodness and mercy of God herein: for that it doth not appear so few Friends have been prisoners on Truth's account in any one year since we were a people, as are at this time." In 1729, for the first time since the rise of the Society, they are able to say, "There is at present no Friend prisoner on Truth's account that we hear of in this kingdom. On which occasion, we cannot but commemorate the goodness of our God in this his merciful dispensation, so different from the lot of our fathers; which we earnestly pray may by all of us be remembered with deep humility and thankfulness." SELECTED.

A Badge of the Party.

Though it be objected, that we seek to set up outward forms and preciseness, and that our plainness is but a badge of the party, the better to be known; I do declare, in the fear of Almighty God, that these are but the imaginations and vain constructions of insensible men, who have not had that *sense*, which the Lord hath given us, of what arises from the right and the wrong root in man. And when such censurers of our simplicity shall be inwardly touched and awakened by the mighty power of God, and see things as they are in their proper natures and seeds, they will then know their own burden, and easily acquit us, without the imputation of folly herein. To such as say that we *strain at small things*, which becomes not a people of such fair pretensions to liberty and freedom of spirit, I

answer with meekness, truth, and sobriety, that *nothing is small* that God makes matter of conscience to do or leave undone, and that *as considerable as they are made* by those who raise this objection, yet they are much set by.—*William Penn.*

FOR "THE FRIEND."

Immortality or Eternal Life.

When man was first made, God breathed in him the breath of life whereby he became a living soul. But though the Divine life which he then received was immortal; yet it was lost by transgression and disobedience of the Divine law. But now, through the second Adam, who never fell, the lost life and immortality are brought to light by obedience to the law of the Spirit of life in Christ Jesus, which will set us free from the law of sin and death; so they will have no longer dominion over us; as we shall be led by the new law into the glorious liberty of the sons of God. "For what the old law could not do, in that it was weak through the flesh, God sending his own Son in the likeness of sinful flesh, and for sin condemned sin in the flesh, that the righteousness of the law might be fulfilled in us who walk not after the flesh but after the Spirit." "So then they that are in the flesh cannot please God." And if we would have that life and immortality which was lost in the fall brought to life again in us, we must cease to live after the gratifications of the flesh, and take up our daily cross and follow Him in the regeneration. Then we should know for ourselves Christ to be inwardly revealed, as our only hope of glory. "And this is life eternal that we might know Thee the only true God, and Jesus Christ whom thou hast sent." So now, as in the first Adam, all have, through disobedience, died, or lost the eternal life which was set before men, and lost their right to the tree of life, and to the paradise or enjoyment of God; so now in Christ, the second Adam who never fell, we all, through obedience to his commandment, have a right or chance to enter in through Him the gate, into the paradise of God; and to partake of the tree of life, and of Christ the bread of life, and never die. For we become as pillars in the temple, that shall go no more out. So this is that life eternal which was lost in the fall; and blessed are they that do his commandments, and not merely hear them. For they are brought to light by the gospel of Him who came to seek and to save that which was lost, and which is the power of God unto the salvation of all who receive and obey it. And when it is instrumentally preached to us, it comes not only in word, but in power also; and it comes for our benefit and use, that we through patience and comfort of the Scriptures which speak of it may have hope. For we are there told "to them who, by patient continuance in well doing, seek for glory and honor and immortality, it gives eternal life." So if we know these things, happy are we if we do them, and receive immortality and eternal life. D. H.

DUBLIN, IND., Third Mo. 12th, 1890.

WHEN I look at the many comforts with which I am surrounded, I feel a fear least I should be appropriating to my own use any thing that ought to be applied to the pressing wants of others. May I ever watch over myself in this respect, and not be induced to expend on unnecessary accommodations that for which we are accountable stewards.—*Maria Fox.*

FOR "THE FRIEND."

The following beautiful lines may be appended in THE FRIEND before, but being in unison with the present feelings of many, they are forwarded for insertion, if approved of by the Editor. Author unknown. W. P. T.

WEST CHESTER, Pa.

THE VOICE OF THE DEPARTED.

I shine in the light of God;
His likeness stamps my brow;
Through the valley of death my feet have trod,
And I reign in glory now.

No breaking heart is here,
No keen and thrilling pain;
No wasted cheek, where the frequent tear
Hath rolled, and left its stain.

I have reached the joys of heaven;
I am one of the sainted band;
To my head a crown of gold is given,
And a harp is in my hand.

I have learned the song they sing,
Whom Jesus hath set free,
And the glorious walls of heaven still ring
With my new born melody.

No sin, no grief, no pain,
Safe in my happy home,
My fears all fled, my doubts all slain,
My hour of triumph come.

Oh, friends of my mortal years,
The just and the true,
Ye are waiting yet in the valley of tears,
But I wait to welcome you.

Do you mourn when another star
Shines out in the glittering sky?
Do you weep when the raging voice of war
And the storms of conflict die?

Then why do your tears run down,
Why your hearts so sorely riven,
For another gem in the Saviour's crown,
And another soul in heaven?

THE NIGHT EXPRESS.

BY ANGELICA CHURCH.

A mighty power she stands, equipped and ready
Her journey to begin;
While whistle shrill and brakemen's voices steady
Call wandering train-hands in.

Waiting in pride 'mid darkness dim and dreary,
All confident that she
In her great strength, and never waxing weary,
Will reach her destiny.

A signal from the engine quick resounding
Bids hearts be free from fears;
Into the darkness her great form surrounding
Eating, she disappears!

Like to a winged dragon, high uprearing
Its wild flaming head,
With flashing eye and thunderous roar appearing,
Object of awe and dread.

Around sharp curves, through field and forest fleeing,
Freighted with human lives,
All trusting to the skill of one brave being,
Who the fierce engine drives.

And as the first faint flush of early morning
Shines in the eastern sky,
With ringing bell and whistle loud of warning
Swiftly she flashes by.

The constant care of anxious train-dispatcher
(How anxious few can guess)
In power, speed and beauty who can match her?—
This wondrous Night Express.

Through darkness night to misty morning breaking,
N'er stopping on her way,
With her wild call the sleeping towns awaking
At the calm dawn of day.

A wonder in this matchless age of wonders,
Her power we confess,
As o'er the trembling ground away she thunders—
The mighty Night Express!

CHRIST WITHIN.

Why wouldst thou teach my soul to rise,
And seek for Jesus in the skies?
Is He so far apart?
Are skies a better dwelling place
Than man's celestial heart and face
Made pure and bright with heavenly grace?
Oh! find Him in thy heart.

Why wouldst thou teach my thirsty soul
To wait till death shall make it whole?
Is Christ so far away?
Oh no! I see Him now and near,
His throbbing life, his word of cheer:
He turns my night to day.

Then cease thy looking here and there,
And first of all thy heart prepare

By purity from sin;
And then lit up with Heaven's bright glow,
Thy soul of truth and love shall know
That Heaven above is Heaven below,
And Christ is found within.

—*Prof. T. C. Upham.*

FOR "THE FRIEND."

In No. 31 of present volume, under the head of "Incidents and Reflections," a Friend relates an instance of giving a check for money to a young man who proved to be unworthy of trust. Then in trying to recover it the trusting friend was led to preach to the clerks of the institution, where the young man was employed. And this is noticed as one of the many unexpected times and places where and when the Lord's servants are called in an unexpected way to preach his word.

"During somewhat of a lengthened life, the writer has had much experience in this kind of preaching, and would here relate one instance out of many.

"One of the last days of Third Month, 1864, being a Seventh-day, the writer took the train from Racine, Wisconsin, bound for Iowa, on business of importance. On arriving at Beloit, Wisconsin, at the Illinois line, the engine broke down, and we were there detained several hours. On starting again, I plainly saw that I would be too late for doing any business in Iowa that night. But still I consoled myself with the pleasure anticipated of spending that day with a dear old Christian friend. And so we sped on for the Mississippi; but when we reached it, we could not cross—it was full of floating ice. The winter ice had just broke up, and was running so thick that the steam ferry could not cross. And now here I was in the then small town of Savannah, Ill., a place where I knew no one, and no one knew me. I registered at the hotel to stop until Second-day morning, and make the best I could of it. Next morning after breakfast I set out to find some religious meeting, and was shown to the School-House, where a good Methodist exhorter had gathered a small congregation. After the meeting I returned to the hotel, and sat down to a good dinner. Then went to my room, where I spent a lonesome afternoon.

"After tea, 'about dusk,' I concluded to go again to the School-House, where meeting was to be held again.

"Whilst putting on my overcoat and gloves in the bar-room, which was quite a large room, and was well filled with railroad men, as also a crew of raftsmen, ice-bound in the river; and all talking in a rough, jolly way, when one of the number quoted a Bible saying to substantiate his assertion. Then an oldish, well-dressed man in an agreeable way asked the man if he was not old enough yet to discard that old Book.

"He answered that he had never given it much

FOR "THE FRIEND."

Some Further Remarks upon Oath-Bound Secret Orders.

It seems at times as though some startling occurrence of the nature of a tragedy was called for, in order to awaken the public conscience to an apprehension of the gravity of great evils. Instancing only the matter of secret societies, the Morgan abduction and murder more than sixty years ago, sent a thrill of horror throughout the country, and aroused so strong a repugnance and hostility to Free-Masonry, that it seemed for a while as though the order was not likely to notably recover from the shame and the odium of the revolting exposure. The Cronin trial of last year informed the country in a slight degree of the murderous character and scope of the secret Clan-na-gael fraternity. Again, within a few weeks, the death of a Methodist preacher while taking the so-called "Royal Arch degree in Masonry," at Huntington, West Virginia, should suffice to open the eyes of many to the sinfulness, folly and perversity of certain secret lodge ceremonies.*

It is to be regretted, however, in connection with the last named circumstance, that many editions of religious papers, being themselves in association with oath-bound orders, will either suppress any mention of the foregoing tragic incident, or if told, will refrain from printing the strong moral and the recommendation of withdrawal which should be drawn from it. A formal investigation making necessary a certified statement in this case, thus forestalling any denial of the essential facts, it appears therefrom that the Methodist preacher in question, J. W. Johnston, in company with several other persons, one of whom was an Episcopal minister, were passing through the initiatory ceremonies as stated. It was necessary, in order to a correct performance of the rites, that the novitiates be lowered, blindfolded, into a dark vault, thirteen feet, by means of a rope and tackle suspended from the ceiling above. During this operation, the knot fastening the tackle to the lower block slipped, gave way, and Mr. Johnston, says the account, "fell to the bottom of the vault." He was fatally injured, and died in a few hours. This statement was officially subscribed to by the "high priest," "king," scribe and secretary of the aforesaid Huntington lodge.†

Now does this "high priest" minister to a true or false religion? What that inquest divulged perforce is good testimony, so far as it goes, to judge by. It is also testified, "By their fruits ye shall know them." Following is a little more evidence to the point.

A minister complaining, not long since, that the secret societies were producing a dry rot in the religious natures of the men who united with them, stated that when he was a young man he was urged to join the Odd Fellows, and as an inducement was told "that being a minister, he could join without paying fees." Think-

* "The Cronin case, which is likely to become as famous as the Morgan case, is really a trial of secret societies. If, through the influence of money, chicany or judicial weakness the guilty escape, history will not fail to place the responsibility where it belongs. When a man, an American citizen, for alleged violation of the rules of a secret society, is murdered by the order of men belonging to that society, odium must, in public opinion, be attached to the society."—*Illustrated Christian Weekly*, Eleventh Mo. 9th, 1889.

† At Cooperstown, New York, in 1863, the testimony given at a coroner's inquest held upon the body of Judge White, went to show that the fatal injuries were similarly received during initiation into a lodge.

thought; only believed it good from the way his mother used to read and talk about it.

"Then the old man asked him if he ever thought what kind of a being the God of the Bible was, and he answered 'No'.

"Well," said he, "He is just such a God as Abraham had to kill his calf for him to eat before he would do anything for him, or bless him."

"After a moment's dead silence I spoke, saying that perhaps I was the only one present who professed to be on the Lord's side, and asked the old man if he was well versed in the Bible. He said he ought to be, for he had been a Protestant minister from his youth, and to that day remained a thoroughly moral man, neither swore nor drank, nor used tobacco, but now had seen the error of his former preaching through spiritualism; and having plenty of money, he had determined to travel to correct somewhat the errors he had been teaching.

"We then entered into an orderly discussion (no jangling) which lasted until 10 o'clock. The house was quite full, and several standing outside. The power of the Lord was so plainly felt among us, and many confessions were made. One man arose and said that he had never prayed in all his life until this evening—sitting here on this chair I have asked God to keep me from becoming such a man as that is.' Then several others spoke in the same strain. One said that he was afraid to sleep in the hotel that night, believing surely that a judgment was hanging over it for that blasphemer's sake. (For years after in my travels I would meet occasional ones who knew me, and who were in that bar-room meeting that night in Savannah.)

"Next morning, on coming into the bar-room, I found quite a number of rough men, each with a Bible, which they were quietly reading, which was a sight I never saw in a bar-room before. I wondered how so many Bibles could be got together in such a place.

"I incidentally met my antagonist again in the morning, when I spoke to him, and warned him in the name of the Lord to cease from his evil doings ere it was too late. He was apparently much moved; and as I never heard of him again, I am led to believe that his blasphemous tongue was silenced by the power of the Lord that night, and he perhaps saved, although not on destroying the Church of God, like unto Saul at the gate of Damascus."

Friends, let us mind these checks. It may not always be the stopping of an engine, as in this case, but something else just as necessary to lead or make us do the Lord's work that He hath said us to do.

No Cathedral bell called that meeting that evening; but they were gathered from the provinces of Wisconsin and from along the railroad from the great lakes, even as many as the Lord had led there—and much blessing followed. T. D.

SAN LEANDRO, Cal., Third Mo. 11th day, 1890.

BANCROFT says: "The rise of the people called Quakers is one of the memorable events in the history of man. It marks the moment when intellectual freedom was claimed unconditionally by the people as an inalienable birthright. The Quaker doctrine is philosophy summoned from the cloister, the college, and the alcove, and planted among the most despised of the people. The mind of George Fox had the highest systematic capacity, and his doctrine was distinguished by its simplicity and unity."

ing to get a good thing free, he handed in his name. The evening he was to be taken in, among others to be received was a Jew of not the best character and no piety. The Jew rallied the preacher on his inconsistency in joining such a society, and put the case in such a way that the preacher, utterly disgusted with himself, never went near the lodge again. A man in New Hampshire, having recently made profession of religion in the Methodist church, "at once publicly withdrew from the Masonic and the Odd Fellows' lodges as inconsistent with the new position he had taken. Soon after, in the same church, an old gentleman, a member of the official board, who had taken seven degrees in Masonry, stated before a houseful of people that he withdrew from Masonry because the Lord Jesus Christ was excluded from the lodge."

A good confession was that of Malcolm Fitch, lately published in the *Christian Cynosure*. Amongst other things, he says: "Having trusted in my morality until the fortieth year of my life, with no other religion than that disseminated at Masonic altars, a light shone into my heart that convinced me that there was a God, merciful and gracious, long-suffering and abundant in goodness and truth; but who would, nevertheless (as I afterwards learned) bring every work into judgment with every secret thing, whether it be good or whether it be evil." Soon after, I united with a church whose leading members as well as myself were married to the daughter of a strange god, and the light that was in me ere long became darkness." A better revelation, however, was subsequently vouchsafed and heeded—the spirit of Caleb and Joshua was granted "to follow the Lord and make way for his coming;" and in deep contrition and humiliation before Him, the promise was made to have nothing more to do with the lodge. "The next morning, as I was alone on my farm, the Spirit of the Lord came upon me, and liberty like day broke on my soul, and fired all my faculties with glorious joy. I felt that I was indeed an inhabitant of Zion, and was impelled to cry out and shout, for the Holy One of Israel had taken up his abode in my heart. I had received the spirit of adoption and became a habitation of God through the Spirit, as it is written: 'And what agreement hath the temple of God with idols? For ye are the temple of the living God; and so on.'

Nevertheless mark what is said by Sickness in his "Monitor of Free Masonry," concerning a candidate who has been "passed" and raised to the "sublime degree" of Master Mason: "We now find him, complete in morality and intelligence, with the stay of religion added to insure him of the protection of the Deity, and guard him against ever going astray. These three degrees thus form a perfect and harmonious whole, nor can we conceive of anything which can be suggested more than the soul of man requires." But it is said in Scripture that there is one High Priest, and that "such a High Priest became us, who is holy, harmless, undefiled, separate from sinners, and made higher than the heavens." Does it not hence appear a sacrilegious assumption that men in their lodges should exalt one of their number to a position which they make bold to call that of the "high priest"?

During the winter just past, Mary T. Lathrop, of Michigan, delivered in this city a lecture upon "Christian Politics," in the course of which she queried why it was that in the regular meetings for worship the number of men present, in proportion to the number of women,

was but as one to three, and in the prayer-meetings, only about one to ten. Answering her own question, she replied that the men were to be found in the liquor saloons. I believe her statement would have been much more accurate had she included with the saloons the club-houses and the lodge-rooms. About the time the foregoing lecture was delivered, there came to me from the same State of Michigan, a letter written by the pastor of the Congregational Church, in the small town of H—, in which the writer says:

"I have been particularly interested in the subject of secret societies, since I came to this place, where I find two strong secret societies and two weak churches. As a rule, the men of the community are in the former, while the churches are left to the women. But the monstrosity is not content with the work already done, but is now reaching out after our women. Only a short time since, a Star lodge was organized with a larger membership than that of our church! What will be the end of these things? It does seem to me that we must 'Cry aloud and spare not.' May we be granted grace and courage so to do."

Corroborative of the above, and immediately following the receipt of it, was the remark made to me by the compiler of that book of narratives of slave escapes, "The Underground Railroad," a resident of this city well qualified to speak for his race. He said that he knew of scarcely anything that stood so much in the way of the colored people's advancement as did the disposition they have shown to go into the secret orders, an example, moreover, that many of the women had not been slow to follow, and with results that had been sorrowful.

It is not necessary to go out of the way to glean evidence as to the convivial character of the clubs and lodges. A printed bill of fare of a down-town restaurant, thrown into my letter box within a week, besides advertising the choice liquors to be had at the drinking bar, states that estimates are given "for banquets to lodges, societies, &c." The testimony before the Board of License Judges, now being elicited, incidentally and abundantly confirms this statement. In the Court of Quarter Sessions last week, when desertion cases were being heard before Judge Willson, an order was given that one of the defendants must pay his wife a specified weekly stipend for the support of herself and children. "I can't keep up two societies and pay that," responded the delinquent. Upon which the Judge, properly observing, "You have the society of your children to look after," made an order of three dollars payment per week. There are many moving in a very different circle from this man, who are frequenters of fashionable club-houses, absentees from home, and neglecters of the practices of worship.

There has been some surprise expressed, in view of the fact that some of our members have at times united with the orders, that our Book of Discipline makes no provision thereagainst. The reason for this was probably two-fold: that the orders generally have originated since the rise of our religious Society, and that the whole procedure of secretism, the ritual, the oath, the title conferring and title pronouncing, the affiliation with many making no profession of religion, and other reasons not necessary to mention, were so opposed to the openness and simplicity, and indeed to the whole polity of primitive Quakerism, that such a thing as our members entangling themselves in the unwholly

maxes of secretism was not thought probable, or needed not to be provided against.

JOSIAH W. LEEDS.

Natural History, Science, &c.

The Armadillos.—These animals, instead of being covered by fur or hair, have a bony shell composed of polygonal scales.

The largest species of this genus is the giant armadillo. It digs great burrows, and its chief food consists of insects and of such dead animals as it meets with.

A smaller species is common in Southern Brazil, which feeds on fruits, tuberous roots and insects. It burrows rapidly, and forms so many galleries under ground, that it cannot be taken if it first finds entrance into them.

Another species, very abundant on the prairies, is called the chicken armadillo, because its white flesh resembles that of the chicken in taste and appearance.

Another kind, common in the north of Brazil, rolls itself into a ball so as to be entirely protected by its shell. When so rolled, the strength of two persons is quite insufficient to unroll it.

Sloths.—The sloths are constructed to pass their lives suspended from the under surface of the branches of the trees amongst which they live; and for this end their organization is singularly adapted. All the feet, but especially the fore-feet, are furnished with enormously long curved claws, by the aid of which the animal is enabled to move about freely suspended back downwards from the branches. This position the sloth maintains even in sleep. Owing to the disproportionate size of the fore-limbs as compared with the hind-limbs, and owing to the fact that the hind-feet are so curved as to render it impossible to apply the sole to the ground, the sloth is an extremely awkward animal upon the ground.

The leaves of the cocopias form almost their entire food.

The tenacity with which the sloth clings to the object it has hold of, is illustrated by an incident related by the Visconde de Prades. Passing one day through a forest, when the bamboos overhung his path, his travelling cloak, which was on his shoulder, was fiercely seized. An Ai (sloth) suspended from the bamboos, had hooked itself on to his garment, and he could not make it relinquish its hold. He determined to let it go off when it wished. But the Ai remained hooked on to the cloak during the eight miles he travelled to his home; and his men had much trouble to make the obstinate animal leave hold.

Mandioc.—The root of this plant is one of the staple articles of food in South America. A flour (*farinha*) is prepared from it. The root consists principally of starch and of a white juice, which is very acrid and poisonous. It is scraped or ground, the juice pressed out, and then roasted, which destroys the poisonous principle.

Keeping Warm in China.—The very poorest Chinese has always a warm jacket or cloak lined with sheepskin, or padded with cotton, for the winter; and they cannot imagine how the Europeans can exist with the thin clothing they generally go about in. When the weather was cold I used always to wear a stout warm great-coat above my other dress, and yet the Chinese were continually feeling the thickness of my clothes, and telling me that I surely must feel cold. Their mode of keeping themselves com-

fortable in winter differs entirely from ours; they rarely or never think of using furs in their rooms for this purpose, but as the cold increases, they just put on another jacket or two, until they feel that the warmth of their bodies is not carried off faster than it is generated. As the raw, damp cold of the morning gives way to the genial rays of noon, the upper coats are, one by one, thrown off; until evening, when they are again put on. In the spring months the upper garments are cast off by degrees, and when the summer arrives the Chinese are found clad in thin dresses of cotton, or in the grass-cloth manufactured in the country. In the northern towns the ladies sometimes use a small brass stove, like a little oval basket, having the lid grated to allow the charcoal to burn and the heat to escape; this they place upon the tables or on the floor, for the purpose of warming their hands or feet. Nurses also carry these little stoves in their hands under the feet of the children. Such, however, is the thickness and warmth of their dresses, that it is only in the coldest weather they require them. Little children in winter are so covered up, that they look like bundles of clothes, nearly as broad as they are long, and when the padding is removed in warm weather, it is difficult to imagine that you see before you the same individuals.—*Fortune's Travels in China.*

Flowers Becoming Extinct.—The British Association for the Advancement of Science reports 85 flowers that have become completely or practically extinct in Scotland. The white water-lily was curiously found to have been nearly exterminated in the lochs about Dunferries by the ravages of a single individual, who has been warned off the estates. A plant which existed only in one locality in the country, the Bog of Methuen, was undoubtedly destroyed by a flock of black gulls, which settled in the bog and devoured everything in the shape of vegetation. Another plant, growing in single on the Bay of Bigg, was completely exterminated by the use of the shingle for concrete piers; and a grass which was confined to a patch near Moray Frith, was destroyed by the overturning of a tree. The disappearance of plants has been largely due to the injudiciousness of botanists.—*T. Oswald, in The Voice.*

Lady Bugs.—As we were coming down the hill, we came on a marvellous swarm of metallic blue-and-green beetles, with heads and under-side golden—just these same insects as our lady birds I have found these in all corners of the earth, and in every variety of color, but nowhere have I seen anything in the slightest degree resembling this swarm. The beetles hung in dense clusters on palm-fronds and stems, on the vines hanging from tree to tree, and on both sides of every leaf, so that not one atom of green could be seen. The palm-trees seemed dressed in coats of mail of shining blue steel; and the vines were like solid robes of emeralds and sapphires with golden setting, the gold being the head of the lady bird. There must have been many millions of these living gems, for they covered a space of nearly half an acre in the forest, which truly suggested some wonderful tale of the fairy land, with real fairy jewel-trees, where, instead of stupid dead minerals, the gems are all alive ready to fly away from covetous human touch. They were in such dense masses that the shrub were quite weighed down by them, and when we shook a bough to make them fly off, it sprang quite light. They did not seem to be doing any harm. Certainly it was a very pretty

glimpse of fairy-land. I have brought down a number of the living sapphires, hoping to preserve them, alive or dead.—C. F. Gordon Cummings' at Home in Fiji.

Items.

Injurious Effects of Tobacco.—Tobacco frequently leaves its mark stamped upon the minds of the youth, while their mind and habits are in a tender condition, and can be moulded and shaped, like clay in the hands of the potter.

Children oft-times are thrown in society at a certain age, where their minds and habits are formed, which are stamped on their countenances through life; if in proper society their ways and habits are improved, their mental future is brightness and their efforts are crowned with success.

But on the other hand throw the child in the broad channel of the world, where they are carried off by the various temptations, such as the saloon, bar-room and gambling tents, which are oft-times indulged in little by little, and step by step. The first glass of liquor, the private parlor dance, the innocent game of cards, oft-times proves the gateway to destruction.

Many of the American citizens to-day are being carried off and led astray by the use and abuse of tobacco, an article used not to elevate the human race, but has a tendency to carry the individual astray, weaken their mental faculties, strengthening the pathway that leads to destruction.

Tobacco is generally used by the class that visit the saloon, the bar-room and gaming tents. Tobacco has a tendency to destroy the bright and hopeful prospects of the future. It affects the nervous system, destroys the bright and intelligent mind.

Critchett, the eminent English oculist, says: "he is constantly consulted by men for commencing blindness, caused solely by great smoking—other lists have similar testimonies."

Siegel, of Paris, found that blindness easily cured by cessation from the use of tobacco.

Sally, of St. Thomas Hospital, London, says: "It is my business to point out all the various and insidious causes of general paralysis, and smoking is one of them. I know of no single vice which does so much harm as smoking." Its a snare and a delusion.

Dr. U. S. Naval Academy, at Annapolis, Md., in 1881, prohibited the use of tobacco in the institution, because smoking, having been tried for nearly three years, was found injurious to their health, discipline, and powers of study.

Dr. Richardson says: "that smoking produces disturbances in the blood, causing undue fluidity of the system, and a consequent morbid action, giving rise to debility, nausea and sickness, on the heart causing debility of the organ and irregular action; on the organs of sense causing confusion of vision," &c.

Dr. Hammond says: "If boys smoke they destroy certain nerves, oft-times cause neuralgia, injure their brain and stunt their bodies, injure their hearing and sight."

Dr. Bertillon found, that of the pupils at Polytechnic school of Paris 108 smoked and 52 did not smoke. The non-smokers smoked much higher intellectually than the smokers.

In the year 1862, the Emperor Napoleon III had the use of tobacco prohibited by students in all the schools under governmental supervision in the whole of France, and further states that some of their schools were divided into two classes, the smokers and the non-smokers; the latter were found so much superior, physically, mentally and morally, that action was taken to abandon its use from all their schools.

It is estimated that over 20,000 in our land die annually by the effects and use of tobacco.

Experience demonstrates that those classes of people which are most addicted to the use of tobacco, are also the most prone to drunkenness. Almost universal testimony is that all toppers, both old and young, first used tobacco freely; comparatively few persons who frequently indulge in intoxicating drinks, who make no exception, the alcoholic, opiate, and both practices are generally commenced

during childhood.—G. North in *American Journal of Dental Surgery*.

Lotteries in Kentucky.—In the Senate of Kentucky a bill has been passed repealing the charters of all lotteries in the State. A bill passed both Houses of the Legislature imposing severe penalties upon persons refusing to answer questions put by a Legislative investigating committee. This is intended to compel witnesses in the lottery investigation to reveal what they know.

A Daughter's Plea.—Some time ago in a town in West Virginia, a liquor-dealer applied to the Court to have his license renewed, so he could go on selling liquor. Some of his neighbors appeared and protested against the license being granted, for a saloon is always considered a nuisance, and makes property near it of less value than it would be if the saloon were not there.

Of course, the liquor dealer had a lawyer to plead for him, and after hearing both sides the Court decided to grant the license. But just at that moment the daughter of the saloon keeper came in and demanded that he be heard.

The Court permitted her to speak, and for twenty minutes she held them spell-bound as she begged them not to give her father a license to sell rum, and told what a terrible curse it had been to the mother and children. After hearing her earnest appeal the judge reversed the decision and refused to grant the license.

It is not possible for every daughter who has felt the curse of whiskey to carry her grievance into Court. But it is possible for every girl to put all her influence at all times on the side of total abstinence.

PARENTS are sometimes ignorant of the habits and practices of their own children, and if one should tell them the facts in the case, they would be offended. A traveling Secretary of the Young Men's Christian Association recently made an address in an Oregon town, in which he drew a picture of the haunts of young men in that place. A gentleman in the audience challenged him to the proof of his statements. The Secretary offered to show him that what he had said was literally true, and at the close of the meeting the two started together on an exploring expedition. The first place they entered was a gambling den, and when with considerable effort they had forced their way in, the skeptical gentleman was horror-struck to find himself face to face with his own son. Thousands of young men are spending their nights in such places, while their parents are fondly dreaming that there is no danger. It is possible to exercise too rigid a surveillance over young people; but when a young man once abuses the confidence of his parents, and visits places where he knows it would grieve them to have him go, he is on the high road to ruin.

THE FRIEND.

FOURTH MONTH 5, 1890.

A letter received from a friend in Indiana, calls our attention to the description of the religious condition of the Church in England in the early part of last century, as given in the article entitled "Historical Notes" respecting the Society of Friends, in No. 33 of the present volume of our Journal. The writer of the letter suggests that the low state of vital religion and the decline in the number of persons convinced of the truth of our principles, was due to the want of a more active zeal among the members. His views seem to be in accordance with the remarks frequently made of latter times,

which imply that the life of a church may be measured by the amount of its aggressive work, and that such activities are the only means of preserving it in a living condition; and that our own religious Society has suffered much from having drifted into a too quiet, self-inspecting state.

We trust we are not insensible of the danger on this hand, and are prepared freely to admit that where spiritual life is maintained, its appropriate fruits will be produced. Yet we are of the opinion that our correspondents have inverted the true order of events, and that the falling off in the number of conversions and the diminished zeal in the period referred to, was the effect of the lowered state of vital religion rather than the cause.

The laborers among Friends in that day give a different explanation of the degeneracy. The faithfulness of the early members under severe persecutions, and their blameless lives had won for them the general esteem of the people, and secured them relief from the most of those oppressive laws and tyrannous practices under which they had unjustly suffered. Their honesty and uprightiness had gained the popular good will, and their strict temperate and self-denying lives had tended to increase their outward prosperity, so that many among them had become comparatively rich. The natural effect of this altered condition of things was to promote the growth of worldliness in the Society, especially in the younger members. The journals which have been preserved of those ministers and elders who lived to see the creeping in of this spirit, and of these departures from the cross of Christ, show their sense of the degeneracy and their concern to check it.

William Elmudson, who has sometimes been called "The Apostle of Ireland," and who was a noble example among those who counted not their lives dear to themselves, so they might promote the cause of Christ, clearly unfolds this subject in one of his epistles. Speaking of Friends in the beginning, he says: "Then the things of this world were of small value with us, so that we might win Christ; and the granest things thereof were not near us, so that we might be near the Lord; for the Lord's truth outbalanced all the world, even the most glorious part of it. Then great trading was a burthen, and great concerns a great trouble; all needless things: fine houses, rich furniture and gaudy apparel was an eye-sore. Our eye being single to the Lord, and to the shining of his light in our hearts, this gave us the sight of the knowledge of the glory of God, which so affected our minds, that it stained the glory of all earthly things, and they bore no mastery with us, either in dwellings, eating, drinking, buying, selling, marrying, or giving in marriage. The Lord was the object of our eye, and we were all humble and low before Him, self being of small repute. * * * And this answered the Lord and his witness in all consciences, and gave us great credit among men.

"But as our number increased, it happened that such a spirit came in among us, as was among the Jews when they came up out of Egypt. This began to look back into the world, and traded with the credit which was not of its own prebasing, striving to be great in the riches and possessions of this world. Then great fine buildings in city and country, fine and fashionable furniture, and apparel suitable, dainty and voluptuous provision, rich matches in marriage, and excessive, uncomely smoking of tobacco came into practice, far wide

from the footsteps of the ministers and elders, whom the Lord raised up and sent forth into his work and service at the beginning.

"The love of the world, and fashions thereof, are working as the old leaven at this very time, to corrupt the heritage of God, and to fill it with briars, thorns, thistles, tares and wild grapes, to make the Lord reject it and lay it waste."

When the Society of Friends ceased to be conspicuous as examples of heavenly mindedness, and their daily lives no longer said to their neighbors, "Come and follow us, as we are following Christ," the preaching of their ministers no longer had the same convincing effect, as when it was supported by the self-denying lives of the members. And we may readily suppose that in proportion as the ministers became leavened with the same worldly spirit, the divine power which had rested upon them, was withdrawn, or less manifestly bestowed. Yet we have not met with any evidence that there was a lack of ministerial labor, during the period of which we have been speaking.

In a list of the ministering Friends of Great Britain who visited America on religious service, I find that between 1717 and 1736 (the dates mentioned by my correspondent) 30 such visits were paid; and this would indicate that probably a large amount of labor was bestowed in the parts nearer home. Among these visitors were John Footergill, Samuel Bowman and others, who were industrious laborers in the Lord's cause.

In view of these things, it seems to us that the great need of the Society of Friends, and of the world at large, is to draw close to that Divine power of God which visits man for his redemption, and through admission to its operations, to know a cleansing from sin, and an adoption into Christ, the true vine. As our members are thus brought into union with God, and abide under his government and leadings, they will receive gifts from the only source of spiritual blessings—and such will not be barren nor unfruitful in the work of the Lord, but will diligently labor to perform the service allotted them—so that at the end of time, they may receive the answer of "well done." But we firmly believe that no outward arrangements or labors that do not proceed from pure leadings of Christ, will promote his cause in the earth.

SUMMARY OF EVENTS.

UNITED STATES.—On the 27th ultimo, the bill for the admission of Wyoming as a State, passed the United States House of Representatives by a vote of yes, 130; nays, 127.

The House Committee on Alcoholic Liquor Traffic authorized a favorable report on a bill making it unlawful for any person or corporation to convey, carry, sell or transport intoxicating liquors of any kind from any State or Territory of the United States or District of Columbia, to or into any other State or Territory of the United States, contrary to, or in violation of, the laws thereof. On the same day the army appropriation bill was completed in Committee of the Whole and reported to the House. The amendment providing that intoxicating liquors shall not be sold at cantons was defeated—yeas, 52; nays, 135—and the bill was passed.

The United States Indian agent has issued a circular announcing that no lottery drawings will be permitted in Indian Territory.

The Judiciary Committee reported a bill to the Massachusetts Legislature providing the most stringent measures against lotteries.

Many citizens of Louisiana have formed an Anti-Lottery League to oppose the renewal of charter to the Louisiana State Lottery Company.

A bill to abolish lotteries has been passed by the Kentucky Senate.

The Guatemalan Minister at Washington has received a message that Guatemala has approved the provisional treaty of amity between the five Central American States. This makes three of the five States which have ratified the treaty, the assent of Honduras and Nicaragua already having been secured.

The proposition of the United States delegates respecting an international silver coin and the organization of a monetary convention, was under discussion recently by the Pan-American Conference. Delegates Quintana, of the Argentine Republic, Cruz, of Guatemala, and Guzman, of Nicaragua, proposed an amendment, authorizing the Convention to make the proposed coin either gold or silver. No definite action was taken.

The situation in the lower Mississippi Valley is critical owing to the gorged condition of the river. Several of the levees have given way, plantations are submerged, tenants are leaving, and the people navigating in skiffs.

A terrible cyclone passed over the western part of Louisville, Ky., on the night of the 27th ultimo. A track, about 400 yards wide and three miles in length, in the residence and business portion of the city, was devastated, and a large number of persons and others mortally injured, it is thought will reach nearly 100. The ruins of some of the buildings caught fire, and some of the victims were burned to death. The loss on property is estimated at nearly \$2,000,000.

The Sheriff of New York County, James A. Flack, his long and black coat, and the organization of a high scandal and a sensational trial, have been found guilty of conspiracy to obtain a divorce fraudulently.

A special train of the Baltimore and Ohio Railroad made the run from Philadelphia to Baltimore in 2 hours and 15 minutes.

Deaths in this city last week numbered 438; 8 less than during the previous week and 49 more than during the corresponding period last year. Of the whole number 213 were males and 225 females: 62 died of consumption; 47 of pneumonia; 42 of diseases of the heart; 18 of cancer; 18 of inflammation of the lungs; 15 of inflammation of the stomach and bowels; 15 of bronchitis; 15 of cancer; 13 of marasmus; 13 of typhoid fever; 13 of apoplexy; 13 of inflammation of the brain; 11 of paralysis; 11 of Bright's disease and 10 of inanition.

MARKETS, &c.—U. S. 4's, 103½; 4's, reg., 122½; cotton, 12½; currency 65, 116 a 125.

COTTON was in limited request by spinners, on a basis of 11 1/16-1/16 cts. per pound for middling uplands.

FLOUR.—Western and Pennsylvania super, \$2.00 a \$2.05; do, extra, \$1.95 a \$2.00; N. E. winter family, \$3.00 a \$3.20; Pennsylvania family, \$2.90 a \$3.00; do, \$3.30 a \$3.50; Pennsylvania roller process, \$3.30 a \$4.00; Western winter, clear, \$3.75 a \$4.00; do, do, straight, \$4.10 a \$4.35; winter patent, \$4.35 a \$4.90; Minnesota, clear, \$3.50 a \$4.00; do, straight, \$3.75 a \$4.65; do, extra, \$4.75 a \$5.00; do, do, do, favorite brands, \$5.10 a \$5.15. Rye flour sold in a small way at \$2.80 a \$2.90 per barrel.

GRAIN.—No. 2 red wheat, 82½ a 83½ cts.

No. 2 mixed corn, 35½ a 36 cts.

No. 2 white oats, 30½ a 31 cts.

BEEF CATTLE.—Extra, 5 a 5½ cts.; good, 4½ a 4½ cts.; medium, 4¼ a 4½ cts.; fair, 4¼ a 4½ cts.; common, 3¼ a 4 cts.; fat cows, 2½ a 3½ cts.

SHEEP.—Extra, 6¼ a 6½ cts.; good, 6 a 6½ cts.; medium, 5½ a 5½ cts.; common, 5 a 5½ cts.; culls, 4 a 4½ cts.

PORK.—No. 1, 7½ a 7½ cts.; No. 2, 7 a 7½ cts.; medium, 6¼ a 6½ cts.; common, 6 a 6½ cts.; culls, 5 a 5½ cts.

HOGS.—Western, 5½ a 6½ cts.; State, 5 a 6 cts.

FOREIGN.—The Inman Line steamer, City of Paris, towed by the steamer Aldersgate, arrived at Queenswharf, where the City of Paris was disabled, occurred on 25th, and was caused by the breakage of the low pressure cylinder of the starboard engine, the flying pieces of metal forcing the bulkhead and disabling the port engine. The vessel was saved from sinking by the City of Paris, and the crew and passengers were held. It is said that there were thirty-two hundred tons of water in her hold.

A despatch dated London, Third Month 31st says: It is now stated, on the highest official authority, as well as on the basis of common gossip in Parliament and at the clubs, that the Queen is about to resign the step of abdication the British throne. The recent reception of the Prince of Wales by the German Emperor has had a great effect on the aged Queen, who is now convinced that her son ought to have a chance of showing his fitness to rule. The Queen's recent loss of her life, which is certain to be short. The Queen's bodily infirmity is increasing, and she is so

rapidly running, to flesh that massage is necessary to assist her breathing. One strong objection to the Queen has to abdicating is the contingency of being called ex-Queen. She wishes to assume the title of Queen Regnant for the rest of her life.

The bill dealing with the purchase of land and congested districts in Ireland is printed. It bears the names of James Haughey and Madden. The bill covers 53 pages, contains 75 clauses, and is divided into four parts. The first part deals with the sale and purchase of land, the second with congestion, the third with the constitution and jurisdiction of the Land Department, and the fourth with enactments proposed. The bill provides that in the event of the guarantee being insufficient to pay a dividend on landed stock, the Exchequer may make a temporary advance for the purpose. The cash guarantee is to be paid to the guarantee fund annually, and the contingent is to be paid only if required. Each portion of the guarantee fund not required, shall be carried to a reserve fund, which is not to exceed £20,000, or paid to local taxation accounts. The limit of an advance is fixed, roughly speaking, at a sum equal to 25 years' purchase.

Michael Davitt has compiled terms for the settlement of the Lifford case. The two sides have agreed to resume work immediately.

Henniker Heaton, M. P., has received a telegram from Australia stating that the genuine Sir Roger Tichborne has been discovered at last.

The strike movement in Spain is spreading. Throughout Catalonia 49,000 men have quit work, and it is expected that many more will soon join the strikers. Fears are entertained that all the factories in Catalonia will be compelled to close their doors. There is a strong Anarchist element among the working-men.

A despatch from Lisbon, dated Third Month, 31st, says the Government will have a majority of 40 in the new Cortes.

The resignation of Comte Herbert Bismark has been accepted, and Baron Eberstein has been accepted and has been nominated to succeed him as Imperial Minister of Foreign Affairs.

Mountain Villagers in Switzerland are retreating to the valleys, because of the imminent danger of enormous avalanches.

Persia has granted to Russian financiers the refusal of all concessions granted for the construction of railways in Persia and Afghanistan.

The Brazilian coffee crop is reported as middling. It is estimated that 150,000 tons will be available for export.

A contract has been made between the Government of Guatemala and Mr. P. representative of a French syndicate, for the construction of the Northern Railroad of Guatemala, extending from the Capital to the Atlantic Ocean.

NOTICES.

The next meeting of THE FRIENDS' TEACHERS' ASSOCIATION will be held at 140 North Sixteenth Street, Philadelphia, Fourth Month 5th, 1890, 2 P. M.

Programme:

1. Last words on the Grammar Question.
2. Examinations. Bro. A. Thos. Smith, Normal School, West Chester, Pa.

DIED, at his home near Dillon, Marshall Co., Iowa, on the 8th of Second Month, 1890, OLI TOSTENSEN, aged 61 years, a member of Staverang Monthly Meeting of Friends. He was a kind husband, loving father, and strongly attached to his family of Friends, who resided at his home near Abney, Miami Co., Indiana, from the effects of paralysis. Third Month 18th, 1890, MARY, wife of Nathan Pearson, aged 63 years and 6 months (lacking 10 days), a member of Westfield Monthly Meeting, (Smaller Body). She had been afflicted with paralysis for the past five years; the last two years of her life she was blind. She expressed the wish that she could die, and said there was nothing in her way; and we humbly believe that she is at rest with the saints and angels in heaven.

—, on the 20th of Third Month, 1890, HANNAH R., wife of Dr. Charles E. Hopkins and daughter of the late Dr. Charles E. Hopkins, died at the Monthly Meeting of Friends of Philadelphia for the Western District.

—, Third Month 22nd, 1890, MARY, daughter of Gilbert and Eliza H. McGrew, of Harrisville, Ohio, aged 2 years and nearly 6 months.

Incidents and Reflections.—No. 218.

INDIAN TRAITS.

An additional anecdote is preserved of Judge Dean, of Oneida County, N. Y., whose preservation from death was mentioned in the last number of this series.

"In 1792 or 1793, an Indian who had by some means the Dutch name of Han Yost appended to him, and who married a granddaughter of the celebrated Scaandoa, was discovered about noon, by Judge Dean and family in the highway, some 50 or 60 rods from his house, coming towards it on the run, evidently intoxicated, and giving the death whoop. When arrived at the house, he immediately entered, passed through the kitchen to the sitting-room, where Judge Dean was, and demanded money which he pretended the judge owed him. Judge Dean told him, he owed him nothing, that he had ever paid his red brothers every cent that was their due; that he had never speculated out of the Indians. Han Yost replied that if he would not let him have the money he would take his life, and drew his knife, that constant companion of the savage, and made towards him. Dean's wife, though in feeble health, was a woman possessed of uncommon strength and fortitude of mind, now caught up one of those long, heavy, iron-handled shovels, that graced the corners of the broad-backed fire-places of the early settlers, and placed herself directly between her husband and Han Yost, and was evidently about to strike a blow which probably would have cleft the skull of the savage, considering the weight of the weapon, and the cause which nerved the arm that wielded it. Judge Dean, quick as thought, foreseeing and wishing to avoid future consequences, said, "my dear, don't strike, don't strike," which stayed the arm that held the weapon. She, however, kept her post between her husband and his foe, kept the Indian at bay, while the judge coolly drew his handkerchief from his pocket, wrapped it around his hand, then quickly darted past his wife, and succeeded in securing the knife. Judge Dean was now on equal ground, and his opponent was too far intoxicated to make a very stout resistance, he shortly had him confined in the cellar, where the fumes of the liquor soon caused him to fall into a sound sleep, from which he did not

awake until the next morning. At that time he humbly begged to be released, and promised to behave better in future. After having regained his liberty, he very humbly asked the judge's pardon, and said, 'He never could be thankful enough that they had prevented his taking the life of his very good friend.'

"At the time of Judge White's arrival in Oneida County, an old chief named Han Yerry, resided at Oriskany, who, during the war had acted with the royal party, and who had been dubbed with the title of 'Colonel,' probably from his having held a commission of that grade from the king. One day he called upon the judge with his wife, and a mulatto woman belonging to him, named Lane, who acted as his interpreter. After some little conversation, the colonel interrogated the judge with: 'Are you my friend?' 'Yes,' replied the judge. 'Well, then,' said the colonel, 'Do you believe I am your friend?' 'Yes, Han Yerry,' was the reply, 'I believe you are.' The colonel then rejoined, 'Well, if you are my friend, and you believe I am your friend, I will tell you what I want, and then I shall know whether you speak true words.' 'And what is that you want,' inquired the judge. The colonel then pointed to a little grandchild, the daughter of one of his sons, then between two and three years old, and said: 'My squaw wants to take this pupoose home with us to stay one night, and bring her home to-morrow, if you are my friend, you will now show me.'

The feelings of the grandfather at once upon in his bosom, and the child's mother started with horror and alarm at the thought of trusting her darling prattler with the rude tenants of the forest. The question was full of interest. On the one hand, the necessity of placing unlimited confidence in the savage, and entrusting the welfare and the life of his grandchild with him; on the other, the certain enmity of a man of influence in his nation, and one who had been the open enemy of his countrymen in their recent struggle. But he made the decision with the sagacity that showed he properly estimated the character of the person with whom he was dealing. He believed, that by placing implicit confidence in him, he should command the sense of honor which seems peculiar to the uncontaminated Indian. He told him to take the child; and, as the mother, scarcely suffering it to be parted from her, relinquished it into the hands of the old man's wife, he soothed her fears with his assurances of confidence in their promises. That night, however, was a long one; and during the whole of next morning many and often were the anxious glances cast up the pathway leading from Oriskany, if possible to discover the Indians and their little charge, upon their return to its home. But no Indians came in sight. It at length became high noon; all a mother's fears were aroused, she could scarcely be restrained from rushing in pursuit of her loved one. But her father represented to her the gross indignity which a suspicion of their intentions would arouse in the breast of the

chief; and half frantic though she was, she was restrained. The afternoon slowly wore away, and still nothing was seen of her child. The sun had nearly reached the horizon, and the mother's heart had swollen beyond further endurance, when the form of the friendly chief and his wife, bearing upon her shoulders their little visitor, greeted its mother's vision. If a mother reads my tale, she can tell more perfectly that mother's feelings, as she clasped the little one once more to her bosom, and felt its warm heart pulsate to her own. The dress which the child had worn from home had been removed, and in its place, its Indian friends had substituted a complete suit of Indian garments, so as to completely metamorphose it into a little squaw.

The sequel of this adventure was the establishment of a most ardent attachment and regard on the part of the Indian and his friends for the white settlers. The child, afterwards—Eells, of Missouri, the widow of the late Nathaniel Eells of Whitesboro, still remembers some incidents occurring on the night of her stay in the wigwam, and the kindness of her Indian hostess.—*Annals of Oneida County.*

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 283.)

Fifth Mo. 14th.—I was at Westbury Monthly Meeting to-day, which was large yet not lively. I thought that too many were at ease in Zion, and so contented. Next day was at Jerico Monthly Meeting, pretty well in health; had a good meeting; an inward calm felt, yet poor in spirit. The 16th I had a small meeting at John Serrings, long in gathering, but it ended well.

17th.—Next I had a large and comfortable meeting at Rockaway; but two members of our Society present. My Master was pleased to be mouth and wisdom. Blessed be his great Name. Human wisdom is by no means sufficient for this work. On First-day at Flushing, I, with some others, did believe there is need of great caution in making additions, when things are left well in a meeting, lest, from a desire to help the work, we may do harm. I leave this as a caution.

19th.—I visited a school, and had a solid opportunity therein. Next day had a large, instructive meeting at Newtown; but few Friends attended. A Presbyterian preacher, near the close of it, said, "He was comforted in sitting with us, and fully united with the doctrine delivered; requesting a strict observation thereunto, without which," he said, "no man can be saved; that it was the doctrine of Christ himself, and as old as the creation." I understood he had not been at one of our meetings before, and did bear a good character.

Passing from hence over to New York, I was the next day at Friends' Preparative Meeting there. I had close labor, both with men and women, craving, that as the Yearly Meeting was near coming on, they might be well guarded in conduct and conversation: that the good

cause might not suffer, nor the honest enquirer be turned out of the way.

The two following days, I visited divers families in the city, to my comfort. After that, I attended all the sittings of the Yearly Meeting held here. It was believed to be a favored season, much counsel was administered, both amongst the men and in the women's apartment.

31st.—When the Yearly Meeting concluded, I went to my quarters to wait for further direction what to do next, and where to go.

Sixth Mo. 1st.—Feeling my way to open, I went to Flushing Meeting again, which was a favored season. From hence I crossed the Sound to the main land, having a meeting at West Chester the 2nd; laborious, and not large, but it ended well.

3rd.—I was at a large and favored meeting at Mamaroneck. As I pass along I have many solid opportunities in families. The next day, at the Purchase, I attended their Preparative Meeting, where I had close work. Life and zeal for the good cause are not always found among those who are plain dressed.

On the 5th, in the morning, I set out for Rhode Island. It was a trying season; I was unwell, and having near two hundred miles to go, and not any houses of my friends on the way, I thought I had occasion to look towards my final change; but, after riding about 47 miles, I found my strength and faith renewed, and my love to God increased—blessed be his name forever!

I have many serious thoughts as I pass; because of my appearance outwardly, I am a wonder to the people. I remember I have to advise others not to be ashamed of the cross of Christ, nor deny Him before men; so I feel an inward calm. It arose in my mind, "Let them that mock, mock on; but mind thy business—that is enough for thee." The Lord makes hard things easy.

7th.—The road through Connecticut is stony. After riding to-day about thirty miles, I got to a Friend's house. This to my weary body was comfortable. The next day I was at meeting at Stonington; it consisted mostly of those who did not profess with us. I clearly see human wisdom will not do the Lord's work. Great have been my strippings and poverty of soul; yet I feel better.

9th.—I was to-day at Westerly meeting, which was small, being wet weather. I had a solid time in a family. Some may, perhaps, lose the benefit of their friends' company, by being over-anxious to provide for them. This may serve as a caution. The two days next following, I was at Richmond and West Kingston meetings; the latter was large; and have had several solid seasons in families.

12th.—I was at South Kingston Meeting—large, but not long in gathering. Those four last meetings are in Narraganset, Rhode Island government. Crossed two waters near three miles each, and came to Newport, on the Island. My beloved friend T. Robinson, kindly took me in; where I lodged during the Yearly Meeting. It held five days. On First-day I visited Portsmouth Meeting, which was large and favored; this Yearly Meeting to not seemed low and exercising. By the time it ended I was poor in spirit.

I had a meeting the 18th, on Conanicut Island; a small house and crowded; yet a favored season. It was thought some of every family on the Island were at this meeting. The next day, crossed to the main, and had a meet-

ing at Tiverton; not large—the weather was wet.

20th.—At Little Compton was a very large gathering, many more than had seats; the people were solid and quiet. Many came to the place we dined at, in the afternoon, young and old, who were not of our Society. We had a solid sitting with them, in which several were broken into tears. Parting in feeling love, we had cause to magnify the great Name.

The next day, at New Rochel, I had a solid, quiet meeting. The house did not contain the people. The 22nd, had a large meeting at Center; and another, large and satisfactory, in the afternoon, at Newtown. On the day following, one at Ponaganset, not so large.

24th.—At Bedford, I thought our meeting was dull and heavy, by reason of a drowsy, lukewarm spirit, I was afraid some who sit forward are not clear. Next day, at Long Plains, and in the afternoon, at Cushnet, we had large meetings.

26th.—In much inward poverty I went on board a vessel bound for Nantucket Island. It is called sixty miles by water, and the passage somewhat dangerous. I thought myself a little like Jonah; but we reached Nantucket the next day, and attended the Select Meeting there. I believe it was a favored season. The day following was their Monthly Meeting; large. I had a solid time, both with men and women, to my comfort and theirs. On First-day was two large meetings, in measure comfortable; and the sitting of the ministers and elders the next day was favored.

Seventh Mo. 1st.—This was their Quarterly Meeting. I had a solemn time, both with men and women Friends; divers things had crept in amongst parents and children, to their own hurt and injuring Truth's testimony.

The 2nd, in the afternoon, I had a solid conference with parents and heads of families; close work. The life and power seemed to be too much wanting in divers under a plain dress.

On the next day, forenoon, I had a meeting in the other meeting-house—there being now two in the town of Nantucket—and in the afternoon, a solid, humbling season with the young women collected, not to be forgotten. There appears to be a large number of that class here.

4th.—This day I had three meetings: first, at the eighth hour, with the young men collected. It was large, but insensibility of real good seemed to prevail too much. Second, at two in the afternoon, with the black people, both Negroes and Indians, who are much mixed in this place. This gathering was large and satisfactory. And at five in the afternoon, we had those gathered who were not members of any religious society, with such others as chose to come. This was a large meeting, held to the honor of Truth as I believe, and ended to my consolation. Next day I rode out on the Island about six miles, had a solid time in a Friend's family, and, on returning, saw near 500 cattle; these feed on a common, and are under herdsman's care, who bring them up to be milked.

On First-day I attended two meetings; and visited several aged, sick and infirm people, to their comfort. The next day, taking affectionate leave of my friend in the morning, I went in a vessel about thirty miles to an island called the Vineyard, and landed at Holmes's Hole. The following morning, I was poor in spirit, endeavored to be still, and say but little, as I saw little, believing human wisdom is not sufficient to direct our ways. We had a solid meeting here, though not large. I went over night to William

Coffin's. On the 9th, went to Woods's Hole, in a boat. Here I parted with my friend, Jacob Mott, who was with me some time, and met with my friend Thomas Rotch, who proposes being my companion for a time. He brought my horse to me.

10th.—At Falmouth; we had a meeting, thought to be the largest ever held in that place, and the people so solid and becoming.

(To be continued.)

FOR "THE FRIEND."

Historical Notes, Respecting the Society of Friends.—No. 11.

Some of the controversies in regard to doctrines, in which the early members of the Society of Friends were engaged, were on points that still continue to be subjects of difference between their successors at this day, and many other professors of the Christian religion. One of these was and is, as to the true position of the Bible, or Sacred Scriptures of the Old and New Testament. Many at that time asserted them to be the *primary*, or principal rule of faith and manners; while Friends asserted that to Christ, from whose Spirit they emanated, that title was pre-eminently due.

Isaac Pennington, writing to one of his correspondents in 1670, says: "There is a great dispute between us and professors, concerning the *rule*: which they hold forth the Scriptures to be. Now, truly, I could wish, from the depth of love in my heart to them, and from my desire of their good, that the Scriptures, rightly understood by them, *were* their rule; and not their own reasonings, conceivings and apprehensions upon the Scriptures. But yet, if it were so, they must needs assent to me that the Spirit of Life—that the Truth which lives in the heart—that the law written by the finger of God in the inward parts—is nearer and more powerful than the words, or outward relations concerning those things in the Scriptures. There is the measure of life to be received; there is the Spirit of life to be received—there is a well of life, from which pure life springs up, to be received and enjoyed by them that truly and rightly believe.

"The Lord, in the gospel state, hath promised to be present with his people; not as a way-faring man for a night, but to *dwell in them and walk in them*. Yea, if they be tempted and in danger of erring, they shall hear a voice behind them saying, 'This is the way, walk in it.' Will they not grant this to be a rule, as well as the Scriptures? Nay, is not this a more full direction to the heart, in that state, than it can pick to itself out of the Scriptures? Truly, the Lord hath poured out his Spirit upon his sons and daughters, in and by this precious dispensation of Truth, and by the pure seed. And the Spirit which gave forth the words is greater than the words; therefore we cannot but prize Him himself, and set Him higher in our heart and thoughts, than the words which testify of Him, though they also are very sweet and precious to our taste."

Robert Barclay says, "We account the Scriptures, above all deceit or equivocation, the most excellent writings in the world." Nevertheless, because they are only a declaration of the fountain, and not the fountain itself, therefore they are not to be esteemed the principal ground of all truth and knowledge, nor yet the adequate *primary* rule of faith and manners. Yet they are and may be esteemed a *secondary* rule, subordinate to the Spirit, from which they

have all their excellency and certainty. They testify—that the Spirit is that guide by which the saints are led into all truth."

Samuel Fisher was a man of liberal education, and officiated as a stated preacher for a time, until he became convinced of the truth of the spiritual views of religion held by the Society of Friends. He was afterwards engaged in some controversies in defence of his principles, both by words and by pen. He wrote a long treatise entitled the *Rustic to the Rabbits*, in which he reviews the writings of four persons who had attacked the Society of Friends. The subject of the relative positions of the Scriptures and the Spirit, as the rule and guide of men, is largely unfolded in this work. One of his opponents, high in office in the established church, who regarded the Bible as the foundation of all religious knowledge, carried his opinion to such an extreme as to say that, if we admitted that the sacred writings varied from the original by a single letter, or vowel point, it would destroy all certainty, and the whole foundation of the church. The absurdity of such a position is shown by the admitted fact, that of the original documents on which the Bible is founded, it is universally agreed that not one has survived the ravages of time; and the various copies of them which have come down to us, differ from each other in thousands of minute points, although they agree in the statements of the most essential facts and doctrines. Under these circumstances, mankind would be poorly off, if they could not rely upon the direct teachings of the Spirit of Christ, as spoken of by the apostle John, "The anointing which ye have received of Him abideth in you, and ye need not that any man teach you; but as the same anointing teacheth you of all things, and is truth and is no lie, and even as it hath taught you, ye shall abide in Him."

Christ is the Leader and Teacher of his people: both by the commands and precepts which He delivered when personally on earth, and which have been recorded and handed down to us for our comfort and instruction; and in a more closely personal and important sense, by those instructions which He directly communicates to the attentive and obedient soul.

He is spoken of as a *Light*, because He thus illuminates mankind. "Christ was the true Light, which lighteth every man that cometh into the world." And the ground of condemnation, as He himself declared, is "that Light is come into the world, and men loved darkness rather than light, because their deeds were evil." Whatever comes from Him, and bears the impress of His Spirit, whether in vocal discourses or in written documents, will be received and honored by those who are living in obedience to Him. This is the true ground of our respect for the Holy Scriptures, and the foundation of their claim to be obeyed and followed. For the experience of many generations confirms what Paul wrote to Timothy—"Every Scripture inspired of God is also profitable for teaching, for reproof, for correction, for instruction in righteousness."

As to what books should be recognized as canonical, that is acknowledged by the Church as properly belonging to the Holy writings, and therefore of authority; it has been a disputed point from the earliest ages to the present time. Eusebius, in the fourth century, in his Church History, speaks of certain books as being universally recognized by the Church—and certain others as not universally recognized—among which he mentions the Epistles of James and

Jude, the second and third Epistles of John, the second of Peter, and the Revelations of John—all of which are now received as canonical—and the Book of the Shepherd (Hermas), the Revelation of Peter, the Epistle of Barnabas, and others, which are now excluded from the canonical list. The Roman Catholic Church admits as canonical the books of the Apocrypha, which are rejected by the Church of England, and by most Protestant sects. Inasmuch as the Scripture itself nowhere specifies of what books it is composed, and the decision of this question was supposed to be made by one of the ancient councils, in whose judgment we do not often place entire confidence, there is little to justify the assertion of those who maintain that the Scripture is a *closed canon*. For, as R. Barclay well remarks, "If it should please God to bring to us any of those books which, by the injury of time, are lost, which are mentioned in the Scriptures—as, *The Prophecy of Enoch*, *The Book of Nathan*, etc., or the Third Epistle of Paul to the Corinthians, I see no reason why we ought not to receive them and place them with the rest."

The Scriptures depend for their authority on the Spirit of Christ. It is because we believe that "holy men of old wrote them as they were moved by the Holy Ghost," that we receive them as an outward rule for controversies among men. But as the Holy Spirit still operates on the minds of men, we have no reason for doubting that it may still impress on the mind of the children of God the duty of uttering spoken or written declarations, which may justly be regarded as Divine exhortations or commands. Indeed, we believe that this is often the case, and we can accept without hesitation the claim made by Edward Burroughs when he said, "We witness to have received, according to measure, the Spirit of the Prophets, from which they spoke, and the Spirit of the Apostles, by which they spoke, which is Christ made manifest in us. For by the same Spirit of Christ we do declare against these abominations now, as the holy men of God did then; for God and his Spirit is the same as ever was." J. W.

Honesty of the Fijians.—One thing which strikes us forcibly in all our dealings with these people is their exceeding honesty. Day after day our goods are exposed in the freest manner, more especially on Sundays, when for several hours not a creature remains in the house where we happen to be staying, which is left with every door wide open, and all our things lying about. Boxes and bags which are known to contain knives and cloth and all manner of tempting treasures, stand unlocked, and yet, though the village is invariably within a stone-throw, we have never lost the value of a pin's head. I confess, however, it was some time before I could stifle all qualms of misgiving on seeing a crowd of what some people might call savages swoop down on our property and carry it off piecemeal to the boat or village, as the case might be; but when day after day passed and nothing was ever missing, I gradually acquired the implicit trust which has proved so well founded.—*C. F. Gordon Cunnings at Home in Fiji*.

MILDRED RATCLIFF expresses it as her decided opinion that "sleeping Quakers are stumbling-blocks to honest inquirers after the truth, and that they are denying the faith that would give the victory over all such weakness."—*Wm. Evans' Journal*.

The Want of our Time—Life.

The want of our time is life, not the natural life of the creature, which is indeed alive and active in the outward creation, in all the busy works of men, be they commendable or otherwise. Neither is there any want of religious activity in the various ways in which man can possibly engage for the professed good of himself or his fellows, which is an evidence of life and animation. But down deep and under all there is a felt want of those deep stirrings that are of God, and that bear their evidence with them of whose creation and begetting they are—the sense of that life stirring the soul that leads into doing and that has the mark and the seal of Him upon it, who is Lord of lords and King of kings.

There is a sense that solemnizes and prostrates the thoughts and all that is of man in the dust, that hushes and subdues the proud spirit of man, so that however high his knowledge and attainments, he is humbled and brought low before God under a sense of his nothingness and inability to move aright, and so to place himself at the footstool of mercy not only to find mercy, but at mercy's call to be found answering the requirements of that gracious Being, who hath met him and so humbled him and given him a sense of himself and of his own condition and needs, as to lead him to cry out, "I have heard of thee by the hearing of the ear but now mine eye seeth thee, therefore I abhor myself and repent in dust and ashes." This was not the experience of a vile sinner, but of one who had known above many of God's wondrous dealings with him; for of him had God spoken as "my servant Job."

There is therefore an experience to be known in the deep things of God, that leads to self-abhorrence even after much has been known of mercy and of love. And it is this experience that I feel is the great want, in this day of many works and of great religious activity; and the feeling is with me that many feel the want but hardly know why and wherefore it is.

The gauge of our experience is too much by that of our fellows, and there is not a willingness to follow on to know the Lord in his going forth as of old. Hence we sleep and are sickly, and are as babes and not as young men, and strong men, and as fathers and mothers in the church to nourish and to cherish, and to feed as well as to oversee those over whom God would have us as the moulders and formers, being subject unto Him by the perfect subjection of ourselves, fitted to know and to hold true subjection in his will and in his way. For if our own spirit taketh hold of the things of God, however right in themselves they may be, and by the strength of our own spirit and mind we move in the things of God, the service, the work, the labor being of ourselves, cannot please and serve Him, whose judgment is in righteousness.

Hence my counsel, in that sense that I feel, is to wait, to seek, to watch, to pray, for the fresh incoming of God's life and power, the seal of sonship and of renewing in Christ and by Him, and so a knowing of the power of the blood which is the life, to cleanse the soul from all sin, that He who was and is the true light, may still by his enlightening power, give life—renewed life—to do the Father's will. Thus will God be glorified—Christ in his work will be honored, and glory and praise by the spirit will be given to Him who thus worketh to the honor of the Father, Son, and Holy Spirit. For however weak and unworthy, it is the willing and the

obedient to the voice and command of God, that shall eat the good of the land.

The Achans and the Ananias and Sapphiras would thus be searched out in our midst by the power of God being felt in our assemblies to bring to light every hidden thing. Then would truth arise as of old, and the world would be held with a loose grasp, and its favours less sought and its frowns less feared, and the word of God would have free course and be glorified. Then would we not be a declining people, for God being in our midst, the power to attract would be again known as of old, and the ways of Zion would no longer mourn because none do Zion to the solemn feasts.

Ah, there are delights still in store for God's children—the waiting ones, the watchers at wisdom's gates to know the voice of the beloved of souls when He appeareth. Then shall these arise and shake themselves as from the dust of the earth, and put on their beautiful garments, rejoicing in the Lord and in the God of their salvation. Amen shall my soul, even so come Lord Jesus in thy power and glory.

CHARLES W. THOMSON.

1319 Wynkoop St., Phila., Third Mo. 1890.

FOR "THE FRIEND."

A Visit to a Corundum Mine.

Through the kindness of a friend in Chester County, Pa., I was enabled on the 11th of Third Month to visit a corundum mine in Newlin Township, about seven miles west of West Chester.

The roads were somewhat muddy, but there was a great difference in this respect, in different parts of our journey; in the portions first passed over, the rocks beneath were of a micaeous slaty structure, and the soil resulting from their decomposition was somewhat sandy, and contained but little clay to hold the water and to be worked into stiff mud by the horses and wheels of travellers. But we met with other portions where feldspar was more abundant in the rocks, and where the resulting clay rendered travelling much more laborious. My intelligent companion also called my attention to the fact that roads, which had been made but a few years, were worse than those which had been in use for a long period. This he explained on the principle that in old roads the loose soil had gradually been washed out of the roads by the frequent action of rains, leaving behind a larger proportion of the more solid material.

The mine we were visiting is in a serpentine bed, about a mile in length and 800 feet in width, extending in a northeast and southwest direction, and known as the "barrens." It was readily distinguished from the surrounding country, being overgrown with Indian grass and scattered red-cedar trees—the signs of a soil of but little value to the farmer. The serpentine rock comes near to the surface, and the layer of decomposed material on the surface is but thin, for this rock is singularly slow to decompose, and the silica and magnesia, of which it is mainly composed, furnish but little food for the plants which farmers value.

The rocks which prevail in the vicinity of this serpentine bed, are of a form of gneiss, containing considerable mica and talc. How the serpentine came to be formed is a point on which geologists are by no means agreed, but it is not difficult to suppose that in the chemical changes to which the rocks had been subjected, the talc may have furnished the magnesia which forms so important a constituent of serpentine; and that the corundum, which is pure alumina,

may have been derived from the mica or feldspar, which contain it in combination with silica and smaller proportions of other materials.

Corundum was discovered at this place many years ago, in detached lumps, on the surface of the ground; one mass in particular was of great dimensions, and weighed many thousand pounds. But little was known of its use in this country at that time, and some of it was shipped to England, where it found a market, and word was received to send on all that could be procured at a certain price (3 or 4 cents a pound.) Its present value is much higher. The product of the Chester County mine is pulverized into powder of various grades of fineness, and used for making wheels for grinding purposes.

It is one of the hardest of known substances, being inferior in this respect to the diamond only. It is about four times the weight of water. The Oriental gems, sapphires, ruby, topaz, emerald, and amethyst, are all varieties of this substance; and some of them are greatly admired and highly valued. The corundum of Chester County is obtained mostly in a massive form, somewhat like granite, an aggregation of small corundum crystals, with mica, feldspar and other materials. In mining, shafts are sunk to sixty or more feet in depth, and then horizontal passages worked in the vein. The greatest depth thus far reached is about 140 feet. The material that is raised to the surface, is then sorted out, all that contains enough of the corundum to be worth working is reserved, and the rest thrown on to the dump heaps. The rock is then crushed and powdered, and the impurities, being lighter than the pure mineral, are separated by a blowing process, as chaff is taken out of the wheat.

In the Pennsylvania Geological Survey, mention is made of a narrow dyke of trap rock, intersecting the serpentine.

The specimens of this dyke which I obtained did not resemble any trap I had ever seen, but seemed more like a hard serpentine. Whatever its real character may be, it is an interesting fact that the corundum vein lies along it, on its southern side.

FOR "THE FRIEND."

"Ye Must Be Born Again."

These words of our blessed Saviour, which were spoken many years ago, remain to be as full of meaning now as they were then. "Ye must be born again,"—the spiritual birth—without which no one can enter the kingdom of God. Would it not be well for some of us in an especial manner to duly consider these words? Some may say, how is it to be brought about? By taking heed to that which is made known in the secret of the heart, by Him who said, "I am the way, the truth, and the life." He it is that will create in all those that are willing to give their all unto Him, this new birth; a new feeling that has not been experienced before. But when that which is begotten of Him is felt, it must be cherished and nurtured; and when there is a willingness to receive, and the fallow ground of the heart has become broken up and soft and pliable, and the false rest destroyed, it is then in a condition to receive the good seed, the word of God, which will be handed forth from season to season, when there is a hungering for the spiritual food. But to experience a growth in these things, there must be a continuance in seeking for this "Pearl of great price," not giving out by the way, but a daily walking in his fear, a fear of offending

Him, a holding out to the end to win the crown. "Him that cometh to me I will in no wise cast out," were the words of our Saviour; and He will not cast out any of those that put their whole trust and confidence in Him; but will be a helper in every time of need. Then let those that have not yet tasted of the Lord's goodness, close in with the day of their visitation, and come and know Him for yourselves and find out that there is a quiet habitation, a place of retreat to go in times of trial, which the worldling knows not of.

Blessed habitation. The prophet Isaiah, speaking of it, says, "Look upon Zion, the city of our solemnities; thine eyes shall see Jerusalem a quiet habitation."

This new birth brings into subjection the passions of the natural man and makes him more like a little child. Ah! to be transformed from a state of nature to a state of grace, is it not a desirable change? And who has the praise but God alone when any experience this? For it is He that leadeth to repentance. "God is no respecter of persons," but He will use all alike that are willing to bow their necks to his yoke, and such will find that He will make hard things to become easy; and that which seemed to be bitter, will be sweetened by his loving hand. Therefore, to some I would say, let the time past suffice; and press forward and enlist under the banner, and if faithful He will lead thee on step by step, until thou hast become a valiant in his army.

E. C. COOPER.

Third Mo., 1890.

GROWING OLD.

SELECTED.

They call it "going down the hill" when we are growing old;
And speak with mournful accents when our tale is nearly told;
They sigh when talking of the past, the days that used to be,
As if the future were not bright with immortality.

But it is not going down; 'tis climbing high and higher,
Until we almost see the mountain that our souls desire;
For if the natural eye grows dim, it is but dim to earth;
While the eye of faith grows keener to discern the Saviour's worth.

Who would exchange for shooting blade the waving, golden grain;
Or wish the corn is fully ripe, would wish it green again?

And who would wish the hoary head, found in the way of truth,

To be again encircled with the sunny locks of youth?

For though, in truth, the outward man must perish and decay,

The inward man shall be renewed by grace from day to day;

Those who are planted by the Lord, unshaken in their

Shall in their old age flourish, and bring forth their choicest fruit.

It is not years that make men old: the spirit may be young

Though fully threescore-years-and-ten the wheels of life have run.

God has himself recorded in his blessed Word of Truth

That they who wait upon the Lord, they shall e'en renew their youth.

And when the eye, now dim, shall open to behold the

And ears, now dull with age shall hear the harps of heaven ring,

And on the head now hoary shall be placed the crown of gold,

Then shall be known the lasting joy of never growing old.

—The Church Union.

FOR "THE FRIEND."
THE EMPTY CHAIR.

What memories of by-gone days in quick succession steal
Upon my spirit, which, perchance 'twere idle to reveal,
Yet still they seem to haunt me so, and with me to re-
main—
They only leave me for awhile and then return again,
And as I sit in thoughtful mood and view the empty
chair,
How does my heart in secret feel the vacancy that's
there.

And is there not in every home some vacant seat to
show
Which calls forth memories of the past and thoughts
of long ago?
Ah! yes, within the humblest cot affection dwells as
sure
As in the lordly mansion, and it may be just as pure;
Then do not deem me weak because their sympathy
I share,
As they point to it perchance with tears, the vacant
empty chair.

It has ever seemed a hallowed thing and still shall
seem to be,
The chair whereon a mother sat and nursed us on her
knee,
And kissed us and some story told to stay our childish
fears,
And make our hearts rejoice again and wiped away
our tears;
And who can paint a picture, in colors rich and rare,
To move the feelings of the heart like her vacant
empty chair?

When I think of all the hopes and fears which crowded
on the brain,
When sitting in that empty chair ne'er to return again,
I hear within my inmost soul a voice which seems to
say—
"These hopes and fears which now are thine shall
soon have passed away."
Then burthen not thy heart too much with aught of
anxious care,
Thou knowest not how soon *thou'lt* leave a vacant
empty chair.

Then wherefore should our hearts be fixed on tran-
sient earthly things,
Which, even when they are possessed, no lasting trea-
sure bring;
Does not each vacant seat we see a silent lesson teach
As solemn and as true methinks as prophet e'er did
preach—
And they are in the spirit land and we shall meet
them there,
The loved ones who have occupied each vacant empty
chair.

EDWARD ALLEN.

A Friend from Ohio, sends us the following
extract out of the Friends' Library, volume 1st,
page 128, concerning the institution of the Dis-
cipline; to show the care that Friends early took
in regard to marriages. It is taken from an
epistle of George Fox in 1669, and is as follows:

"Such as marry by the priests, or marry by
the world, those that are unbelievers, go from
God's power and spirit, and his joining, and do
break the law of God in their marriages, which
forbade to join with unbelievers; and therefore
with the light of Christ Jesus, are such judged
and condemned, and must come through con-
demnation and judgment," 1669.

George Fox was, (with other Friends) con-
cerned to the setting up of the Discipline, under
the same power and spirit, as he was in preach-
ing the gospel; and the Discipline was found to
be very needful to keep the Society in a healthy
condition. Those that come amongst us, to be
of any service to us, must be convinced of our
doctrines and principles. Otherwise, we would
only add to our numbers without increasing our
joy.

*The Testimony of Stillwater Monthly Meeting,
Ohio, concerning MARY JONES, who departed
this life in the 74th year of her age.*

As it has pleased the Head of the Church to
call from words to rewards this our beloved
Friend, we feel concerned to give a short ac-
count of her.

She removed, with her husband, from Georgia
to this State, in the early settlement thereof;
and although they had to encounter the difficul-
ties and privations attendant on settling in a
new country, yet she was diligent in the attend-
ance of our religious meetings, and one that was
concerned therein for the arising of that life
which is the crown and diadem of all our reli-
gious assemblies. She acceptably filled the
station of an overseer and elder for several
years; and being faithful in the occupancy of
the talents entrusted to her charge, her Divine
Master was pleased to bestow on her an addi-
tional gift, the ministry of the word of life and
salvation; and being sensible that this Divine
gift cannot be exercised in the wisdom and will
of man, she was careful not to move therein,
without witnessing the fresh anointing from on
high, whereby she was enabled to minister in
the newness of the Spirit; to the edification
of her friends. The young and rising gener-
ation were particularly the objects of her tender
solicitude; whom she was often constrained to
invite to submit to the cross of Christ, whereby
they might experience a growth in grace, and
in that knowledge which accompanies salvation;
and be prepared to fill their respective allot-
ments, to the praise of the Head of the Church
and to the peace of their own minds.

She was a firm believer, as the rightly exer-
cised among us have ever been, in the doctrines
of the Holy Scriptures; was frequent in the
reading of them, and often pressed upon Friends
this Christian duty. She returned from the
Quarterly Meeting, in the year 1835, in feeble
health, and though her bodily strength seemed
gradually to decline from that period, yet she
was so far supported as to be able, though not
without much fatigue, to make a visit to a dis-
tant branch of our Quarterly Meeting, where
she was lively engaged publicly to espouse
the cause of her dear Redeemer. Soon after
arriving at home, she was entirely confided to
her room, where she manifested much satisfac-
tion in the visits of her friends and frequently
spoke of the comfort their sympathy afforded
her. On one occasion, however, she said,
"Around a sick bed is no suitable place for
friends to meet and talk about their business
and domestic affairs. It has been a burden to
my mind."

In the fore part of her confinement, which
was of several weeks' duration, she was closely
proved with poverty of spirit; and being
brought to take a retrospective view of her
life, was made to lament over her short-com-
ings. But He who saw meet thus to prove her,
did not forsake her in this hour of trial, but
enabled her to hope in his mercy, and afresh to
realize in the line of experience the apostolic
testimony, "Not by works of righteousness
which we have done, but according to his
mercy He saved us, by the washing of gener-
ation, and the renewing of the Holy Ghost,
which He shed on us abundantly, through Jesus-
Christ, our Saviour." And He, whose ear is
ever open to the cry of the needy, was pleased
in his own time to appoint unto her, "beauty
for ashes, the oil of joy for mourning, and the
garment of praise for the spirit of heaviness;"

and in this precious clothing of mind she con-
tinued until the evening of the 22nd of Twelfth
Month, when the frail tabernacle sunk under
the weight of disease, and her purified spirit
was released, we trust, to join the innumerable
multitude which came out of great tribulation,
and had washed their robes and made them
white "in the Blood of the Lamb," in ascribing
salvation to our God who sitteth upon the
throne, and unto the Lamb.

Rods of Memory.

The number for First Month, 1890, of *New
Englander and Yale Review*, contains an article
by W. Churchill of notes made during a resi-
dence in the islands of the Pacific Ocean, which
furnish an interesting illustration of the aid to
memory derived from associating statements or
speeches with certain material objects. The
former use of wampum-belts for this purpose by
our American Indians is a well-known instance
of the same artificial memory, if it may be so
called. But all these inventions of savage na-
tions are far less effective than the writing of
civilized people, because they depend on the
memory of an individual, and when he has passed
away, the wampum-belt or other similar aids are
unintelligible to the other members of the tribe,
unless the events designed to be recorded have
previously been committed to memory by them.

When cruising about among the Solomon Is-
land, wishing to land on Bouka, Churchill sent
a present and a message of friendship to its chief,
through the head talker of a friendly chief who
lived on the opposite side of the strait. This was
a useful precaution, as the inhabitants are
cannibals, and might not receive in a friendly
spirit a visit from one whose purpose was un-
known to them.

The messenger belonged to an hereditary class
of talkers, whose business it was to preserve the
memories and traditions of the past. In this,
they use sticks about the size of lead-pencils,
called "rods of memory." On the third day the
man returned and made his report. He began
by untying a bundle of rods of memory from his
hair, and laying one at a time before him, re-
peated the words and ideas associated with it in
his mind. This was his narrative:—

"It was the time when the sun stands highest
and the cocoa-nut shades its own roots. It was
two suns before this. It was before the house
of me the head talking-man of the chief. I was
within. You, oh son of the men beyond the
horizon, came before my house and you said:
Head talking-man of the chief, I am a chief
from beyond the horizon, and I have come to
visit my brothers who live in the sea. Go you
to the chief who lives in Bouka across the nar-
row water, and carry to him this beyond-the-
horizon cloth, these hard berries and this to-
bacco. Tell him I will come to see him and will
give him many treasures. Go now and do my
message. Then I crossed the narrow water in
my canoe and went to the house where lives the
chief of Bouka on the north side. It was morn-
ing when I found him. I came before him and
I told him the words of your message as it was
upon the rods to which I had committed it."

"Then he took the presents and he bade me
give this message: Tell the chief from beyond the
horizon that he may come to Bouka; his people
must not eat my people, nor will my people eat
his; we will be friends and one people. Give
him this boar's tusk, this whale's tooth, and this
basket of yams. This is the message on the
rods."

A week later, says Churchill, the talking man

of the Bouka chief repeated this conversation without the change of a word, and after the lapse of a month or more, the original messenger was pleased at a chance to show off his powers, and repeated the whole thing without a slip or a change. Asked as to how he remembered he simply said, "The message is on the rods, I see it and lift it off. That is all."

Natural History, Science, etc.

Tobacco Poisons Meat.—Cases of poison due to meat which seemed thoroughly wholesome, have sometimes occurred and have remained unexplained. In the Revue d'Hygiene, M. Bourrier, inspector of meat for the town of Paris, makes a valuable suggestion. He describes his experiments with meat impregnated with tobacco smoke. Some thin slices of beef were exposed for a considerable time to the fumes of tobacco, and afterwards offered to a dog which had been deprived of food for twelve hours. The dog, after smelling the meat, refused to eat it. Some of the meat was then cut into small pieces and concealed within bread. This the dog ate with avidity; but in twenty minutes commenced to display the most distressing symptoms of acute poisoning, and soon died in great agony.

All sorts of meat, both raw and cooked, some grilled, roasted and boiled were exposed to tobacco smoke and then given to animals, and in all cases produced symptoms of acute poisoning. Even the process of boiling could not extract from the meat the nicotine poisoning.

Grease and similar substances have facilities of absorption in proportion with their fineness and fluidity. Thus the fats most readily influenced by tobacco are, in their respective order, the fat of horse-flesh, of pork, of veal, of beef, and finally of mutton. Hashed meat is, of course, more easily affected than larger pieces; thus, a few pufts of smoke directly projected on to sausage-meat will give it a characteristic and unpleasant taste. The juices of meat are equally dangerous. The juice squeezed out of some veal perfectly saturated with tobacco-smoke was injected into a rabbit, and death resulted in a few moments. Fresh killed meat is more readily impregnated, and stands in order of susceptibility as follows: Pork, veal, rabbit, poultry, beef, mutton, horse. The effect also varies considerably according to the quality of the tobacco—and the end of a cigar or pipe has the most injurious effect on any meat that may be exposed to the smoker. A few jets of smoke from Belgian tobacco on a dish of raspberries will suffice to destroy the delicate flavor of the fruit and to render it uneatable. All these experiments would seem to denote that great care should be taken not to allow smoking where foods, especially moist foods, such as meats, fats, and certain fruits, are exposed.—*Lancet.*

The Record in the Brain.—All persons are consciously and unconsciously molding in their brain cells records innumerable. Things that we reck not of leave their impress there; stamp comes upon stamp like the various writings in an old palimpsest, in which the lower writings seem entirely obliterated until they are revealed by the processes of the antiquarian. So, when the vision of the higher centers is sharpest, it can see through the maze, and it may in a moment decipher the records of a lifetime; or, when the restraining influence of the higher centers has been removed during delirious unconsciousness, muttered words, broken sentences, or clearly spoken periods, and mayhap even

acts, give to bystanders glimpses of the passing visions. When we are trying to recollect a thing, we are simply searching here and there among the records in the brain to see if by any chance we can find the leaf that we want to read. What an index catalogue is to the searchers in a library, that to the searcher of brain records are the laws of association; and precisely as a purely alphabetical or arbitrary catalogue may assist the student, so may an artificial system of mnemonics assist the brain-deliver. The separateness of memory and consciousness is also illustrated by some of the extraordinary phenomena which are connected with the so-called local memories. Among the local or isolated memories the most distinct and sharply cut is the memory for words. The forms of aphasia known as word-blindness and word-deafness are very strange. The sufferer from word-blindness can write and will understand what is said to him; he will talk to you and perhaps talk you to death; but hand him a book, a newspaper, or even the letter he himself has written, and he cannot read a word. Thus, an active man of business having written a letter, giving directions for an important matter, attempted to read it, in order to see if it was correct, but was astounded to find that he could not make out a single word. He had been suddenly stricken with word-blindness. The sounds of the words and the words themselves had remained to him, but the recollection of the written forms of the words was gone. In a case of word-deafness the person can talk and write, but although his hearing is perfect, he cannot recognize the spoken words. The sound of the voice is plain to his sense, but conveys no thought to him.—*Dr. H. C. Wood, in The Century.*

A Faithful Brute Companion.—About ten o'clock last night, as officer Maloy of Station 2, Cambridge, was patrolling Main Street, he sighted a man resting against a building for support. Approaching him, he found that he was badly intoxicated, and at his feet lay his faithful English bull-terrier. The officer took the drunk in and conveyed him to Station 2, the dog meanwhile following close to his master. He was consigned to a cell and the dog accompanied him. The inebriate threw himself upon the bunk, and the dog jumped up and took a position at his head, guarding him zealously, and from time to time tenderly licked his face. It was another instance of the proverbial faithfulness of canines.—*Boston Herald.*

Flora of Sandwich Islands.—The Hawaiian or Sandwich Islands have an area of about 6,000 square miles, and are 2,000 miles from the American coast, their nearest terrestrial neighbor. Its highest mountain, Mauna Loa, is 13,805 feet. Just within the tropics—it has therefore a very varied climate, within a comparatively limited area. This gives great variety to its flora, a work on which has been issued in London by the friends of the late Dr. Hillebrand, long a resident of the Islands. There are 844 species of flowering plants, and the unusually large proportion of 155 ferns, or vascular cryptogams. Of the total of near one thousand, 653 are found nowhere else but in these Sandwich Islands—a proportion but slightly exceeded in some parts of western Australia. The proportion of shrubby plants is quite large, and some representatives of low-growing genera of other regions grow to an immense size here. There is a dock that reaches twenty, or occasionally forty feet; a plantain

(*Plantago*) that forms a stem six feet before branching; a geranium with a stem twelve feet high and four inches thick, and plants not removed from our common chickweed that are bushy shrubs.—*Exchange.*

Items.

What a European War Would Involve.—The *Times* Paris correspondent, M. Blowitz, writes as follows:—"At this moment everything in Europe gives reason to hope for a prolonged peace. Other considerations, however, of a less elevated character, perhaps, but still more imperious, force themselves on the meditations of rulers. In the present state of national armies the question arises, What would be the inevitable consequences, material and financial, of a conflict? And rulers must have drawn back terrified at the reply to that question. The rapidity of the mobilization of the successive contingents of which a national army is composed, has become, it is believed erroneously according to some, justly according to others, the essential condition of success. The rapid mobilization of the contingent of nations like France, Germany, and Russia, which, having reached their final military development, can each send into the field nearly two millions of men, and which desire to mobilize them completely, and rapidly to be prepared for all contingencies, represents a first immediate expense of 500,000,000. The support of these successive contingents in a mobilized state represents a cost of 1,000,000,000."

Now, as in the present political state of Europe, a conflict between any two nations implies the entrance of the other three great nations on the scene of action, it may be estimated that such a conflict would cost, in the first place, 2,500,000,000, to set the movement in operation, and 500,000,000,000, to meet the monthly expenses. The struggle might be prolonged for a year, or for seven months. We should then have, for the five great Continental Powers implicated, an enormous number of milliards of francs irretrievably lost, Europe being thus ruined for a century.

"But this is merely a commencement. All the other European Powers, great or small, would have to be drawn in. Belgium, the Netherlands, Denmark, Sweden, Norway, and Denmark, are obliged to shoulder their arms to prevent being submerged, Roumania, in the first place, and then the other Balkan States are obliged to defend themselves against surprises during the war. Montenegro cannot and will not remain a simple spectator, and the war compels Turkey, already carried along by the movement in the Balkan Peninsula, to imitate the rest of Europe. England herself, in spite of her isolated position, will be obliged to watch events which may occur in the North Sea, in the Red Sea, in the Mediterranean, and of which the reaction will be felt in the most distant countries, in India as well as in Africa. England will be compelled therefore to be ready in a state of readiness, and all Europe, from one end to the other, must be ready to advance towards a general conflagration. I need not say that I am not the inventor of this picture. It has haunted and, fortunately, it still haunts the statesmen at the head of affairs, and the figures I have employed are those which in certain countries have been brought by the War Minister under the notice of the Finance Ministers."

"I have not yet shown the life of Europe stopped by a tremendous convulsion. All the springs of industry would dry up, because the whole abled-bodied section of the nation, being under arms, would cease to do the work required in time of peace. It is not, then, to be wondered at, in presence of the present state of the world, that the result of the latest theories of military organization, that the young German Emperor himself has become an advocate of peace, that he not only wants it for Germany, but that he has calmed the irritation in Austria, and that during his long conversations with King Humbert he whispered to him ideas of peace and of a notable reduction of armaments, and quite recently by the sympathetic and friendly language used by the King of Italy to the French Ambassador, designed to remove painful impres-

sions, and to bring about a cordial understanding between the two nations separated by the Alps. It must also be admitted that France herself has been a powerful promoter of the ideas of peace of which we have to record the appearance. The Exhibition, by causing a general feeling friendly to France, created at the same time a sentiment in favor of Peace. The elections confirmed the effect produced by the Exhibition in reducing to twofoldness firebrands leagued under the leadership of a chief who, destitute of political capacity and unable to realize his impossible promises, would have sought a diversion in some senseless enterprise."

Funeral Reforms.—The *West Chester Local News* says:—"The agitation in favor of less cost and extravagance in funeral expenses, which was exaggerated by both press and pulpit some years ago, has not been fruitless. A Philadelphia undertaker, in speaking of the change in the conduct of funerals within recent years, says that an average bill for the burial of a rich person used to be fully \$600, whereas it is now only \$400. The cost of a funeral of a well-to-do person was from \$200 to \$400, six or eight years ago, but now it is not over \$150."

"There has been great curtailment in the number of carriages, but in other directions, such as the lavish display of crapes and flowers, the change is most marked. Long lines of carriages, as a seeming invitation and inducement to the whole neighborhood to take a free ride, are now looked upon as mere vulgar show. Good and even expensive caskets are used, but the best taste is in the direction of as little ostentation as possible. Private internments are much more prevalent than formerly, and in these cases only enough carriages are hired to accommodate the immediate relatives and friends of the deceased. The reform has been materially helped by the example of persons of wealth and refinement and no one who has good judgment and independence of character need be led into the folly of stunting himself and his family for a whole year in order to have a 'fashionable' funeral."

The Power of Public Sentiment.—The *New York Press* thinks that significant evidence of the power of public sentiment is found in the Assembly Manual for 1870 as prepared by the clerks of the two Houses at Albany. There are a number of saloon-keepers in New York City among the members of the Assembly. Not a single one of them has recorded himself as a saloon-keeper by occupation. The occupation of each member is set down by the clerks as it is given to them. It is not possible that they would willingly falsify the record. When saloon-keepers give their occupation as hotel keeper, manufacturers, merchants, contractors, and so on, it may be taken as fair evidence that they feel the shame of their business and the weight of public sentiment, which says it is indecent for them to sit in the body that makes laws for the regulation of their traffic.

THE FRIEND.

FOURTH MONTH 12, 1890.

In the *Century Magazine*, we find an article on "Revelation and the Bible," commenced in the number for the Twelfth Month, and continued in four successive issues of that periodical, which contains some interesting matter.

Commencing with a quotation from Chillingworth—"The Bible and the Bible only is the religion of Protestants," (a sentiment which is not to be received without considerable modification), the writer proceeds to explain what the Bible is—"a voluminous collection of miscellaneous writings. They emanate from numerous authors, not all of whom are known even by name. These writings were all of them composed long ago and at different times—a portion of them at dates extremely remote." "Obvious imitations belonging to time and place, and to

varying types of mind and culture, are stamped upon their pages." Yet they are pervaded by the spirit of holiness. In reference to this proof of their claims to regard, G. P. Fisher well observes: "Where perceptions, moral or religious, are confined to no single breast, where they are awakened in a vast number of human beings, and arise to a great degree independent of time and place, and of peculiarities of race and education; and where, moreover, they stand related to the noblest development of character as their concomitant or fruit, they must be allowed to have a catholic worth." "Clerical bias, as that having a critical eye, to cast aside all prejudice, he perused the books of the old and New Testaments—each book as a whole and also as an integral part." "And need I say," he testifies, "that I have met everywhere more or less copious sources of truth, and power and purifying impulses; that I have found words for my inmost thoughts, songs for my joy, utterances for my hidden griefs, and pleadings for my shame and feebleness? In short, whatever finds me bears witness for itself that it has proceeded from a Holy Spirit, even from the same Spirit which of old entered into the prophets."

Yet it is a fact that cannot be denied, that there are in the Bible many obscure passages; and, especially in parts of the Old Testament, some moral difficulties. The true explanation of these things, is that the Scriptures are not the source of religion, but that religion made the Scriptures. As to the New Testament, Christianity had an organized existence, and was spread abroad in the world before any part of it was written. It was the men who believed in Jesus and followed Him, that He styled "the Light of the world," and "the salt of the earth." It was the living interest felt in the sayings and doings of Christ that led to the preparation of the gospel narratives by Matthew, Mark, Luke and John. "As to the Epistles, the churches had to be founded before they could be addressed." "The fundamental reality is not the Bible. It is the kingdom of God."

The preservation of four contemporaneous accounts of the events connected with the appearance of Christ in the flesh, give an assurance of the substantial accuracy of the record of those events, such as is scarcely to be reached in reference to any other narrative of so ancient a date. Yet, if it could be proved that some mistakes had been made by those writers, it would not affect the substance of the Christian religion.

One of the most remarkable events of modern times was the French Revolution, near the close of the last century, and the destruction of those privileges of the aristocracy which had long exerted so depressing an influence on the working classes. An acute critic might challenge the accuracy of an historian who related those events; but his criticism would not alter the fact of the emancipation of the peasantry from their old burthens. So, the reality and value of the religion of Christ remain unimpaired, amid the assaults of doubters and infidels of every shade of opinion.

This subject is treated of at great length by Samuel Fisher, one of the early members of the Society of Friends, in his *Rusticus ad Academicos*, a reply to several persons who had attacked the principles of the Quakers. In this elaborate work, he continually calls attention to the fact, that it is the Spirit of Christ, which is the source of and foundation of religion, and that the authority of the Bible depends on its being the utterances of those who spoke or wrote from the influence of that Spirit. If these utterances had

been perverted or misapprehended, in the lapse of ages, or had been originally modified by the imperfections of the channel through which they were communicated, the religion of Christ, which is the effect of the work of his Spirit in the hearts of the obedient, would still remain unchanged.

Without endorsing every sentiment advanced in the extended essay of Professor Fisher, it is very interesting to find him on this subject of Divine inspiration, approaching so closely to the true standard as held by the Society of Friends. This is further evidenced by the following quotations from his article:

"Our convictions of religious truth do not take their rise in the understanding. There is such a thing as spiritual discernment. There are truths which shine in their own light. They impress the soul directly with the evidence of their reality. They will sometimes flash on the mind after long waiting and fruitless groping in the dark. Christ did not say: 'Blessed are men of talents, blessed are those who have the ability and leisure for investigation; blessed are the keen logicians.' But He said: 'Blessed are the poor in spirit; 'blessed are the pure in heart; 'blessed are they that hunger and thirst after righteousness.' His first followers were not distinguished for their intellectual powers. They were unlearned men. It is found in these days not unfrequently, that men eminent for their intellectual powers and acquisitions are unbelievers. If the secret of unbelief, or its inmost source be the alienation of the heart from God, what is there in mere intellectual culture to furnish a remedy?"

FOR "THE FRIEND."

Summary of weather observations taken at Westtown, Chester Co., Pa., for Third Month.

Mean Barometer,	29.909
Highest "	30.404 on 9th.
Lowest "	29.159 " 28th.
Mean Temperature	37.8
Highest "	72.5 on 12th.
Lowest "	5.8 " 7th.
Greatest daily range of temp.	28° " 28th.
Least " " "	0° " 14th.
Total Precipitation	4.68 inches
Total snow fall	9.50 "
Number of days rain or snow fell 17.	
Number clear days	7.
Number fair days	12.
Number cloudy days	12.
Prevailing direction of wind North-West.	

SUMMARY OF EVENTS.

UNITED STATES.—The public debt statement shows a decrease during Third Month of \$1,389,857. Total cash in the Treasury, \$628,764,793.

The steamer *Utoga*, from Mediterranean ports for New York, with 535 steerage passengers, put in at Halifax, on the 4th instant, after a stormy passage of 19 days from Gibraltar, short of coal and provisions. The last bullock on board had been killed, and when she reached Halifax those on board "were on the last barrel of flour."

It is stated that the Newfoundland Government has decided to repeal the Bait act, and heretofore French, American and Canadian fishermen will be permitted to freely purchase bait in Newfoundland harbors upon payment of tonnage and license fees, but the exportation of bait to St. Pierre is prohibited.

On the 7th instant, the House Committee on Coinage authorized a favorable report of a bill for the recoinage of the subsidiary coins of the United States, which are abraded, worn, mutilated, defaced and otherwise unfit for circulation, or are of denominations for which there is no current demand. It is further provided by the bill, that silver coins of less denomination than one dollar shall hereafter be a legal tender in sums not ex-

ceeding twenty dollars in all payments of public and private debts, and when held by any national bank may be counted as a part of its lawful reserve.

The House Committee on Railways and Canals has ordered a favorable report on Representative Payne's bill providing for the construction by the U. S. of a ship canal around Niagara Falls. The route—about 25 miles in length—is along one of the lines already surveyed, and the locks are to be 400 feet long by 80 in width. Otherwise the canal is to be sufficient in size to permit of the passage of vessels which can pass through the St. Mary's canal when the new locks are completed. According to the plans submitted, the canal is to cost \$23,000,000.

Chief Maves, of the Cherokee Nation, who had been in Washington for some time, has just returned to the Territory for the purpose, it is said, of calling a meeting of the Cherokee Council to take some action relative to the terms and conditions upon which they will cede their surplus lands to the Government.

It is reported that the Indians on the Coast of Oregon in Washington are suffering for food, and that the aged and infirm are liable to die unless supplied with food at once. There are about 1300 Indians on the reservation.

"A stream of Chinese," says the San Francisco correspondent of the New York Herald, "is now pouring across the Mexican border into California. These coolies are brought from China, transferred at San Francisco to the Esenada steamer, and landed in Lower California, ostensibly to work in the mines. They seldom remain more than a few weeks, when they usually start back northward."

A municipal election was held in Milwaukee, Wisconsin, on the 1st instant. The so-called Bennett law, enacted by the last Legislature, requiring the teaching of English in all schools, private and parochial as well as public, was made an issue. The Republicans were in the majority, and the Democrats were pledged to its repeal. The Lutheran and Catholic clergy were very active in support of the Democratic candidates, who were elected by 5000 majority.

The Iowa House of Representatives on the 5th instant, went into Committee on the whole on a pending bill, and, after much debate, resolved—51 to 49—to report to the House in favor of indefinite postponement. Let the friends of temperance rejoice, but let them also be intently vigilant hereafter.

The Providence R. I. Journal has published a bill for the purchase of votes in that city. Names have not been used, but "vouchers can be secured to show that the figures are correct, which are that 3100 of the 21,000 voters will sell, and have in previous elections sold, their franchise for from \$2 to \$10 each. Wards 1, 3, 5, 6, 7, 8, 9, and 10, each having 2000 voters, could sell their franchise for \$20,000 will elect a candidate at any price in the city. The Tenth Ward has 600 voters to be influenced by money."

The fruit crop promises to be unusually large in California this year, and the greater part of it will probably be dried, and growers there have learned by experience that dried fruit pays better than canned."

According to figures published in the Enquirer, Cincinnati packed 25,569 hogs less the past season than during the season of 1858-59.

The booting and shoemaking business is quite a business in New York. Not only is there a big demand for wooden soled shoes required by workers in certain trades, but for the wooden sabots such as are seen in pictures of life abroad. French and German women are the principal buyers of wooden shoes. These shoes cost about \$1.25 a pair, and they are mostly worn in the East side tenement district.

A wind and sand storm stopped travel on the Atlantic and Pacific Railroad in New Mexico a few days ago, and two to four feet deep lodging on the track.

There is a cholera epidemic in this city, 48 cases more than during the previous week and 18 more than during the corresponding period last year. Of the foregoing 208 were males and 182 females; 55 died of consumption; 37 of pneumonia; 37 of diseases of the heart; 14 of inflammation of the brain; 14 of convulsions; 13 of cholera; 12 of typhoid fever; 11 of paralysis and 10 of inanition.

Markets, &c.—U. S. 3 1/4, 103 1/2, 4 1/2, 122 1/2; currency 6 1/2, 116, 125.

Wheat sold in small way to spring on a basis of 11 1/2 to 16 cent per pound for middling uplands.

FEEDS.—Winter bran, choice \$17.50; do, fair to good, \$17.47-25; spring bran, \$16 a \$16.50.

FLOUR.—Western and Pennsylvania super, \$2.00 a \$2.40; do, do, extra, \$2.50 a \$3.00; No. 2 winter flour, \$3.00 a \$3.50; Pennsylvania family, \$2.00 a \$2.50; do, \$3.50; Pennsylvania roller process,

\$3.30 a \$4.00; Western winter, clear, \$3.75 a \$4.00; do, do, straight, \$4.10 a \$4.35; winter patent, \$4.35 a \$4.50; Minnesota, clear, \$3.50 a \$4.00; do, do, straight, \$4.00; do, do, patent, \$4.65 a \$4.90; do, do, favorite brands, \$5.00 a \$5.10. Rye flour sold in a small way at \$2.80 a \$2.90 per barrel.

GRAIN.—No. 2 red wheat, 84 1/2 a 85 1/2 cts.; No. 2 white wheat, 81 1/2 a 82 1/2 cts.; No. 2 white oats, 30 1/2 a 31 cts.

BEEF CATTLE.—Extra, 5 a 5 1/2 cts.; good, 4 1/2 a 4 3/4 cts.; fair, 4 1/4 a 4 1/2 cts.; common, 3 1/2 a 4 cts.; fat cows, 2 1/2 a 3 cts.

SHEEP.—Extra, 6 1/2 a 6 3/4 cts.; good, 6 a 6 1/2 cts.; medium, 5 1/2 a 5 3/4 cts.; common, 5 a 5 1/2 cts.; culls, 4 1/2 a 4 3/4 cts.

LAMBS.—Extra, 7 1/4 a 7 1/2 cts.; good, 7 a 7 1/2 cts.; medium, 6 1/2 a 6 3/4 cts.; common, 6 a 6 1/2 cts.; culls, 5 1/2 a 5 3/4 cts. HOGS.—Good, 6 1/2 a 6 3/4 cts.; State, 5 1/2 a 6 cts.

FOREIGN.—The most notable British political utterance of the past week was made by Lord Rosebery. He spoke in Edinburgh, a stronghold of Home Rule, only less strong for that principle and for Gladstone than Dublin itself. What he said was this:

"I believe that the next election, whenever it comes and whatever result it may have, will be all probability, for our generation at least, settle the Irish question."

In accordance with the views expressed by the German Emperor recently, a Cabinet order has just been issued forbidding duelling in the army except in cases where a combat of honor of the highest order of the circumstances has been referred, shall declare that a duel, in their opinion, is necessary.

The *Peter Lloyd* declares that the fact that Emperor William intends to follow his grandfather's advice and base his foreign policy on friendliness with Russia, causes anxious solicitude of the authorities of the Russian Empire. Advice received in London on the 4th inst., from St. Petersburg, reaffirm the reports of the serious conduct of affairs in Russia. They declare that the Czar is suffering from a nervous fever. The scheme for the Russification of Finland is received as a certain thing. The Czar is, however, said to be certain to follow. The advisers further say that all the universities in Russia have been closed by the Government. The students at the St. Petersburg University made an attack upon Lieutenant General Gresser, Chief of the St. Petersburg police, who went to the University to order the disturbances, and treated him in a very rough manner.

The strike of the dockmen at Plymouth has ended. The employers have agreed to pay the wages demanded by the union. The correspondent of the New York Times, in his dispatches of Seventh-day last, says with regard to the Czar and the affairs of the Empire:

"Things have been so wantonly and persistently mismanaged everywhere that society is falling to pieces about his ears. He knows no way of meeting this universal convulsion save by a snout, the gallows, torture and by exile, and the worse the situation grows the more crudely and unwisely does he use his weapons of repression."

"But they no longer repress the tide of irritation but disclose it, and they repress it higher all the time. By comparison with him people look back upon his father as an ideal liberal ruler, and they began with so much significance to call him a martyr to political liberty that his son has been obliged to prohibit the usual demonstrations in honor of his emancipation of serfs."

Russia has notified Turkey that the sum paid on account of the arrears of the war indemnity are not sufficient, and that, therefore, if the new loan which Turkey proposes to raise is satisfactory, she will demand the balance on the payment of her claims before the money is devoted to other purposes.

Dom Pedro, the ex-Emperor of Brazil, has refused to accept the proceeds of the forced sale of his Brazilian property, ordered by the Provisional Government. He has been quite sick, but at last accounts was convalescing.

A dispatch from the City of Mexico says that rich oil discoveries have been made in Queretaro.

The Dominion Government is about to organize an expedition to explore the regions of the far North near Athabasca. Professor Dawson, who has passed through the territory, says that if the indications are correct it is the largest oil-bearing district in the world, comprising nearly 150,000 square miles.

Twenty-five hundred Mormon immigrants from Utah have just arrived at Lee's Creek, Northwest Territory, this spring.

NOTICES.

WESTTOWN BOARDING SCHOOL.—The Committee in charge of this Institution will meet in Philadelphia, on Seventh-day afternoon, the 11th inst., at 2 o'clock. Fourth Mo. 1860. WM. EVANS, Clerk.

Friends attending the Yearly Meeting can be furnished with simple meals, both before and after the sittings of the meeting, at moderate charge (15 cents) in the second story of the central part of the Arch Street Meeting-house. Meals will also be furnished for those attending the Meeting for Sufferings, and the Select Meeting, the previous week.

Arrangements have been made with the Pennsylvania Railroad Company, by which Friends attending our approaching Yearly Meeting can obtain excursion tickets to Philadelphia and return, from any station on the following railroad routes, at the rate of 2 cents a mile each way; except that no such tickets will be issued at a less rate than 25 cents, viz: Pennsylvania Railroad (main line) as far west as Pittsburg, Philadelphia and Erie Railroad Division, Northern Central Railway, and United Railroads of New Jersey Division, Westchester and Delaware, and Potomac Railroad Company, or Philadelphia, Wilmington and Baltimore Railroad Company, on any day from Fourth Month 14th to 26th, 1860, inclusive, and make the return coupon good until Fourth Month 30th, 1860, inclusive.

The Reading Railroad Company has also kindly offered Friends the same rate (2 cents per mile each way), and for the same dates as above specified.

Application should be made either personally or by mail, to Jacob Smedley, 304 Arch Street, Philadelphia, or to Thomas C. Hogue, West Chester, Pa., for orders on the Ticket Agents—only of which must be delivered to the agent whenever a ticket is obtained. These orders inform the Ticket Agent at whatever station they are presented on the above railroads, that the bearer is entitled to a ticket to Philadelphia and return, at the rate of 2 cents per mile. Friends of each neighborhood who are desirous of the number likely to be needed, and obtain them and distribute among the Friends, it would make less work for those having the care of them. When they are to be forwarded by mail a 2 cent stamp should be sent to pay the postage.

These orders are ready, and Friends will please obtain them as early as they conveniently can.

The Annual Meeting of the "ASSOCIATION OF FRIENDS OF PHILADELPHIA AND ITS VICINITY FOR THE RELIEF OF THE COLORED FREEDMEN," will be held at Twelfth Street Meeting-house, Second-day evening, the 21st inst., at 8 o'clock.

Friends generally are invited to attend. WM. H. HAINES, Secretary.

Philad'a, Fourth Mo. 4th, 1860.

THE TEMPERANCE ASSOCIATION OF FRIENDS OF PHILADELPHIA YEARLY MEETING.—The Annual Meeting of the Association will be held in Twelfth Street Meeting-house on Fourth-day evening, Fourth Month 23rd, at 8 o'clock.

Friends are cordially invited to attend. J. SNOWDEN RHOADS, Secretary.

A dwelling attached to a store, in a central location, for rent on favorable terms. Apply to 941 Spruce Street.

DIED, Third Month 4th, 1860, at Lincoln, Addison Co., Vermont, of heart failure, DANIEL GOSLIN, in the 80th year of his age. His health had for several months previous to his decease been gradually failing, and he often expressed a belief that his exit would be sudden. He was a firm believer in and a faithful upholder of the principles and practices of early Friends, and an elder in that Society for many years. He believed he was concerned to be found ready for the change when the end of life should come, and although he was taken suddenly from our midst, his family and friends have the comforting assurance that, through redeeming mercy, he has been gathered to the garner of everlasting life.

At Winona, Ohio, on Third Mo. 20th, 1860, BARCLAY D., son of Joseph and Esther Masters, aged 14 years and 3 months. "Blessed are the pure in heart, for they shall see God."

FOR "THE FRIEND."

Incidents and Reflections.—No. 219.

FAITHFULNESS.

A Memoir of Phebe Smith, published in *Friends' Intelligencer and Journal* mentions that about the year 1796, she and two sisters moved to Philadelphia from the neighborhood of Downingtown, Pa. Their joint stock amounted to about \$40, and from motives of economy they made the journey on foot. They rented a small house, and opened a store, the proceeds of which, added to their earnings from needlework, enabled them to live comfortably.

Their manners were kind and conciliatory, and these traits brought many customers, inasmuch as they were enabled to converse freely as to their wants, which oftentimes was found to the purchasers of considerable advantage.

The practice of attending a religious meeting near the middle of the week, in which they had been brought up, still remained with them as an obligation; and now, in view of the gratitude they felt for the extendings of Divine regard, as they conceived it to be, in the promotion of their temporal welfare, they were the more earnest to continue it as a high religious duty. Under these feelings, when the meeting hour arrived, although customers might be in the store making purchases, they would be kindly but firmly informed that the hour had arrived for their attendance on their meeting; that they must now close their store; and all further business must be relinquished until that service was over. In like manner, the store was also closed at the time of Quarterly and Yearly Meetings, as they considered they had then another duty to fulfil,—that of promoting the social comfort of Friends who might be in attendance from distant places. This practice, which was never swerved from during their business life, formed a marked feature in their religious character, and becoming generally known, added to the strength of their credit among the wholesale merchants and traders of the city, with whom they had almost daily dealings, as their quick sales required the store to be frequently replenished.

Stephen Grellet mentions that during a religious visit in England, in 1812, "I had particularly to minister to one, then entirely unknown to me, but for whom I felt much in spirit. She was a young woman who has undergone

deep trials at her own home, under the secret baptisms of the Lord, which she has endured, none knowing the great exercise of her mind. This afternoon she exchanged her gay attire for the plain garb of Friends, which she had believed for some time the Lord required of her; but she now felt that the full time for her doing so had come. Hearing of that appointed meeting she had come to it, and manifested great brokenness of heart. I was afterwards with her to much satisfaction, for she evinces that she is one of those children who are taught of the Lord."

If this young woman had not yielded in simple obedience to what the Spirit of the Lord showed her to be a Divine requisition, she would have had no just ground to hope for any growth in grace, or for that precious tenderness of spirit with which she was favored.

In the life of Loveday Henwood it is said, that while reading the account of the woman of Samaria, in John iv., her attention was arrested by the expression, "Now we believe, not because of thy saying," &c. "Although I had admired the Scripture language which was spoken by the Quakers, and thought there was great simplicity in it, yet I had never felt that any part of it belonged to me until that moment, neither was I then thinking anything about the language. As soon as I had pronounced in my heart the single word 'Iry,' it was as fire in my bones, or as a sharp two-edged sword. I could not proceed. I trembled and it was made known to me that this was the simple, pure and uncorrupted manner in which God had instructed his creatures to have communication one with another. O! the purity and beauty that was opened to my mind respecting it." The first conversation [related to us] that God had with man was thus begun, 'Adam, where art thou?' And all the communication between God and man—with all the prophets and the blessed Jesus, and the apostles, was in the same manner—that I may truly say they were as so many voices calling aloud to me, and saying, 'This is the way, walk thou in it.' But all these things I hid in my heart.

"The requiring of the Lord increased from day to day, to be obedient to Him, and to use the Scripture language. This was indeed trying me as by fire. Many times as I sat in my room, the girls being at work around me, the power of the Lord has arrested me as an armed man, calling aloud for obedience, and I have said in my sore trouble, 'Lord, if thou wilt strengthen me, I will be obedient to thee, before I leave this seat.' But, alas, when spoken to I have answered in my former manner, and again been in much sorrow. I may say for many months my soul was very sorrowful, almost unto death, for had my Holy Father required my life at my hand, I would gladly have given up this instead of saying thou and thee, to a single person. Often when walking in the fields, I have poured out my soul before God, begging for strength to take up this great cross; and often saying in my heart, 'There are many good people who do not

use this language, why may I not please thee without speaking this?' But my reasonings were all vain, for I was made truly sensible that obedience is better than sacrifice, and to hearken than the fat of rams. As sensibly as Paul ever felt that a woe would be unto him if he preached not the Gospel, so sensibly did I feel, that except I gave up to use the Scripture language, I should be a cast-away. Trembling, I gave up, and said, 'My Father, my Father, if I perish on a dunghill, I will be obedient.' The trial was long, and the fire exceedingly fierce; but my adorable Saviour, who said to his immediate followers, 'Take no thought beforehand what ye shall answer, for it shall be given you in that same hour,' was near to help in every time of need.

"Those who employed me in my business were generally the great and rich of this world, in consequence of which my cross was natch greater."

In the works of Samuel Fisher there is preserved a copy of an affecting letter written by one that professed the principles of the Society of Friends, but had yielded to the force of temptation and taken an oath. It is as follows: "My dear friends, I desire to lay before you this my condition in this my fall, that my fall may be no cause for you to stumble, but that you may be the more encouraged to stand; for I have yielded to the betrayer, and so betrayed the innocent seed in me; for I forsok the counsel of the Lord, and consulted with flesh and blood, and so I fell into the snare of the world, and yielded to the covenant; and so I rested satisfied in what I had done, for some certain hours; but when the Lord in his power looked back upon me, then I remembered what I had done; then I remembered that I had denied Truth, which once I had professed, though once I thought I should have stood when others fell. So the terrors of the Lord have taken hold on me, and I lie under the judgments of the Lord. "Now I know and feel that it is better to part with anything of this world, though it be as dear to one as the right hand or the eye, than to break our peace with God.

"Pray for me, for my bonds are greater than yours. EDWARD CHILTON.

Windsor, the 22d of Eleventh Month, 1660."

J. W.

NOTHING could be worse for us than our being permitted to have our own way. Nothing could be better for us than our being induced to walk always in God's way. The constant conflict to which we are subjected in this life is the conflict between our desire to have our own way, and our sense of duty to follow God's way. It is not an easy matter to do what we know we ought to do, day by day. Jesus says explicitly, on this point: "If any man would come after me, let him deny himself, and take up his cross daily, and follow me." He who is determined to have his own way in his ordinary daily life, is going to the devil, whatever he may think is his destination.—*Selected.*

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 297.)

Seventh Mo. 12th.—This was a rainy day; we had a small meeting at Yarmouth, and the next, being First-day, we were at Sandwich Meeting, an exercising season. The day following had a large and much favored meeting at Pembroke.

15th.—At Taunton, we had a meeting in the afternoon; a number came in who did not profess with us, which was to my comfort and theirs. Here is a small old house, and Friends rather declining, I fear.

The day following we rode about 30 miles to Rochester. It is said, no Friends dwell here; but that a certain Benjamin Bump and his party make use of the house, and hold a separate meeting. Feeling desirous to have a meeting, I lodged at an inn; favored with inward quiet, and notice being spread.

17th. We had a large meeting at Rochester. At the close I requested B. B. and his party to stop after others withdrew. None staid with him, except three men and three women. We had a solid season together. After we dined we visited B. B. and his wife to our satisfaction; for things were laid close, and yet appeared to be well taken, so that we parted in love.

My way opening for visiting the families at and about New Bedford, we began the visit on the 19th: First went to see those of the foremost rank, and afterwards all the families of members, and some others who were infirm, &c., in number upwards of 35 families, which was performed in less than six days, to the satisfaction of visitors and those who were visited. My companions in the visit were Thomas and Charity Rotch, with two other Friends, a man and woman. Friends were invited in the love and freedom of Truth, to come out of those customs which accord not with our testimony for simplicity; many of which seem deeply rooted, are prejudicial to the growth of pure religion, and the inward work of regeneration. I was earnestly concerned that the work of reformation might go forward amongst my dear friends, that through the removal of stumbling-blocks and wrong things, the way for it might be more open, and the next generation encouraged and become instrumental in further advancing the cause and testimony of Truth.

24th.—Parting with my friends at New Bedford, in feeling regard and true love, I had a large meeting at Freetown, yet a low season: I feared the people were careless about religion. After this meeting I felt as one without armor; yet oh, this inward support has not left me, blessed be the Lord forever, saith my soul. The next day, at Somerset, I had a meeting, not large, among a people who seemed raw and careless; and the day following, one at Providence, small, yet very exercising: I had some close labor which I thought, perhaps, would scarcely be borne with. But feeling myself not clear, I requested Friends and others to meet again at the fourth hour, afternoon, and if they pleased they might give notice to all the town. I was informed the Governor of Rhode Island, who lives here, went himself to be notified some, though stormy weather, we had a large gathering, solid and favored; close doctrine was delivered, and it appeared to be well taken. Many in this large town seemed to live high, and to be too full of pride. We then had a solid sitting with our friends, to our comfort. A trying day this, yet I believed it ended to the honor of the good cause.

27th.—We had a large meeting at Cranston; but a low time till towards the close; then the pure truth arose into dominion, and the people

became solid. On the next day, at Foster, in a private house, we had a solid season; so many people came to this meeting, they could not all be in the house.

29th.—We were at Providence again, at their Monthly Meeting. I thought it was but a dull season in the business; I felt myself as a pilgrim, poor and stripped; as though I knew little or nothing. The next day at Smithfield Monthly Meeting. This was large, and favored in the forepart, and I thought their business was pretty well managed, (for these times), Truth's cause being but in a low state here. On the day following was held Uxbridge Monthly Meeting, which in the forepart was large also; but rather poor and heavy.

Eighth Mo. 2nd.—Going from hence, we had a meeting at Gloucester, and riding afterwards about nine miles, we had a meeting at Elisha Steer's; it was held under a tree, as the weather was warm. Both these were favored seasons. A man after one of them, who had not been at a Friend's meeting before, said, "The doctrine was such as he had never heard; it was the truth, and could not be denied." He also much approved of the plain appearance I made.

3rd.—This day I had meetings both at Lower-Smithfield, and at Providence again: so large that the houses could not contain the people, the solidity was somewhat interrupted thereby, as the weather was warm. The next day we were at Greenwich Monthly Meeting, which was large, and a laborious time. Then after having a large and favored meeting the day following at Uxbridge-Newton, in an unfinished dwelling-house, we took a passage by water to Rhode Island again, inclining to be at their Quarterly Meeting. On the 6th their Select Meeting was held at Portsmouth; and the next day was the meeting for business; I thought it but a dull time. The day following ministers and elders met again, and I had a time of favor.

8th.—Parting. I then informed them I had some further service in view, though it was not in the common line; when informed what it was, they united therewith. After having a favored meeting on a little island called Prudence, where a few Friends dwelt; (the water about three miles wide), came back to Newport. Here on the 9th we had, with parents and heads of families apart from others, a solid and favored season, not to be forgotten. And one in the afternoon with the young people, which were both large. The way was opened for much solid counsel to be communicated, that appeared to be well taken.

10th.—I attended the meeting at Newport on First-day; and taking leave of my kind friends in the afternoon went back by water to Uxbridge-Newton, a pleasant passage, and a fair wind.

My way seemed open to visit the families in this little town, of such a rare not members of any religious society; three persons besides my companion being willing to bear me company. In about two days we performed the visit upwards of twenty families. I thought their situation appeared to be as sheep without a shepherd, and some of them I hope were sincere seekers of the ways of Zion. The 12th, in the evening we had an opportunity with all those tender people who chose to come together. This was such a time of favor as I believe will not be easily forgotten by some of them; it being like a parting season. The following is the substance of a few lines given me concerning the visit to those families, signed with the names of those who accompanied, viz: "The encouraging counsel and advice of our esteemed friend, were very kindly

received; which was, exhorting us not to seek the law from the priest's lips, but to turn the mind inward to the teachings of free grace, which is given unto all. Through the several sittings the owning of Divine favor was in a good degree evidenced, we believe, to the edification and comfort of many honest enquirers; and having so freely united with him in spirit, according to our measure, we desire to give testimony thereof." Signed by Benjamin Raynold, Daniel Wald, Arnold Weeden.

13th.—We had another meeting in the unfinished house before mentioned, (the owner living out of the town having so ordered it.)

That afternoon we had one also at East-Greenwich, in the Court-house, which was large. Next day at Warwick had a meeting which was thought to be the largest and most solid of any that had been held there. Returning again to Providence, in the forenoon of the 15th I had a meeting with the members of our Society only; and in the afternoon I visited three men who were in the station of public ministers in this town: they appeared to receive me kindly; my concern was that while dissipation and libertinism abound, the leaders of the people might be engaged to promote reformation; but my prospect did not seem to be answered in the disposition of these men. The 16th, in the forenoon, I went to see three other ministers in the place on the same account, who treated me with civility. In the afternoon I visited the Governor, also the first Judge, and one of the Senators of Rhode Island, on account of the folly and wanton dissipation now prevalent; I admonished them to try to begin to make a stand, and to discourage those things; as those of upper rank might have much influence among the people by good example, and by their precepts, if they kept their own conduct clear of encouraging dissipation and lightness. I was of the mind their hands were weak. Though some of them acknowledged a reformation was wanting, and told me they were in hopes my labor would not be all lost.

(To be continued.)

Squirrels.—In one case, when wandering over the downs, we came across a squirrel that was travelling, we presume, from one wood to another, but who was surprised by us in the midst of this great treeless and shelterless expanse. A sudden dip in the ground brought us face to face and some ten yards apart, the nearest tree-trunk being possibly three miles away. He gave a squeak of horror and surprise, and then instead of making off, came right to our feet, throwing himself upon our mercy and generosity in the most evident way—a confidence that we could not but fully respect; so, after some few soothing words and attempts to pat him, which he could not quite stand, our strange interview ended, and we went our respective ways.

An artist friend, who was painting on the rocks near the miner's bridge, at Bettwys-y-Coed, in North Wales, told us that each morning about ten o'clock, a squirrel used to come out of the woods, across the bridge, and disappear again amongst the trees on the other side, and regularly return about three o'clock, as uniformly and methodically as a Richmond season ticket-holder, whose place of business is in the Strand, crosses and recrosses Waterloo Bridge. The miner's bridge, however, is across a foaming torrent, and only two planks wide; and one day, a little before three o'clock, a couple of visitors to the place, possibly in the early days of the honeymoon, but, at all events, happy in

each other's society, and not by any means pressed for time, sat down on the end of the bridge. The squirrel appeared with his usual punctuality, but found his road thus blocked by the unconscious pair. After fidgeting about for some time, in the vain hope that they would go, our friend heard a sudden shriek from the lady, and found that the squirrel, at last grown desperate, had made a sudden rush over her lap, and had cleared the bridge almost at a bound, after, no doubt, going through a tremendous screwing up of his courage before he ventured on the inevitable dash for home.—*Hulaw's Wayside Sketches.*

FOR "THE FRIEND."

The Power and Wisdom of God, and the Power and Wisdom of Man, a Little Contrasted.

Are our meetings for worship held in the power and wisdom of God, or are they not held too much in the wisdom and power of man? These are momentous questions, because spiritual life or spiritual death hangs upon them. If they are held and propelled in the power of man, we may fight and war vehemently against the sins of the world and gain no victory. We may ask in appropriate words for Divine aid, but receive not, because we ask amiss, or for the promotion of our own glory, and not for the glory of Him whom we profess to serve. We may draw high Him in words, while the heart is far from Him; because our labor is in the wisdom and power of man, and not in the power of God. But that which is highly esteemed among men, is an abomination in the sight of God. For God sees not as man sees for He looks at the heart, which while it is under the influence of the deceiver, is deceitful above all things and desperately wicked. We can know it only as it is brought to light by the Spirit of Him who searches all things; yea, the deep things of God. But thanks be to God, all things are naked and open before the eyes of Him with whom we have to do. For He is a discerner of the thoughts and intents of the heart; and his power is over all the powers of the enemy; though he be clothed under the similitude of an angel of light. The Lord knows whether our meetings are held under his power, as in the beginning; or under the power and wisdom of man, and of the deceiverfulness of unrighteousness. He knows whether we are substituting a transformed light, and following it, or following the true light as our fathers did. But we will be tried to see which of the two powers we will follow; whether the power and wisdom of God, or the power and wisdom of man. And we are told "by their fruits ye shall know them." For men do not gather grapes of thorns, or figs of thistles. No, the peaceable fruits of righteousness do not grow on the wild and thorn-pointed branches of the world. But the fruit of the Spirit is love, joy, peace, long-suffering, gentleness, goodness, faith, meekness, temperance. And those who are producing such fruits have crucified the flesh with the affections and lusts because they have been led by the power and wisdom of God, and not by the power and wisdom of man.

How is it with the few remaining veterans of the cross, who are weeping when we remember Zion? Do we not often long to see our places of worship a more quiet habitation? A tabernacle that shall not be taken down? Though it may still have to stand against the buffetings of opposers.

D. H.

The Woods in Winter.

When I walk in the woods in summer I think of the trees as a shelter. They go to form a protection alike against the sun and passing shower. And if I turn from the old cart-path it is but to enter some one side compartment of a great labyrinth of rooms. No one tree calls for observation. They are as the inner walls of a great house, and what they surround alone commands attention. It is going out of doors as much to leave the thick woods, as to pass from your dwelling. But now, during December's bright, cheery, winter days every tree in these same woods becomes my companion. We are exposed to the same sunny sky, and as I wander from one to another, each has its pleasant greeting for me. This has been a life-long fancy of mine. Walk up to a century-old oak, and how promptly it speaks to you of giant strength and sturdy independence; turn then to a stately liquid amber and you are greeted with exquisite grace. I can point out in the old woods here at home the counterparts of many a man I know. The lonely wild apple on a gravelly knoll is as crabbed as my crusty neighbor who begrudges me a few flint arrow heads. I think I should be sored by wandering half a day in a forest of wild apple trees. There is no such feeling when with the oaks, beeches, chestnuts, and silver birch. They recall no unfortunate among one's acquaintance. Every tree of them is content with the world as it finds it, and so too am I when surrounded by them.

The woods were quiet when I entered. Not a twig trembled, and the dead leaves were too limp to crackle beneath my feet. Dainty frost crystals were plentifully strown over the dwarfed bushes by the roadside, and a film of glittering ice with jagged sides reached out from the banks of a little brook near by. Nowhere did the ice reach wholly across the stream, and so was the more beautiful by reason of the inky waters that flowed sluggishly beneath it.

Where, about the roots of a massive beech, the brook had become a little pool, I stood for many minutes, alternately watching the waters that here seemed roused to a semblance of activity, and then listening to the welcome cawing of the over-flying crows. Brook, birds, and trees! Your choice of such good company, and yet there are those who would have gone mad here from loneliness! For the time I gave heed to the brook, wondering as usual what might be beneath the surface, and all the while, as ever happens, the creatures of the brook were wondering about myself. If one turns to the text-books he will find much said of the instinct that leads the lower forms of life to seek a safe shelter as winter approaches. The lower forms of life in this brook had no such intention. First, I detected dainty little frogs—the peeping hyalodes—squatted on dead leaves and yellow pebbles, and so spotted, splotted, and wrinkled were they, that it took sharp eyes to find them. Their idea of a shelter in winter is from enemies, and not the frosty air; and a little warmer sunshine to-day would have moved them to sing. Time and again during November they rattled and "peeped" almost as shrilly as ever in April, and they will again, if we are treated to a green Christmas.

The spirit of exploration seized me now, and I brushed the shallow waters with a cedar branch. Lazy mud minnows were whipped from their retreats, and a beautiful red salamander, that I sent whizzing through the air, wriggled among the brown leaves upon the ground. It was only

after a hard chase that I captured it, and holding it in my hand until rested, I endeavored to induce it to speak, but it is one of a very few that has a voice; and it was not to be coaxed. It suffered many indignities in silence and so I shamed me by its patience that I gently placed it in the brook. Soon, black, shining whirligigs—the gyrinus—suddenly appeared, and a turtle, as if wondering what might be the cause of the commotion, thrust its head in the air, stared angrily at me and retired to its hidden home. There was no dearth of life in the brook, yet this is a winter day. The ground is frozen and the rattle of wagons upon the highway penetrates even to this remote recess in the deep woods.

As a child's own tires of one toy, so I longed, after an hour's play, for a new field and other forms of life, and so much for serious study as that I might vary my amusement; but let not this apparent aimlessness be held unworthy of the rambler. Call it play if you choose, but the incidents of such a day come back in bold relief when with or without an effort they are recalled. I have found it most fortunate that unconscious cerebration is so active when I wander about, toying as here by the forest brook, with many forms of life. More than half the acts of every creature I meet are apparently meaningless at the moment of their occurrence, but their full significance is evident when in thought I wander a second time over the same ground. Scarcely regarded incidents come well to the fore and throw a flood of light upon what lacked at the time any evidence, on the creature's part, of complicated thought.

Herein, I think, lies the secret of so much disappointment when some people—and they are many—wander in the fields. Filled with enthusiastic desire upon Javelin and Burroughs, they expect to see with another's eyes and appreciate with another's brain. They see a bird, a mammal, or a host of bot flies, and then ask themselves, upon the spot, *What of them?* The bare fact of their presence is all that the minds of inexperienced rambler encompass. The wild life they have met excites a passing thrill and they give no further heed to it. And it never occurs to many to recall the incident. Being a little disappointed then, why give heed to the subject later? On the contrary, if at the close of the day, in the hills and hollows of the blazing wood upon the Andersons, if the walk was in winter, we picture the scenes of the recent ramble, these same birds or mammals, or whatsoever else we saw, will be seen again in a new light. Why those birds and not others where we found them; why the field mice or rabbits or a weasel was there we saw them or not, will become evident. The various features of every visited spot will be remembered; and the cheery blaze upon the hearth tells us as it were the story that could not be read when facing Nature's open page. Some of us inveterate rambler read more than others, when in the fields, but no one can afford to trust to this alone. To extract the whole truth, the past must be recalled again and again.

As I walked away the time with the tenants of the brook, so I gave heed to every passing bird, and what a strange panorama, as one kind after another flitted by! The happy association of woods and water here, as it attracted me drew them to the spot, yet no one loitered long. The busy birds, tree-creeper traced the cranberries of the wrinkled oaks; the nuthatches followed, and their complaining squeals seemed expressive of disappointment that so little food was to be

found. Was this true? Were these little birds really complaining? It certainly seemed so. But how treacherous is this impression of seeming so! Too often, I fear, the rambler is content with it and goes his way convinced that what was vaguely apparent was the truth, the whole truth, and nothing more nor less. I hold it probably true that if every bird which found itself too late was disposed to complain, there would be a vast deal more quarreling than actually occurs. How little contention there is in the bird-world! While it is true that birds of a feather flock together, it is equally so that widely different species also amicably associate, and ignorant is the act that calls for punishment. Better luck next time is the homely proverb that actuates all non-predatorial bird-life.

But the merit of birds is their suggestiveness. Promptly following the nuthatches came the ever welcome song-sparrow. It hopped, with spring-tide liveliness, among the dead leaves near the brook, and then, flying to a hazel bush near by, it sang that sweet song that not even the mocking-bird ventures to repeat. The woods vanished, and the old garden with its gooseberry hedge was before me. I was a wondering child again, listening and looking at the happy bird, happy as itself.

It is December, the day is cold, the trees are leafless, the ground frozen; but not a thought of all this had clouded my joy for half a day. There is the elixir of perpetual summer even in the woods in winter, and happy is he who can find it.—*Charles C. Abbott, in the American.*

The Flesh and the Spirit.

"Pure religion and undefiled before God and the Father is this, to visit the fatherless and widows in their affliction, and to keep himself unspotted from the world."

The apostle James, in this declaration it seems to me, means to say that the *first* duty and privilege of man is to keep himself pure and unspotted from the world lying in wickedness around him. He can only do this, as the same epistle further shows by faith in the Lord Jesus Christ; who by his Spirit would lead him from darkness to light, and keep by his power all who trust in Him. This blessed work having been accomplished, there follows to those who are under the leadership of Christ the *fruit* of the life "hid with Christ in God." He who loveth God whom he hath *not* seen will as a natural consequence love his fellow man whom he *hath* seen; therefore the follower of the Lord Jesus will delight in deeds of mercy and love, knowing that as he does it unto the least of these he does it unto Him who became poor that we through his poverty might be made rich."

This is *one* of the fruits manifested by a converted heart. "Thou shalt love the Lord thy God with all thy heart, soul, strength and mind and thy neighbor as thyself."

We are told that they that are in the flesh do mind the things of the flesh, and they that are in the Spirit the things of the Spirit." Again, they that follow after the desires of the flesh and live in them *cannot* please God. The flesh and the spirit, Paul says, are contrary the one to the other.

"A tree is known by its fruit." No matter how great a profession we may make, we are *not* showing forth the Lord's resurrection life in us if the *life* does not correspond to the profession we make. As a man *thinketh in his heart* so is he, and the thoughts and intents of the heart *will* show in the *life*. "Let him that thinketh he standeth take heed lest he fall," for they are

not all Israel who are of Israel, but "the Lord knoweth them that are his." The apostle in one of his letters to the early church said: "Ye are living epistles to be read and known of all men," thus implying that as he sent to them a *written* epistle, so *they* who professed to be followers of the Lord Jesus were *each one a living epistle*, whose acts and conversation would be watched by all who knew them, and the influence of that individual life felt by many more. There are those who never read the Bible, yet closely watch the life of professing Christians. Are we each one of us *so living in our day* that we bring forth the fruits of the Spirit? These are, love, joy, peace, long suffering, gentleness, meekness, temperance, faith, goodness, etc. Do those with whom we mingle see in us the *love* of the Master? Are we so *filled* with it that it streams forth from us as a well of water, bubbling up and running over, so that others may be strengthened through our influence? Are we so *filled* with the joy of his presence in our hearts that others may take knowledge of us that we have been with Jesus? Do the rays of light from his peaceful spirit so rest upon us that we shed an influence that is quieting where there might otherwise be strife and discord? Do we suffer long, endure? Are we meek, gentle, kind and patient? Are we temperate in all things, and do we in all these things show that we live and "yet not I but Christ that liveth in me" as saith the apostle.

These are solemn questions, and yet they are questions we should be ready to take to ourselves and answer, that by the grace of our Lord Jesus who is able to do all things for us we will try to follow where He leadeth.

We then who profess to be Christ's, should so submit ourselves to Him that the Holy Spirit should crucify in us the desires of the flesh so that every thought is brought into captivity to Him.

Let none of us rest in any *past* experience wherein we believe that we at *one time put off the old man* and received the *new*, imparted by Christ, but are we now walking in newness of life with Him; and does our *life now* show the fruit of holy living. Conversion means a change, and if we do not show a growth in grace and give evidence to the world that we have the *Light* of Christ within us, we are *not* fulfilling the instruction of our Lord to be as lights in the world to lead men to his feet. Our life should be such that the world in looking upon us should realize that we have an enjoyable religion wherein we can say, "Oh! come, taste and see that the Lord is good."

No matter how much we may rest in some experience of the past, if the Lord's power in our heart does not show a *present* deliverance from the dominion of evil we are not bringing forth the true fruits of the Spirit.

Notwithstanding the *past*, therefore, it *might* be said of us: "If the light that is in thee be darkness, how *great* is that darkness," and the acts of our life would still show an unchanged heart, and the works of the flesh would be more prominent than the fruits of the Spirit. Does any one say, I have faith? that is well; but *thy intellectual* faith will never save thee. If thou continest in sin, and thy disposition is not changed, and *thy self will* slay, I fear thou art yet far from thy true rest. Repentance implies a change in life; and true and saving faith will manifest itself in *some way* by showing forth the life of the Lord Jesus within thee. It behooves us then that we seek earnestly to possess this blessing by entering in by Christ the Door, following on to walk in Christ the Way. At the

same time we shall find that He is to us the Truth and the Life which shall permeate and control our lives so that we may always by his help do these things which please Him.

Thus may we in daily life *so live* as to show forth the praise of Him who hath translated us from the power and dominion of sin into the kingdom of his dear Son. J. H. Y.

FOR "THE FRIEND."

THE LARK IN THE CITY.

Bird of the light and lofty wing!
Slowly and faintly I hear thee sing,
Not as thou wert wont to do—
As thou stoost from off thy wing the dew,
And sweetly sang and soared on high
Midway between earth and sky.

Imprisoned now I see thee here,
Far from the fresh and fragrant air,
Far from the meadows fresh and green,
Where thou in thy freshness mayst have been,
For thou art smothered each day by day
May pine because of thy long delay.

Bird of the sweet and joyous song!
Does the flock to which thou didst belong,
No tidings to thy prison bring,
And tell thee that the joyous spring
And April's warm and genial showers
Adorn the meadows afresh with flowers?

Does none thou'lt left on the mountain's brow,
Remember the little captive now,
And bring a heather bell to thee,
As an emblem of summer that thou may'st see
That freshness and verdure and flowers are seen
As beautiful there as they e'er have been?

Will no sweet songster hover near,
And pane thy wild sweet notes to hear,
Or rest for a moment his weary wing
On thy prison bars and to thee bring
A faded leaf, that thou may know
When the autumn winds begin to blow.

Will thy mate as she sits alone on the ground,
Not wait and listen to hear the sound
Of thy own sweet song so shrill and clear,
That song of love she used to hear—
As thou hovered down to her nest where she
Watched and watched to welcome thee?

Oh lonely bird! as thou lookest down
On the pomp and show and noisy town,
Where the sons and the daughters of fashion roam,
How dost thou pine for thy mountain home,
Nor care for the glitter and pomp and show
Which hourly passeth thee by below.

And when the dull dark night comes on,
And the lamps are lit and the curtain drawn,
And thou on thy withered sod hast sat,
Looking around this way and that—
As if with a timid eye to see
What the glitter and glare of the lamp may be—

Swart bird of the wild thou longest then
To be far from the busy haunts of men,
Where the fresh green sward might be thy bed,
And the bright blue sky above thy head,
Where thou might rest and sweetly sing,
With night's cool dew upon thy wing.

EDWARD ALLEN.

SELECTED.

TO-DAY.

Oh, life it is sad and strange,
And love it is deaf and blind,
And the shapes of sorrow and change
Are always pressing behind!
If the tender impulse stay,
It is nipped by the frost of fate,—
So make haste to be kind to-day,
For to-morrow may be too late!

The eyes that crave for our smile,
Or the ears for our kindly word,
May be closed in a little while,
And our loudest cries unheard.
Time mocks at our pressing behind;
Death waits not, though we wait;
So make haste to be kind to-day,
To-morrow may be too late!

—Susan Coolidge.

Mothers and the Future.

BY MARY H. HUNT.

The following passages are from the speech of Mary H. Hunt before the Committee on Education and Labor of the United States Senate, First Month 29th, 1886, which was the means of securing the law for National Temperance Education—the first Temperance law ever passed by the Congress of the United States.

"During the late war there was a woman in Maine who received a letter which ran like this: 'Willie is sick; he is dying.' The mother read the letter, and, looking up to her husband, said, 'Father I must go to Willie.' 'No, wife, you must not go,' he replied. 'You know there is a line of bullets and bayonets between you and Willie.' She did what the Christian mother always does when her boy is in peril. She spread that letter before the Lord and prayed all night. Next morning she said, 'Father, I must go to Willie, I must.' 'Well, wife,' he said, 'I do not know what will come of this, but of course, if you will go, there is the money.' She came down here to Washington, and the man in the Executive Mansion, who had a heart as tender as a woman, while he had a strong, valorous, achieving manhood—Abraham Lincoln—brushed away a tear as he wrote, and handing her a paper, said: 'Madam, that will take you to the enemy's line, but what will become of you after you get there I cannot tell.'

"She took the paper and came on down to the line, and out came a picket; she handed him the pass, and he looked at it and at her, and said: 'We don't take that thing here.' 'I know it,' she said; 'but Willie, my boy, is dying in Richmond prison, and I am going to him. Now shoot!' He did not shoot, but stood awed and bushed in the presence of a love that is more like God's than any other that surges in the human soul in its deathless unselfishness.

"Tennyson says:

"Love took up the harp of life, and smote on all the chords with might;
Smote the chord of soul, that trembling, passed in music out of sight."

"All that mother thought of was her boy. Smuggled through the lines, she went down to the hospital. The surgeon said to her, 'Madam, you must be very careful, your boy will survive no excitement.' She crept past cot after cot, and knelt at the foot of the one where her boy lay, and putting up her hands prayed in smothered tones, 'O, God, spare my boy.' The sick man raised his white hands from under the sheet; the sound of his mother's voice had gone clear down into the valley and shadow of death, where the soul of the young man was going out in its ebbing tide. Raising his hands he said, 'Mother, I knew you would come.' The boy is a man to-day saved by a mother's love.

"It is the same deathless mother's love that has knocked at the doors of the schools through State legislatures, and is to-day knocking at the door of our national capitol, asking that the boys may be taught. We women lay down at the cradle our youth, our beauty, our talents, anything, everything, to the little bit of humanity there. We cannot help it. It is God's providence for the child; and may it not likewise be God's providence for the nation that has raised the heart of women and called the deathless tides of mother-love to participate in this great movement? If we save the children to-day, we shall have saved the nation to-morrow.

Little drops of dew and rain with melted

snow and ice trickling down the hillsides and running through the valleys of the upper half of this Continent unite to form the five great lakes we call our inland seas. The united waters of four of these lakes, as if disinclined to limitations, cutting their way through a deep, rocky channel, into the fifth lake, Ontario, rush through that by the River St. Lawrence to the sea. In the midst of this rocky channel is a mighty precipice over which with mad, irresistible fury it plunges into the frothy, scething abyss below. We call that Niagara Falls. It is the grandest scene on this globe. It was my fortune to stand in its presence not long ago. The one overwhelming impression was that of power, irresistible, omnipotent power. How weak seemed the boast of man in that presence that he was the lord of creation! I went over on the Canadian side and put on that rubber suit which made you look like an old Norseman, and then went down the steep, winding slippery steps to the foot of the great Horse-Shoe Falls. For awful majesty it was incomparable. Waiting a moment until the wind had blown from my eyes the mist that like incense from nature's altar is forever ascending there, the guide led me back of the cataract. My very soul stood still for the awfulness of the power that enveloped, surrounded me. The sun was shining on the outside of that mighty torrent back of which I was clinging to the narrow, slippery ledge, and through which I looked, where the fretted edges were broken by the projecting ledge above, and beheld that mighty torrent that shut me in like the walls of a tent was only the sun, the aggregate of those very identical little drops of dew and rain that with melted snow and ice had trickled down the hillsides and run through the valleys of the upper half of the Continent, and were assayed here in such a display of power as no words in my vocabulary could express, until with bated breath, I whispered, 'God.'

"Such, under a government of majorities, is the uprising of a mighty people when, as one man, they denounce a evil. Such a *vox populi* is a *vox Dei*. Ever there hangs at the foot of the falls, in God's sunshine, his rainbow of promise, an earnest, a prophecy of the day that is surely coming in America, when from the school-houses on the hill-tops, and from the valleys all over this land, shall come the trained hatters of alcohol to pour a whole Niagara of ballots upon the saloon.

FOR "THE FRIEND"

The Discipline of Ohio Yearly Meeting, under the heading of "General Advice."

Recommends that "all our meetings for business be kept select, and that Friends endeavor to manage the affairs of Society in the spirit of meekness and wisdom, without deceit, forbearance, and love to each other, allying to maintain the unity of the Spirit in the bond of peace." Which I have from early life accepted as an imperative; and it rests upon my mind to extend a caution against opening our doors and granting the privilege to those who are not members of our Religious Society to sit with us in our meetings for discipline, fully believing, as I do, that there might easily be admitted amongst us such as might be of very objectionable conduct, and who perhaps might hold doctrines and sentiments very unsound, which might be a great means not only to draw away the minds of parents from the Truth as it is in Jesus, but those of our beloved children. I do therefore crave that Friends everywhere who feel a desire resting upon their minds for the

preservation of our still visited and, as I believe, highly favored Society, may be found standing on their guard not only against this violation of our Christian Discipline, but every other departure from the path that is cast up by the Head of the Church for this people to walk in. The gathered Church is beautifully compared to "a garden enclosed."

Then, it is often the earnest breathing of my heart, that in this our day, our beloved Society might more and more be brought as forth in the wilderness, so that it might shine forth in its original brightness, even "clear as the sun, fair as the moon, and terrible as an army with banners" (to the man of sin). And whilst I believe it right for me thus to bear my testimony, I desire to be preserved from putting forth anything that would have a tendency to draw the line closer than the truth requires, as there may be individual cases so situated that, upon judicious investigation by rightly exercised elders or overseers, it might be safe to admit to sit with us in our meetings for discipline; but I apprehend such cases would be rare.

After thus expressing my views, I would not be understood that our business matters must, under all circumstances, be kept a secret from the civilized and Christian world, if circumstances render it necessary; for I believe there should nothing be done in our midst but what we would be willing should be investigated. I am very much of the mind that if any are fully convinced of the principles and testimonies of Friends and feel drawn towards becoming members of their Society, that there would be very few who feel a desire to sit in our business meetings but would be willing to wait until the provisions of Discipline were fulfilled. I think we have abundant cause to believe that the Lord is still turning his holy hand upon us in order to make us more and more a people to his praise. Therefore may we be very watchful against all the stratagems of our unwearied enemy who, no doubt, still seeking to draw away from the true fold as in the byways and crooked paths.

But as we are in lowliness of mind, truly engaged to look unto the Lord for help and for strength, I do believe he will give the victory; for his power is over all the powers of the evil one.

R. M.

PENNSVILLE, Morgan Co., Ohio.

Dealing Tenderly With a Child's Fears.

The best child in the world is liable to be full of fears; and the child who is full of fears deserves careful handling, in order that his fears may not gain permanent control of him. How to deal wisely, firmly, and tenderly with a child's fears, is one of the important practical questions in the training of a child.

Unreasonable or instinctive fears are common to both the brightest and the dullest children. They are among the guards which are granted to humanity, in its very nature, for its own protection. It would never do for a child to make no distinction between persons whom he could trust implicitly, and persons whom he must suspect, or shrink from. He needs to be capable of starting at a sudden sound, or of standing in awe of the great forces of nature.

One good mother sought to overcome her little boy's fear of thunder by simply telling him that it was God's voice speaking out of the heavens; but this was one step too many for his thoughts to take as yet. The thunder, just as it was, was what gave him trouble, no matter where it came from; so, when the next peal sounded through the air, the little fellow whim-

Chief Justice John Marshall: The institution of Masonry ought to be abandoned as one capable of much evil, and incapable of producing any good which might not be effected by safe and open means.

John Quincy Adams: I am prepared to complete the demonstration before God and man, that the Masonic oaths, obligations, and penalties cannot by any possibility be reconciled to the laws of morality, of Christianity, or of the land.

Charles Francis Adams: Every man who takes a Masonic oath forbids himself from divulging any criminal act, unless it might be murder or treason, that may be communicated to him under the seal of fraternal bond, even though such concealment was to prove a burden upon his conscience and a violation of his bounden duty to society and to his God.

General Henry Sewall: I was initiated an entered Apprentice to the Masonic rites in October, 1777, at Albany, soon after the capture of Burgoyne, being then an officer in the American army. . . . I was led by the influence of this "perfect rule of life" to embrace the yearning yearning of a speculative Masonry in a shape still more deformed. Its charity appeared to be selfishness, because restricted to its own members; its religion deism, because entirely devoid of the Gospel. Its history fabulous; its claims to antiquity unsustainable; its titles fulsome; its rites barbarous and absurd; its oaths extra-judicial, unlawfully imposed and blindly followed; and the penal sanctions annexed, horrid and impious.

John Hancock: I am opposed to all secret associations.

Edward Everett: A secret society so widely diffused and connected as this puts a vast power, capable of the most dangerous abuse, into hands irresponsible to the public.

William H. Seward: The Masonic fraternity tramples upon our rights, defiles the administration of justice, and bids defiance to every government which it cannot control.

William H. Seward: Before I would place my hand between the hands of other men in a secret lodge, order, class or council, and, bending on my knee before them, enter into combination with them for any object, personal or political, good or bad, I would pray to God that that hand and that knee might be paralyzed, and that I might become an object of pity and even the mockery of my fellow-men.

Charles Sumner: I find two powers here in Washington in harmony, and both are antagonistic to our free institutions, and tend to centralization and anarchy—Freemasonry and Slavery; and they must both be destroyed if our country is to be the home of the free, as our ancestors designed it.

General J. W. Phelps: All secret organizations are links of one and the same chain which binds men to evil and not to good. The Masonic lodge is the parent source from which all similar modern organizations have emanated, and this lodge is now in active operation in every city and considerable village of the country, swaying our parties and churches, filling our offices, secular and divine, with their obsequies, and especially unfavorable to teaching a spurious and corrupting morality, subversive both of the Christian religion and of free institutions.

Thaddeus Stevens: By Freemasonry, trial by jury is transformed into an engine of despotism and Masonic fraud.

Horace Greeley: Many persons were brought to trial on account of the murder of Morgan, but no one was judicially found guilty of murder. It was established by seceding Masons that the oaths—at least, some of the highest degree—that were administered, and taken by those admitted to Masonic oaths, disqualified them from serving as jurors in any case where a brother Mason of like degree was a party, and his antagonist was not.

Daniel Webster: All secret associations the members of which take upon themselves extraordinary obligations to one another, and are bound together by secret oaths, are naturally sources of jealousy and mutual distrust, and especially unfavorable to harmony and mutual confidence among men living together under popular institutions, and are

dangerous to the general career of civil liberty and just government.

C. C. Colden, Mayor of New York and Member of Congress: It is true that I have been a Mason a great number of years, and that I have held very high Masonic offices and honors. It is equally true that I have for a long time ceased to have any connection with the institution because I have believed, and do now believe, that it is productive of much more evil than good. I have long entertained my present opinion that a man who would eschew all evil should not be a Freemason.

THE FRIEND.

FOURTH MONTH 19, 1890.

In the present number will be found an essay by an esteemed Friend of Ohio Yearly Meeting, extending a caution against the free admission into our meetings for Discipline of those who are not members of the Society.

The propriety of a regulation, that the business of any body of persons should be transacted by those who are members of it, and not by outside parties, is so obvious that it is universally recognized. Yet in some cases others are admitted as *spectators*, and are even invited to be present, in the hope of interesting them in the matters that are to be discussed, or for other reasons. In this way our own young people are now encouraged to attend our Meetings for Discipline, which may be schools of instruction and edification for them, in which they may gradually become prepared to assist in the transaction of the business. In the beginning, these meetings were confined to the older and more experienced members—and it is upon these the burden of their business still rests.

This flows from the theory under which they are held. Christ is regarded as the Head of every rightly gathered assembly, which is properly qualified to perform the services which the Church requires. Those who take an active part in such assemblies are supposed to be guided and influenced by the Spirit of Christ, for whose help they ought reverently to wait. This is in accordance with the exhortation of George Fox: "Friends, hold all your meetings in the power of God."

While we think it would be unsafe to open the door for the indiscriminate admission of others into our meetings for business, yet we think, with our correspondent, that there may be occasional exceptions to this general rule; and that there may be persons who would be benefited by witnessing the dignity and seriousness which mark the deliberations of a solid body of Friends.

In THE FRIEND of Second Month 15th was published a communication received from a Friend in England, treating of the gradual introduction in that country of changes in the manner of holding meetings for worship, and describing one which he had recently attended, where praying and preaching were performed by one who had been *hired* to attend to these and similar services.

Since then we have received a letter from an English Friend, which says the person who so officiated, "does not receive any fixed salary, but is supported according to his necessities." Another letter from the Friend who sent the first communication, says that after being at the meeting referred to, he left the neighborhood

with the impression that the preacher "was on the same footing as others in the district who may be looked upon as 'pastors' under the care of the Home Mission Committee. The Monthly Meeting had applied to the Home Mission Committee for 'temporary resident help,' which was granted in this way, after the individual had labored some time in the district, pending their decision. That committee had spent about \$12,000 in 'grants in aid of expenses of Friends,' but the precise nature of the pecuniary arrangement made with this person, he did not know."

While we cheerfully give the explanation which has been furnished to us, so anxious as we are to see that no injustice may be done to any one, by any statements that appear in our columns, we see in the whole case a confirmation of the sentiment expressed in this Journal nearly eight years ago in reference to the first appointment of the Home Mission Committee by London Yearly Meeting—that "It gives the sanction of that important body to meetings held in a manner which 50 years ago it would unhesitatingly have condemned, and opens the way by a few and easily taken steps to the establishment of a regularly paid ministry, such as exists in other denominations."

The payment of the minister for his services is but a part of the objection to the changes thus introduced—for they involve a still more radical departure from the principles of Friends in making it the business of a man or woman to preach and pray at stated times.

SUMMARY OF EVENTS.

UNITED STATES.—The total value of breadstuffs exported from the United States in Third Month was \$15,266,649. The figures for 1889 were \$9,636,482.

The President has signed the joint resolution for the removal of the naval magazine from Ellis Island, New York, and the purchase of a site for a magazine at some other point.

The Republican Senatorial and House Republican caucus committees held a meeting on the 13th inst., on the silver question. The Senate committee reached a conclusion, and agreed upon three propositions: 1. That the Secretary of the Treasury shall buy 4,500,000 ounces of silver bullion monthly and issue notes in payment for the same, the notes to be redeemable in bullion or lawful money. 2. That national banks shall be allowed to issue notes to the full par value of the bonds deposited to secure their redemption, which would add ten per cent. to the volume of national bank currency. 3. That the hundred millions retained in the Treasury for the redemption of Treasury notes be put into circulation. The House caucus committee practically agreed upon the Windom bill as it emerged from the Coinage Committee, as a basis, with amendments providing for unlimited purchases of bullion produced in the United States at the market price, not to exceed a dollar for 37½ grains, and when that price is reached there is to be no more purchases. The Treasury Department payment for the silver to be to be redeemed in bullion or coin. Both committees are to meet on the 15th, and endeavor to come to an understanding.

Representative Payne, from the Committee on Railroads and Canals, has reported to the House the bill providing for a ship canal around Niagara Falls.

Representative Samuel J. Randall, of this city, died in Washington on the morning of the 13th inst., at 5 o'clock. He was in the 63d year of his age. He was an able statesman and Parliamentarian, and a leader in the Democratic party.

The Highland Presbyterian, which is composed of the Presbyterian churches of Northwestern Kansas, has voted almost unanimously in favor of a revision of the Confession of Faith.

The New York Chamber of Commerce has adopted resolutions regarding the Chinese enumeration and exclusion bill now pending in Congress.

It is announced that the Michigan Central Railroad has decided to put on a new limited vestibule train between New York and Chicago, which will be the fastest train in the world. It will reduce the running time between the cities to 14 hours.

Much less than the usual quantity of maple sugar

and syrup is being made in Northern Vermont, the season having been shortened by unusual mildness of the weather and spring.

Advices from Northern Texas say that 75 per cent. of the whole crop in the counties of Cook, Grayson, Collin, Denton, Wise and Montague has been destroyed by insects. One of these creatures is very similar to the northern one and is called by the common name lady bug. The latter is the most destructive, and is not only destroying wheat, but is ravaging oats and corn, and even attacking cotton.

A "dust blizzard" raged at Aberdeen, South Dakota, on the night of the 11th instant, and it is feared that much damage has been done to the fields of newly seeded wheat in the vicinity.

An earthquake shock was felt in Dover, Maine, early on the morning of the 11th inst. Clocks were stopped and small articles were thrown from their places.

Spotted fever has broken out in Henshaw, Kentucky, and made its appearance at Henshaw a few days ago. Since that time over a score of children have been attacked, and in each case fatally. The disease is identical in all its symptoms with that which last summer carried off 250 victims in Webster, an adjoining town. In this epidemic neither sex nor age were spared. Only children have so far been attacked this year. The disease runs its course inside of 36 hours.

In the Senate of Iowa on the 10th inst., the Liquor License bill, after being seriously amended, was definitely passed by a vote of 29 to 23. A prohibition amendment to the Constitution ought to be probably will follow.

The Liquor License Court in this city granted 1173 retail licenses, or 30 less than last year; and 919 wholesale licenses, which is 279 more than the number issued in 1889.

Deaths in this city last week numbered 406; 16 more than during the previous week and 15 less than during the corresponding period last year. Of the foregoing 227 were males and 179 females; 92 died of consumption; 52 of pulmonary phthisis; 31 of cancer; 15 of cancer; 15 of inflammation of the stomach and bowels; 13 of convulsions; 13 of typhoid fever; 12 of inflammation of the brain; 12 of cancer; 12 of old age; 11 of bronchitis and 9 of casualties.

Markets.—U. S. 4 1/2, reg. 103; gold, 104 1/2; 4's, 122; currency 6 1/8, 116 & 126.

COTTON was quiet but firmly held at 11 1/2 cts. per pound for middling upland.

FEED.—Winter bran, choice \$17.50; do, fair to good, \$17 & \$17.25; spring bran, \$16 & \$16.50.

FLOUR.—Western and Pennsylvania super, \$2.25 a \$2.60; do, extra, \$2.70 a \$3.00; No. 2 winter family, \$3.00 a \$3.30; Pennsylvania family, stone ground, \$3.40 a \$3.60; Pennsylvania roller process, \$3.50 a \$4.25; Western white, clear, \$3.40 a \$4.25; do, do, straight, \$4.15 a \$4.50; winter patent, \$4.50 a \$5.00; Minnesota, clear, \$3.75 a \$4.25; do, straight, \$4.25 a \$4.75; do, patent, \$4.50 a \$5.20; do, do, favorite brands, \$5.25. Rye flour was firm at \$2.90 a \$3 per barrel, or 25 cts. per bushel.

GRAIN.—No. 2 red wheat, 87 1/2 a 88 1/2 cts.
No. 2 mixed corn, 81 a 83 1/2 cts.
No. 2 white oats, 32 a 32 1/2 cts.

BEEF CATTLE.—Extra, 5 1/2 a 5 3/4 cts.; good, 4 1/2 a 5 cts.; medium, 4 1/4 a 4 1/2 cts.; fair, 4 1/4 a 4 1/2 cts.; common, 4 1/4 a 4 1/2 cts.; low, 3 1/2 a 4 cts.

SHEEP.—Extra, 6 1/2 a 6 1/2 cts.; good, 6 1/2 a 6 1/2 cts.; medium, 5 1/2 a 6 cts.; common, 5 1/2 a 5 1/2 cts.; culls 4 1/2 a 5 cts.

LAMBS.—Extra, 7 1/2 a 7 1/2 cts.; good, 7 1/2 a 7 1/2 cts.; medium, 6 1/2 a 6 1/2 cts.; common, 6 1/2 a 6 1/2 cts.; culls, 5 1/2 a 6 1/2 cts.

PORK.—Good State, 5 1/2 a 6 1/2 cts.; good Western, 6 1/2 a 6 1/2 cts.

FOREIGN.—Joseph Chamberlain, in a speech at Birmingham on the night of the 10th instant, summed up Gladstone's Home Rule policy as "horn of deceit, nurtured by evasion, and enshrined in mystery."

The boats for the month of August are having great success. Eighty thousand mackerel were landed by fishing boats one day last week.

Liverpool, Fourth Mo. 11th.—The true cause of the accident to the City of Paris was learned to-day. The explosion was the work of Birkenhead and the water gun being blown up. As she was raised to the starboard propeller dropped off, showing the shaft to be broken close to the blades of the propeller. The sudden release of the strain this break occasioned, when the steamer was going at such a high speed, caused the centrifugal force to be so great that the city, and the explosion and collapse of the starboard engine resulted.

Encouraged by the success of the Forth Bridge, French engineers have formed a syndicate to build a bridge over the Bosphorus between Roumeli and Anadolu Hissar. The plan has a length of 800 meters, which is to be in a single span, or half again the length of the longest span in the Forth Bridge, and the height will be 60 meters. Nothing is settled yet, but it is probable that the event will be eventually obtained, and the connection of Europe and Asia by a railway will thus be established.

On the 10th instant, the arrival of the Carlist leader Marquis Cerralbo, at Valencia, in Spain, was made the subject of an anti-Carlist demonstration. A mob of 2000 persons invaded the Carlist Club and set fire to the furniture. When the firemen came the mob tried to obstruct them. The mob then smashed and burned a carriage in the court yard. Another mob tried to burn a church building, but was prevented by a detachment of troops.

Henry M. Stanley arrived at Brundisi, Italy, from Cairo, on the 10th inst. In an interview, under much pressure, Stanley stated an important fact, which he had intended to mention solely in his forthcoming book, and that was, that the Aruwahit forest, which belongs to the Congo Free States, was enormously richer in everything, especially in rubber trees, than the Amazon forests. This section of Africa, he declared, would be the rubber reservoir of the universe.

The London Times correspondent at Rome says: It is reported that a conspiracy of 1600 persons reveals a state of barbarism exceeding the worst anticipations. The Government declines further to assist in averting a crash. Numerous failures are expected.

Chankow, Fourth Month 8th.—A terrible plague has swept through this place and through a large section of Southern Manchuria. Millions of people, in such quantities as to be irresistible, have overrun these provinces, and are passing northward. The swarms have ruined cultivated fields, completely gutted granaries and wheat stacks, and killed and eaten several hundred dogs. They have swam rivers, climbed mountains, and there is no means either of exterminating them or arresting their progress.

Professor Angelo Heilprin, Robert Le Bouillier, J. E. Ives, Wilmer Howe and Frank C. Baker, representing the Scientific Expedition of the Academy of Natural Sciences, Philadelphia, have reached the city of Mexico. The first ascent of Orizaba by the scientists was made from Chalchicomula. Barometric measurements made, show the height of the volcano is 15,200 feet, about 2500 feet less than was supposed.

It is said the Dominion Government intends to prohibit the use of opium.

It is officially announced that the Welland Canal will be opened Fourth Month 15th.

NOTICES.

WESTON'S BOARDING SCHOOL.—The Committee in charge of this Institution will meet in Philadelphia on Seventh-day afternoon, the 10th inst., at 2 1/2 o'clock. Fourth Mo. 1890.

WM. EVANS, Clerk.

Friends attending the Yearly Meeting can be furnished with simple meals, both before and after the sittings of the meeting, at moderate charge (15 cents) in the second story of the central part of the Arch Street Meeting-house. No. 111. All also be furnished for the same attending the Meeting for Sufferings and the Select Meeting, the previous week.

THE TEMPERANCE ASSOCIATION OF FRIENDS OF PHILADELPHIA YEARLY MEETING.—The Annual Meeting of the Association will be held in Twelfth Street Meeting-house, on Fourth day evening, Fourth Month 23rd, 8 o'clock. The program for the meeting is as follows: 1. Opening exercises, reading of the minutes, &c. 2. Reports of Executive Committee and of Nominating Committee. 3. Remarks on the subject of Total Abstinence by the President of the Association, Rev. G. GEORGE W. B. DINGES. 4. By J. Matlack, John C. Winston, and other Friends on the general subject: "What are the common methods of work upon which the members of the Association can unite?" 5. General remarks.

Friends are cordially invited to attend.

J. SNOWDON RHOADS, Secretary.

NEW EDITION "GOLDEN GLEANINGS," by David Heston, for sale at Friends' Book Store, by Jacob Smedley, Price, plain edge, 85 cents per copy; gilt edge, \$1.00 per copy.

Arrangements have been made with the Pennsylvania Railroad Company, by which Friends attending our approaching Yearly Meeting can obtain excursion tickets to Philadelphia and return, from any station on the following railroads, at the rate of 2 cents a mile each way; except that no such tickets will be issued at less rate than 25 cents, for: Pennsylvania North 14th to 25th, 1890, inclusive, and make the return coupon good until Fourth Month 30th, 1890, inclusive.

The Reading Railroad Company has also kindly offered Friends the same rate (2 cents per mile each way), and for the same dates as above specified.

Application should be made either personally or by mail, to Jacob Smedley, 304 Arch Street, Philadelphia, or to Thomas C. Hogue, West Chester, Pa., for orders on the Ticket Agents—one of which must be delivered to the agent whenever a ticket is obtained. These orders inform the Ticket Agent at whatever station they are presented on the above railroads, that the bearer is entitled to a ticket to Philadelphia and return, at the rate of 2 cents per mile. If a Friend in each neighborhood would ascertain the number likely to be needed, and obtain them and distribute among the Friends, it would make less work for the Ticket Agents. When they are to be forwarded by mail a 2 cent stamp should be sent to pay the postage.

These orders are ready, and Friends will please obtain them as early as they conveniently can.

The Annual Meeting, of the "ASSOCIATION OF FRIENDS OF PHILADELPHIA AND ITS VICINITY," for 1890, will be held at Twelfth Street Meeting-house, Second-day evening, the 21st inst., at 8 o'clock.

Friends generally are invited to attend.

WM. H. HAINES, Secretary.

Philadelphia, Fourth Mo. 4th, 1890.

A dwelling attached to a store, in a central location, for rent on favorable terms.

Apply to 941 Spruce Street.

MARRIED, Third Month 6th, 1890, at Friends Meeting-house, Fourth and Arch Sts., PHILA., THOMAS W. FISHER, of Malvern, Penna., to ANNA C. SCHALLER, of Philadelphia.

British Friend please copy.

DIED, at her residence in Conshohocken, 12th of Third Mo. 1890, ANNA C. JONES, widow of Isaac Jones in the 83d year of her age, a member and minister of Plymouth Monthly Meeting of Friends. This dear Friend had to drink deeply of the waters of affliction, through a long protracted illness of several bodily suffering. Her sweet spirit was ever ready to sympathize with the afflicted, and her cheerful and loving nearness of love to herself and to her Heavenly Father. She was sometimes cast down with feelings of her great unworthiness to enter the heavenly kingdom, saying, "This is an honest hour! It is an awful thing to die!" A few days before her decease, she was offering a fervent prayer to God, and patience might be granted to bear her sufferings to the end, she said, "What sweet peace and joy I feel, in this a foretaste of Heaven?" then added, "Come quickly, Lord Jesus!" Oh death, where is thy sting? Oh grave, where is thy victory?

Third Month 23rd, 1890, at 1428 Spruce Street, Philadelphia, of paralysis, JOHN JORDAN, Jr., in the 82d year of his age, a member of the Monthly Meeting of Friends of Philadelphia.

—, Fourth Month 7th, 1890, at his residence in Alexandria, Va., SAMUEL W. MARIS, in his 69th year, a member of Deer Creek Monthly Meeting, Harford County, Md., in the limits of which he spent a great part of his life. He was quiet and unassuming in his manners, and much esteemed by his neighbors. He was the father of Jesse J. Maris, Jr., of whom a memoir has been published by the Tract Association of Friends. His last illness he requested his neighbors to read to him some of the Scriptures which he had marked, commemorating the goodness of the Lord. His end was peaceful.

FOR "THE FRIEND."

Incidents and Reflections.—No. 220.

INFLUENCE OF EXAMPLE.

I met with an article in one of our religious papers, that forcibly expressed the powerful influence which our characters and examples exert over those about us. It was headed "Remove the Stumbling-Blocks," and commenced thus:—"Do you see that gentleman crossing the street just ahead of us? Well, would you be surprised to know that he has sent us more recruits than we have gained from any other source?" asked a noted member of an infidel club in Glasgow of his companion, an earnest Christian worker.

"I should indeed be surprised," replied the other, "and can hardly understand it; for, although I do not know him personally, I have always understood that he was an elder and pillar of St. — Church."

"So he is," was the answer, "and that is just the reason; for while he makes long prayers and a pious profession in church, we men of the world know him to be a cheat and a libertine out of church; and cannot help drawing therefrom the conclusion that, if that is the sort of fruit your Christian religion produces, our infidelity, which makes no profession at all, and is therefore not bound to practice, is, upon the whole, infinitely preferable. Hence you see your worthy elder—quite unknown to himself, no doubt—has become one of our best recruiting sergeants."

The infidel's companion was silent. He knew that the inference was unfair. Just as though the entire crop of an apple-tree should be judged by one poor, withered specimen that happened to intrude itself prominently into notice! But he felt that it would be a waste of words to enter upon any argument then. All that he could do was to lift up his heart in prayer to God that he might never by flagrant inconsistency between his profession and his practice play the part of recruiting sergeant for the devil.

A more cheering illustration of the influence of example, is the narrative given of the origin of the Children's Fresh Air Societies, which have been organized in several of our large cities—

Many years ago, an invalid lady, whose home was in the country, visited a large city near which she lived, on a sultry summer day. She

had business in some of the smaller streets and alleys, and was appalled at the number of pale, puny and sick babies in their mothers' arms, who were literally dying for a breath of fresh air. What could she do?

"I cannot save all," she said, "but I may save one. There is room for a mother and her child at home."

She took the one mother and her child to her country house, kept them for a fortnight, and then took them home and brought others. Her neighbors followed her example. The next summer the number of children entertained amounted to hundreds; the next, thousands.

Another woman who lived in the city, and had no money to give, was vexed that she could not help in this most gracious charity. "I can at least tell others of it," she said. "She wrote an account of it for a New York newspaper."

A third woman, possessed of great wealth, sent a thousand dollars to the editor, with the request that he should open a fund for this noble purpose. The Fresh Air charity was the result. The various organizations throughout the United States, for the removal of poor children from the poisonous air of the cities to the country, have grown out of this first attempt of a single, weak woman to save one dying baby.

During the last two years the charity has taken root in England and on the continent. No one but God knows how many lives have been saved by it.

If the woman who thought of it on that torrid day, as she passed, sick and weary, through the slums, had decided, "I cannot save all; why should I trouble myself with one?" how many lives that might have been saved would have been lost!

The *Pall Mall Gazette* relates a conversation with the Baptist preacher of London, Charles H. Spurgeon, on the subject of theatres, which illustrates the responsibility we are under for the influence we exert over others. It is as follows:

"Are there not many persons who find in the theatre precisely that kind of recreation and rest which is most useful for the discharge of their daily work?"

"It may be," said C. H. Spurgeon, "but I don't know any of them. You see, I live in a world apart from all those things, and so do my people. We argue this way: Granting it is perfectly safe and profitable for myself to go to the theatre, if I go, a great number of those will go to whom it will do positive harm. I will not be responsible for alluring them by my example into a temptation which, but for my self-indulgence, they would entirely escape.

"I will give you an instance of how this works out. When I go to Monaco, the grounds of the gambling hell there are the most beautiful in the world. I never go near them, and why? Not because there is any danger of my passing through the gardens to the gambling tables. No. But a friend of mine once related the following incident to me:—

"One day M. Blanc met me and asked me how it was I never entered his grounds. 'Well, you see,' I said, 'I never play, and, as I make no returns whatever to you, I hardly feel justified in availing myself of the advantages of your grounds.' 'You make a great mistake,' said M. Blanc. 'If it was not for you and other respectable persons like yourself who come to my grounds, I should lose many of the customers who attend my gambling saloons. Do you imagine that because you do not play yourself that you do not by your presence in my grounds contribute very materially to my revenue. Numbers of persons who would not have thought of entering my establishment feel themselves quite safe in following you into my garden; and from thence to the gambling table the transition is easy.'" "After I heard that," continued C. H. Spurgeon, "I never went near the gardens. And the same argument applies to the theatre."

Dr. Scudder relates the following incident:—"When I was in California, a gentleman in my congregation, many years a resident in that State, told me that in his early life he was in the habit of drinking with a clique of young men. He noticed that one individual in this company always ran on from his first glass into drunkenness. So he talked to him, urging him to reform. 'Ah,' said the youth, 'I cannot refuse the first glass, and when that touches my lips it is all over with me, I am no longer master of myself. For me, one glass is the same as tapping the barrel.' 'Well,' replied my friend, 'I will promise to act next time exactly as I do?' He promised. When the club next met, as usual one invited the rest to drink. All assented. They stepped to the bar, my friend and the young man among the number. 'What will you take?' 'And you?' 'I will take whiskey.' 'Give me a glass of brandy.' 'Gin for me, if you please.' Then my friend was asked: 'What will you have?' Calmly he replied:—'I will take a glass of cold water.' The young man, thunderstruck, yet true to his promise, followed:—'I, too, will take a glass of cold water.' If a burricane had swept along the ceiling of the bar-room, the convulse there assembled would scarcely have been more amazed. Nothing was said. The two quietly drank water. The young man was saved, for none of that company ever asked those two individuals again to drink. It was seen that they had backbone. They stood up straight, and were ever after respected. Crookedness cannot help doing obeisance to straightness."

A writer from Australia tells of an ingenious method which he saw in use there, for getting a large flock of sheep quickly over a bridge—

"They would have taken a long time going over, and would effectually have checked our entrance into the town, but for a clever plan for getting the sheep quickly over. A few sheep are trained as a sort of decoy. They are at first pet lambs, and then in time become pet sheep. They are kept by the authorities who have control of

the bridge, and are let to the sheep-drovers for so much in order to effect a speedy passage of the bridge. The keepers of the pets go first, then follow the three or four pets, and then away after them the three or four thousand of the mob, as they are called here."

J. W.

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 298.)

1794. Eighth Mo. 17th.—I was at Smithfield Meeting again on a First-day; and that afternoon had a large solid meeting in a Baptist meeting-house, at their request, in a place called Cumberland. On the next day I had meetings, one at Mendham, and another at Center; hard and laborious. The people seemed unacquainted with silent waiting, and were long in gathering.

19th.—At Douglas, I had a large and favored meeting in a new meeting-house not finished. Their houses in general are not large enough to hold the people who are willing to come.

The next day I was at Gloucester Preparative Meeting; (this is the second time.) I thought here was a little solid remnant; at the close, men and women came together; we conferred on the subject of reformation to good satisfaction. The day following had a meeting at Thompson: this was the most unpleasant of any since I left home; the people seemed unmannerly and wicked.

The 22nd, had a favored season at Leicester Meeting, which was large, by a number of scholars attending who came from an academy, and appeared sober and attentive.

24th.—I had a large and laborious meeting at Bolton. The next day I rode to Boston; this was a day of darkness and inward poverty; the town noisy. On the day following we had a small meeting, which was dull; yet said to be the most orderly which had lately been seen here. In the evening we had an opportunity with those that are members of our Society in the place (about twenty) which was a favored season.

27th.—Proceeding to Lynn, we had a large meeting there, which was laborious. In the afternoon, at my request, we had a meeting with Friends, select from others; this was a favored season.

The next day at Salem, we had a large meeting; but many of the people not being sensible of the benefit of stillness, it was to me a laborious time. After this I had two solid sittings with Friends, who were mostly come together selected from others; comfortable season. The day following, visited a sick family, and rode about 23 miles to Newberry. The 30th had a meeting there, in some measure favored, though not large. We lodged at the house of one professing with us, who had submitted to what is called water baptism. He said, that to his great disappointment, instead of ministering life, it ministered death. The same day I also had a small, yet favored meeting, at Amesbury. The next day at Seabrook, one large and favored.

Ninth Mo. 1st.—This day and the next, had meetings with Friends, one large and favored; also one in a private house at Lee, which was a favored season; I thought here were a number of solid Friends.

On the 3rd we had a meeting at Dover, which was large, and a season wherein Divine favor was extended. I feel caution in expressing it, having witnessed so many favored seasons; but my soul renders the praise for all, to the Lord

alone, there is nothing due to me. I think never any one could be more stripped; it was been so much so as I have passed from meeting to meeting, that the grave looked pleasant, so that my day's work was done; yet I believe it is all in wisdom permitted.

4th.—We attended two meetings at Kittery, not large, and some ability was given me to labor among the people for their benefit. Next day at Berwick we had a meeting, wherein favor was extended, which I hope will not soon be forgotten. The number was large, and much respect was shown by the people, many wishing me good success in their way. That day and the next, we rode about 68 miles to Durham; I was in deep poverty, not knowing how my Heavenly Master would dispose of me next.

7th.—This being the first of the week, we had a large meeting here, but poor and low. My soul was so baptized under a sense of some things hereaway, that I slept little that night. My cry was to the Lord for wisdom; I saw my own was not sufficient in a time of trial.

8th.—The next day we had a meeting at Lewistown, which was small; and at the close, I requested the members of our Society to stop; with whom I had a favorable opportunity, although the number was like "two or three." The day following, we had a small poor meeting at Green; at the close of which I informed the people I was willing to meet them again at the third hour, afternoon, in consequence thereof we had another meeting, a little more satisfactory; and at my request our friends living there, stopped, when others went out, and we had a favored season. The meeting was held in a small log house covered with bark. On the 10th we rode to Winthrop, about 20 miles. I have had to marvel at the goodness of the Lord to me, a poor creature, in enabling me to hold travelling so well. Let Him be praised for this and all other favors.

11th.—At Winthrop we had a large and exercising meeting; with respect to the better part, I was afraid the people here were on the decline. My mind was much concerned in this remote place, on account of the poor foundation there is for the tide by which the land is held; no better than that of the first settlers gaining a conquest by war over the natives. From this place, I was this day told, those poor creatures were driven (as it were) by the point of the sword.

I have been informed that one part of the land hereaway, perhaps about thirty miles square, was purchased for the small consideration of nine bushels of corn, with some trifles added; this, it seems, they hold as the fairest purchase; much of the other part of the country, by conquering the injured native Indians. How can the pure Truth prosper here? The people in general seem as if they "cared for none of these things." But justice truly is a sacred thing, and due to all men; perhaps a day of trial, sooner or later, may yet overtake.

13th.—Travelling from hence about 20 miles to Fairfield, we had two meetings here; one of which was public, and large for this place. I was favored with ability to labor in Truth's behalf, in much close doctrine, which appeared to be well received. The other was with fellow-members, in a good degree favored. Fairfield is the farthest meeting of Friends up the Kennebec River. I am about 600 miles from home, in a rough wilderness country, the people fare hard, and have poor houses.

The next day had a third meeting at Fairfield, which was supposed to be the largest ever seen at this place, the inhabitants generally

coming together; an highly favored season it was, much gospel labor was bestowed, I hope to the honor of truth and the edification of many, as it was to my own peace.

15th.—The next meeting was at Vassalborough, on the east side of Kennebec River; it also was large, but a low season. Attending a meeting of Ministers and Elders next morning, we had a favored meeting, pretty large in the afternoon, on the west side of this river, and the day following attended their Monthly Meeting at Vassalborough. Here I had to mention my concern respecting the unjust way the land in these parts was obtained (as before noted), viz., by shedding human blood; believing this could not be a proper title for professors of Truth to hold their land upon.

On the 18th we rode about 45 miles back, to Durham, attending both the Select Meeting and their Monthly Meeting next day; the latter was large, the people who came behaving solidly. Here, again, I had to express my concern touching the injustice done to the native Indians, and improper title by which the land is held; which gave relief to my mind, and appeared to be well received. From here we came to Falmouth; and in the forenoon next day had a meeting at Portland, held in the County-house: a solid quiet season. A number of gay, dressy people, attended here. In the afternoon we had a seasonable opportunity with the few Friends living here, who are about seven families.

22nd. Going from hence to Windham, we had a large meeting in the forenoon; at the close of which an opportunity was taken to expose to those not professing with us, what arose in my mind in particular towards them; also at the third hour, we had a meeting with our friends by themselves. These I thought were solid and favored seasons. Their Select Meeting was the next day, and the Monthly Meeting for business the day following: the latter I thought was but a low time. After this was another meeting held in the County-house, which ended well.

25th.—We next attended the Quarterly Meeting at Falmouth. This in the select part of it, and in the first sitting for business, was a dull season.

At Falmouth Meeting on First-day morning, a disturbance was made by a person who spoke several times, until checked by the high-sheriff, who was present. After that he began again, and kept on until the meeting concluded. This afternoon I had a meeting with the young and unmarried people, Friends and others, which was large, and a highly favored season; acknowledged to be so by many of the great ones, who owned the doctrine delivered at this time. The last sitting of the Quarterly Meeting was the day following, a favored season; here was a large appearance of plain solid youth. I had also in this meeting to express my concern on account of the injuries done to the poor native owners of the land; which appeared to gain weight; several Friends expressing unity therewith, and desiring the subject might not be forgotten among them, as it was believed there was something yet due to the Indians for the lands wrongfully taken from them.

(To be continued.)

As to things of God, his truth and kingdom, I refer you to his light, grace, spirit and truth within you, and the Holy Scriptures of truth without you, which from my youth, I loved to read, and were ever blessed to me; and which I charge you to read daily.—William Penn to his children.

FOR "THE FRIEND."

Gall-Flies.

A few years since one of my friends procured some acorns from a noble oak tree that stands on the side of our village street, and planted them. Some of them grew and they are yet very small. The top of one of these slender seedlings was transformed into an irregularly shaped swelling, which seemed to absorb the sap which otherwise would have enabled the plant to make its natural growth. He cut off the swelling, and on removing part of it discovered a very small winged fly. The nut-gall (for such it was) was laid away in a small tumbler, and before long several other flies made their appearance, having eaten their way from the cells of the gall through its substance into the outer world.

The life history of these insects is briefly this. The parent gall-fly had during the previous summer pierced the tender shoot at the top of the young oak, with its ovipositor, and therein deposited a number of eggs. The injury thus given to the plant, had prevented the shoot from growing as it would otherwise have done, and caused the unnatural swelling which had formed around the eggs. These had hatched into little grubs which found a plentiful supply of food in the sap which surrounded them; and when their full growth had been reached they had changed into chrysalides, and finally into perfect flies like their parents, which on the approach of warm weather gnaw through the woody fibre of the nut-gall and come out to renew the wonderful process and provide a new generation of these gall-flies.

There are many species of these flies known to entomologists; and it is believed that every species forms a different kind of galls. This is a very curious fact, if it is so—for while it is easy to imagine, that the injury caused to the growing plant by the wound inflicted, and the irritation produced by the injection into its vessels of foreign substance might cause an irregular growth; yet one would not have supposed that these growths would have assumed such various shapes dependent on the particular species of fly that had pierced its bark. Besides the rough swelling which my friend cut from his young oak, I now have lying by me, three other forms of galls. One of these is a solid brownish yellow globe of about an inch in diameter, closely resembling the imported galls used in the manufacture of ink. Another is a large, hollow sphere, of a clay color, with a thin, fragile coat. In the centre is a hard nucleus, which is the habitation of the grubs of the gall-fly, and from this there radiated to the outer covering numerous fine lines thickly clothed with loose hairs, so as to resemble a piece of loose sponge. A third is still more curious, and is composed of numerous small cells crowded against each other along a piece of twig, and reminding one of the convolutions of tripe, trussed on a skewer, as sometimes exposed for sale in our markets. In a former article some account was given of another kind of nut-gall which was very abundant in our neighborhood last season, thousands of them being found on the leaves of an oak tree. They were small round bodies about the size of a pea.

The generic name of the gall-fly is *Cynips*—but I do not know the different species that frequent our fields and woods.

The naturalist Wood, in speaking of these insects says: "The mother gall-fly pierces with her ovipositor the leaf, twig or bark, inserts the egg, and injects at the same time a small drop of a fluid which produces very extraordinary effects. The portion of the plant which comes

in contact with the liquid is forced into an abnormal growth, and rapidly encloses the egg. Sometimes, especially on leaves, the galls are quite spherical, and of about the same consistence as a green gooseberry. Other leaf galls are quite flat, like so many small coins stuck on the leaf; while others hang by strings like bunches of currants. Some are covered with leaf-like appendages, while others are clothed with a dense mass of long soft filaments.

"In England there are many species of gall-flies, while the foreign species seem to be without number. In the collection of the British Museum, besides a vast number of species that have been named, described and arranged, there are whole drawers full of species that have as yet received no name. They are all little insects." J. W.

Seeing the Signs of Cost.

Whenever we see anything above-ground that is worth admiring, and that has any true stability or hope of permanence, we may be sure that there is a great deal below the surface just there, as the foundation of that which makes so goodly a show before our eyes. That which is seen is a sign of that which is out of sight—a sign of already expended labor and cost.

Whether it is in the world of nature, or of art, or of intellectual attainment, or of personal character, or of spiritual life, it is not all on the surface, not all in plain sight; nor is its full cost to be measured by that which is disclosed to view. If it is a graceful elm, or a wide-spreading oak, you may be sure it has roots running down and reaching out into the earth below, to give strength and security to its sturdy trunk and its swaying boughs. And it has been at the cost of summer suns and winter rains, of striving and enduring through long years of slow progress, that those roots have attained their present hold and are firm and sure for their mission of to-day.

If it is a majestic mountain rising in grandeur to the clouds, it rests on no quicksands, but has a basis broad and firm, and deep as the globe's centre. And only God can know the cost of that mountain's final fixing where it stands. The eternal hills were made without hands, but not without cost.

If it is a towering monument, or a massive pile of buildings, or a bridge spanning river and marsh with vast and lofty arches, there must have been a preliminary sinking of shafts, and laying of strong foundations, and slow unearthing of subterranean walls, before the mighty structure which now commands attention began its upward stretch above the surface. Beyond the cost of all that is seen, there is a suggestion of a former cost, in making ready a basis for that which is uplifted into sight.

If it is the finished work of a scholar in history or science; if it is a marvel of gracefulness and beauty in the sphere of literature—poetry or prose; if it is a triumph of power at the bar, on the tribune, or in the realm of applied science or of professional skill—all that is shown and seen indicates a former outlay, at the cost of which this exhibit is before the eyes. The success which is attained above the surface cannot be accounted for, but by the fact that a great deal of preparation for this was made below the surface. There must have been a cost correspondent with the value of that which commands admiration for its worth.

If, indeed, it be a noble character, or a saintly life—a character of strength and beauty, of he-

roic courage and of sublime endurance, or a life of holiness and of radiating sweetness and purity—it did not come by chance, nor was it "reached at a single bound;" it was a matter of growth as well as of grace; and the best and the most of that which is noted of good in the conduct or the countenance of the one admired and revered, was wrought silently and slowly, out of sight and below the surface.

Every once in a while some young man will be deluded with the idea that he can do as good work above-ground as those who have gone before him, without being at the trouble and the delay of all their work below the surface—that he can have the results of cost without the cost. And so, in one sphere or another, a young man begins his work on the surface—and quickly finishes it there; he exhibits what has cost him nothing, and it proves to be worth—what it cost. As Lord Jeffrey says of such unprepared and surface workers: "They who begin by effect without labor, will end by labor without effect."

There is wisdom in the counsel of one of the keenest of our satirical writers, when he says to the average young man of to-day: "I don't want to see you try to build a six-story house on a one-story foundation." It is not the question of the style of the superstructure, but of the character of the foundation, that decides the capability of the building to stand in all weather; and a good foundation always represents a corresponding cost.

In the soldier's uniform there is one thing that cannot be bought. It is the "service-character"—the little strip of lace upon the sleeve of a veteran, which shows the completion of a full term of service. Gold cannot purchase it. No favor of friends can secure it. Not even the power of the government can bestow it. It is gained only at the cost of enlistment, of campaigning, and of endurance unto the end. Every line of well-worn care in the human face is a service-character.

"Every wrinkled, care-worn brow
Bears the record 'Something done;'
Some time, somewhere, then or now,
Battles lost, or battles won."

It was not until Moses had been at the cost of forty years' living in the palace, and forty years' living in the desert, and of forty days' fasting in sacred communion with God in the mount, that his face shone with the reflected effulgence of the Divine glory, and that his very countenance proclaimed the beauty and the holiness of the Lord's presence. When any of us have had somewhat more than now of such preliminary training as was thus secured to Moses, we may have somewhat more in our countenances of the Divine light which illumined his. Whenever we see an approach of that light on a child of God's countenance, we may be sure that there has been something of this training going on in his mind and character.

The severest toil of all well-doing, and the greatest cost of all well-being, must ever be below the surface, and out of sight. And that which has power or beauty above, must depend upon that which has been slowly and painfully performed or endured below, even, perhaps, at the price of life as well as of ease and comfort. "You remember," says one, "how corals grow. The reef is not a building constructed by them; it is their own life that crystallizes within them, and it is left behind them as they climb upward toward the light. And, as they climb, the sea-bottom sinks beneath them, and the surface seems, perhaps, unattainable to their patient labors. Yet by and by it is gained, though the

corn-makers die in reaching it, and over the records of their ceaseless toil appear at length the verdant fields and fruitful palms of islands that lie like gems upon the bottom of the sea."

Whatever of strength or beauty we see or show, represents a cost that is commensurate with its admirableness. In the light of this truth, we ought neither to begrudge the cost which must be paid for any fitting exhibit of good before the world, nor fail to give honor to those who show that they have paid that cost.—*S. S. Times.*

FOR "THE FRIEND."

"A double-minded man is unstable in all his ways."—James, chap. i, 8th verse.

If, through fear, he be being one-sided, a man seeks to avoid showing loyalty to right, and fails in a course of action to steadily uphold the Truth, he is in danger of giving his influence on the side of falsehood, instead of Truth. If he arrives at the conclusion that *truth* and *right* point out a plain path to walk in only for a limited time; that changes are essential, in order to improvement; thus making trial of different conclusions rather than those which, under conviction, were first formed—that man soon finds himself nowhere.

Does not the world need a better standard of uprightness than double-minded men have ever raised?—a standard more in accordance with sacred Scripture? Read the Bible without prejudice. "Look unto Abraham, your father, and unto Sarah, that bare you: for I called him alone, and blest him and increased him."

There is danger in having recourse to change under color of improvement, lest, substituting the new for the old, waste may occur through lack of fitness one to the other, and thus we become imperceptibly drawn into a false liberty. If ever it was possible to counterfeit an original, it is possible in this our day. If as to the root of the matter relating to the conducting of Friends' meetings, Friends were a united people, laboring together in the love and fellowship of the Gospel, having the same faith as father Abraham and all those who by faith were made inheritors of the promises, then would needless controversies cease among Friends and the Scripture saying be verified, "Wisdom is justified of all her children."

The pure truth is worthy of being stereotyped for the benefit of ages to come. That which has caused the lack of agreement among us touching some cardinal points of doctrine and practice, with the introduction of that which is false instead of the true, it is to be hoped will be abandoned by all those who claim to be shepherds of the flock, and thus unity be restored among Friends, to the exaltation of Christ, our Bishop, Priest, and King. P. R. G.

PROVINCETOWN, Fourth Mo, 7th, 1890.

CARE and responsibility are necessary elements of human existence. It is sometimes said of a young lady that she never knows what it is to have an anxious thought, or to have care, or responsibility; she has health, wealth, servants, and friends; she has nothing to provide for, nothing to worry over. But what greater cause for anxiety could any one have than this? What greater responsibility than that of being nothing and doing nothing? One who finds comfort and peace in supposing himself without cares may well take alarm at what ought really to be his most serious care. If he supposes that he is without responsibility, he may well shudder at the responsibility of his

own apathy—of assuming to be without care and responsibility.

MOTHER'S RULES.

Hang your hat on the staple,
Was dear mother's old rule;
And then 'twill be handy
When going to school.

A place for each thing,
And each thing in its place;
You can go in the dark
And each article trace.

Whatever is worth doing
Is worth doing well;
Take time for your sewing,
Your work will excel.

Be quiet and steady,
Haste only makes waste;
Steps hurriedly taken
Must needs be retraced.

A bad habit cured
Is a good one begun;
The beginning make right,
And your work is half done.

What you should do to-day
You must never postpone;
Delay steals your moments
And makes you a drone.

Never say, "I cannot,"
But "I'll try, try again;"
Let this be at all times
Your cheerful refrain.

Be content with your lot;
Be bright as the sun;
Be kind and be true,
All wickedness shun.

Love God and your neighbor,
The Golden Rule keep;
Walk daily with Jesus,
And in his love sleep.

FOR "THE FRIEND."

PASSING AWAY.

What of thy beauty, daughter of Eve?
Why thoughtfully stand at thy mirror and grieve;
Grieve that thy tresses are shaded with gray,
Grieve that thy beauty is passing away,
All things around thee are fading and frail,
Much has thy heart while 'tis here to bewail,
Much to remember and more to forget
Of the things which might grieve and cause us regret;
As day changes to night, and night changes to day,
Even so are we changing and passing away,
And our many joys and our manifold fears,
Are changing and passing away with our years,
Child of mortality, why art thou sad?
Look at the bright side of life and be glad;

Think that the seeds which are sown in the field,
Must die ere the fruit for the sower can yield;
Think that thy frail tabernacle of clay,
Like the seed in its season must die and decay,
E'er thy soul in the light of thy Saviour can shine,
Or the fruit-bearing branch can abide with the vine.
Passing away! Ah! what is our life,
A mixture of happiness, sorrow and strife—
A trio of tears, of smiles, and of sighs,
The grass that grows up in the morning and dies,
A vapor, a post, a shadow, a dream,
A bubble that bursts as it floats on a stream,
A frail little barge on the ocean of time,
Drifting thro' storms to a sunnier clime;
Shipwrecked, perchance, on a rock or a shoal,
E'er the barque thro' its weakness has reached to the goal.

Passing away like our fathers of old,
Soon gone and forgot as a tale that is told,
Leaving no trace of existence to show,
That we dwell in this land of our fathers below,
Passing away from our cares and our fears,
Leaving behind us our smiles and our tears,
Leaving behind us the toil and the strife,
And the manifold cares and the conflicts of life,
Passing away from the treasures we prize,
It may be the pride and delight of our eyes,
Leaving them all to the moth and the rust,
Returning in quietude back to the dust.

Passing away from the spade and the plough,
And the toil that has drawn out the sweat from the brow,

Leaving the place that so long we have known,
That others may reap what our hands may have sown,
Passing away that another may bear,
In life's rugged pathway our burden of care,
Tread the same paths that from childhood we've trod,
Raise the same furrow and turn the same sod,
Passing away from our dwelling of rest,
Leaving the friends that we cherished the best;
Laying our load of mortality down,
Changing the cross for a harp and a crown,
Passing away in their beauty and pride,
The loved and the loving the bridegroom and bride,
The sons and the daughters of fashion and state,
The poor and the needy, the rich and the great,
Passing away to that land of repose,
Where the sleeper remembers no longer his woes,
Where the prince and the peasant are equal, and where
The hand of the spoiler no mortal shall spare.

EDWARD ALLEN.

Hurry.—Some people are always in a hurry, and generally always behind-hand. The two go together; for hurry is the child of a state of mind rather than of a train of circumstances. The methodical man is never in a hurry. He moves along in his orbit, as Goethe says the stars do, "without haste and without rest." He knows what is first to be done, what next, and how long each item to be attended to will require. He sees, in an exigency, what can be omitted or deferred, and what must be done according to the programme he has made. If he is due at a certain train, he is there on time, with five or ten minutes to spare. If a certain task is to be done by a certain date, the work is ready a little in advance of the date.

All this comes of a habit of forecasting, planning out, of working daily according to a settled programme, of allowing for each tick of the pendulum a second to tick in.

If the person who is always in a hurry will sit quietly down and make a list of what he has to do, what must be done, what may be omitted, and of the time each task will probably take, of the limit beyond which work cannot be deferred, and will then simply work up his programme, he will find no need to be in a hurry.

Some housekeepers are always in a hurry about breakfast or dinner, or having their sewing done, or making calls, or something else; and they do not realize that hurry is in their state of mind, is within them, and not caused by circumstances outside of them.—*Selected.*

Overdoing for Children.—It is quite possible to do too much for children, though some parents do not seem to think so. It is good for a child to do all he can for himself, to amuse himself, to wait on himself, and to perform such little offices for those about him as he is well able to do. A child who is the centre of service, who does little but receive kindness, attention, gifts, is apt to become "all mouth"; his capacity for active charities and benevolences is not developed, and he loses the greater blessedness of giving.

The very first requirement of our Lord is, "Deny thyself;" then, "take up the cross." Children who are not taught the lesson of self-denial and of cross-bearing when young, are likely to grow into selfish and exacting men and women, unchristian men and women.

Even a sickly child needs to learn to consider the welfare of those about him, to be tender of their feelings, to deny himself some things in the interest of others. The tendency in such cases is to lavish everything on the patient, to deny him nothing, to require nothing from him.

The wise and judicious parent cannot fail to see that symmetry and beauty of character need to be cultivated as much in delicate children as in those that are robust. This is in their own interest not in the interest of those around them. Every body is glad to help a suffering, unselfish child, and smooth the thorns from his path. The manifestation of selfishness, of indifference to the welfare of others, though in a sick and suffering child, dulls the edge of sympathy in those that serve him.

Even if a parent is quite independent of the help of the child, it is good for the child to feel that he can minister to the comfort and happiness of the parent in many ways, and to be required to do what he can to contribute to the common good of all the circle of which he is a member.—*Exchange.*

Visit to the Volcano of Irazu, in Costa Rica.

BY AN ENGINEER.

We were two young engineers from New England, surveying the route for a railroad across Costa Rica, from ocean to ocean. Ever since we reached San José, the capital, this volcano, rising 13,000 feet from the sea-level, had sent up its column of smoke on our north-eastern horizon, at first far away; but we had surveyed our line thus far, till now we were on its very foot-slopes. John and I had talked and planned for this visit, and now came the opportunity.

Behold us, then, early one April morning, riding along the lower slopes of the mountain. Our party consisted of ourselves, our guide, Rafael, a dark-looking man of Spanish extraction, and our best pony, Chinchilla, all riding on mules, with ponchos and blankets strapped to the saddle. Rafael beguiled the way by stories of the fearful deeds of Irazu in years gone by. The last eruption took place 130 years ago, but frequent earthquakes since have shown her dormant power.

"See, Señores, what a fearful thing was done by Irazu. In 1841, all yonder city," pointing to Cartago, that lay at our left, "was laid in ruins and her beautiful cathedral, her magnificent cathedral was utterly destroyed. The vacant place where it once stood, see yonder."

Till sunset we rode on through great upland pastures, filled with herds. Late in the day we passed a small village of *vaqueros* (herdsmen), and, night coming on, we found a camping place by a running stream, where was grass for the mules. There we had our tent pitched, our hot upper of coffee and canned meats prepared, and shortly after rolled ourselves in our blankets and lay down to sleep and dream of home and weathereads so far away.

At four next morning we rose, had our hot breakfast, saddled our mules by starlight, and were ready to start by the time that dawn began to peep up in the east. Our road lay now through a belt of heavy timber, and in the course of an hour we saw that we had lost our way, Rafael, spite of his heavenly name, being in uncertain guide. Fortunately I had my pocket compass with me and had taken the bearings of the peak the day before. By retracing our steps, we at length found a road that led in the right direction, and though not the hottest one, it brought us out right. When we merged from the forest, there lay before us the rare peak, composed of sand and scoriae and shes, with here and there a stunted bush. We were at so great an altitude that the air was

very thin and the difficulty of breathing great. Here we found our mules could bear us no farther. So we dismounted and struggled up on foot, the yielding ashes making it hard work. A thick fog enveloped us and a northeast wind cut our faces. But we toiled on until we emerged from the fog and stood in the clear sunlight on the mountain's top. And what a view! Below us tossed and tumbled, as it were, the waves of a mighty ocean of fog; the billows rising and falling and surging hither and thither. Far away to the northeast a rent in the fog-curtain showed us the blue Atlantic, while westward we caught the play of light on the bays of the Pacific. The two oceans at once! How our hearts leaped at sight of the Atlantic whose waves bathe our native shores.

"But where, Rafael, is our volcano?"

"This way, Señores," and he led us westward till before and below us lay the volcano. It was a huge crater, a mile in circumference, with sloping sides, 500 feet in height, save on the lower rim, where a flood of lava had some time broken through. It lay not on the exact top of the mountain, but on its northern side. There were eight volcanic cones, rising in this crater, only one being in an active state, and this was on the farther side from us. From a yawning mouth, 300 feet across, it sent up volumes of sulphurous smoke, while far in the bowels of the earth we heard the continual rumbling as of distant thunder. Between us and it lay a fearful region of desolation, filled with ragged rocks, glassy surfaces of lava, and heaps of scoriae and ashes.

Rafael here declared we could go no farther. "Irazu would be angry and destroy us should we venture into the crater." Seeing us determined to go on, he begged us to walk very softly and not to speak a loud word, lest we be treated to a shower of stones. Faithful Chinchilla said: "Where the Señores go, there I will go." So, slipping, sliding, rolling, we three went down the inclined plane and then picked our rough way over lava and scoriae till, quite wearied out, we stood by the crater. A sudden gust of wind blew the sulphurous smoke in our faces, and it was so suffocating we were obliged to flee before it. Coming up another side, we gathered for a trophy some of the sulphur that crusted all the rocks about; then, as the wind blew the smoke aside, we threw ourselves flat down and looked over into the yawning gulf that opened to the bowels of the earth. Stones pushed or bounded from side to side, till lost to sound and sight. Deep within raged those hidden fires that supplied the upward ever-rolling clouds of smoke that ceased not to rise day and night, year in and year out. But what a sudden thrill of fear went through us as we saw that this crater sloped inward directly under us. Had the thin crust on which we lay broken beneath us, then indeed would have come a tragic end to our story. More quickly than I can write it, we withdrew, and giving a parting salute with our pocket pistols to Irazu, we sought to return.

"Easy is the descent to Avernus, but to retrace our steps, that is the labor," and so we found. Now we slipped backward on glassy surfaces—now waded through ashes and scoriae, and, climbing with incredible labor, we found ourselves on the crater's western rim directly opposite the point at which we ought to have emerged. Between us and that was a narrow ridge in some parts but two feet wide, nowhere over ten, a quarter of a mile in length, one side falling in—a precipice steep as the wall of a house—the other a slope of sand and ashes

stretching away five thousand feet and ending in a like precipice. A dog stumbling here once was unable to save himself, and the whole distance and was lost. To make the path more dangerous, was a strong wind was now blowing. But we were engineers accustomed to climbing fearful heights, thanks to our good habits, our heads were clear, our nerves were steady, and we walked the ridge. But ugly how the wind did blow, as if it would take us like a leaf and sweep us far out to sea.

"What, alive?" exclaimed Rafael. "When I heard you fire your pistols, I gave you up for lost."

"Ho!" said I; "our people are not afraid of such things." He looked at us as if we were indeed superior beings.

As we came down the mountain and got below the belt of fog, we had a lovely view of the green fields and the red-roofed city of Cartago. Late in the afternoon we arrived at our quarters, too tired for anything but to lie in our hammocks and dream over what we had seen.

Natural History, Science, etc.

Captain John-Ericsson's Rat-Trap.—The captain had found his occupancy disputed by a numerous horde of rats, who considered themselves tenants at their own will, and stubbornly refused to yield possession. Regarding the situation as a problem to be solved by mechanical means, with his own hands he drew the plans for a vast and mighty trap. To the leading idea—(of a water-tank beneath a trap door)—he laid no claim, but the details were wholly new and upon an unheard-of scale. Tracings were made by an assistant draughtsman, and went the rounds of the shop; the pattern maker, the brass founder, the finisher, the carpenter, the tinsmith, each had a share in this novel work. At last it was completed and erected; it filled up half the basement, and was baited with half a cheese. He had originally intended to use a whole one, but, though cost had been disregarded in making the trap, he suddenly became gravely economical in the matter of bait, and at last decided that one moiety would suffice, the other being placed in an adjoining room to guide the noble army of martyrs in the road to ruin. But he had underestimated the cunning of the rodents. As a place for keeping cheese in safety the ponderous engine answered admirably, but it did not even frighten away the obnoxious animals, and he was forced to admit that "these little beasts have brains altogether too big for their heads."

Before this time, when some over-ambitious and unsuccessful piece of mechanism came to his notice, he used to say, like many another: "The man who contrived that couldn't plan a rat-trap." And the force of habit sometimes impelled him even afterward to use the same familiar ejaculation; but the memory of this failure was ever present with him, and, with a merry twinkle in his clear blue eyes, he invariably added: "And I couldn't do that, either."

For Paris Green Poisoning.—Many persons are liable to be poisoned by insecticides, especially in using Paris green. —Fernald, of the Massachusetts Experiment Station, in alluding to this matter, advises to never neglect treatment because the case seems hopeless. As a rule, vomiting sets in instantaneously, and if the poison has been taken on a full stomach the whole of it may be gotten rid of. If, however, the poison be taken on an empty stomach, it sticks to the walls and sets up an intense inflam-

mation. It should be the endeavor first to get rid of the poison, and to this end administer hot milk and water and emetics of sulphate of zinc or mustard; at the same time the throat should be tickled with a feather; but in no case should antimony be given. After free vomiting give milk and eggs. Sugar and magnesia in milk is a good mixture, an insoluble compound with arsenious acid being in this way formed. Whatever active measures are taken in case of poisoning, one should not neglect to call a physician as early as possible.

Rats Carrying Eggs.—L. L. Cloud, of Omaha, in a Chicago paper, says: Last summer the girl kept complaining that she never could find any eggs in the barn. I did not think much of it at first, but finally, when the complaint was repeated almost every day, I began to think it was rather strange that we should not get more than three or four eggs when we had at least five dozen hens—and so determined to look into the matter. It was more than a week, though, before I solved the mystery, and then it was merely by accident. I was standing by the barn one morning, when a hen came cackling from her nest in the manger, and a few minutes after, a big rat came from his hole, ran across the barn and climbed into the manger. I could hear him, and was idly watching to see what he was doing, when you can imagine my surprise to see him rolling the egg in front of him toward the edge of the manger. After a good many efforts he finally succeeded. He paused there, gathered the egg up under his "chin;" he rolled himself completely around it, resembling the form of a hedgehog when alarmed, then he deliberately rolled over the edge of the manger, and dropped squarely on his back on the floor, two feet below, thus saving the egg whole. Immediately he began to squeal with all his strength, and just as I was starting to put him out of his misery, thinking he had broken his back in the fall, two other rats appeared on the scene. They ran up to the first one, as he lay on the floor, and each seizing hold of a hind leg, began to drag him, egg and all, across the barn. Just as they reached the hole, and the first old grizzled fellow disappeared, pushing the egg in front of him, it dawned on me that I had at last found out where our eggs had been going.

A Pet Woodpecker.—The golden-winged woodpecker, otherwise called the flicker and high-lole, is one of the best known of American birds; a handsome creature, somewhat larger than the robin, with red crescent on the back of its head, a black crescent on its breast, and especially noticeable for the yellow lining of its wings and tail. A New York gentleman, some years ago, took a young one from the nest and brought it up and found it to be a very interesting pet.

The bird could thrust out his tongue two or three inches, and it was amusing to see his efforts to eat currants from the stick. He would run out his tongue and try to stick it to the currant. Failing in that, he would bend his tongue around it like a hook and try to raise it by a sudden jerk. But he never succeeded; and the round fruit would roll and slip away every time. He never seemed to think of taking it in his beak.

His tongue was in constant use to find out the nature of everything he saw; a nail-hole in a board, or any similar hole, was carefully explored.

This curious organ gained him the respect of

a number of half-grown cats that were about the house. I wished them to get acquainted with him, so that the danger of their killing him might be lessened, and for that reason I used to take kittens and bird on my knee together. At such times the woodpecker's curiosity was sure to be excited by the kitten's eyes, and leveling his bill as carefully as a marksman levels his rifle, he would hold steady for a minute and then dart his tongue at the bright round object.

This was held by the cats to be very mysterious; being struck in the eye by something invisible to them. They soon acquired such a terror of the bird that they would run away whenever they saw his bill turned in their direction.

My high-lole was never surprised at anything nor afraid of anything. He would advance upon the turkey-gobler and the rooster, holding up one wing as high as possible, as if to strike with it, and scolding all the while in a harsh voice as he shuffled along toward them. I feared at first that they might kill him, but I soon found that he was able to take care of himself.

His favorite diet was ants. When I turned over stones and dug into ant-hills for his benefit, he would lick up the ants so fast that a constant stream of them seemed to be going into his mouth.

He stayed with me till late in the autumn, when he disappeared. Probably he yielded to the migratory impulse and went South.

Items.

My Personal Experience with the Effect of the Modern Cigarettes.—Under this heading we find a narrative in *The Church Union*, apparently written by the editor of that paper. It says:—

"About six weeks ago a bright boy, with whom we were well acquainted years ago, applied to us for a position as office boy. He had been unfortunately lost his former position through unfaithfulness and suspected dishonesty. I had sought other positions in vain, was utterly destitute, had been for months sleeping in a lodging house at fifteen cents a night when he could get the money to pay for his bed, but much of the time wandering about the streets of the city, many times spending the entire night in Central Park hiding about in secluded places until after the officers had ceased their diligent efforts to rid the Park of such incurable. He had a bad cough, no overcoat, and was so cold and stiff, he could seldom get to sleep on the benches. We refused nearly every day for three weeks to take the boy, because we were afraid he would prove dishonest and be unable to work in a satisfactory manner. He begged with tears to be allowed to come to work and have his food and a place to sleep. The food we gladly bestowed to the weary-worn tramp of less than eighteen years of age. This boy graduated at the Grammar School nearly two years ago. He was utterly destitute, with no clothing except the rags that covered him. He said he had worn the same shirt for the past year, and would go to work in that. He had no coat at a time rather than without his cigarettes. One of his young men companions, who called upon us to ask for money and clothes for him, said that he was in the habit of smoking two packs of cigarettes each day, and the boy himself confessed to us that he must have cigarettes, no matter how the money was procured, or he would die. He said that he would reform and do everything required except to give up tobacco. Every means of persuasion was exhausted to induce the boy to renounce his smoking. We held firmly to our decision never to give him more than food, until he could give up the use of tobacco, as we knew this to be his ruin. After our needs he presented to us a pack of cigarettes, would never smoke again. According to agreement we took the boy into our home and gave him work

in the office. With baths, wholesome food, and entire new clothing, he looked and possessed the manners of a college student, but was so nervous and restless while writing that it was impossible for him to render any satisfactory service. When he had been sent on all the legitimate errands possible, as well as many that were arranged simply for his diversion, he asked, of his own accord, if he could not be permitted to assist the servant man in cleaning the cellar, railing out man to be required to write the office. The result of this effort and reform is simply this, the boy was arrested last week for theft. He confessed to the detective that he had carried out several sets of books from the library in the office; that he had stolen money from the proprietor's writing desk; that he had robbed trunks in the cellar, and committed other similar depredations. A number of articles on which he had raised money were redeemed from pawn shops. Most of the books, singly and in sets, he had sold outright to second-hand dealers.

When the proprietor of this journal visited the boy at his cell after he was sentenced to the penitentiary, he said that he would try to reform, and believed that he would never have stolen anything. If he had any articles or money which he had habit had unfitted him to be faithful in any position of trust. During the last year this boy has been in the habit of visiting the play-house nearly every night, with comrades worse than himself.

The boys who smoke cigarettes day and night, and frequent ten cent or twenty-five cent shows habitually, soon tire of any legitimate position to earn money.

Welshmen and the Army.—The peace labors of the late Henry Richard, amongst his countrymen in Wales, is about to be now bearing fruit in a practical way. For a military officer, Colonel Liddell, has published a complaint that in Merionethshire and Carnarvonshire it has become almost impossible to enlist soldiers, on account of a local popular feeling that it is a disgrace to be a soldier. If these good people knew as much, as some others could tell them, of the horrible immoralities and profligacies of "the bad" and "the wicked" in the military camps, and dislike to a soldier's life would be further intensified.—*Herald of Peace.*

Fruits of the Pastorate.—Dear Friend.—It was my lot to be present at a meeting for worship, under the care of a Home Mission Committee's pastor and his wife on First-day last.

Of the meeting in itself, I will say but little. The pastor was away, and his place was supplied by a person whose name I think I have on the committee.

Shortly before the close of the meeting, a request was made from the bottom forms that those who felt a desire to hold a regular meeting after the manner of Friends in the afternoon or evening of First-day would keep their seats at the rise of this, to confer on the subject, after which the pastor's wife made a counter-move, requesting the elders and overseers also to remain.

It was the result of a conference as a preliminary to laying the matter before the Preparative Meeting, it became necessary to state to the official members that there was a desire for a *Friends' Meeting* at the time stated, which would be open to some who did not feel satisfied that it was profitable to attend the evening meeting, as at present conducted. After the subject was opened, one young man rose and read a paper, in which he stated that he was one of those who had not felt free to attend the evening meeting, that our meetings should be held in the power of God, but that was held in the power of man.

The pastor's wife, however, taking the lead, remarked that some of the dissentient Friends had done nothing for their neighbors, when they had the field free before the mission came, and were at last professing a concern for them, as it had been hinted strangers might drop in sometimes. To this it was replied, that the field was not free for these Friends at that time, and the officials of the meeting were appealed to, as a matter of common fairness, to be ready to receive such as might be present, if they turned a deaf ear, on the plea it would be an *opposition meeting*, which could not be allowed, and that

the majority must bear sway. In other words, a reference to which a "reverend" has been known to be invited as a leader, is in order, and a meeting for waiting on God is out of order, in premises belonging to the Society of Friends, while those who wish to meet in this way were recommended to go elsewhere. Some of them, however, are working men, on wages that cannot be considered high, and the rent of suitable rooms would be in itself onerous. Perhaps some of thy readers can inform me whether the unwritten instructions to the servants of the Home Mission Committee sanction such proceedings against any that venture on independent action in the meetings over which they preside. J. E. S.

Second Mo. 24th, 1890.

I should add it was not proposed that the meeting should be held at a time when any other was being held.—From "The British Friend."

THE FRIEND.

FOURTH MONTH 26, 1890.

PHILADELPHIA YEARLY MEETING.

The feelings with which some of the members came up to their annual solemnity, we believe may be expressed by an extract from a letter written to the editor by a beloved Friend a few days previous to the time of its assembling:—

"The approaching week brings with it an exercise that the meetings may be held under the guidance and love of the true Shepherd. That we may assemble in reverence and godly fear before Him who alone can bless our gathering together, and that the spirit of supplication may be poured out upon all the congregation, under a sense of our needs and dependence upon our holy Head, for every qualification to serve his cause."

In the Yearly Meeting for ministers and elders, which convened on Seventh-day, the 19th of the Fourth Month, a clear testimony was borne to this dependence, and to the need there was in all religious services for waiting for the Divine command and the putting forth by the Head of the Church of his servants. A caution was delivered against the delusive notion which some have adopted, that after experiencing a feeling of consecration to the Lord's cause, they are in such a condition that every suggestion to labor which crosses their minds, may be assumed to be the direction of the Spirit of Christ. The true servants of the Lord are kept in a humble, watchful state, and must know the restraining as well as the constraining power of the Almighty to influence them; for the Lord will not give his glory to another, and only those works which are performed at his command and under the guidance of his Spirit, will promote his blessed cause.

Another subject that claimed considerable attention in the meeting, was the importance of the right training of the young. "Gather the children" was the language which had been presented to the minds of some.

There are in attendance at this time a number of visitors from distant parts—from the Yearly Meetings of London, New England (both the larger and smaller bodies), Canada, North Carolina, Ohio, Indiana, and Kansas. At the sitting on Second-day morning the minutes of the Meeting for Sufferings were read.

One of the most important of the concerns which had claimed its attention during the past year, was an exercise which had spread over it

for the religious welfare of the younger members of our Society. It issued in recommending to the Monthly Meetings the distribution among such of their families as were not already provided with them, of copies of the Rules of Discipline, of the Book of Advices, and of the Brief Account of the Rise of the Society. These were to be accompanied with a minute of advice, drawn up by a committee of the Meeting for Sufferings, to show more clearly the nature of the concern which the meeting felt.

The work of distribution, it is probable, has not yet been completed; but about 1800 books have been taken from the book store for this purpose. There is reason to believe, also, that the social intercourse between the committees of the Monthly Meetings and the families they have visited has been useful.

The Report of its Book Committee showed a continued activity in that important branch of the duties entrusted to the Meeting for Sufferings. In addition to keeping up the supply of books heretofore kept in stock, they had purchased part of an edition of *Memoirs of Mildred Ratcliff*, issued by Friends of Ohio Yearly Meeting, and had directed the printing in a separate volume of the *Memoirs of Edward Burrough*, contained in the fourteenth volume of Friends' Library. The whole distribution reported was 3,945 volumes and 3,642 pamphlets.

During the past year two grants had been made out of the funds in the hands of the Charleston Trustees—one of \$400 to White River Monthly Meeting, Indiana, to assist in building a meeting-house at Laura, Miami Co., Ohio, and one of \$300 to Somerset Monthly Meeting, O., to assist in repairing a meeting-house.

A bill having been introduced into the New Jersey Legislature, which proposes to make the State a partner in the demoralizing business of horse-racing, by demanding a percentage of the money paid for admission fees to race-courses, a committee had been appointed to protest, in the name of Friends, against the passage of such a bill, and to denounce the practice of horse-racing as associated with much that is immoral and of hurtful tendency to the community.

The committee to watch legislative proceedings had been exercised on account of the proposal to expend a large amount of money on the navy and fortifications of the United States. They had prepared a memorial to Congress on the subject, which was a lively testimony to the peaceable nature of the gospel and a protest against the expenditure of money for warlike purposes.

The trustees of the legacy left by Charles L. Willits, had continued the publication of *The African's Friend*, which had been distributed among the colored people in the Southern States and in Liberia.

Much unity and satisfaction was expressed with the minutes of the Meeting for Sufferings. In the consideration of the minutes a concern was felt that Friends, while endeavoring to spread a knowledge of the principles of Truth as held by our Society, might so live under the government of Christ, as to exemplify the heart-changing effect of its operations, and thus become living witnesses of the efficacy of his religion.

We hope, in a future number, to print in full the excellent memorial to Congress. This document was fully united with.

The Indian Committee requested an increase of the annual appropriation for the support of the school at Tunesassah, to \$2,000, which was granted by the meeting.

Their proposal to have some women members added to the committee, was also united with.

After appointing a committee to examine the accounts of the Treasurer, the meeting adjourned.

We were favored to transact the business with harmony and under a reverent sense of the solemnizing presence of the Head of the Church, so that it may be truly said, we had a good meeting.

(To be continued next week.)

Among the bills which are claiming the attention of our national legislature is one that requires the registration of the Chinese in this country, and makes it an unlawful act for any native of China to remain in the United States without the possession of a certificate from the legal authorities. It has excited considerable feeling of opposition in the minds of many persons of cool judgment, who regard it as an unnecessary imposition on the Chinese, as well as liable to great abuses in its practical workings if it should become a law.

In the United States Senate on the 7th inst., a memorial was read from the New York Chamber of Commerce earnestly protesting against the passage of the bill for the several reasons.

First. It is a violation of the treaty of 1860 between the United States and China, and a gross affront to a great nation which has always sincerely kept its plighted faith respecting all the stipulations of its treaty with the United States, and has uniformly met the demands of this nation in the most friendly and conciliatory manner.

Second. It will surely still further provoke the hostile and unfriendly feeling of both the rulers and people of China, which has resulted from similar and unjust legislation on the part of America during the past ten years, and which has already led to diminished trade between the United States and China, and threatens to destroy it permanently.

Third. In its treatment of the Chinese now in the United States, and of the government and people of China, the proposed measure is absurd, barbarous, and unwarrantably cowardly. It is an absurd pretense that 65,000,000 of American people with all the power and intelligence which warrant the claim that they are one of the greatest nations on earth, should be in danger of contamination and debasement by the presence of 70,000 Chinese, inoffensive quiet persons, scattered over an imperial territory and prevented by law and by their own preferences from becoming citizens, or taking any part in our civil affairs. It is barbarous because it submits these inoffensive people to cruel restraints, unknown to any other class of our people, or in any other civilized nation of the present day. It is unchristian, as tending to degrade these persons, whom we once cordially invited to our shores, and to give them the same friendly and profitable by the influences of Christian civilization. It is cowardly because it is a wanton act of oppression and injustice, inflicted by a powerful nation upon persons, in numbers and in circumstances, weak and incapable of resistance. It is cowardly, as regards the government and the people of China, because it is plain that that government has received no intimation, and that government to resent our insolence.

Fourth. It is dangerous to the peace and prosperity of the United States. The lesson that it teaches, that the sacred obligations of treaties may be violated at the will of the Legislature, without notice, and with no effort to secure a modification of the treaty by friendly negotiation, may some time easily be applied to other treaties and by other nations to our disadvantage.

On the same day, a petition to the same general import was presented to the Senate from

the Board of Foreign Missions of the Reformed Church.

We are glad to see these evidences of a regard for the reputation of our country, and of respect for the principles of equity and humanity, which are assumed by the introduction into Congress of such a bill; and we sincerely desire that these remonstrances may be heeded and that we may be spared the disgrace of enacting such a law as is proposed, for it is an unchanging truth, that "sin is a reproach to any people."

The Independent, of New York, says of the bill, "It is infamous. It proposes to brand innocent men as criminals."

SUMMARY OF EVENTS.

UNITED STATES.—On the 16th instant in the Senate, the resolutions of the majority committee, declaring Wilber F. Saunders and Thomas C. Power (Republican) entitled upon the merits of the case to seats in the Senate from Montana, were agreed to by a party vote—yeas 32, nays 26.

It is probable that the Republican joint committee of Senators and Representatives on the silver question will fall to agree on a Silver Coinage bill. The Senate has not yet decided upon the extent of the silver bullion shall be redeemed in silver, while the Representatives insist that they shall be redeemed in "lawful money"—that is, all forms of money issued by the Government.

Just before the adjournment of the Pan-American Conference last week, Secretary Blaine, speaking of their decision in favor of International Arbitration, said: "If, in this closing hour, the Conference had but one deed to celebrate, we should dare to call the world's attention to the deliberate, confident and solemn dedication of two great continents to peace and to the prosperity which has peace for its foundation. We hold up this new Magna Charta, which abolishes war and substitutes arbitration between the American Republics, as the first and great fruit of the International Conference."

Secretary Blaine, on the 21st instant, telegraphed Captain Bourke, in charge of the special train that was carrying the delegates to the Pan-American Conference on their Southern tour, to return to Washington from Richmond. This was done because so few of the delegates desired to continue the tour.

William E. Jackson, a lawyer in Augusta, Georgia, has perfected mechanical appliances for making bagging from the cotton stalk. Expert cotton men say it is in every respect equal to cotton bagging. He will utilize the bare stalks from the fields, and can afford to pay about two dollars a ton for them. An annual stalk yield will be about three years' cotton crop. The machinery comprises heavily weighted corrugated rollers, with vats of running water, carding machines and bagging looms. It is estimated that in making bagging from cotton stalks, 20 million dollars annually will go into the pockets of farmers for what is now cleared from the fields at an expense.

In the Iowa House of Representatives on the 15th instant, a joint resolution from the Senate for a resubmission of the Prohibition Amendment to the people was called. Efforts to procure a suspension of the rules for its passage failed, and it cannot be brought up again for two years.

All the Governors of Iowa since 1859 are alive and healthy; it is said.

The Independent gives returns of the vote of one hundred and twenty-six Presbyteries of the Presbyterian Church on revision of the Confession of Faith. These returns show that eighty-two Presbyteries have voted in favor of revision, forty against revision and twenty have refused to vote. There are yet eighty-six Presbyteries to be heard from, and the indications are, says the *Independent*, that the vote in favor of revision will be nearly, if not quite, two-thirds of all the Presbyteries.

The Dickerson Mine, in Morris County, N. J., has reached the perpendicular depth of 1070 feet. The bottom is now 335 feet below sea level.

Farmers in the vicinity of Atchison, Kansas, report that a sort of wire worm is doing great damage to the wheat. The worm is about an inch long, and of the thickness of fine wire. Wherever it works the wheat soon withers.

In the case of Samuel Kinball, 16 years of age, who

died in New York, the doctors say that his system had been so thoroughly impregnated with nicotine from cigarette smoking that the heart was unable to perform its proper functions.

Deaths in this city last week numbered 432; 26 more than during the previous week and 9 more than during the corresponding period last year. Of the foregoing 236 were males and 196 females; 65 died of consumption; 49 of pneumonia; 26 of inflammation of the lungs; 24 of scarlet fever; 19 of inflammation of the stomach and bowels; 15 of bronchitis; 14 of convulsions; 13 of typhoid fever; 12 of marasmus; 11 of casualties; 10 of inanition and 10 of apoplexy.

Markets, &c.—U. S. 4½, 103½; 7½, 122; currency 6½, 116 a 126.

Corrosive-sulphur bit firm at 11-15-16 cts. per pound for middling brands.

FEEB.—Winter bran, about \$17.50; do. fair to good, \$17 a \$17.25; spring bran, \$16 a \$16.50.

FLOUR.—Western and Pennsylvania super, \$2.50 a \$2.80; do. do., extras, \$2.90 a \$3.25; No. 2 winter family, \$3.25 a \$3.40; Pennsylvania family, stone ground, \$3.50 a \$3.75; Pennsylvania roller process, \$3.75 a \$4.00; Western winter, clear, \$3.00 a \$4.00; do., straight, \$2.75 a \$3.00; do., straight, \$2.50 a \$2.75; Minnesota, clear, \$4.00 a \$4.30; do., straight, \$4.35 a \$4.85; do., patent, \$5.00 a \$5.50; do. do., favorite brands, \$5.60. Rye flour was in fair demand and higher; 100 barrels choice Pennsylvania sold at \$37.00, and small lots at \$36.00.

GRAIN.—No. 2 red wheat, 55 a 56 cts.

No. 2 mixed corn, 39½ a 39 cts.

No. 2 white oats, 34 a 35 cts.

BEEF CATTLE.—Extra, 5¼ a 5½ cts.; good, 4¼ a 5 cts.; medium, 4¼ a 4½ cts.; fair, 4¼ a 4½ cts.; common, 4¼ a 4½ cts.; culls, 3½ a 4½ cts.; fat cows, 2½ a 3½ cts.

SHEEP.—Extra wool, 6¼ a 6½ cts.; good wool, 6¼ a 6½ cts.; medium wool, 5½ a 6 cts.; common wool, 5¼ a 5½ cts.; cull wool, 4½ a 5 cts.; extra clipped, 5¼ a 5½ cts.; good clipped, 5¼ a 5½ cts.; medium clipped, 4¾ a 5 cts.; common clipped, 4¼ a 4½ cts.; cull clipped, 3½ a 4 cts.

HOGS.—Good Western, 67 a 68 cts.; good, 7 a 7½ cts.; medium wool, 6¼ a 6½ cts.; common wool, 6 a 6½ cts.; cull wool, 5¼ a 5½ cts.; extra clipped, 6¼ a 6½ cts.; good clipped, 6 a 6½ cts.; medium clipped, 5½ a 5½ cts.; common clipped, 5¼ a 5½ cts.; cull clipped, 4¾ a 4½ cts.; pig, 4½ a 5 cts.; 87 per cent.

HOES.—Good Western, 63 a 65 cts.; good State, 5½ a 6 cts.

FOREIGN.—A meeting under the auspices of the Primrose League was held at the Covent Garden Theatre last week. Balfour, Chief Secretary for Ireland, presided. He made an address in which he said that the only way to secure the integrity of the Empire and in the interests of liberty in Ireland. Although, he said, the principles of liberty have not been completely vindicated individual liberty is greater now than it was in 1886. The Irish Land Purchase office, he declared, was the most generous proposal ever offered to the Irish tenant.

On the 17th instant, Goschen, Chancellor of the Exchequer, presented the Budget in the House of Commons. It shows that the expenses have exceeded the estimates by £11,000, and that the receipts exceeded the estimates by £5,000,000. The duty on alcoholic beverages realized over £5,800,000. The duty on foreign spirits exceeded the estimates by £421,000; on home spirits by £1,010,000, and on wine by £12,000. The receipts from alcoholic beverages both foreign and domestic, exceeded the estimates by £1,800,000. The duties on coffee, cocoa and chicory showed a decrease of £17,500, while the duties on tea showed an increase of £14,000.

Commenting on the gross revenue from alcoholic beverages, Goschen said that the figures for the year showed a universal rush to the beer, the wine bottle and the wine decanter. Everybody seemed bent on tasting the national prosperity and increasing the revenue. It was a circumstance that must be deplored. A close examination would not diminish the surprise, for the largest intemperance had been the cause of the world—from rum. He had taken pains to discover who drank the rum. It was drunk mainly at seaports. The increase from rum had been 12 per cent.; from British spirits, 7 per cent.; from wine, 10 per cent.; from beer, 4 per cent.; and from spirits, 10 per cent. In 1888 the number of drams taken reached 245,000,000; in 1889, 275,000,000.

In the House of Commons on the 21st, C. S. Parnell moved that the Irish Land Purchase bill be rejected by a

A despatch from Queenstown dated the 21st inst.,

says that during the past three days eight Atlantic steamers left their for America, carrying the unusual number of 3,000 emigrants.

The *Illustrated London News* has just published its *Mail and Express* says that Stanley's book is completed. The work abounds in graphic illustrations of the character of the inhabitants of the Dark Continent, and contains many very curious details concerning the forest and the people, whom his letters have referred, and about whom the interest of the civilized world has been keenly aroused.

In his description of the dwarfs Stanley states that they possess many good qualities which are wholly unsuspected by all except those who have come into intimate relations with them, and who have cultivated their friendship. The race is markedly intelligent and possesses a decidedly higher grade of morality than the negroes. It is the only monogamous race in Africa, and stands quite alone in its regard for the sacredness of the marital relation.

King Leopold, Sovereign of the Congo Free State, denies that any proposals were ever made by Germany looking to the purchase of that State.

The *Valkett* says that probably the question of a general European disarmament will be brought before the Congress at the coming session.

The Chinese government has agreed to discontinue its royal progress through the towns of Central Asia, from Tiflis to Samarcand.

A despatch from Tientsin received in London on the 18th instant, says that one-half of the population there is suffering from influenza.

DIED.—at her residence at Mount Laurel, N. J., on the 3rd of Third Month, 1890, LYDIA BORTON, a beautiful young lady, who died in the evening of the 21st of the 18th year of her age. Being of a kind, cheerful disposition, her company and hospitable home were enjoyed by a large circle of friends; she was strongly attached to the principles and testimonies of the religious Society of which she was a member; and in her life she was ever ready to incur any sacrifice for the bearing and detraction. She was a good example to others in the attendance of her religious meetings, often going when her friends thought her physical strength was not sufficient for the exertion. Being of a cheerful and generous disposition, she was ever entrusted to her, for the relief of others. During a protracted illness she frequently expressed a willingness to be released, but fervently desired that she might experience patience to abide her Heavenly Father's time; which her friends have the comforting assurance she was, through mercy, favored to do; and that as a shock of corn, fully ripe, she has been gathered into the heavenly garner.

—at her residence in Salem, Henry Co., Iowa, Third Mo. 30th, 1890, RACHEL JANE HOBSON, wife of Peter Hobson, in the 70th year of her age, a member of Salem Monthly Meeting of Friends, Iowa, (smaller body). She was firmly attached to the principles and doctrines of the Society, and was highly respected by her worthy predecessors in the truth. Her end was peace; and her relatives and friends have the comfortable assurance that through adorable mercy she has been permitted to enter into her heavenly home.

—at her residence, near Woodbury, N. Jersey, Fourth Month 13th, 1890, MARY LORD, a member of Woodbury Monthly Meeting of Friends, in the 83rd year of her age. She was a devoted Friend was an invalid for many years, during which time she manifested much patience and resignation to her lot. She spent much of her time when able in works of charity, being very industrious her hands were mostly employed for the poor. The last two years of her life she was rendered helpless by a fall, and her friends were obliged to care for her without assistance. Her childlike submission during the time was very striking, often saying: "Just as you think best," when consulted about doing anything for her; though she evidently felt her great dependence on the Lord, and her friends were often reminded, not only a few days during. The remarks of W. H. Hall with regard to a beloved niece, struck exceedingly applicable to her. "Her pure and spotless life has left a fragrance behind her, comparable to the odor that fills the house." She had nothing to express with regard to her life, as, from childhood, she had been so close at hand. But as an innocent child was, we be lieve, leaning on the bosom of her Saviour. "Blessed are the pure in heart, for they shall see God."

FOR "THE FRIEND."

Incidents and Reflections.—No. 221.

WORLDLY AMUSEMENTS.

There are many forms of amusement which can scarcely be called evil in themselves, and may even be allowable under certain circumstances, but which the Christian feels to be inconsistent with that dedication of himself to the service of the Almighty, which is the reasonable service of those who have been bought with the blood of Christ, and delivered from the power of evil by the life-giving, heart-changing visitations of his Holy Spirit.

In the Life of Thomas Scott, occurs the following anecdote on card playing:—

"In the former part of my life I had been exceedingly fond of cards. Indeed, I showed a propensity to gaming, from which many bad consequences had been foreboded; but ill success on one occasion, long before I attended to religion, had rescued me from this; and at the time of which I am now writing, I had lost all my relish for the diversion of cards and every other of a similar nature. I, however, occasionally joined in a game from an idea that too great preciseness might prejudice my neighbors; and I was then of opinion that there was no harm in the practice, though it seemed a frivolous way of spending time. I felt it also a very awkward transition to remove the card table, and introduce the Bible and family worship; though I never omitted this service at home, and commonly proposed it in my visits. My fetters were, however, broken effectually and at once, about January 1778, in the following manner. Being on a visit to one of my parishioners at Ravenstone, I walked out after dinner, as was my common practice on such occasions, to visit some of my poor people, when one of them—the first person, as far as I know, to whom my ministry had been made decidedly useful—said to me, 'I have something which I wish to say to you, but I am afraid you may be offended.' I answered that I could not promise, but I hoped I should not. She then said, 'You know A. B.—'; he has lately appeared attentive to religion, and has spoken to me concerning the sacrament; but last night he with C. D.— and some others met to keep Christmas; and they played at cards, drank too much, and in the end quarrelled and raised a sort of a riot. And when I remon-

strated with him on his conduct, as inconsistent with his professed attention to religion, his answer was, 'There is no harm in cards; Mr. Scott plays at cards.'" This smote me to the heart. I saw that if I played at cards, however soberly and quietly, the people would be encouraged by my example to go further; and if St. Paul would 'cut no flesh while the world stood, rather than cause his weak brother to offend,' it would be inexcusable in me to throw such a stumbling-block in the way of my parishioners in a matter neither useful nor expedient. So far from being offended at the hint thus given me, I felt very thankful to my faithful monitor, and promised her that she should never have occasion to repeat the admonition. That very evening I related the whole matter to the company, and declared my fixed resolution never to play at cards again. I expected that I should be harassed with solicitations, but I was never asked to play afterwards. Let me, therefore, from my own experience, as well as from the reason of the case, urge persons from their first entrance upon a religious course, when asked to do anything which they disapprove, fairly to state their disapprobation as a point of conscience. For not only is this most becoming those 'in whom there is no guile,' but it is also by far the most prudent proceeding. . . . The minister who would not have his people give in to such worldly conformity as he disapproves, must keep at a considerable distance from it himself. If he walk near the brink, others will fall down the precipice."

A correspondent of the *Sunday School Times*, writing from California, says:—

"Will you permit me to add a little from my experience and observation to what you have said on the subject of Christians dancing, playing cards, &c.? Riding in the stage along one of our mountain roads last May, I got into conversation with a French Jew, who remarked that we Christians denied ourselves the enjoyments of life, such as theatre-going, &c. I replied (speaking, I think, for a large majority of true Christians) that we did not regard these things as enjoyments, for the reason that we had got hold of something so much better. I told him that I could not claim credit for self-denial in this matter, because the things he mentioned had lost their attraction for me since I knew the joy of communion with God and fellowship with Him in his work. A child playing with mud pies, will usually drop them quickly when offered a real pie. I once knew a young man, a happy, humble believer, who would often take part in a game of whist. The mental exercise required by the game did not seem for a while to interrupt his spiritual enjoyment; but as he grew in grace, his interest in cards declined, until he dropped them entirely. It might be said that the cards dropped away from him, not being able to rise along with him. Talking with a minister, also a stage companion, last February, he defended the habits and amusements enumerated by your lawyer correspondent, and on much the

same grounds. When, however, I endeavored to draw him into conversation upon the theme of a personal acquaintance with God, and the delight of looking to Him and trusting Him in everything, I found I was talking a language my companion did not understand. I could get no fellowship with him anywhere."

In one of the addresses delivered by D. L. Moody, in New York City, he quoted from the 1st Epistle of John:—"Whosoever is born of God overcometh the world," and made the following comments:—

"How may I tell that I am a child of God? There are certain landmarks given, and this is one of them, We will overcome the world. If I am born of God I will overcome the world, or else the world will overcome me. We see here why temptation is so strong, it is because men do not overcome the world. Alexander conquered the world and yet died a drunkard at the age of thirty-two. He could conquer the world; but that was one man he could not conquer, and that was Alexander. He needed self-control. He that ruleth his spirit is better than he that ruleth a city. Why is it that there are so many divorce cases in New York? Simply because people can't control themselves. Why is it that there are so many drunkards among us? Because they cannot overcome self. Turn to the eighth chapter of Romans and the ninth verse: 'But ye are not in the flesh, but in the Spirit, if so be that the Spirit of God dwell in you. Now if any man have not the Spirit of Christ, he is none of his. And if Christ be in you, the body is dead because of sin; but the Spirit is life because of righteousness.' That is a test of our discipleship. It is not a profession; it is not church-membership; but whether I have the spirit of love and joy and peace and long-suffering and gentleness and kindness and faith and meekness and temperance."

"If you try to walk in the new way you will find it very narrow. At the entrance you will find the cross. This you must take up and carry. There is very little self-denial among Christians to-day, I fear. A lady came to see me not long ago, who wanted to become a Christian. She said that she admired the life of Christ, but she said,—

"'I cannot become one of your kind of Christians.'"

"'Why, I do not know that I have any peculiar kind of Christianity. What is the matter?' I asked."

"'I can't give up the world,' she said. 'I want to be a Christian and yet go to the theatre.'"

"'Well,' I said, 'have you heard me say anything against the theatre in any of my sermons? I have been preaching in this city for six months, and the sermons have been reported always verbatim, and have you found in any one of them a word about the theatre?' She said she had not."

"'But,' she added, 'you do not believe in the theatre?'"

"'How do you know?' I asked."

"'But you don't go?'"

"I don't go for I have got something better to do." And then she told me that her father was a doctor with a large practice, and that he often took his family to the theatre. He said he needed recreation. She had married a lawyer, and he, too, said that he needed a rest now and then.

"I would like to be a Christian," she insisted: "but I can't give up my theatre."
 "In about ten days she came back to me and said: 'I know now what you meant the other day about having joy in Christ's work. I went to the theatre the other night with my husband and a party of friends. We sat in our private box, and as the curtain rose everything on the stage seemed so strange that I said to my husband: 'What is the matter with the theatre to-night? I am going home.' But he said: 'Don't make a fool of yourself.' I couldn't stand it any longer, and went home.'"

J. W.

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 306.)

1794. Tenth Mo. 1st.—This day we rode about 45 miles to Bath, and the next had a small meeting there; and riding 20 miles further, had a meeting in the house of Henry Dearborn; and although he was a military man, a general, and a statesman, he and the people behaved kindly to us: it being a season of heavenly favor. This was at Cobey, on the west side of Kennebec River.

The next day, the 4th, we had a meeting on the east side, about 30 miles up, which was held in the Court-house, large and solid. The people in those places are not of our Society; yet the meetings we have had are confessed to be the most solid that were ever known among them.

The next day we had a large meeting which was much favored, at Boringham, on the west side of said river, below Swan Island. The day following we travelled about 15 miles through a rough mountainous country, where no carriage had passed before; and had a meeting on the 7th at Jonathan Jones' house, not very satisfactory. The people's minds outward, not acquainted with silent waiting, but used to be fed with words. This was far back towards the broad bay, at Dammey-scotty-ponds.

The day following, had a meeting at George Rhodes'; the place is called Broad Cove, among a people whose religion seemed to be in arguments on what they did not understand, and their expectations outward; their preachers teach them so. It was an exercising place, yet I believe there was a few tender hearted ones amongst them. The next day we had another meeting at this Cove at John Farrow's house, pretty large for the place.

10th.—We also had a meeting on the east side of Broad Bay, at the widow Chapman's, a favored season. From thence we rode to Durham, computed about 50 miles, and were at their meeting on First-day, which was large and solid. I had to deliver close doctrine, which appeared to be well received. Coming through Palmonth and Windham, we rode in company with several Friends to Limington; and had a small quiet meeting one afternoon in a private house.

14th.—The next day rode a rough way about 45 miles, to Soudwich, and the day following had a meeting there, quiet in a good degree.

The 17th I rode on horseback about 50 miles to Rochester, and the next day attended Dover Monthly Meeting, which seemed to be dull and laborious throughout. The day following we

had a very large meeting at Rochester, which ended well. And in the afternoon a large one at Medisborough, which was also satisfactory.

On the 20th at Gilmantown, we likewise had a large meeting, which I thought was divinely favored. The next day we had one at Pittsfield, a low, dull season.

22nd.—And another at the same place. Here, to my comfort, I met my beloved friends Martha Routh and Lydia Rotch; they going eastward on religious service, and I coming again to the west, like poor pilgrims; yet the Lord is our stay and our staff, blessed be his glorious name forever.

Shortly after this I received an affectionate letter from a dear female Friend, dated at Epping the 20th instant, which had a strengthening effect, perhaps an extract inserted here will not be amiss, which is as follows, viz: "To think of thy going out of our parts so soon, before we grow any better, is an addition to my discouragements, for if every leaning stock is removed, and the staff taken away, how shall poor I, ever pattern after a Joshua, so as effectually to take up a resolution to serve the Lord. But thus much I believe, if no more, thy coming will do, viz: Convince us whereabouts we are, and what we might have been, had we been more like thee in coming up in faithfulness to what has been discovered by the same spirit, and less like unfaithful Saul, who made exceptions of things which should have been destroyed. I rejoice thou hast trod the wearisome path of sojourning amongst us, and believe thou hast not labored in vain. In a measure of that love that filled my heart towards thee, on first being in thy company, do I affectionately bid thee farewell.

AB'L. FOLSOM."

24th.—Coming to Halestown, we had a large and solid meeting there; and the next day another with the members of our Society only. I had close labor, but I believe it ended well; I felt after it poor in spirit, and yet was favored with a quiet mind. On First-day also I was at Halestown Meeting, this was a laborious season. I fear there is barrenness because of ease and lukewarmness. A stormy time with snow.

27th. I visited a young woman whose parents were wealthy, she an only daughter, brought up in a delicate way, and is now in a weak state of health, occasioned in part by such delicacy which it is thought is likely to shorten her days. I mention this as a caution to parents to be careful of overmuch delicacy in their educating children. The weather stormy still.

The next day we rode towards Richmond, about 35 miles, a mountainous way, the towering height of the mountains seemed awful to me a poor pilgrim. We lodged at a public house, the master of which, I thought was an earnest enquirer after the Truth. We gave him a Friend's book, which he thought well of, having not seen any such before; I found he did not sell spirituous liquors, like most of his calling did: on the whole I was pleased with being here.

Although weak in body we reached to Richmond, and on the 30th had a large meeting there; to me it was a laborious season. Here is a foul mixture; the people seem turning to the world, and I fear our Friends are going with them. The next day travelling eight miles, we had a comfortable meeting at Abraham Randall's, on a high mountain. It being foggy, I thought the appearance was awful, as though we were almost up among the clouds; for below us it did not seem so dark.

Eleventh Mo. 1st.—We had another meeting at Richmond with the members of our Society

only; it was not large, being stormy weather, but was a favored season, both aged and youth appearing to be tendered; for which my soul is humbled under a sense of the Lord's goodness. The people of all ranks treat me kindly, though my outward appearance is but simple. On the second, was held our fourth and last meeting at this place; the largest, they say, that was ever seen here. To me it was exercising, yet it ended well.

3rd.—I seemed now to be brought under fresh trials; my service in the remote parts, northward and northeastward of my dwelling did not seem to be got through, the winter season approaching, ways difficult to travel; and the summer time or fall more likely to answer for such visits to the people's benefit, I concluded to return and leave a further proceeding for a future season, if my life should continue, and the Lord grant me strength and a capacity suitable.

8th.—Having now travelled upwards of forty miles a day, until I have reached from New Hampshire into New York government, had a large meeting at the Purchase, which I believe ended well. The 9th I was at Mamaroneck, and had close labor in that meeting, and the 10th at West Chester, had a meeting large and favored.

The two following days I had meetings again at Mamaroneck and the Purchase, wherein Friends were collected by themselves, or selected from others; they were solid and profitable, the latter was large.

13th.—The next day was held the Monthly Meeting at Purchase, which I attended, and thought it was a low time. The 14th I rode to New York through the snow; and that evening had an opportunity with the elders, in which I informed them of my desire of seeing the parents and heads of families of Friends in the city, together; which they concurring with, on the 15th, in the afternoon, such a meeting was had, where in close doctrine was delivered, somewhat resembling that of searching with candles; it appearing to have a humbling effect on some minds. I afterwards had some favored opportunities in families in this city. Although baptisms are my portion, the Lord preserveth me from sinking below hope, for which I am humbly thankful.

After the meeting last mentioned, on consulting with divers Friends, they united with a prospect I had of meeting with the young people, male and female separately. Accordingly on the 17th, the young women came together at three in the afternoon, and the young men at six in the evening. These I thought were truly favored seasons: some Friends expressing a hope they might be of use, as the like had not been done in the city before.

Coming to Rahway, on consulting with Friends a way opened with concurrence for collecting the members of our Society who lived in that town, separate from others, and such a meeting was held on the 19th. This proved an exercising season. I feared Friends were got too much into ease and a carnal security: out of which it is not easy to remove them.

The next day the Monthly Meeting was held at Rahway; this to me was very exercising also, it seemed as though the life and power was much wanting. A great weight attended my mind whilst I staid in this place, from which I got but little relief, for though matters were laid close, I thought there was but small entrance.

The next day I had a large and solid meeting at Plainfield, which was comforting to me after being reduced very low for some days. In

travelling from hence to Stoney Brook, the adversary beset me with his presentation, suggesting that little or no service was done in all my journey; and the Lord is good in giving an answer of peace to all who honestly are given up to serve Him, if they patiently wait his time.

(To be continued.)

FOR "THE FRIEND."

"The Public School founded by Charter in the town and County of Philadelphia, in Pennsylvania," the *Forrest Trust*, and the *Fourth Street Meeting and School-Houses*.

BY G. V.

The corporation above referred to, commonly known, for brevity, as "The School Corporation," had its origin in a concern on the subject of education in Philadelphia Monthly Meeting of Friends, very soon after its establishment in 1682. A committee was appointed to have charge of the subject, which, in the language of that day, was termed "the overseers"—just as the committee having the charge of the erection of the first meeting-house are called in the minutes, "The overseers appointed for building the meeting-house."

This committee conducted the school under the direction of the Monthly Meeting for a number of years.

The school appears to have been first opened in 1689, when George Keith, who had recently arrived in America, was appointed master. For the first year his salary was to be £50, a house for himself and his family, a school-house provided, and the profits of the school besides. The two succeeding years the salary was to be advanced to £120 per annum; in consideration of all which, he was to teach the poor children gratis. Keith remained in the position, however, for only a single year, when he retired, and, it is probable, that it was then that the conflict began between Friends and this versatile character, which ultimately grew into a separation.

Keith was succeeded by his usher, Thomas Makin.

William Penn, toward the close of his second visit to the colony, in 1701 (indeed only a few days before he sailed on his return voyage to England), incorporated this committee under the title of "The Overseers of the Public School founded in Philadelphia, at the Request, Cost and Charges of the people of God called Quakers."

Three other charters, or, strictly speaking, amendments to the original one, were subsequently granted, by which the powers of the corporation were enlarged, without, however, changing the original design; and by the last of these, dated in 1711, the title was altered to the "Public School founded by Charter in the town and County of Philadelphia, in Pennsylvania."

These charters, with one exception, are enrolled among the records of the proper office in Pennsylvania. They are lengthy documents, covering comparatively little ground with a great many words, as was apt to be the case with early legal papers. Avoiding any synopsis of these charters, we will quote from several admirable statements of the facts connected with the foundation and early history of this interesting corporation, which are found in the minutes of the Philadelphia Monthly Meetings.

Under date of 1772, when the original Monthly Meeting was divided into three, called respectively "The Monthly Meetings for the

Northern, Middle, and Southern Districts," the minutes state: "That, as the Public School, founded by charter in this city was so founded at the request, cost and charges of this Monthly Meeting, and was supported and maintained before and after obtaining the first charter, by the voluntary contributions of the members thereof, and continued under direction of the meeting many years, we hope and desire it may ever be the care of the overseers of the said school, whenever, by the decease of any of them, or otherwise, any vacancy may happen, and a new nomination be necessary, to choose such members of our religious Society to succeed as overseers of the school, who will be really concerned to support it on its original foundation, and continue a religious care for the education of our children in a manner consistent with our Christian profession and principles. And as, by the last charter, the power of the overseers is extended to the setting up and support of schools in any part of the county of Philadelphia, and it is evident the early care of Friends here was exerted for the real interests of their posterity, and successors, with a full purpose that this institution should always remain under the direction of Friends, we earnestly recommend that such a connection may ever be maintained between the overseers of the school and the several Monthly Meetings of Friends in this city, that they may constantly be united in promoting the good purposes intended; and that this, the religious instruction and education of our youth, may appear to be attended to in the manner this important part of our duty requires."

The views expressed in the foregoing minute were considered at a special meeting of the overseers of the Public School, held on the 10th of the Third Month, 1772, at which twelve out of the fifteen members were present.

On this occasion the following minute was adopted by the overseers:—

"The proposal lately made in the Monthly Meeting in this city, of establishing two more Monthly Meetings, being now considered, it appears necessary at this time to look back to the original institution of the Public School in this city, and to review the former and present state thereof under our present charter, by a suitable memorial, in order that it may be more fully known to Friends in this City and County; and as it hath been the care of the overseers of the school hitherto, so it is now our earnest desire, that the same care may be continued to nominate such only to be overseers who are members of our Religious Society, in fellowship with the Quarterly and Monthly Meetings of Friends in this City and County. And it is now agreed, that as far as may be in our power, we ought to support and confirm such a connection with the said meetings, so that, on any occasion in which the reputation and interests of the Society may be promoted in the discharge of the trust committed to us agreeable to our charter, we may ever be ready and willing to hear and consider anything which may be offered to us by the said Monthly or Quarterly Meetings."

In the year 1779, the three Monthly Meetings appointed a joint committee in relation to the subject of education. In their interesting report, under date of the twenty-fourth of the Seventh Month of that year, is contained the following reference to a conference held with the overseers of the Public School:—

"Having, conformable to the tenor of our appointment, united in an inquiry into the causes of the evident degeneracy and corruption in the manners and deportment of many of the

youth among us, and endeavored to obtain information under what regulations they receive their school education, in order whereunto we have met and conferred with the overseers of the Public School, and find in that Board a disposition to concur with the Monthly Meeting in such practical salutary measures as may tend to the religious preservation and more pious instruction of Friends' children."

"That this disposition in the corporation to unite with the Monthly Meetings in a religious care for the essential good of posterity, and in all their proceedings to continue and maintain a connection and harmony with them, is clearly consistent with the nature and original foundation of their trust and the continued sense and practice of that Board, appears from all the circumstances of the institution, on tracing it up to its small beginning in 1689, when under direction of the Monthly Meeting a school was opened and supported by the voluntary contributions of the members and subject to the management and inspection of a committee of that meeting; which committee, or their successors, were a few years after incorporated with certain powers and privileges to hold and convey lands, etc., with a right to perpetual succession, at the special requests, costs and charges of said Monthly Meeting, as appears from the minutes of said meeting and the tenor of the charters obtained for the regular establishment of said school. In that granted in 1701 by William Penn is set forth (to show the rights Friends had to expect such a grant), that for the enjoyment of their consciences and other privileges mentioned in King Charles' patent, he (the said Wm. Penn), with a large colony of the people of God called Quakers, did transport themselves into this Province, and at their own risk, cost, pains and charges, settled and planted the same. By succeeding charters the number of the overseers have been increased and their powers enlarged, and, by a very considerable advance in the value of the estate transferred to their trust by the said Monthly Meeting, and of the legacies and donations of sundry of its members, their funds have so increased as to enable them, from time to time, to open and settle additional schools; so that not only the children of poor Friends have fully partaken of useful learning, but the benefit has also been extended to others. Rules for the conduct of the masters, behavior of the scholars, and the maintenance of order and discipline in the schools, have been framed by the overseers, and the observance of them enjoined—containing matter of instruction and wholesome restraint of a very beneficial tendency, if duly carried into effect. But what has materially obstructed the good thereby intended, affords an affecting view of the necessity and importance of parents and heads of families living under the exercise of a truly Christian tenderness and care for their offspring and those under their authority and direction; for, though trustees be vigilant and faithful in their endeavors to inculcate moral and religious instruction and to enforce rules of discipline and restraint, their labor is rendered ineffectual by parents and masters of families refusing or neglecting to cooperate with them."

"To remove or in some measure remedy this radical defect in the education of our youth, demands the most serious attention, as well of the Monthly Meetings as of religiously concerned individuals; that a deep sense of what the nature of our holy profession calls for may so

fasten upon our understandings, as to arouse us from a stupor and insensibility so dangerous to the well-being of the rising generation, and pregnant with pernicious consequences to human society."

The committee propounded a series of questions to the overseers of the Public Schools, in response to which that body, at a meeting held Seventh Month 12th, 1779, returned answers in detail, from which it appears that at that time it was conducting nine different schools (children of both sexes being taught), two of which were composed of children of Friends, or such as had claims upon our Religious Society, whilst the others were attended by a miscellaneous class of children. One of these schools was taught by the Christian philanthropist, Anthony Benezet, and another by Rebecca Jones, a devoted religious character, whose name will, no doubt, be recognized as among the most worthy of honor of former generations. These schools certainly contained as many as 200 scholars, and the number may have been as great as 300: very large schools for the population of Philadelphia at that time.

In closing their reply, the overseers say: "On the whole we have ground to hope, if the weighty concern of the Yearly Meeting is duly attended to by parents and others who have the oversight and care of children, and our endeavors so to promote it fervently united with, that a reformation may take place for the essential good of the youth and our Religious Society in general, in which necessary work the overseers of the schools in this city will gladly cooperate with their brethren as far as comes under their notice and trust."

(To be continued.)

Epistle of John Crook on the Death of John Samm.

My dear friends, keep low in your minds, and delight to be often in the depths with God. Oh, watch! I even beseech you all, as dear brethren, that by the Lord's taking away his servants of late, that have been blessed instruments in his hands, you may come the nearer unto that teacher, and hear his voice daily, which cannot be removed into a corner; that ye may all say, in truth of heart, we are come unto that ministry which cannot be taken away by reason of death. Oh, that you may all feel more of this ministry in your assemblies daily, and keep in that seed of life, where you live with the spirits of those just men, whose bodies are removed from you. Indeed, I feel the Lord mightily at work in this his day; be but still, and you will see his wonders as in the days past: let love abound among you, as at the beginning, and be pure and clean in heart, and you will see, by all God's dealings, what He aims at, which is certainly to raise up his own life in you all, over all the world, unto his own praise and your joy forever.

All you that are sensible of the taking away of dear John Samm as being often refreshed by his life, and comforted through his ministry, sink down into the fountain from whence he had all his supplies; and drink ye of the same, blessing the Lord, that the fountain is in Christ the promised seed, unto whom feel your daily access. Oh, ye beloved of the Lord! say in your hearts, with my soul, O God! it is enough that we have thyself to go unto; and that we can in thy life, enjoy communion with the spirits of the just ones; and lift up your heads over all the world, and be not dismayed with any amazement, either inward or outward, for your Redeemer lives, and your ransom will not tarry. And you that

are full of sorrow, by reason of your temptations and trials, which are many and that your own strength is so small; I say unto you all, lift up your heads; for you that cannot live without Christ but feel your daily need of Him, He will not leave you, nor forsake you. Thou art a true heir of Him, thou canst not live without Him; to thee He will come, and will not tarry; and in the mean time, as a good soldier, endure the hardship; it is but yet a little while, and He will appear without sin unto thy soul's salvation.

SELECTED.

A New Version of Imprisoned Music; or, The Singing Log.

The wife of C. H. Spurgeon says:—

"Those who delight in the sweet flow of softly rhymed verse above the heavier diction of solid prose, will gladly welcome a new version of the allegory of the 'Singing Log.' A friend kindly took the trouble to put the little legend into verse, and my dear husband thought the stanzas so good that they ought to be better. With no small labor and pains he fashioned the poem anew, writing several fresh verses, and in general recasting the whole. 'The new version,' as he calls it, was sent home from Mentone, with the title of 'Mrs. Spurgeon's "Gem" reset,' and I am very proud of my husband's commendation. Since 'gems' are rare things with me, I naturally desire to make the most of this solitary specimen, and therefore I have great pleasure in reproducing the allegory under this more attractive form.

"Thus polished and sparkling, I hope it may find even greater grace in the sight of my friends than on its former appearance; but beyond this hope there shines out a better and brighter confidence; for I think I may tell, without the shadow of a boast, how graciously the Lord has honored the little parable by making it the messenger of comfort or content to so many of his people, that I have been amazed at his condescension in thus using it, and am encouraged therefrom to believe that its mission of love is not yet fully accomplished."

At the close of a dark and cloudy day,
As the deeper night drew on,
On my languishing couch I wearily lay,
My joy for the moment gone.

Within my room all was cosy and bright,
Yet a shadow of night had crept
Over my soul, and hid his light from my sight
The band in which mine was kept.

Depressed and saddened, I labored in vain
To gaze on my loving Lord,
Oh, when will his presence return again,
And light on my spirit be poured!

Whence comes it my Lord so bitterly chides,
And sends me such grievous pain?
The sun, and the moon, and the stars He hides,
And clouds return after the rain.

He heard; and an answer was strangely given,
A still small voice from the throne;
No seraphim brought the message from heaven,
Yet it came from the Lord alone.

A while in my room reigns a silence deep;
The only sounds in mine ear
Arise from the flames which crackle and leap,
And flash forth a flickering cheer.

When we suddenly heard a strange, sweet song,
Like the robin's tender trill,
A whisper, a sonnet, the flames among;
It caused our hearts to thrill.

"Can a bird be singing this gloomy night?"
In startled surprise, we say,
"Whence comes such an anthem of calm delight
As from harps that are far away?"

In silent wonder we listen again,
Till my friend in a whisper said,
"Thy own old oak log sings that soft, weird strain
From amidst its fiery bed."

"Twas so; and as once the Lord spoke out
From the bush which burned with flame,
So now to our spirits, beyond a doubt,
His voice from the oak log came.

From the heart of the oak, fire had loosed the bands
Of music imprisoned of yore,
When the trees of the field had clapp'd their hands
And cried out for the Lord before.

When its branches waved 'neath the heaven's blue
Through the livelong summer day,
Full many a bird to their shadow flew
With its carol glad and gay.

The song of the thrush and the hum of the bee,
And the music of evening bells,
All sank in the soul of the old oak-tree;
And now the sweet tale it tells.

The hardened growth of full many a ring
Fettered fast the imprisoned lays,
Till these flames of fire their freedom bring,
And they dance in the joyous blaze.

The fire which consumes has lent it a tongue,
And the oak log sings as its heart;
It yieldeth its all while its life is wrong—
'Tis a song and a sacrifice.

* * * * *
And thus was a message most sweetly brought
By the old oak log to me;
It raised me aloft from each gloomy thought,
And from sorrow it set me free.

If trial and pain be as flames to my heart,
To fetch forth its latent praise,
With joy I accept the sufferer's part,
And would choose it all my days.

SELECTED.

"THE BLIND AND THE LAME."

A blind man wandering in the street
A helpless cripple soon doth meet,
And each man hopes, with spirits glad,
Aid from the other may be had.

"Help thee!" the cripple cries. "Ah, no!
For I myself can hardly go
Upon my way. But hold! I see
Thy shoulders broad may easily

"A burden bear, so carry me,
And I will tell the path to thee;
So shall become thy strong limbs mine,
And my good eye shall sight be thine."

Upon the blind man's back so strong
The lame man climbs; they go along,
Performing thus, this happy pair,
That which apart they ne'er would dare.

The gift of others thou hast not,
Nor fall thy gifts to others' lot!
But, ah! this incompleteness leads
To generous thoughts and helpful deeds.

FOR "THE FRIEND."

A Plain Dress and the Plain Language.

There are many who have experienced that a plain dress and the plain language have proved as a hedge about them, contributing in no small degree to their preservation from evils. Irksome as the parental restraint in these particulars has been at the time to the unmortified will, years of experience under the teachings of Divine Grace, have changed the whole course of feeling in the matter, and raised a tribute of gratitude to those who would not yield to the craving of the natural mind, but steadfastly stood their ground against indulgence in fashionable attire and address. Many have had occasion to rise up and call those blessed, who thus curbed their inclinations. It is not unusual to find these testimonies designated as small matters; and we have no disposition to magnify them beyond their proper importance. But the Bible assures

us in several places, that they are not too small to claim the notice, and to call forth the commands of the Most High, through his inspired servants; and we have signal proofs of his hot displeasure against those who decked themselves in ornamental apparel. Nothing can be small which the Almighty ordains; and if we disregard the expressions of his will, our compliance in greater things will not be likely to meet with acceptance. The simple and seemingly unimportant injunction to Moses, "Put off thy shoes from off thy feet," was from the same source as the command to deliver the Lord's chosen people out of Egyptian bondage, and equally obligatory; and had Moses presumed to disregard it, there is no probability he would ever have been honored as the servant of the Most High, to stand unawed before the proud despots of the earth, and to become the mighty deliverer of Israel. It is not for finite reason to presume to argue against those things, and because it has pleased our Heavenly Father to reveal the great truths of Christian redemption, to diminish by contrast with these, and affect to despise and ridicule his commands in minor affairs. Such cast opprobrium on the Holy Scriptures and their inspired writers, and are in danger of being found "fighters against God." Those members of our religious Society who have been most devoted to do the Lord's will have found the cross in language and dress, one that must be borne, if they had any hope of wearing the crown; and being faithful in this, has not only yielded them enduring peace, but opened the way for further disclosures of their Lord's will, and He has clothed them with strength, as a fruit of their obedience, by which they have been enabled to run with holy stability and joy the furthest ways of his requiring.

THOMAS EVANS.

FOR "THE FRIEND."

Mercury and Venus.

These planets now form an interesting pair of evening stars, being near together and very prominent in late twilight. They are several degrees north of west, and 7th farther north than he sun is. Being so far north, and especially north of the sun makes them much more prominent than if they were far south of the sun. Venus is so brilliant that any person can easily know it from any other star in that part of the firmament. Mercury was north of Venus and two degrees distant on the 25th of Fourth Month. They both move upward—to the east—but Mercury goes faster and stays a little above his bright companion till the 10th of Fifth Month, when it came back right north of it again, after which it leaves Venus for the sun; and will become invisible to the naked eye about Fifth Month. These planets are frequently about as seen together as they are now; but they are seldom so far north and so easily seen.

These planets are called Inferior Planets because they are nearer the sun than the earth, and entirely within the earth's orbit. So they are always comparatively near the sun—never far the eastern part of the sky in the evening, or west in the morning. Indeed the greatest angular distance from the sun that Venus ever can be is hardly 49°; and Mercury seldom or never reaches 29°. Venus is nearly as large as we would live on, but Mercury is not half so large—being only 3,200 miles in diameter. Venus appears to be surrounded with a dense atmosphere, and seems more likely to be inhabited than any other planet, except our own.

W. DAWSON.

SHELLELAND, IND., Fourth Mo. 25th, 1850.

Some Scripture Passages Incidentally Brought to View.

Forasmuch as the children of God are partakers of flesh and blood, so Christ also took part of the same, that He, through the death of his body, might destroy him who has the power of death, that is the devil, and set us free from the law of sin and death, by obedience to the law of the Spirit of Life in Christ Jesus. So He took it on Him the nature of angels, but the seed of Abraham; and was made like his brethren, and a merciful high priest, for in that He himself hath suffered, being tempted He is able to succor them that are tempted; and make us partakers of his holiness, if we hold fast the beginning of our confidence steadfast unto the end. So let us keep to the profession of our faith without wavering. Seeing we have such a great High Priest who has passed into the heavens before us, and was touched with a feeling of our infirmities, and was tempted in all points like we are, yet without sin, let us come with more confidence to the throne of grace that we may obtain mercy, and find grace to help in time of need. And having this confidence, we may at times enter into the holiest, or the holy of holies, even this side the grave, by the blood or life-giving power of Jesus, and by a new and living way, which He has consecrated for us by his death and sufferings; and having Him for our high priest over the house of God, let us draw more near to Him in our worship, in full assurance of faith, having our hearts sprinkled from an evil conscience, and our bodies washed with pure water. Not the water which puts away the filth of the flesh; but the water which flows from the pure river of life. For there is a river, the streams whereof make glad the whole City of God. In it we must witness our souls repeatedly baptized until they are made sufficiently clean for the spirit of infinite purity to dwell in. And this is the alone baptism which now saves us. While John's baptism was only a superficial and figurative work. But it pointed to Christ's which was to be inward, with the Holy Ghost, and that fire which burns as an oven inwardly, and was to increase, while John's was to decrease; and if decrease, then vanish away.

But we must be buried with Him by baptism into his death and sufferings before we can be raised with him into newness of life. So if we would reign with Him, we must suffer with Him. And if the Spirit of Him that raised up Jesus from the dead dwell in you, He that raised up Christ from the dead shall also quicken our mortal bodies by his Spirit that dwelleth in us. But if we have not the Spirit of Christ we are none of his, and continue to live after the gratifications of the flesh. And if we live after the flesh, we shall die, spiritually. But if we, through the Spirit do mortify the fleshly deeds of the body, we shall live. And the life that we then live will be by faith in the Son of God. And if any man is in Christ he is a new creature. All old things pertaining to the fallen or fleshly nature are done away; and all things are of God instead of the evil one. And the Spirit helps our infirmities, so as to prevent them from becoming sinful. And as long as we are led by the Spirit of God, we are the sons of God. And while we walk in his light, we have fellowship one with another, and witness the blood of Jesus Christ to cleanse us from all sin. These are not deluded for they are virgins. These are they which follow the Lamb whithersoever He goeth. These were redeemed from among men, being the first fruits

unto God and the Lamb. And in their month was found no guile; for they are without fault before the throne of God. But they were often faulted by men for the world is at enmity with God. These have the everlasting gospel to preach to them that dwell on the earth, both by their upright, consistent walking before men, or as a vocal gift from God, as He, in his wisdom, may deem best. These are they which came out of great tribulation, and did not sink under their trials but washed their robes and made them white in the blood, or life-giving virtue or power of the Lamb. They shall hunger no more for earthly food; neither shall they thirst any more for the Lamb which is in the midst of the throne shall feed them, and lead them unto living fountains of water; and God himself shall wipe away all tears from their eyes. And may not his kingdom come, and his will be done here on earth as it is in heaven? And may we not come spiritually unto Mount Zion, and unto the city of the living God, the heavenly Jerusalem, and to an innumerable company of angels, to the general assembly and Church of the first-born, which are written in heaven, and to God the Judge of all, and to the spirits of just men made perfect, and to Jesus the Mediator of the new covenant, and to the blood of sprinkling that speaketh better things than that of Abel. But in order to this, we must see that we refuse not Him that speaketh in the secret of every soul. For if they escape not who refused Moses on earth, much more shall not who refused Jesus on earth, much more shall not who escape if we turn away from Him who speaketh from heaven, whose voice then shook the earth, but now He hath promised saying, yet once more, I shake not the earth only but also heaven. So, the false rests that many, I fear, are striving to content themselves with and enjoy, must be shaken and removed, that nothing but that which cannot be shaken may remain.

D. H.

DUBLIN, IND., Fourth Mo. 26th, 1850.

A Nickel's Trouble.—An incident occurred yesterday on a Chestnut street car that exemplified the power contained in one little nickel, says the Philadelphia Inquirer. A stout man handed a dime to the conductor, who, before returning the change, collected a nickel from a female passenger, evidently a washerwoman, and handed the nickel to the stout man. Turning to a passenger, a friend evidently, and who had got on before the stout man, the latter handed him the nickel, remarking with a laugh at the same time: "There, Bob, I owe you five cents, and that squares us."

"Bob" took the coin with a snarl, and leaning across the aisle, said to an acquaintance with whom he had been talking, and who was accompanied by a lady, evidently his wife:

"There's that five cents I bet you on Boyer's majority."

The acquaintance flipped the coin from his right to his left hand and handed it to his female companion, with the remark:

"There's that five cents I borrowed for that cigar this morning."

Smiling sweetly the lady accepted the coin, and, reaching over, dropped it into the washerwoman's hand, saying:

"There's the five cents I owe you, and that just makes us square."

It was all done so quickly and in such an off-hand way that it was not until the stout man was in the hand of its first possessor that the passengers whose ownership it had passed realized what a number of debts the small piece had paid, passing in turn through the hands of the washer-

woman, the conductor, the stout man, the stout man's friend, the stout man's friend's acquaintance, the stout man's friend's acquaintance's wife, and the stout man's friend's acquaintance's wife's washerwoman, in all paying seven debts and coming back to the original possessor.

Scolding is Never in Order.

Many a father who will not strike his child feels free to scold him. And a scolding mother is not always deemed the severest and most unjust of mothers. Yet, while it is sometimes right to strike a child, it is at no time right to scold one. Scolding is, in fact, never in order, in dealing with a child or in any other duty of life.

To "scold" is to assail with noisy speech. The word itself seems to have a primary meaning akin to that of barking or howling. From its earliest use it has borne a bad reputation. In common law, "a common scold" is a public nuisance, against which the civil authority may be invoked by the disturbed neighborhood. And it is true to-day as it was when spoken by John Skelton, four centuries ago, that

"A slanderous tongue, a tongue of a skoldie,
Worketh more mischiefe than can be tolde."

Scolding is always an expression of a bad spirit and of a loss of temper. This is as truly the case when a lovely mother scolds her child for breaking his playthings wilfully, or for soiling his third dress in one forenoon by playing in the gutter which he was forbidden to approach, as when one apple-woman yells out her abuse of another apple-woman in a street-corner quarrel. In either case the essence of the scolding is in the multiplication of hot words in expression of strong feelings that, while eminently natural, ought to be held in better control. The words themselves may be very different in the two cases, but the spirit and method are much alike in both. It is scolding in the one case as in the other; and scolding is never in order.

If a child has done wrong, a child needs talking to; but no parent ought to talk to a child while that parent is unable to talk in a natural tone of voice, and with carefully measured words. If the parent is tempted to speak rapidly, or to multiply words without stopping to weigh them, or to show an excited state of feeling, the parent's first duty is to gain entire self-control. Until that control is secured, there is no use of the parent's trying to attempt any measure of child-training. The loss of self-control is for the time being an utter loss of power for the control of others. This is as true in one sphere as in another.

An admirable work on "Dog-Training" says on this very point, to the dog-trainer: "You must keep perfectly cool and must suffer no sign to escape of any anger or impatience; for if you cannot control your temper, you are not the one to train a dog." "Do not allow yourself," says this instructor, "under any circumstances to speak to your pupil in anything but your ordinary tone of voice." And, recognizing the difficulties of the case, he adds: "Exercise an unwearied patience; and if at any time you find the strain upon your nerves growing a little tense, leave him at once, and wait until you are perfectly calm before resuming the lesson." That is good counsel for him who would train a dog—or a child; for in either dog-training or child-training, scolding—loud and excited talking—is never in order.

In giving commands or in giving censure to a child, the fewer and the more calmly spoken words the better. A child soon learns that

scolding means less than quiet talking; and he even comes to find a certain satisfaction in waiting silently until the scolder has blown off the surplus feeling which vents itself in this way. There are times, indeed, when words may be multiplied to advantage in explaining to a child the nature and consequences of his offence, and the reasons why he should do differently in the future; but such words should always be spoken in gentleness, and in self-controlled earnestness. Scolding, rapidly spoken censure and protest in the exhibit of strong feeling, is never in order as a means of training and directing a child.

Most parents, even the gentler and kinder parents, scold their children more or less. Rarely can a child say, "My parents never scold me." Many a child is well trained in spite of his being scolded. Many a parent is a good parent notwithstanding the fact that he scolds his children. But no child is ever helped or benefited by any scolding that he receives; and no parent ever helps or benefits his child by means of a scolding. Scolding is not always ruinous, but it is always out of place.

If, indeed, scolding has any good effect at all, that effect is on the scolder, and not on the scolded. Scolding is the outburst of strong feeling that struggles for the mastery under the pressure of some outside provocation. It never benefits the one against whom it is directed, nor yet those who are its outside observers, however it may give physical relief to the one who indulges in it. If, therefore, scolding is an unavoidable necessity on the part of any parent, let that parent at once shut himself, or herself, up in a room, where the scolding can be indulged in without harming any one. But let it be remembered that, as an element in child-training scolding is never, never, in order.—S. S. Times.

Natural History, Science, etc.

Plants that Keep Hotels.—In a recent issue of the *Botanical Magazine*, Sir Joseph Hooker figures and describes a member of a peculiar class of plants that in popular language may be termed plants that keep hotels. An Italian botanist, Becari, has written a complete monograph of them, comprising 212 pages, and giving 54 plates. The larger number of them belong to the natural order *Rubiaceae*, and are indeed very closely allied to the partridge berry of our woods—*Mitchella repens*; though no one would suspect the relationship from a mere glance at the plant figured by Hooker, which he names *Myrmeodia Becari*, and is a native of tropical Australia. It is an epiphyte, growing on trees as some orchids do, and, like orchids, develops the lower part of the plant into a sort of pseudo-bulb, which has a corrugated surface, and is for all the world like a huge orange ball. The little nodules covering the surface are, however, each crowned by a short spine, and the tint of the pseudo-bulb, or tuber, is a bark-brown, instead of yellowish-green, as in the orange. Thick stems a few inches long grow from the top of this tuber, crowned by thick leaves, which at first sight one might take for leaves of our *Kalmia*, or wood-laurel. What purpose in the economy of the life of the plant these bulbs perform is not manifest; but in the economy of Nature they serve as hotels for the entertainment of insects, chiefly ants. These hollow them out into chambers and galleries. As we judge from Dr. Hooker's brief remarks, some species of ants have taken to these plants, and they have become their native homes, just as some swallow took to the chimneys on the advent of civilized

man. The relation between plants and insects has been believed of late to be one of mutual advantage, and the parts, and especially the floral parts of plants, have been supposed to have become especially modified in order to adapt them especially to receive in proper style their insect visitors, who in turn for the visits confer inestimable favors. Just what advantage follows the generosity of this plant in keeping open house for the ants does not appear from the short chapter of Dr. Hooker; but it seems to be with similar results as in other departments of the floral kingdom. There we generally find that those plants that have taken on special adaptations have a hard time in getting along, and are in many cases threatened with extinction, while self-fertilizers and those which in other ways are self-dependent, like purslane and chickweed, are the best fitted for making their way in the world. This plant is from the Gulf of Carpentaria, and Dr. Hooker says "is extremely rare there," so that the hospitality afforded the ants does not seem to have been reciprocated by these creatures at any rate.

Desert Plants.—Experiments in Northern Australia have demonstrated the value of a kind of stone-clover, originally imported from Western China, which seems almost to equal the cactus in its capacity for flourishing in a rainless climate. In two or three years the trailing sprouts of the irreplaceable little plant will spread over whole square leagues of arid uplands, preparing a soil for other crops, and in the meantime furnishing food for myriads of bees. As a cattle food it is inferior to other kinds of clover, but might prove decidedly preferable to the sage brush nuisance of our southwestern prairies.

Odor of the Acacia.—According to the calculations of the captain we were fifty geographical miles from the coast of Australia, when one morning we perceived for the first time the smell of land, in this instance a peculiarly bitter but mildly aromatic odor, as of fragrant resin. This fragrance, doubtless, came from the acacias, which at this time were in full bloom. For by the aid of the wind these trees, particularly *Acacia fragrans*, diffuse the fragrance of their flowers to a great distance, and this morning there was blowing a fresh, damp breeze directly from the land.—*Lunholtz's Travels in Australia.*

Mosquito Tobacco.—In a former work on China—"A Journey to the Tea Countries"—I noticed a curious substance called "mosquito tobacco," or "mosquito physic" for it is known by both of these names, which I had met with for the first time when travelling in the western parts of the province of Chekiang on my way to the Bohea Mountains and the great black-tea country of Woo-eh-shan. The day before the discovery was made had been very hot, and during the night such swarms of mosquitoes came that neither my servants nor myself had been allowed to close our eyes. I had no curtains with me, and looked forward with dread to many such sleepless nights during the journey. "Why don't you procure some mun-jung-san?" said the boat men to my servants. Delighted to find there was some simple remedy, I sent on shore to that first village we passed, and procured some stick of this invaluable substance. I found it answered the purpose admirably, and used it every night during the remainder of that journey wherever I happened to sleep, whether in boats, in temples, or in the common inns of the country.—*E. Fortune's Travels in China.*

The substance, he subsequently found, was made of pine and juniper sawdust, wormwood

leaves, tobacco leaves, and a small proportion of arsenic and a mineral called *mu-wang*.

Fijian Cooking.—Another process which I have watched with considerable interest, is that of the girls preparing *mandrai*, which is bread made of bananas and bread-fruit. A Fijian baker's oven is simply a pit lined with plantain leaves and filled with bananas or bread-fruit, on which the girls tread to compress them into a pulpy mass: they then cover with a thick layer of green leaves and stones, and leave it to ferment, a process which begins about the third day. The insupportable stench which poisons the air for half a mile round on the day when these dreadful pits are opened is simply intolerable,—at least to the uneducated nose of us, the *papa-langi* (i. e., foreigners), but the Fijian inhales it with delight, therein scenting the bread and puddings in which he most delights.

These puddings are sometimes made on a gigantic scale, on the occasion of any great gathering of the tribes. One has been described to me as measuring twenty feet in circumference; and on the same occasion—namely, the marriage of old King Tanoa's daughter to Ngavindi, the chief of the Fisherman Tribe—there was one dish of green leaves prepared, ten feet long by five wide, on which were piled turkeys and pigs roasted whole: there was also a wall of pig-roasted fish, five feet in height and sixty feet long. The puddings are generally made of *taro*, cooked and pounded, and made into small lumps, which are baked, and afterwards all heaped in one great pit lined with banana leaves, and mixed up with sugar-cane juice and pounded cocoa-nut. I have been told about one great feast which nineteen gigantic puddings were prepared, the two largest being respectively nineteen and twenty-one feet in circumference. Verily our familiar Scottish haggis must bow to those Fijian cousins, and confess himself to be no longer the

"Great chieftain of the pudding race."

Certainly the masses of food accumulated on these great days beat everything we have heard of even at ancient Scottish funeral feasts. Enormous ovens were prepared (they would be so still at any great gathering of chiefs). They are simply great pits, perhaps ten feet deep and twenty in diameter, which are lined with fire-wood, on which is arranged a layer of stones; when these are heated the animals to be roasted are laid on them, with several hot stones inside each to secure cooking throughout. Then comes a covering of leaves and earth, and the baking process completes itself. This, on a smaller scale, is the manner in which our daily pig is cooked. I have seen a bill of fare which included fifty pigs roasted whole, seventy baked turtles, fifteen tons of sweet pudding, fifty tons of yams and *taro*, and piles of canyona roots, besides many trifling dainties.—C. F. Gordon, *Cummings at Home in Fiji*.

Items.

Getting Rid of a Preacher.—The *Presbyterian* states that in a wealthy Episcopal Church in Pittsburg, Pa., the vestry wished a change, and asked the minister to resign. This he positively declined; and was then informed that after a certain time the rectory would be leased to another party. A compromise was finally agreed upon, the minister promising to quit the rectory at a time fixed upon, with the understanding that on his departure he is to receive the sum of \$5,000.

Is not this an illustration of one of the disadvantages attendant upon a system of paid ministry?

Church Music.—The *Presbyterian*, in commenting upon the high prices paid to accomplished musi-

cians for church services, says:—"They are employed not so much to stir worshipful emotions as to yield entertainment." After stating that a certain Presbyterian congregation in New York pays one of its lady singers \$5,000 a year, and querying whether it is right and becoming to employ professional stars in sacred service, quotes from an Episcopalian paper, the *Churchman*, which says:—"The tendency to turn churches into concert rooms, and choirs into operatic choruses, is becoming more common every day."

As to the effect upon the listeners, the *Presbyterian* says, "It is not salutary, the attention is directed to it not as a means of God- uplifting, but as an artistic performance. The talk generally upon leaving the sanctuary is not how edifying was the truth presented to-day, or how spiritual and elevating the service, but how finely Miss So-and-so sang, or possibly some hyper-critic has his exception to take."

Bible in Public Schools.—The Supreme Court of Wisconsin has decided that the use of the Bible as a book of religious instruction in the public schools conflicts with the constitution of that State. It is said this decision does not prohibit its use as a work of history or general literature.

"St. Austin, although approving of music in church exercises, 'bewails the danger of being too much carried away by the delight of the harmony, and confesses that he had sometimes been more pleased with the music than affected with what was sung.'"

"As to music as an amusement, too much time must never be given to it, and extreme care ought to be taken, as a judicious and experienced tutor observes, that children be not set to learn it very young, because it is a thing which bewitches the senses, dissipates the mind exceedingly, and alienates it from serious studies."—*Butler's Lives of the Saints*, vol. 10, pp. 536-537.

THE FRIEND.

FIFTH MONTH 3, 1890.

PHILADELPHIA YEARLY MEETING.

(Concluded from page 311.)

On Third-day morning, Joseph Walton and John E. Carter were appointed to act as clerk and assistant clerk for the present year.

This sitting was mainly occupied with the consideration of the first six queries. It was a weighty meeting, in which many subjects claimed notice, and called forth earnest counsel, exhortation, or caution from exercised brethren.

The young men were encouraged to attend meetings for discipline, which might prove to them schools of instruction and of spiritual benefit. Friends who had employes or others, whose time was under their control, were admonished to open the way for such to attend religious meetings in the middle of the week. The blessedness of communion with Christ was spoken of as an encouragement to those who belonged to small meetings where but few assembled. The spirit of Christianity was shown to be one of love; but while, in accordance with the example of our Saviour, we should love the sinner, we must abhor the evil; and not suffer our testimonies against wrong things to be weakened or laid aside. Our young men were exhorted not to be ashamed of their profession as Quakers. A caution was extended against countenancing the evils of horse-racing by attending agricultural fairs, or sending exhibits to those where trotting grounds were maintained.

On Fourth-day.—The remaining queries were read. The number of ministers and elders who had deceased since last report was 8.

The Reports on Education gave the number of our children of school age, 772; of whom 594 were being educated under the care of the Society.

Considerable time was spent on the subject of a revision of the Discipline, which is largely a collection of advices issued by the Yearly Meeting from time to time; and is not a formal code of rules digested and titled together like the statute laws of a nation. Many Friends were favorable to the appointment of a committee to take the subject under care and report next year—especially in view of the statement which was made, that some of our members had joined Masonic or other secret societies. Others were not prepared for such a course, but thought it better that any subject such as that of membership in secret societies, requiring particular attention, should be brought forward through subordinate meetings in the usual manner. There did not seem sufficient unity to take any action at this time; and the subject was passed from without disturbing the harmony of the meeting; but with an understanding that a caution should be sent to our members against joining secret societies.

The Reports on the Use of Intoxicating Drinks showed that about 190 of our members had disregarded the advice of the Yearly Meeting on that subject; many of them, by partaking of cider or other of the milder stimulants. A renewed caution against falling into this dangerous practice was sent to our members.

On Fifth-day.—A proposition from Western Quarterly Meeting to change the time of their assembling from 11 o'clock to 10, was approved. The change of hour is to commence in Fifth Month next.

The Report of the Committee having charge of the Boarding School at Westtown, was interesting and satisfactory. A concern spread over the meeting, that the religious interests of the children there should be watched over in the future as it had been in the past, and that the institution should be preserved a distinctively "Friend's school."

A small addition was made to the number of the Indian Committee. Women Friends have also concluded to appoint a few of their members to act in conjunction with men Friends in this concern.

On Sixth-day a Report was received from the Committee appointed two years ago to visit subordinate meetings and members. In the course of their labors, they had paid repeated visits to nearly, or all of our meetings; made family visits in several for the benefit of the community at large. They had been kindly welcomed and assisted by Friends in these labors, had labored harmoniously in the service, and been sensible of the extendings of Divine favor and help. Their report was satisfactory to the meeting, and their request to be released was complied with.

The report mentioned that they had been grieved in some places by finding musical instruments in the houses of Friends. This awakened an exercise on the subject, under which earnest and loving exhortations were given to avoid the use of music in families of Friends, as a yielding to worldly conformity which would be hurtful to their spiritual interests.

The minute on the state of Society, contained a condemnation of the practice of joining secret societies, as inconsistent with our principles and testimonies. Those who had become entangled in this evil were affectionately entreated to withdraw from any connection with such organiza-

tions. However worthy may be the ostensible object of such societies, it was felt that the incorporation in them of the feature of secrecy precluded every consistent Friend from joining them.

The meeting closed with an expression of thankfulness for the help graciously afforded to transact its business with harmony and concision.

Henry S. Newman gave a verbal message of good-will from London Yearly Meeting, and spoke kindly of the labors of our Friends, Samuel Morris and Thomas P. Cope, who have been travelling in Great Britain in the service of the Gospel.

SUMMARY OF EVENTS.

UNITED STATES.—The United States Supreme Court, through Chief Justice Fuller, on the 28th of Fourth Month, rendered an opinion adverse to the constitutionality of State laws providing for the seizure of liquor brought into the State in original packages. Such laws, the Court holds, are an interference with interstate commerce. After the liquor becomes the property of the importer the State may, under its police powers, regulate or prohibit sale, but it has no power, in the absence of express Congressional authority, to prohibit the transportation of the article from another State and its delivery to the importer. The case in which this decision was made was that of *Guisey & Co., plaintiffs, in error, vs. A. J. Hardin*. It was taken to the Supreme Court on appeal from the Supreme Court of Iowa, and the United States Supreme Court reverses the decision of the State Court. Justices Gray, and Bradley, were dissented.

The Federal Circuit Court has issued an order which is intended to put a stop to the Chinese scheme of gaining admittance into the United States over the Mexican border.

The House Committee on Public Lands has ordered a favorable report with amendments, on the Senate bill to provide for the acquisition of land for townsites and commercial purposes in Alaska. The bill changes the capital of the Territory from Sitka to Juneau, extends the operations of the homestead laws over the Territory, and sets apart certain lands for the use and benefit of Indians. It also provides for the purchase of the capital is that Sitka has a population of only fifty white, while Juneau has upwards of a thousand white inhabitants. In addition, it is the centre of operations, and has the advantage of natural location, and a splendid harbor.

Thirty-seven leading citizens of New Mexico have arrived in Washington to ask of Congress the appointment of a special tribunal to settle land grant titles in that territory. The delegates also urge its immediate admission as a State, and ask, in lieu of swamp lands given to States, the cession of land for educational purposes, and for enabling New Mexico to construct public irrigation canals.

Three millions of dollars' worth of property in the towns around Chattanooga has been sold within ten days, chiefly to New Englanders.

A telegram from London says that a London bar-rister named Townsend, "claiming to be backed by a \$200,000 syndicate," is there attempting to secure options on all the glass factories in the vicinity. "It is the intention to turn the glass houses on one immense concern. Townsend's offers are being considered."

The exact time to erect the great dam in the United States, over the Colorado River. It will cost \$1,500,000, and will develop 14,000 horse power.

The Independent publishes returns of the vote in the Presbyterian Church on revision of the Confession of Faith in 170 Presbyteries. Of these 110 vote for revision, 55 against revision, and five do not vote at all. Forty-four Presbyteries are yet to be heard from. The Baltimore Presbytery has adopted the majority report favoring a revision of the Confession of Faith.

A telegram from Cincinnati says that a London bar-rister named Townsend, "claiming to be backed by a \$200,000 syndicate," is there attempting to secure options on all the glass factories in the vicinity. "It is the intention to turn the glass houses on one immense concern. Townsend's offers are being considered."

The Boston Police Board has ordered that after Fifth Month 1st, the sale of intoxicating liquors over bars

must be stopped. This order has been expected for some time, but it was the hope not only of the Police Commissioners, but also of the saloon keepers, that the law requiring liquors to be sold with food only would be repealed. The Board has now decided that the law was rejected in the Senate by the vote of 19 to 17. The law was rejected in the Assembly, with the idea probably that there was no further hope for modification, the Police Commissioners have given notice to the saloon keepers to remove their bars within 20 days.

A despatch from Lansing, Michigan, says that on Friday last \$2,000,000 of Michigan bonds, amounting to \$225,000, will mature, and the bonds will be called in and paid from the sinking fund.

The Chicago police have been ordered to stop the sale of cigarettes and whiskey drops to boys under 16 years of age.

Deaths in this city last week numbered 431; one less than during the previous week and 36 more than during the corresponding period last year. Of the whole number 215 were males and 216 females; 55 died of consumption; 47 of pneumonia; 37 of diseases of the heart; 22 of inflammation of the brain; 20 of old age; 19 of bronchitis; 15 of typhoid fever; 14 of convulsions; 12 of marasmus; 11 of crop; 10 of debility and 10 of apoplexy.

Markets.—*Fl.*—U. S. 4 1/2's, 103 1/2; 4's, 122 1/2; currency 6's, 114 & 126.

Wheat—Wheat firm but quiet at 12 1/2-16 cts. per pound for middling uplands.

FEED.—Feed was quoted at \$16.50 a \$17 per ton for winter bran, and at \$16 a \$16.50 for spring do.

FLOUR.—Western and Pennsylvania super, \$2.50 a \$2.75; do, do, extras, \$2.75 a \$3.15; No. 2 winter hard, \$3.00 a \$3.25; Pennsylvania family, stone ground, \$3.50 a \$3.75; Pennsylvania rye process, \$3.50 a \$4.25; Western winter, clear, \$4.00 a \$4.40; do, do, straight, \$4.50 a \$4.75; winter patent, \$4.75 a \$5.25; Minnesota, clear, \$4.00 a \$4.30; do, straight, \$4.35 a \$4.55; do, patent, \$5.00 a \$5.35; do, do, straight, \$5.00 a \$5.35. Eye flour was scarce and firm, at \$3.10 a \$3.20 per barrel.

GRAIN.—No. 2 red wheat, 94 1/2 a 95 cts. No. 2 mixed corn, 40 1/2 a 41 cts.

No. 2 white oats, 34 a 34 1/2 cts.

BEEF CATTLE.—Extra, 5 1/2 a 5 3/4 cts; good, 4 1/2 a 5 cts; medium, 4 1/2 a 5 1/4 cts; Pennsylvania common, 4 a 4 1/2 cts; culls, 3 1/2 a 3 3/4 cts; fat cows, 2 1/2 a 3 cts.

SHEEP.—Extra, 6 1/2 cts; good, 6 a 6 1/2 cts; medium, 5 1/2 a 5 3/4 cts; common, 5 a 5 1/2 cts; culls, 4 1/2 a 4 3/4 cts; extra native, clipped, 5 1/2 a 5 3/4 cts; good, 5 1/2 a 5 3/4 cts; medium, 4 1/2 a 4 3/4 cts; common, 4 a 4 1/2 cts; culls, 3 1/2 a 3 3/4 cts.

LAMBS.—Common, good, wool, 10 a 10 1/2 cts; shorn clipped, 4 1/2 a 6 1/2 cts; spring lambs, \$4 a \$6.50 per head.

HOGS.—Good Western, 6 1/2 a 6 3/4 cts; good head, 5 1/2 a 6 1/4 cts.

FOREIGN.—In the House of Commons, on the evening of the 29th ult. Gladstone resumed the debate on the Land Purchase bill. He said he was opposed to the bill, under an overwhelming conviction that it was complicated, without undertaking to solve the difficulty.

On the 28th, Joseph Chamberlain said in the House of Commons that he was in favor of incorporating to the bill the proposals in the Government's bill. He admitted the strength of the objection to hypochondriac Irish local resources without the consent of the Irish people, and agreed that the Government's assuming the position of landlord would pave the way to fiction and possibly to danger. He suggested, as a modification of the bill, that the Government should quickly disposed of the Land Purchase bill in order to enable the Government to introduce and pass an Irish Local Government bill during the present session, but whether such a bill were passed this or next session, the Government would promise the formation of an Irish county council, which would have the power to take over the working of the Land Purchase bill, the collecting of instalments, and the handing of them to the British exchequer?

St. William Vernon Harcourt congratulated Chamberlain on his position in speaking on this issue. He felt obliged to ask him whether his speech was for or against the second reading. The Government, he continued, had better withdraw the bill rather than accept the plans of both Parnell and Chamberlain.

St. William Vernon Harcourt congratulated Chamberlain on his position in speaking on this issue. He felt obliged to ask him whether his speech was for or against the second reading. The Government, he continued, had better withdraw the bill rather than accept the plans of both Parnell and Chamberlain.

If England was ever placed in the position of an evictor of Irish tenants Home Rule would soon come.

A serious objection was it would form a precedent for English, Scotch and Welsh tenants in making similar demands for other objects.

A special despatch to the New York Herald from London of the 28th inst., says that the United States and the British Government have made an imperative demand that the Delagoa railway question should be settled by arbitration. The United States and British Ministers had a long interview Seventh-day with the Foreign Minister, who has the affair under careful consideration.

The Paris *Dix-Neuvieme Siecle* publishes information, received by private letters from New Caledonia, from which it appears that leprosy is spreading in New Caledonia in a most alarming manner. Of 40,000 Kanakas no fewer than 5,000 are described as suffering from the terrible disease. The authorities of the public authorities had taken no measures to prevent it from spreading; but now two subordinate colonies have been created—one on Goat Island, in Dumbea Bay, and the other in Canala, at a spot known as the Fides des Morts. Every inhabitant recognized as a leper by the Medical Commission is to be confined in one of these leper colonies. The correspondent of the *Dix-Neuvieme Siecle* declares that this measure has been delayed too long to prove of any great use, and that it is not applied properly.

John P. Mason, Jr., was an employe of Emin Bey while Emin was at Wadela, has made a sworn deposition before Mason Bey in Cairo, to the effect that the revolt of Emin's forces was solely due to the discovery of Emin's plans to surrender his province to the Mahdi. Emin, according to the clerk's statement, sent three men to the Mahdi, offering to surrender, but they were seized and stopped by the Mahdi's officers. The revolt followed this discovery. Mason Bey confirms the statement credible.

The receipts of Egyptian cotton at Cairo this year exceed those of 1889 by nearly 500,000 cantars.

Despatches to the *Star* from Jamaica, dated Fourth Month 26th says: The report of a Ministerial crisis is false. According to the newspapers of Montevideo, Ministers Bucayova and Ruy Barboza still retain their portfolios. They state that the discord in the Cabinet has disappeared, and that the Government has accepted the conclusion of the Washington Congress for settling all questions by arbitration which may arise between countries.

A big syndicate of American and foreign capitalists offers to loan the Mexican Government \$250,000,000 to pay off all internal and external debts and subsidies. Government lands are to be taken as security.

NOTICES.

CORRECTION.—In the article on page 285, in No. 36 of THE FRIEND, the closing sentence says "from the provinces of Wisconsin." It should have been, "from the pineries of Wisconsin."

H. H. BONWILL requests that Friends who have collected for the good of any kind which they can spare for the relief of newly-Friended Indians and others, will send them to Henry Laing, No. 30 North Third St., Phila., where they will be packed.

MARRIED, First Month 24th, 1889, at Friends' Meeting-house, Westfield, Hamilton Co., Indiana, GALLIE PEACOCK, son of Abram and Mary Jane Peacock, to ELIZABETH MACY, daughter of Joel R. and Amy M. Macy.

According to Friends' ceremony, Second Month 20th, 1890, at the residence of W. Jordan Brown, JOSHUA WHITE, of Belvidere, N. C., son of David and Isabella White, to M. ELLEN BROWN, of Woodland N. C., daughter of W. Jordan and Mary A. Brown.

Friends' Review please copy.

DEED, Third Month 7th, 1890, at the home of her parents near Danvers, Va., after the death of Miss ELMA FOGG, daughter of Edin B. and Eliza A. Fogg, in the 24th year of her age, a member of Upper Spring field Monthly Meeting. This dear young Friend was of a meek and humble spirit. It was her lot to drink deeply of the waters of affliction; her friends have to commend her to that through redeeming love and mercy, her end was peace.

—, at his late residence, near Richmond, Indiana Fourth Month 12th, 1890, JOE WINDLE, aged 82 years 9 months and 5 days, a member of Chester Monthl Meeting of Friends.

FOR "THE FRIEND."

Incidents and Reflections.—No. 222.

COMPOSURE AND TRUST.

How beautifully does the Psalmist depict the situation of him who can say of the Lord, "He is my refuge and my fortress; my God; in Him will I trust." Those who have thus made the Lord their refuge, and the most High their habitation, can rely on the promise, that He will be with them in trouble and will deliver them.

When Stephen Grellet was visiting among the islands of Greece, in 1819, he left Smyrna in a boat with two men to row it. He says: "With ourselves and Martine, our Greek, we made five altogether, and with our baggage our boat was almost filled. As it was fine weather it was expected that we should reach Seo in about 24 hours; a small quantity of provisions was therefore thought sufficient to take with us; we went on very nicely for a few hours, when the wind began to blow heavily, and the waves washed over us to our no small danger: each of us having a large canvas cloak, we spread them over us and the boat, making a kind of deck; at the same time they were busy bailing out water that washed in with every wave; our rowers meanwhile made great efforts to reach an uninhabited barren spot, called English Island, which is however pretty large. We did not discover on it a single shrub or anything green. We were thankful in being able to make a safe landing, for, very soon after we had done so, the wind increased furiously, and had we been still at sea, we could not have escaped a watery grave. We tried to erect a kind of tent with the oars and the sail of our boat, to protect us from the burning sun.

"The day after our coming to this island, two boats with Turks in them also came to it, landing at the same place we had done. My dear companion and the rest of the company had taken a walk to seek for water, and I was left alone in the tent. Some of the Turks came and sat down at the entrance of it: having with them firearms, their large swords and poignards; they began to fire their guns and pistols at blank-marks, and by their signs urged me to show my firearms. They were beginning to be rude, when my company, attracted by the firing, returned. They at first thought I had been murdered. The Turks then retired to their boats, where they

continued during the night—which we passed in some anxiety, watching their movements; but to our relief, towards morning they rowed away to another part of the island. Our stock of provisions being very small, we had to limit ourselves to a scanty allowance. Our greatest difficulty was the want of water; we in vain sought for some, neither could we discover any fish near the island, nor birds on it; scorpions are very numerous, several of these were under nearly every stone we turned over, and many were seen in our tent.

"Our minds are preserved in calmness, staid on the Lord, we have the confidence that He can open the way for our release from this state of danger and suffering. In his will we feel resigned; with reverent gratitude we can also say, that if our mouth is dried for want of water, our minds are refreshed by his Divine presence; for truly we feel that our springs are in Him, as David said."

On the 4th of the Eighth Month, "the wind abated last night, so as to encourage us to put to sea again early this morning. It was hard and dangerous work, till we had succeeded in doubling the Cape, and were well drenched by the waves. We reached Seo early in the afternoon, with hearts prepared to ascribe thanksgiving and praise to the Lord, who has sustained us under hunger and thirst, and delivered us from imminent danger."

A writer in the *Christian Advocate* of New York, gives the following illustrations of the importance of having our hopes placed on an immutable foundation:—

"Many years ago, in old Seventh Street Church, here in New York, there was an earnest little boy who gave his heart to God and joined our church; he was older than he seemed to be and was an object of special pleasure to us. One night he very solemnly told us in our prayer-meeting of an experience he had had since the last time he had met with us. He had been away from home, and there had been an accident on the railway-train; he was thrown from his seat and had had a terrible fright. 'Now,' said the little fellow, 'I am going to seek for a pure, clean heart, so I am going to be prepared for sudden death.' A few nights after he rose in our meeting and with a beaming face exclaimed: 'I am ready for any smash-up now!'

"Every body smiled, but I have often thought, and think now, more than ever, that we need to be prepared for the wrecks that may be just before us. It may not be a wreck on a railway-train. There are other wrecks. How many homes are wrecked! How many who once had health haven't it to-day—and we may not have to-morrow! And some day there will come 'the wreck of matter and the crash of worlds.' Now, would it not be well for us to seek 'to know God, and Jesus Christ whom He hath sent,' in such a way that no 'smash-up,' as the little fellow said, will ever have the power to wreck the soul in us?

"Emerson was met in the streets of Boston

one day, and a friend said to him: 'Mr. Emerson, they say the world is coming to an end?' 'Well,' replied the calm thinker, 'I can do without it.' After the storm this early autumn, as I read in the papers up among the mountains that the house of a friend of mine was undermined and might any hour float out to sea, I wrote a congratulatory letter to her that though the house might go they were safe. She received my congratulations in the spirit in which I sent them and wrote that they were to be congratulated if city and country houses both passed away. Maybe we do not think enough of the things that cannot be moved, of wrecks that can never come, of our house not made with hands, that can never float out to sea.

"Considering the condition of change we are in, would it not be well to get a firmer grip on the unchangeable? The 'smash-ups' will come, as the little fellow said, and we shall be wise if we secure a kingdom within us that cannot be moved."

The following incident was sent to me by a Friend who resides in the interior of New York State. It illustrates the protecting care of the Almighty over those who look to and trust in Him. We cannot always expect such a clear answer to our petitions, as this young woman was favored with, but such trust will never be without its reward. The letter says:—

"My wife was in need of help which she made known to an Irish family, tenants of ours, they spoke of two girls, relatives of theirs, that were coming to New York, and would want places. Arrangements were made for them to come to Auburn, and I would meet them there and bring them to their relatives; if appearances were favorable, one was to come and live with us, the younger one my wife was willing to give a trial, she was green and untutored, but interested to do her best, anxious to learn to read and write, and soon devoted her spare time to her books; went with her Catholic friends to meeting for a time or perhaps two years, but began by this time to incline to go with us; every influence was brought to bear upon her by her relatives and priest that they could invent, all the torments of hell and eternal damnation, the being forsaken of her friends, &c., all to no avail.

After ten years' residence with us, she went to her aunt's in New York, and after a visit obtained a position as nursery maid, became much attached to her little charge, attended Friends' Meetings when opportunity offered; but at length her mistress's husband failed in business, and then she accepted a similar position with another family. In time she had a call to go with some young married people with a young child, to Europe to travel; as her mother, brothers and sisters were still living in Ireland, and she could be allowed time during the summer and visit them, was strongly inclined to go with them, but had questioned in her mind as to the rightfulness of doing so; it became altogether so burdensome to her, she wrote to us for our advice in the matter; we would have advised

her to accept the opportunity, but for the questioning she felt in her own mind. One night the matter was so heavy upon her she knelt down by the side of her bed and prayed to her Father in Heaven that He would make it known to her whether she had best go in the ship which was now soon to sail. She got into bed and partly asleep, she then heard a voice say to her three times, don't go, you will be drowned. She was now settled and gave up the favorable opportunity of visiting home, family and native land. The result was, the ship foundered on Newfoundland banks, the young couple with their infant child found a watery grave.

"Now was it or was it not a special Providence, or was it merely a coincidence. I believe it was a favor of the Almighty for her faithfulness and honesty of purpose in looking to Him for guidance.

"She soon had another opportunity, went to Europe, spent a year or two visiting her home in Ireland, and had no hesitancy in doing so."

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 315.)

1794, Eleventh Mo., 23rd.—I was at Stony Brook Meeting, which was a poor, low time. I thought the people were too regardless of the great business of worship.

The next day I attended the Quarterly Meeting at Crosswicks, which was large. I had a time of close labor in the women's apartment, pleading for the cause and testimony of the pure Truth, against superfluities of various kinds: such as fine houses, rich furniture, gaudy apparel, the free use of the tea-table, large looking-glasses, black silk cloaks, etc., and had to advise to the bringing children up to industry and to trying to teach them to be content with the productions of our own country, for food, raiment, etc., as much as may be.

26th.—I was at a small meeting, called Robins'; and was at one that evening at R. Walm's mill—the last a time of favor. Next day at Arnestown, I was at a poor, little meeting; and at another at Trenton the day following. This seems a poor place for religion. From hence, I came to Burlington, and was at meeting there, which was comfortable. Here seems a revival of religion with some young people.

12th Mo.—After attending a large and satisfactory meeting at Mansfield, I went the two following days to the Monthly Meetings of Chesterfield and Springfield. The first of them seemed a low and tedious season in their business—the latter more lively; several weighty matters recommended by our last Yearly Meeting were attended to both in the men's and women's part. I was concerned in the latter to speak of the religious education of youth, refraining from superfluities, etc., similar to what is mentioned respecting the exercise at their late Quarterly Meeting, before hinted.

I was at Mount Holly and Evesham Monthly Meetings in the same week. In the first of them I thought too little of lively care appeared among the middle-aged, and those further advanced. The latter was, in the forefront of it, favored with a solemn calm, yet grew more flat. I thought I saw that the spirit of the world was too predominant over many.

On the 6th of the Twelfth Month I reached to my own habitation again, after being absent seven months and about two weeks. I found my family in outward health, though, to my grief, the adversary had got among my flock. Every cup hath its dregs, except the cup of

salvation—that is sweet and clear to the bottom. My son hath greatly missed the right way.

It is a sore trial to me, but I find that I am not altogether deserted. The Lord's power is a safe shelter; and though I have to drink (as it were) a wormwood cup, and to pass through deep baptisms on account of the errors and outgoing of my own children, with the unrighteousness of others in our Society and our country; yet I am thankful, in that at times I feel a calm in the storm, and a garment of praise for the spirit of heaviness. Great and marvelous are thy works, O Lord Almighty! Thou hast been with me in my late travels and trials, opening my way, where there seemed to be no way to pass, and bringing me back as with shaves of inward peace. Enable me, oh my God, to say with thy tried servant in former days; "Shall I receive good at the Lord's hand, and shall I not receive evil?"

Being much exercised in our meeting at Newtown on First-day, the 14th, I was enabled before it ended, to relieve my mind in a few expressions to this effect: "Are there not many dead bodies lying, who have been poisoned with the dregs of the syrup of the spirit of this world?" This seemed to have some present effect, as a solemn calmness came over the meeting.

17th.—In my late affliction, the Lord doth not leave me. I have felt a support from that power which calmeth the sea when wave after wave rolls in upon me. In our meeting I was enabled to speak of the difference there is between an earthly and a heavenly storehouse:—The one as nothing, and the other all things, in a dying hour, etc. This world, we see, is changeable and full of trouble. But in Christ Jesus, there is substantial peace.

20th.—I obtained some relief in having a solid season with my transgressing son and in endeavoring to discharge a father's part faithfully.

Towards the latter part of this month I went to Salem, with my wife; we visited some Friends, to our comfort. I attended Salem Preparative Meeting, where I thought there was weakness prevalent, by reason of the spirit of the world being allowed to creep in.

25th.—I was also at the Monthly Meeting at Pile's Grove, which in a good measure was satisfactory; the business pretty well conducted. I had a favored time in the women's part, pleading in my way for a reformation, which was, I believe, well taken. Visiting several families to my satisfaction, I endeavored to deal plainly as the way opened. I was at Alloway's Creek meeting on First-day; a solid season. I had to speak about some building their nests too high, &c.

Attending Salem Monthly Meeting the 29th, I had some close service both among men and women Friends, to my own peace.

Going also to Greenwich, which seemed ready to shake my foundation. The Monthly Meeting here I thought was a low time. Where should I sometimes be if not enabled to flee to the Rock for refuge and safety?

1795, First Mo. 2nd.—I returned, well satisfied with my little journey; yet have my bitter cups at home. 3rd, I went to see two sick persons—one of them, I hoped, would become reconciled to leave the world, as he seemed to expect his end was near. The other, though one would have thought age and infirmities might have weakened his affections for worldly things, yet I was afraid that his work was not accomplished.

Seeing we must suffer adversity, I hope, through holy help, to be enabled to live above despair; and if I can, through watchful care, arrive at last to that port where the weary are at rest, it will sweeten every probation.

7th.—On reading in the Scriptures, a strong temptation was presented, to urge me to believe they were untrue. This made me cry, Lord, increase my faith, and suffer not mine enemy to prevail over me. (9th.) As dieth the beggar, so dieth the rich. I attended the burial of an ancient neighbor who was deemed wealthy; but this is no consolation, if spiritual riches be wanting.

13th.—As one cross-occurrence follows another, like wave upon wave, oh, that I may be favored to feel that Stone, which is the foundation of the elect.

16th.—I had a prospect of God's mercy and goodness to a backsliding people, in not cutting short the work, by an overbearing scourge. Many contend about worldly interests; some not clear of extortion; some become rich through the abundance of trading by sea—and not always refusing unjust gain. The rich oppress the poor, in demanding high prices. Farmers and dealers raise the value of the earth's produce. The laborer then murmurs and saitheth his wages low. This again displeaseth the farmer. In those muddy waters the merchant still fisheth for more gain, not fearing to oppress those of low degree. Bread-stuffs now become nearly double the former price; great confusion and fumes of a party spirit. Instead of humility, the sorrowful appearance of pride and haughtiness continuing. True moderation and temperance observed; by very few. Indulged by parents, the sons and daughters of high professors seek to make a grand appearance. Honest labor slighted, and commendable industry in the fertile soil neglected. High trades or occupations chosen and sought after—such as doctors, lawyers, merchants, etc., for our young men; whilst the distressed poor, the indigent widow, and the fatherless, are subjected to a state like that of "grinding their faces."

Wilt not thou, O Lord, judge for these things? My soul within me is led into mourning under a consideration of the sad state of America. May it not be lamented in the language of grief? How few is the number of those who truly "fear the Lord, and hate covetousness!" In our condition, thus degenerated, are there not serious tokens of thy displeasure, O Lord—and of the shaking of thy rod, manifest to those who fear thy name? Our crops lessened by blasting or mildew—sometimes by worms or flies heretofore not commonly known in our land; warnings also by a pestilential fever, etc. O, thou Father of mercies, cause thy trumpet to be sounded louder and louder, if consistent with thy will; that the inhabitants of our favored land may be alarmed indeed—and many, in thy mercy, be assisted in turning unto thee, and seeking repentance, that their souls may be saved! Amen.

17th & 21st.—I have to partake of many biters, unknown to any but the Lord, and poverty of spirit; ready to fear I shall one day fall, as by Saul's hand, unless the Lord scatter my foes. He is able to stay my faith, that it fail not.

26th.—I perceived some inward ability to pray for my children; this cannot be done aright without Divine aid.

28th.—On this day, reading an ancient law of New Jersey, which was made to prevent imposition on the poor native Indians, by giving or selling rum, etc., to them, to intoxicate and

thereby to take advantage in obtaining their property without real value, I thought it was to the credit of the rulers of that time and worthy of remembrance to succeeding generations, as long as white people and Indians continue in the land; that a laudable practice may continue of wisely considering what real justice and righteousness do require in suitable kindnesses, to the descendants of the original owners of American lauds.

(To be continued.)

FOR "THE FRIEND."

"The Public School founded by Charter in the town and County of Philadelphia, in Pennsylvania," the Forrester Trust, and the Fourth Street Meeting and School-Houses.

(Continued from page 316.)

On the 28th of Fifth Month, 1732, William Hudson and Isaac Norris produced to the Monthly Meeting of Philadelphia a codicil to the will of William Forrester, deceased, by which he vested in them for the use of "the people of God called Quakers, in Philadelphia," after the decease of his wife, Joan Forrester, who was then dead, the lot of ground on the southeast corner of Chestnut and Fourth streets, about ninety feet on Chestnut street and about two hundred and fifty feet on Fourth street. The property was to be held in trust, and the income "applied to and for the help and maintenance of poor children belonging to said meeting, at school, and other like charitable uses as the said meeting shall, from time to time, think fit."

This document was dated the 30th of the Eighth Month, 1710, and annexed to or accompanying it was a letter of even date, addressed by endorsement on the back: "To the Monthly Meeting of Friends in Philadelphia." This letter was as follows:

PHILAD'A, 30th 8th Mo., 1710.

Dear Friends:—In the love of the blessed Truth, which is unchangeable, wherein we have often had sweet comfort together, in a sense whereof I do at this time salute you, herewithal transmitting unto you the inclosed, containing a declaration and explanation of and concerning my last will and testament, of the same date, desiring the lots, houses and premises may not be otherwise sold or disposed of, but for the particular uses which I have already expressed; and the inheritance thereof, in fit persons which the Meeting may make choice of from time to time, forever; to be kept and the profits thereof to be laid out for charitable uses as therein expressed; and so, in the same love, hoping therein to remain and finish my course here in this world, I take my last farewell and remain your friend and brother whilst I am

WM. FORRESTER.

Witnesses present:

Thos. Story,
Anthony Morris,
Anthony Morris, Jr.,
Jos. Lawrence.

A supplementary letter also accompanied the codicil, which was in William Forrester's handwriting, in the following words:

PHILADELPHIA, 6-day of y^e 3 Mo., 1714.

Dear Friends:—This is my desire: that the house and lot I have left upon my will to my Friends Isaac Norris and Wm. Hudson, after my decease and [that of] my wife, I desire that it may not be put to that use [which] John Martin's house is.

[John Martin's house was Friends' Alms-House, on the south side of Walnut street, be-

tween Third and Fourth streets.]—I desire it to be kept in good repair and let out, and the income of it for the use of poor Friends and other charitable uses, as Friends may see fit.—This in order to your loving brother.

WILLIAM FORRESTER.

Thus, whilst the property itself could not be used as a habitation for poor Friends, the scope of the trust was enlarged so as to embrace "other charitable uses as Friends may see fit," in addition to those originally referred to in the codicil.

Soon after the production of the codicil and letters in the Monthly Meeting, trustees were appointed by it to hold the title, and the property was conveyed to them. And in 1736, as will hereafter appear, the care of the estate was confided to the Overseers of the Public Schools.

In 1744 the overseers applied to the Monthly Meeting for liberty to build a new school-house upon some part of the lot devised by William Forrester.

A committee was appointed to confer with them, and it was ultimately decided to grant the request—the building to be erected near the south end of the lot, and the dimensions to be about sixty feet long and thirty-five feet wide, two stories high, elevated about three feet above the ground, and with a cellar underneath. This building was completed the following year. It included within its walls "a convenient room for the placing of the books left by Thomas Chalkley for the service of Friends." The books were placed under the care of Anthony Benezet. This was the nucleus from which Friends' Library was formed.

This school-house stood with its longest side at right angles with Fourth street, and was set back from the line of that street a little distance, the whole front of the lot being afterwards enclosed with a brick wall, through which were five entrance gates. In the first story of the building on the south flank, there were seven windows and one door; and in the second story, eight windows. The first and second stories facing Fourth street were each provided with three windows. There were outside shutters to the windows, of an antique pattern, and the hinges were on the exterior sides.

The roof was hipped on its east and west ends. The exterior walls were of brick, and there was a projecting course of brick or stone showing the division-line between the two stories. The interior was divided into four large rooms, two in each story. Those on the first floor were entered from the doorway on the south side. The second story was reached by two parallel staircases, the doorways to which were side by side at the centre of the north flank of the building.

In later years, an observatory was erected immediately over the doorway on the south side. It is said to have been octagonal, with sundry curious windows in the roof and sides.

From this observatory the observations were made by which the time of the old State House clock was regulated. The astronomical clock used in connection with this work is still preserved at Friends' Select School on Sixteenth street. It was in this school-house that the most important schools established by the "School Corporation" were conducted for nearly a century. In later years the boys only were taught there; and the adjoining building, after its disuse as a meeting-house, seems to have been appropriated to the girls.

The building was taken down in the year 1867.

At the Monthly Meeting held on the 24th of Sixth Month, 1763, the want of additional accommodations for holding meetings for business was considered and the following result recorded:

"It is generally acknowledged that a more convenient place is wanted for holding our meetings for business than we are accommodated with, it being considered, it was agreed that a building should be erected on some part of the lot belonging to this meeting on which the public school-house stands, and which may not only serve for this purpose, but for accommodating the meeting held quarterly with the scholars under the care of Friends, which has for some time past been much wanted." [A committee was appointed] "to make out a plan of a suitable building and to calculate the expense of erecting it."

The following month the committee reported, that a building could "be erected to the northward of the school-house, about nine feet from Fourth street, 76 feet front and 42 feet deep, one story high, about twelve feet from floor to ceiling, and the floor about twenty-one inches above the brick pavement in the street; a cellar under the house about eight feet deep. Probable cost about £1200, seats and benches and outside pavement included."

The report of the committee was adopted with the reserve that the new building should not be placed nearer the north wall of the school-house than twenty-five feet, from an apprehension that it might interfere with the light and air.

In accordance with this decision the meeting-house was proceeded with and finished.

This building was built of brick, with its longest side parallel with Fourth street. The gables were on the north and south sides. The cornice was continued across all four sides. The entrances (of which there were two) were at the ends, and twelve windows facing Fourth street, are shown in the pictures of the building now extant, six above and six below. Part of these windows had outside shutters, and the rest seem to have been without them. It will be noticed that the original design of the building was based upon a single story, twelve feet high. The pictures however clearly indicate a two-story building, so that the plan must have either been changed or an additional story added afterwards.

It has not been found possible to obtain any information as to the arrangements of the interior. It is probable that after its use as a meeting-house was given up, it was considerably altered to adapt it for school purposes.

In the Ninth Month, 1807, a joint committee of the three Monthly Meetings reported—

"On the subject of removing the galleries from the Fourth Street Meeting-house to the large committee-room on Mulberry Street, * * * That although as a committee we do not conceive that the measure of placing a gallery there would be any improvement, yet considering the Monthly Meeting of Philadelphia capable of deciding thereon, we are willing to recommend the subject being referred to them, agreeing that such articles as they may judge necessary may be removed from the Fourth to the Mulberry street house."

From the foregoing it seems probable that the ministers gallery now in the large committee-room in the centre building of the Arch Street Meeting-house, is the same as that which was formerly in use in the Fourth Street Meeting-house.

The old building was finally removed in 1859, to make way for the present improvements on the lot.

In the year 1800, the Meeting for Sufferings took under its consideration the fact that there were a large number of records and papers of great "value and importance to our religious Society lying in different places, exposed to loss and perhaps entire destruction by fire." The meeting came to a judgment "that such prudent means as may be within our power ought to be used for their better preservation." The subject was referred to a committee, which made a report the following year, in which they recommended that a Hall of Records for the purpose of containing such books and papers should be erected on some part of the lot at Fourth and Chestnut streets, left by William Forrest, a plan of which they produced. It was also estimated that the cost of such a building would be about £500.

This proposition was presented to the Monthly Meetings and was approved by one of them at least, but it does not appear to have been ultimately carried out.

(To be concluded.)

FOR "THE FRIEND."

Claims on Friends.

It has come to the knowledge of the writer that in Wayne County, N. C., there are in one neighborhood about twenty-five members of our Religious Society, between the ages of five and eighteen years, who are destitute of school learning, and their parents are unable from want of means to provide a school for them.

If Friends of Philadelphia and vicinity would kindly spare out of their abundance, say, in the aggregate, about two hundred dollars, to provide on a small scale a school where these children, can be instructed, the writer is willing to take charge of what may be contributed, and put it in safe hands for its proper application.

A young woman Friend, amply competent for a teacher of such a school, can be had in a neighboring county.

GEO. W. TAYLOR.

3728 Hamilton St., Philad'a.

Having a Chance.—A few years ago a cultivated young married couple retired for business reasons to the top of a mountain in Pennsylvania. They had no society save that of miners and mechanics; the roads were passable only on horseback, and the nearest town was thirty miles away. How to make the most of their time became an interesting question. A manual of geology was procured and read. On horseback in hours of leisure they scoured the whole region of country around them, got specimens of all sorts that they could find, studied them out when they got home from their rides, and made themselves thoroughly familiar with the geology of that part of the State, and measurably with the geology of all the State. In process of time that very acquisition, which had been pursued as a pastime, became the stepping-stone to a position of honor and emolument that could not have been otherwise secured.

Those in the world who, it is said "have a chance" are generally those who improve what chances they have, and by small steps rise to high places. "To him that hath shall be given, but from him that hath not shall be taken away even that he hath." Those who, instead of lackadaisically hanging their hands and lamenting that they have "no chance in life," go vigorously and resolutely to work improving the chances they have, by and by come out on tablelands where wide horizons spread around them.

SOWING AND REAPING.

Sow with a generous hand;
Pause not for toll or pain;
Weary not through the heat of summer,
Weary not through the cold spring rain;
But wait till the autumn comes
For the sheaves of golden grain.

Scatter the seed, and fear not,
A table will be spread;
What matter if you are too weary
To eat your hard-earned bread?
Sow, while the earth is broken,
For the hungry must be fed.

Sow;—while the seeds are lying
In the warm earth's bosom deep,
And your warm tears rise up the side,
They stir in the soil and sleep;
And the green blades fill the quicker,
Perchance, for the tears you weep.

Then sow!—for the hours are fleeting,
And the seed must fall to-day;
And care not what hands shall reap it,
Or if you shall have passed away
Before the waving corn field
Shall gladden the sunny day.

Sow, and look onward, upward,
Where the starry light appears,—
Where, in spite of the coward's doubting,
Or your own heart's trembling fears,
You shall reap in joy the harvest
You have sown to-day in tears.

—Adelaide Procter.

MY WISH.

SELECTED.

If I might only have my wish!
The wind to-night blows from the sea,
Swaying between me and the stars,
The pale blooms of the locust tree.
Sweet, nameless stars are in the air,
Dying like waves upon my ear;
Peace rules the world, the hour, my heart,
As I muse on what is drawing near.

"From battle, murder—sudden death—
Good Lord, deliver us!" we say,
A silver cord with bloody chains
Twisting and jangling as we pray.
"From sudden death deliver us!
Give us instead slow waste and pain,
Fever and frost, the rack, the swoon,
Till life is spent beneath the strain!"

If I might only have my wish—
Come my last hour or soon or late,
I would not on the hither shore
Of the mysterious ocean wait,
Watching the shadows gather in,
Hearing the nearing billows beat,
Feeling the tide know to ebb
Wash higher o'er my chilling feet.

Dear life! sweet life! full life! when I
Must render thee to Him who gave,
I'd yield thee up, untrifled
By thoughts of death—thine and the grave.
As, at the mother's call, the child
Runs to her arms, at set of sun,
Fearless, because he knows nor cares
If day be ended or begun—

I'd see my last sunset round off
Hours filled with honest toil for man,
Such work with God as ever brings
Fulness of peace and never ban.
Enshrouded in still fragrant glooms,
By thoughts of death—thine and the grave,
I'd breathe the quaint old hymnal thanks
"For all the blessings of the light!"

If I might only have my wish!
The wind should blow fresh from the sea!
Betwixt the earth and the consoling stars
Swing pale blooms of the locust-tree.
With tender thoughts of friends beloved,
And humble hope of sins forgiven,
My prayer half-said, I'd fall asleep,
And say "Amen!" at dawn in heaven.

—Marion Harland.

THE LITTLE HIGH CHAIR.

In an attic deserted, stowed safely away,
A little high chair I discovered to-day,
In a dingy, dark corner, with cobwebs o'ergrown;
But who was its owner, is something unknown.

A round or two broken, a break from the seat,
The back partly patched up, and nowhere complete;
With the paint strangely tortured to patches quite bare,
Make lone and pathetic the little high chair.

The child who sat in it, I venture to say,
Is a tottering old man if he's living to-day.
What fields he has conquered, what prospects found fair,
No record or person is here to declare.

Yet, born with his youth, this one relic remains
From a far distant time, when life's contests and pains
Stood far in abeyance, and naught could impair
The career that should start from the little high chair.

Did the subject tied up there, so proud on his throne,
Go out through the world a great power, or unknown?
Was the joy that youth promised, fulfilled, or a snare?
No answer comes back from the little high chair.

The mother who cherished the child that it bore,
And all who once knew it have gone on before;
But a history of some sort, forbidding or fair,
Begins every day from some little high chair.

—Jed Benton, in Once a Week.

The Region of the Amazon.

The Amazon, if the Para River be included at the southern channel, is 100 miles wide at its mouth. Para itself, the northernmost city of Brazil, lies at the gateway of the most wonderful river system of the world. It is the commercial depot and distributing point for 40,000 miles of navigable water. The Amazon water-shed embraces twenty-five degrees of latitude and thirty-five degrees of longitude. Its western sources are in the Andes of Peru and Ecuador, only a few leagues from the Pacific. Its northern tributaries traverse the borders of Guiana and Columbia, while midway the headwaters of the Negro mingle with those of the Orinoco in the western spurs of the Sierra de Pacaraima. On the south the Madeira has innumerable sources in the mountain levels of Bolivia, while the Tapajós, the Xingu, and the Tocantins penetrate the central provinces of Brazil. If a comparatively small group of southern provinces be left out of the account, the Amazon, with its tributaries, forms the water system for an area larger than that of the United States. It furnishes the only means of communication between the smaller centres of population in fully one half of the vast territories of Brazil. Between most of its leading tributaries are broad stretches of impenetrable forests, which have never been explored by white men. It is the Amazon alone that renders any form of government possible in the heart of South America. Within the range of the 40,000 miles of navigable water settlements have been made; rubber farms opened; and magistrates empowered to conduct local administration.

Para, lying at the southernmost outlet of the Amazon, less than 100 miles from the sea, is the metropolis of this wonderful valley. It is a city with perhaps 50,000 inhabitants, and with as much commercial enterprise as is possible under the equator. The commerce of the Amazon is nominally carried on under the Brazilian flag. Foreigners are not allowed by law to own steamers or sailing vessels employed in inland navigation; and hence it is necessary for the English capitalists, who control the carrying trade of the river, to assign their interests to Brazilians.

There are 40 steamers owned by an English

line, which receives a large mail subsidy from the Brazilian Government for plying between various ports and villages on the main tributaries; and in return for this financial support, it is well satisfied to fly the national flag. Another company has eight steamers, under similar conditions; and there are as many as a dozen more on the river and its tributaries which sail under the Brazilian flag. These sixty steamers are gradually opening the Amazon Valley to commerce. Only the smaller vessels are now running beyond Manaus, at the junction of the Negro; but next year the largest English vessels will make regular trips to Yquitos, 3,750 miles from the coast. Some of the tributaries are only navigable for long distances at high water during certain months of the year, but the lower villages on their banks are visited by steamers as often as once or twice a month.

This river trade is almost completely in the hands of the Portuguese merchants and the mercantile houses represented at Para. Manaus, with a population of 15,000, is the most flourishing town west of Para. The other settlements, with few exceptions, are straggling villages, inhabited mainly by negroes, Indians, and half-breeds.

The forests of the Amazon, consisting mainly of hard woods, are not available for commercial requirements. The finest of rosewood and mahogany are used there for firewood. Even if there were a demand for the hardwood lumber at Para, it could not be logged and brought to market on a large scale, owing to the density of the woods and the lack of roads and clearings. The one tree which is a source of wealth in these immense forests, is the rubber-tree. It is found everywhere, from the low-lying delta opposite Para to the Tapajós, the Madeira, and the Negro; and probably thousands of miles beyond these great tributaries. In the interior, roads are impracticable, and the rubber trees that are milked lie along the rivers, where the farms can be approached. The milk can only be drawn at certain levels of the river—for the trunks of the trees are often fifteen or twenty feet under water after the rainy seasons. When the conditions are favorable, the bark of the trees is tapped and the milk drawn off in cups, to be compacted and rolled together, layer by layer, like a snowball. It is then cooked or smoked over a fire made of sticks; a process that involves contraction in cooling and imparts elasticity to the substance; and then it is ready for shipment to Para and New York.

The operation of such farms and the opening of new forests in the trackless swamps and forests, require the employment of native labor under the most inclement conditions of equatorial heat and rains. If there be any quarter of the world where nature seems to command inaction and indolence, it is in these vast stretches of the Amazonian forest. Nowhere else can existence be sustained with so small an expenditure of effort. On an acre of cleared land beans can be raised in sufficient quantity to keep soul and body together, with the adventitious aid of nuts and fruit from the woods. A torpid, sordid existence seems to be the imperative requirement of the climate. The Indians, half-breeds, and negroes in the villages, can live, if they choose to do so, with what may be described as the minimum of human labor involved in obtaining a livelihood. They instinctively resist all appeals to ambition and self-interest. The efforts of rubber farmers and agents to induce them to share in the dangers and labor involved in exploring the forest and

striking new veins of rubber trees, are ordinarily futile; and the employment of even the poorest labor is carried on under great difficulties.—*South American Correspondence, N. Y. Tribune.*

FOR "THE FRIEND."

Lumboltz's Travels in Australia.

Carl Lumboltz, in 1880, undertook an expedition to Australia, with the object of making collections for the museum of the University of Christiania, Norway, and of examining into the customs and characteristics of the native Australians. He spent four years in that interesting country, much of the time living among the blacks (as the natives are called); and made extensive collections of the birds, animals, insects and other productions of Australia, which are now in the museum of the University. In reading his interesting narrative, one is deeply impressed with the energy and indefatigable perseverance with which he carried out his plans; and the respect he manifested for the natural rights of the natives, which have often been cruelly violated by the white settlers, who, in many cases, paid no more regard to them than they did to the kangaroos which were slaughtered to save the pasturage for their cattle.

Most of his time was spent in Northern Queensland, the North Eastern Province of the continent.

When a section of the country abounding in pasturage is opened to settlement, it is first occupied by what are called squatters, who lease from the government large tracts, to be occupied by herds of cattle and sheep. One of these tracts where Carl spent some time, was 50 miles long by 20 wide. As the population increases, the land is sold to settlers, and the size of the runs decreased. Some of these tracts will feed as many as 200,000 sheep or 15,000 head of cattle.

"At Peak Down," says Lumboltz, "situated about two hundred miles west of Rockhampton, I received the first impression of genuine native Australian scenery. Larger plains, with here and there an isolated gum-tree, extensive scrubs, and now and then low mountain-ridges in the background; sometimes an emu would appear, or a little flock of kangaroos that are suddenly startled—all of which is so characteristic of the country.

"I was surprised at the great number of marsupials that had their abode there. They had proved to be so troublesome that several of the squatters had found it necessary to surround their large pastures with fences so high that the animals could not jump over them and consume the grass. One of the sheep-owners told me that in the course of eighteen months he had killed 64,000 of these animals, especially wallabies and kangaroo-rats, and also many thousands of the larger kangaroo. The bodies of these animals are left to lie and rot, for none but the natives eat the flesh; and although the skin of the large kangaroo can be tanned into an excellent leather, still it does not pay to skin the animal so far away from the coast. The only part that is used occasionally is the tail, from which a fine soup is produced."

"At sunset we encamped for the night, and the horses were let loose with their forefeet hobbled. We made a large fire and prepared our supper, which, as is common in the bush, consisted of salt beef and damper. The latter is the name of a kind of bread made of wheat flour and water. The dough is shaped into a flat, round cake, which is baked in red-hot ashes. This bread looks very inviting, and tastes very

good, as long as it is fresh, but it soon becomes hard and dry.

"After supper we immediately made up our beds, which consisted simply of a waterproof laid on the ground and some woollen blankets. For the sake of convenience we usually slept under the wagon with the fire below us."

"It seldom rains in Western Queensland; but during the rainy season the rivers rapidly fill their beds, overflow their banks, and in some places become several miles wide. The water, however, soon disperses again, and the high temperature reduces the mighty stream to isolated water holes. Water is therefore a precious article in the Australian bush. To furnish drink for the cattle the squatter must build large dams, especially across the rivers, and thus gather a supply which may protect him against irreparable losses. In recent years water has been obtained by boring very deep wells."

"In Western Queensland nobody is surprised if a drop of rain does not fall for 8 or 10 months together. Nevertheless cattle and sheep keep fat all the year, for the grass retains its nutriment even though it looks dry and gray."

"On the way to Thompson River I spent a night with an Irish shepherd, who lived far away from any neighbor, occupied wholly with his sheep. He preferred this solitary life, to which he had accustomed himself for many years. After supper he spread some sacks on the floor, and these were to be my bed. But I was not yet ready to retire, so I went out in the starry night, where the moon and the Southern Cross shone cold on the lonely landscape. I opened the door and was deeply touched to find the hermit kneeling before his bed. Here the old man lived alone with his God in the desolate Australian bush."

The men who live on the runs and take care of the stock are called Bushmen. Their work is rough and exposing, similar to that of the Western Cowboy. Removed as they are from nearly all civilizing influences, if not originally rough characters, they very frequently become so. As their herds encroach on the hunting grounds of the natives, who depend for their subsistence on the wild animals and vegetables which they find on the plains and forests, these sometimes appropriate a sheep or an ox for a feast—which is of course resented by their care-takers. Hence a chronic state of hostility exists between many of the outlying settlers and the neighboring tribes of Australians—leading to the rapid destruction of the latter.

Lumboltz says:—"Sheep and oxen begin to feed on the grounds that have belonged to the blacks, and the latter are prohibited from going where they please; because the herds are disturbed by the black man's hunting, may even by the smell of the savages. As a matter of course the natives therefore try to resist the strangers who interfere with their inherited rights."

"The rough settler, who never sees a woman of his own race, soon begins to associate with the black women. A friendly relation between the two races is made impossible; the white men shoot the black men, and the black men kill the white men when they can, and spear their sheep and cattle."

To show the feeling which exists, Lumboltz remarks:—"On the borders of civilization men would think as little of shooting a black man as a dog. The law imposes death by hanging as the penalty for murdering a black man, but people live so far apart in these uncivilized regions that a white man may in fact do what he pleases with the blacks. In Northern Queens-

land I often heard this remark: 'The only treatment proper for the blacks is to shoot them all.'

The Australians are divided up into numerous small tribes, who occupy tracts of land which are recognized as their own territory, and into which any intruder is regarded as an enemy, liable to be killed and eaten. They are generally on hostile terms with their neighbors, and occasionally make predatory incursions into their dominions, especially for the seizure of their women, who are regarded as the most valuable of booty. They are liberal to the members of their own family tribes, freely distributing among them the honey or flesh, or other valuables which they may have obtained. Among these people our traveller spent much time, going on extensive hunting excursions and camping out with them on the mountains. He found them possessed of some amiable traits of character, but at the same time felt the need of constant watchfulness, and of the exercise of much patience and forbearance. Cultivating no lands, and having no domestic animals, except a few of the wild dogs, caught when puppies and trained to assist in hunting, every day's food has to be provided by the efforts of the day. To this cause is probably due the fact that many substances, such as insects, snakes, &c., which are rejected by most people are reckoned among their edibles. They have learned by severe experience not to be fastidious, but to make use of almost every thing that will support life.

"HAVING been under deep baptisms and poverty of spirit, as I quietly rode along, the Lord was pleased in mercy to break in upon my mind, by his life-giving presence and power; and it became the language of my soul, 'Speak, Lord, and thy servant will hear.' After which, many things were divinely opened to me, wherein I greatly rejoiced, and was thankful to the Lord, my God. Then I found a sudden but gentle rebuke, and heard as it were a voice, that said in the secret of my soul, 'These dispensations thou most delightest in are least pleasing to me, and not so beneficial to thy soul, as that pure poverty of spirit, brokenness and contrition of heart, which bring into humility of mind; and the reason why this is so little desired, and so unpleasant to the creature, is, because it can have no part therein, but is wholly and entirely excluded and set at naught—can discover no beauty or excellency in it; and this is the reason I love the offering of a broken heart and contrite spirit, as it is most pure, and without any mixture of the creature. For, whether there be prophecies, Divine openings, revelations, consolations, joyings or rejoicings in the Holy Spirit, gifts of healing or tongues or utterance, in all these self can rejoice and have a share, being obvious to it, and bringing it honor.' Then, said I, 'Lord, dispense to me what is most pleasing unto thee, and best for my soul, so long as my weak faith and patience can endure it; but when I am ready to faint, give me a little of the wine well refined on the lees, that my soul may rejoice in thee, the God of my salvation.'"

MARY PEASELEY.

Natural History, Science, etc.

Chinese Rice Paper.—The largest specimens which came under my notice were about five or six feet in height, and from six to eight inches in circumference at the base, but nearly of an equal thickness all up the stem. The stems, usually bare all the way up, were crowned at the top with a number of noble-looking palmete

leaves, on long foot-stalks, which gave to the plant a very ornamental appearance. The underside of each leaf, its foot-stalks, and the top part of the stem, which was clasped by these stalks, were densely covered with down of a rich brown color, which readily came off upon any substance with which it came in contact. I did not meet with any plant in flower during my rambles, but it is probable the plant flowers at a later period of the year.* Numerous small plants were coming through the ground in various directions, which a Chinese soldier carefully dug up for me, and which I took to Shanghai and deposited them in Mr. Beale's garden. These, with a few samples of the largest stems I could find, have been sent to England and India. The latter will prove an interesting addition to our museums of vegetable productions. The proportion of pith in these stems is very great, particularly near the tops of vigorous growing ones—and it is from this pure white substance that the beautiful article erroneously called "rice paper" is prepared.

It is largely cultivated in many parts of the Island of Formosa, and with rice and camphor forms one of the chief articles of export. Mr. Bowring, who read a paper upon the rice-paper plant before the China branch of the Royal Asiatic Society, informs us that the Canton and Fokien provinces are the chief consumers, and that the town of Foo-chow alone is supposed to take annually not less than 30,000 dollars' worth of this curious and beautiful production. The cheapness of this paper in the Chinese market, as Mr. Bowring justly remarks, is evidence of the abundance of the plant in its place of growth, and more especially of the cheapness of labor. "That 100 sheets of this material (each about three inches square), certainly one of the most beautiful and delicate substances with which we are acquainted, should be procurable for the small sum of 1½d., or 1½d., is truly astonishing."—*Fortune's Travels in China.*

Vulpine Sagacity.—The natural cunning of the fox was shown at New Ipswich, N. H. A fox that was started by a hunter ran directly to a pond and passed around the edge on the ice as near the open water as possible. The dogs followed closely, and, coming upon the weak ice, broke through, and but for the help given them would have drowned. Meanwhile, Reynard escaped to a place of safety.—*Boston Transcript.*

Earthquakes in Great Britain.—The late work of Wm. Roper on "Remarkable Earthquakes in Great Britain and Ireland during the Christian Era," shows that the total number of distinct earthquakes recorded during this era is 582, and of these 75 per cent. have been recorded since 1600. Since 1800, 233 shocks have been recorded, and there is every reason to believe that the discrepancies in former centuries are due solely to lack of observers, and that seismic disturbances were as common in the past as in the present.

Power of Imagination in Fowls.—Appropos of fowls, some of our readers may not know the best way of catching them, or rather, of securing them when caught. We once saw a farmer collecting several in his farmyard with a view to sending them off to market. As fast as one was run down and caught, it was pressed down on the ground, and a wisp of hay or straw placed across it, and an elaborate pretence of fastening the wisp down on either side gone through.

* It flowers and seeds during the winter and spring months at Hong-Kong and Calcutta.

The bird felt the momentary pressure of the band, and thought itself bound, and would remain in the same position till the farmer had made up his number, and was ready to go round and collect them: a striking illustration of the power of imagination.

If a fowl be taken into the barn and its beak held to the boards while a chalk-line is drawn from the beak for a couple of feet or so, straight in front of it, the bird appears mesmerized, and will remain in that position. This, therefore, affords to the captors of fowls what the cookery books so delight in—"another way." *Hulme's Wayside Sketches.*

The Balolo of Fiji.—The balolo is a small sea-worm, long and thin, as ordinary vermicelli. Some are fully a yard long; others about an inch. It has a jointed body and many legs, and lives in the deep sea.

Only on two days in the whole year do these creatures come to the surface of the water. The first day is in October, which is hence called "Little Balolo," when only a few appear. The natives know exactly when they are due, and are all on the lookout for them. They make their calculations by the position of certain stars. After this, no more are seen till the high tide of the full moon, which occurs between the 20th and 25th of November, which hence takes the name of "Great Balolo," when they rise to the surface in countless myriads, always before daybreak. In the Samoan Isles the day occurs about a fortnight earlier. At certain well-known points near the reefs, the whole sea, to the depth of several inches, is simply alive with these red, green, and brown creatures, which form one writhing mass, and are pursued by shoals of fish of all sizes which come to share the feast with the human beings. The latter are in a state of the wildest excitement—for it is the merriest day of the year, and is looked forward to from one November to the next, by all the young folks.

About midnight they go out in their canoes, and anxiously await the appearance of the first few worms, and great is the struggle to secure these, which herald the approach of untold myriads. For several hours there is the merriest sport and laughter, every one bailing up the worms and trying who can most quickly fill his canoe either by fair sport or by stealing from his neighbor. All is noise, scrambling and excitement; the lads and lasses, each carrying wicker-baskets with which they capture the worms, without carrying too much salt water on board. As the day dawns, these mysterious creatures with one accord sink once more to their native depths, and by the moment of sunrise not one remains on the surface, nor will another be seen for a twelvemonth, when, true to its festival, the balolo will certainly return. Never has it been known to fail, in the memory of the oldest inhabitant, white or brown. Nor is there any record of any one having seen rise to the surface on any save the two appointed days, which are known as the "Little Balolo" and "Great Balolo."

Well do the natives know how needless it would be to look for one after sunrise; so, all the canoes then return to land, wrap their balolo in bread-fruit leaves, cook them in ovens dug on the beach, and have a great feast—a regular whitetail dinner in fact.

So, now you know the true meaning of the "Diet of Worms." So great is the quantity taken, that the supply generally lasts for several days—being warmed up when required; and basketfuls are sent to friends at a distance, just

as we in Scotland send a box of grouse. Such is our prejudice against all manner of worms, that few Europeans appreciate this dainty, which, nevertheless, is really not nasty, especially when eaten like potted meat, with bread and butter. It is rather like spinach with a flavor of the sea; perhaps I should compare it with the laver of the Scilly Isles. Captain Olive brought up some to taste, which had been given him by some of the Roman Catholic soldiers.—*C. F. Gordon Cummings' "At Home in Fiji."*

Items.

Pan-American Congress and Arbitration.—In the closing session of this important Congress, Secretary Blaine made the following remarks:—

"If, in this closing hour, the Conference had but one deed to celebrate, we should dare call the world's attention to the deliberate, confident, solemn dedication of two great continents to peace, and to the prospect which has peace for its foundation. We would then have the Congress which abolishes war and substitutes arbitration between the American Republics, as the first and great fruit of the International American Conference. That no-blist of Americans, the aged poet and philanthropist, Whittier, is the first to send his salutation and his benediction, declaring: "If in the spirit of peace the majority shall refer upon a rule of arbitration which shall make war in this hemisphere well nigh impossible, its sessions will prove one of the most important events in the history of the world."

The scheme adopted by the Congress and thus referred to by Secretary Blaine, "proposes the negotiation of a treaty between the various Republics, which shall refer to arbitration all settlement of all disputes, differences and contentions that may arise between any two or more of them. Arbitration is to be compulsory upon all in matters of diplomacy, territory, boundaries, navigation, and the enforcement, interpretation or validity of treaties. Only one exception is admitted to the compulsory character of arbitration and that is in favor of any nation whose independence is in jeopardy. There is no restriction of choice of arbitrators. They may be nations, scientific societies, officials or private citizens. The majority of them shall decide, unless it is specifically agreed beforehand, that unanimity shall be required.

Anti-Chinese Legislation.—A writer in the *Independent*, of New York, enumerates four incidents which illustrate some of the hardships attendant on the execution of the laws excluding Chinese from our country. These are—

"Two or three years ago a Chinese resident of New Haven, who had become a Christian and was an exemplary member of one of the churches of that city, desiring to settle there permanently, wished to bring his wife and his little son, seven years of age, to this country. A strong petition was prepared and signed by the Professors of Yale College, and by eminent ministers, lawyers, physicians and other members of the community. The Secretary of the Treasury to allow this man's wife and son to join him in this country. In due course of time an answer was received from the Treasury Department to this effect:

"Inasmuch as said persons were not in this country at the time of the passage of the Exclusion Act, they cannot be allowed to enter it."

"20. A short time ago a vessel was wrecked on its way from the West Indies to New York, and passengers and crew were struggling in the deep on a life-raft when they were picked up by a passing vessel and carried into the harbor of New York. All of these unfortunate people landed without difficulty or question except one, who happened to be a Chinese man, and whose name of this country forbade his entrance. The great Jehovah, in allowing him to be rescued from the ocean and brought to New York with the others, does not seem to have had any regard to the laws of the United States, and the Custom House authorities were in great trouble. They telegraphed to Washington, and, after much

discussion, the Secretary of the Treasury decided as a matter of humanity to violate the law and allow the unfortunate man to stay until some vessel going to the port for which he was bound would take him away.

"3d. A Chinese merchant, in San Francisco, who had been doing business in that city for over twenty years, whose sons, sixteen and fourteen years old, were born there, was taken ill and soon found that his sickness must have a fatal termination. He telegraphed to his wife and children, who were then at Victoria, British Columbia, where he had a branch store, to come to him immediately. They at once took passage and soon arrived in the harbor of San Francisco. Again the Custom House authorities were in tribulation. They telegraphed to the Secretary of the Treasury, a humane man, who wished to give the family the privilege of seeing their husband and father in his last hours; but the law was in his way. He called for a meeting of the Cabinet, and, after the President of the United States and his secretaries had spent anxious hours upon the subject, they decided that the family might go under a guard from the Custom House to the dying man and remain until his funeral should be over, and the guard should return with them as they returned by the first steamer to Victoria.

"4th. There is at this moment, in Dublin, Ireland, the wife of a noble Christian man, of Fubehn, who gave \$10,000 to the Anglo-Chinese college of that port. She has entertained at her home, with profuse hospitality, several bishops of the Methodist Episcopal Church and officials of the American Government with their wives, as well as all the missionaries and many of the merchants of the community. Her husband desires that she may return home via the United States and have the pleasure of seeing those who have sent the Gospel to her and mingling with her fellow church-members in this country. But, as it is not at all likely that she can comply with this wish on different arrangements made in regard to persons other than laborers who may wish to come from China to America, it is very doubtful whether she can step foot upon this sacred soil, although her foot would not occupy more than three inches on that soil."

The writer regards such legislation as disgraceful to our nation.

Italians in "Wild West" Shows.—A communication filed in from Josiah W. Leeds, *The Christian Statesman*, calls attention to the demoralizing effect upon the Indians of leaving their homes to travel with such exhibitions. The testimony of the agents on the reservations is nearly all of a similar character to that given by Agent Shuber of the White Earth Agency:—

"Fourteen Indians under my charge have been travelling with the Wild West show, and have come back worthless vagabonds, whose principal desire is to live in idleness and gain a living by trafficking in whiskey. Their influence is bad on those with whom they associate, and in my judgment the government should take prompt measures to suppress these shows and have the Indians return to their reservations."

It is regretted that the present Indian Commissioner will probably refuse all applications for permissions to secure performers in such shows.

Not content with reducing the allowances from the Civil List to the various members of his family, the Russian Emperor has inaugurated a series of economical reforms in connection with the imperial household. A number of useless offices have been abandoned and a great number of attendants reduced. When the present Czar ascended the throne the Imperial entourage numbered 405 persons—now reduced to 143—15 being members of the Imperial family. As an example of the manner in which money has been wasted, it may be mentioned that some functionary had been drawing \$750 a year for "a lip-salve!" The item attracting notice, and upon inquiry it was discovered that his predecessors in office had been drawing this sum ever since the time of Catherine II, though that august lady having once, when suffering from chapped lips, ordered a box of the article.

THE FRIEND.

FIFTH MONTH 10, 1890.

A letter recently received from a valued Friend, expresses the fear that there is not amongst the older members of Philadelphia Yearly Meeting sufficient care extended over the younger members in the line of personal and social influence. It says:—"It is so pleasant to visit and mingle with friends of congenial feelings and interest, that I often fear we do not enough look after our younger and less friendly members; endeavoring to cherish the good in them rather than to too much see the shortcomings; remembering that the blade and the ear must precede the full corn."

We believe that there is a large amount of honest concern for the welfare of our young people, among the more experienced members of Philadelphia Yearly Meeting; and this is often manifested in the affectionate appeals to this class made in our religious meetings. Yet we hope the hint conveyed by our correspondent may be of service in turning the attention of some to the good that may be effected by personal private intercourse. Where persons endeavor to dwell under a sense of the Divine presence, and to be always ready to do what properly opens as a duty, opportunities will often present for speaking a word of encouragement, or advice; and even where little is said of a religious nature, the weight of their spirits will have a salutary effect upon those with whom they mingle.

In our issue of Third Month 22nd, there was published a letter from a Friend commenting on the proposal of a Friend in England to publish a book of "Quaker pedigrees."

The following letter has been received from the author of the work, explaining his object in preparing it.

"As a question of conscience or as a matter of right and wrong, opinions must differ, and I will say nothing; but I do wish to point out that the collection and compilation of Pedigrees was started and is continued solely with the idea and as a means of permanently recording the genealogies of members of the Society, few of which have at present any existence outside the families to which they relate.

A careless generation is bound to occur sooner or later in a family, and the careful records, the labor of so many different hands are lost, mislaid or destroyed, and thus information, of great value is irrevocably lost, utterly beyond the power of a future generation to re-instate it.

In words which I borrow from a well known genealogist: "I have taken this pains not for this present age but a future, many things which were known to our grandfathers are lost to us, and our grandchildren will search in vain for many facts which to us are most familiar."

SUMMARY OF EVENTS.

UNITED STATES.—The public debt statement shows that the reduction of the public debt during the Fourth Month amounted to \$7,639,391. Total cash in the Treasury \$432,234,790.

The President on the 2nd instant, approved the bill establishing a Territorial Government in Oklahoma. The House Committee on Foreign Affairs on the 1st instant, took favorable action upon Representative Hitt's resolution looking to reciprocal relations between the United States and other American republics. The resolution, as it will be reported, is as follows:—Resolved, That, in the opinion of this House, closer commercial relations with the other republics on the

American continent would be of mutual advantage, and the House would view with favor reciprocal treaties for promoting the trade and the protection of different countries by tariff concessions on both sides, conducive to increased commercial intercourse and mutual profit, widening the markets for the products of all, and strengthening the friendly relations of this country with its neighbors.

Senator James B. Beck, of Kentucky, dropped dead in the Baltimore and Potomac Railroad depot in Washington on the afternoon of the 3d inst. Heart disease was the cause. He was 68 years of age.

Delegates from the riparian districts of Louisiana, Maine, Maryland, Massachusetts, and Missouri, have been in convention in Vicksburg, Miss., with the object of arriving at some uniform action with reference to the future protection of the valley from inundation.

A scheme of voting which will place the whites in permanent control of affairs is being advocated in Mississippi. The plan is to allow every one to vote who now has the right to do so, and to add an additional vote for each 40 or 80 acres of real estate, or its equivalent in value of real estate, to the number not exceeding fifty votes.

The execution of Kemmler, the murderer, who was to have been killed by electricity in the penitentiary at Auburn, New York, has been stayed by a writ of habeas corpus, granted by Justice Wallace, of the United States Circuit Court for Northern New York. The grand jury had granted a writ of error in the manner of the execution is a violation of the Constitution of the United States.

On the 5th inst., Roger M. Sherman, counsel for Kemmler, made an application in the United States Supreme Court, for a writ of habeas corpus for his client. The Court refused to grant it, but the attorney informed Sherman that on the 19th inst. the Court would hear a motion for a writ of error in the case, notice to be given the Attorney General of the State. This will permit the whole record to be brought up and the case argued. The Court follows the precedent of the *Spies* anarchist case. As the Court adjourns for the term on the 19th, the decision denying or granting the writ of error will be announced almost immediately after the argument.

The amended Sixty Ballot Reform bill was passed by the Ohio General Assembly on the night of the 30th ult. The next day a bill abolishing capital punishment was passed. The vote was 75 to 29.

The Presbytery of Oregon has decided that all candidates for a license to preach must abandon the use of tobacco in all forms.

The saloons in South Dakota were closed at midnight on the 30th ult., prohibition having gone into effect. As druggists can secure no licenses before Sixth Mo. 1st, absolute dryness must prevail throughout the State, except among the owners of private saloons.

At Chamberlain the feeling among the anti-Prohibitionists as well as the Prohibitionists for a strict enforcement of the law, the former thus hoping to secure its speedy repeal. At Mitchell all the saloons gave farewell feasts before the hour of closing. At Pierre the principal saloon keeper draped his place in honor of the Prohibitionists. At Rapid City, as at the other Republican party is defeated.

The peach trees in Kent County, Md., number about 3,000,000 and will yield a "half crop," or one basket of fruit to a tree. Growers believe the crop will pay between 30 cent crop or 60 cent wheat.

There were 367 deaths reported as having occurred in this city last week, being 64 less than during the previous week and 35 less than during the corresponding period last year. Of the whole number 177 were males and 190 females; 50 died of diseases of the lungs; 10 of cancer; 10 of cholera; 10 of pneumonia; 16 of convulsions; 15 of old age; 14 of marasmus; 13 of inflammation of the stomach and bowels; 12 of typhoid fever; 11 of bronchitis and 10 of apoplexy.

4th, 122^d; currency 'U. S. 41st, reg. 102^d; coupon, 103^d; and 104th.

Corros was firm but quiet at 123-16 cts. per pound for middling uplands.

FEED—Winter bran, choice, 16.75; do., fair to prime, 16.25 a 16.00; for spring bran, 15.75 a 16.10. Winter wheat, No. 1, 2.25; No. 2, 2.10; do., do., extra, 2.75 a 3.15; No. 3 winter, fair, 3.25 a 3.40; Pennsylvania family, stone ground, 35.50 a 35.75; Pennsylvania roller process, 36.75 a 44.50; Western winter, clear, 41.10 a 44.50; winter wheat, 41.50; No. 1, 35.85; winter patent, 55.00 a 56.25; Minnesota winter, clear, 44.00; do., do., 44.50 a 55.00; do., patent, 55.15 a 55.50; do.,

favorite brands, 56.65 a 57.75. Rye flour is scarce and firm at \$3.25 per bushel, red heat, 90 a 97 cts.

GRAIN.—No. 2 mixed corn, 41 a 41 1/2 cts. No. 2 white oats, 34 1/2 a 34 3/4 cts.

BEE CATTLE.—Extra, 5 1/2 a 5 3/4 cts.; good, 5 a 5 1/2 cts.; medium, 4 1/2 a 4 3/4 cts.; fair, 4 1/4 a 4 1/2 cts.; common, 4 1/4 a 4 1/2 cts.; culls, 3 a 4 1/2 cts.

SHEEP.—Kansas wool sheep, 4 a 6 1/2 cts.; native, clipped sheep, 3 1/2 a 5 1/2 cts.

LAMBS.—Native wool lambs, 5 1/2 a 7 1/2 cts.; native clipped, 4 1/2 a 6 1/2 cts.; spring lambs, \$3.50 a \$6.25 per head.

WOLVES.—Western, 6 1/2 a 6 3/4 cts.; State, 5 1/2 a 6 cts.

FOREIGN.—W. E. Gladstone, in a speech in the House of Commons, on the night of the 2nd inst., strongly advocated the disestablishment and disendowment of the Church in Scotland. This, with his vote for Cameron's motion for disestablishment, which was lost by a majority of 38, has given an immense impetus, it is said, to the attack upon the establishment in England. This question now is regarded by many as promising to become a leading plank in the platform of the Liberal party at the next general election.

The present state of affairs in the *York Times*, in his despatches of the 13th inst., and refers to the anticipated troubles of the 1st inst.: "That dreadful 1st of May has come and gone, and Europe is not much the worse. Hardly a shot was fired, and nowhere were there any serious disturbances. Even Anarchists have not been able to do much more than quarrel with society when society is fully prepared. Genuine workmen perceived that the Socialistic mob meant to take advantage of their demonstration, and wisely declined all partnership with revolutionary disorder. The two places where most was feared were Paris and Vienna. The present state of affairs is not so ample for anything less than a general uprising. The whole garrison of Vienna was on a war footing. The working-men contented themselves with holding 67 trade meetings in the early morning, each resolving in favor of eight hours for a day's work. This done, they adjourned to the 13th inst., and had a grand and innumerable sausage, and wondered why the troops were under arms."

"In Paris there was no disturbance worth mentioning, though, but for the precautions taken, the city last night have been alarmed. The hero of Thursday was Mr. Combes, who has been in the city for some time. He has heard of him before as an able and resolute man. It knows him now as thoroughly capable of keeping order. Mr. Blowitz published on Thursday what is called an interview with this Minister. He said, 'if I adjourned the Chamber, I would be the work of an artisan, I might doubt, but they are not the work of an artisan. These intended riots are men ready to fling red arisians under the hoofs of the horse of the first sham Cesar who starts up.'"

On First-day, the 4th inst., an enormous labor demonstration took place in Hyde Park, London. It is estimated that 250,000 men were gathered in the Park; but they were quiet and orderly, and the speakers were moderate, though decided in their expressions, demanding the more practical recognition of the rights and needs of the laborer.

On the evening of the 29th ultimo, asked leave to introduce a bill to consolidate and amend the Licensing laws. He said he thought that Parliament, by ignoring Bruce's suggestions in 1871, was largely responsible for the increase of drunkenness. The number of taverns was grossly in excess of the people's wants. He believed the best part of the trade desired a reform of the licensing system. He recognized that it was impossible to pass the bill this year, but he desired that it pass the second reading and be referred to committee.

A treaty has been concluded by the East African Company with King Mwanga. It places Uganda completely under British protection, and gives the control of the Victoria Nyanza to Great Britain. It clears the way for the construction of the Nile, and makes it possible for the English to push forward through that region without the danger of continual conflicts with the natives. The treaty is also in a large measure a checkmate to the German plans in East Africa.

From Lisbon to the London edition of the *New York Herald*, dated the 2nd inst., says that the Portuguese Government favors the proposition to arbitrate the questions arising from the seizure of the Delagoa Bay Railway, and that it has promised the British High Commissioner at Lisbon a speedy reply to their suggestion that the matter be arbitrated.

The Spanish Senate has approved universal suffrage. The Spanish Government at Monte Carlo won \$18,000,000 last year.

The Express of Austria is building a \$2,500,000 marble palace at Corfu.

The state of siege on the Island of Crete has been raised and martial law has been abolished. The Christians on the island are jubilant.

A simultaneous strike occurred on the 4th inst., in the State railway factories in Vienna, Prague, Pesth and Temesvar. Director Rischitz, of the Vienna factory, threatened to dismiss all hands who did not return to work the next day.

A detachd detail, Fifth Month 5th, says, 1500 bakers have struck work and camped on an island in the Danube, with tents, cattle, stores of lard and bread and other provisions. They have been joined by 700 girls employed in jute works. Five hundred military bakers have been sent to Pesth from all parts of the Kingdom.

A revolution has broken out in Paraguay. Several persons have been killed and many wounded. Telegraphic communication is interrupted, and the details that have been received are meagre.

NOTICES.

WANTED—A Teacher for the Haverford Primary School, to enter upon duty Ninth Month 16th.

Apply to HANNAH GARRIGUES, Haverford College, Pa.

A few boarders can be accommodated in a Friend's family at No. 480 North Fifth Street, Phila.

Fifth Mo. 1st, 1890. E. SHARPLES.

DIED, Twelfth Mo. 13th, 1889, at Friends' Boarding School, near Barnesville, Belmont Co., Ohio, THOMAS E., son of William and Catharine Atkinson, aged 21 years, cousin of Holmes, aged 78 years and 3 months, a member and minister of New Bedford Monthly Meeting, and Short Creek Monthly Meeting. Although he had taken sudden death from our midst, his family and friends have the comforting assurance that, through redeeming love and mercy, he has been gathered home to everlasting rest and peace.

—, in New Bedford, on the 24th of Second Month last, died GEORGE HOLMES, aged 78 years and 3 months, a member and minister of New Bedford Monthly Meeting. Whilst conversing with a relative, very suddenly and gently the messenger came, forcibly impressing the injunction of our holy Redeemer, "Be ye therefore ready, also; for the Son of Man cometh at an hour when ye think not."

—, at his residence at East Carmel, Columbiana Co., Ohio, on the 2nd of Fourth Month, 1890, WILSON HALL, aged 58 years, an elder and member of Middleton Monthly and Carmel Particular Meetings. The interest he ever manifested in his younger friends, and his lively cheerful disposition, endeared him to many hearts. He spent a large portion of his time in different schools as teacher, and as Superintendent of the Boarding School at Stillwater, doubtless sowing seed which has, and will bring forth fruit to the honor of the great Husbandman. His interest for this class continued to the last, and he had much pertinent counsel to impart to those among him, exhorting them to cultivate a tender spirit; to be circumspect in conduct and conversation, to dwell near their Creator, striving to acquaint themselves with his works as displayed in such perfection and beauty in the world around them; to be strictly honest in all their undertakings; to search the Scriptures diligently and never never DOUBT, or dare to think there is no God. His good judgment and executive ability, seasoned with Divine Grace, made him useful in transacting the weighty affairs of the Church; the duties assigned to him were not to be less arduous than, and with a concern that it be done to the honor of Truth. In the midst of his usefulness he was stricken down by a lingering illness, but was at last enabled to resign all to his Heavenly Father's care, and to say, "Thy will be done." Taking an affectionate leave of his dear wife and other loved ones, he cheerfully said, "So far as I know I die in peace with all men, and have love for all." That he had not had one pain too many, and he believed when the good Master saw his cup was full, he would be received into "one of the many mansions." May we not hope, as he said, "to be gathered with the just of all generations," and that "I have died thy faithful servant?"

Incidents and Reflections.—No. 223.

HEROISM.

In Jones' Annals of Oneida County, N. Y., it is stated that "two little sons of one of the early settlers were attending the summer term of their district school in 1816. The eldest was nine, the youngest six years of age. Rain or sunshine, cold or hot, they had to walk three miles in the morning to reach the school-house, and the same distance at night. Two little girls, of about the same age, resided on their road, one mile nearer the school. The eldest girl was a slender, delicate thing, while her younger sister was stout and robust. The same disparity existed between the boys, but in the reverse, the eldest being a strong, athletic, little fellow, and withal possessed of an indomitable will, that enabled him to do anything which could be done by an urchin of that age. Of these four the youngest girl was the only one that possessed a pair of shoes, the others having to make their long daily walk with bare feet; and even the small girl was not fortunate enough to possess those comfortable accompaniments of shoes,—a pair of stockings.

"Those of us old enough will remember the 6th day of June, 1816. It had been preceded by cold, frosty nights, and on that day it snowed in every part of the country, and in some parts it fell several inches in depth. Cold was the morning, these four children were punctually at school. The school-house—none too comfortable for pleasant weather—had become so cold by 2 o'clock in the afternoon that the pupils were dismissed, with directions to go to the nearest house on their way home. There was a house on the road of the four we have introduced to our readers, about one-fourth of a mile from the school-house. To this house, by moving in double quick time, they managed to get; but by their utter dismay, they found the door fastened, and its inmates from home. Here was a dilemma. To retrograde was useless, for the home of the girls, one and three-fourth miles distant, was as near as any inhabited dwelling. Snow was falling, and it was already two inches deep. Our eldest boy's strength of nerve was now put to the test. Nothing daunted, however, he well laid his plans, and at once proceeded to put them in execution. He had that morning—rather clandestinely, it is true,—appropriated his father's roundabout, quite too capacious for him, yet possessing two

very important advantages, it shielded him from the cold and its extensive pockets, one on each side, served as a deposit for all the *et ceteras* of the school boy, viz: a ball, fish-hook and line, top, knife, sling, and whistle, toys as necessary to the man in miniature as others to those of larger growth. Little could he have imagined to how much more important uses these huge pockets would be put during the day. He directed the two girls to walk on as fast and as far as they could without freezing, then to sit down and both rub the eldest girl's feet with their hands until he came up. He then took his brother upon his back, with a foot in each pocket, and his arms about his neck, and followed on. When he came up with the girls, he put down his brother, and told him and the smaller girl to proceed as before, and he took the larger girl upon his back, with her feet in those now useful pockets, and so on by successive stages until they had arrived within forty rods of the girls' home. Their father, who was chopping in the vicinity of the road, heard the cries of the girls, and came to their aid. Our hero then had the eldest girl upon his back, and without speaking, the father caught the youngest two, one under each arm, and ran for the house. Our hero said that he thought he never saw a man run as fast before, for ere he had gone one-half the distance to the house, the father returned, and lifting the elder girl from his back, took her under one arm and our hero under the other, and soon had them deposited before a good roasting fire. The mother of the girls, previous to the arrival of our hero, had learned from them the whole history of the transaction. On his arrival she at once, in the fullness of her gratitude, loaded him with her caresses. This wounded his pride, although perhaps a very little of that article would have been excusable, for, as he supposed, he had saved his fellow-sufferers from perishing. She also by her misjudged kindness, had set him near to the glowing fire. The pain in his feet soon became almost insupportable, a sickening sensation came over him, his vision became obscured, he grasped at the chair, but did not succeed, his physical powers, which had been so overtaken, gave way, and he fell. The intense agony of the moment was soon lost in a state of unconsciousness. For hours the poor sufferer lay insensible. The first thing he noticed on the return of reason, was the kind-hearted woman bending over him, and his father applying some restoratives to his feet. It was after dark. His father had started with his team in season to have saved all the suffering, had the school continued to the usual hour of dismissal. He was wrapped well in warm clothing, put on a sled, and taken home the same evening. His feet were so lacerated by the stones and sticks in his path, while devoid of feeling, that a number of days elapsed before he could even walk about the house."

For hours the poor sufferer lay insensible. The first thing he noticed on the return of reason, was the kind-hearted woman bending over him, and his father applying some restoratives to his feet. It was after dark. His father had started with his team in season to have saved all the suffering, had the school continued to the usual hour of dismissal. He was wrapped well in warm clothing, put on a sled, and taken home the same evening. His feet were so lacerated by the stones and sticks in his path, while devoid of feeling, that a number of days elapsed before he could even walk about the house."

Clarence F. Gordon Cummings, in her work entitled "At Home in Fiji," records a remarkable instance of courage manifested by the wives

of two of the missionaries to that country in the days when the old barbarous customs still prevailed in those islands.

"A piratical tribe, called the Mbutoni, had brought a large offering of their spoil as tribute to the old king, Tanoa. Custom required that a feast of human flesh should be prepared for them, but the larder was empty, and no prisoners of war could be obtained. Under these circumstances, it was the duty of Ngavindi, the chief of the fishermen, to provide victims. Two young men were accordingly entrapped; but these not being deemed sufficient, the wary fisher went forth with his men. They ran their canoes among the mangrove-bushes, and covered either end with green boughs, and there lay in wait. Soon a company of fourteen women came down to fish. They were seized and bound, and carried off to Bau to furnish a feast for the morrow. News of this reached Viwa, where the wives of the missionaries, Alvert and Lyth were living alone with their children, their husbands having gone to teach on another island. They determined to make an attempt to save the lives of their luckless sisters; so having induced a friendly native to take them across in his canoe, they started on their errand of mercy. As they neared the shore it was evident that the cannibals were in a state of frantic excitement: the death-drums were booming, muskets firing, in token of rejoicing; and then piercing shrieks rose above the wild din, and told that the horrid butchery had begun. It needed desperate courage for these two alone and apparently unprotected women to land on the isle and face that blood-thirsty rabble. But with resolute courage and unflinching faith they pressed on.

On the beach they were met by a Christian chief, who led them through the crowd to Tanoa's house, which it was death for any woman to enter. But unheeding their own safety, they went in, with a whale's tooth in each hand, as the customary offering when making a petition. The old man was so amazed at their courage, that he commanded that such as still lived should be spared; and a messenger was despatched to see that the order was obeyed. Nine had already perished; but five survived, and were set at liberty, blessing their brave deliverers, who not satisfied with having gained their object so far, went straight to the house of Ngavindi, the chief butcher, who was sitting in full dress, rejoicing in his work. They spoke to him earnestly on the subject, and had the satisfaction of seeing that his chief wife, and that of Thakomahu cordially seconded their words." J. W.

Letter of Wm. Foster, Twelfth Mo. 7th, 1819.—"As to the extent to which it [Scriptural instruction] has been carried, the thing is very much new among Friends; and I have sometimes had a fear lest, in injudicious hands, it might have the tendency of drawing our young people from the root of religion in their own experience, to become satisfied with their acquaintance with the principles of Christian truth stored in the memory."

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 323.)

1795, Second Mo. 2d.—Sometimes I am almost discouraged; things seem to grow worse, and my trials very great. The waves seem as if they would go over my head: for wave follows wave! Oh, the bitterness of the cups permitted for me to drink! Is this to bring me acquainted with the sufferings of all men? If so, let me not murmur; but patiently wait, until thou, O Lord, art pleased to say, "It is enough." (3rd.) Thy Name is precious, dearest Lord, even while the clouds seem to thicken; and for trials seem to arise from every quarter, and some from places I did not expect. May I be favored to retreat to that hiding-place where there is holy quietude.

9th.—I laid before my Friends, at our Monthly Meeting, my prospect of a further visit to the Eastern Governments, as far as Nova Scotia, if way for it should be opened, which was united with. It seemed to be a time of favor. An humbling sense of Divine goodness near, I have seen the advantage of patient suffering—having passed through a large share of late. I went to visit a sick young man, who expressed that he expected he was on his death-bed, and said, "I feel very different to what I did whilst in health among my gay companions; what I then thought was a merit, and trusted in, was to maintain a favorable opinion of professors of all sorts, and a tolerable course of morality. But now I find that as nothing, without knowing the power, of Truth. What I now want is, an inward assurance of Divine favor; this I find cometh not by human wisdom, but is the gift of God. Sometimes, for a few minutes, I feel inward sweetness, but it is soon taken from me. The thoughts in my sleep are very distressing; I often dream of being with my former sort of company, laughing and drinking wine, which is a great trouble to me. Though young, if I could have an assurance of going well, I should be willing to die." These expressions, and more, he uttered with tears. Oh, that the youth may take warning, and not leave repentance to a sick-bed. I had a hope this young man would find mercy.

13th.—I received a sweet calm at the opening of this day. Had afterwards close conversation with some who were not of my sentiments respecting the use of India tea and other foreign articles, with their expensive equipage. That this, I hinted, for example, is so spread as to be found almost generally, even in the cottages of the lower rank throughout our country. If I try to bear my testimony in brotherly love and honesty, I must leave the event.

17th.—I looked on an aged man, as he now lay a corpse; and though he had long been afflicted, I was afraid he had not suitably improved thereby. I also had a close trial in conversing with one of my children, who had not conducted to my mind. The next morning, I arose in bitterness of soul; I have to lament the backslidings of my children and their departure from the simplicity of Truth. This seems, at times, as though it might bring down my grey hairs with sorrow to the grave.

21st.—Visited some sick and deeply afflicted. One of these had a wife not kindly affectionate. Although her husband had been confined to his bed, she told me she had not been in his room for more than a week. I gave her my sentiments freely on such unkindness; and wish husbands and wives may be warned not to lose their affection for each other, and to guard against provoking language.

22nd.—A great weight impreseth my mind. I feel myself as a pilgrim and sojourner; and the iniquities of the people seem to be great.

24th.—Before I arose I was humbled in the remembrance of these expressions: "Shall not the Judge of all the earth do right?" I went to visit a neighbor, on her sick-bed, who was of an unhappy temper, often murmuring, supposing no one's lot so hard as hers; not much comfort in the company of such.

27th.—At Cropwell Preparative Meeting; things seemed to be managed to my comfort. I had some service, which I believe was strengthening to the well disposed.

Third Month, 1st.—I was at Haddonfield meeting, where a true settlement into stillness was wanting. I found a necessity to keep my mind inward and solid, that, if possible, I might be a balance to light spirits.

3rd.—What great need there is for those who marry to seek the Lord's counsel, especially in second marriages. A painful instance now subsisteth, where husband and wife seem to have lost affection for each other; both have children by former marriage, and are at variance about worldly interest. O, this love of money! Help was wanted for composing matters here; but how can help be given where such rents and division are manifested.

5th.—I thought I had a feeling sense of the unsettled state of this world, and of many occurrences which embitter the life of man, whilst in a situation estranged from his Maker. And ah! how do the people seem to increase in wickedness; and in hardness of heart towards each other! Do not extortion and a worldly spirit run down as a mighty stream? The proud seem to be honored, and the ungodly put in power!

9th.—At our Monthly Meeting a certificate, with approbation of my Friends, was granted and signed pretty generally, allowing liberty to proceed on the visit before mentioned.

14th.—I had to use plain dealing with one accounted a bad man, and who had misspent much precious time, now covered with grey hairs—who received my visit friendly. I also visited divers others about this time; and on the 18th, a woman consumptive, who was sweet-spirited, and appeared much resigned; I was comforted in a belief all would be well with her.

19th.—Our Quarterly Meeting of Ministers and Elders was a baptizing season to me. I had to mention close things concerning the use of riches, and the iniquity of setting our hearts on lower enjoyments. Next day, my certificate meeting with approbation at our Quarterly Meeting of business, was there indorsed. It seemed to me to be a low time, though many were here from distant parts. Attended our general spring meeting which followed this; it was an humbling time to me. To observe the noise, the clamor and other unpleasant scenes, which abounded in the city, was truly affecting. I thought, if wickedness did not increase, there was too little appearance of righteousness being prevalent, in a place so lately chastised with a sore pestiferential fever.

24th.—I believe many are the trials of the poor. I thought I had to feel to-day for the afflicted, for the widow and the fatherless.

29th.—I was at Salem Meeting on First-day, which was to my comfort; although I had to deliver close doctrine, and that which was hard to the natural man to practise; it appeared to be well received. Their Monthly Meeting, the next day, I also attended, and believed it

was a time of favor both among the men Friends and the women; much tenderness appeared. I took my farewell, as having a prospect of a long journey. We parted in near love and harmony.

Fourth Mo. 4th.—After this, I paid divers visits to my neighbors, and to infirm and weakly people, with some widows and fatherless children; and also, in company with other Friends, went to see some of the negligent respecting public worship, with the drowsy, and some of those who incline to undue liberties. Our visits to these, at this time, were well received and yielded me comfort. I am often much stripped and tried with poverty of spirit, now near entering on a journey; but I trust the Lord will fulfil his gracious promise and in his own time grant "the oil of joy, for mourning," etc.

13th.—At our Monthly Meeting it was a humbling, favored time, in which I took my leave of my dear Friends of both sexes; and the next day, my wife accompanying me to our son-in-law's, I set out from thence the 15th, parting with my near connections in tender affection, and proceeded to Rahaway, in East New Jersey. The 17th, rode about forty-five miles to Tappan, visiting several families in the place. I had an opportunity with my fellow-members who dwell there, which is but one family; then had a public meeting on First-day, which was pretty large. The people at first looked as though they would bid defiance to matters which were serious; but I believe the Lord's power came over all; by which their lofty looks were brought down; and the meeting ended well. That afternoon I rode about eighteen miles, and, on the 20th, had a meeting at Hooke, which was small, and towards the conclusion became solid. Riding about nine miles, I also had a meeting in the evening, pretty large, at the house of James Crowmel. My mind was humbled under a sense of the Lord's goodness.

(To be continued.)

The Memorial of the Representatives of the Religious Society of Friends for the States of Pennsylvania, New Jersey and Delaware, to the Congress of the United States of America.

Respectfully represents:—That we have observed with sorrow during the session of the present Congress the introduction of bills for a large increase of expenditures for vessels of war belonging to the United States navy, and fortifications. For over two hundred years our religious Society, in common with many Christian professors of other denominations, have been the advocates of those benign principles of "peace on earth and good will to men," which were announced by the angelic host upon the advent of the Lord Jesus Christ. We believe that when He taught men to love their enemies, He instituted a rule of conduct which is as binding upon rulers as it is on the private citizen, and in pronouncing his blessing upon the peace makers, calling them the children of God, He extended it to nations as well as individuals; that the true strength of the United States does not lie in the extent and perfection of its military defences, but in the virtue, intelligence, and integrity of its people; in a reverent and abiding sense of accountability to the Supreme Being; and in a course of conduct which is consistent with the teachings of Christianity.

The present lamentable condition of the most powerful military nations of Europe in consequence of the oppressive taxation, and the enforced service of the young men in camps and martial training, should be sufficient proof to

wise statesmen of our own country of the utility of building up vast armaments to promote national prosperity.

It has been a recognized axiom by American legislators from Washington's day to this, that a large standing army is inimical to the character of our free institutions, and of pernicious tendency. Why is not the same reasoning applicable to a great navy? We are not menaced by surrounding nations either by sea or land, and we rejoice to notice the amicable spirit in which the representatives of Central and South American States and our own Government, now assembled at Washington, are adopting mutual resolutions of good will; and in accord with the sentiments so well expressed by the Secretary of State in welcoming them to the United States, have proposed arbitration instead of a resort to arms, in all cases of dispute which may arise between the governments they represent and our own.

Will not the building of war vessels of unusual size and number, and the erection of coast defenses, at such a juncture, arouse a feeling of jealousy and suspicion against us on the part of these neighboring republics, and tend to nullify the salutary results hoped for by the labors of the Pan-American Congress?

If the machinery and implements of war are multiplied, they foster national pride, and stimulate ambitious political leaders to seek occasions of quarrel on slight pretexs, rather than to settle differences by peaceful negotiations.

The danger of war is increased by the creation of a large body of military and naval officers imbued with the animus of war and brought into place and power by unusual appropriations for such objects, who would realize that their hope of promotion lies chiefly in active service. Thus some of the greatest calamities have fallen upon nations, merely to gratify their ambitious rulers. The existence of a large surplus in the United States treasury seems to us but a fallacious plea for the proposed outlay of millions in naval armament.

This surplus belongs to the people, and it has been in part contributed through heavy taxation, whilst many of our citizens are thereby impoverished, and a great national debt remains to consume the resources of the people. Justice to them demands the most economical care in national as well as state expenditures, rather than squandering their hard earned means in useless vessels which entail still further expense for their future maintenance.

The world has not been left without an illustration of the practicability of carrying on a government upon purely Christian principles. In the establishment of that of Pennsylvania no provision was made for the maintenance of a military force, although William Penn and his coadjutors had to deal with an untutored and savage race of men, yet during the period of seventy years in which this Province was under the control of himself and those sharing his religious belief, in no instance was there a resort to arms to settle the claims of either party; whilst other English colonies who assumed that an armed force was necessary for self-protection were involved in frequent desolating wars with the native tribes.

If the grand design and aim of Christianity as expressed in the Lord's Prayer, that his kingdom may come, and his will be done on earth as it is in heaven, is ever realized, such a result can only be attained by simple faith in the practical value of the precepts of Christ, and a ready obedience to them in all the concerns of life. In

proportion as men and governments are disposed to accept and act upon the exalted principles of the Gospel, nation will not lift up sword against nation, neither shall they learn war any more.

By direction and on behalf of the meeting of the Representatives of the religious Society of Friends for Pennsylvania, New Jersey, and Delaware, held in Philadelphia, Fourth Month 18th, 1890.

JOSEPH WALTON, Clerk.

FOR "THE FRIEND."

"The Public School founded by Charter in the town and County of Philadelphia, in Pennsylvania, the Forrest Trust, and the Fourth Street Meeting and School-Houses.

(Continued from page 324.)

A joint committee of the Monthly Meetings which had been appointed to consider what disposition should be made of the Fourth-Street Meeting-house, made a report in the Ninth Month, 1807, in which they stated, that as the property left by William Forrest, upon part of which the Fourth Street Meeting-house stood, "was, in the year 1736, by the Monthly Meeting of Philadelphia, under whose direction it was left, placed under the care and control of the 'Overseers of the Public School founded by charter, in the Town and County of Philadelphia,' [it] * * * should be vested by authority of the then Monthly Meetings in that body, subject to such declaration of trust on their part as shall consist with the donor's intention, and under them accountable to the said Monthly Meeting, for the execution of the trust confided to them."

The trust of this property had not been renewed during the lifetime of the former trustee, and it was decided "to procure a conveyance from the heir-at-law of the late surviving trustee of the estate of William Forrest, on Chestnut and Fourth Streets, to the Overseers of Friends' School founded by charter in the Town and County of Philadelphia, in order to vest the legal estate in them.—And the said corporation, until the three Monthly Meetings of Friends in Philadelphia, shall think fit to order otherwise, are authorized and directed to conduct the business of the trust agreeably to the intention of the donor." etc. * * * "Also, to make necessary alterations in the buildings, out of the funds of the trust, and to dispose of such parts of the lots as they may think proper, either on long leases or on perpetual ground-rent, as may be most consistent with the tenor of the original devise."

This conveyance was, accordingly, made to the School Corporation, and the declaration of trust was duly executed.

This declaration was dated 31st of Tenth Month, 1807; and after vesting the title to the original Philadelphia Monthly Meeting, further recites:

"And whereas the said Monthly Meeting of the Religious Society called Quakers, in Philadelphia aforesaid, since the date of the above recited indenture and Deed Poll, hath been divided into three Monthly Meetings within the said City and County of Philadelphia—one of them called the Monthly Meeting of Friends of Philadelphia, one other of them called the Monthly Meeting of Friends of Philadelphia for the Northern District, and the other of them called the Monthly Meeting of Friends of Philadelphia for the Southern District—and the said three several Monthly Meetings of the said Society, at meetings of their respective members, held in the said city in the course

of the last and the present month, did unite in directing a conveyance to be obtained from the heir-at-law of the survivor of the four last above-named Trustees (who are now all deceased), to [The School Corporation]—in order to vest the legal estate in the said lots, &c., in them. And until the said three Monthly Meetings shall think fit to order otherwise, * * * the said corporation is authorized and directed to conduct the business of the trust agreeably to the intention of the donor, for the help and maintenance of poor children of or belonging to the said meetings at school; also to make the necessary alterations in the buildings, out of the funds of the trust, &c."

And it is further noted, that the Middle District Monthly Meeting had appointed Samuel Sanson and Richard Humphreys; the Northern District, James Vaux and Joseph Scatteredgood, and the Southern District, Isaac W. Morris and John C. Evans, to receive on their behalf the said declaration.

This declaration further enumerated with the Friends above named, on behalf of the said three Monthly Meetings, as follows:

1st. That the said corporation did not claim to have any right to the said premises for their own use, but only for and on behalf of the said three Monthly Meetings.

2nd. That the trust was for the purposes mentioned in the codicil to the will of William Forrest, deceased, and other like charitable uses as the said three Monthly Meetings shall, from time to time, think fit.

3rd. To make necessary alterations or remove any of the buildings, with funds then or thereafter in hand.

4th. To dispose of and convey such parts of the premises on leases or perpetual ground-rents as they might think proper.

5th. To convey the said premises (or ground-rents reserved from sales), "to such person or persons, for such estate and estates, and under such trusts, uses, conditions and provisions as the said three Monthly Meetings shall at any time or times hereafter, by minutes from their said respective meetings, to be signed by their respective clerks, direct, approve of, and appoint."

6th. That they should "keep just and true books of record and statements of their receipts and expenditures for or on account of or in anywise touching or concerning the execution and management of the trust in them reposed as aforesaid; all which books of accounts and statements shall be open to and laid before the inspection of any committee or committees which the said three Monthly Meetings of the said Religious Society shall, at any time or times hereafter, think fit and proper to nominate and appoint for inspecting the same and ascertaining the state of the funds and mode of management of the Trusts aforesaid."

During the time that the trust was managed by the School Corporation, the lots on Chestnut street were sold; and the following restrictions were put in the deeds:

"That the lots, or buildings to be erected thereon, shall never be used "for a tavern or taverns, public house or houses of entertainment, or for Plays, Balls, Masquerades, dancing-school or schools, or any public amusement or amusements, exhibition or exhibitions whatever."

With a clause of forfeiture and re-entry, in the event of violation.

This sale has generally been considered an unjustifiable deviation from the original intent of the donor.

The School Corporation continued to manage the property until 1839, when the Monthly Meetings decided to renew the trust and to place its management in the hands of twelve trustees.

The number of Monthly Meetings was then four—the Middle District, or Philadelphia Monthly Meeting, having been divided: that for the Western District making the fourth.

The arrangement for the appointment of trustees made at this time, was suggested by a joint committee of conference, appointed by all the Monthly Meetings, and was, that each of them should select three trustees, all of whom the Middle District was required to appoint.

In pursuance of the instructions of the four Monthly Meetings, the School Corporation, by deed dated the 11th of Eleventh Month, 1839, recorded in Deed Book G. S. No. 7, page 331, granted the premises to the trustees thus nominated and appointed by the four Monthly Meetings.

This deed notes as follows:

"Whereas the said three Monthly Meetings of the Religious Society of Friends, called Quakers, in Philadelphia aforesaid, since the date of the [declaration of trust by the School Corporation], have been so divided and constituted as now to comprise four Monthly Meetings within the said City and County of Philadelphia, called—

"The Monthly Meeting of Friends of Philadelphia;

"The Monthly Meeting of Friends of Philadelphia for the Northern District;

"The Monthly Meeting of Friends of Philadelphia for the Southern District; and

"The Monthly Meeting of Friends of Philadelphia for the Western District."—

"And the said four Monthly Meetings" * * * united in judgment that it was expedient that other trustees should be nominated and appointed to receive and hold the legal title and inheritance."

And in its habendum the same deed states, that the trust was "for and on behalf of the Four Monthly Meetings of the said religious society" above named—instead of the three Monthly Meetings referred to in the declaration by the School Corporation.

At the time that the accounts were closed with the School Corporation, there was a considerable sum of money due to the trust. A settlement was made for this by the Monthly Meetings taking in payment the philosophical apparatus, collection of minerals, shells, etc., which had formerly been used in the Fourth Street school-house. Included in these was the astronomical clock previously mentioned.

It has been thought that the entire value of the devise made by William Forrest did not exceed five hundred dollars at the time he died. From this small beginning has developed a trust estate now valued at hundreds of thousands of dollars—the income of which has afforded a good education to a very large number of children.

The benefits to posterity could hardly have been foreseen by the donor, when he wrote his loving farewell letter to his cotemporary Friends one hundred and eighty years ago. We cannot but admire the spirit in which he wrote, and rejoice at the blessing which has accompanied his gift. Contrast the present pile of buildings with the humble home and attached garden which occupied the site during the donor's lifetime, and we perhaps have an evidence of how much may result from attention to very small manifested duties. William Forrest, no doubt,

had no idea of such a result; but it may be truly said that his memorial continues with us to the present day.

CONTENTMENT.

BY CHRISTINE WARE.

Dear Lord, this day I would not spend
In any other place,
For 'Tis not with me here to-day,
And resting in Thy grace
I am content.

This duty I would not exchange
For any other task;
If only its performance please
Thee, Lord, 'tis all I ask,
I am content.

I care not what may come to me
Of earthly good or ill;
Since where I am and what I do
Are ordered by Thy will,
I am content.

SELECTED.

THE BLOQUEUST SILENCE.

He stood within the High Priest's hall,
Silent, He stood before them all;
Slander, inventive, scoff and scorn,
All were in patient silence borne.
Aloft Him angry judges frowned,
And fierce accusers gathered round;
Never a word, never a word,
The pale, calm lips to answer stirred.

He stood at Pilate's judgment seat,
The fearful doom of Death to meet;
Insult, reviling, all passed by,
The sweet firm lips made no reply.
Again the angry voices strove
That calm of meek resolve to move;
Never a word, never a word,
The Governor murmured that he heard.

Before the multitude He stood
And heard them clamor for his blood;
His single word had laid them low
As forests when tornadoes blow;
Yet faint with pain and weakness still,
Was strong to do his Father's will;
Never a word, never a word,
Above that cruel tumult stirred.

His voice had waked the sleep of death,
Had lifted the tempest with a breath,
Had stilled up its warring clear,
Breathed music to the desolated ear;
Had softly whispered to his own
And quelled the demon with its tone;
Never a word, never a word,
Amid that saddest hour was heard.

O, Christian, when in hours of pain
Thy racked nerves quiver with the strain,
When taunting words harass thee sore,
Remember what thy Master here!
Then let his majesty silence teach,
And answer thou to angry speech,
Never a word, never a word,
For Christ thy mute appeal has heard.

—Priscilla J. Owens.

"IN WONDER, LOVE, AND PRAISE."

"When all Thy mercies"—but I panted,
The flood of memories swept
Across the path of years, and waked
A thousand thoughts that slept;
I tried to finish out the strain,
But ah! my eyes were dim;
A mist shut out the world—my heart
Was running o'er the hymn.

A wealth of hidden mercies swelled
Beyond my poor control,
My heart in transport thrilled each chord
Within my raptured soul;
How could my faltering tongue confess
The love my life had known,
Where every rushing thought but swept
Each feeble effort down.

"Transported with the view"—my soul

Seemed filled with harmony;
I only heard my heart sing on
In endless ecstasy:
Sing on her hymn of wondrous love,
Her song of triumph raise,
Till heart and life and all were lost
In wonder, love, and praise.

—E. H. Shannon, in *Christian Advocate*.

Hold On—There comes a time in the life of every boy when he thinks he knows it all. If he were riding on a locomotive he would want to tell the engineer just how to run the engine. In his own home he thinks he knows more about how the house ought to be managed than his mother does, and he is positively certain he knows much better what is best for himself than his father knows in spite of his age and experience.

This does not usually last long, and from that time on for the rest of his life he will realize more and more how little he really knows. Some boys get over their conceit gradually; others are hustled out of it very unceremoniously by some unpleasant experience. This was the case with the gentleman who relates his experience in the *New York Sun*. Ice-boating is dangerous at the best; and when the flying boats, going at railroad speed, find it necessary to tack, it must require all the strength and attention of the passengers to hold on successfully.

I remember the first time I ever climbed into an ice-boat. It was near Saugerties, on the Hudson, about thirty years ago. Three other passengers were there, too; but I was the only novice. I was horribly afraid of air-holes, for I had heard a great deal about them. Seeing one about fifty yards in front of us, and directly in our track, I nervously drew the steersman's attention to it.

"Do you think I am blind?" he replied, angrily, for I had bothered him that way once or twice before. A second later he shouted, "Hold on, all!" and I, who had not held on fast enough, as the boat spun away on another course, was shot out of the craft and went sliding along over the ice at a wonderful rate of speed. There was a splash, and I felt the water close over my head. I thought we were all lost, for, in my fright and confusion, I had not noticed that I had left the ice-boat, but when I rose, spluttering, to the surface, I saw my companions 200 feet away, and quite safe. It was I who was in the air-hole, and I was there alone.

It was a quarter of an hour before I was fished out, half-drowned and two-thirds frozen. Since that day I have never attempted to offer suggestions to the steersman, but have devoted my attention exclusively to my own business, and chiefly to holding on when he tells me.

The moral is, if you are the helmsman, steer your best. If you are only a passenger, don't attempt to manage the steering, but "hold on!" —Selected.

ALL progress is motion, but not all motion is progress. In any enterprise, spiritual or worldly, those eager spirits whose only concern is "to keep things moving" are not always guides to progress. Activity in a work is ever necessary, but never sufficient. "Things must be kept moving," but it is essential to success that the motion be toward a right point, and on a right track. There are retrograde motions, and backward moves, and down-hill pushes. In keeping things moving, it is of the most importance that fatal moves be avoided. The first way that opens itself to view may be the worst way on which to

F. M. "THE FRIEND"

Hunting a Star-flower.

Many years ago (probably half a century) while rambling in the woods on the west bank of the Schuylkill River above Fairmount dam, I met with a species of star-flower (*Stellaria*) which attracted my admiration. Numerous stems sprang from a common mass of roots; and branching above, formed small clumps of vegetation 6 inches or more in height and diameter, thickly dotted over with flowers resembling white stars. The petals or floral leaves are five in number, radiating from a common centre, but each of them is split into two parts, so that there are apparently ten of them. The stamens are colored and contrast prettily with the white petals which surround them. The shape of the flowers is similar to that of the common Chickweed, but they are much larger and more showy.

Desiring to renew my acquaintance with this friend of my youth, I took the cars for the Zoological Garden, on the 28th of Fourth Month, and after crossing Girard Avenue, explored some of the glens and woods that lie further up the river.

I was pleased to find that the work done on the Park grounds had not obliterated all the natural features of the place, nor exterminated the native plants, which still grow abundantly in spots—especially in some of the ravines which remain almost untouched by the hand of the laborer. The plant I was in search of was quite plentiful, principally in the woods. Its botanical name, *Stellaria pubera*, translated into English means the hairy Star-flower. The hairs are arranged in lines on the opposite sides of the branching stems and on the midribs and margins of the leaves—but they are not so conspicuous as to attract notice, except of close observers.

On the open grounds, the common chickweed (*Stellaria media*) was very abundant. The mildness of the past winter was very favorable to the growth of this hardy plant. It did not seem at all injured by freezing weather, but as soon as a warm day came, it was ready to resume its growth, and open out to view its abundant crop of blossoms. Although small, yet these are beautiful, and many a time during the past winter months, have I stopped to admire the sight presented by hundreds of these little white stars dotting the green surface, in the closely shaven yards of our village.

The genus *Stellaria* belongs to the same natural order of plants as the Pink Soapwort, Catch-fly, and Mouse-ear called *Cerastium nutans*, in one species of these last called *Cerastium nutans*, the nodding cerastium, so called because the seed pods are nodding on the stalks. It grows taller than most of the other species, and is very clammy to the touch, owing to the secretion found on its abundant hairs. It was in bloom, but the time for fruit had not yet come.

As I wandered up towards the head of the first ravine I encountered, I found on its sloping sides an abundant growth of the pale grayish green and finely subdivided leaves of the Dutchman's Breeches, so called, because two of the petals or flower leaves are prolonged into spurs, giving an amusing resemblance to the legs of a pair of pantaloons. I searched in vain for these well-known flowers. It may have been too early in the season for their appearance. The foliage itself is beautiful and very peculiar. This plant belongs to the Fumitory family. As I pursued my walk, I was thrilled with pleasure on meeting with large patches of another member of this family—the Golden Corydalis (*Corydalis aurea*). The finely divided leaves and the bright

and abundant yellow flowers make it an attractive plant.

The delicate and beautiful little Bluets or Quaker Lady (*Houstonia coerulesa*) grow on the more open parts of the woodland, with slender, thread-like stems about three inches in height. These were crowned with the pale blue flowers, with a yellow centre. It is such a trim-looking, neat and pretty little plant, that Quaker maidens may well consider it a compliment to have it named for them.

The common blue, or hooded violet (*Viola cucullata*) was abundant. It is so named because in the young leaves, the angles at the heart-shaped base, are apt to be curled inward, giving them a hooded appearance. The large blue flowers were numerous and pretty. One interesting trait of this plant is that most of the visible flowers fail to produce seeds. But these are abundantly produced by the imperfect underground flowers, which the plant throws out late in the season, long after the visible bloom has passed away. If the reader will carefully dig up one of these violets towards the end of summer, and wash away the earth from the roots, he will find the short underground stems, with seed capsules in various stages of development.

In some parts of the woodland, the bright yellow blossoms of another species of violet (*Viola sabrinensis*) were thickly scattered over the surface.

There are two divisions of the Violet family. In one, the plant has no visible stem, but the leaves and the flower stalks both spring directly from the root stock. To this division the blue violet above described belongs. The other division has a stem which bears leaves and flowers. In this, our yellow violet is classed.

Many other flowers were noticed during this walk, which it would be tedious to enumerate. After spending about four hours in the woods and fields, I returned, well pleased with my excursion, and feeling that I was repaid for my efforts, by the plants obtained and the knowledge gained.

J. W.

The Old Folks at Home.—If you are so fortunate as to have the "old people" in the house, see to it that they have the warmest and sunniest corner, and a goodly portion of the best that can be afforded of comfort, convenience and beauty; that aged blood may be kept warm and cheerful; that failing limbs may have restful repose; and that the dim eyes that have watched over you and yours through so many toilsome years, may see around them the ever present evidences of faithful and grateful care.

There is nothing in the world more pathetic than the meek, timidous, shrinking ways of certain old people—we have all seen them—who have given up their old homes into younger hands, and subsided into some out-of-the-way corner of it, to sit by fireside and table henceforth as if they were mere pensioners—afraid of "making trouble," afraid of "being in the way," afraid of accepting the help that is their due, and going down to their graves with a pitiful, deprecating air, as if constantly apologizing for staying so long. There is no scorn too deep and sharp for the sons and daughters who will accept this attitude on the part of those to whom they owe so much.

Sometimes, to be sure, people grow old with a bad grace. They become embittered by misfortune, or affliction; or are jealous and unreasonable under the goadings of ill-health. All the more do they appeal to great gentleness and faithfulness. Let it be borne in mind that we,

move. The shortest cut across may prove to be the longest way around. The slow and circuitous approach may be the only approach on which real progress is possible. We cannot afford, for the sake of indulging our feverish eagerness to keep things moving, to rush on regardless of the warning voices that protest against our too hasty choice of the direction in which our energies shall be exercised.—S. S. Times.

Bunyan's Pilgrim, and George Fox.

From "The Quakers; a Study, Historical and Critical," by Frederick Storrs Turner.

Bunyan's Pilgrim is at best but a poor creature, though portrayed by a master's hand. Charming and instructive as the story is, we find upon reflection that we feel no great amount of reverence for its hero. This does no discredit to the author's artistic faculty, for it was not his purpose to glorify his Christian. Bunyan painted the actual Christian of his day and of our day, the irresolute feeble creature, whom we know so well, who saddens us by falling so immensely short of the ideal. At one stage he falls asleep, at another he goes astray; to-day he fights Apollyon for his life; to-morrow he yields without a blow to Giant Despair. By grace of repeated help and stimulus from all quarters—now from Evangelist, again from Interpreter, fitted out by maidens, accompanied by friends—somehow or other he just manages to keep going on the right road; but we never feel sure of him until he is safe across the river. In Fox's Journal we see another sort of Christian, one who is himself Evangelist, Interpreter, Greathearth, and Valiant-for-Truth—not in fiction, but in living fact. Here is a Christian who, for four years continuously, fought with Apollyon, and struggled through the valley of the shadow of death. Then, having won his way through the darkness to the light, for forty years he lived in the light, with the world, the flesh, and the devil, held down under his feet. This man's sins do not tumble off his back, but are washed out of his heart; he carries no roll in his hand as a pledge that he will be saved at last; he is saved already by a Divine light shining ever in his heart, which drives away all the foul creatures of the dark, fills him with joy, and makes him invulnerable to all the assaults of the hosts of darkness. The difference between Bunyan's Pilgrim and Fox's Journal is the difference between their religious beliefs. Bunyan wanted to be saved from hell; Fox wanted to be saved from sin. Bunyan believed that to get rid of sin he must wait until he got to heaven. Fox believed that in the strength of Christ he could overcome sin in this life. Most of us, alas! from personal experience, are inclined to side with Bunyan. We admire his "Pilgrim's Progress" so much because he is so true to nature, so like ourselves. Yet he must be a strange sort of Christian who can read through this Journal of simple, sturdy, indomitable George Fox, "stiff as a tree, and pure as a bell," whom no violence, no sufferings, could deflect one hair's breadth from his faithfulness to truth and to Christ, whose voice rang out clear in the proclamation of his message, whether in the presence of frowning judges or furious mobs; whose practical wisdom was so great, and who moved on through the vicissitudes of a storm-tossed life with a serene light of heavenly peace upon his brow—he must be a strange sort of Christian, I say, who does not love that man with a great love, and desire to be like him in the purity and strength of his Christian character.

too, are hastening on toward the sunset of life, and that it is possible that we may ripen into very uncomfortable old people, to demand much more of patience and devotion than we as children yield.—*Woman's World.*

Hard Work.—People who want to drink seem to have no trouble in finding excuses for doing so. If the weather is cold, they say whiskey warms them up; on hot days they pretend that beer or something else in that line is necessary to cool them off. They take the wretched stuff for a night-cap to make them sleep, or to keep them awake, whichever excuse suits the better.

One day a young man who was trying to do more work than his body could stand, said: "I don't drink to make me work."

An old man, hearing the remark, answered him in this way:

"That is right! You drink, and it will make you work! Hearken to me a moment, and I'll tell you something that may do you good. I was once a very prosperous farmer. I had a good, loving wife, and two as fine lads as ever the sun shone on. We had a comfortable home, and used to live happily together. But we used to drink ale to make us work. Those two lads I have laid in drunkards' graves. My wife had died broken-hearted, and she now lies by her two sons. I am seventy-two years of age. Had it not been for drink, I might have been an independent man; but I used to drink to make me work—and it makes me work now! At seventy-two years of age I am obliged to work for my daily bread. Drink! drink! and it will make you work."

There is nothing that can be said in favor of drink, and yet drunkards are made every day; how? By the first glass. Lead this, boys, and if you are old enough to see what awful misery drink is causing in the world, and what marvellous good might be done with the money that is so freely wasted, you are old enough to decide never to touch a drop of the terrible stuff, and never to put any of your money into a business that ruins men's souls.—*Christian Advocate.*

THERE is always more or less risk in imputing motives, even to those whom we think we know well. But perhaps no risk of this sort is so great as that of imputing motives to a child. The fears, the longings, the ambitions, the reasonings, of our own children, are, in most cases, all but concealed from us. Yet those incessant motives and reasonings we regard either as though they were wholly unreasonable, or as though they did not exist. A boy of six, as the time drew near when he was to put on trousers, developed an antipathy to the proposed change, in spite of every advantage that could be pictured to him. When he went, obediently, to be measured, the tailor told him that he was a curiosity—a boy who didn't want to be promoted in that way. In the course of weeks he secretly revealed to his mother that his reason was that he was afraid that this sacrifice of his exterior personality might alienate his little sister; or, as he expressed it, "I am afraid that sister won't like me any more." Probably no one of all his adult censors could have guessed that a motive like that underlay the child's objecting. His sister was just half his age, and the two were beautifully devoted to each other. Unreasonable as such a fear may appear, it was in a high sense from the standpoint of his limited experience, wholly reasonable. Such motives or reasons, or such want of them, as we are content to

ascribe to children, would be deemed unfair, unjust, and offensive, if ascribed to their elders. Yet children are, as a rule, far more harmed by our misconceptions of them than grown persons can be. It is well to bear in mind that tender emotions, and sound reasonings, and high motives, often underlie the acts of childhood, when we are prone to suppose that their surface appearance is all that there is to them, and that they are worthy only of our ignoring, of our censure, or of our passing smiles.—*S. S. Times.*

Natural History, Science, etc.

An Extinct Bird.—The total disappearance of the bird known as Pallas's Cormorant from the North Pacific Ocean, corresponds to the oft-mentioned extinction of the Great Auk from the North Atlantic. Only four specimens of the Cormorant are known to exist in museums. Leonard Stejneger, of the Smithsonian Institution, in 1882, was so fortunate as to find a series of bones belonging to the bird, near the north-west extremity of Behring Island. A description of these, together with a history of the Cormorant, which was a large and handsome bird, has been published by the Smithsonian Institution.

A New Species of Dog-tooth Violet.—The yellow Dog-tooth violet of the Eastern United States is well known to every lover of wild flowers. Another beautiful species has been discovered in Oregon, and named by Sereno Watson, *Erythronium Hendersonii*. It has spotted leaves like the *E. Americanum*, but the flowers are of a lovely light purple, with a darker shade and yellow rings at the base.

Spear Grass.—Gracemere was originally a sheep station; but latterly the sheep have entirely given place to cattle on the whole coast. This change is partly due to the climate, which is too moist, and partly to a noxious kind of grass, namely, the dreaded spear-grass (*Andropogon contortus*), which grows on the coast, and which rendered sheep-raising impossible. It stuck fast in the wool of the sheep or worked itself into their very bodies and killed them. For this reason, Gracemere is now exclusively a cattle station. The sheep were about 350 miles farther west.—*Lunholtz's Travels in Australia.*

Distribution of Plants.—The question of the distribution of plants is a very interesting one, and full of curious points. The bracken of our English commons is abundant on the banks of the Amazon, and yet may be found also in Lapland,—and the black nightshade stretches from the equator to about twenty degrees from the pole. Luxuriant vegetation does not necessarily imply a great variety of plants, nor does poverty of vegetation imply that we shall find a corresponding poverty of species.

Cape Colony is barely a quarter the size of Europe, and much of it is either grassy plain or sandy desert; yet it yields to the plant collector nearly as many different kinds of plants as the whole of Europe does. There are four hundred and fifty species of succulent plants, five hundred different kinds of herb, eight hundred and fifty diverse sorts of bulbous plants.—*Hulme's Wayside Sketches.*

Crabs in Fiji.—There are one or two minor points, however, on which we should be better pleased if our home was not so purely Fijian; if, for instance, it were not so very attractive to crabs—a family which share all a Briton's love for travelling and inspecting the homes of other races. Here they bravely leave their native

shore, and walk inland, wherever fancy leads them; and this, I regret to say, is frequently into our bed-rooms, where they find hiding-places in dark corners, behind boxes and portfolios, whence at night they sallify forth to make further researches, clattering their shell armor against the wood-work, occasionally knocking down something which wakens us with a sudden start, and up we spring to find perhaps a great broad-backed chap like a "parten," brandishing his powerful claws within a few inches of our unprotected toes. Then follows an exciting chase—a regular game at hide and seek—which probably awakens some of our sleeping neighbors, greatly to their disgust. Of course it results in the capture of the intruder, but then comes the question, what to do with him. I cannot bring myself to stab him with a spire of cocoon leaf, as the Fijian girls do (piercing him beneath the main claw, which is his only vulnerable point); so I carry him down to the stream and throw him in, hoping he will travel back to the sea. I have had many such nocturnal adventures, and confess that I wish the inquisitive crabs would stay at home.

Not that these are by any means the only members of the crab family which explore our abodes. Nowhere have I seen such a number of hermit crabs as swarm on these isles, occupying every shell on the beach, from the least to the greatest. There are literally myriads of them, and sometimes the whole shore appears to be moving. But these errant hermits are by no means content to remain on the sea beach—they wander far up the valleys, and meet us in most unexpected places, carrying their borrowed homes with them; and we occasionally find them creeping up our mosquito nets; and in other equally startling hiding-places.

There are also land-crabs, which climb the tall cocoa-nut palms, and feed on the nuts, tearing them open with strong, unpleasant-looking pincers. And one kind is more troublesome than an English mole or rabbit, from the aggravating manner in which it burrows in the ground, making such innumerable holes as to render any bit of grass quite honey-combed. It would be very dangerous to ride on.

But by far the most attractive members of the crab family are those which inhabit such muddy shores of Suva harbor, near the mouths of the rivers, where they were to me an unending source of amusement. I spent hours watching them stealing cautiously out of their holes, when they were sure the coast was clear, but darting back like a flash of lightning at the faintest movement of any living thing, even the vibration of the most cautious footstep. But if I waited very patiently and motionless, they presently reappeared, one by one, till all along the shore I saw their strange bright-colored claws waving aimlessly in the air. These crabs are tiny creatures, whose whole body rarely exceeds an inch in diameter, but they own one huge claw as large as their whole body; and when feeding, they hold this up as a guard, as if shielding their eyes, while with a tiny one they gather up their food on the shore, lifting an atom at a time into their mouths. This large pincer is invariably of some bright color—yellow, rose-color or scarlet—while the rest of the body is black or white, purple, or brown. You cannot think how curious it is to see the whole shore dotted with these waving yellow claws, which, on the very slightest movement on your part, vanish in the twinkling of an eye, and leave you standing alone on a dull expanse of brown mud, without a symptom to suggest the

existence of a great army of crabs.—C. F. Gordon Cummings, "At Home in Fiji."

Items.

Twicection.—The attention of Friends in Great Britain has been latterly drawn to the cruel suffering inflicted on many of the lower animals by experiments designed to illustrate physiological principles. The effect of them is described by a medical student, who says: "By seeing these frequent experiments of one kind or another on living animals we tend to become brutalized and degraded, callous and indifferent to death or pain in others."

Reformation of Inebriates.—We have received the Report for the year ending Third Month 31st, of the "Franklin Reformatory Home for Inebriates," located at 911 to 915 Locust Street, Philadelphia. The number discharged from the institution during the last year was 265, of whom 166 are stated to be men "whose lives give evidence of a thorough change;" 45 show some change, but are classed not among the "reformed," but the "benefitted;" 32 are "doubtful" cases; and 18 are "failures."

Of those admitted during last year, more than one half were free patients, the others paid board, from \$6 per week downwards. To meet their necessary expenses, the Directors ask for an addition to their funds of \$2500 per year. Those who are willing to become subscribers are requested to notify the Superintendent, C. J. Gibbons, 915 Locust St., Philadelphia.

Friends' Asylum for the Insane at Frankford, Philadelphia.—The 73rd annual report of this useful institution shows that the average number of patients during the year was 107. Through the aid of the Trustees of the estate of the late Ruth Anna Cope, a new building was erected during the last year, designed for a Gymnasium and Employment Hall for the patients, from the use of which good results are anticipated.

It is in contemplation to erect separate buildings for the reception of the more excitable patients, when the necessary funds are provided.

THE FRIEND.

FIFTH MONTH 17, 1880.

The *British Friend*, of Fourth Month, 1st, contains an article headed "The Position of Philadelphia Yearly Meeting," (and signed "Observer," commenting on a statement made in our journal a year ago, that when the concern of Samuel Morris to visit the Yearly Meetings of London and Dublin was before the Meeting of Ministers and Elders, "some hesitation was felt at first, lest the liberation of this dear Friend for that service might in any measure conflict with the position assumed by Philadelphia Yearly Meeting, which years ago had suspended correspondence with the meetings in question; or might lead any to suppose that Friends here were at all disposed to withdraw from the faithful upholding of the principles of Quakerism, for which they had so long contended."

"Observer" makes several extracts from the "Brief Narrative in Relation to the Position of Philadelphia Yearly Meeting," issued by its Meeting for Sufferings in 1873, and endeavors to show that the discontinuance of "correspondence" with the meetings in question resulted from other causes than a desire to faithfully uphold the principles of Quakerism.

The *Brief Narrative* clearly points out that the difficulties and want of unity which existed in the Society of Friends, arose out of departures from its original principles; and it thus shows the underlying causes which brought about the position in which Philadelphia Yearly Meeting found itself.

To fix attention upon merely secondary circumstances, and attribute to them the effect produced by these underlying causes, is as unreasonable as were the pleas of the advocates of the South during the war of the Rebellion, who often asserted in England that it was a mere contest for supremacy, and that slavery had nothing to do with it. To this assertion, which was designed to lessen the interest in the conflict of the people of England, Harriet Beecher Stowe remarked, in reply, that "although slavery may not be the form of the war, it is the fact of it;" for the question of slavery was at the bottom of the whole struggle. So it may be truly said, that whatever other considerations became mingled with the efforts of Philadelphia Yearly Meeting, the foundation of its peculiar position was the effort to uphold the doctrines and testimonies of the Society of Friends.

The writer of the article in *The British Friend* states that a member of the "Binns' Body" in Ohio was present and spoke in the Select Yearly Meeting in Philadelphia in 1888. We do not see what bearing this fact has on the general question of the position of that Yearly Meeting. Such persons have for years occasionally been in attendance, and have repeatedly been admonished of the inconsistency of so attending; but the fact that they have not been forcibly ejected or prevented from entering the meeting-room, is a very weak foundation for the assumption that the Yearly Meeting has ceased to regard the Binns' Body as one outside of the organizations which it recognizes as co-ordinate branches of the Society of Friends.

The same article infers, from the hesitation felt in liberating Samuel Morris, that correspondence with the Yearly Meetings of London and Dublin was regarded as incompatible with the faithful upholding of our principles. We regard this inference as incorrect. If the question before the meeting had been the preparation of an epistle to either of the four American Yearly Meetings, which had formally stated to us that our abandonment of Ohio Friends must be the preliminary step to the renewal of correspondence with them, it would have been necessary either to precede its adoption by addressing an epistle to Ohio Yearly Meeting, or else to have embodied in it a clear statement that we continued to retain our unity with that Yearly Meeting. But London and Dublin Yearly Meetings had erected no such barrier; and the discontinuance of sending epistles to them had been our own action.

Although the interchange of epistles between Yearly Meetings dates back many years, and has its manifest advantages, yet in the dissensions and separations which have been witnessed within the borders of the Society of Friends during the present century, there gradually grew up a danger of this correspondence being regarded mainly as an outward test of unity between the Yearly Meetings; and of the attention being at least partly withdrawn from its real essence, the conveying of admonition, counsel or encouragement to each other, as the Spirit of Truth directed. Hence, it was perhaps well that there should be a temporary suspension of it—although through this never met with the approval of the present writer. So that, when revived, there might be less danger of its being carried on in a merely formal manner. But if a lively concern and interest should spring up in our Yearly Meeting for other parts of the Society of Friends, we believe it would be a comfort to many among us, and might prove helpful to the cause we desire to promote, for a suitable

and judicious expression of it to go forth from the Yearly Meetings by way of epistle to those for whom the concern was felt.

At the time of the suspension of correspondence, there existed in the limits of Philadelphia Yearly Meeting a considerable number of Friends who, while professing to hold the doctrines of our Society, with firmness, yet from long association were much in sympathy with the larger body in New England, and with the prevailing sentiments of Friends in Great Britain, and some other places.

These did not think there was sufficient evidence that the departure from our doctrines met the approval of those bodies. The change which have taken place in many parts of our Society the past thirty or forty years, we suppose have led many of these to see that the fear felt by their brethren had a better foundation than they at one time believed to be the case. While the predominant feeling among Philadelphia Friends was clear and decided, many of them felt it was right to exercise much forbearance and tenderness towards these brethren. Many also freshly remembered the sufferings and trials through which they had passed in the distressing separation of 1827-'28, in which Philadelphia Yearly Meeting lost nearly two-thirds of its membership; and when the destruction of the harmony of meetings and families caused a fearful amount of trial and tribulation. They desired not to do anything which seemed to favor separations. To this dread of separation must be attributed the caution which was manifested in some cases, as to giving a formal acknowledgment of fellowship to those persons in different Yearly Meetings who had severed their connection on doctrinal grounds with the bodies of which they had previously been members.

While this caution may have been carried, in some cases, to a greater length than was best, yet its exercise was not "incompatible with the faithful upholding of sound principles."

SUMMARY OF EVENTS.

UNITED STATES.—In the United States Senate on the 10th instant, Senator Dawes presented a communication from the delegations of the five Indian nations remonstrating against the numerous grants of right of way for railroads through the Indian Territory, stating that in many of the cases the grant is sought and obtained merely for speculative purposes, and asking that no more such grants be made, at least until there is a great change in existing conditions.

From \$80,000 to \$100,000 worth of nitrate of silver and gold is annually wasted every year by photographers in the United States in making the millions of pictures. If this waste could be saved the cost of pictures would be greatly reduced.

Representative Boutelle, of Maine, has introduced in the House a bill "to repair the damage inflicted upon the State prohibition laws by the recent decision of the Supreme Court in the original package case." The bill is in the shape of a section which it is proposed to add to the Inter-State Commerce act, and reads as follows: "That nothing contained in this act shall be construed to authorize the sale or traffic in intoxicating liquors in any State contrary to the laws thereof."

The House Committee on Alcoholic Liquor Traffic has authorized one of its members to call up, in the House, at the first opportunity, the bill to prohibit the transportation of intoxicating liquors from any State or Territory of the United States into States where prohibitory laws are in force.

Officers in St. Albans, Vermont, have seized 200 gallons of liquor in an establishment which, under former proprietorship, has been successively raided and finally adjudged a nuisance." The liquor was recently shipped there by a Boston firm, and the case apparently comes directly within the recent United States Supreme Court decision.

In the Municipal Court at Saco, Maine, on the 10th, a claim was made in behalf of the Boston and Maine

railed for liquors which Constable Skillings, of Saco, seized from a freight car side-tracked at Old Orchard two weeks ago. The claimant argued that, as the car was empty and the goods not delivered, the liquors were virtually the property of the railroad company by which they were transported in the original package. Judge Simons refused to recognize the claim and ordered the liquor sold. He gave an explanation of his holding in a copy of the full text of the recent United States Supreme Court decision, and the ruling was in accordance with the Maine Statutes. The claimant appealed from the decision.

The first decision in an Iowa Court in accord with the recent original package decision of the Federal Supreme Court, that of the State vs. Vestration and others, of Brooklyn, charged with maintaining a nuisance, which came up in the District Court at Grinnell on the 9th. The counsel for the defence moved that the jury be instructed to bring in a verdict for the defence, on the ground that the evidence showed only that the defendant is the agent in original packages, the sale coming under the recent decision by the Supreme Court of the United States. The County Attorney assented to the motion, and Judge Hyan so ordered, and the case was dismissed.

The State Agent, since the war, have spent \$37,377.87 to educate the deaf, and yet, large as that sum looks at first glance, it means for each colored child of school age, only about 50 or 75 cents a year.

The Judiciary Committee of the Senate of New York, by a vote of 7 to 2, indefinitely postponed the Curtis bill to abolish capital punishment. This killed the bill.

The concluding term of the biennial session of the Louisiana Legislature began on the 12th inst. Among the leading matters to be considered will be the question of an extension of the charter of the Louisiana Sugar Company, railway legislation and Government control of the levees.

The Georgia Temperance Association, in session at Atlanta on the 9th instant, adopted resolutions urging the Georgia delegation in Congress to urge legislation which will give to the States the right to control the prohibitive question of the sale of liquors in interstate commerce. Resolutions were also adopted for the election to Congress of Senators and Representatives favoring a national prohibition law.

The Kansas crop report for 1889, shows that the total product would be \$105,000,000, or less the value of the product in 1879 or 1880, and one-half the total value of the farms by the last census.

Crop reports from 65 counties in Iowa, show that the crop outlook is somewhat improved by the rain fall of last week, and with average temperature and precipitation, the amount of the crop of cereals which will be ample. Corn planting is well advanced, and the seed is germinating.

A worm resembling the common grub is reported to be doing great damage to the clover in Sussex County, N. Jersey.

The Orange County Poorhouse and Insane Asylum, at Preston, near Utica, New York, was burned late on the night of the 7th instant. Ten of the insane patients perished. The buildings were of wood and there were no provisions for extinguishing the flames.

On the 10th inst. of the 14th instant, a tornado passed over Akron, Ohio, demolishing and leveling many buildings, and injuring eighteen or twenty persons.

A tornado visited Salt Creek, in the eastern portion of Hood County, Texas, on the evening of the 4th inst. A number of houses were destroyed. Fifteen persons were killed and a number injured. A large farm followed the tornado and did immense damage to crops.

Deaths in this city last week numbered 367, the same as during the previous week, and 30 less than during the corresponding period last year. Of the females who have deceased, 192 were males and 175 females; 50 died of pneumonia; 36 of pneumonia; 30 of diseases of the heart; 20 of inflammation of the brain; 17 of typhoid fever; 14 of old age; 12 of bronchitis; 12 of convulsions; 11 of paralysis; 10 of marasmus; 10 of apoplexy and 9 of delirium.

Gold, 110; silver, 102; coupon, 103; 4's, 122; currency 6's, 116 to 125.

Cotton was quiet and steady at 12-16 cts. per lb., for middling uplands.

FEED.—Winter bran, choice, \$16.50; do., fair to poor, \$16.25; do., extra, \$15.50 to \$15.75.

FLOUR.—Western and Penna., \$3.25 to \$3.25 a \$2.75; do., do., spring, \$2.75 to \$3.25; do., winter family, \$3.50 to \$3.85; Pennsylvania family, roller process, \$3.75 to \$4.50; Western winter, collar, \$4.10 to \$4.50; do., do., straight, \$4.50 to \$4.85; winter patent, \$5.00 to \$5.35; Minnesota, clear, \$4.00 to \$4.25; do.,

straight, \$4.50 to \$5.10; do., patent, \$5.20 to \$5.50; do., do., favorite brands, higher. Rye flour sold in a small way, at \$3.25 per barrel for choice.

GRAIN.—No. 2 red wheat, 95 to 96 cts. No. 2 mixed corn, 42 to 42 cts. No. 2 white oats, 35 to 35 1/2 cts.

BEEF CATTLE.—Extra, 5 1/2 to 5 1/2 cts.; good, 4 1/2 to 4 1/2 cts.; medium, 4 1/4 to 4 1/4 cts.; fair, 4 to 4 1/4 cts.; common, 4 1/4 to 4 1/4 cts.; culls, 3 1/4 to 4 cts.; fat cows, 2 1/2 to 3 1/2 cts.

LAMBS.—Extra, 6 1/2 to 6 1/2 cts.; good, 6 to 6 1/2 cts.; medium, 5 1/2 to 5 1/2 cts.; common, 5 to 5 1/2 cts.; culls, 4 1/2 to 4 1/2 cts.; spring lambs, 6 to 6 cts. per pound.

FOREIGN.—In the House of Commons, on the evening of the 12th instant, Ritchie, the President of the Local Government Board, in moving that the Local Taxation bill dealing with publicans' licenses be read the second time, declared the Government's sole purpose in proposing that a part of the same allocated to local finance, be used to purchase licenses, was to promote temperance. He appealed to the Temperance party to recognize existing facts. They must admit of some form of compensation. Public opinion would not stand a law which would try to beggary people carrying on a legitimate business.

Caine, advanced Liberal, moved the rejection of the bill. The Temperance party, he said, representing what moral principle inspired the nation, could not assent to a measure providing that public money should be used to buy or buy out the publicans' right while giving 6d. in the pound to the Temperance party, gave the liquor dealers a round sovereign. On no moral or legal grounds could compensation be given.—Though the sum now proposed is small, it was an evil precedent, tending to pervert future legislation.

Mr. George Trevelyan, an English Tory, he said if the principle of compensation were admitted, it would involve the devotion to that purpose of £250,000,000, besides killing all hope of local option. On the 8th instant an election was held in East Bristol to fill the Parliamentary seat vacated by the death of Abner Cossham. The candidates were fully: Weston, Gladstone, 4775; Inskip, Conservative, 1900; Wilson, Labor candidate, 602. At the last previous election the poll stood: Cossham, Home Ruler, 3672; Inskip, 1936.

A report of Great Britain swallow over 5,500,000 pills daily, or one pill a week for every person in the population. The pills consumed in one year would fill 36 freight cars. Placed in a row, they would reach nearly 6,500 miles.

The report of the Special Commission sent out by the Emperor of the Prussia, on the 17th inst., to investigate the condition of the canal, estimated that it would cost 485,000,000 francs to complete the canal on the lock system. To this should be added 20 per cent. for unforeseen expenses, and 29 per cent. for the expense of management and for interest. The total cost is fixed at 900,000,000 francs. The report further states, that it would take between seven and eight years to complete the canal. The annual cost of management is estimated at 10,000,000 francs.

The most interesting incident of the week was the speech of the German Emperor, at the opening of the Reichstag, which has excited general comment. In general, the speech was well received; but some of the expressions have excited considerable criticism.

The New York Tribune's correspondent acknowledges that the effect on the whole has been good, and that the people of Europe had been assured by the Emperor's emphatic utterances, "He seems," writes one observer, "to have convinced himself that peace is his own policy, as if he had invented and taken out a patent for it, and he would therefore defend it with all his might and main, in case of any attempt to deprive him of it. There are advantages to Europe in this Imperial egoism." His confidence does not prevent him from asking for a great sum of money to increase the army. Peace is to be preserved by the help of 420 new great guns and some odd thousands of soldiers. Ten million men are wanted to man these guns and soldiers. The Radicals and other parties agree in supporting these demands.

The Austrian and Hungarian press express delight with the pacific tone of the speech delivered by Emperor William. The press of all countries declare that Emperor William's solicitude for his workmen has strengthened the internal peace of Germany, and that the maintenance of the strength of the German army has strengthened external peace.

Emperor William's speech has produced a bad im-

pression in St. Petersburg. It is regarded as having a warlike significance beneath the pacific protests. The fact of increased military credits being asked is considered as contradictory to the Emperor's pacific phrases.

The St. Petersburg correspondent of the London News says, that the Russian Government has resolved that the delegates to the Prison Congress shall pledge themselves not to raise a question regarding political prisons and prisoners in Siberia.

The Longue Pointe Lunatic Asylum, ten miles from Montreal, Canada, was destroyed by fire on the 7th instant, and about 50 of the inmates are believed to have perished in the flames. The asylum was under the charge of the Sisters of Providence, and several of the sisters lost their lives in trying to save the patients. The asylum was founded in 1873, and the amount spent in organizing the institution was \$1,132,232, of which the buildings cost \$700,000. The arrangements for the prevention and check of fire appear to have been exceedingly defective.

Senator Girard, in moving in the Dominion Senate, on the 7th instant, that the time had come to take steps to protect the great Mackenzie Basin, its minerals, game, fish and fur-bearing animals, elicited from Senator Abbott the statement that the Government will shortly send an expedition to that region and ascertain definitely what ought to be done.

NOTICES.

WESTWON BOARDING SCHOOL.—The Committee in charge of this Institution meet at the School on Fourth-day, the 21st inst., at 8 A. M.

The Committee on Instruction and the Committee on Admissions meet the evening previous, at 7 P. M., at the School.

The Visiting Committee meet at the School on Seventh-day, the 17th inst., at 10 A. M.

Conveyances will meet the 2:53 and 4:55 P. M. trains, on the 17th and 20th, at Westtown Station.

WM. EVANS, Clerk.

Henry Longstreth, 740 Sanson Street, has received a few hundred copies of John Woolman's a Lecture to Young Men," by Thomas Green; price 50 cents, on receipt of which the book will be mailed to any address.

An assortment of Ashworth Tracts; also "Words of Comfort," and Temperance publications, such as "Buy Your Own Cheries," "Tables Turned," and "Not Another Drop, Daniel" are now on hand at 116 N. Fourth St., and may be obtained gratuitously by applying to JOHN S. STOKES, at that address.

FOR RENT.—A Friend in West Chester, Pa., having more house room than is needed, desires to rent for the summer, furnished, all of a new house, excepting two rooms.—Pleasantly situated.

Apply at No. 423 West Miner St.

WANTED.—A Teacher for the Haverford Primary School, to enter upon duty Ninth Month 16th.

Apply to HANNAH GABRIEL, Haverford College, Pa.

A few boarders can be accommodated in a Friend's family at No. 480 North Fifth Street, Philadelphia.

Fifth Mo. 1st, 1890. E. SHARPLES.

DIED, of pneumonia, at El Modena, California Third Mo. 27th, 1890, FREDERICK J. WILLIAMS, a member of Earhart Monthly Meeting, California. She was born Eleventh Month 25th, 1811, at North Berwick Maine, and was a daughter of Joshua and Sibyl Jenks. She possessed a living interest in the spirit, and was beloved by all who knew her. During her short illness of one week she frequently remarked, "the however it might terminate all would be well."

Third Mo. 22d, 1890, at the residence of his son-in-law, Isaac Larkin, near Toughkenamon, Chester Co., Pa., THOMAS KINSEY, in the 79th year of his age, a member of a Meeting of Friends in Haverford, Pa. He bore a bodily affliction of several years duration with Christian fortitude, and entire resignation to the will of his heavenly Father. His loss is deeply felt yet his relatives and friends have the consoling belief that he has been permitted to enter into the joy of his Lord.

Incidents and Reflections.—No. 224.

PERSONAL INFLUENCE.

No one questions the powerful effect which the example and words of a man's associates exert over him. It is a common proverb, that a man's character may be known by the company he keeps. The following incident is one in which the influence exerted was for evil:

"A gentleman sat in a handsomely-furnished room gazing thoughtfully into the glowing grate-fire. He could scarcely have been forty-five, yet his hair and beard were fast turning gray, and in his face there were heavy lines carved by sorrow or care. His companion was a young man hardly more than a boy in appearance, except for an air of worldly wisdom, evidently real, not assumed. He sat respectfully waiting for the older man to speak. At last the other began slowly:

"I will tell you a story, Arthur. Why I tell it you may understand when you hear it.

"When I was at your age, my greatest admiration was given to a man a few years older, whose companionship I esteemed a high honor. He was handsome, of winning address, and extremely popular. He was my model in every thing. He might have made me almost what he chose, and yet I do not suppose he ever gave a thought to the influence he was hourly exerting over me, as over many others. He enjoyed his popularity and regarded us chiefly as we ministered to his vanity. He was not a good man, but you might have been with him for weeks without guessing the extent of his power for evil.

"One evening when a small party of congenial spirits gathered, as usual, in his rooms, some reference was made to church and religion. Some one, more scrupulous than the rest, had objected to a proposed plan on conscientious grounds. My hero's answer was a sneer. Only that; he did not enter into elaborate argument to prove that the creed of the Church was unworthy of belief. He did not attempt to persuade our companion to give up his opinions. He simply changed the subject at once with a sneering jest. But those half-dozen words scarred my soul and well-nigh ruined my life.

"You may say that I was weak to be so easily influenced, and I grant you that. The fact re-

mains that I was sufficiently under his influence to shrink from doing any thing I heard him ridicule. My Bible I had neglected before; now I gave it up all together, and church-going also. From this it was a short and easy step to scepticism, thence to downright and avowed infidelity. By the time I had reached this point my doubts were honest. At first they had been the result of ignorance, and a little study, a little sincere effort, would have dispelled them. Instead I had listened to my hero's sophistries and cynicism until I was thoroughly imbued with them.

"Suddenly an event which I need not relate opened my eyes to the real character of the man whom I had so blindly followed—opened them, also, to the utter weariness and worthlessness of my own life. All my dearest ambitions, could they have been at that moment realized, would have been valueless to me. I would have given all I owned to be able to believe in the Bible even as superficially as I had once done, but it was now impossible. I turned to money-making for consolation, but soon gave it up in disgust; the toil was greater than the reward. I tried study with no better success. What was the use of spending all my life in a laborious effort to acquire knowledge that would fade away when I dropped into the grave? Every path led to one point. If the Bible were true, then life was worth living for; if not, this world held no good that would repay me for the effort necessary to obtain it. If wealth and culture and work could advance the eternal interests of myself and my fellow-men, they were valuable; in themselves they were nothing. Thus, after long years of darkness, wretchedness and sin, I at last reached light and peace. It is too late now to do the work I might have done; my best years have been worse than thrown away. The blame cannot rest wholly upon the man who led me astray, though he is far from blameless."

"But there! I have told you my story; you can draw your own conclusions. A wrecked ship is a lost and worthless thing in itself, but it answers one good purpose; it warns others of the hidden rocks beneath the glittering sea."

The knowledge that our influence may produce on others an impression which may last forever, should render us prayerfully anxious that we may be instruments for good and not for evil. It is recorded that a young woman, who was under conviction for sin, had her solemn impressions dissipated by the unseemly jesting of a church member as she came out from a religious meeting:

"A much more pleasing anecdote is that related of a minister, whose sister had married a pronounced infidel.

The skeptic said to his wife one day: "I will prove to you that your brother is not that angelic being that you consider him to be." So one day when the minister called, the brother-in-law accused him of a most unjust thing. He denied it at once; but the man bore on pretty hard, and at last the minister lost his temper

and became very angry and went home. But he did not sleep that night, and the next morning, at daybreak, he went back to his sister's house, and said to the husband: "I was wrong last night. I lost my temper and became angry; but I have come back this morning to confess my faults to you." The infidel could not stand that, and he broke down, and as a result of that he was converted.

A certain minister, while taking a quiet smoke and walk one afternoon, with his little son, six years old, came in contact with a group of small boys, smoking parts of cigars, pipes, paper, and sticks—while some of them were swearing and fighting. He said to the boy, "My son, I hope you will never indulge in such practices; the police should arrest those naughty boys, and take them home to their mothers and have them punished."

The father walked along enjoying his cigar, when he was surprised by the silence of his son, who was usually quite a chatter-box.

"My son, why are you so quiet? What is the matter? What spell has bound you?"

"Why, father, I was thinking, is it not as naughty for men to smoke as for boys? Why should not the police arrest men as well as boys, and who would punish them? Where would they take you, and would they leave me? If men didn't smoke, boys would not want to, for they like to grow to be like men; and you told me last week, the tree and the sprout both grew together in the ground."

The father stood silent for a moment, then said, "You are right, my son, men should not smoke. Your father will never smoke again," and he suited the act to the word and destroyed the cigar, and abandoned the habit. Children often unconsciously send an arrow of conviction to their parent's heart.

The Watchword tells of an honest farmer named John Burns, who was a moral and upright man. When about 40 years of age, he became deeply interested in his personal salvation. He had a wife and four children, and he felt that it would be right to have family reading of the Bible, and a time for religious worship. Being naturally very diffident, the effort seemed too great. So it was put off again and again, and new duties were discharged in other directions as an offset; but he grew no better—rather worse. At length one morning, while in the field, he resolved that, come what might, he would make the attempt. A seamstress was in the house, from whose ridicule and scorn he shrank, but his mind was made up. His account of the effort may be given in his own language:

"When I went to dinner she told me she wished to go home that afternoon. Never did I carry a person from my house so gladly before. One great obstacle seemed now to be removed. Night came on, and I gained strength for my duty. But just as I was about to get my Bible, and tell my family what I intended to do then and thereafter, who should knock at the door but the youngest brother of my wife, a mirth

loving, captious young man, just from college, and the last person in the world I wanted to see. My heart cried, 'What shall I do?' and my agony seemed more than I could bear. But my vow had been made, and there was no going back, I arose, got my Bible, and told the family of my intentions. My wife looked as though she would sink through the floor. The children looked at one another, at their mother, then at me, puzzled as to what was going to happen. My brother-in-law was greatly amazed. But, rallying all my strength, I read a Psalm, knelt down, and at length said, 'O Lord, and could not utter another word; and there I was, a great, stout man, upon my knees, a laughing-stock for all. But my proud heart was humbled, and just then my heavenly Father seemed to meet me as never before, and I arose with my soul filled with an unutterable peace. My wife was deeply mortified, and hung her head in shame. My brother-in-law said nothing, soon retired, and the next morning left for college again.

"In less than a month I received a letter from my brother-in-law, which began with these words: 'Rejoice with me, Brother John; that scene at your house the other evening, God blessed to the saving of my soul.'"

J. W.

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 330.)

1795. Fourth Mo. 21st.—I then rode about twenty miles through a rough and mountainous country, up the west side of the North River, to a place called Smith's Clove, and had a meeting there the next day; which was a laborious season. It hath been trying to my weak body to travel on such rough roads; but I have been enabled calmly to submit to the present dispensation and to trust in the Lord. From Smith's Clove I went to New Curwall, under much poverty of spirit; had a meeting there the next day (23d), in the forenoon, which was very laborious. The people seemed to be too much at ease. In the evening I had a meeting in a town on the North River, called Newborough; and although it was much crowded, I thought the Lord's power came into dominion. I did not learn that any Friends dwell here.

24th.—I next had a meeting in Newborough Valley. This was large; and heavy in the fore part, yet I believed it was an humbling season unto many who were present. After solid conversation with some of them, at a Friend's house, we parted in near affection. On the 25th had a meeting at a place called Mulberry, which was also large, and solid in a good measure; but I thought the people in this new, rough country are too much attached to this present world, and therefore have not so lively a sense of Truth as I could desire.

In baptizing seasons I have witnessed since I left home, I have not lost my faith in my Redeemer; I know at some seasons that He lives, and desire to be at his disposal, come life or death: blessed be his holy name!

The 26th I had a large meeting at Little Esopus, which was solid, and seemed to end well. The next day I visited six families, and had a small meeting in the evening, it being stormy. I was poor in spirit—an exercising day.

The day following (28th) I visited two other families, and had a good and satisfactory opportunity with Friends by themselves; and went to see two families of tender Friends, also, after that.

29th.—I have had eleven meetings on the

west side of the North River, besides the visits to particular families. Then crossing that river, I had a meeting on the 30th, at Crumelbow. Some tender Friends dwell here. I thought this was a solid meeting; my labor was close, yet well received. I visited a sick woman, and had a favored time in the family where I dined, desiring Friends to observe true moderation and to be contented with our own country produce, etc. Blessed be the Lord, whose power is over all to open a way for his humbled children.

Although I do not perceive so lively a sense of Truth's operation among Friends in these parts, as in some places, yet there is a tender-hearted remnant—some of this sort among young people. My mind seems turned towards the farther part of my journey; yet, to take a few meetings on my way. May the Lord enable me to be faithful to the discoveries of pure Light. I feel myself given up to his service, come life or death.

Fifth Mo. 2nd.—I had a large meeting at my Friend Tedman Hull's house; pretty solid. And the next day, one at that called the Creek Meeting-house, which was large also, but exercising. My next opportunity was amongst Select members, previous to their Quarterly Meeting, which appeared to be a season of Divine favor. The Truth came over all. I had to hint the necessity of those in the fore rank keeping their garments unspotted, that those who look to us for example may not be stumbled; and to speak on the propriety of observing true moderation, avoiding rich furniture, etc.; also, to encourage Friends, in their families, to be contented with what is, or might be gotten here in our plentiful country, without articles of superfluity, that are brought from foreign parts at a great expense, etc. My friends appeared to unite with the remarks; and the meeting ended with comfort.

5th.—From the Creek, I went to their Select Quarterly Meeting, held at Nine Partners, where also I had close labor, in the love of Truth, I believe; which was well received. I had tenderly to hint to women Friends the need to guard against over-much niceness and delicacy about the linen they dress themselves and families with; also on needless cuffs, capes, collars, etc., to coats, cloaks, etc.

Next morning my mind was favored with solemn quiet. Let all that is within me bow before the Lord, for so high a favor.

Their Quarterly Meeting for Business came on next, in which I had close labor in discharging what opened in my mind, which was received in Love. This meeting concluded on the 7th; which was a very large gathering—the last day more than their spacious house could contain. Before it closed, the Truth was in dominion; the lofty were abased, and the little ones comforted.

8th.—From Nine Partners, I rode about forty miles, a mountainous road, to a new city on the east side of the North River, called Hudson (about 240 miles, or so accounted, from Philadelphia). On the First-day of the week, I was at their meeting, which was large and solid. Therein power was afforded to labor for the cause of Truth and righteousness in a very close manner; and parted with my Friends in the feeling of near love; no kindness was lacking towards poor me.

11th.—Then travelled near forty miles to Saratoga; we passed through Albany and Troy, and so to the new city. My mind was under exercise as I passed along. The next day attended their Select Quarterly Meeting at Sara-

toga. I was poor; yet labored some for the good cause, which was well received.

13th.—In the Quarterly Meeting for Business, I found it exercising. I had close labor among men, and women also; which I fear had but little effect. There appeared to be some hopeful youth; but, to my grief, the spirit of the world seemed to have too much place among Friends; the elder rank especially. Here a committee was named to confer with me respecting my journey, and a Friend kindly offered to bear me company, which was united with. I had sufficient to bear my own expenses, yet their care and kindness towards me was cause of thankfulness. The opportunity I had with this committee, I believe, was owned with the Lord's presence. The Quarterly Meeting ended the 14th, with a meeting for public worship, which was large and solemn: the witness of Truth being sensibly reached in many minds. At the conclusion the Select members came together, and the way opened for using freedom amongst them, which afforded me some peace.

15th.—I attended their Monthly Meeting at Saratoga also, which was exercising. But the Lord is not wanting to help those who humbly confide in Him.

I now crossed the North River from Saratoga to the west side. My carriage is fitted for two horses, and my companion is to ride with me. On First-day (19th) was at their meeting on the west side, which was large and exercising; but concluded well, as I thought. I am poor in body and mind, yet feel contented in my allotment. If I have but bread and water, and am favored to move safely, I hope all will be well.

I believe it is safest, at least for a minister of the Gospel, to stand loose—refrain from great business. A cottage and spare diet, with peace of mind, and leisure to run on the Lord's errands, is better than large dealings. Oh! that ministers may be content in a low estate; eat sparingly, clothe frugally, etc.

I visited several families here to good satisfaction; Divine aid being afforded. The 20th, I was at Saratoga Monthly Meeting, on the west side, which was a favored season. The next day, was at a meeting at Greenfield, a new settled part of the country, about fifteen miles west of the river. The land here seems to be barren, and I thought the people's hearts resembled the soil; though they sat in solidity and received kindly the close doctrine I had to deliver.

22nd.—Next, we had a meeting at Galloway, which was very large, and I thought a favored season. Here the people are so thickly settled, it is said the land is divided into lots of fifty acres, and they appear to live comfortably. The day following, at Ballstown, we had a meeting, which was long in gathering; but the people seemed to sit in a solid manner, after they were gathered; and it ended to my satisfaction.

24th.—We had a meeting this day, being the first of the week, at Newton—held in a barn. It was very large, and a favored season. No more than one member of our Society dwells here.

From hence we returned to Saratoga; after travelling upwards of sixty miles on horseback, and having four meetings, to my comfort. I believe it is good for Gospel ministers to experience poverty of spirit, that they may not confide in the arm of flesh.

25th.—We travelled about thirty miles from Saratoga to Queensborough; and next day, went on horseback up the North River to a place called the Patent, twenty miles back of Lake George—the utmost settlement that way,

Here the people fare hard, the houses mean, and land rough. We had four meetings amongst them; and there were but four families of Friends. The visit yielded me comfort.

(To be continued.)

FOR "THE FRIEND."

Silence and Work.

"Keep silence before me, O islands; and let the people renew their strength; let them come near; then let them speak; let us come near together to judgment."—Isaiah xli. 1.

Silence, that is far-reaching, is not merely in the outward, but that interposition of soul in the presence of God, by which the heart becoming perfectly subjected to the power of God working in our inward parts, doth cease from its own striving, and placing its will in the will of God, realizes true silence to self, to sin, and all that would turn to earth; knows what it is to come near by the blood of Christ, and thereby to enter into the holy of holies through the rent veil, that is to say his flesh. It is the new and living way. No dead, or formal, or earthly spirit, can enter by it. Only that which is made alive in any can come near to the Father, for Christ is the door of access.

And this door our forefathers cannot open unto, but the same blessed Holy Ghost doth open in the believer, that has faith to receive the heavenly guest into the mind in his directing, subjugating and controlling power. It may be in a very insignificant way, but still in the way. He is pleased to come and manifest himself unto them, drawing the mind off from all lofty thoughts and imaginations, in order to know how naked and bare we must become if we would receive Christ as Saviour and sanctifier into the soul.

"For if any would know God the Father, they must be willing to receive Christ the Son and Sent and revealer of the Father; so too, if any would know Christ, they must be willing to bow to the teaching of the blessed Spirit, and it is in the silence and subjection of ourselves that this blessed teacher is known to instruct.

But to come into a condition of true silence is not to be attained by unaided effort of our own. It is as the sense is begotten in us that all good is of God and unattainable by us unless our God is pleased by the finger of his spirit to touch the heart, so that ability is given to draw near, the eye being opened in us to see Him who is invisible to mortal eyes, the sight whereof humbles in the dust under a twofold sense—the holiness of God and the impurity of our own nature.

In this condition there is a drawing near together unto judgment; and as just and righteous judgment has its place with us, there is known the experience of our sins going beforehand unto judgment; and blessed are they who know this blessed although humbling experience. For as true judgment is known and submitted to, righteousness will take the place of the earthy nature, and the kingdom of righteousness will become established in the place thereof.

But in the noise, in the confusion of our own nature and in its workings God cannot be known, only as a reprover in the conscience. But even here, if there is but a willingness to hearken and acknowledge his rightful reproofs, and to turn from that for which we are reproved, a better condition may be known, and true contrition wrought in us, until there is a receiving of Christ not as a reprover only but as an enlightener, and quickener, until we may become of quick understanding in the fear of the Lord, so

that there is a going from strength to strength, in the knowledge of that washing by his Word. Then will silence take the place of noise, and order that of confusion, and God will be glorified in us.

Many are the ways and means by which the Lord is pleased to lead and teach and to bring to submission to his will; for without a knowledge of this there can be no rightly ordered service. Whatever has not the seal of the king upon it is not of Him, and will not be acknowledged by Him.

"My sheep," said Christ, "hear my voice and they follow me." This is as true now as ever.

It is a sorrowful feature among our own people, more or less, wherever I have gone, that there is a want of true understanding of the nature of true silence. We hear silent prayer spoken of, and also meditation in silence, but of being brought into silence, very little. Some are very much afraid of unsound teaching, nevertheless will speak of having a well-stored mind for the ministry.

Whatever place scholastic teaching and learning may have in the natural elevation of man, in making him superior to the beasts that perish, there is need, for the work of the ministry, of a continual emptying in order to be filled with the new wine of the kingdom; and the old bottles will not hold this, but the renewed nature can, as there is a fresh emptying of all that has afore been received, for many do minister again of that which they have afore received, and not in the newness and freshness of the fresh openings of the life in them, so that what is true in word, and was indeed the Word of the Lord in days gone by, is so no longer, and tends but to death and darkness, even though the preacher may throw much of the fire of his own nature into it.

Thus by little and by little there has come to be a sliding away from the path of life, and the path of truth, in the way and in the teaching of very many.

Dead and formal silence has too much taken the place of that prostration of soul which is needful in order to be made sensible of that silence which is to be kept in drawing near to God to speak aright and to know the path of true judgment set before us, in judging of ourselves as well as all in which we are rightly called to be judges.

Under the latter, ease and self-indulgence has taken the place of devotedness to God, and spirituality has been assumed to cover a covetous worldly spirit, so that the injunction—love not the world, neither the things that are in the world—has strangely been turned in practice into loving of the world and all the good things therein, as though these were evidences of a love of the Father, instead of contrary wise a love of the world. For the Apostle tells us that they who love the world, the love of the Father is not in them.

Doubtless the Apostle knew wherof he wrote, and that how surely the love of this world and the things thereof would eat out the love of heavenly things, therefore the necessity of his injunction.

Very truly, too, has it been said of this people that what persecution would not do, worldly prosperity has done—made them formal and lifeless and checked their growth and spread.

Truly, the Lord's ways are not as our ways, nor his thoughts as our thoughts, and so He allows man to work his own works in his endeavor to find the lost treasure, until he weary himself with his own labors and find confusion

the outcome of his own doings; then in his extremity he will cry unto the Lord for help.

It is when brought to this position of helplessness that he is led to prostrate himself, even in the dust of his own nothingness before the Lord, into silent awe before God's fiat-act, and to realize a breathing begotten in him not of himself, but for himself, to know the fulness of that redeeming power which is not of man but of God.

The works of man's own hands then lose their coolness; and the active work of his brain in believing, its fascination. The faith that saves is God's free gift to the faithful soul that cleaves to Him in the ability that He doth give, in the darkness as well as in the light, and for the renewings thereof hath to wait to be enabled on the wings thereof to mount up as the eagle, and in the strength thereof to run and not to be weary, and to walk and not faint.

How, as a people, we have lost the primitive holy zeal of the fathers, who could go forth at the Lord's bidding, from a sense of requiring at their hands, trusting to his providing hand, and need not to make bargains with their fellow-mortals for a maintenance!

Primitive faith will produce primitive zeal, and the reward thereof will be an abundant harvest. But we are afraid of the Truth and where it might lead us, if we gave up fully to follow it; hence it is much more agreeable to keep in beaten tracks of custom and practice, than to open fully in all things at all times our minds to the teaching and the leading of Truth, so that we might see ourselves and our needs fully in the light of Truth.

Thus the Word and the work of the Lord hath not free course, and God and Christ is not glorified by us. We content ourselves very much with talking about the good things of God's kingdom; but realize not the living breathing for that kingdom so to come to us and in us, that the holy will of God might be done even by us here on earth as by angels in heaven.

Ah, would there not be a terrible shaking among us if so awakened to see ourselves as by God we are seen; alas, how largely immersed in earth, covered with the dust and rust thereof.

Dead meetings and a lifeless ministry are the natural outcome of a worldly condition. You do not look for flowers in the gutters, but in the cultivated garden. So neither can you expect the flowers of God's grace to grow among the rubbish of earth, when these are allowed to overlap it.

"Wash you, make you clean," said the prophet of old. And the language of truth is still the same. "Wash you, make you clean." But not by the unclean labor of our own hands, only by coming under the power of his grace, in its searching, clean-ing, purifying, and separating nature. For light has not communion with darkness, and our own devices no place in the work and salvation of the immortal soul; and these all vanish when the breath of God breathes life into our souls, so that we come to abhor ourselves and to repent in dust and ashes—truly symbolical of that lowly condition to which the true child is brought who is born from above.

Silence to ourselves and our own ways and reasonings is a necessity in order, and preparation for labor in the Lord's vineyard, and the unclothing of our own spirit of its earthly garment in order to know of that covering by the Lord's Spirit by which we are fitted to labor in the harvest field of God's kingdom, into which the ingathering must be by the Husbandman of souls.

In writing what I have my mind turns toward the honest seekers after truth, whose desire is to walk aright, and to find that foundation which will abide immovable when storm and tempest rage.

The more emptied of self, the greater the sense of our own helplessness, and in the very weakness of all that is of the creature, the more fitted and prepared to be filled by the fulness that is of God through Jesus Christ, will we individually be.

To be brought down to this may be through many reductions, but blessed are they whose desire and seeking is thus to know the stripping of all, in order to know the all of God.

CHARLES W. THOMSON.

Fifth Month, 1890.

"From thence we went into some adjacent countries, and had meetings, and on the 22nd of Second Month returned to Bristol, where, lodging at our ancient friend Richard Sneed's, one morning the canopy of the Divine presence came over us in the family, and brought us into right silence for a time; and then the Holy Spirit of prayer and supplication came upon us; and whilst we were in that exercise, William Penn came into the room, and joined with us; and, after him, that ancient and eminent minister of the Lord Jesus, Roger Haydock, and some others following them, were favored with the same visitation and good presence of the Lord our God, and the enjoyment of him together in the Beloved, to our great refreshment and consolation. This good season being over for a time, we had sweet and agreeable unity and conversation together; which proved a great strength and encouragement to my companion and me, to be thus favored in the sight of those elders; who, by their free and fatherly behavior towards us then, and from that time forward, declared a firm and settled friendship in the Truth, which never waxed old, or decayed.

"In this journey, though we were not without temptations and exercises of divers kinds, yet the Lord was near to preserve us; and, through his Divine grace, gave us many open, comfortable, and edifying times, in the assemblies of his people; and in divers families, as also in conversation; for the fear of the Lord was over us, and we did not delight in vain and unprofitable talk, but were kept solid; but not cast down, or unconvertible."—*Thomas Story*, 1695.

FOR "THE FRIEND."

The reading of the beautiful lines "Across the Wheat" has revived an incident in the early religious life of the writer, which may be proper to record, referring more particularly to the sentiments contained in the two concluding verses.

About the year 1845, a most inhuman murder was committed near West Chester, that of killing an innocent delicate boy, Wesley Patton, who with a younger sister had been left by their parents going to meeting, by Jabez Boyd, a neighbor's son, for the purpose of robbing the house.

I think it was after his condemnation, and execution had been fixed upon, that our late dear and valued friends Hannah Gibbons and Sarah Enslin visited him in his cell, and it was the writer's privilege, with others, to accompany them. In the course of an earnest, feeling, religious communication from the former she said to him, "That his soul was just as precious in the Divine sight as was either of ours." The

declaration was startling, and at the time very difficult to realize—but is it not the very truth?

W. P. T.

Fifth Mo. 6th, 1890.

ACROSS THE WHEAT.

You ask me for the sweetest sound mine ears have ever heard?

A sweeter than the ripples' plash or trilling of a bird,
Than tapping of the rairdrops upon the roof at night,
Than the sighing of the pine trees on yonder mountain height;

And I tell you, these are tender, yet never quite so sweet

As the murmur and the cadence of the wind across the wheat.

Have you watched the golden billows in a sunlit sea of grain,

Ere yet the reaper bound the sheaves to fill the creaking wain?

Have you thought how snow and tempest and the bitter wintry cold,

Were but the guardian angels, the next year's bread to hold,

A precious thing, unharmed by the turmoil of the sky,
Just waiting, growing, silently, until the storm went by?

Oh! have you lifted up your heart to Him who loves us all,

And listens, through the angel-songs, if but a sparrow fall,

And then, thus thinking of his hand; what symphony so sweet

As the music in the long refrain, that wind across the wheat?

It hath its dulcet echoes, from many a lullaby,
Where the cradled babe is hushed 'neath the mother's loving eye.

It hath its heaven-promise, as sure as Heaven's throne,
That He who sent the manna will ever feed his own;

And, though an atom only, 'mid the countless hosts who share

The Maker's never-ceasing watch, the Father's deathless care,

That atom is as dear to Him as my dear child to me;
He cannot lose me from my place, through all eternity;

Who wonder when it sings me this there's nothing half so sweet

Beneath the circling planets, as the wind across the wheat?

—Margaret E. Sangster.

FOR "THE FRIEND."

THE CHANGE OF THE SEASON.

What a blank was before us:—the trees' leafless branches.

The hills and the valleys a desert of snow;
No song from the Cedar, no voice from the Ashes,

Save the deep mournful winds as they fitfully blow.

There has been a confusion and bustle around us
That attend the approach of the change of the scene;

And nature has cast off her white-flowing garments
And waits to be robed in her vestments of green.

There are songs from the highlands, and songs from the meadows,

One wild universal harmonious strain;
There are songs from the woodlands, and songs from the hedgerows;

All nature exalts in exuberance of life.

Even the squirrel's sharp bark adds a note to the chorus,

As into his chamber the mild zephyrs creep;
Where the strong equinoctial, so bleak and sonorous,

Had rocked his rude cradle and sung him to sleep.

That heart must be cold that can feel no reaction,
Nor dance in response to your life-stirring lay;

And cheerless that breast that with wild satisfaction
Does not swell with the bright swelling blossoms of May.

To me such familiar melodious voices
This happy and pleasing intelligence bring—
The winter is past and all nature rejoices

In the bright and the balmy luxuriance of spring,
Although your Creator ne'er blessed you with reason,

That taught you to leave at the change of the season,
And return on that wave in the wake of the storm.

When I think of the numbers more blooming and beautiful,

Who so late in their last silent slumbers have lain,
I will raise up my voice with the rest and be thankful

Our Father has spared me to meet you again.
When I hear the outpourings of every creature

As the grave of the winter yields up its control,
This wild universal resurrection of nature

Gives strength to my hope in the life of the soul.
That heart must be cold that can feel no reaction,
Nor dance in response to your life-stirring lay;

And cheerless that breast that with wild satisfaction,
Does not swell with the bright swelling blossoms of May.

Fourth Mo. 6th, 1890.

C. S. CORP.

I COULD NOT DO WITHOUT THEE.

I could not do without Thee,
O Saviour of the lost!

Whose precious blood redeemed me
At such tremendous cost.

Thy righteousness, Thy pardon,
Thy precious blood, must be

My only hope and comfort,
My glory and my plea.

I could not do without Thee,
I cannot stand alone,

I have no strength or goodness,
No wisdom of my own.

But Thou, beloved Saviour,
Art all in all to me;

And weakness will be power,
If leaning hard on Thee.

I could not do without Thee!
For oh! the way is long,

And I am often weary,
And sigh replaces song.

How could I do without Thee?
I do not know the way.

Thou knowest and Thou leadest,
And wilt not let me stray.

I could not do without Thee,
O Jesus, my dear Redeemer,

E'en when my eyes are hidden,
I know that Thou art near.

How dreary and how lonely
This changeful life would be,
Without the sweet communion,
The secret rest with Thee.

I could not do without Thee!
No other friend can read
The spirit's strange deep longings,
Interpreting its need.

No human heart could enter
Each dim recess of mine,
And soothe and hush and calm it,
O blessed Lord, but Thine!

I could not do without Thee!
For years are fleeting fast,
And soon, in solemn loneliness,
The river must be passed.

But Thou wilt never leave me,
And though the waves roll high,
I know Thou wilt be near to me,
—It is I!"

—Frances Ridley Havergal

SYMPATHY with the religious spirit of the Hebrew writers made their meaning clearer than it could be made without this sympathy, qualified a critic to see and to feel the impression of their words, and this impression reflected light upon the sense of the words. A critic with a less sensitive piety may see the meaning of alphabetical letters, and a critic with a more sensitive piety may hear the tones with which those letters are enunciated, and the impression of the whole sentence may depend upon the hearing of the tones more than upon the seeing of the letters. We may not always account for the impression, but the devout man feels what the philosophers cannot explain, and his feeling may direct him to the discovery of an otherwise hidden meaning of Hebrew or Greek particles.—*Autobiography of Wm. G. Schauffer.*

FOR "THE FRIEND."

A Visit to Tunesassa.

[A letter was recently received by the editor, dated Salamanca, Fourth Mo. 24th, which says: "About a year ago, Sarah Adkins and I visited the Boarding School at Tunesassa; and were very much pleased to note the interest and advancement of the pupils, as well as the general care and kindness of the Friends in providing such a benevolent institution for the Indians. After her return home to Oswego County, N. Y., she wrote an account of the visit for the benefit of their local Missionary Society, and sent a copy of the same to me."]

A copy of this account was enclosed in the letter, with a suggestion that it be published in THE FRIEND, for the information of those unacquainted with the workings of the school. It should be mentioned, that neither of the visitors on that occasion was a member of the Society of Friends. The account, somewhat abridged, is as follows:]

A VISIT TO THE INDIAN SCHOOL, on March 11, 1889.

(Read before the Pres. Women's Mis. Society of Hanibal, July 3, 1889.)

Last spring, while visiting in Western New York, I, in company with a gentleman and lady friend, visited an Institution at Tunesassa for the training and education of Indian children, supported solely by the Society of Friends.

The building was situated in a quiet spot, about one half mile from the R. R. Station known as "Quaker Bridge"—thus affording a pleasant home for the Supt. * * * and wife, two teachers, two governesses, and 39 children, ages ranging from 2 to 19 years.

We arrived there about 11 A. M., and after spending an hour very pleasantly in conversation, we were ushered down to the dining-room, where were three long tables spread with ample provision for all—enough and to spare. The centre table was occupied by the Superintendent and household, with the girls at one side table and the boys at the other.

After we were seated, each bowed the head, and *silently* invoked the Divine blessing upon the food in readiness for us. After dinner, we were shown about the house, from the upper rooms down to the cellar—found everything so clean and sweet—and saw many things which were of *much interest to me*.

When we went into the kitchen, we were shown great *stacks* of bread, freshly baked, and the large oven in which it was baked—and also the trough used for kneading.

I think it was nearly three sacks of flour they used at a baking, three times a week.

I could speak of various places in the house which would be very interesting to you, I am quite sure: milk-room, play-room, etc. The work was nearly all done by the children.

At 2 P. M. school was called, and we spent one hour in the advanced room, and another in the primary department; and the progress those Indian children were making was, indeed, quite remarkable to me.

They have a summer vacation—the children returning to their homes for a few weeks; but I was told that it was a great detriment to them, as they would so readily fall into the indolent Indian habits, and take their manners.

Soon after leaving the school-room, we were conveyed to the station, where we took train for home, feeling we had passed a very pleasant day.

This was my first acquaintance with "The

Quakers," and I was very favorably impressed with them. The Friends devoted their whole time to our entertainment, which was both for our pleasure and instruction.

With a kiss, they bade us an affectionate "Fare thee well," and gave us an urgent invitation to "come again," which, were I again in their vicinity, I should be sure to do.

It requires much patience to teach the children, and these people seem to possess a marked degree of that virtue; apparently, they know just what course to pursue to educate and civilize them; * * *

There is much land lying dormant, although there are some tracts under good cultivation.

I became more interested in the Indian question than ever before. * * * I also have more sympathy for the red man, where ever he may dwell—believing he would live much more peacefully were he left unmolested and treated more kindly by the white man. * * * And, again, it appears to me that we too often lose thought, that in the sight of God, *his soul is as precious as is our soul*.

FOR "THE FRIEND."

Misunderstanding and Misinterpretation of Sacred Scripture.

Is it too much to be admitted on the part of professedly Christian believers, that great loss is sustained in Christian communities through perversion of the Truth? Even the learned, who are blind leaders of the blind, undertake to tell of a way they know not; and alas, those who are led by the blind share the same fate as those who see not. If the method resorted to in the conversion of souls is not in accordance with the teachings of the Bible, it is deceptive. "The law of the Lord is perfect—converting the soul."

"When the Lord led his people by a pillar of cloud and a pillar of fire, then was the confirmation given respecting the inward spiritual passover, prefigured by outward signs. In Exodus, it is written "if [the passover] shall be for a sign unto thee upon thine hand, and for a memorial between thine eyes, that the Lord's law may be in thy mouth; for with a strong hand hath the Lord brought thee out of Egypt"—which typifies out of nature—a state of bondage. By numerous passages in the Bible, it is shown that the whole doctrine of the Bible was and is based on the law of the Lord as written on the fleshy tablet of the heart.

Of Jehu, we read that he took no heed to walk in the law of the Lord God of Israel; therefore he was rejected. It is admitted that history repeats itself.

The introduction of music and a paid ministry, together with other observances not in harmony with the teachings of the Saviour, has found place in a Religious Society that practised differently in the time of severe persecution, and prospered in the things of God far beyond what is made manifest in the present day. A false worship may for a time take the place of the true; but the decrees of Heaven forbid that, under the Gospel, such a change should take place, as has taken place. Let inquirers after Truth seek wisdom from above for a right understanding of the written Word, and thus be able to interpret spiritual Truth aright.

"Salvation is of the Lord." The Church, by its discipline, has no right to confer membership to such as claim conversion of soul without some matured experience. The Prophet Elijah said to a large number assembled for the purpose of making trial between the false and true

regarding worship: "How long halt ye between two opinions? If the Lord be God, follow Him; but if Baal, then follow him." The people were told to call on the name of their gods, and "If," said the prophet, "will call on the name of the Lord; and the Lord that answereth by fire, let him be God." But in vain did the people call on the name of Baal; there was no voice, nor any that answered. Then Elijah mocked and said, "Cry aloud, and they did so; but there was no voice, neither any to answer." Then, at the time of the offering of the evening sacrifice, Elijah drew near and said, "Lord God of Abraham, Isaac, and of Israel, let it be known this day, that thou art God in Israel, and that I am thy servant, and that I have done all these things at thy word."—The fire then fell from Heaven and consumed the burnt sacrifice and licked up the water in the trench.—"and when all the people saw it, they fell on their faces and said, the Lord he is God!"

P. R. GIFFORD.

PROVIDENCE, Fifth Mo. 4th, 1890.

FOR "THE FRIEND."

The Study of the Dandelion.

The student of botany who lives in the country and who is so situated as to have frequent access to the same locality, will find it interesting and instructive to watch the gradual development of a plant, the unfolding of its leaves and flowers, and the formation of the fruit or seed-vessel which succeeds the bloom. Some plants are so abundant, and develop so gradually, that one can find specimens during the same excursion in all the different stages of growth. This is the case with the common Dandelion (*Taraxacum Dens-leonis*). It belongs to the immense family of *Compositae*—composite family—in which numerous florets are placed on a common receptacle and surrounded by a common set of floral leaves.

Very early in the spring the leaves of the Dandelion may be found in lawns and grass fields, lying on the ground, as they all spring directly from the root, without the intervention of a stem to raise them from the earth. Leaves which grow in this way are termed by botanists *radical*, because they start from the root (*radix*). The leaves of the Dandelion are deeply indented on the sides, so as to have tooth-like projections. From a fancied resemblance of these to the teeth of a lion, it derives its common name—which is supposed to be a corruption of the French of the *Dent-de-Lion* (lion's teeth). These leaves are often gathered for a salad in the spring, and some persons are very fond of them. They are considered to be slightly medicinal. The root-stock is extensively used in medicine, in liver-complaints. Extract of taraxacum is a favorite remedy with some.

The plant is extensively diffused over Europe, Central Asia, North America, and the Arctic regions. There appears to be but one species of it, although it varies somewhat with the locality in which it grows.

The large, bright-yellow flower, which opens close to the ground, is very beautiful, especially as it contrasts with the greenness of the surrounding herbage. The hollow flower-stem which supports it gradually lengthens, and thus raises it eight or ten inches into the air. Soon the flower begins to contract, the inner row of the floral leaves, or bracts, closing together. If one which still retains its yellow color is opened and examined, the student will find that each floret terminates at its base in an immature seed. These are closely crowded on the enlarged

summit of the flower-stem, and each is surrounded by a cluster of soft, white, silky hairs.

Let him then select a head which is somewhat older, and from which the yellow color has disappeared, and he will find the seeds enlarged and changing color—each one furnished with a long slender beak, on the top of which is the cluster of hairs that before crowned the immature seed. In a few days more, the expanded top of the stem will begin to turn downward, reversing the position of the bracts, or floral leaves. At the same time, the clusters of hairs that crown the seeds will open out like the ribs of an umbrella or the spokes of a wheel, and the whole head will be converted into one of those globular masses of seeds and their appendages, with which we are so familiar. The seeds are easily detached from the receptacle on which they are seated, and a slight puff of wind is sufficient to send them sailing over the field, supported by the parachute which nature has provided for them.

A single head of a Dandelion will contain from 150 to 200 seeds; and when we consider that oftentimes fifteen or more heads spring in the course of a season from a single root, it is not difficult to understand why this plant should be so abundantly distributed over the country.

I have selected the dandelion as a familiar example, which most students can have the opportunity of watching in its various stages. A plant which has been thus thoroughly studied, will be a familiar friend in every form in which it appears; and by thus watching the growth and the different forms which plants assume as they progress from the young seedling to maturity, much valuable and interesting knowledge may be gained, and a clearer insight into the processes of vegetable life.

Natural History, Science, &c.

Astronomical Researches.—The Harvard University Astronomical Commission sent to South America, is meeting with encouraging results and much favor. Some interesting and cheering information in regard to it, are conveyed in a published report addressed by the secretary to the American Minister at Santiago, who has communicated it to the Government of Chili. It is about a year since it started upon its mission, and has been operating principally in Peru and Chili. "The operations were confined mainly to the boreal sky, though some of them were extended as far as the thirtieth degree." A summit of a mountain, 6,550 feet high, in Peru, was reached. Here a station was erected, and the name of "Mount Harvard" given to it. Observations were made from time to time. Within four months over 1200 photographs were obtained by the telescope, and more than 2600 measures of stars taken by the "meridian photometer." After this, most of the party went in search of another point of observation, but found great difficulty in finding a locality free from mists, having an open horizon, and within easy access to the coast by railroad. At length they discovered a suitable spot on the Desert of Atacama, Central Pampa, where, "at an elevation of 1382 kilometres from Antofagasta," they established a station. Out of the succeeding twenty-three nights, twenty were very favorable for operations, seventeen of them being perfectly clear. In this section of Chili cloudiness or mistiness is scarcely known. Wherever the expedition has gone throughout either Peru or Chili, special kindness and attention have been received. Both officials and private citi-

zens have shown commendable interest in its success, and have rendered it aid in various ways. Its "instruments were admitted free of duties," while a number of railroads granted a gratuitous use of their lines." It is gratifying to note this friendly recognition and cordial co-operation on the part of the Peruvian and Chilean governments and people in an American enterprise.—*Presbyterianian*.

Uranium.—The rare metal, uranium, a lode of which was discovered in a Cornwall (Eng.) mine recently, has been developed, and is believed to be extremely valuable. Hitherto the only source of uranium has been in isolated pockets and patches. The Cornwall works expect to turn out about half a ton of metal per week. Owing to its great scarcity, the market price has been about \$2,000 per ton. It is thought that it will be highly valuable to electrical engineers.

Protecting Buffalo.—In his annual message to the Legislature for 1890, Governor Francis E. Warren, of Wyoming Territory, recommended the passage of a bill absolutely forbidding the killing of buffalo within the Territory. We are glad to learn that this recommendation has been acted on, and that the Legislature, just adjourned, has passed a bill prohibiting the killing of any buffalo in the Territory for ten years. This is a matter in which all the inhabitants of Wyoming ought to take an interest; for scarcely anywhere in the United States, except within her borders, are any wild buffalo to be found.—*Forest and Stream*.

A Spider Fishing.—The physical powers of the popular running, ground, or wolf-spiders, are well illustrated by an instance recorded in the proceedings of the Academy of Natural Sciences of Philadelphia. The result as reported was achieved by pure strength and activity, without any of the mechanical advantages of a snare. — Spring, while walking with a friend in a swampy wood, which was pierced by a dike three feet wide, was attracted by the extraordinary movements of a large black spider in the middle of a ditch. Closer examination showed that the creature had caught a fish! She had fastened upon it with a deadly grip just on the forward side, of the dorsal fin and the poor fish was swimming round and round slowly, or twisting its body as if in pain. The head of its black enemy was sometimes almost pulled under water, but the strength of the fish would not permit an entire submersion. It moved its fins as if exhausted, and often rested. Finally it swam under a floating leaf near the shore, and made a vain effort to dislodge the spider by scraping against the under side of the leaf.

The two had now closely approached the bank. Suddenly the long black legs of the spider emerged from the water, and the hinder ones reached out and fastened upon the irregularities of the sides of the ditch. The spider commenced tugging at his prize in order to land it. The observer ran to the nearest house for a wide-mouthed bottle, leaving his friend to watch the struggle. During an interval of six or eight minutes' absence, the spider had drawn the fish entirely out of the water; then, both creatures had fallen in again, the bank being nearly perpendicular. There followed a great struggle, and, on Spring's return, the fish was already hoisted, head first, more than half its length upon the land. It was very much exhausted, hardly making any movement, and was being slowly and steadily drawn up by the spider, who had evidently gained the victory.—*Popular Science Monthly*.

Items.

Tract Association of Friends of Philadelphia.—The Report of the Managers for the year ending Third Mo. 1st, 1890, show a distribution of 113,479, as well as of many of the Juvenile Books and other publications issued by the Association.

The work of revising the text and renewing the plates of the older tracts was continued, 16 of them having been re-issued. Seven new tracts were added to the list during the year—from No. 171 to 177 inclusive. The first of these contains instances of women's preaching from the Apostles' days to the present time. These new tracts are very lively and interesting and form a valuable addition to the series.

The Managers speak of a want that has been felt for many years of more reading matter suitable for small children and young people. Their own time seems to be fully occupied with the matter in hand. This seems to be a call for help to those Friends who are qualified to help in the preparation of material adapted to the class referred to.

Self-inflicted Torture.—The pastor of a Methodist Episcopal Church at Paton, in New Mexico, has published in *The Christian Advocate*, of New York, an account of a sect among the Catholic Mexicans of that district, who grievously torture their bodies by means of burning themselves with whips made of a species of Cactus, whose leaves are very sharp and lacerate the flesh fearfully.

At the exhibition which he witnessed, the penitents wore a pair of white cotton drawers, but were naked from their waists upwards. They walked in a stooping position, and threw the lash upward and backward upon the necked back, first over one shoulder then the other. The first blow starts the blood, and as the process is continued, the back soon becomes denuded of skin.

The Archbishop of New Mexico has lately forbidden the penitents from lashing themselves—so it is to be hoped that these exhibitions of superstitious barbarity will ere long be numbered among the things that have ceased to exist.

Worship of Music and Art.—The *Presbyterianian* says: "In the Easter observances in our own and other churches according to the description in both secular and religious journals, much account has been made of the floral decorations and musical programmes. These have been described as elaborate and brilliant. Sometimes the sermons were spoken of as appropriate; but were generally treated as a subordinate or incidental affair. Besides the flowers and music, the dresses were mentioned as an attractive feature. Others spoke of the handsome displays drawing large audiences. The idea of worship and praise was given but little prominence. No doubt many of the godly worshippers honored and adored Christ for his resurrection, but if we may judge by the curious crowds which gathered about the ornamental sanctuaries and which sang the praises of the fine decorations and showy congregations and artistic performances there was much worship of flowers and art as of our Lord."

The Opium Traffic in China.—The opium traffic in China is a hindrance to Christian civilization and a tremendous hindrance to the spread of the Gospel. Our missionaries feel that something must be done for its speedy destruction. Some are sanguine that it can be brought about in the near future. The Chinese Christians of Canton are greatly stirred over the matter, and have sent out a moving appeal to the brethren in Great Britain, and the poor "churches, pastors and teachers" to bring their influence to bear upon Parliament to prevent English merchants from importing the vile drug into China. They show the debasing effects of the trade upon the Chinese. It extends to all the cities and villages. Its sales amounts to more than \$50,000,000 annually. By the trade in Great Britain, and the poor "to sell their children," while wealth is dissipated. "Scholars, agriculturists, artisans and merchants" alike become victims of opium. All who indulge the habit become "weak, inefficient and indolent." Through its use "every form of handicraft deteriorates; business suffers; and time is squandered." The people, by its use, are comparatively sound and healthy; but this course soon

reduces them "to mere skeletons, and they can neither eat nor sleep with comfort. This physical deterioration is transmitted to their children and grandchildren." "Their self-respect," "their 'dishonest means' are resorted to to gain a livelihood," "the character and manners of the people are destroyed. After rehearsing these and other evils the address uses this pointed and telling language:—"Your people come to preach the doctrines of the Gospel, which are indeed the truth, and your real desire is to lead many to believe; but those who do not think they that opium and the Gospel have come together from England, and the doubt arises and finds expression in words that the Gospel is false. Your missionaries come with the real desire to benefit the people, but those who see them maliciously declare that opium and missionaries are alike English productions, and they suspect the missionaries of secretly doing evil. Moreover, the Church opens free schools, and although they are meant to benefit the youth, yet it is impossible to stop the mouths of those who are not taught, while opium remains unforbidden. The Church has opened hospitals, but, although they are saving men from disease, it is impossible to influence the hearts of those who have not been healed, while opium remains unforbidden. Your Christians, with singleness of heart, are zealous in many good works, but while opium remains they are all like so much water poured out. It is said by some that the Chinese are fond of opium and the calamities they suffer are of their own making, and the English have nothing to do with it. The New Testament says: 'Have no fellowship with evil.'" Now when your government, plant and sells opium to minister to the evil propensities of the Chinese, you are partakers with them, and what can you say in excuse thereof?" This earnest plea is signed in behalf of 200 native communicants of the London Mission, 700 of the English Wesleyan Mission, 350 of the Berlin Mission, 470 of the Baptist Mission, 600 of the Presbyterian Mission, and ten of the American Sanitarian Mission. All unite in entreating Christian England to lift from heathen China the terrible iniquity forced upon her, and in this way to advance the cause of God. For this blessing they "pray and reverently wait."—*Exchange.*

THE FRIEND.

FIFTH MONTH 24, 1890.

We have received from the author, Thomas Andreasen, of Cardiff, a small pamphlet on the state of the Society of Friends at the present day. It is called *The Famine*—probably because the writer thinks there is in the Society somewhat of a famine of the living power and presence of the Lord, growing out of a too general refusal to wait upon and submit to, and be guided by the manifestations of his grace.

Much of it is occupied with extracts from two remarkable communications of former days: One, a sermon preached by Samuel Fothergill, at a meeting at Southwark, in 1769, in which that eminent minister quoted the striking passage from Joel: "Blow the trumpet in Zion, sanctify a fast, call a solemn assembly," etc.—"Let the priests, the ministers of the Lord, weep between the porch and the altar; and let them say, Spare thy people, O Lord! and give not thy heritage to reproach."

This sermon has often been re-printed, and is a noble specimen of faithful warning mingled with loving exhortation.

The other communication was that remarkable one delivered by Sarah (Lynes) Grubb, in 1836, in the Men's Yearly Meeting, at London. In this she spoke of those who study the Scriptures by the strength of their rational and intellectual faculties; and there stop: "You refuse to come

unto Christ, in his inward and spiritual appearance; you will not hear his voice speaking in your hearts, and are therefore rejecting Him." In strong language she declared, that the building, comparable to the tower of Babel, which some of the leaders among Friends were erecting, would crumble to pieces.

The concern felt by T. Andreasen seems to arise from the belief that some of our members have been deceived, and have entered upon religious work without being sent by the Spirit of the Lord, and so have become Babel builders, instead of doing the will of the Lord.

We have no acquaintance with the author of the pamphlet and but little knowledge of him; but we believe the sentiment is correct which he endeavors to inculcate, and which was expressed by William Penn in his preface to George Fox's Journal: "Nothing can quicken or make people alive to God, but the life of God; and it must be a ministry in and from life, that enlightens any people to God."

The *Western Friend*, for the Fourth Month, which has just been received, contains the following editorial, announcing the proposed discontinuance of the paper:

The *Western Friend* was first published in the Eleventh Month, 1879, more than ten years ago. It was begun with a hope that it might be instrumental in bringing the scattered fragments of Friends into closer relationship to each other. The completion of the circle of Correspondence last year, between the Yearly Meetings of New England, Ohio, Canada, Western, Iowa and Kansas, was the realization of this hope. No effort has been spared, or opportunity neglected, during its publication, to expose the dangerous doctrines and innovations of Friends in the past, and to bring out in full view the union of the smaller bodies now realized; and the testimony against unsound doctrines and practices kept before those who, in their hearts, know them to be not of the truth, until we feel that our responsibility to such as these has been fully discharged; the reasons, and the sense of duty, for publishing the *Western Friend* have, in a large measure, passed away; and the time has come to cease its publication.

Its publication has been a most arduous labor for its editor and his family, and they feel that the time has come to be released from it. The attachments, the friendships, the love and sympathy for Friends in all parts of the world, which have grown up during the past ten years, and which we love to review before the parting, as this, our last editorial, has been prepared, and the feeling of sorrow and regret at the parting has been so great that, like Paul to Philippi and Corinth, it is spoken in "weeping and in tears." We sincerely desire that all our Friends who read this, may feel the touch of this love wherever we have loved them, and have loved the truth before the parting, and the hour of parting has come; you will "see our face no more." With a prayer for all our readers, that the "God of all grace" may "make you perfect, stablish, strengthen, settle you" in the truth, and commending us all to "God who will supply all our needs, according to his riches in glory by Jesus Christ," we say Farewell.

We can sympathize with the editor and publisher, in the feeling of sorrow with which he quits a field of service in which his heart has evidently gone along with his work.

While the tone of its editorials has at times been more sharp and unsparring than we have felt it best adopt in the conduct of *THE FRIEND*, yet we have looked upon the *Western Friend* as an efficient co-laborer in the support of the principles of the Society of Friends, and as probably well adapted to the needs of the classes whom it sought to awaken to a sense of the departures from sound doctrines and prac-

tices which have spread over many parts of our Society. The Preacher says, "There is a time for every purpose under heaven." "A time to keep silence, and a time to speak." And as our friend, Cyrus W. Harvey, feels relieved of the responsibility that has heretofore rested upon him, we cannot find fault with his decision. We desire for him, that in whatever time of service in Christ's cause he may be engaged, the Head of the Church may be with him and cause a blessing to rest on his labors.

SUMMARY OF EVENTS.

UNITED STATES.—The Senate Committee on Commerce, on the 14th instant, ordered a favorable report upon the bill to incorporate an organization to build a bridge over the Hudson River between Jersey City and New York. The plan of the bridge is that submitted by Gustav Lindenthal, which will cost about \$40,000,000 to complete. A minority of the committee report against the bill, on the ground that Congress has no right to charter an organization for that purpose.

On the 19th instant the United States Supreme Court decided a question of vital interest, and adverse to the Mormons. An opinion was rendered in the suit of the Church of "Latter Day Saints" against the U. States, which was brought from the Supreme Court of the State of Utah in favor of the United States. The judgment of the Supreme Court of Utah was affirmed. The suit was to have the Edmunds law declared unconstitutional.

The first arrest was made in San Francisco on the 13th inst, under a city ordinance requiring the removal of all the Chinese to a district on the outskirts of the city. Shortly after the arrest, the Consul, on behalf of the prisoner, applied to the United States Circuit Court for a writ of habeas corpus, setting forth that the prisoner was a native born citizen of the State of China. The writ was granted and the prisoner was released on bail. Argument will be heard in the United States Circuit Court on the 14th of Seventh Month.

The Louisiana Lottery Company has offered the State of Louisiana \$1,000,000 per annum for the privilege of maintaining a lottery. The Governor of the State is inflexibly opposed, but the influential New Orleans *Times-Democrat* favors it, and after calling attention to the great work done by the Charity Hospital, at which the Louisiana Lottery Company has been a contributor, states that this gambling concern, has offered to pay \$5,750,000 for levees, which are much needed, to provide completely for the maintenance of the Charity Hospital, of the State Insane and Deaf and Dumb Asylums, and to furnish New Orleans with \$2,500,000 for a permanent drainage system. The lottery is said to take in \$10,000,000 a year.

James Maguire, respondent in the "original package" case, in Bangor, Maine, has been fined \$100 and costs, or 30 days in jail, if he held that he was amenable to state laws. He appealed the case to the Supreme Court.

Ex-Governor Robinson, who has been employed by a syndicate of unlicensed liquor dealers in Hy-lycke, Massachusetts, to look up the constitutionality of the "original package" law, has handed his opinion to his British clients. He holds that the selling of liquor in original packages is legal. He says the local authorities may seize the "stuff," the lower court convict, and an appeal be made to the superior Court, which will probably sustain the lower court, but when taken to the supreme Court, there is no questioning that such decisions will be overruled. Acting on this advice some ten Hy-lycke dealers will make a test case.

A test case to determine the full extent of the "original package" decision has been started in Lewiston, Iowa. It is entitled *State of Iowa vs. Perry* and *State of Iowa vs. Perry*. The defendant, who is a resident of the State of Iowa, admitted that he kept the liquor in quantity for the purpose of sale by the bottle, the glass or in such quantities as his patrons might desire, but denied, under the recent decision by the Supreme Court of the United States, that he was a retailer of liquor and not a wholesaler. The Court, after hearing the argument of counsel, took the matter under advisement, and decided that the defendant had no right to sell except in the original packages in which the liquor was imported; that the liquor in case where it was sold in original packages was not to be ordered to be forfeited. An appeal was taken to the District Court.

A telegram from Topeka, Kansas, says, "that for the first time in five years intoxicating liquors are being sold openly in that city. Charles Bahrer, agent for a leading wholesale Kansas City liquor house, on Friday opened up an 'original package' shop on Kansas Avenue, the principal street in the city. The stock consisted of a carload of beer in cases, containing 24 bottles each. Before evening the entire stock had been disposed of. Nothing less than a case was sold in any instance. The unusual sight of the sale of intoxicating liquors attracted many people to the 'original package' shop and the sidewalk in front of the place was crowded all day by people who were curious to see how it was done. Bahrer says that 'he has no fear of the State law, and will hereafter deal in original packages of whiskey and wine as well as beer.'"

Natural gas was struck in great quantities in Pulaski, New York, and the metal in the bed of iron piping was blown out of the well, and the derrick and machinery destroyed. The noise of escaping gas woke up all the villagers at midnight. Salt water was spouted out of the well to a great height.

A telegram from Prescott, Arizona, says the greatest achievement yet made in heliographing was accomplished during practice in that department on the 16th inst., by Lieutenant Wittenmeyer, who signalled a message by a single flash 125 miles, from Mount Reno, near Fort McDowell, to Mount Graham, near Fort Huachuca, Arizona. The latter, by turning his instrument, flashed the message to Fort Huachuca, a distance of 90 miles, making a distance of 215 miles, with a single intervening station. The longest distance heretofore made with a signal flash is said to be about 70 miles.

The Free-traders' assembly met in session at Saratoga, New York, on the 15th inst. It is stated that 123 Presbyteries had favored the proposed revision of the Confession of Faith, 66 had opposed, 7 had declined to act, and 8 had not voted. The subject was considered a second time, and on the 19th inst. was re-committed to the committee enlarged by the addition of seven more members.

Myriads of worms, resembling the army worm, are making their appearance in the southern and eastern parts of Lancaster County, Pa., and are ravaging the ground.

On the morning of the 15th inst., a cave in at Ashley, Pa., entombed twenty-eight miners in the Hartford mine of the Lehigh and Wilkesbarre Coal Company. Three of the men were rescued, but so badly burned as to give little hope of their recovery. Twenty-seven dead bodies had been recovered to the 20th inst.

Deaths in this city last week numbered 375, 8 more than during the preceding week, and 45 less than during the corresponding period last year. Of the foregoing 187 were males and 188 females; 49 died of consumption; 15 of pneumonia; 24 of disease of the heart; 15 of inflammation of the stomach and bowels; 14 of cancer; 14 of insanity; 13 of marasmus; 12 of inflammation of the brain; 11 of paralysis; 11 old age; 10 of convulsions and 10 from casualties.

MARKETS.—U. S. 4½; 102½; coupon, 103½; 4½, 122½; currency 6½, 116 2/3.

COTTON was quiet and steady at 123 1/2 cts. per lb. for middling uplands.

FEED.—Winter bran, price, \$16.00; do, fair to prime, \$15.50—\$15.85; spring bran, \$15.00 a \$15.25. No. 1 Pennsylvania, \$25.00; do, \$25.50 a \$25.75; do, extras, \$30.00 a \$35.00; No. 2 winter family, \$35.00 a \$38.00; Pennsylvania family, roller process, \$37.50 a \$45.00; Western winter, clear, \$4.10 a \$4.50; do, straight, \$4.50 a \$4.85; winter patent, \$4.50; do, extras, \$5.00; do, straight, \$4.00 a \$4.25; do, straight, \$4.50 a \$5.10; do, straight, \$3.00 a \$3.50; do, fair to better, higher. Eye flour was scarce and firmer: 100 barrels choice sold at \$32.25 a \$33.20 per barrel.

GRAIN.—No. 2 red wheat, 93 a 94 cts.
No. 2 white do, 41 1/2 a 42 cts.

BEEF CATTLE.—Extra, 5 a 5 1/2 cts.; good, 4 1/2 a 4 3/4 cts.; medium, 4 1/4 a 4 1/2 cts.; fair, 4 1/4 a 4 1/2 cts.; common, 4 a 4 1/4 cts.; culls, 3 1/2 a 3 3/4 cts.

SHEEP.—Extra, 3 1/2 a 3 1/2 cts.; good, 5 a 5 1/2 cts.; medium, 4 1/2 a 4 3/4 cts.; common, 3 1/2 a 4 1/2 cts.; culls, 3 a 3 1/2 cts.

LAMBS.—Spring lambs were in fair demand at 6 a 9 cts.

HOGS were in fair demand at 6 a 6 1/2 cts. for Western. "GREENBACKS" To consummate or to consummate the publicans," has become the great question of British politics. In his recent speech, introductory to the Budget, Goschen, the Chancellor of the Exchequer,

spoke in great detail and with unusual earnestness upon the remarkable increase of the drinking habit in England, and stated that, in order to check it, an increased tax would be imposed upon intoxicating liquors.

A bill to carry out this view was introduced into Parliament, and, on its second reading, the Government had a majority of 73 votes. Very few new bills are usual. Among those who voted against it, however, were six Unionists and two Conservatives, but it is said that the success of the measure is not indicated by this vote, as it affords no criterion of the "intensity of the feeling" throughout the country against the compensation proposal.

Since the electorate is fully awaking to the character and scope of the proposed compensation, there has been, it is stated by the London correspondent of the *New York Mail and Express*, a universal outburst of indignation, embracing all social conditions of the respectable community, and focusing in a protest which is about as strong and urgent as anything can be, short of a vote at the polls.

Within the past week, every leading religious body in England has begun a vigorous protest against the Government plan. Wesleyan, Baptist, Congregationalists, and even Roman Catholics are up in arms, and giving voice to their annoyance and hostility. The London City Council has denounced the measure in very positive terms, and throughout the country meetings are organizing to oppose it. Moreover, sheets of letters are being sent to all members of the House of Commons and the Conservative members of the House, day after day, advising them that the policy of compensation is suicidal, and that the Cabinet cannot hope for the endorsement of the country if it persists in this unpopulous and unscrupulous course.

The *Universal Review*, of London, publishes an address to the Czar, remonstrating against the outrages upon Russian exiles in Siberia. The remonstrance is signed by 254 persons, including members of the House of Lords and House of Commons, literateurs, artists, and men of distinction. It is signed by about eighty-five of the signers of the remonstrance are also in favor of sending a communication to the Government suggesting the propriety of its addressing the Czar's Government through the usual diplomatic channels, on the subject of the outrages.

The *London Standard* has the idea of transporting negroes from the Southern States to Central Africa. The precise site fixed upon is the Upper Congo forest country, 35,000 square miles in extent. The climate is healthy, abounding in navigable rivers, with hills and valleys to diversify the scenery. It is a fertile country, abounding in game, and is bounded by Arkansas, Mississippi, or Louisiana, without their swamps. Anything might be grown on it, he says.

The Budget Committee of the German Reichstag has approved credits amounting to 4,500,000 marks on account of German operations in East Africa. Of this amount the sum 2,500,000 marks will be devoted to paying a subsidy to the East African Steamship Company, the vessels of whose lines ply between Hamburg and Bremen and various ports on the coast of Africa. During the debates on the credits it was announced on the part of the Government, that there was no truth in the reports that it had decided to abandon the steamship service to Samoa.

The London correspondent of the *New York Tribune* says with regard to Count Von Moltke's speech in the Reichstag, on the 14th inst., "It is more important than any speech on the subject that we have heard. So deep is the impression which this discourse has made, that it may be said it will not do less to preserve the peace of Europe than all the new legions which Germany is preparing for. Count von Moltke has dispelled, once for all, the delusion that the next war will be a European one. He has shown to the world, he tells the world, 'are armed as they never have been armed before. No one of them can be shattered in one or two campaigns so completely as to confess itself beaten, and to conclude peace on hard terms, or not to recover in a year or two, and then to rise again.' It may be a seven-years' war; it may be a thirty-years' war. Wee it him who sets fire to Europe?"

Much comment is aroused in Bremen by the Emperor's speech at Konigsberg, on the 13th inst., in which he quoted the Emperor William I. to proclaim before the world his friendship by the grace of God, and his kingship by the grace of God expresses that we Hohenzollerns accept our crown only from heaven, and are responsible to heaven alone for the performance of our duties." The Emperor added: "I, too, an animated Christian idea and am determined to assert this principle."

Rio Janeiro Fifth Mo. 16th.—It is officially announced

that the new Constitution will be promulgated by decree, and afterwards will be submitted to the Assembly for ratification.

At 11 o'clock on the night of the 18th inst., a fire broke out in a hardware store in Havana, Cuba. In a short time the flames reached a barrel of gunpowder in the building, and a terrible explosion followed. The whole structure was blown to pieces and thirty-four persons were killed.

NOTICES.

CORRECTION.—The lines headed "Passing Away" and "The Empty Chair," published a few weeks since in *THE FRIEND*, and credited to Edward Allen, were written by Ephraim Allen.

WANTED.—A competent teacher to fill one of the positions in the Primary Department of Friends' School. To enter upon duty Ninth Mo. 15th.

Apply to ANNA W. LEPPINCOTT, 460 North Seventh St., Philadelphia; or MARY M. LEEDS, 3216 North Sixteenth St., Phila.

WANTED.—A teacher to fill the position of Principal in Airmwell School. To enter on duty Ninth Month 1st, 1890.

Apply to SARAH S. CARTER, Moorestown, Burlington Co., N. J.; or JAMES H. WETTERELL, 3435 Lancaster Ave., Philadelphia.

A teacher of experience, acquainted with "Unity Methods," and modes of instruction now generally approved, desires a position in Primary Department of a Friends' School. She could enter upon duties at any time in Ninth Month.

Address E. B. M., Germantown, Philadelphia.

Pleasant 2nd-story rooms, with good table-board, can be had at moderate rates in a Friend's family.

Address, N Box 164, Media, Pa.

PLEASE READ.—Acknowledging the receipt of donations from these Friends, amounting to twenty-five dollars, for the school for the children of poor Friends in N. C., mentioned in *THE FRIEND* of Fifth Mo. 10th, I would kindly ask from others who have it to spare, what will make up to two hundred dollars. The circumstances appeal strongly to Friends for their aid. Geo. W. Taylor, 3728 Hamilton St., Phila.

An assortment of Ashworth Tracts; also "Words of Comfort," and Temperance publications, such as "Buy Your Own Cherries," "Tables Turned," and "No Another Drop, Daniel!" are now on hand at 116 N. Fourth St., and may be obtained gratuitously by applying to JOHN S. STOKES, at that address.

FOR RENT.—A Friend in West Chester, Pa., having more house-room than is needed, desires to rent for the summer, furnished, all of a new house, excepting two rooms.—Pleasantly situated.
Apply at No. 423 West Miner St.

WANTED.—A Teacher for the Haverford Primary School, to enter upon duty Ninth Month 15th.
Apply to HENRY B. GARDNER, Haverford College, Pa.

A few boarders can be accommodated in a Friend's family at No. 450 North Fifth Street, Phila.
Fifth Mo. 1st, 1890. E. SHARPLESS.

MARRIED, Fifth Month 14th, 1890, at Friends' Meeting-house, New Garden, Chester County, Penna., PENNOCK COOPER, son of Horatio G. and Elizabeth H. Cooper, to DEBORAH P. CHAMBERS, daughter of Joseph P. and Jael C. Chambers.

DIED, at his residence, Salem, N. J., Third Month 17th, 1890, RICHARD M. ACTON, in the 51st year of his age, an esteemed member of Salem Monthly Meeting of Friends, New Jersey. His kind and genial disposition, and his upright consistent course through a long life of usefulness, had endeared him to a large circle of friends. He had long felt the importance of having his thoughts and affections centered on Heavenly things, and not on those of the earth. His sufferings, though at times severe, were borne with Christian patience and resignation; and we reverently believe he has gone to join the just of all generations.

Incidents and Reflections.—No. 225.

PERSONAL INFLUENCE.

The Journal of Commerce, sometime ago, published a pleasant illustration of the exercise of personal influence by a child over a parent, which was greatly beneficial in its effects. Its narrative says:—

David Williams was a Welsh mechanic, many years in this country, a great respecter of folklore and homely superstitions, a little easy-going in his industrial habits, and altogether fond of what is known in the internal revenue law as "distilled spirits." His wife, Jane, whose father was a countryman of her husband, inherited from her Scotch mother a stern and uncompromising intolerance of any thing approaching to shiftlessness, and a sharp way of using her tongue that was apt to leave a little sting in her speech. David had his dreams and omens, and would stay away from his work whole hours in the morning, when warned by either of these that that day was not suited to industry. The interval was not passed, however, at home, but in the neighboring saloon, where much of his hard earnings were worse than wasted over the too familiar bar.

If Jane had been tender and winning she might have done more than she did, perhaps, to correct this vice in her husband, but her stinging rebuke and angry prodding only made the matter worse. David was a rare workman, and before he indulged so freely had come to be foreman in one room of the shop where he was employed; but this evil habit made it only a question of time when he would lose that promotion. One night he had seen in his slumbers a snake and a goose together, and the union was too foreboding for his philosophy; so the next morning he went to the saloon instead of the shop. His wife suspected this, and, with her usual resolution, she put on her bonnet and shawl and followed to the liquor-seller's in search of him. When she found him, glass in hand and not a little inebriated, she berated both him and the saloon-keeper sorely. To escape her bitter speech poor David fled to the shop. He was in no condition to work, and as soon as he made his ill-advised appearance his doom was sealed. The senior of Piper & Co. had seen him staggering in, and,

calling him to the counting house, told him in plain terms that a man who had no control of himself was not fit to control others, and he was therefore discharged on the spot.

The wife secretly blamed herself somewhat for this result of her morning raid on the saloon, and succeeded in having her husband accepted as a common workman, but under a new foreman. David's spirit chafed at this, and his visits to the saloon were more and more frequent. The wife would try to control his earnings, but when he had no money he would get the liquor on credit, and altogether his affairs were growing worse and worse. Just here we will introduce to our readers a sweet thoughtful face, very pale, but with a winsome look about the mouth and in the dark blue eyes, as we saw it framed in the window of that cottage home. She was the only child of the house—called Janie after her mother—and had then a slight, thin form for a girl of eleven years.

What she had done or essayed to do to stay her father's downward course up to this time we cannot say, for we never knew her before this sad hour, when her mother lay dead after only a few hours' illness, and she was at the window watching for his returning footsteps. He was not himself when he came in, but she led him up to the bed and the sight of the lifeless face on the pillow quite sobered him. After the funeral he would go to work, and asked Janie, who was now his little house-keeper, to put up his dinner for him. "I will bring it to you," was her quiet answer. He looked inquiringly into the dark blue eyes fixed on his face, and he saw all that was meant in this quiet answer. She knew how he had spent his "noonings," and as far as she could help it, there was to be no more of such miserable waste.

When he was ready to go she had her little hat in her hand, too, and to his question, "Where to now, lassie?" she pleaded in answer, "Let me go with you, father, to the shop?" He could not say her nay, but as they neared the saloon where he always took his morning dram, David paused a moment and said, "Run on, Janie, and I will overtake you at the corner," to which the little girl, clasping his rough brown hands tightly with both hers, and twining the wee fingers around his, replied lovingly, "We are all alone in the world now, papa; don't go anywhere you would be ashamed to have me go with you!" He took a step or two onward and said, irresolutely, "I am afraid I can't go by, I am so used to going in." But she would not yield, and only answered, "Hold harder to my hand and don't mind it; it will be ever so much easier next time!"

She saw him safely into the shop, and when the dinner hour came, if he had cherished a thought of a noon visit to the old haunt, it was too late, for she was at the door of the work-room waiting for him. How deftly she set out in the shady nook selected for the occasion the little array of nice things she had brought him. And as he eat, she took out of her pocket the Sunday-school paper she had brought with her,

the only literature up in which she could lay her hands at home, and read from the little slabs printed for the children. He seemed to be a child once more, learning lessons and hearing Bible histories at his mother's knee, and the termination seemed all too short when the bell summoned him again to his work.

He was not surprised, we think, to see her again at the door when evening came, it was easier as she had said, to go by the saloon than it had been in the morning. After supper he insisted on taking hold to help the washing of the dishes and putting away the things; and thus she brought out the Bible given him by his mother, which he had not opened for many years. The bedtime came before he was ready for it and after his head was on the pillow he went back a long way in memory to search for a pleasant evening that would parallel the one then closed.

Every day the little hand was put in his for the walk to the shop. Each noon came the faithful girl with the dinner, but they had more money now, and she brought the morning newspaper to read to him. And he never missed those loving eyes watching for him at the door when his day's tasks were done. After a few weeks he said one day, "Janie, dear, I can go by the saloon now, without your guiding hand, if you are tired of the walk." To which she answered simply, "But I so love to go with you, papa!" and he urged her no more.

When twelve months had gone by since David led the foremanship, a new foreman was to be appointed. Piper & Co. supposed that he would apply for the place, but he did not. They had watched the little maiden in all her saintly work, and so they called her in one day and asked her about her father's habits. "He has not tasted a drop of liquor since my mother's death," she answered. "But how do you keep him away from the saloon?" they asked. "He holds my hand," was all she said, and they restored him to the old place. We will not say how long ago that was, nor how tall and shapely now is the form that was so slight when we first saw her at the window. Her mission work is not yet ended; what the future has in store for her we cannot say, but she is still the Guardian Angel of a life that but for such loving ministry, would have long ago gone out in midnight gloom.

A gentleman was once lecturing in the neighborhood of London. In the course of his address he said, "All have influence. Do not say that you have none: every one has some influence." There was a rough man at the other end of the room, with a little girl in his arms. "Everybody has influence, even that little child," said the lecturer, pointing to her. "That's true, sir," cried the man. "Everybody looked round, of course; but the man said his more, and the lecturer proceeded. At the close the man came up to the gentleman and said, "I beg your pardon, sir, but I could not help speaking. I was a drunkard; but as I did not like to go to the public-house alone, I used to carry this child,

As I came near the public-house one night, hearing a great noise inside, she said, "Don't go, father." "Hold your tongue, child." "Please, father, don't go." "Hold your tongue, I say." Presently I felt a big tear on my cheek. I could not go a step farther. I turned round and went home, and have never been in a public-house since—thank God for it. I am now a happy man, sir, and this little girl has done it all; and when you said that even she had influence I could not help saying, "That's true, sir; all have influence." J. W.

Joshua Evans.

(Continued from page 333.)

1795. Sixth Mo. 2nd.—We are to travel now towards Ferrisburgh, in Vermont; the road is miry. We reached to Vergennes the next day, after a trying journey of near eighty miles, through a rough country, where the people fare hard, and large families lodge in one room. Here I met with kind friends. T. R. and his wife, who came hither to live, from Rhode Island, which to me was comfortable, after a wearisome journey.

4th.—I was at their Preparative Meeting at Ferrisburgh, which was low and trying. The two following days, visited divers families; some of those visits yielded comfort. I was waiting for one who proposes going with me as a guide to Canada.

7th.—On First-day I was at two meetings—one at Ferrisburgh, and the other at Vergennes (which is near Lake Champlain). These were large and seasons of favor. At the last, near all the inhabitants attended, some of whom were priests, doctors, lawyers, judges of the court, etc. To those who were as leaders of the people, I had close doctrine to deliver, in a measure of Truth's authority, which I heard they spake well of. The next day we visited the priest, the doctors, lawyers, and fore rank of these people, to our comfort, and their satisfaction as far as it appeared—although this way of family visiting was strange to them. I had to advise them to endeavor to be as good way-marks, by precept and example, to the beautiful youth who were coming up, as well as to the other inhabitants. Some of these great men were tendered; and one Judge Strong, who I think was a general in the militia, said he wanted more of my company and to be informed of our principles. I lent him Fuller's Catechism, which, he returning the next day, said he liked it well. Whilst at this place, I visited some of the poor in their small cottages, to their comfort; and though the manner of such a visit was strange to them, they blessed me, and said, they wished my journey might be prosperous. Some, I thought, were sincere and honest enquirers, though others might be formal. But the priest appeared to be light-spirited, and unfit for a preacher. I also visited a family of black people, where a number of French men, women and children came in, who seemed to behave solidly.

10th.—From Vergennes I went to Ferrisburgh, in order to be at their Monthly Meeting the next day; which I attended, to some satisfaction. A committee was here appointed to confer with us in relation to our journey farther on, and one of their members kindly gave up to be our pilot.

We having concluded to go by water to St. Johns, had to wait for a boat at Vergennes, and so went thither. Whilst I was there, a person came to inquire of me how it would answer for a Friend to accept a gift of the Government in consequence of having served as a soldier in the

last war, whose service had entitled him to draw a tract of land in the back parts, in addition to what pay he received before. I told him it was not consistent with our principles to accept any gift or compensation for such services done. He queried whether the right might not be assigned to another person. I let him know I should not account myself to have any right to land coming through that channel. He then queried how we reconciled paying duties towards defraying the expenses of war which were laid upon goods imported, etc. My answer (or the reasons hereinafter related), when he heard of my not using such goods, at first seemed strange to him, being a military man; yet he appeared to unite with my answers, and we parted friendly. I had satisfaction in thus bearing my testimony to him. The number of families (chiefly of the upper rank,) which we visited, was about twelve at Vergennes.

14th.—On First-day, before we left the place, we had two meetings—one of them was at the house of our Friend T. Robinson, not far from Vergennes; and the other at a school-house in the town. They were both large; and I believe the Truth had dominion over opposers, of which number I had to believe there were several in this place, not of low rank. With some of these I had dealt plainly; and some I thought could scarcely bear my doctrine; though the most of them seemed well satisfied, and gave me their blessing. Perhaps the priest, whose name was Saunders, was a little fretted, as several of the people supposed he had lost credit. The days we spent here were to my satisfaction, as well as it was to many others.

On the 15th, we went on board a ——— for St. Johns, with my horse and carriage, after taking leave in much near affection of my kind Friends and many others of this town; and being well supplied with provisions for our passage (supposed to be a hundred miles by water). The wind not favoring, we went slowly down the creek, and the captain not thinking best to go out into Lake Champlain that night, came to an anchor near the place where dwelt a few inhabitants; and feeling a draught in my mind to see them come together, there was one on board who was willing to give them notice; so that we had a favored opportunity together that evening. One of them invited me to his house, and showed himself willing to manifest great kindness. It appeared that these people were ignorant of us as a people, and never had been at any of our meetings.

16th.—We went on board again next morning, putting out into the lake, but the wind not favoring, the men got weary of using the oars, and we of the vessel, fearing we were the cause of their difficulty; on pondering the matter, believed it might be best to leave the boat, and try to get on shore again. The captain being told of our proposal, manifested a regard for us, and for our service, so assisted us; and with difficulty (the wind being strong against us), we got to land with our horses. Then, it was so, that we had but one saddle for three of us, and near thirty miles to ride to reach a settlement of Friends, unto which we had now proposed to go. But, going forward, we pretty soon came to a place where a number of families dwelt (though not of our Society), remote from other inhabitants. On-proposing a meeting there, it appeared to be agreeable to the people; and notice thereof being spread, we had one which was solid and satisfactory; after which, we rode about twenty miles to a place called Perue, where our Friends (namely, about ten families),

dwelt—with whom we had a solid opportunity early in the forenoon, and a public meeting afterwards, which was large and satisfactory.

17th.—Remarkable was the kindness of my Divine Master in furnishing me with a capacity on this occasion to administer suitably to the condition of those amongst whom we were; a sense hereof was tenderly expressed by an elderly woman after meeting. We took leave of them in near love, travelled about twenty-five miles, and crossed the lake (about three mile wide), to the Grand Isle—so called.

[Some thoughts had occurred to me respecting endeavors to have a meeting at Plattsburgh; but, as I did not find my mind sufficiently qualified then for such a service amongst strangers, I left it, craving that I might be preserved from running unsest.]

18th.—It being concluded that my companion should take our horses to St. Johns, and that I, with our guide, stay and visit the people up and down the lake—we had two favored meetings: one of which was at the Grand Isle, and the other at Plattsburgh (the way opening more clearly now for that than before). This is a little town about seven miles from the Grand Isle. We went back thither to lodge. My heart was humbled under a thankful sense of the marvellous wisdom of the Lord, in directing our steps, and opening the way to proceed, in a manner human contrivance could not have done. We had a second meeting at the Grand Isle. At the first, rawness appeared among some of the people. One man of some note said, pretty early in the sitting, "he believed the people were mostly come, and I might proceed" (or to this effect). It was then hinted, "Our manner was to endeavor for stillness," thought he was in some measure abashed, and went out a little while; but, coming in again, sat quiet. The last meeting at this place rather exceeded the first.

20th.—After having a solid conference with the few who lived here of our fellow-members, we took leave in near affection, they expressing satisfaction with the visit, as the tears trickled from their eyes. I crave only to love and serve my Saviour, and that I may cause no reproach to his Truth and testimony during the days of my sojourning here.

21st.—From hence we went to a small place in Lake Champlain, called the Isle of Malt, where we had a small meeting, in measure satisfactory. The other was on the mainland, in the afternoon, and but a dull season.

22nd.—We then crossed the lake to Sharsay, on the west side, and had a meeting which, in the main, was solid and satisfactory. Here are two families of our Friends. A man who served as a priest among the people here, while meeting sat, queried if it would be any offence to sing a hymn. He was calmly told, it was not our custom. But the creaturely part in him desiring to be active, he stood up awhile after and mentioned some texts of Scripture, and then sat quiet. I informed them respecting our manner of worship; and, at the proper season, the meeting ended under solemnity. We likewise had a satisfactory season with the few Friends who resided here. I had occasion to think, whilst here, the necessity there is for those who remove to new countries and distant places, to wait for proper clearness, and take suitable advice, and not to be led out from lucrative motives principally. Some of those we found, came from England, and the women especially meet with trials in new places.

(To be continued.)

FOR "THE FRIEND."

Hugh Davids,—Soldier and Quaker.

At the period of the American Revolution, Hugh Davids was a member of Philadelphia Monthly Meeting of Friends for the Northern District. He favored the Royalist cause, and when the British occupied Philadelphia, manifested a disposition to enter the military service on that side. Against this he was repeatedly cautioned and warned by Friends, but he finally accepted a commission in the British army, and when the king's troops evacuated the city, in 1778, he went with them. For his deviation from our religious and well known peaceable principles, he was disowned on the 30th of the Sixth Month of that year.

Thirteen years afterwards Hugh Davids attended the Monthly Meeting, and offered a paper condemning his course in joining in arms with one of the contending parties in the then late war, and expressing his great concern and anxiety for what he had done. His offering was received with much love and tenderness by Friends, and a committee was appointed to visit him.

The following month the committee reported that the case was one of more than usual weight, and that they believed his offering proceeded from a just sense of his deviations and a sincere desire for future preservation in the straight and narrow way which leads to peace. The meeting fully united in accepting the acknowledgment, and records that it was not doubted that as he was preserved in steady attention to the manifestation of the Divine will, his peace would be increased.

It also appears that he had filed with the king's counsel a document by which he surrendered his commission and pay. This paper was as follows:

"I, Hugh Davids, the subscriber, having for some years past held a commission as cornet of horse, under the king of Great Britain, and being now favored through the Lord's mercy to see the inconsistency of war with the Christian religion, have believed it to be required of me, as a religious duty, to give up and surrender the commission I received of the king unto him again; and also all the arrearsages of my pay which may remain due to me at the war-office in London, and likewise some money which I have heretofore received on account of my pay, which I now have in hand, finding I cannot make use of it with peace in my own mind. I do, therefore, by these presents, after due consideration, voluntarily and from conscientious motives freely give up and surrender to the king of Great Britain, all my right and interest in the said commission above mentioned, and likewise all my claim or right in the arrearsages of wages which may appear due to me thereon. And I have also paid into the hands of Phineas Bond the king's consul in this city, one hundred and sixty-five Spanish dollars, which I heretofore received on account of my pay, to be remitted to the proper office from which I received it. I may further certify that I have not acted in this matter from political or disrespectful motives, but from those of a religious and conscientious nature only."

Whilst the foregoing account is chiefly valuable as presenting a remarkable case of attention to conscientious convictions, it is further interesting as tending to disprove the assertion which has been made by some, that Friends in the time of the revolutionary struggle disowned for taking up arms on that occasion, only such as acted with the Colonial forces. Whilst the

sympathies of Friends of that day may have been in great measure with the crown, they were do doubt perfectly impartial in dealing with those who took up arms, regardless of which side they were engaged upon. G. V.

BAYS MAW, Fifth Mo. 19th, 1890.

Peculiarities of Friends.

[In the *British Friend* of Fifth Mo. 1st, we find the following article on the "Peculiarities of Friends," containing information respecting the use of the pronouns "Thou" and "Thee," which, we believe, will be of interest to many of our readers.—EDITOR.]

PLAINNESS OF SPEECH.

The plain language of Friends, like their plain dress, has also been of much use in preserving them from the follies and temptations of the world. The character of Friends as a society is well known, and it is also well known that they regard as wrong a great many actions that people generally look upon as harmless; and so it happens that the mere fact of a person being known as a Friend often prevents him from being tempted to do things which otherwise he would be expected and asked to do. In the same way, a man who is known to be a member of a total abstinence society, will seldom be pressed to drink intoxicating liquor.

Good habits are a safeguard against evil; so are good companions and good associations. It is right for us to form as many good habits as we can, to seek good companions, and to go to places where we shall see and hear what is good. By so doing, we may become peculiar; that is, peculiarly good, and our peculiarities may come to act as a safeguard against other forms of temptation. Not that it is right to become peculiar merely for the sake of distinguishing ourselves. Peculiarity may be, and often is, the consequence of acting rightly, but it is not a worthy motive in itself. Those who have no better reason for their peculiarities than to distinguish themselves, act from a selfish and wrong motive, and so feed their vanity instead of starving it.

The use of the pronouns "thee" and "thou," in ordinary speech, is a peculiarity of Friends; but it is not peculiar to them alone, although, perhaps few people, if any, have, like the Friends, looked upon it as springing from religious principle, and therefore have not attached so much importance to it. But, "probably few people are aware," wrote the foreign correspondent of one of our newspapers a few months ago, "that all members of the Hungarian Parliament must address one another as 'thou.' This rule was promulgated by Francis Deak, who looked upon it as the only way of abolishing caste prejudices in Hungary. One of the Hungarian noblemen got into serious trouble last year through writing a letter to a colleague in which he addressed him as 'you' instead of 'thou.'" You see, that here the Hungarian Parliament are striving to do, from political motives, exactly what the early Friends did from religious motives. In Hungary, and I believe in most countries in Europe, if not in them all, "thee" and "thou" are used only in addressing people of a lower worldly rank, or of familiar friends. This used to be the custom in Great Britain also, and is to some extent even yet, especially in remote country districts. The Highlanders, in speaking Gaelic, make the same distinction, and so do our far-away Shetland countrymen in speaking English. In Brazil they do the same; and I was interested not long ago to read in a letter from that

country, giving a short account of the recently deposed Emperor, that it was the delight of that most civilized of monarchs, to retire for days into the country with one of his favorite ministers, where, in the simplicity of a private gentleman, and free from the cares and ceremonies of state, he loved to wander with his friend through the woods and lanes conversing on things literary, scientific, and social—they all the while "theeing" and "thouing" each other, like very brothers.

Those of you who have read the touching story of Evangeline, as told by the poet Longfellow, will also remember how, in the course of her wanderings in search of her beloved Gabriel, she arrives at

"— that delightful land which is washed by the Delaware's waters:—
Guarding in sylvan shade the name of Penn the apostle."

and that there

— her ear was pleased with the "thee" and "thou" of the Quakers.
For it recalled the past, the old Aesolian country.
Where all the men were equal, and all were brothers and sisters.

Poets have been partial to the use of "thee" and "thou" on account of their literary beauty, purity, and expressiveness. The American author, Dr. F. H. Underwood, who has recently settled in our country, in his biography of the poet Whittier, describes them as "the soft 'thee' and 'thou' for which the speech of the great world has no equivalent." Other writers, such as Carlyle, have used and commended them for their strength and directness; and others, again, like the scholar Erasmus and his friends, at the time of the Revival of Learning in England, at the close of the 15th century, have pleaded for them on account of their grammatical correctness and propriety when addressing a single person. But neither poets, nor philosophers, nor scholars, with all their imagination and wisdom and learning, were able to preserve "thee" and "thou" alive, and it is doubtful whether the whole power of the Hungarian Parliament will have more effect. In our islands the only shelter and protection these beautiful words get are to be found in the language of devotion and the language of Friends. The world has retained them in its religious speech, and our religious Society has retained them in its ordinary speech, so that in both cases it has been the power of religion that has preserved them alive. Happily, in these days, they have lost almost all the contemptuous meaning which they were supposed to have at one time; so that, except in prayer, "thee" and "thou" are seldom heard in ordinary circles of society.

We should not expect to find in our school grammars a note, such as I have seen in an old book of that description, to the effect that the "second personal pronoun" was never used in the singular number except when addressing the *Divine Being* or expressing contemplation. Yet this at one time was actually the case in common society. A striking instance of it is narrated by Thomas Ellwood, in his intensely interesting autobiography. He joined Friends in his youth, very much against the will of his father, who persecuted him sorely for adopting the Quakers' unfashionable and impolite peculiarities, such as refusing to take off his hat in his father's presence, and addressing him as "thou." Poor Tom got all his hats torn off his head by his enraged parent, and had to go about bareheaded; and after his hats were all gone, and it became impossible for him to offend more in that way, he

LIFE'S EVENING.

I see Time's shadow falling
Around Life's pathway now,
I hear a voice still calling
"Change is written on thy brow."

I see Death's hand uplifted
To beckon me away,
And a voice within is pleading
His mandate to delay.

I see upon Life's dial
The shadows fainter grow,
As sunbeams in the twilight
Wax faint before thy go.

I see Life's sun declining,
His noonday splendor gone:
His rays are faintly shining,
And the night is drawing on.

Life's rugged path behind me
In retrospect I view,
The thorns and briars around me,
Of the spot whereon they grew.

And I gaze with clearer vision,
On the path that lies before—
Where the murky clouds of even
Can obscure it never more.

No lion's whelp has trodden
On that path whereon I gaze,
No host of petty jukes by it
Or on its boldly strays.

I know the blasts of Autumn
Cannot fade the flowers that grow
On that path whereon I'm gazing
If my faith would have it so.

As I stand beneath the summit
Of the hill so steep and high,
Up which I've climbed in weakness
With many a smile and sigh,

I pause and look around me
In wonder and amazement,
On Life's mighty panorama
On which I seem to gaze.

I turn and look behind me
And but a little way,
Ere I shall reach the summit
My steps may have to stray.

I know not what awaits me,
I need not care to know,
But Faith shall guide my footsteps
The higher up I go.

And ere night's curtain closes
This transient scene from me,
I'll look from off Life's hill-top
The other side to see.

EDHRAIM ALLEN.

Walking with God.

The Lord said to Abram, "I am the Lord thy God; walk before me, and be thou perfect." Now walking seems to signify a moving forward. And if we would be perfect spiritually, we must move forward spiritually, and walk with God in spirit that we may be changed and go on to perfection from glory to glory, or step by step, even as by the Spirit of the Lord. Noah walked with God and became a preacher of righteousness. And being warned of God he prepared an ark to the saving of his race from the flood which came upon the ungodly. And does not the enemy now come in like a flood upon the ungodly? And do we not need an ark of safety to flee to when warned of God through the preachers of righteousness? And how may we expect to have it prepared for us only by Him who is the way the truth and the life? And who leads us to a consistent inward walk with God, until we become, through faith, as preachers of righteousness.

C. S. COPE.

I said; and I pulled my hat over my eyes, so I could see nothing but the spot where my hoe had to dig. In course of time I had gone over the whole field, looking only at the hill in hand, and my work was done. I learned a lesson tugging away at those grass roots which I never forgot. It was to look right down at the one thing to be done now, and not hinder and discourage myself by looking off at the things I haven't come to. I have been working ever since that summer at the hill nearest my feet, and I have always found it the easiest way to get a hard task accomplished, as it is the true way to prepare a field for the harvest."—Anon.

FOR "THE FRIEND."

The Divine life and power manifested in the heart of man is the root and foundation of all true religion. When through unwatchfulness or unfaithfulness, this decays in any (either individuals or meetings) a great loss is sustained; and unless there is a returning to this Power, withering will take place, and formality and outwardness be substituted for the inward experience of the operations of God's Spirit.

In this lapsed condition, no amount of zeal, or vehemence in praying or preaching in man's own will and time, can promote the spread of the Lord's kingdom in the hearts of men.

FOR "THE FRIEND."

THE TWO MOTTOES.

AS SEEN FROM A NEIGHBOR'S PARLOR.

High over the ample casement
In flowery letters stood,
Deep wrought in fess and zephyr,
These words, "Remember God."

As I stood in contemplation
I could but there remark
Its contrast with creation
In nature's handy-work.

Before me rolled a wide expanse,
All clothed in living green,
Whilst singing birds and bursting flowers
Around adorn the scene.

Here broad effect and detail lend
Their charms to every eye,
And light and shade their colors blend
In perfect harmony.

On apple and on cherry tree
Deep drifts of bloom were coming,
The maple shone in rich array,
The larch had donned his trimming,

The crystal dews had gemmed the flowers
The blooming houghs among,
And sweetly from his green-wood hovers
The orchard oriole sung.

The thrush his beams and scantling framed
In his peculiar way,
The robin built his warm abode
Of freshly tempered clay.

The sun had shed his morning ray
O'er woodland, field, and flood,
As Eden in virginity
All glorious, nature stood.

The beauties of the opening spring
To pencil are unknown,
The change from winter's reign thy bring
On canvas never shown.

And this poor, weak memorial
Sank into utter scorn
As I beheld rich nature pay
Her tribute to that morn.

For thus I thought, as round I gazed
On all his works abroad,
How wide creation's lauder praise
Proclaims, "Remember God."

WEST CHESTER, Fifth Mo. 15th, 1890.

was hardly a bit better off, for he could not speak to his father without offending him. "I durst not," writes Thomas, "say YOU to him, but THOU or THEE, as the occasion required, and then would he be sure to fall on me with his fists. At one of these times, I remember, when he had beaten me in that manner, he commanded me, as he commonly did at such times, to go to my chamber, which I did, and he followed me to the bottom of the stairs. Being come thither, he gave me a parting blow, and, in a very angry tone, said, 'Sirrah, if ever I hear you say 'thou' or 'thee' to me again, I'll strike your teeth down your throat!' I was greatly grieved to hear him say so. And feeling a word rise in my heart unto him, I turned again and calmly said unto him, 'Would it not be just if God should serve thee so when thou sayest THOU or THEE to Him?' Though his hand was up, I saw it sink, and his countenance fall, and he turned away and left me standing there."

To us who live now-a-days, it seems strange that people should get so ill tempered and angry for such a trivial reason. We cannot help wondering how the use of "thou" was such a "sore cut to proud flesh," and can hardly believe that the language men used to God in their own prayers was considered so offensive when used to themselves that they would at once get into a passion and even strike the person who spoke to them. History, however, gives us many examples of this, both where those who used "thou" and "thee" did so civilly and respectfully, and also where these simple, inoffensive words were used for the purpose of expressing reproach and contempt. Instances of the former are to be found in abundance in the writings of Friends; and of the latter we have instances in our national history, and in narratives of the lives of men; and it is also well illustrated by references which occur in the literature of the period when such things were common. * * * At the trial of Sir Walter Raleigh, the lawyer who conducted the prosecution against him ("thou'ed" him in a very bitter speech, saying in the course of it, "I thou thee, thou traitor."

One Thing at a Time.—"Early in life," relates a gentleman who has now spent many decades in the service of God and his fellow-man, "I learned from a very simple incident a wholesome lesson, and one which has since been of incalculable benefit to me. When I was between twelve and fourteen years old, my father broke up a new field on his farm, and planted it with potatoes; and when the plants were two or three inches high he sent me to hoe it. The ground of that piece was hard to till; it was matted with grass roots and sprinkled with stones. I hoed the first row, and then stopped to take a general look at the task before me. Grass as high as the potatoes was everywhere, and looking at the whole from any point it seemed to be a solid mass. I had the work to do all alone, and as I stood staring at the broad reach of weedy soil, I felt a good mind not to try to do anything further with it then. Just that minute I happened to look down at the hill nearest my feet. The grass didn't seem just quite as thick there, and I said to myself, 'I can hoe this one well enough.' When it was done, another thought came to help me: I shan't have to hoe but one hill at a time, at any rate. And so I went to the next and next. But here I stopped again to look over the field. That gave me another thought, too. I could hoe every hill as I came to it; it was only looking away off to all the hills that made the whole seem impossible. 'I won't look at it!'

These are they who have gone on to perfection; and by walking in the light, have been made partakers of the inheritance of the saints in light; and become as pillars in the temple of our God that shall go no more out. These are they which follow the light and walk by it withersover it leads them; and no longer walk in darkness for they have the light of life; while those who walk in darkness are liable to stumble and fall. So while we have the light we must mind the light and walk in it, that we may become the children of light. For we have great need to be able to discern between that which serveth God and that which serveth Him not. And if I can see right, evil men and seducers are now walking the earth as wolves in sheep's clothing, to draw away disciples after them; and many are following their pernicious ways, and causing the ways of truth to be evil spoken of. For filthy lucre's sake, and through high swelling works of vanity, and the deceivableness of unrighteousness, they are making merchandize of the Scriptures, and of the deep things of God, saying in effect, thus saith the Lord, when the Lord has not spoken through them.

So we of the different religious denominations who are professing to be of the true Israel of God, and to walk with Him in newness of life, have rebellious children amongst us, to whom the same language might apply that was used by God, through the prophet, to the rebellious children of old, where he says, "Woe to the rebellious children that take counsel, but not of me, and that cover with a covering but not of my Spirit, that they may add sin to sin; that walk to go down to Egypt and have not asked at my mouth, to strengthen in the strength of Pharaoh, and to trust in the shadow of Egypt, therefore shall the strength of Pharaoh be your shame, and the trust in the shadow of Egypt your confusion."

Have we not many now amongst us who are taking counsel, but not of the Lord, and covering themselves with a covering but not of his Spirit, and thus adding sin to sin; and walking to go down to spiritual Egypt, and have not asked at the Lord's mouth, but are strengthening themselves in the strength of Pharaoh, the very king of Egyptian darkness, instead of the living substance of the King of Zion. Therefore the strength of Pharaoh has become their shame, and the trust in the shadow of Egypt their confusion.

So let us quit the king of Babylon and ask the way to Zion, with our faces and steps thitherward; saying, like the returning Jews did, let us join ourselves unto the Lord in a perpetual covenant that shall not be forgotten. For it might be said of many now, like it was of some of old, "your goodness is as a morning cloud and as the early dew, it goeth away."

We must have faith like Enoch had,
And walk with God like Noah did,
So we may walk and miss the road
If our walk is not with God.
And we must walk in Christ the light,
Or our walk may not be right.
For we may stumble and may fall,
And by our blunders lose our all.
So we in holiness should go
In all our movements here below.

D. II.

DUBLIN, IND., Fifth Mo. 12th, 1890.

Gellert, the father of modern German poetry, whose religious hymns are yet admired, once composed a number of plays for the moral improvement of the German stage. He wanted "to make the devil pious," as Luther says, but did not succeed.—*Wm. G. Schaaffner.*

FOR "THE FRIEND."

Excursion Near Haddonfield.

On the 14th of the Fifth Month, I accepted the kind invitation of a young Friend to accompany him on a visit to a large tract of woodland lying about two miles from Haddonfield, N. J., in the vicinity of Cooper's Creek. It was our intention to reach the creek, and to explore its borders; but, while wandering through the woods, we took a route which led us away from its waters, so that we did not get a sight of it or of the plants and birds along its shores. Yet, we found much of interest, especially among the birds. My friend had devoted so much time to the study of our feathered visitors, that a faint chirp or note, scarcely audible to my ears, or a mere glimpse of one through the bushes, at once revealed to him the presence of a bird, and told him the species as certainly as if he had the opportunity of leisurely examining it.

While several of the smaller birds that raise their broods in our vicinity, prefer the neighborhood of man, and build their nests in the orchards, or among the shrubbery and trees that surround his dwellings, yet, there are many others which haunt, in preference, the larger tracts of woodland, either from a greater feeling of security, or because these furnish a more abundant supply of food. It was not surprising, therefore, when we entered the woods, to hear the notes of various birds in different directions. A peculiar whistle at some distance from us, my companion told me came from the broad-winged hawk (*Falco Pennsylvanicus*). Nuttall speaks of it as a "very rare species." Wilson, the ornithologist, obtained a specimen near Philadelphia, which he saw in the act of feeding on a meadow mouse.

Other notes were recognized as coming from the crested titmouse, different species of vireo, a warbling flycatcher, the Maryland yellowthroat—which frequents bushy thickets near water, etc. The golden-crowned thrush, often called the Oven-bird, from the peculiar shaped nest it builds on the ground among the leaves, arched over so as to resemble an old-fashioned oven, seemed quite abundant. Its peculiar note (tse, tse, tse), rapidly repeated several times, was heard in many parts of the forest.

As we penetrated into the deeper recesses of the forest, the rising of a turkey-buzzard from the ground suggested to my friend the idea that it might have a nest in that vicinity. They do not build much of a nest; but deposit their eggs in swampy solitudes, in the stump of a hollow tree or log, or on the fragments of rotten wood. Some search was made, but nothing appeared to prove that our suspicion was correct. A visit to the same spot, paid a few days later, revealed a nest, with a fresh egg in it, under some black-berry bushes. Several others of these large birds were seen, but this was not surprising, as they feed on decaying flesh; and into the recesses of this wood several dead bodies of horses and cows had been drawn, as a convenient way of disposing of them. The turkey-buzzard is abundant in the Southern States, in many of which it is protected by law for its services as a scavenger in removing carrion, which would otherwise prove deleterious. They become very tame in the cities of the South, where they run about like turkeys, picking up offal, especially around the meat markets. This bird does not frequent the New England States, although, in the interior of the Continent, they range to a high northern latitude. Those in the Middle States mostly go South on the approach of cold weather. One of the most interesting things connected

with these birds is their habit of soaring. As Nuttall describes it, "They assume themselves on fine, clear days, by soaring in companies slowly and majestically, into the higher regions of the atmosphere; rising gently, but rapidly, in vast spiral circles, they sometimes disappear beyond the thinnest clouds. They practice this lofty flight particularly before the commencement of thunder-storms; when, elevated above the war of elements, they float anxiously in the ethereal space with outstretched wings, making no other apparent effort than the light balloon, only now and then steadying their sailing pinions as they spread them to the fanning breeze."

A sudden and loud outcry, from a flock of crows arrested our attention. It was evident that something had caused an unusual excitement among them. My friend, eager to investigate the cause of the commotion, followed the sounds, and was amply rewarded by finding a pair of the great-horned owls, which he had never before seen in that locality. It is probable that the crows had good reason to be alarmed at the presence of these noble birds; for they feed on animals and birds of various kinds, and young crows may have formed part of their bill of fare. Nuttall mentions that one of his friends at Millidgeville, Georgia, saw a great-horned owl carry off in his talons, a cat that was sleeping on the roof of a single house; but, finding it a dangerous prize, soon dropped it. Their favorite resort is dark and impenetrable swampy forests. The female, which is rather larger than the male, is about two feet in length. The so-called horns are ear-like tufts of feathers, about three inches in height.

We did not interfere in the domestic quarrels of the birds, but we felt that it must be very annoying to the owls to be pestered by the cries and motions of their excited enemies.

On our return to Haddonfield we saw a somewhat similar case: a blue-jay—and these birds are sad thieves of the eggs and young of the smaller birds—was flying across a field, vigorously pursued by a king-bird, who recognized him as an enemy to be relentlessly driven away. Though much smaller, the king-bird was swifter in its motions, and soon overtook the jay, on which it pounced from above. Nuttall says, "This pugnacious disposition is principally manifested during the season when he has his young to defend." He then becomes so tenacious of his rights as readily to commence the attack against all his feathered enemies; and he passes several months of a summer in a scene of almost perpetual contest. Eagles, hawks, crows, jays, and, in short, every bird which exists by rapaciousity, are attacked with skill and success. He dives upon the heads and necks of the larger intruders, who become so annoyed and tormented as willingly to make a precipitate retreat. He pursues his foes sometimes for a mile."

Among the other birds observed, were the beautiful scarlet tanager, the red-bird (*Cardinalis*), the indigo-bird, a goldfinch, and several warblers—small birds, which spend the winter in the South and breed in more northern latitudes, and pass through these parts in the spring and fall on their way North and South. But I cannot enumerate them all, for they are observed during the day contained between 70 and 80 species!

Although the birds attracted much of our attention, yet our walk was not unproductive of flowers. The beautiful purple lady-slipper (*Cypripedium acaule*), was abundant in the woods.

This is a member of the curious and interesting *Orchis* family—comparatively rare in temperate climates, but more abundant in damp forests in tropical countries, where many species grow on the bark of trees. The flowers are often very showy, and singular in shape, resembling insects of various kinds, as flies, butterflies, etc. One of the petals, or colored leaves, forming part of the flower, is called the *lip*, and assumes various shapes in different species. In the *Cypripedium* it forms a large inflated sac or bag, which has some resemblance to a slipper or moccasin. There is an allied species with a yellow flower, which is often found in Chester County, Pa., and probably more abundantly to the northward, which is popularly called "Noah's Ark" and "Moccasin-flower," from the shape of the lip.

In most of the members of the *Orchis* family the pollen masses are of such a consistence and so situated, that they cannot come into contact with the pistil, and so fertilize the seed, without help from outside. This is effected by the aid of insects, which, in entering the lip of the flower in pursuit of nectar, come into contact with the pollen, which adheres to them, and is thus brushed against the sticky surface of the summit of the pistil, which detains a part of it.

In a wooded ravine near Haddonfield, we found another plant of this family, the beautiful little "priest in the pulpit" (*Orchis spectabilis*).

J. W.

SELECTED.

Concerning Prayer.

Prayer is the breath of the living child to the Father of life, in that Spirit which quickened it, which giveth it the right sense of its wants, and suitable cries proportionable to its state, in the proper season thereof. So that mark: Prayer is wholly out of the will of the creature, wholly out of the time of the creature, wholly out of the power of the creature, in the Spirit of the Father, who is the fountain of life, and giveth forth breathings of life to his child at his pleasure.—*Isaac Penington*.

Natural History, Science, etc.

Light in the Sick Room.—Dr. B. W. Richardson, in the course of a lecture on "Disease, and How to Combat It," remarks as follows:

"Still a custom prevails, despite all our sanitary teachings, that the occupant of the sick-room in the private house should be kept at all hours in a darkened room. Not one time in ten do we enter a sick-room in the day-time to find it blessed with the light of the sun. Almost invariably, before we can get a look at the face of the patient, we are obliged to request that the blinds may be drawn up, in order that the rays of a much greater healer than the most able physician can ever hope to be may be admitted. Too often the compliance with this request reveals a condition of the room which, in a state of darkness, is almost inevitably one of disorder—where there: foods, medicines, furniture, bedding misplaced—dust and stray levings in all directions.

In brief, there is nothing so bad as a dark sick-room; it is as if the attendants were anticipating the death of the patient; and, if the reason for it be asked, the answer is as inconsistent as the act. The reason usually offered is, that the patient cannot bear the light: as though the light could not be cut off from the patient by a curtain or screen, and as though to darken one part of the room, it were necessary to darken the whole of it. The real reason is an old super-

stitious practice, which once prevailed so intensely that the sick, suffering from the most terrible diseases—small-pox, for instance—were shut up in darkness, their beds surrounded with red curtains, during the whole of their illness. The red curtains are now pretty nearly given up, but the darkness is still accredited with some mysterious curative virtue.

A more injurious practice really could not be maintained than that of darkness in the sick-room. It is not only that dirt and disorder are the results of darkness—a great remedy is lost. Sunlight is the remedy lost; and the loss is momentous. Sunlight diffused through a room warms and clarifies the air. It has a direct influence on the minute organic poisons, a distinctive influence which is most precious, and it has a cheerful effect upon the mind. The sick should never be gloomy, and in the presence of the light the shadows of gloom fly away. Happily the hospital ward, notwithstanding its many defects, and it has many, is so far favored that it is blessed with the light of the sun whenever the sun shines. In private practice, the same remedy ought to be extended to the patients of the household, and the first words of the physician or surgeon on entering the dark sick-room should be the dying words of Goethe: "more light—more light!"—*The Sanitarian*.

The Oil Plant (*Brassica chinensis*), is in seed, and ready to be taken from the ground, in the beginning of May. This plant is extensively grown in this part of China, both in the province of Chekiang and also in Kiangsoo—and there is a great demand for the oil which is pressed from its seeds. For the information of readers not acquainted with botany, I may state that this plant is a species of cabbage, producing flower-stems three or four feet high, with yellow flowers and long pods of seeds, like all the cabbage tribe. In April, when the fields are in bloom, the whole country seems tinged with gold, and the fragrance which fills the air, particularly after an April shower, is delightful.—*Fortune's Travels in China*.

Bark Cloth.—Wherever we go, we find the women busy in preparing native cloth from the bark of the paper mulberry tree, which they take off in long strips and steep in water to make the fibre separate from the green outer bark, which is scraped off with a sharp shell. Then the fibre is laid on a wooden board and beaten with a mallet, which is grooved longitudinally. A strip two inches wide can be beaten out to upwards of a foot in width, when it becomes gauze-like, and is used for festal attire; or else, dyed in burnt sugar and smoke-dried, it is a much valued covering for the hair. But for general use, two strips of the wet fibre are beaten together, their own gluten causing them to adhere to one another; or, if very strong cloth is required, three or even four thicknesses may be used. A number of such pieces are then neatly joined together with a glue made from the *baro*, or from arrowroot, and thus a piece can be made of any size or length required. Sometimes a great roll, a couple of hundred yards long, is prepared for presentation to a chief—or else, a double-square, twenty feet wide by perhaps thirty or forty feet in length, to be hung up as mosquito curtains.—*C. F. Gordon Cummings*, "At Home in Fiji."

Lighting Fires Automatically.—An invention has been patented for automatically lighting fires at any desired point of time. The apparatus is attached to any ordinary alarm clock in such a manner that when the alarm is set off, an

arm carrying a match is made to revolve. The match is lighted by friction on a scratch block, and then swings to the grate, and sets fire to the shavings or other inflammable material in it.

Yellow Fever in Havana.—A communication in the *Sanitarian*, says that the situation of Havana is one that should make it healthy, but owing to a defective sewerage system, there are nearly always present some cases of Yellow Fever. The harbor is bottle shaped with a narrow entrance of about 500 feet wide, and then widening to a mile and a half. In consequence of this there is little flow of tide, and no means of washing out the sewage which accumulates in the harbor. To these sources of disease is added the filthy condition of the streets, especially those about the markets, where piles of rotten refuse accumulate.

Wire Roofing.—Used as a roofing material, wire is woven into a coarse-meshed fabric, the interstices of which are filled with a preparation which adheres firmly, and makes a surface without crack or seam.

Spontaneous Ignition of Coal.—Coal has the power of absorbing a certain portion of oxygen gas from the air, and this process is attended with heating, which has frequently led to ignition, where large bodies of it are crowded together as in the holds of steam ships.

To prevent the breaking out of fire from this cause, it has been suggested that cylinders containing carbonic acid gas condensed into a liquid state be placed at intervals on the coal when stored. The outlet of the cylinders to be closed when an alloy of tin, lead, bismuth and cadmium, which can be made so as to melt at 200°. If the coal commences to heat, the stoppers will be melted on arriving at this temperature, and the carbonic acid gas, released from pressure, will assume a gaseous form, causing an intense degree of cold, and at the same time covering the coal near it and thus preventing any further danger.

Endurance of the Odor of Musk.—"In 1850, at Brussels, three small volumes were presented to us. They were bound in red cloth, and enclosed in a green card-board case. In this case a very minute quantity of a musk mixture from a sachet, was placed in order to scent the volumes. Since the year 1850, these three little red volumes, in their green card-board case, have been constantly exposed to the air, on the shelves of a library, as well as to daylight. They have been in constant, almost daily use (for they are standard works of reference); yet at the present moment, after a period of 40 years, and being exposed to many kinds of climates, those little books retain their odor of musk, which is as powerful, especially on warm days, as it was in 1850, when the volumes were received."—*Monthly Magazine*.

Window Plants.—Soak a large piece of coarse sponge in water, squeeze half dry, and sprinkle in the openings red clover seed, millet, barley, grass, rice and oats; and hang in the window, where the sun shines a portion of the day; and sprinkle daily with water. It will soon form a mass of living green.—*Sci. American*.

Bower Birds.—Near Westwood, a little town about thirty miles from Rockhampton, I found for the first time the so-called bower-birds (*Chlamydera maculata*), a family that has become celebrated on account of the bowers which they build for their amusement.

These bowers, which must not be confounded with nests, are used, as is well known, exclusively for amusement. They are always found

in small brushwood, never in the open field, and in their immediate vicinity the bird collects a mass of different kinds of objects, especially small shells, which are laid in two heaps, one at each entrance, the one being much larger than the other. There are frequently hundreds of shells, about three hundred in one heap and fifty in the other. There is also usually a handful of green berries partly inside and partly outside of the bower; but like the empty shells and the other things collected, they are simply for amusement. Besides, these birds doubtless have the sense of beauty, as is indicated by the variegated and glittering objects gathered. This bower-bird has another remarkable quality, in its wonderful power of imitating sounds. When it visits the farms, where it commits great depredations in the gardens, it soon learns to mew like a cat or to crow like a cock.—*Lunholtz's Travels in Australia.*

A Plague of Ants.—These ants, originally introduced into the West India Islands from Africa, in the slave-ships, multiplied with such marvellous rapidity that in a short time they completely overran some parts of the country, destroying the crops and devouring every living green thing. Bryan Edwards says of the incalculable damage worked by them in Grenada:

"I have seen the roads colored by them for miles together; they destroyed nearly every sugar plantation on the island; and were particularly destructive of the lime, lemon and orange trees. They did not indeed feed upon the trees or the cane, but the damage was done by their boring around the roots of the vegetation. They fed on the carcasses of dead animals, fish and birds; they attacked the poultry and small stock. All attempts to exterminate them, or even check their ravages were useless, although a reward of £20,000 was offered to the discoverer of any practical method of destroying them. The planters, in despair, had been almost driven into abandoning the cultivation of sugar-cane, and the people of the island were reduced to great distress, when this calamity was removed by a frightful hurricane. The deluge of rain by which this tempest was accompanied, flooded the fields and valleys, and thus, it is imagined, the principal destruction of these ants must have been effected."—*Paton's Carribee.*

Items.

The Chinese Opium Trade.—Renewed attention seems to be drawn, in British circles, towards the evils flowing from the trade in opium, manufactured in British India and sent to China. The Representative Meeting of Friends in Great Britain recently sent an address on this subject to the Missionary Conference in China, encouraging its members to do what they could towards stopping this trade.

The Chinese Christians of Canton have also addressed the English Churches, referring to the evils caused by the use of opium in their land, and begging them to unite their efforts to procure the abolition of the trade. It appears that the time fixed for the revision of the treaty on this subject between England and China, is near at hand; and this probably stimulates philanthropists to take advantage of the opportunity thus afforded for remedying the wrong inflicted on the Chinese.

Law and Order Society of Philadelphia.—The 9th Annual Meeting of this body was held in Third Month last. The object of this association is the enforcement of existing laws, especially of those designed to restrict the evils of the liquor traffic. As said by one of the speakers at the meeting—"If we would have peace and quiet and good order, it is indispensable that there should be a rigid and impartial enforcement of existing laws."

Indian Education.—The number of Indians of school age in the United States, not including those in the State of New York, or the five civilized tribes, is estimated to be 26,000, of whom about 25,000 are unprovided for. The Indian Commissioner asks an increase of \$80,000 in the appropriations for his department, so as to enable him to provide education for a portion of this number.

College Secret Societies.—The *Christian Opuscular* says that Rutgers College, in New Brunswick, N. J., shelters secret societies. At the "Sixth Annual initiation" of the Theta Nu Epsilon Society, 15 young men who were candidates were seized in their rooms about 11 o'clock at night, bound and blindfolded, tied in pairs and marched through the streets through mud and small streams, and then rolled down embankments through brush and brambles. On their way across the river, on the bridge, a rope was tied around their bodies and they were let down into the river. They were afterwards taken to a hall, where other "mystic" rites were performed.

OUR pest of duty is never in more than one place at the same time. For the time being, we always belong to one place, and in one place only. If we recognize this truth, we shall never have reason to fear that we ought, perhaps, to be somewhere else than just where we are, when we are in a place where our present duty lies; and we never have a right to be anywhere, even for a moment, where it is not our duty to be. There is no such thing as a choice between duties; the choice is always between duty and its shirking. We ought always to be where we belong; and it would be wrong for us not to be there.

THE FRIEND.

FIFTH MONTH 31, 1850.

When some years ago, our attention was called to the effort to restrain the free use of spirituous liquors as a drink, by requiring those who sold them to pay to the government a large sum of money for the privilege of so selling, we were favorably impressed with the proposal—regarding it as a restrictive measure, calculated to lessen the evils which flow from intemperance.

As time has passed on, and we have noted the practical working of the scheme of High License, and listened to the discussions on the subject, we have become more and more settled in the belief that the influence of this system is evil.

The State by receiving the license fee makes itself in some measure a partner in the traffic; and thus, if the saloon is a source of sin and misery, the public is involved in the guilt, and in the evil consequences which flow from it. In the administration of the Brooks High License law, by the Judges in Philadelphia, much satisfaction was felt and expressed by the public papers, at the care exercised by those Judges in refusing licenses to unworthy applicants, and thus lessening the number of saloons in the city; and many praises were bestowed on the law, which gave them this authority. But the same good results would have followed, if the law had simply required the consent of the Judge, without exacting any fee. The fee itself tends to blind the eyes of the community to the evils of the saloon, by making the public a sharer in the profits; and thus acts as a powerful support to the business of liquor dealing. So conscious of this, have been the shrewd members of the liquor trade, that they have looked with favor upon the exaction of a license fee, as tending to

fortify their position, and shield them from the attacks of those who would altogether abolish the traffic.

If the liquor saloon is an institution which deserves the encouragement and support of the State, it is unreasonable to make it pay for the privilege of existence. If it is a source of moral evil, it is wrong for the State to share in profits derived from it. This may be made clearer to some minds, by extending the application of the principle to another case. The lottery carried on under authority of the State of Louisiana, is now approaching the end of the time for which it was chartered. The company controlling it offers to the State a gratuity *in lieu* of \$1,000,000 per annum for the renewal of the privilege. The press of the U. S. loudly protests against the sanctioning of this monstrous gambling establishment; and would unsparingly condemn the legislature which would accept the bribe, and permit it to defraud and demoralize the people by the sale of lottery tickets. But certainly it would be difficult to find a valid reason for licensing liquor saloons, which would not apply also to licensing lottery offices.

In the Divine ordering, it is one of the duties of civil government to restrain that which is evil—Paul says, the magistrate "is the minister of God, a revenger to execute wrath upon him that doeth evil." In accord with this sentiment, it is not unreasonable for those who are impressed with a sense of the evils which flow from the use of intoxicating drinks, and from the enticements spread before the weak in the modern saloon, to invoke the aid of the law to close up those places of temptation; although we should never lose sight of the importance of all persons being brought under the government of the "spirit of Christ—the only panacea for all moral evil—the only remedy which applies to every condition, place, and person.

SUMMARY OF EVENTS.

UNITED STATES.—The Supreme Court of the United States has decided in a writ of error, in the case of William Knicker, the murderer confined in Auburn Prison, New York, under sentence of death by means of electricity. The opinion was by Chief Justice Fuller.

Senator Fuller has introduced in the Senate a joint resolution providing an amendment to the constitution, providing that neither the United States nor any State shall pass any law authorizing the establishment or maintenance of any lottery or distribution of prizes by chance. Section 2 of the resolution provides that Congress shall have power to enforce this article by appropriate legislation.

A substitute has been reported by the Judiciary Committee for the "Original Package Bill," now before the Senate, providing that intoxicating liquors transported from one State to another shall be considered to have ceased to be the subject of inter-State commerce when the actual and continuous transportation of the same shall have terminated, and shall then be subject to the respective powers of the State or Territory in respect of all public regulations of prohibition, regulation or taxation.

In the 24th inst. the Tariff bill was reported from the Committee of the Whole, the previous question was ordered, and, after a few amendments had been adopted, the bill was passed by a strict party vote, only one Republican, a German, of Louisiana, voting against it.

On the 26th, the Senate adopted an amended resolution of Senator Plumb, instructing the Finance Committee to prepare and report, in connection with the Tariff bill, a statement in parallel columns showing the duties levied under existing laws, the duties as they would be under the existing law, the duties under the bill to be reported by the committee, and especially if the committee should recommend new duties, or the increase or reduction of existing duties, the reasons, in each case, for such addition or increase. Also to require, in cases of compound duties specific

and ad valorem) a column showing the equivalent and ad valorem amount of the duty.

Judge Hinderman, in his charge to the Grand Jury, in the District Court, in Nevada, Iowa, on the 21st instant, took the ground that, notwithstanding the late decision of the United States Supreme Court, no person has a right, in that State, to keep a place for the sale of intoxicating liquors of any kind, either in original packages or otherwise, and that it was the sworn duty of the jurors to report to the Court, by indictment, any person engaged in the sale of such liquors, and that without regard as to where such liquor came from. He maintained that inter-State commerce has nothing to do with the question, and that the keeping of a place for the sale of liquors is a nuisance, no matter how they are dealt out.

Original packages of liquors have been opened in Lewiston, Maine; Mason City, Iowa; Yankton, South Dakota, and Leeburg, Penna. The last named town has been dry for many years, and the citizens are greatly excited.

The Secretary of the State of Illinois, on the 26th instant, licensed the Chicago Olinthus Tower and Construction Company at Chicago, Capital stock \$2,000,000.

In the General Conference of the Methodist Episcopal Church in St. Louis, on the 20th instant, the Committee on Revision made a report, in which they defined the position of the Church in relation to temperance, and give the result of extensive inquiries of the various Conferences throughout the country as to the attitude of the churches and their members in regard to the use of intoxicating beverages in the manner of the prohibition Church. Among other things the committee say: "We are convinced that if any more advanced position is possible to take than the one which the Methodist Episcopal Church South occupies to-day upon the question of temperance, our membership should yet be of original position. We are emphatically a Prohibition Church. We stand out squarely for the complete suppression of the liquor traffic. We offer no compromise to, and seek no terms from a sin of this heinous quality." The report was unanimously adopted.

The Presbyterian General Assembly at Saratoga, New York, the whole subject of Revision has been left in the hands of a committee of fifteen ministers and elders. This Committee of Twenty-five on Revision is instructed to meet at an early day, not later than the 15th of May. We are emphatically to consider the suggestions made by the Presbyteries in their answers to the questions as have been recited, and formulate and report to the General Assembly of 1891, such alterations and amendments to the Confession of Faith as in their judgment may be desirable; but these must not in any way impair the integrity of the Reformed or Calvinistic system of doctrine taught in the Confession of Faith.

The Georgia and Carolina Melon Exchange was organized on the 26th inst., in Atlanta. The exchange contemplates the purchase of the entire melon crop, in both States, in the North. This year's crop is estimated in value at \$500,000.

Deaths in this city last week numbered 337, 28 less than during the previous week, and 2 less than during the corresponding period last year. Of the foregoing 61 were males and 276 females; 44 of age of consumption; 34 of diseases of the heart; 27 of pneumonia; 18 of inflammation of the brain; 15 of convulsions; 14 of marasmus; 11 old age; 10 diphtheria; 9 of croup; 8 of bronchitis; 8 of apoplexy and 8 of typhoid fever.

Markets, etc.—U. S. 4½'s, reg., 102½; coupon, 103½; 4½'s, 121; Treasury 6's, 119.

WOTON was quiet but firm, at 112½ cts. per pound for middling uplands.

FEED.—Winter barn, choice, 116½ cts.; do, fair to prime, 115.50 a 116.00; spring barn, 115.00 a 115.25.

FLOUR.—Western and Pennsylvania super, \$2.50 a \$2.75; do, do, extra, \$2.75 a \$3.35; No. 2 winter family, \$3.50 a \$3.75; Pennsylvania family, roller process, 18.00 a 18.75; Western 1st family, clear, \$4.00 a \$4.50; do, do, straight, \$4.65 a \$5.00; winter patent, \$5.10 a \$5.50; Minnesota, clear, \$3.75 a \$4.25; do, straight, \$4.50 a \$5.10; do, patent, \$5.20 a \$5.65; do, do, favorite brands, higher. Rye flour was sold in a similar way at \$3.25 a \$3.30 per barrel for choice Pennsylvania.

GRAIN.—No. 2 red wheat, 92 a 92½ cts.
No. 2 white oats, 35½ a 36½ cts.
No. 2 mixed corn, 40½ a 41 cts.

BEEF CATTLE.—Extra, 5 a 5½ cts.; good, 4 a 4½ cts.;

medium, 4 a 4½ cts.; fair, 4½ a 4¾ cts.; common, 4 a 4½ cts.; culls, 3½ a 3¾ cts.; fat cows, 2½ a 3½ cts.

SHEEP.—Extra, 5½ a 5¾ cts.; good, 5 a 5½ cts.; medium, 4½ a 4¾ cts.; common, 3½ a 4½ cts.; culls, 3 a 3½ cts.

LAMBS.—Lambs in fair demand at 6 a 9 cts. for spring.

HOGS.—Western, 6 a 6½ cts.; State, 5½ a 5¾ cts.
MILCH COWS.—Inactive, at \$25 a \$50.

FOREIGN.—W. E. Gladstone, in a letter on the occasion of his visit to this country, in connection with the introduction in Parliament of the License bill, which provides for compensation for loss of licenses, has already increased the value of publican's property by nearly £5,000,000. The measure, he says, is the heaviest blow ever struck at the cause of temperance.

The London correspondent of the New York Sun, in his despatches of the 24th instant, says:

"The Church of England Temperance Society has split over the question of compensating dispossessed publicans. The officers thought getting rid of the publicans upon any terms was a great thing for temperance. A strong minority of the society protested against these sinners receiving any of the rate-payers money. This schism has now gone so far that several prominent members have withdrawn from the society, and they intend taking part in the great demonstration against compensation in the Haymarket. A special platform will be allotted to them, from which several Church dignitaries will speak, who, under ordinary circumstances, would scorn to take part in an outdoor demonstration. The affair is being organized with an enthusiasm which makes its success assured. The Wesleyan and other Nonconformist churches have appointed special committees to assist it, and labor societies, as well as distinctly temperance bodies, are working hard to the same end."

The report of the Panama Canal Committee on the geological character of the route of the canal, just received, states that the water in the reservoirs is stored through impervious soil, and that the water in the reservoirs is not subject to diminution. The surveys, it is further stated, proved that precautions could be taken to counteract the evil effects of earthquakes.

The Budget committee of the German Reichstag is continuing its consideration of Army bills to be ready to Vernon, Minister of War, explained to the Committee, that the bill aimed to give a military training to all men fit for service. After the bill was passed, 37,000 additional men would be available. It was not intended to increase the number of existing cadres, but to strengthen them.

The Village of St. Mahlen, near Hildesheim, has been visited recently by severe hail-storms, which have done a great deal of damage. On the 22nd instant the people gathered in a place of worship to pray for a cessation of the storm. While the services were in progress, a thunder storm came up and the church was struck by lightning. Four persons were killed and twenty injured, four being rendered completely blind. The people were panic-stricken, and in the mad rush for the doors, two children were crushed to death.

The coroner's inquest on the German Embassy in Berlin, in his despatches of the 24th instant, sent the following interesting account of German affairs:

"The negotiations with England concerning territory in Africa, had almost reached the point of an execution of a protocol, proposing to Germany a sphere of influence extending from the East Coast of the Congo Free States, when Lord Salisbury, the British Prime Minister, sent his Envoy, Sir Percy Anderson, emphatic orders to suspend communications and await instructions. Since then, Sir Edward Malet, the British Ambassador in Germany, has been engaged in negotiations which are not resumed on the basis of a recognition by Germany of English rights on the West Coast of Lake Tanganyika and the territories north of Tanganyika, including Uganda."

The late Governor of the Province named Muller, of the Jesuit's College of Mangalore, India, claims to have cured several lepers by Count Mattei's system. A native of Calcutta has had similar success, it is said.

The telegraph line connecting Tonquin and China was destroyed by an earthquake in the Province of the same name, north of Yunnan, capital of the province of the same name, on the 17th of the 4th month.

It is reported from Japan, that about one hundred earthquakes were felt on Miyake Island, in the Izu group, from the 17th to the 19th of Fourth Month. There were landslides in various parts of the Island, and many houses were destroyed.

The Parliament of Victoria was opened at Melbourne on the 22nd instant, by the Earl of Hopetoun, Governor of the colony. He congratulated Parliament upon the prosperity of the country and upon the rapid

strides towards federation, which, he said, was near. This proved the growth of the feeling of a common Australian nationality.

NOTICES.

CORRECTION.—In the obituary notice of Wilson Hall, published in No. 41, it was stated that he was for a time Superintendent of the Boarding School at Stillwater. It should have said, at Mr. Pleasant, for during the time he acted in that capacity the Yearly Meeting School was located at the latter place.

TEACHERS WANTED.—A second, and an assistant teacher at Moorestown Academy, Moorestown, N. J. Commencing with the Fall term of the present year.

Apply to Samuel L. Allen, 1107 Market St., Phila., or Elizabeth H. Richie, Moorestown, N. J.

WANTED.—A competent teacher to fill one of the positions in the Primary Department of Friends' Select School. To enter upon duty Ninth Mo. 15th.

Apply to ANNA W. LIPPINCOTT, 460 North Seventh St., Philadelphia; or MARY M. LEEDS, 3216 North Sixteenth St., Phila.

WANTED.—A teacher to fill the position of Principal in Ainswell School. To enter on duty Ninth Month 1st, 1890.

Apply to SARAH S. CARTEE, Moorestown, Burlington Co., N. J.; or JANE J. WETHERELL, 3435 Lancaster Ave., Philadelphia.

A teacher of experience, acquainted with "Quincy Methods," and modes of instruction now generally approved, desires a position in Primary Department of a Friends' School. She could enter upon duties at any time in Ninth Month.

Address E. B. M., Germantown, Philadelphia.

Pleasant 2nd-story rooms, with good table-board, can be had at moderate rates in a Friend's family.

Address, N Box 164, Media, Pa.

FOR RENT.—A Friend in West Chester, Pa., having more house room than is needed, desires to rent for the summer, furnished, all of a new house, excepting two rooms.—Apply 433 West Miner St.

A few boarders can be accommodated in a Friend family at No. 480 North Fifth Street, Phila.

Fifth Mo. 1890. EDITH SHARPLESS.

MARRIED, Fifth Month 7th, 1890, at Friends' Meeting, Media, Pa., J. ALBEN THOMP, son of James and Jane Y. Thom, to ELIZABETH H. SMEDLEY, daughter of William P. and Jane G. Smedley, all of Delaware Co., Pa.

DEATH, Second Month 2d, 1890, at his residence near Easton, CLAYTON H. HLAND, in the 70th year of his age, a member of Freshman Monthly Meeting, N. J. Being of a quiet, unassuming disposition, he said but little about his religious experience; but from expressions made during his last illness; (which was permitted to be lingering) his friends feel that, through redeeming love, his name has been written in the Lamb's book of life.

—, at his residence in Germantown, Pa., Third Month 3d, 1890, SARAH P. JOHNSON, in her 77th year. A consistent member of Germantown Preparative and Frandford Monthly Meeting of Friends. When able, a most constant attender of meeting. Her life from her earliest years was dedicated to the service of her dear Redeemer in the most conscientious manner; always feeling that it was not by works of righteousness alone, she would be saved, but by the cleansing power of his most precious blood. That faith enabled her with her last breath to say, "I feel the everlasting Arns around about me; Jesus is near; death hath no sting, the grave no victory over me." "Precious in the sight of the Lord is the death of his saints."

Incidents and Reflections.—No. 226.

HOW TO DEAL WITH A QUARRELSOME
NEIGHBOR.

In the summer of 1887, being at the house of an aged friend, he related an interesting illustration of the proverb, "A soft answer turneth away wrath," which happened to himself years before.

At that time animals of various kinds were allowed to run the roads unattended, and were often very troublesome. At the house of my friend, the lane or lawn leading to the public road was very wide, and furnished a supply of grass which was tempting to the wandering cattle. He had an unusually valuable dog, which he had trained to drive out any stray animals which might enter the lane. This the dog usually did very judiciously, and without injuring them. But one day, when the fences were down from some cause, it so happened that the oxen of a near neighbor trespassed, and when the dog as usual attempted to eject them, one resisted, and attacked the dog. This probably roused the anger of the guardian of the premises, and he seized the offending ox near the tip of the tail, and in the struggle bit off a small piece.

When his owner returned home towards evening and learned what had taken place, he was much concerned; and next day called on the owner of the injured animal, who received him rather coldly. However, after a little general conversation, my friend spoke of the accident, when his neighbor exclaimed in an excited manner, "I will kill the dog within a week," and repeated the same threat. He was a resolute man, who generally carried out whatever he had determined upon.

My friend mildly reasoned with him, and said the dog was a very valuable one, which he should be sorry to lose; that the dog was not to blame, for he had trained him to do that very thing—keep stragglers away; that, therefore, the blame must rest on himself, and he queried with his neighbor whether he would kill him. "No," said the man, "I will not kill you." Well, said my friend, I will make thee a proposition, I have in my barn-yard twenty or more head of cattle, fully as good as thine which has been injured. Thou may drive thy animal to my yard, and take in exchange for it, any one of mine

thou may select." "No," was the reply, "I won't do that."

"Well, then, I'll make another proposition. Fix thy own price on the ox; and whatever thou sayst it is worth, I will pay thee."

"No, I won't do that."

"Then I will make a third proposition, say how much injury thou thinks the dog has done to thy beast,—I will leave it altogether to thee to determine—and I will pay for the damage."

The anger of the neighbor by this time had abated; he saw that it was one of those accidents which happen without any bad intention, and he refused to receive any compensation, and they parted in friendship. Thus an incident, which easily might have led to permanent alienation and disturbance of the peace of the neighborhood, really tended to strengthen the bonds of friendship and good will.

The following incident, translated from the German, furnishes another illustration of the effect produced on unreasonable men by patient forbearance and friendly remonstrance.

A Christian peasant was greatly tried by the unkindness of a neighbor. They had formerly been good friends, but since the one had found the Saviour, the other had left nothing untried to exhaust the patience of the Christian, and in every way to torment and trouble him. But in vain. Our friend, through God's help, kept his eyes fixed on the footsteps of his Master, of whom we read in 1 Peter ii. 2:23; but the more patient he was the more he had to endure. Just before the cutting of the "after-grass," the unkind neighbor had driven through the still un-mown fields of our poor friend. There was no necessity for him to drive that way, and when he was entreated in a friendly way to do so no more, the short answer was returned: "I shall drive through your meadows as often as it pleases me; if you wish, you can summon me."

Our friend went quietly home and laid the matter before Him who judgeth righteously. At the next hay harvest the man mowed a large piece in the meadow belonging to his believing neighbor. Again the Christian went in all friendliness to him, and asked him why he acted thus, could he not see the boundary stones?

"Yes, certainly I can see them," said the other; "but it pleases me to do this. If you like, you can summon me; if I am convicted, I will pay. But your meadow I am deterred to mow."

This was almost more than our poor friend could bear, but he looked to his crucified Saviour, and his heart became still.

The time of the "after-grass" came on again. When our brother rose one morning, he found his whole meadow mowed by his neighbor, who was beginning to dry the grass for himself. "I cannot keep silence any longer; it is too much," thought our friend; "there is no course left to me but to go to law." Early the next morning he got ready to go to the neighboring town and see the magistrate. His neighbor saw him and called after him:

"Are you going to summon me? You can go for all I care, if you have got the courage."

Our friend went silently on. He arrived too early at the town, and went to spend the waiting time with a true friend and brother, who was a cobbler. "Why here so early?" asked his friend, as he appeared.

"I am going to the magistrate," answered the poor man, rather hesitatingly (1 Cor. vi. 1, 4, 7).

"To the magistrate? What business have you with him?" asked the cobbler.

Our friend told him all his trouble; how his unkind neighbor had treated him, and how he had at last decided to make an end of the affair.

"I; it not trying?" said he, in conclusion.

"Yes, it is trying, that I must allow," answered the cobbler; "but tell me, is the meadow your property?"

"Yes, certainly! I inherited it from my father, and he from his father, who bought it. I have the title-deeds at home; I am certain it is my lawful possession."

"If it is your property, then you are at liberty to summon your neighbor," replied the cobbler, with some emphasis.

After a pause he again said: "But are you sure it is your own?"

"Of course; haven't I told you? I had it from my father, who had it from his father, who bought it. I could show you the title-deeds if I had them here."

"Well, if it really is your own, then you must summon your neighbor," replied the cobbler, for the second time, in the same tone.

Again after a pause, for the third time he asked: "Is the meadow truly your property?" and he said the last words with such an emphasis that his friend was startled, and remained in silent thought for some seconds; then suddenly his countenance cleared, and with a loud voice he cried: "No, no, you are right, the meadow does not belong to me; house and land, and all I am and have, belong, not to me, but to my Saviour."

"Then leave them all to Him to take care of," was the cobbler's simple answer.

Our friend pressed his hand, and thanked him for his advice, and returned home without visiting the magistrate.

His neighbor saw him coming. "Well, have you summoned me?" he called out.

"No, I have not," answered the other quietly.

"Your courage failed you, eh?" sneered the neighbor.

Our friend by this time was close to him.

"Listen, I want to tell you something," said he. "I have remembered that the meadow is not mine; it belongs, with all I have and am, to my Saviour, and as long as He does not prevent you from mowing it, I shall not do so," and with that he moved away.

The other sprang after him, seized his hand, and said with deep feeling:

"Now I see that you are a real Christian; I never would believe it. Tell me, can you forgive me all my unkindness? I will never put foot in your meadow again, and what I have

spoiled I will repay to the last penny. And—may I come this evening, so that you may tell me how you have become what you are? I must be different, too; I cannot remain as I am."

We need scarcely say what joy our friend felt at these words, and what he answered. The Lord gave a blessing on what was said that evening. A thorough change took place in the neighbor, and from that night they were of one heart and one mind.—*Living Waters.*

J. W.

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 348.)

1795. Sixth Mo. 23rd.—Taking leave in true love of our friends at Sharsey, we went by water to St. Johns; and had a meeting there that afternoon, wherein a solemnity was perceived which seemed to bind down all loose spirits. To the praise of the Lord let it be ascribed. We had several conferences with the people, who desired to be informed of our principles, for which they expressed satisfaction; and supposing it might be useful to us, they gave us recommendations to some of their friends. We left them in an enquiring state; which, if continued in, may produce fruits to their own benefit and the honor of Him whose mercy is great.

We then travelled to a small town on the River St. Lawrence, below the falls, called Tipperary. Here I felt as though my faith would almost fail me. The people were of a strange language, of the popish religion, and, I thought, were more wicked than any I had met with. I was afraid it would be in vain to labor in this dark place. Laying down to rest myself and to wait for my strength to be renewed in the Lord, he did not leave me in the needful time. Concluding to dine here, we afterwards went to a small Indian town of a tribe called Cochawagos. This river here running nearly east, and about a mile and a-half wide—the town is about ten miles up, and on the south side. The name of the Indian chief was Cap'n Thomas, a sensible man, who could not speak English. In order to be informed of our business, he got an interpreter; my certificate was then read to him, and my errand told, with the cause why I had left my wife and children to come so far. He replied: "It is good," and bid me welcome. He said I could speak to him now, but would soon leave him, and then he might forget what I said; therefore he desired I would leave him something in writing, to think of when I was gone, which he should take kind, as he had never before heard of such a people as we were. He spoke about the priest not allowing them to have the Scriptures, and asked my opinion concerning that matter; which I answered on this wise: "Perhaps the priest thought that if they knew the Scriptures, they would learn from them better principles than he taught." This man appeared solid, and assented to what I said by several times saying *youh*. The opportunity we had with him seemed refreshing to my drooping mind. These Indians were (I understood) two or three hundred in number here; and seemed to live pretty well. The said chief told me they raised wheat and corn. They appeared to be a well-behaved people; their dress in the Indian manner; and the town commodiously situated on the bank of the river. I wrote a few lines according to his desire, which I left with him; also gave him some books I had with me. Thus taking leave, he appeared well satisfied and thankful for the visit.

25th.—Not hiding myself clear of the people

at Tipperary, before hinted, we returned thither, and after quietly waiting for inward counsel, I found freedom to propose a meeting in that town, however strange it might seem. The landlord here we put up our horses allowing the liberty of his house for the purpose, notice was given to meet there at three in the afternoon, and a meeting was held, unto which a considerable number of the people of the town came; and considering their rough appearance, their behavior in quiet sitting was much beyond our expectation. I believe the Lord's power was near, owning us in this undertaking, and came into dominion before the meeting's conclusion. To Him be the praise of all.

26th.—After having solid sittings in two families, we passed on to Montreal; and having to cross a branch of the river, the bridge being gone, we floated our carriage over on hewed logs, and swam the horses. Getting safe over, we travelled down the river side about ten miles; then we crossed it, and about a mile farther down we came to the town of Montreal; where the people received us with the appearance of kindness, according to their way. We took lodging at an inn near the market, and had a room to ourselves.

27th.—The way opening for us to have a religious meeting here, the place proposed for holding it was in a meeting-house of the Presbyterians. The number was pretty large that attended this meeting; but being unacquainted with silent waiting, divers of the people went out, causing some unsettlement. At length, I allowed my certificate to be read, which increased a solemnity and gained their attention, appearing to give general satisfaction; so that, on the whole, I believe the good cause did not suffer by our holding such a meeting—it being the first ever held here. Several of the inhabitants expressed their satisfaction, and showed a remarkable kindness towards us. We found here several tender-hearted people, who took us to their houses; and there appeared more openness in the Town of Montreal than I looked for. I thought I felt that a measure of the savor of Truth would be left behind us. May the Lord of the harvest send forth more to labor amongst them, to preach the necessity of repentance, because of the abomination which at this time prevails.

I thought that great indeed is the wickedness in the Canada country, that prevails in a too general way. The sacred name of the Most High is commonly taken in vain in the mouths of both sexes! Even old and gray-headed people are guilty herein, as though they thought it an ornament to conversation! The popish religion prevails among the greater part of the inhabitants; and by the craft of their clergy it appears that great ignorance predominates.

As I was waiting in silence, alone, for safe direction, feeling the Divine presence near, I thought it opened to me in the light, that as my prospect of Nova Scotia remained weighty, my best way was to take a passage by water from this place, if I could obtain it. I knew not that this was likely to be had. But, going to the door soon after it was presented to my view, a man came to me and queried from whence I came, and whither I was going. I told him I came from near Philadelphia and was going to Dartmouth, if I could get there; and I had been told by a person here that the distance was computed 950 miles—and the road almost impassable, either on foot or horseback; therefore, I had been advised to go by water; yet knew not how to get a passage. He then informed

me of a vessel bound for that place, which was to sail to-morrow. My companion was then walked out; but the same man being willing to go with me to see the captain of that vessel, I went; and when we found him, he readily agreed to take us, if we chose to go with him. Upon this, I went to speak with my companion, and he uniting with the proposal, we soon agreed for a passage, the price of which was five guineas each. The matter being thus concluded, the other friend who came with us agreed to take back the carriage and our horses.

28th.—We then put our goods and clothes on board the vessel. Travelling by water has been very unpleasant to me, yet at this time, as I had resigned to what I believed was a clear opening for my proceeding on the errand I was engaged in, it seemed more easy; and I gave myself up into the hand of the Lord for protection; and could bless his holy Name, in a sense of his Divine presence being near. We had to anchor the first night against Montreal; next day, the wind favorable, we proceeded down the river. The cabin being engaged and taken up by a man and his wife who were going to Quebec, made me fare not so well. We got on our way about seventy miles, and into the lake called St. Peters, which I am told is about twenty-five miles long and seventeen wide. Here we anchored the second night. The day following the wind was ahead; we made but little progress, and at night, the watch falling asleep, we were in danger of rocks, the current being strong; the anchor was dragged, and our vessel did strike one, but received no damage. It was an awful season; and this circumstance brought me to view the danger of a spiritual slumber, in which, if they continue, the souls of unwatchful mortals hazard an eternal wreck. My mind was favored with quiet resignation; although, as a man, a prison would have been as agreeable as my prospect now of confinement in a vessel upon rough water, where a strong current made the appearance awful.

Seventh Mo. 3rd.—We have had to lay at anchor near two days, the vessel sometimes driving. I observed the country towards Quebec was level and thickly settled, chiefly by French people. This morning, the wind favoring, we soon came against Quebec, about 200 miles from Montreal. This town consists of two parts, the upper and lower; the upper stands on a mountain and high point of land—the lower near the water, having one street. Between the two is a very steep ascent.

The captain and sailors went on shore here; and the sailors having drunk to excess, and returning before the captain, a quarrel arose among them, of a dangerous nature, as they struck with clubs and handspikes; using profane and dreadful language. I found it best for me to retire and keep in the cabin, with my mind turned inward to the Lord, who filleth not in mercy to those who put their trust in Him. The captain was a man who endeavored to maintain his authority; and when he returned, it gave me some relief. I leave the reader to judge of our situation and my exercise, thus pent up among disagreeable company, and the far greater part of our voyage yet behind. After being about a week on the water, I began to perceive my health affected with the motion of the vessel. I had no way to flee in this situation, but to Him who regardeth the sparrows and who sustains my mind in patient submission to his will.

(To be continued.)

FOR "THE FRIEND."

Elizabeth Drinker.

A friend having placed in our hands a MSS. letter, addressed to Elizabeth Drinker when in England, by her brother in Philadelphia, it seems proper to preface it by some brief account of the Friend to whom it was addressed.

The *Testimony* of the Monthly Meeting of Friends of Philadelphia for the Southern District, of which she was a member, says that she was born in that city in 1737. "An inclination to piety and religious circumspection being apparent in her early youth, as she grew in years, through submission to the refining baptism of the Holy Spirit she was gradually prepared for usefulness in the church, and about the year 1776, came forth in public ministry among us. Being in a good degree faithful to the gift received, it was evidently enlarged, wherein she was qualified to fill more extensively that dignified station; and was likewise serviceable in the exercise and support of our Christian discipline.

"Through the drawings of Gospel love, she was frequently engaged in visiting the meetings of Friends in this and several of the adjacent Governments; being peculiarly fitted to speak with precision to the states of individuals, both in families and more public opportunities, and deeply concerned to excite in the minds of those in membership with us, a close adherence to the guidance of the holy Spirit of Light and Grace; that Zion might indeed more conspicuously shine, put on her beautiful garments, and those who were asking the way thither, not to stumble through the unfaithfulness of such who profess to be inhabitants thereof; but that her righteousness might go forth as brightness, and her salvation as a lamp that burneth.

"Being for a considerable length of time under a religious concern to visit the churches in Great Britain, though under much weakness through infirmity of body, she was not easy to omit endeavoring after a full improvement of the talent received. After a season of deep probation, having the unity and sympathy of Friends, and obtaining the requisite certificates, she embarked from hence, in the Sixth Month, 1793, and arrived in England the month following.

"For an account of her travels and services in that nation, whilst health permitted, and also of her peaceful close, at the city of London, we refer to the following testimony from Grace Church Street Monthly Meeting concerning her.

Testimony from Grace Church Street Monthly Meeting, concerning ELIZABETH DRINKER.

"As it has pleased Infinite Wisdom to remove from works to rewards, our dear friend Elizabeth Drinker of Philadelphia, whilst on a religious visit to this nation, we are engaged to give this testimony concerning her.

"She arrived here in the Seventh Month, 1793, and after visiting the meetings of Friends in and about this city, proceeded into Kent, Sussex, and the western counties, as far as Falmouth, returning through Bristol to London; and though frequently tried with indisposition of body, she was strengthened in her Gospel labors, and though through the comfort and edification of many. Being concerned to wait for and move under the fresh arising of Divine life, her ministry was sound and weighty, and her conduct and conversation consistent therewith.

"The Fourth Month following, though in a declining state of health, she visited the meetings of Friends in Hertfordshire, &c., but her coun-

plaints increasing, she stopped at Straines near six weeks; at which place she expressed to a Friend an apprehension that her time would not be long in mutability; and at the same time mentioned, that as she sat in the meeting on First-day morning, though she had nothing to communicate to others, and part of the time felt low and discouraged; yet towards the close, her mind was comforted in the fresh revival of those expressions of the prophet Habakkuk: 'Although the fig-tree shall not blossom, neither shall fruit be in the vine; the labor of the olive shall fail, and the fields shall yield no meat; the flock shall be cut off from the fold, and there shall be no herd in the stall; yet will I rejoice in the Lord, I will joy in the God of my salvation.'

"She attended several meetings under great bodily weakness. Her last public testimony was at Westminster, where she stood up with this passage of Scripture, 'Precious in the sight of the Lord is the death of his saints;' on which she enlarged instructively and encouragingly.

"She was also led to speak instructively to those about her; at one time nearly in these words: 'To look back, the world appears trifling and vanity; and if fresh trials come, and the storm be permitted to beat as against the wall, it is good to trust in the Lord, who in gloomy seasons is the protector of those that fear Him;' and after encouraging those present to greater dedication, said, 'The highest anthem that could be sung was, "Thy will be done."' At another time, she said she believed it was right that she had given up all, and left home, whether for life or death, she must leave.

"The last few days of her life she was much engaged in supplication, dropping many broken sentences; which, though not fully gathered, were comfortably expressive of the state of her mind, breathing the language of consolation and praise.

"When near the close, her spirit seemed measurably [raised] above the last conflict; and with an animated countenance she expressed, 'O, the beauty! the excellent beauty! the beautiful prospect in view!' Then lifting up thy hands, appeared for some time in sweet, though silent adoration; after which she spoke, but little, and with difficulty; yet appeared sensible: and in the evening of the 10th of the Eighth Month, 1794, expired so quietly, that it was scarcely known when she breathed her last."

The letter referred to follows:—

Philadelphia, Second Mo. 23d, 1794.

Beloved Sister:—I make bold to address thee by letter, having understood by thy beloved daughter Abigail, that it would be acceptable to thee and would not be attended with expense to thee. It gives me no small pleasure to hear by different ways that boundless goodness, which I believe put thee forth in this thy Gospel labor, condescends to go before and enable thee to speak to the conditions of the people as one having authority and not as the scribes; my prayer for thee is that thou mayst continue humble and faithful, for without faith it is impossible to please God, by faith the mountains skip like rams, and the little hills like lambs; for who is he that can harm us if we be followers of that which is good; therefore let us put on the whole armor of Light, and as good soldiers in the Lamb's warfare, fight the good fight for whom the Apostle testifies is laid up a crown of righteousness.

I am much pleased with the young man, Peter Barker, whom thy dear daughter keeps

company with,—he appears to be a diligent, modest young man and a hopeful plant, and I have no doubt if he keeps a single eye to that Divine hand that hath so remarkably visited him he will become in due time a dignified member in the Church.

Alas, dear sister, how deeply it affected some of us on this side the water, when we heard of the death of that choice dear friend and brother and eminently gifted minister of the Gospel of peace, Job Scott, although we most surely believe he is gone to everlasting peace; yet to the church militant the loss is great, but nevertheless the will of the Lord be done, which, as one fitly said was one of the highest anthems sung in Heaven. However let us pray the Lord of the harvest to send forth more faithful laborers into his vineyard.

I must now tell thee a little how it was with us in that awful humbling time in this city, last summer, when the pestilence marched up our streets like a strong man armed; few to be seen in our streets but black men moving on in a quiet solemn manner with the hearse, from 60 to 100 per day went to their long homes, and scarcely a relation or near friend tosse them put in the ground—a searching time indeed it was. I am afraid many who made confessions and vows at that time have forsaken their sure mercy and turned again to lying vanities; it was a searching time to me, for my poor mind was for days and nights tossed as with a mighty tempest; but I never knew the advantage of resignation to the Divine will as at that time, for my mind was serene and quiet, and indeed my conduct with so much prudence and firmness, having her 3 daughters Polly, Sally and Phila, one after the other to nurse in the disorder, but all died. Indeed I have looked at things with admiration that so many of our relations stayed in the city and so few of them died, only Edward Brooks' wife and William Drinker, son of John our uncle. My son George, he is settled in Alexandria, Virginia, deals chiefly in ironware, and promises fair to succeed; his sister Mary keeps the house he left, and hath taken Abigail West for a partner, and are like to do pretty well in shopkeeping and bonnet and cloak making. Our daughter Phila is a kind of housekeeper or companion for neighbor Shoemaker. Jacob's widow, our daughter, Susan Smith and husband and three children, are tolerable well, they none of them had the yellow fever; but our troubles about our daughters Janney and Sarah continue at times, although tolerable well at present, but tribulation we must expect in this world. Beloved Rebecca Jones was much favored on this subject in our North Meeting, quoting the prophet, "I have refined thee but not with silver; I have chosen thee in the furnace of affliction," which had a good reach on Friends, and was a tendering opportunity. I find by thy letter to Margaret Hart, thou had a remarkable sense of something uncommon happening to us last summer in this city, this was sympathy with a witness. I hope thy weak frame will get better reconciled to the damp dripping weather in Old England, we shall be glad to hear from thee by every convenient opportunity. In God's Gospel love I salute thee, wishing thee health and salvation.

Farewell, this from thy friend and brother I hope in every sense of the word.

JOSEPH DRINKER.

Dear sister Elizabeth, I often think of thee, and of the solemn and weighty work thou art

engaged in, with fervent desires for thy preservation every way, my love is to thee, and if thou hast opportunity I desire to be remembered to our esteemed friend Samuel Emlen.

From thy sister,
HANNAH DRINKER.

Dear Elizabeth, I unite with my sister Hannah in addressing thee with much affection and love. From thy cousin,
SARAH HARTT.

Dear sister Elizabeth Drinker, I desire if thou should have opportunity, to tell our esteemed friends Sarah Harrison, Samuel Emlen, George Dilwin and his dear Sally, I at times think of them, and wish that grace, mercy and peace may continue to be their and thy portion, sayeth Joseph Drinker.

The Testimony and the Letter are instructive as showing the nature of that religious concern under which all who go forth as "ambassadors for Christ" ought to travel in the work of the ministry—not merely a belief that there is much spiritual ignorance and moral evil in the world, and a hope that we can do something to lessen it. This alone is insufficient; and there should be added to this a conviction, that we are acting under the guidance of the Head of the Church, and laboring in the ability which He gives. For it is his prerogative to choose, prepare and commission his own instruments.

It is not difficult to suggest innumerable qualifications and methods by which the efficiency of the Church might be improved; but, after all, is not the chief requisite the indwelling of the Holy Spirit? The Apostles were instructed not to leave Jerusalem until "endued with power from on high." "Without me" says Christ, "ye can do nothing." "I can do all things," says Paul, through Christ who strengtheneth me." He also speaks of Christ working in him mightily. It was the outpouring of the Spirit upon the Apostles on the day of Pentecost which endowed them with power; and we know how mightily this wrought in them to the saving of souls. Undoubtedly the great need of the Church at the present time is a deeper baptism of the Spirit. This, and this alone, will enable it to meet its solemn responsibilities. For this, as on the day of Pentecost, prayer, with one accord and without ceasing, should be made, until the baptism comes.—*F. Merriek in The Independent.*

"SEE THIS GREAT THING."—Samuel, in withdrawing from his office to make way for the king whom God had given them, while upbraiding the nation for their waywardness and ingratitude, invokes a phenomenon, which all accepted as an evidence of the sanction of Jehovah to his prophet's last words of warning. The sign is a thunder-storm in the midst of wheat-harvest. In our northern and more variable climate a thunder-storm in harvest-time would certainly be no prodigy; in England, at least, it is the very season of thunder-storms. Not so on the eastern shores of the Mediterranean. Wheat-harvest would be from the beginning of May to the middle of June. I have seen wheat reaped in the Jordan Valley early in April. In Judea the season is a month later, and in upper Galilee and under Hermon about another fortnight later. From April to October, rain very rarely falls, and the season of thunder-storms is from December to February. Throughout the summer the sky is cloudless. This is owing to the uniformity of the wind. It is only the west winds that bring clouds, and these winds usually prevail from

October to April. The east wind, which is hot, dry, and parching, from the desert, is uncertain, and seldom lasts long. During the summer, the winds generally blow up or down the valleys and the coasts, either from the north or the south, more generally the latter, and are never charged with moisture. But a sudden breeze from the west brings up the clouds, and these, when they meet the heated atmosphere over the parched soil, soon become surcharged with electricity, and burst into a thunder-storm. During four summer seasons in Syria I only once encountered such a shower; and this was under Lebanon, when the wind, suddenly shifting from north to south, brought up for an hour the moisture from the Mediterranean, and dispersed it over the land with a few thunder-claps.—*The College, Durham, England.*

THE PILOT.

I hope to meet my Pilot face to face,
When I have crossed the bar.—TENNYSON.

BY MARGARET J. PRESTON.

Who is the Pilot, into whose sure hand,
Waiting the summons, as the day grows dark,
Upon the border of this earthly strand,
We may commit our bark?

Can Reason rule the deck, and firmly steer
Through depths where swirling maelstroms rave
and roar,
And madly threaten to overwhelm us, ere
We reach the thither shore?

Has calm Philosophy, whose lore unrolls
The axioms of the ages, ever found
A perfect chart, to map what rocks and shoals
Beset the outward bound?

Can Science guide, who, with exploring glass,
Sweeps the horizon of the restless tide,
And questions, 'mid the mists that so harass,
"Is there a father side?"

Dare old Tradition set its untrammelled light
Upon the prow, and hope to show the way,
Through gulphing troughs that blinder make the night,
Out into perfect day?

Nay,—none of these are strong to mount the deck,
And, with authority assured free,
Guide onward, fearless of the loss and wreck
That crowd this soundless sea.

O ye who watch the ebbing tide! what saith
The wisdom that through ages hath sufficed
For questioning souls? The only chart is faith,
The only pilot, Christ!

SELECTED.

"If any man will do His will, he shall know
of the doctrine."—*John vi. 17.*

Amid the schoolmen's wordy strife
I bend my pained and wearied ear,
With all its quickened sense attent,
Some snerer, safer voice to hear.

My unskilled hand seeks not to wield
The critic's scalpel, keen and cold—
To touch unbid the jostling ark—
Nor yet the scales of judgment hold.

I dare not mark my brother's path—
I know not what his work may be—
Enough to hear the Saviour's call—
Come thou, leave all and follow me."

And so I take His gracious word;
I trust for all I may not see;
Thro' every dark and stormy way,
I know His hand is holding me.

In learned tomes I've sought for light,
And found myself in cloudland still—
The shorter way I fain would take,
And do from day to day His will.

J. E. P.

Lynn, Mass., Ninth Mo. 1889.

POEMS OF SPRING.

THE JOY OF THE SEASON.

The swift is wheeling and gleaming,
The brook is brown in its bed,
Rain from the cloud is streaming;
And the bow bends overhead.
The charm of the winter is broken!
The last of the spell is said!

The eel in the pond is quickening,
The grayling leaps in the stream;
What if the clouds are thickening?
See how the meadows gleam!
The spell of the winter is shaken!
The world awakes from a dream!

The fir puts out green fingers,
The pear-tree green softly blows,
The rose in her dark bowen lingers
But her curtains will soon unclose;
The lilac will shake her ringlets
Over the blush of the rose.

The swift is wheeling and gleaming,
The woods are beginning to ring,
Rain from the cloud is streaming;
There, where the bow doth cling,
Summer is smiling afar off,
Over the shoulder of Spring!
—*Robert Buchanan.*

FOR "THE FRIEND."

Breathlessness.

Having derived much instruction from the perusal of a recent essay on breathlessness, published in his "Physiology of Bodily Exercise," by Dr. Fernand Lagrange, I have thought a concise summary of his views on the subject would be acceptable to many readers of THE FRIEND. E. M.

Have you ever found yourself within sight of the station and been afraid of missing the train? You have a quarter of a mile to traverse, and you see from your watch that you have only two minutes. You will have to run, and for years you have been accustomed to the measured pace of the man who walks when he has plenty of time, and takes a cab when he has not. But you want to catch that train, and plucking up courage you set off as hard as you can run. Your legs are strong, and it does not hurt them when you run. However, after a few seconds, a peculiar distress seizes you. Your breathing is embarrassed, a weight seems to press you down, and a bar to be fixed on your chest. Your respiratory movements become jerky and irregular. With each step, distress increases and becomes more general. Your temples throb violently, an insupportable heat rises to your brain, an iron band seems tied around your forehead. Then comes on a singing in your ears, a disturbance of sight; you become pale and dishevelled.

You reach your goal and sink on the seat, but the distress continues, and for some minutes you are out of breath, and the hurried movements of the chest make you resemble a man seized with a violent attack of asthma. Why is it, that while your legs have done the exercise, the lungs are fatigued? A man running or going up-stairs, is forced to stop, not to rest his legs, but to take breath. Dumb-bell exercises, or holding out weights at arms' length, quickly fatigue the limbs, without causing any marked disturbance in the respiratory functions. When we are obliged to stop these exercises, it is not because we are short of breath, but because our muscular force is expended.

Why is a horse more out of breath after a gallop than after a trot? Our first idea would attribute the more prompt breathlessness to greater swiftness. But we can slow down the gallop of a horse until it falls behind another horse that is trotting; and however slow a gallop may be, it will more quickly make a horse out of breath than an equally rapid trot.

In a horse running, it is not inspiration which is difficult, it is expiration. In this exercise we experience no difficulty in getting air into the chest; it is on the contrary, the exit of air which is difficult and incomplete. The observations of a friend of the writer, shows that inspiration—that is taking in air—is free, easy, deep and three times as long as expiration—that is throwing air out of the lungs. We will find that in every muscular exercise, the intensity of breathlessness is in direct ratio to the quantity of force expended in a given time.

Respiration has to defend us from a very pressing danger, by eliminating carbonic acid from the blood, the accumulation of which, in the body, can cause death in a few minutes. This gas is constantly forming in the body of animals, and its poisonous effects are diverted by the action of the lungs, which eliminate it from the blood. The presence of an excess of carbonic acid in the blood, is the cause of the sensation, which instinctively urges us sometimes, even against our will, to render more active the respiratory apparatus. Several causes may bring about an accumulation of carbonic acid in the body.—1st. The emanations from a brewing vat may introduce the poison from without into the air-passages. 2d. A child dies of croup because the poison is not eliminated in sufficient quantity through the obstructed air-passages. 3d. The accumulation of carbonic acid in the blood may come through excessive production, and is what occurs in violent exercise.

Breathlessness occurs whenever muscular work produces, in a given time, more carbonic acid in the blood than the lungs can eliminate in the same time.

One of the first effects of exercise is to increase the frequency of the heart-beat, and consequently to quicken the blood-current. The lungs, like the other organs, become the seat of a more active circulation, owing simply to the increased frequency of the heart. Again, blood charged with carbonic acid, through a reflex mechanism, is driven more energetically towards the organ which will free it from this gas. From these two causes, there results an unusually large flow of blood, an active congestion of the lungs. As a consequence, the heart, notwithstanding the increased frequency of its beat, does not give the blood so powerful an impulse as in ordinary circumstances, and the blood-pressure falls. The current of blood being slowed, there is a kind of stagnation in the lungs, and passive congestion follows. The venous blood can no longer reach the air cells, in order to get rid of its carbonic acid, and there is a reflux to the heart. If relief is not now obtained by rest, the heart will stop beating and death will ensue.

PROFESSOR DELITSCH was most economical in his use of time; and while he was very approachable and always ready to receive a student he once made this remark, after somebody had made rather a long ceremonious call: "I never care to see any one unless I can get some good or do some good."

The Mystery of the Sphinx.

BY CHARLES S. ROBINSON.

At the foot of the pyramids of Ghizeh, immediately below one who is sitting up on the ledges, there rises out of the veridulous sands, confronting the observer like a statue which looks toward him but not at him, one of the most singular creatures that ever the art of sculpture has given to the ages. A fantastic imagination of some forgotten artist has planted there in the desert an image with one of the oddest heads and one of the awkwardest bodies that can be conceived.

This is what has been known as the Great Sphinx. It is massively constructed, and carved with admirable ingenuity, but no line of any style of beauty has it anywhere to exhibit. The ears are enormous, and indisputably long; the nose is gone beyond criticism; the mouth is now ragged, thick-lipped, and uncouth; the beard is boorish; the open eyes stare blankly into space; the wig bags flatly and flaringly out on either side; the chin has lost half of its stony hair and all of its ancient semblance of dignity; the face was formerly painted, but the red color has been washed off by the sand-showers on the weather side. Altogether the structure seems pretty much gone under the effects of age and decrepitude, and has quite the look of a used-up beathen idol.

And still all tourists agree that there remains a tranquil majesty in the mien of it, which every one would recognize the moment his eyes caught a glimpse of the forehead alight in the air. Even the fastidious Dan Stanley appears to have considered it a "giant representative of royalty." And he further pronounces that "it fitly guards the greatest of royal sepulchres." So finally he offers his testimony that "with its half-human, half-animal form, it is the best welcome and the best farewell to the history and to the religion of Egypt."

There it stands very quietly; and everybody must be allowed, with due charity, to cherish his own opinion. Coarse in its construction as a work of art, stiff and clumsy in every lineament, it is yet able, as the note-books of a thousand visitors testify, to impress the souls of Eastern travellers with the vague sense of its greatness. It is better seen from below. The first sight of it, when caught as a part of that matchless landscape displayed from the top of the Great Pyramid, inevitably belittles and dwarfs its proportions. It looks grandest of all from the long and winding approach of the old path. Most persons know that the general figure is of a colossal form, sculptured roughly from the cliff on which it reclines; indeed, it is a lofty rock cut into a symbolic shape representing a lion lying down, with the face of a human being, erect above the forepaws,—a brute's body with a man's head and neck. The body seems to lie reclining at length in the sand; the head is poised finely, with noble features; the figure stands more than fifty feet high, and once had a royal helmet above; the stone is nummulate, full of millions of minute marine shells, thus showing that years ago this part of the plain lay under the waters of the distant sea.

The entire effect is much lowered because of the overpowering achievement of size in the pyramids close by. Harriet Martineau has an amusing account of her eager anticipation as she went forth upon these excursions around Cairo. Always she said to herself, "Whatever

else my eyes will see, they will see the Sphinx." But when she rode up toward the Great Pyramid she was so absorbed that she missed the sight altogether of this idol, and thought afterwards it had been only a heap of rock piled up there amid the interminable sands of the desert. But an attentive contemplation of it subsequently enabled her to reach, and even retain, her former enthusiasm. She says it made her half afraid of it. She noticed particularly that they had placed a man "sitting in a fold of the Sphinx's neck, as if a fly might settle on a horse's mane; in that crasse he reposed, while far over his head extended the vast post-house of the jaw, and above that the dressed hair upon either side of the face, each bunch of it a mass of stone which might crush a dwelling-house; so life-like, so huge, so monstrous,—it is really fearful. The full gaze and stony calm of its attitude almost turn one to stone."

It is likely, however, that the Sphinx owes much of its singular impressiveness to the sense of mystery which for generations surrounded it.

There is no necessity now, certainly, for further keeping up the sense of mystery which has had so much to do with the fame of this image. The sand, which covered all the front of the idol, has been excavated; something looking like a temple or votive chapel was found just between the paws the lion extends along the face of the rock; statues of King Khafra, three in number, one of which is now in the Bulak Museum, were standing quietly waiting to be dug up and to tell their story. The making of this rock into a figure of a deity was begun by Cheops; it was finished under the direction of King Chébron; and it was dedicated to Harmachis, the God of the Living Sun. This is learned from a large tablet covered with hieroglyphics which was found fixed upon the breast of the animal down beneath the sands of the ages. There used to be an altar in one of the chambers, and this was so located that the sweet savor of a sacrifice might most easily be supposed to reach the god's nostrils.

That is to say, there is no longer any mystery of the Sphinx; it represents a transformation of the deity Horus, so an inscription discovered lately at Edfu relates; the god, in order to vanquish Typhon, the evil spirit, took the shape of a human-headed lion, thus he arose upon the imagination of those ancient idolaters in the remote past for their worship. Hence the Sphinx was the colossal embodiment of Egyptian idolatry at its highest power and basest degradation. The son-god was not equal to his own defenses, and the structure lies in ruins. A strange sort of beauty must once have graced it as a thing of art; but the Mamelukes used the big head for a target when they practised their artillery in shooting. That was what broke the nose and tore fragment after fragment out of the wig and the beard and the chin. Then the open desert invited the winds to come and bury the enclosure below; and so the old battered creature gazes out across the ages, lonely and lost in its vain attempt to summon its friends for rescue, with the far-off look of a deserted monarch. And so Egypt stands crownless to-day; the obelisks, the pyramids, the sphinxes—all are desolate. They lingeringly proclaim their own humiliation before their conqueror. And that was what the Lord said by his prophet in his Word: "He shall break the images of Bethshemish that is in the land of Egypt; and the houses of the gods of the Egyptians shall He burn with fire." This was what the sad Jeremiah wrote while he was an exile in that coun-

try; his eyes had to bear the pains of sights he saw, but he hoped on and kept the faith.—*The Sunday School Times.*

FROM "THE SUNDAY SCHOOL TIMES."
Original Lesson-Lights.

BY H. B. TRISTRAM, CANON OF DURHAM.

"*A Sower Went Out to Sow.*"—Just at the beginning of the year we arrived at the plain of Gennesaret, only about three miles in extent, enclosed north and south by ranges of steep hills, and westward by a mighty basaltic dyke, once a stream of molten rock which has poured down and encroached on the plain. The whole plain is strewn with huge black blocks and stones of smaller size which have become detached, and, either through earthquakes or other causes, have been scattered over the surface of the lower ground. The plain is, and probably always was, unfenced, and at this time, freshly plowed in its whole extent, it was simply one level dark brown expanse, with no tree to relieve the monotony, which was broken only by narrow lines of green oleanders, overshadowing the three rivulets which intersect it. Footpaths, fresh trodden on the plowed fallow, intersected it in all directions. The plowing and the rude brush-harrowing being completed, the sower was beginning to sow. He had literally come forth to sow; for he came from the village of Irbid, several miles off, on the hills to the south. His basket of seed slung under his left arm, with steady measured pace he marched up and down his portion of the open field, jerking his handful of corn before him at each step. Two narrow paths intersected his corn-patch. These necessarily recurred their share of seed, where it did not long remain; for a few jacksaws and some little flocks of larks and buntings followed the sower, and soon swept the pathways clean.

"*Other Fell on the Rock.*"—The seed on the rich light soil was soon brushed in by a lad with a bunch of twigs used as a rake. But much of this must come to nought. We spoke just now of the rocks and stones with which the plain is strewn. Most of these boulders have sunk into the black earth, but only far enough to be covered with a sprinkling of soil by the harrow. Now all the surface is moist, and the seed will germinate, very soon to be burned up by the scorching sun, like grass on the house-top. Every here and there we may see small stalks protruding. They are the stumps of the most noxious weed of Gennesaret, a sort of astragalus, with roots penetrating, as we found by experiment, several feet deep, and which the fellahin are too indolent to dig up and extirpate, contenting themselves by chopping down the year's growth with their mattock. Close alongside of these boulders and rock clumps are patches of the richest soil the earth produces, the whole consisting of decomposed basalt, from the stones which strew the surface. In good seasons, when there has been abundant "latter rain," a hundred fook is not an unusual crop in this fertile nook. We were here witnessing even to its minutest details the scene that was before the eye of our Lord and his hearers, as he sat in the bows of a fishing-boat drawn up close to shore in front of the plain.

Spring in Gennesaret.—I have returned in early spring to find the black winter mantle of Gennesaret transformed into a brilliant green carpet, spangled with flowers of every hue, scar-

let and pink predominating, anemone, ranunculus, iris, poppies, and gladioli. Here and there brown-burned patches, where on the rock was no depth of earth; and still more frequently the tough young shoots of the astragalus thorn, casting their long pinnate leaves over the tender blade of young corn, which they will soon strangle. The oleanders in long sinuous lines, by the shore and little streams (the willows by the watercourses), were simply clad in a mantle of pink, and in the early morning were resonant with the music of song-birds, while the call-notes of quail and francolin echoed from every corn-patch. It was a lovely picture of the lavish beauty of nature and of the bounty of nature's God. Again I have returned in the end of May, when the reapers were beginning to ply the sickle. The shallow rock patches were hardly observable; the prickly weeds and giant thistles had asserted their claim to nearly one-third of the surface, but the crop elsewhere was rich and abundant, and may have yielded its hundred-fold.—*The College, Durham, England.*

MAY I close these words by an illustration thrown from the lips of a rough, sea-faring man, one of the few survivors of a great wreck which took place some years ago, when a crowded steamship foundered in the stormy waters of the Bay of Biscay? As soon as those who had escaped from the sinking vessel found themselves in a small boat on the raging sea, they discovered that their chief danger came not from the massive sweep of the waters, but from the angry, breaking waves which descended upon them from time to time, and against which every eye and ear had to watch, with unabated attention. As the shades of evening drew on, the survivor who told me the story, said that his heart sank at the thought that in the darkness of the night it would be impossible to see those insidious breakers, and that sooner or later, the boat would be engulfed by them. But with the darkness there came a corresponding safety. Every one of those dangerous waves, as it rolled towards them, was crested with phosphoric light which showed its coming afar off and enabled the seamen to guard against it as carefully as if it had been full daylight. The spirits of the little company revived, and though from time to time the cowards or the desperadoes among them were for turning back, or driving an oar through the frail boat's side, the consorcations guided them through the night, and they did at last, in the early dawn, catch a view of the distant vessel, by which they were saved.

That crest of phosphoric light on the top of those breaking billows was as the light of Divine Grace, the compensating force of Providence in the darkness of this mortal night, and on the waves of this troublesome world. The perplexity, the danger, the grief, often brings with it its own remedy. On each bursting wave of disappointment and vexation, there is a crown of heavenly light which reveals the peril, and shows the way and guides us through the roaring storm. Out of doubt comes faith, out of grief comes hope; and "to the upright there ariseth up light in the darkness." With each new temptation comes a way to escape; with each new difficulty comes some new explanation. ***

He who has guided us through the day, may guide us through the night also. The pillar of darkness often turns into a pillar of fire. Let us hold on, though the land be miles away; let us hold on till the morning break. ***—*Dean Stanley.*

FOR "THE FRIEND."

The title of the article published on pages 315, 323 and 331 of the present volume of THE FRIEND, should have been printed as "*The Overseers of the Public Schools founded by Charter in the Town and County of Philadelphia in Pennsylvania,*" etc. The printer was furnished with the correct title, but omitted the first three words in all three sections of the article. The error was not noticed until too late to correct it in any of them. The first section cannot be fully understood without this explanation.

G. V.

Fifth Month, 1890.

Give Them a Chance.—Boys very early manifest the peculiar traits of character which determine the course of their whole lives. When John Beach came to America, a boy of about fifteen, he was penniless and found no friend on the continent who could help him, his uncle whom he expected to meet having gone to the South. He applied to the foreman of a manufacturing establishment for permission to learn a trade. The foreman turned him away saying: "We require a boy whom we undertake to teach a trade to deposit fifty dollars as security that he will remain until his apprenticeship expires, and you have no money. The young man went away disappointed, but not discouraged. He went to a brick-yard and carried bricks for 50 cents a day until he had saved fifty dollars, and returning to the foreman said: "Now I have the money and am ready to deposit it with you if you will allow me to learn a trade." Again the foreman repulsed him because he thought so ungenerally a youth could never be a mechanic.

The young man was again disappointed and chagrined, but not cast down. He went to the proprietor and told his story. The proprietor of the establishment was sure that a boy who would make such sacrifices and persist so long in his purpose to learn a trade ought, at least, to have a chance, and going to the foreman he ordered him to take the young man and give him a trial. He did learn a trade, and by industry and perseverance rose until he became the leading ship-builder in America.—*Exchange.*

Stick to One Thing.

"Unstable as water, thou shalt not excel," is the language of the Bible. Whoever expects to succeed in any undertaking, must enter into it with a hearty and earnest will to do his best. When a trade or profession is chosen, no obstacles, be they large or small, must be allowed to stand in the way of mastering that trade or profession. However much we may appreciate the old-time custom of indenturing apprentices, the system, in its practical results, operated almost always for the lasting good of the apprentice. Generally it insured to him a good trade and a wholesome discipline that fitted him for success in business. At the present time very many young men undertake to acquire a trade, and after a brief time abandon it, because there are unpleasant duties to be performed and obstacles to be overcome. They consider themselves accountable to no one, and go and come at the bidding of caprice, or an unsettled, easy mind. The result of this is to send into the world young men who have not half learned their trades, of unstable character, who drift from post to pillar, and who succeed in nothing but the wrecks of the highways of life, melancholy wrecks of men. We would earnestly entreat every young man, after he has chosen his vocation to stick to it; don't leave it because hard blows are to be

struck or disagreeable work performed. The men who have worked their way up to wealth and usefulness, do not belong to the shiftless and unstable class, but may be reckoned among those who took off their coats, rolled up their sleeves, conquered their prejudice against labor, and manfully bore the heat and burden of the day. Whether upon the old, worn-out farm, where our fathers toiled diligently, striving to bring back the soil to productiveness, in the machine shop or factory, or in the thousand other business places that invite honest toil and skill, let the motto ever be—"Perseverance and industry." The baby training of the nursery was good enough in its place, but it won't answer all the demands of an active life. This is not a baby world. We must expect to be knocked and jostled about in the stern conflict, and get run over, if we are not on the lookout and prepared to meet the duties of life with a purpose not to shrink from but to fulfill them. A young man with a good trade or honorable profession, as he goes forth into the world, with his mind made up to stick to his trade or profession, is not obliged to ask for many favors. He will hew his way to success, while the unstable and shiftless will grow tired, despair and fall.—*Selected.*

Natural History, Science, etc.

The United States Department of Agriculture has issued a number of the Journal of Mycology, having special reference to those forms of fungi which affect the farmer. Among these are the *Road Fungus of New Zealand*, which is described by R. Allan Wight, of Alaska, New Zealand. He says:

"This fungus attacks a great variety of tree roots, amongst the most conspicuous of which are the apple, pear, peach, and all other common orchard trees. The white thorn is also very subject to its attacks, as well as a great many *Abies* and several of the native trees and plants. It also attacks the cabbage, the potato, docks, sorrel, fern, and in fact is almost omnivorous, which is a marked peculiarity. The only plants I have ever known to resist it are resinous pines and roses; the former suffer at first and the leaves turn yellow, but they ultimately recover, and I never knew one to succumb, whereas the contrary is the case with all other plants attacked."

"In hedges of white thorn, where roses have been planted at intervals, the thorns are killed and the roses remain intact and quite uninjured. In an orchard it will appear in patches, killing the fern and sorrel and spreading until it reaches a fruit tree; it then attacks the bark round the stem just under the ground, which speedily rots, presenting the appearance of having been cooked, and has an offensive smell; it then proceeds along the roots and the tree soon shows withered leaves, which drop off, leaving it bare, and finally it falls over and lies on the ground. Its movements are uncertain; sometimes a tree here and there dies; sometimes a whole row, and very often acres are swept off. Many entire orchards of fine trees are killed in a few years. This fungus is never found in clay or other damp soils, but always in dry, friable lands. ***

"The pest is most plentiful on the skirts of the primeval forests and on fern lands adjoining where no cultivation has ever been resorted to. Whole crops of potatoes are destroyed on such lands, and on dry lands where native tree stumps remain it is very prevalent.

"My own opinion is, that it is a fungus native

to and probably peculiar to New Zealand (in the North Island only). All my experiments with sulphur and lime have failed. Kerosene-oil, used in winter, has alone been of any use, and that has been used pure in winter without killing the tree. The fungi of New Zealand are legion and very destructive, but this is the worst, and particularly as it is confined to dry soils. Where I am now writing, 500 trees have been killed within the last two years, and all remedies tried have failed."

Byron O. Halsted writes of a fungus that was found at New Brunswick, N. J., growing on cucumber leaves. It was also found to attack squash and pumpkin leaves. In some cases large fields of cucumbers were almost ruined by this plant.

The potato rot has been unusually abundant in New Jersey during the past season. The cultivated sweet scented violet has also suffered from a fungus, entailing considerable loss on some growers.

The Black rot of the grape is due to a parasitic fungus; and to prevent access to the fruit of the spores of this plant, the practice of enclosing the bunches in paper bags has been resorted to. To be fully effectual this ought to be done soon after the flowers have expanded. Spraying the fruit with a solution containing 6 lbs. of sulphate of copper and 4 lbs. of lime to 22 gallons of water, has also proved useful.

Apple scab is another fungus disease, which has been treated by spraying the trees with different chemical solutions, capable of destroying the fungous growth. These applications should be made almost as soon as the buds begin to swell.

A correspondent from Bermuda Islands wrote that on the 28th of Eleventh Month, his section was visited by a very heavy fog, and a few days later his crop of six-weeks beans was badly mildewed. He gave the plants a thorough dusting with flowers of sulphur, and within a week the fungus had entirely disappeared.

Disappearance of a Butterfly.—We were sauntering through a firwood in Surrey, when suddenly this insect, to us then quite unknown, came sailing by. The red underwing has an expanse of wing of some three inches, and derives its name from the deep red, almost approaching crimson, of the lower wings. A broad band of black runs across the centre of the red, so it will easily be imagined that so gay an insect would be very conspicuous. All at once, to our exceeding bewilderment, it disappeared, reappeared almost directly, and was then gone again. After this sort of thing had gone on for some little time, we were at length able to track it to its temporary resting-place on one of the fir-trunks. Its upper wings, mottled and barred with various shades of brown and gray, were so exactly the tint of the bark, and so effectually hid the brilliancy of the lower wings, that the mystery of its occasional disappearance was thoroughly cleared up and explained.—*Hulme's Wayside Sketches.*

Black and Green Teas.—Among the mountains, and at a height of 2,000 and 3,000 feet above the level of the sea, I found the black-tea district, which I was anxious to see, and the existence of which had been denied by my affectionate friends the mandarins. Having been in several green-tea countries further north, I was desirous to ascertain clearly whether the plant was the same species in both places, or whether, as generally believed, they were different. I was now fortunate enough not only to find an

extensive tea district, but also to be present when the natives were picking and preparing the leaves; and I not only procured specimens for my herbarium, but also a living plant, which I afterwards took to the green-tea hills of the north, and found, on minute comparison, that it was identical with the *Thea viridis*. In other words, the black and green teas which generally come to England from the northern provinces of China are made from the same species; and the difference of color, flavor, &c., is solely the result of the different modes of preparation.—*Fortune's Travels in China.*

THE FRIEND.

SIXTH MONTH 7, 1896.

We have received from Kezan-Paul, Trench, Truber & Co., of London, a copy of *The Pilgrims; an Allegory of the Soul's Progress from the Earthly to the Heavenly State*, by Charles Fox.

The allegorical method of enforcing truth is one that has often been used, and by no one more successfully than by John Bunyan, whose *Pilgrim's Progress* is one of the best books of 200 years ago, which still retains popularity.

There is a general similarity in the plan of the present volume and that of Bunyan, but much difference in the details. Charles Fox has not wrought into his story so many of the striking incidents which attract the reader of the older *Pilgrim's Progress*—such as the wicket-gate, the scenes in the house of the Interpreter, the fight with Apollyon, the imprisonment in Doubting Castle, &c. It may be supposed, that the stormy period of English history in which Bunyan lived, suggested to him martial illustrations of the path he was trying to depict; but that Charles Fox, as a member of the peaceful Society of Friends, would more naturally describe the path of his pilgrim in a less warlike style. He represents him as an inhabitant of the city "Dewit," before he set out on his pilgrimage. In the course of his journey he met with many persons, some of whom became fellow-pilgrims, and others endeavoring to discourage him, or to turn him back to the city of Dewit.

We have not examined the book with sufficient care to form a decided judgment as to the correctness of some of the attempts to represent spiritual experiences by outward incidents—still less to endorse every expression contained in it—but it contains many suggestive passages calculated to give a profitable direction to the thoughts of the reader.

We have received a copy of a brief printed Address to its members, issued by New Bedford Monthly Meeting, Mass., dated Third Mo. 27th.

Although short, it contains some paragraphs which are encouraging, and seem to show, on the part of those who prepared it, an appreciation of the true ground of useful religious labor. Such are the following passages:

"It is by yielding to the gentle influences of the Holy Spirit in each heart, that we are or can be prepared for the work of the Lord, especially in this day of upheaval and general confusion of religious belief; when nothing short of the pure witness for Truth in the heart and conscience will satisfy the earnest inquirer.

The great object of all religious effort should be to bring mankind to that foundation which is sure, even Christ Jesus the Lord—who is "the way, the

truth and the life,"—that they may know a growth and establishment in Him, in whom their strength and labor for the gathering and upbuilding of the Church must consist.

For He says, "Without me ye can do nothing," and again, "He that gathereth not with me scattereth." Even our Christian activities must be directed by the Divine Hand.

Comparing the past of our Society with the present, we must see the great loss sustained by us in substituting methods, and making changes in various ways, seeking to conform more nearly to other societies in their belief and manner of worship, so opening the way for our younger members to accept and embrace views and practices not in accordance with our well-known order and usages.

We know very little about the recently past history or the present condition of New Bedford Monthly Meeting, as to how far the changes which it warns against have affected its members, but we should rejoice to see in it, and in every other part of the Society of Friends, a revival in primitive doctrines and faithfulness, so that their members might experience "a growth and establishment in Christ."

SUMMARY OF EVENTS.

UNITED STATES.—The decrease in the public debt for the Fifth Month amounted to \$6,061,871. Total amount of cash in the Treasury, \$638,362,175. The President has sent to Congress a message, with attached the Secretary of War's report, in reference to the recommendation of the Pan-American Congress for the establishment of an International American Bank. The draft of a bill to authorize the incorporation of the bank accompanies the message.

On the 2d instant the Senate adopted the conference report on the Army Appropriation bill, retaining the clause providing for the sale of liquor in canteens. Only 8 Senators voted against the bill—5 Republicans and 3 Democrats—including those faithful champions of temperance, Colquitt and Blair. The latter remarked that the Secretary of War's report of our Government officers of the army would be allowed to sell liquor to the soldiers.

The ten principal breweries in San Francisco have been sold to an English syndicate for \$7,500,000.

A despatch from Guthrie, Indian Territory, says that the Iowa Indians have formally accepted the offer of the Government, made through the Cherokee Commission, to sell their lands to the United States for \$1.25 per acre, they having reserved in severity 80 acres per capita. The Iowa reservation is composed of 228,418 acres of land. After the Indians have been allotted their lands, the territory there will remain 221,615 acres to become public domain.

In 100 years the United States has spent \$93,000,000 on lighthouses, says *The Globe-Democrat*. This year the amount expended will be \$3,500,000.

In Chicago, on the 21st ultimo, on complaint of the Deputy a party of constables, armed with axes and crowbars, broke into the gambling house of George Hawkins and carted away all the gambling implements in the place. There were about two tons of these implements, and their uses being proved, they were destroyed by order of the Mayor of Chicago. That is the second raid of the kind made by the *Nos*. "This course is taken for the purpose of demonstrating that gambling is going on in the city in spite of the claim made by the city administration that, in obedience to orders, the police have closed all of the gambling houses."

The Iowa State Congregational Association, recently in session in Des Moines, decided to take up the fight for public schools and against the Catholics.

On the 30th ultimo, a passenger train ran through an Iowa bridge, and out a third of the way. The engine, with its tender and first car, which was filled with passengers, plunged into San Antonio Creek. The weight of the engine and the first car broke the couplings, and left the other two cars of the train standing on the track. The bridge was struck and the weight was sufficient to break open the front and many passengers were thrown into the water. It is thought that thirteen persons were drowned.

The deaths in this city last week numbered 304.33 less than during the previous week, and 89 less than during the corresponding period last year. Of the

foregoing, 149 were males and 155 females; 43 died of consumption; 33 of diseases of the heart; 20 of pneumonia; 17 of inflammation of the brain; 10 of cancer; 10 of diphtheria; 10 of convulsions; 9 of inflammation of the stomach and bowels; 8 of marasmus and 8 of old age.

Markets.—W.—U. S. 4½, 116 a reg, 102½; coupon, 103½; 4½, 120½; currency 6¼, 116 a 120.

COTTON was quiet on a basis of 12½ cts. per pound for middling uplands, a decline of 4c.

FEED.—Winter bran, choice, \$16.00; do, fair to prime, \$15.12½; \$15.97½ winter, super, \$15.00. W.—Western and Pennsylvania super, \$2.50 a \$2.75; do, do., extra, \$2.75 a \$3.35; No. 2 winter family, \$3.50 a \$3.75; Pennsylvania family, roller process, \$4.00 a \$4.50; Western winter, clear, \$4.25 a \$4.50; do., do., straight, \$4.65 a \$5.00; winter patent, \$5.00 a \$5.15; Minnesota, clear, \$3.75 a \$4.25; do., straight, \$4.50 a \$5.10; do., patent, \$5.25 a \$5.65. Rye flour sold in a small way at \$3.25 per barrel for choice.

GRAIN.—No. 2 red wheat, 90½ a 91½ cts. No. 2 mixed corn, 33½ a 40 cts. No. 2 white oats, 35 a 35½ cts.

SHEEP.—Extra, 5¼ a 6 cts.; good, 5¼ a 5½ cts.; medium, 4½ a 5 cts.; common, 4 a 4½ cts.; culls, 3 a 3½ cts.

LAMBS.—Lamb, 7 cts. HOGS.—Good Western, 6 a 6½ cts.; common, do., 5½ a 5½ cts.; State, 5¼ a 5½ cts.

FOREIGN.—W. E. Gladstone, speaking at Howarden, on the 27th of Fifth Month, predicted an early general election. He denounced the present system of publicans, and said that the publicans may be deprived of their licenses. The whole content of the license system, he said, ought to be vested in local elective bodies. It would add £300,000,000 to the National debt to purchase publicans' licenses. The working people, knowing as they do the social origin of the liquor traffic, ought to protest en masse against the Government's immoral licensing plans.

The London *Past*, discussing the fisheries question, says it thinks that France, having no territorial rights in Newfoundland, ought not to ask for territorial compensation. It says that the rights on the coast of Labrador being given instead, and says further, that France is not justified in ignoring Newfoundland, because, if the latter should carry out the present threat, to quit the empire, England would no longer be concerned in the matter.

The London *Standard*, dated the 2nd instant, says: There is great speculation going on at present in the shares of the Kentucky and Tennessee Land Companies. In some cases the shares have rapidly risen, until they now bring from 250 to 300 per cent. premium. The London *Standard* says that the Government is being greatly overdone, and predicts that the present inflated prices cannot be maintained.

An appalling famine prevails in the Noudan. People are eating dogs, cats, rats and snakes to keep from starving. Hundreds are dying daily.

A French treaty, which is to apply to one from the Queen of Denmark, is published. In his letter the Czar promises a strict inquiry into Siberian scandals, and says he will punish heavily excesses of severity on the part of officials. Lastly, he promises to instruct his Ministers to draft measures of amelioration.

The Village of Raphanie, in Armenia, has been destroyed by an earthquake. A number of mineral springs spouted from the crevices made in the earth by the shocks, and the flow of water was so great that the adjacent fields were flooded. The earthquake was preceded by rumblings, which caused the inhabitants to flee from the village, and they thus escaped death from the falling houses. No lives were lost whatever.

Petitions to the Powers are being circulated for signature in Crete, demanding that the Governor almost exclusively of the Cretan people, that all fiscal revenues be ceded to the Cretan Administration; that the decisions of the Cretan Assembly be submitted to the Governor for sanction, without reference to the Porte; that the native police be re-established; that the Turkish troops be withdrawn, and that the tributes be abolished.

The northern part of the City of Sophia has been wrecked by a hurricane. The loss of life is considerable. Among the soldiers the killed and injured number eleven. The loss among the inhabitants has not yet been ascertained. The damage to the palace amounts to \$300,000.

A telegram from Lima, Peru, reports that the ac-

verest earthquake known there for many years, occurred about ten minutes before two o'clock on the morning of the 2nd instant. It was followed by two other shocks, which, though milder than the first, were of more than the average severity.

The project of a railway to Alaska is about to take definite shape. Application will be made to Parliament for incorporating the Vancouver, Northern and Alaska Railway and Navigation Company.

NOTICES.

Invitation is hereby extended to all the graduates of Friends' Select School and their teachers, whether other notices reach them or not, to join in a Social Reunion in the school building, at 140 North 16th St., Philadelphia, on Sixth-day, Sixth Mo. 20th, 1890, at 8 p. m. It is proposed also to consider the question of forming a permanent Alumni Association.

SOCIETY FOR HOME CULTURE.—The annual public meeting of the Society for Home Culture, will be held at Friends' Institute, 1305 Arch St., Seventh-day Sixth Mo. 14th, 1890, at 2 p. m.

SARAH ELY PAXSON, Sec.

A young woman Friend, with experience, wishes a position as companion, and willing to assist in light household duties.

TEACHERS WANTED.—A second, and an assistant teacher at Moorestown Academy, Moorestown, N. J. Commencing with the Fall term of the present year.

Apply to Samuel L. Allen, 1107 Market St., Philadelphia, or Elizabeth H. Richie, Moorestown, N. J.

A teacher of experience, acquainted with "Quincy Methods," and modes of instruction now generally approved, desires a position in Primary Department of a Friends' School. She could enter upon duties at any time in Ninth Month. Address E. B. M., Germantown, Philadelphia.

Pleasant 2nd-story rooms, with good table-board, can be had at moderate rates in a Friend's family house. Address, N Box 164, Media, Pa.

A few boarders can be accommodated in a Friend's family at No. 480 North Fifth Street, Phila. Fifth Mo. 1890. EDITH SHARPLESS.

DIED, at her residence in Germantown, Fourth Mo. 18th, 1890, MARGARET G. SHEPPARD, widow of John E. Sheppard, aged 81 years, a beloved member and elder of Frankford Monthly Meeting, Pa. This dear Friend yielded in early life to the vision of our Lord, and in the path of self-denial, her intellectual gifts were sanctified by Divine Grace, and used by her Master for his service in the Church. It was evident to those who were with her through a suffering illness of some duration, that the support on which she leaned was not in the path of self-denial, her intellectual gifts were sanctified by Divine Grace, and used by her Master for his service in the Church. It was evident to those who were with her through a suffering illness of some duration, that the support on which she leaned was not

in the path of self-denial, her intellectual gifts were sanctified by Divine Grace, and used by her Master for his service in the Church. It was evident to those who were with her through a suffering illness of some duration, that the support on which she leaned was not in the path of self-denial, her intellectual gifts were sanctified by Divine Grace, and used by her Master for his service in the Church. It was evident to those who were with her through a suffering illness of some duration, that the support on which she leaned was not in the path of self-denial, her intellectual gifts were sanctified by Divine Grace, and used by her Master for his service in the Church. It was evident to those who were with her through a suffering illness of some duration, that the support on which she leaned was not in the path of self-denial, her intellectual gifts were sanctified by Divine Grace, and used by her Master for his service in the Church. It was evident to those who were with her through a suffering illness of some duration, that the support on which she leaned was not in the path of self-denial, her intellectual gifts were sanctified by Divine Grace, and used by her Master for his service in the Church. FOR "THE FRIEND."

Incidents and Reflections.—No. 227.

DARKNESS AND LIGHT.

Stephen Grellet was brought up in France among those of the Roman Catholic religion, but after removing to America and coming under the power of Divine Grace, he was convinced of the spiritual nature of true religion, and of the worthlessness of mere ceremonies and rites. In his subsequent travels over Europe as a minister of the Gospel, he had many opportunities of witnessing the darkness and superstition which prevailed among them, especially in Roman Catholic communities.

Being at Naples in 1819, he says: "A pious priest came to see me; he laments the general ignorance of real religion that prevails among people and priests; gross superstition is substituted. He said that very little liberality towards the relief of the indigent is to be met with, but gifts for the liberation of souls out of purgatory abound. This is a very favorite topic for priests and monks to preach upon. In Naples only, he says, above \$40,000 are annually given by beggars in half-cent pieces, for that purpose; all this goes to the priests to say mass. At nearly every door of their places of worship I see notifications posted, that indulgences and pardons for sins will be obtained by entering the church, performing certain ceremonies, or paying so much money."

A few days after, he makes this note in his journal:—"Since I came to Naples, I am frequently much annoyed by friars, who introduce themselves into my chamber, and are sturdy beggars; they beg for masses to be said, and prayers to be made, as they say, for souls in purgatory; they beg also for their own convents, for tapers to burn before the images of their saints, and of the Virgin Mary, to adorn their altars, &c. They have their indulgences for sale, various relics, little images, &c., to all which they attribute great efficacy, such as to preserve the wearers of them from the hands of robbers, from sickness, from evil spirits, and many other things. I find it difficult to get rid of them; and some finding they cannot obtain their purpose, become very passionate; and yet a willingness has appeared in others to hear what I had to say against their superstitions and idolatrous practices."

At Stutgard in Germany, Stephen Grellet

says: "We have been in company with a pious young lawyer, just returned from Vienna. He was sent there to transact some business of importance for a banking house in Switzerland. About the same time, three other pious young men also came to Austria, in the pursuit of their trades. They loved to mingle with those who love the Lord Jesus. One of these young men, being in company with a Roman Catholic whom he believed to be of that description, spoke freely to him of the love of God, and salvation by Christ; but he informed his priest of it, on which the young man was reported to the police, arrested, and sent to prison. His papers were taken and examined. It was found that he corresponded with the two other young men, and the young lawyer. These were also arrested and their papers searched. It was found that they entertained principles contrary to Popery, for they were Protestants. The three young men were sent to distant prisons, and the young lawyer was carried under an escort of police to the frontiers of Bavaria, with orders not to return to Austria under severe penalties. No wonder that, whilst we were in Vienna, we felt ourselves so encompassed with the spirit of darkness, and were sensible that an evil eye was upon us; but the Lord did not suffer us to fall into the hands of unrighteous men, and in his mercy restrained them. Blessed and praised be his name for ever!"

When at Valencia in Spain, a physician who had acted as an interpreter told Stephen Grellet, "that about a year since, he was sent for into a nunnery, to visit, as a medical man, a female who was ill. As he stood by her, she appeared to wish to speak to him, but not to be able to raise her voice above a whisper: he put his ear to her mouth; she placed a paper in his hands, unobserved by those that were near, and whispered in his ear, 'I have no bodily disease but distress of mind.' The contents of the paper were to entreat him to devise some means to rescue her from that horrible place. She was a young woman of fortune in Italy; and, after her father's decease, her brother contrived to get possession of her estate, and through the agency of some priests, to have her removed to Spain and shut up in this convent. Very soon after this, and before anything could be done for her rescue, the physician was himself imprisoned, and he has not been able to hear anything of her since."

Amid the darkness and superstition which abounded, it was cheering to our friend to meet with those who had been enlightened by that Divine Light which is offered to all mankind. At this very town of Valencia he mentions meeting with a young priest who was fully convinced "that the Church of Rome is Babylon the great." And also with an aged man, eminent as a lawyer, who had seen the great evils that have resulted from the many and gross superstitions of that body; and lamented over the depravity and wickedness of many of the priests and monks. "Some time since he wrote boldly to the Pope, to the Archbishop of Toledo and to

the King. To the latter he represented how many of his best subjects were, under his name, brought into cruel sufferings, that others were put to death, and multitudes were shut up in noisome prisons. Upon which that wicked and cruel man who was then the king's prime minister, sent orders to have him arrested, and that sentence should immediately be passed upon him; but the judge, who was his intimate friend, devised means to save his life, by representing him to be a madman, and sent him to one of the cells among the insane, and extended kind treatment to him there. He remained six months in that cell, and thus narrowly escaped death. He was released on the change in the government. This aged man appears to be well acquainted with several of our Christian testimonies, especially as regards the influences of the Spirit. He knows a number of persons convinced of the same important truths, who reside in various parts of Spain."

When visiting at Rome, Stephen Grellet says, "I found much religious sensibility among some monks and nuns. I preached to them the Lord Jesus Christ the only hope of salvation, and described to them what the Christian cross is, and where it is to be borne." "It is marvellous that though these religious services bring me into contact with so many priests, monks and nuns, where they hear doctrines so new to them, which also strike at the root of popery, no one has yet made an objection; but, on my taking leave of them, they treat me with kindness."

The visitations of Divine Grace are not limited to any rank or condition of life, but are extended to the King of Wurtemberg, whom he found in a tender state of mind. He says: "I felt the love of the blessed Redeemer towards him, and endeavored to encourage him to a faithful adherence to the dictates of the Divine Spirit, and day by day to wait upon the Lord, that he may receive renewed strength to perform the vows that he had made in the days of his distress. He would follow me to the outer door of the palace; and, on parting, desired to continue to have a place in my remembrance and prayers; and that if at any time he could serve me, I would let him know. This is a time of gracious visitation to his soul. May the Lord prosper his work with him!"

"I am greatly bowed down before the Lord whilst contemplating his power, love and mercy. I behold the efficacy of it in poor-houses and in palaces, among all classes of men of every nation or religious denomination."

J. W.

THE storms of the sea touch but its surface. Beneath the waves that wreck the strongest ships there is a depth where the soft-flowered mollusc palpitates, and the delicate shell and tinted blossoms float in perfect repose. Time is the surface of the ocean, eternity the depth; and even now eternity may begin in the soul amid the tempests of time. Letting the anchor down into it gives a share in its calm.—J. Ker.

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 354.)

1795. Seventh Mo. 7th.—We have passed a mountainous country on one side, and on the other we could not see land, as the river grew very wide; and when we came to the Gulf of St. Lawrence (deemed 350 miles from Quebec), we were quite out of sight of the land. As the wind blew fresh, my sickness increased so much that I thought the sea must be my grave. It was about three days before the land came in sight again, and then the weather appeared stormy—so that the captain thought best to put out to sea to avoid danger one night; and this put us out of our course. In this trying season I was led to closely examine my steps, and my prayers to the Lord were fervent, that He would condescend to be my stay and staff—who did not leave me without an inward evidence that I had given up in obedience to what I believed He required of me; and also I was favored with a well-grounded hope it would be well with my soul, if I was never permitted to see the land more.

12th.—After a hard gale of wind, we were in danger of rocks and shoals between the Island of Cape Breton and Nova Scotia. About noon we entered that which is called the Gut of Canso, in a very favorable time. Our passage through this place was so wonderful, the captain confessed it was of the Lord. This gut is a narrow passage between the mainland and Cape Breton, about twenty miles in length and a mile wide, and saves, as is supposed, three or four hundred miles sailing. An awful sense of the Lord's goodness impressed my mind this night, as we lay near Cape Canso. After passing through grievous seasickness, and various difficulties, occasioned by contrary winds, fogs, and rough weather, we were favored to land safe at our desired port of Dartmouth, on the 17th, and were kindly received by our Friend Seth Coleman. The next day I felt myself weak, and did not go about much; but my tongue cannot describe the feelings I had of the Lord's loving kindness, which had been extended, and was still continued towards all who are given up to serve Him in humble sincerity.

19th.—On First-day we attended the meeting at Dartmouth; it was large for this place; which proved a heart-tendering, favored opportunity. Then went about four miles out to our Friend Thomas Green's. The next day visited three families, to good satisfaction. These Friends have had their trials; others, removing away when they had not freedom to go. Our visit was very acceptable, as coming in a needful time, which some of them expressed. We visited six other families, who seemed tender and well contented.

Dartmouth lays on the east side of Jebuta [Chebucto] Bay. It contains between 50 and 100 houses. The town of Halifax, containing about 500 houses, lays nearly opposite, on the west side.

23rd.—We were at three meetings, one of which was for worship, one a meeting of conference, and at the third hour was held their Preparative Meeting—in which those are allowed, who incline to marry, to declare their intentions, on account of their remote situation from any Monthly Meeting.

These were opportunities of favor, remarkable I thought; and their business well conducted. On the next day we had a solemn parting meeting, which was a favored time; and the next day (27th) we took our leave of Dartmouth,

Many Friends and others coming together, we had a solemn session before we left them.

Our prospect now was, to go towards Digby, Beaver Harbor, and farther on in Nova Scotia.

Proceeding up the bay, as the soldiers occupied the ferry-boat, we had to swim our horses over, which was about half a mile wide. That day we rode about thirty miles, and lodged at a public house. I was unwell and the weather wet the next day; so that we tarried here. Poverty of spirit was my portion, yet I was humbly quiet in mind, praised be the Lord. The people were kind to us.

29th.—We set forward this morning a little refreshed, and rode near forty miles through a mountainous country. The people seem to live well, and appear open-hearted to receive Friends; many being weary of their teachers. As I was very weak in body, we hired a chair to ease me in travelling, and reached to our Friend Samuel Moor's, the 30th, being about forty miles. My weary body and mind seemed to experience much comfort.

Eighth Mo. 3rd.—We had two meetings here, one of which was held in S. M.'s house; large and satisfactory; and the other on a mountain not far off. I marvelled at the kindness of the people, and their openness to receive. On the 4th we set forward for Annapolis, and that afternoon had a meeting at Randolph; and though very rainy, it was large and very satisfactory. The next day had a meeting in a Baptist Meeting-house near; and another about ten miles off; both were favored seasons, and the people open-hearted and kind.

5th.—This day we reached to Annapolis, and from thence went to Edward Thorr's, who kindly took us in his boat to Digby, about nine miles. This is a small town, of about a hundred houses, standing on the Basin, so called, at the mouth of Annapolis River, where that empties through a narrow passage into the Bay of Fundy. Here the tide, it is said, riseth twenty feet.

7th.—A large room in the tavern where we lodged was freely offered to hold meetings in; which was this day occupied, and a large meeting held there to good satisfaction, to the tendering of some hearts. We were requested to stay longer, and to have more meetings; but intending to cross the bay in a vessel which was to sail that afternoon for New Brunswick, we thought it best to take leave of them, and go on board. We were on the water all night, which was to me very trying, as the motion of the vessel caused me to be very sick. In about twenty-two hours we landed.

8th.—It is called about forty miles from Digby to this place. One who was called a bishop of the Church of England, was with us on board of this vessel. The man was respectful, and desired to see my certificate. On its being shown to him, he commended it, and the order settled among Friends; saying: It well agreed with his sentiments. After this, his kindness towards me increased, for he came frequently to inquire how I was, saying, "Friend Evans, are you any better?" And when we parted, he gave me his blessing, as also divers others did, in their way.

9th.—At New Brunswick we had two large and favored meetings, to the tendering of many hearts, and bringing honor, as I thought, to the cause of Truth. Many expressed their satisfaction, and I admired their solid sitting; as there was long silence, and a number of them never before at any of our meetings. It was the Lord's mercy, blessed be his great Name; I am but as a worm, and no man.

Many of the people hereaway have had an

education amongst Friends, and are friendly; but appear to be as sheep without a shepherd. I felt love flowing towards them; and I thought great openness appeared in this town towards the doctrine of Truth; a number expressing their tenderness by the flowing of their tears.

On the other side of this Bay of Fundy there was no anything oppressed my mind with more sadness than the manner the former French inhabitants of the place (which were called *Neutrals*), were forced away from their improved farms and estates, in this part of Nova Scotia, by those acting under British authority; and British subjects coming in to inherit the fruits of their labor. I mentioned my sentiments freely concerning such injustice taking place, and I am willing to leave it.

10th.—As we had to wait for a passage from here to Beaver Harbor, visited a few families here, being kindly received by the people where we came.

11th.—This morning we went on board of a boat with four oars, and came about twenty miles to Dipper Harbor. Here we lodged at one French's, who entertained us kindly and refused taking pay for it. Being yet only half way to Beaver Harbor, we went on board early next morning, and coming thither, had a meeting in that place in the afternoon, which was a solid season. Likewise, the next day, we had another meeting, also solid.

14th.—We proceeded then about twenty miles to Passamaquoddy, at the mouth of the River Saint Croix; and from thence, the next day, also by water, to Machias, in the Province of Maine. Here, although no members of our Society resided in the place, we had two large and satisfactory meetings. They desired us to stay longer, and have more. But I have found it safest to leave the people hungering, rather than to stay to make additions. I wish all who travel on Truth's account to guard against the activity of the creature, lest a good savor be not left among strangers.

17th.—Being kindly supplied with horses, and a man to take them back, we went on to Pleasant River, about twenty miles towards Penobscot. As heretofore hinted, there appears to be much openness amongst the inhabitants of this eastern country towards Friends. I thought it looked as though "the fields were white unto harvest," and that many seemed weary of their teachers. We had a small, solid meeting here the next day; after which, we crossed the river to Richard Coffin's.

(To be continued.)

FOR "THE FRIEND."

Christ's Sermon on the Mount.

The most important and instructive collection of doctrines and exhortations uttered by the Redeemer and Saviour of mankind, was proclaimed from the mountain top, alike to the listening multitudes and to the children of men, down through all succeeding generations.

Notwithstanding, precious truths are herein set forth, so plainly and so forcibly, yet I fear that many of them are disregarded, even by those who profess to be followers of Him by whom these truths were uttered. I will notice briefly a few points.

Swear not at all.—The solemn oaths as administered in our courts of justice, often are connected with attempts to evade the truth: if the fountain is pure the stream will be pure, and if the heart is pure and true, the words proceeding therefrom will be true and *vice versa*, independent of any form of oath that may be

administered. Let your communications be yea, yea; nay, nay; for whatsoever is more than these cometh of evil.

Resist not evil.—All mankind are brethren. Do unto others as ye would that they should do unto you. As professed followers of the Prince of Peace, avoid strife. Avoid church and neighborhood and family quarrels. Go not to law with thy neighbor; but if he sue thee and take away thy coat, let him have thy cloak also. Take not up arms against thy fellow-man. Peradventure he may be in the right and thyself in the wrong. Fourteen billions of human beings have already been slain because of strife and hatred and jealousy; and wilt thou add to the number?

Love your enemies.—Have charity toward all men, and forgive them as thou holpest to be forgiven. Cultivate the Spirit of Him who, while expiring on the cross, prayed, "Father forgive them for they know not what they do." Restore with a spirit of meekness, the erring and sinful. If ye have not the Spirit of Christ, ye are none of his. If ye forgive not men their trespasses, neither will your heavenly Father forgive your trespass. Remember the great commandment, "Thou shalt love the Lord thy God with all thy heart and with all thy soul, and with all thy strength and with all thy mind, and thy neighbor as thyself." God is love.

Be ye therefore perfect.—Not perfect as was Adam, or as angels, or as God, but perfect Christians. Seek for holiness, for purity of heart, and let sin no longer have dominion over thee, either in word, thought or deed. The grace of our Lord is sufficient for all these things, to save thee to the uttermost, and to keep thee to the end. His blood cleanseth from all sin, washes whiter than snow. Walk in the light; seek for oneness, for soul-union with the Holy Spirit, and He shall guide thee into all truth. Hearken not to the voice of the tempter, that thou cast not be wholly freed from sin, and thereby limit the power of an Omnipotent God to save and to keep; and thus find in this refuge of lies an excuse for thy sins and transgressions. The Lord looks upon sin with no degree of allowance, but commands, "Be ye holy for I am holy; and He gives no commands impossible for thee to obey; and is no respecter of persons, but has sufficient grace for thee to perfect thee in his holiness, even as He had for Noah, or Abraham, or Enoch, or Job." In the language of the inspired Paul, I would say to all the dear readers of THE FRIEND, "The very God of peace sanctify you wholly; and I pray God that your whole spirit and soul and body be preserved blameless unto the coming of our Lord Jesus Christ."

Build upon the rock.—Even the rock Christ Jesus, and not on the sandy foundations of the evil one. Like unto the wise man, both hear and do the sayings of your Lord and Master, and thus with thy hopes founded upon the rock, thou shalt have an everlasting refuge despite the storms and tempests of earth, and waves of sorrow and affliction that may beat against thee. Unto thee will I cry, O Lord, my rock.

"On Christ, the solid rock, I stand,
All other ground is sinking sand."

O. A. P.

North Pharsalia, N. Y.

We ask for one blessing, and only one; that we may be faithful unto death."—William G. Schaffler.

Heart-Peace Before Ministry.

Peace in the heart is one of the conditions of good spiritual work. Indeed, this qualification is unnecessary, for the same is true of all kinds of work. We cannot do our best in anything if we are fretted and anxious. A feverish heart makes an inflamed brain, a clouded eye, and an unsteady hand. The people who really accomplish the most and achieve the best results are those of calm, self-controlled spirit. Those who are nervous and excited may be always busy, and always under pressure of haste; but in the end they do far less work than if they wrought calmly and steadily, and were never in a hurry. Nervous haste is always hindering haste; it does faulty work, and does but little of it in the end. Really rapid workers are always deliberate in their movements, never appearing to be in any hurry whatever; and yet they pass swiftly from task to task, doing each one well because they are calm and unflustered, and, with their wits about them, work with clear eye, steady nerve, and skillful hand. The people in all lines of duty who do the most work are the calmest, most unhurried people in the community. Duties never wildly chase each other in their lives; they never crowd another out, nor ever compels hurried and therefore imperfect doing. The calm spirit works methodically, doing one thing at a time, and doing it well, and therefore works swiftly, though never appearing to be in haste. "Unhasting yet auringst" is the motto of quick and abundant achievement. Haste spoils work, and yet one dare not pause, for duty presses.

"Haste not! let no thoughtless deed
Mar for aye the spirit's speed;
Ponder well and know the right,
Onward then with all thy might;
Haste not; years can ne'er atone
For one reckless action done.

"Rest not: life is sweeping by,
Do and dare before you die;
Something mighty and sublime
Leave behind to conquer time;
Glorious 'tis to live for aye
When these forms have passed away."

It is especially true in spiritual work that we must know the secret of peace before we can minister either swiftly or effectively to others in our Master's name. Feverishness of spirit makes the hand unskillful in delicate duty. A troubled heart cannot give comfort to other troubled hearts; it must first become calm and quiet. It is often said that one who has suffered is prepared to help others in suffering; but this is true only when one has suffered victoriously, and has passed up out of the deep, dark valley of pain and tears to the radiant mountain-tops of peace. An uncomfortable mourner cannot be a messenger of consolation to another in grief. One whose heart is still vexed and uncalmed cannot be a physician to hearts with bleeding wounds. We must first have been comforted of God ourselves before we can comfort others in their tribulations.

The same is true of all spiritual ministry. We need a steady hand to touch the work of Christ's kingdom. One of our Lord's earlier miracles furnishes an illustration of this truth. Jesus was called to heal a woman who lay sick of a great fever. One of the Gospels describes the cure in these striking words: "He touched her hand and the fever left her; and she arose, and ministered unto them." We readily understand this record, as it refers to the physical cure that was wrought by our Lord. We know, of course, that the woman could not minister to others while the fever was on her. When sore sickness comes,

the busiest, fallest hands must drop their tasks. No matter how important the work may be, how essential it may appear, it must be laid down when painful illness seizes us. We must be healed of our fever before we can minister.

But there are other fevers besides those which burn in men's bosoms. There are heart fevers which may rage within us, even when our bodies are in perfect health. We find people with feverish spirits—unhappy, discontented, fretted, worried, perhaps insubmissive and rebellious. Or they may be in a fever of fear or dread. These inward fevers are worse evils than mere bodily illnesses. It is better in sickness to have our heart's fever depart, even though we must longer keep our pain, than to recover our physical health, while we keep our fretfulness and impatience uncorrected.

We cannot minister while heart-fever of any kind is on us. We may still go on with our work, but we cannot do it well; and there will be little blessing in it. Discontent hinders any life's usefulness. Jesus loved Martha, and accepted her service because He knew she loved Him; but He told her that her feverishness was not beautiful, and that it detracted from the worth and the full acceptableness of the good work she did; and He pointed her to Mary's quiet peace as a better way of living and serving. Anxiety of any kind unites us in some degree for work. It is only when Christ comes and lays his cool hand upon our heart, and cures its fever, that we are ready for ministering in his name in the most efficient way.

There is a little story of a busy woman's life which illustrates this lesson. She was the mother of a large family, and, being in plain circumstances, was required to do her own work. Sometimes, in the multitude of her tasks and cares, she lost the sweetness of her peace, and, like Martha, became troubled or worried with her much serving. One morning she had been unusually hurried, and things had not gone smoothly. She had breakfast to get for her family, her husband to care for as he hastened away early to his work, and her children to make ready for school. There were other household duties which filled the poor, weak woman's hands, until her strength was well-nigh utterly exhausted. And she had not gone through it all that morning in a sweet, peaceful way. She had allowed herself to lose her patience, and to grow fretful, vexed, and unhappy. She had spoken quick, hasty, petulant words to her husband and her children. Her heart had been in a fever of irritation and disquiet all the morning.

When the children were gone, and the pressing tasks were finished, and the house was all quiet, the tired woman crept upstairs to her own room. She was greatly disheartened. She felt that her morning had been a most unsatisfactory one; that she had sadly failed in her duty; that she had grieved her Master by her want of patience and gentleness, and had hurt her children's lives by her fretfulness and her ill-tempered words. Shutting her door, she took up her Bible and read the story of the healing of the sick woman: "He touched her hand, and the fever left her; and she arose, and ministered unto them."

"Ah," she said, "if I could have had that touch before I began my morning's work, the fever would have left me, and I should then have been prepared to minister sweetly and peacefully to my family." She had learned that she needed the touch of Christ to make her ready for beautiful and gentle service.

There are many busy mothers to whom this

lesson might be almost a revelation. No hands are fuller of tasks, no heart is fuller of cares, than the hands and the heart of a mother of a large family of young children. It is little wonder if sometimes they lose their sweetness of spirit. But here is the lesson: Let them wait each morning, before they begin their work, for the touch of Christ's hand upon their heart. Then the fever will leave them, and they can enter with calm peace on the work of the long, hard day.

The lesson, however, is for us all. We should begin each new day at the Master's feet, and get his cooling, quieting touch upon our hot hand. Then, and not till then, shall we be ready for good service in his name.—*S. S. Times.*

FOR "THE FRIEND."

A Few Questions.

In the face of common sense and common observation, we know there is right and left. Do we also know there is a dividing line, separating one from the other? Do we know that true judgment belongs to that line? Do we know that failing to observe it, a clear vision is withheld? And that when clearness of vision is withheld righteousness and judgment fail to meet? Then, how great is the importance in religious matters of seeking to obtain a certain knowledge of things regarding right and wrong. To keep this constantly in view is worthy the employ of every one who desires the fulfilment of prophecy—"mercy and truth have met together, righteousness and peace have kissed each other." King Solomon said, "Be not overmuch righteous, neither overmuch wicked." Does not this mean that to be over zealous in a good cause hinders the progress of that cause, and that the abundance of wickedness brings condemnation upon sinners beyond their power to control? How great is the need of observing a proper medium between thing and thing—neither too fast nor too slow. This is not an easy matter. But natural inclination leading to excess, creates a necessity for humble-mindedness. "In humility and the fear of the Lord there is safety." "Happy is the man that feareth always." "Behold, happy is the man whom God correcteth; therefore despose not thou the chastening of the Almighty."—Job 5th chap. 17th verse.

P. R. GIFFORD.

PROVIDENCE, Fifth Mo. 26th, 1850.

Too Much Sugar in It.—"Simply trusting, sweetly resting, is all very well so far as it goes, but if the man thus trusting and resting contents himself with that; if he lives very much as he did before; if he loiters in bowers of ease instead of going forth to battle; if he is conforming to this world instead of being transformed by the renewing of his mind—then his trust is gross presumption, and his rest is carnal security, from which he is destined to be rudely roused when God's righteous judgment shall overtake him.

"We have had, perhaps, enough of the sunfiel, sunny, festive side of the religious life set before our Sunday-school scholars; let us not shun to declare the whole counsel of God, and let us give them unmistakably to understand that religion means the renunciation of a thousand things to which mere worldlings are devoted, and the serious and unselfish devotion of the life to heroic, Christian service.

"If any of them be unwilling to undertake such a life, then let them abide where they are, rather than be encouraged to take upon them the name of Christ only to disgrace it."—*Selected.*

THE CHARGE OF THE AMBULANCE.

BY GEORGE LANSING TAYLOR.

I.

Ting!—Ting!—Ting!—
A steel gong's ear-stinging sound,
'Mid the rush and roar of the city street,
Where the surging sounds of a Babel meet,
That keen note pierces your bones!
And a furious gallop of steel shoe feet,
And a sound of wheels, like a whirlwind fleet,
Come clanging over the stones!

Ting!—Ting!—Ting!—

'Tis the startling ambulance bell!
There's haste in its sharp imperative ring!
There's agony, shriek, and wait and yell!
One moment lost, and it may be a knell!
And blood and nerve leap up with a spring,
Ready to dart, like the shaft from the string,
At the tale those swift strokes tell!

III.

Ting!—Ting!—Ting!—

"Ambulance! Clear the way!"
And the coach-and-four, with its blazoned door,
And the tawring van, and the groaning dray,
And the rumbling truck, and the phantom gay,
And the junk-cart, drawn by "Old Dog Tray,"
And even the mail-wagon, turn, or stay,
That swift-winged Mercy may rush to the fore!

IV.

Ting!—Ting!—Ting!—

For a lightning word has been said,
That tells of the fall of a blazing wall!—
Of brave men crushed and mangled and gashed!
Of womanly woe in nature's throes!—
A sunstroke!—or worse, the assassin's curse,
And his gory victim pistoled or slashed,
And life ebbing fast, while the red blood flows!

V.

Ting!—Ting!—Ting!—

The street is cleared as by magic!
And a powerful steed, at his topmost speed,
Well trained to his errand tragic,
Needing no touch of spur or thong,
Whose clarion summons is that shrill gong,
Whirls the swift ambulance along,
At the cry of humanity's need!

VI.

Ting!—Ting!—Ting!—

Clear the Ambulance's Course!
A limb, or a life, is the stake of the strife!
God bless bold driver and glorious horse!
God bless strap and buckle and axle and wheel!
Each hickory spoke and each tire of steel!
Their makers were honest, they'll all hold fast!
Fire the ambulance through to the last!

VII.

Ting!—Ting!—Ting!—

From hoofs and tires and rick sparkling fires,
And the stanch wheels quiver and whirl and bound,
And the pavement rings like an anvil's sound,
But driver and engine stand firm at their posts,
As they dash down the street like madcap ghosts,
With a clang like a battle's sound,
And a bang and tremor that shake the ground!

VIII.

Ting!—Ting!—Ting!—

It dies on the car afar;
But our hearts still leap at that headlong sweep,
And thrill at its nerve and fire and jar,—
At the disciplined, splendid strength that hurls
That life-delivering car,
With the hospital's name in gold on its side,
A legend of more than heraldic pride!

IX.

God bless that surgeon, in uniform bright—
A more than knightly badge on his breast—
Who stands as a rock 'mid that whirlwind flight,
Grasping life and ease and his medicine-chest!
Never a knight down war's red line
Charged to a conflict more divine,
A battle where science and skill, in a breath,
May tip the balance 'twixt life and death!

X.

Ting!—Ting!—Ting!—

A dash through the hospital door!
One sure, swift touch! "There is pulse! there is life!"
"Ho! doctors and nurses—Ho! mother or wife!"
Or if a stranger, or outcast, or poor,

No questions are asked—all alike, all one—
All's free, and for all, as God's rain and his sun,
And shall be, while pain and anguish endure.

XI.

God bless the noble and Christ-like hands
That rear the hospital's hallowed gate,
Where harnessed forever the ambulance stands,
Where Science and heaven-taught Charity wait,
Armed for the battle with Death and the Grave,
Ready by day and ready by night,
Ready in tempest or sunshine bright,
Ready to fly, to rescue and save.

XII.

Pile then the hospital, noble and strong,
A house of Mercy, a house of God;
And honor the names with blessing and song—
To live while perish the triumphs of wrong—
Whose gifts have flowed where the HEALER once
trod;
The touch of whose hand wrought healing of old,
But now He heals through Philanthropy's gold,
In millions outpoured at the beck of his nod.

XIII.

Ting!—Ting!—Ting!—

Then let the ambulance fly!
A messenger swift to the fallen and the lift!
An angel of mercy forever nigh!
Good doctors, speed wherever there's need,
And rescue our brother—our brother-man!
Here's my prayer, and my pay; I may need you some
day,
So I'll do my part now—while I can!

XIV.

And when the great reckoning day shall shine,
With the universe thronging to see,
And the King shall say, from his throne benign,
"Inasmuch as ye did it to the least of mine,
Ye have done it all unto me!"
Ah! then, what anthems shall tell how blest
Are they who succor their brethren distressed,
And thus, O Lord, succor These!

—The Christian Advocate.

SELECTED.

A VICTORIOUS FAITH.

Oh for a faith that will not shrink,
Though pressed by every foe;
That will not tremble on the brink
Of any earthly woe—

That will not murmur or complain
Beneath the chastening rod,
But in the hour of grief or pain,
Will lean upon its God.

A faith that shines more bright and clear
When tempests rage without;
That when in danger moves no fear,
In darkness feels no doubt.

That bears unmoved the world's dread frown,
Nor heeds its scornful smile;
That sees of truth and cannot doubt,
Or Satan's arts beguile.

A faith that keeps the narrow way
Thru life's last hour is fled,
And with a pure and heavenly ray,
Illumes a dying bed.

Lord, give us such a faith as this,
And then, we need no army come,
Will taste e'en here the hallowed bliss
Of an eternal home.

—Bathurst.

'Tis But.—"A young man with a good salary married a wife and set up a home. Instead of living within his income and laying up money, as he had hoped to do, he found himself in a short time in debt. A friend of his, to whom he related his circumstances, advised him thus: "Whenever you are tempted to purchase an article because it is to be had at a bargain, and find yourself saying, 'Tis but' so' and so, put the money it would cost in a 'Tis but' box, and see what it will amount to."

The advice was taken, and in a short time the "Tis but" box contained a thousand dollars.—*Exchange.*

FOR "THE FRIEND."

Godliness and Ungodliness.

Godliness with content is said to be great gain; for it is profitable unto all things, having the promise of the life that now is, and of that which is to come. But "the wrath of God is revealed from Heaven against all ungodliness of men, who hold the truth in unrighteousness; because that which may be known of God is manifest in them, so they are without excuse." So if the way of the transgressor is hard, the fault is their own, for He hath shown thee, O man! what is good; and if the righteous scarcely are saved, where shall the sinner and ungodly appear?

Godliness and righteousness are from the Spirit of God, while ungodliness and unrighteousness are from the world, and from the spirit of the world which lies in wickedness; and these two spirits are contrary the one to the other. So if any man love the world, or the things of the world, the love of the Father is not in him. Whatsoever we place our greatest love and affections upon, it becomes our idol, and we worship the creature more than the Creator. If we have not the Spirit of Christ we are none of his, and cannot worship Him in spirit and in truth, nor in the beauty of holiness. But if we have the Spirit of Christ or of Godliness, it enables us to suffer long, and to be kindly affectioned one towards another, and to deny ourselves of all ungodliness and worldly lusts, and to live soberly, righteously and godly in this present world, so as to be prepared, when the conflicts of this ungodly world are over, to enter one of the many mansions where the ungodly cease from troubling, and where the weary soul will forever rest with God.

But we, Christians, as fellow-travellers from time to eternity, are placed here in the midst of a crooked and perverse generation of ungodly men, having a mixture of good and evil before us, with the privilege and power of choice as to which we will follow; and we become servants to whichever we yield ourselves as servants to obey: whether godliness or ungodliness.

"We all are moral agents acting free; And not compelled by fate or by decree,
But each has power to stand, or power to fall,
To keep God's high commands or break them all."

But all who will live godly in Christ Jesus shall suffer persecution. For Christ himself says, "In this world ye shall have tribulation." So I believe it is one of God's appointed means for our sanctification and salvation. And "if ye be reproached for the name of Christ, happy are ye, for the Spirit of glory and of God resteth upon you. But if ye will fast the profession of our faith without wavering, and join not with the ungodly ways of the world, the balance of the saying from the lips of Truth, will apply to us, "be of good cheer, I have overcome the world." And the apostles also tell us that it is through much tribulation that we enter the kingdom of heaven. For whom the Lord loveth He chasteneth, and scourgeth every one whom He reproveth. So well might the Psalmist exclaim, "thy rod and thy staff they comfort me." For if the righteous scarcely are saved through all their tribulations and trials, where shall the sinner and the ungodly, who are living at ease in Zion, appear.

But the Lord makes use of a variety of ways, and different kinds of rods as we might call them; and none of them at first seem joyous but grievous. Nevertheless, afterwards, they yield the peaceable fruits of righteousness to them that are rightly exercised thereby.

Paul, as godly a man as he was, seemed to

need something that he compared to a thorn in the flesh, a messenger of Satan to buffet him, lest he should be exalted above measure at the abundant revelations which he had received. But he was abundantly tried and persecuted, both by sea and by land, and by false brethren; yet he found God's grace was sufficient for him. So he could say that none of these things move me, neither count I my life dear to myself, so that I can finish my course with joy. And he had evidence granted that he did finish his course with joy; for he saw beforehand that a crown of righteousness was laid up for him; and not for him only, but for all who love the Lord's appearing. And the grace of our Lord Jesus Christ is sufficient to save us from the sins of an ungodly world, as it was to save Paul. For it is still by grace we are saved, through faith, and that not of ourselves, for all that pertains to salvation is the gift of God through Jesus Christ; not of ourselves lest any man should boast.

"Fastidious hearers of the Gospel admonished," is the title of a sermon preached by W. G. Schaffner. It is a graphic and faithful reproof of all pretended worshippers who talk, after Divine services, of the fine style, the select expressions, the beautiful and novel illustrations, the rolling or mellow voice, the agreeable manners, and the impressive and solemn looks of the preacher, "rather than on the message brought by him from God,"—hearers who are not satisfied unless "the sword of the Spirit is blunted and rests under the soft and fragrant and dewy flowers of poetry and fine writing. But these hearers say, "Surely the Gospel cannot be preached in too fine and graceful a style." To this I reply, "Yes, it can, I have heard a sermon to which I had no other objection except this (and a mighty one it was), that it was too beautifully written and too gracefully delivered. Everybody talked about the beauties of the sermon, while the important subject of it was forgotten." The fault was, that the proportion of beauty to truth was vastly too great; the effects of the medicine were wholly prevented by the immense quantity of sugar mixed with it."

EXTRACT of a letter from John Chipchase to Leonard Snowdon, dated Third Month 4th, 1810. The following letter from a young Friend to his uncle, I cannot resist the inclination to transcribe:

Dear Uncle:—It was with great concern I inform thee that Deborah Darby died yesterday evening about 10 o'clock; her health had been in a declining state for many months, arising, it is supposed, from her very great exertions in the service of Truth, particularly her visit to America, it is thought by most to have been a material injury to her constitution. She was confined several weeks, about twelve months ago, but got much better about the time of Yearly Meeting, and entertained the hope of being able to attend it; but was prevented by a relapse which confined her a few weeks; since which time she has attended her own meeting pretty regularly, till she was taken ill about two months ago. I was at the Dale Meeting the last time she was there, when she appeared in a very remarkable manner, making a solemn appeal, similar to that of the prophet Samuel, for the integrity, faithfulness and obedience, with which she had devoted her days to the service of the Most High!

It had been her great care to follow attentively the paintings of Divine Godliness, and she could not express the thankfulness and satisfaction she felt in firmly believing she had left nothing undone which had been pointed out as her duty to do; and concluded by expressing her resignation to leave her near connections in life whenever it might please the Author of her being to call her hence. The most awful solemnity overspread the meeting from a belief that she had a clear view, her labors were drawing to a conclusion, which proved to be the case. Her loss will be most sincerely felt by every of every religious persuasion in her own neighborhood, as well as by her relations and particular friends, she being universally esteemed and venerated; her life and conversation so completely agreeing with her ministry, all were convinced it proceeded from a Divine Source.

GEORGE WORTHY,
Ninth Month 9th, 1813.

FROM "THE FRIEND."

Plainness of Dress.

The principle objection to fashionable clothing is that the fashions are usually vain and foolish. Those who follow them are easily led into pride of dress, and in order to satisfy their vanity and pride, it becomes necessary for them to change their style of dress with every change that fashion undergoes, however extravagant or foolish it may be. Most of you may have played at the game of *Follow my Leader*, and when following your leader, have probably done many ridiculous things, and perhaps some rude things also. Boys, when playing this game, usually run into forbidden and sometimes into dangerous places. Wherever their leader goes, and whatever he does, they follow. If he turns a somersault they do the same, and if he goes limping round the market place, they go limping after him; or if, in a generous mood, he gives a penny to a beggar, or delves a neighbor's garden, his followers all do likewise. The last time I saw the game played, I was walking by a river side, when a band of boys following their leader passed down the middle of the stream, wading knee deep, with their shoes and stockings on. Well, this is pretty much the manner in which fashionable people follow fashion. The leader of fashion puts on a cap of a particular shape, or an embroidered vest, or a new style of coat, or pulls her hair down over her eyes, and all the fashionable folk in Europe, according to their sex, do the same thing, and try to do it better than their leader. If shoe-buckles become fashionable, the fashion might be led by a simple steel ornament, but if followed as keenly as many fashions are, the steel would be changed for silver, and the silver for gold, and the gold for diamonds, and then the fashion itself would change, because there was nothing further to follow in that line, and the fashion-makers would think of something else for their followers to run after. It looks very ridiculous to those who do not join in the race to see men and women striving to excel each other in the pattern and coarseness of their shoe-buckle. There is no sense in it, nor is there any fun like that which boys and girls often have in following their leaders. It is a foolish rivalry, a rivalry in folly. Even fashion-following people themselves grant this by laughing at every fashion after it changes. One generation of fashion-followers always ridicules the fashions of preceding generations, and gets its own fashions laughed at in turn.

Has it ever struck any of you that all per-

sonal attire, except the plainest and simplest, when viewed at a time when it is not in fashion, looks ridiculous and extravagant, if not even barbarous? It is not necessary to go far back to find some of the strangest cases. Not many years ago the ladies of this country padded their heads with hair and other materials to such an extent that their heads seemed about twice their natural size. They used their own hair chiefly for wrapping round these materials, and then tied the whole bundle at the back of their heads in a net, and away out on the top of this bundle they perched their hats. Had the same head-dress been seen on an African or South Sea Islander it would have been condemned as shockingly barbarous, and yet it was worn a few years ago by the ladies of Great Britain, and probably would be worn again, if properly introduced by the makers of fashion.

Fashion is ever changing, and unless we have a standard by which to judge it, we shall change with it. In the Scriptures we are instructed to adorn the doctrine of God our Saviour in all things, and women are exhorted to adorn themselves in modest apparel, not with braided hair and gold or pearls or costly raiment. It is our duty to follow these advices, and to seek for the aid of the Holy Spirit to enable us to do so. As we are obedient to their teaching, the vain and envious mind will be kept under, and we shall in all things become patterns of Christian simplicity and moderation. Perhaps I cannot do better in concluding this paper than repeat what William Penn wrote to his children on the subject of dress. In advising them to an exemplary plainness in apparel, he says—"Choose your clothes for their usefulness, not the fashion, and for covering and not finery, or to please a vain mind in rouselves and others. They are fallen souls that think clothes can give beauty to a man. Bound your desires, learn your will subjection, take Christ for your example as well as guide."

WILLIAM.

Natural History, Science, &c.

Electric Shocks.—Genuine electricity is of greater interest than a make-believe toy, and we think we are living in a wonderful age when we look at our telegraphs, telephones, phonographs, and motors; but some of the fish families of the sea have been using electricity for thousands of years. It is stored in some mysterious way in their bodies, and is a powerful means of protection, as some of them can give shocks strong enough to kill a man or a horse. The following is a pleasant account of the way a young man tried to lift one of these electric fishes.

"Some years ago a young man, in all the glory of his first knickerbockers, found himself in a small fishing village on the New England coast, and, liking the location, determined to spend the season there. The morning following his arrival he ran down to the beach, where he found a crowd of red-shirted men gathered around a flat fish about three feet in length.

"'We're tryin' to get some one to lift it,' said an old sea-dog in answer to a question.

"'Lift it! why, a child could do that,' remarked the young man from the city.

"'P'raps he could,' replied the fisherman; 'but if you kin lug that fish from here to the dory, over yonder, you kin earn five dollars.'

"'You're a fine lot of men,' said the city youth, with a laugh; 'can't lift a fish of that size! Why, I can throw it that far.'

"The fishermen were very anxious to see him

try, and finally the young man approached, thrust his fingers into the eyes of the fish, and—if it had been any other fish we might have said prepared to throw—but, as it was, the moment his hands touched the fish a strange look of surprise came over his face, and those near by might have seen a certain rigidity of the muscles. He retained the same position for several moments, then, with a grimace, asked to be relieved, and amid roars of laughter the fish was pulled from his hands. When the young man had recovered his equanimity, he confessed that it was the heaviest fish that he had ever attempted to lift.

"The fish was the Ray, known popularly as the torpedo (*torpedo marmoratus*), and one of the most powerful of the marine electricians. The moment it was touched the shock was so severe as to completely disarm the victim. These Rays are often struck by fishermen in mistake, and the shock is immediately felt, passing up the handle or line of the spear. An acquaintance of the writer was disabled for several days by a shock received in this way, which will convey some idea of the power of these fishes."

But who ever heard of an electric pig? "In front of a butcher's shop in St. Paul, a half-pig, nicely prepared and of appetizing appearance, was hanging on an iron hook a few days ago. A dog came running up the street, and happening to see the little pig, went up to it and longingly sniffed around it. Hardly had he put his nose on the pig, when he uttered a cry of pain and ran howling away.

"A second cur soon appeared and fared no better; he ran away howling as if a ghost had laid his hand on him. Gradually as a third and fourth dog had shared the same fate, a crowd gathered, and every one looked with distrust at the porker.

"One of the owners of the shop, who wanted to find out the cause of the trouble, at last went up to the pig, touched it, and also flew back as though a tarantula had stung him; he had received an electrical shock. An investigation proved that an electric light wire had come in contact with the hook on which the meat hung, and thus the pig was completely filled with electricity."

Experience of an Earthquake.—During the few days of my stay in Shanghai, I experienced for the first time in my life the shake of an earthquake—a phenomenon which is not unusual in this part of the world. It was about eleven o'clock at night, one of those beautiful nights which one finds only in the sunny lands of the East. The stars were shining brightly in the sky, but a slight haze seemed to spread itself over the ground and the river; and the atmosphere, although perfectly calm, was warmer than is usual at this early period of the spring. I had been dining out, and had just returned home, and was sitting with — Beale at the drawing-room fire. In an instant I experienced an extraordinary and unaccountable sensation, which was perfectly new, and which I could neither understand nor explain. At the same moment the pheasants in the aviary began to scream, and the chandelier, which hung from the ceiling swung slowly from side to side.

"It is an earthquake," said — Beale; "let us go out on the lawn in front of the house."

"I confess I did not require a second bidding, but rushed out of the house forthwith, — Beale, who seemed to have become accustomed to such things, quietly went to look for his hat in the lobby, and then followed me. In the meantime, his excellency Sir George Bonham, her

majesty's Plenipotentiary and Governor of Hong-kong, who was staying at this time with — Beale, came down stairs, and all the other gentlemen in the house, and their appearance also—most of them in their night-dresses—as they had retired to rest before the occurrence took place. All this happened in much less time than I take to write it. When we reached the lawn the ground seemed moving and swaying to and fro under our feet, and I experienced a slight, sickening sensation not unlike sea-sickness. At the same time the whole scene was rendered more striking by the ringing of bells in the adjoining houses, the screams of birds, and the crash of a falling house, as we thought, but which turned out afterwards to be a slimy built wall. The first shock lasted for a few minutes only, but several were felt afterwards, although less severe than the first.—*Fortune's Travels in China.*

Anecdote of a Jack-Daw.—A striking example of the attachment of birds came under our own knowledge. A relative of ours, who was at the time staying with us, had one of these birds, and he was a great lover of animals, the jack-daw received nothing but the kindest treatment. It is a curious fact that young jack-daws in captivity have an inveterate tendency to commit suicide by drowning, if they possibly can; and of the two young birds that he brought home from the forest, one of them speedily accomplished this end, and was found in the river a day or two afterwards. The wings of our jack-daw were not clipped, and it followed its master everywhere, unless shut up—a misery that it generally avoided by going up into a tree when it saw any signs that were suggestive, and from this coign of vantage it would calmly watch the course of events. Even if captured and shut up, it would often manage to escape and find out, in some mysterious way, the whereabouts of its master, suddenly alighting on his shoulder, its favorite resting-place, when he thought it safely shut up a mile or more away. One afternoon, on visiting a friend, he was not aware that the bird had followed him until he was actually at the house, fully three miles from home. The jack-daw, however, waited in a tree in the garden for more than an hour, the duration of the visit, and then gravely returned with him. Perhaps, however, the most remarkable feat of the kind he ever performed was under the following severely trying conditions. His master, desirous of visiting a large gathering for athletic sports—a gathering attended by some hundreds of people—was very careful to slip away quietly, as he thought; partly because he feared that the bird might come to some harm; partly because, as this gathering was held in an open space in the forest, he feared that the love of liberty might prove too strong, and that he might lose his little feathered friend. The spot, some miles away, was duly reached, and the bird forgotten, when presently a general movement of curiosity, when he found that it was caused by the jack-daw! The people, unaware of the facts, took it for a wild one—and very naturally, for there were hundreds of such in the forest adjoining—and were throwing up sticks and clods of dirt. It had already found out its master in the midst of this dense crowd, though it was afraid to descend. On his going, however, a little way out of the press, it at once settled on his shoulder, and rode home triumphantly with him on his bicycle. Other jack-daws used often to fly about our house, but though he would often go short flights with them, he was never tempted to desert his old friend for new ones.

Jack-daws appear to have considerable sense of humor; and the one of which we have been writing seemed never tired of having practical jokes with our pigeons. For some reason he was very objectionable to them, and they evidently regarded him as being a wee bit uncanny; and he would often, when they were all perched in a long row along the ridge of a roof, alight near the end of the row, and gradually slide along, driving off one after another, until he had worked his way to the other end and disposed of them all. At other times he would suddenly descend, with a hoarse croak, right in their midst, and scatter them in all directions. As his master was afterwards obliged to move up to London, he parted from him with great regret, banding him over to our care. The spell was, however, broken, and he soon disappeared—a fact as honorable to him as his past allegiance, as it showed that he was not disposed lightly to transfer his affections from one master to another, while the prompt assertion of his natural instincts demonstrated how real the tie must have been that bound him, in spite of them, to his old friend.—*Hulme's Wayward Sketches.*

Items.

Selfishness of the Lodge.—In one of the speeches at a recent convention, as reported in the *Christian Cynosure*, the essentially selfish character of Masonic benevolence was dwelt upon. The speaker said: "The whole drift and tendency of every sort of lodge, as I have known it, has been selfish, and is thoroughly selfish. If that is true that is an antagonism, squarely, with the doctrine of the [Bible.] In all these benevolent lodges the proposed way of carrying out the spirit, in every one of these different orders, is simply and purely for the benefit of the particular order or circle concerned. That is not the Bible; that is not the Gospel of Jesus Christ, by any manner of means. That Gospel does not know any Jew, nor Gentile, nor barbarian. It goes down alongside of every man and woman and child and throws its arm around them and says, You belong to us, if you will come in the best fellowship. You are to be an heir with us in the Kingdom of the Lord Jesus Christ. You are to share all we receive, and you are to labor with us in the spreading of this Gospel that seeks to make every man, black or white, rich or poor, a prince and a pillar in the kingdom."

"I asked a man once, a very intense secret-society man, whose wife was a member of my church in Ohio, and who was telling me—I think he did it with an oath—that his secret order was good enough religion for anybody—at least I heard more oaths from him than I did any quotations from the Scripture, what would he do if there were no other religion, but his own, or otherwise, in respect of anything else should belong to his order and one should not? He said, 'Why, of course, he that gave me the signal of distress I should save.'"

"'Well,' said I, 'suppose he was not a Christian man and the other was?'"

"'Well,' he said, 'I would save him, of course—bound to.'"

"'Well,' said I, 'suppose he had no family, and the other man had half a dozen children depending upon him?'"

"'Why,' he said, 'I would save him; looking astonished at me to think I should ask such a question as that. He was bound to do it; that was his principle, to save his brother in the circle of his religion, but not in respect of anything else.' Now, I insist upon it, that that sort of thing is anti-Scriptural and anti-Christian."

Working for a Living Necessary.—In the historical development of the industrial organization there have been in the forms and modes of laboring and of combining ourselves for greater power in supplying human wants, changes in status and relation; but the necessity of working for a living has been one and a half from which there is no escape. The century which has seen slavery as an institution cease to exist almost throughout the whole

human race, has easily come to believe in an ideal state of things in which existence should cost no pain or self-denial at all. Emancipation provided that a man should only work for himself. It is very evident that many are enraged, and declare liberty all a delusion, because they had persuaded themselves that liberty meant emancipation from the need of working at all, or emancipation from all the hardships of the struggle for existence. Hence the denunciations of "wages-slavery." But liberty is not, and never can be, anything but an affair of social institutions, limited by their scope, and never reaching into any field of poetry or enthusiasm. It can never make toil cease to be painful, or sacrifice cease to be irksome. It can never be authorized above contracts, as a regulator of the relations which are necessitated by the social organization, because it is on the same plane with contracts and exists only by and in connection with them. There could never have been any abolition of slavery and serfdom but by capital. The rise and development of capital have forced higher and more stringent organization. This means new and in some respects more irksome restraints on individual liberty, in order to acquire greater power and win more ample sustenance for society. The socialist program consists in resolving that we demand the liberty we dreamed of, and the easy security we used to have, and all the new capital and wealth, which we declare that we will work only eight hours a day for, and will not study for it at all.—*Prof. Sumner in The Independent.*

FOR "THE FRIEND."

The undersigned has much satisfaction in announcing that his little Fund for providing some school education for the 25 children of Friends in one locality in North Carolina, who else would be destitute of it, now amount to one hundred and fifteen dollars, so that it may be safe now to engage the teacher, provide some suitable books, and prepare for opening the school in early autumn.

GEORGE W. TAYLOR.

THE FRIEND.

SIXTH MONTH 14, 1890.

The thoughtful reader of the writings of the early members of the Society of Friends, can scarcely fail to be impressed with the fulness of the testimony they bear to the internal work of Christ on the hearts of men, showing them the evil of their ways, leading them to repentance and forsaking of sin, and through submission to his transforming power, bringing them to a practical knowledge of redemption and salvation.

In an epistle to the reader, prefixed to the collected works of Edward Burroughs, the writer says, that from a child of a few years old, he set his face to seek and find the Saviour.—"And after our long seeking, the Lord appeared to us, and gave us of his Spirit. He brought us to know and understand that God had given to every one of us a Light from himself, shining in our hearts and consciences, which Light Christ, his Son, the Saviour of the world, had lighted every man withal. By which Light, we came to know good from evil, right from wrong. And we found this Light to be a sufficient teacher to lead us to Christ, from whence this Light came; and thereby it gave us to receive Christ and to witness Him to dwell in us, and through it, the new covenant, we came to enter in, and to be made heirs of life and salvation; and in all things we found the Light which we were enlightened withal (which is Christ), to be alone and only sufficient to bring to life and eternal salvation."

In "A Description of the State and Condition of all Mankind on the Face of the Earth," after showing how man has fallen into a state of alienation from God, Edward Burroughs says, the same Power by which man was made, is man's Restorer and Deliverer, and He-builder and Saviour; "and this Power works out salvation and deliverance by slaying the enmity, and condemning iniquity, and removing the cursed ground out of man's heart." "This Power in you must you own, and believe in and follow, and be guided by it, and bear its condemnation and judgment upon all that is contrary to it, if ever you be restored to the blessed state."

In another tract, after defining salvation to be "a saving, keeping and preserving from sin and death and disobedience; and also a saving from wrath and misery and condemnation, which are the effects thereof," E. B. states, that all this is wrought by Christ Jesus, the Son of God; and restoration, redemption, and salvation are only in Him; and they are the free gift of the Father unto the sons of men, no way purchased by the works of the creature, or desert of him, but freely given through the Power and wisdom of the Creator, and only by Jesus Christ, the Son of God.

The prominence given by our early Friends to the doctrine, that practical redemption from the dominion of sin, and from the curses attached to it, comes through the Divine Power of Christ operating on the heart; and that without experiencing this redemption, there is no escape from condemnation hereafter; led some of their adversaries to charge them with a rejection of Christ as He appeared in the prepared body in Judea. This charge they unhesitatingly denied. In reply to an anabaptist writer, who had made such an assertion, E. Burroughs says, "We are true witnesses, that salvation is alone in that same Christ which was crucified at Jerusalem, and whom God hath raised from the dead."

And again—"That Christ which died at Jerusalem, which suffered by the chief priests and elders of the people: He was and is the true Christ."

And, in reply to a book written by John Bunyan, he says: "We prize the Lord Jesus Christ, God-man, to be precious unto us, and unto all that do believe, and have owned Him alone to be the Foundation, whom God hath laid for salvation unto the ends of the earth, and in his Light are we saved."

Very similar are the sentiments expressed by John Banks, another of those "sons of the morning" in our Society: "We as truly believe in that same Christ, who laid down his body and took it up again, as in his Light within, and we have benefit to salvation by the one as well as the other; and of both, they being one."

It is evident from what has been here quoted, that the expression "faith in Christ," means far more to a Friend than mere belief in the record of his outward coming and sufferings. It includes also the acceptance of his internal appearance, as a Guide, Teacher, and Sanctifier.

SUMMARY OF EVENTS.

UNITED STATES.—In the House on the 7th instant, the Silver bill was considered, and some amendments were adopted. A motion by Representative Bond of Missouri, that the bill be recommitted with instructions to report a free coinage measure, was defeated—yeas 118, nays 140. The bill was then passed—yeas 135, nays 119.

On the 5th instant, Representative Darlington reported to the House from the Committee on Public Buildings and Grounds, the bill providing for the purchase of a site and the erection of a building for the use of the United States Mint, at Philadelphia, at a cost

Incidents and Reflections.—No. 228.

PLAIN DEALING.

It requires considerable moral courage at times to declare the truth fully and unreservedly, especially where it strikes at practices which many indulge in. Yet if it is done in obedience to the requisitions of duty, and a loving spirit is maintained, the Lord often opens the way for its reception beyond what the instrument would expect. An illustration of this is given by Stephen Grellet, in his account of a visit to Naples. He says, under date of Eleventh Mo. 22d, 1819: "To-day I visited the foundling hospital, which is a very large establishment. About 80 nuns have the principal charge of it. In one part there are about 400 girls, most of whom have attained the age of young women. It is a kind of convent. As I was going through a long corridor, accompanied by several of the nuns and priests attached to this extensive institution, we passed the door of their chapel which was open. I saw the girls, with several nuns, on their knees before a large Madonna, or representation of the Virgin Mary, very richly and finely dressed. Wax candles were burning before it. They were singing to the image, but at the same time their faces were towards us, laughing. My soul was sorrowful on beholding them, and their superstition and idolatry. The chief of the priests who were with me asked if I did not wish to go into the church to see the girls at their devotions. I told him I should like to do so if it were proper. I felt a strong inclination to go in, but, as from religious principle I do not uncover my head in any place as if it was holy ground, I was unwilling to give offence to anybody by going in. The nuns said, nobody here would be offended at it. The priests also said, 'We have on our heads our ossacks'; your hat is to you no more than these are to us, especially as it is from religious principle that you act." Then I told them I would go in on condition, that, if apprehended anything to be of me by the Lord to communicate anything to the young women thus assembled, he, the chief priest, who spoke good French, would interpret for me. He very readily agreed to do so. We all went in. Besides the girls, most of the nuns were in the room at their great Madonna. When they had concluded singing their hymn, I told them how greatly my heart had been

pained, as I passed by, on seeing the lightness of their conduct whilst engaged in what they call a devotional act; that I could not however be surprised at it, if they truly looked on that image before them as what it really is,—nothing but a piece of wood, carved by man's device, which can neither hear nor see, neither do good nor evil to any; our devotion, I said, is to be to Him who sees the secret of our hearts, hears not our words only, but knoweth our every thought; from Him we have everything to fear if we do not serve, obey and honor Him; and the richest blessings to hope for if we love, fear and serve Him; the worship acceptable to Him is to be performed in spirit and in truth, from the very heart; this is the temple in which He is to be found, and in which He revealeth himself. Here, at noonday, they have lighted tapers which cannot enable them to discover the sinfulness of the heart, but the light of Christ, which enlightens every man that cometh into the world, and by which every thing with which He has a controversy is made manifest, sheweth us our sins, that we may look upon Him whom by our sins, we have pierced: He is the Saviour of all those who come to Him in faith and true repentance.

"Then I proceeded to proclaim to them the Lord Jesus Christ, as the only Saviour of sinners, the only hope of salvation, the way, the truth and the life, without whom no man can come to God the Father; all that pretend to enter by any other way than by Him, the door, are accounted as thieves and robbers. The priest interpreted faithfully into Italian, of which I could judge. The nuns and the other priests said several times, 'This is the truth,' or 'it is so.' The countenances of the girls had much altered; they hung down their heads, and tears flowed from some of their eyes. Thus did my blessed Master enable his poor servant in a popish church, assisted by priests, to bear testimony to his blessed truth, and against the superstitious worship that those poor girls were offering to a carved piece of wood.

"After we came out, some more of the nuns collected about us, and in answering some of their questions, I further unfolded to them what acceptable worship to God consisted in, and also what is the only hope of salvation. No man can save his brother, or give to God a ransom for his soul; that, therefore, it is great presumption for any to attempt to take upon themselves to pronounce absolution from sin on a sinner. After opportunities of this sort, I sometimes marvel that they do not lay hands upon me; but here, on the contrary, they parted from me in tenderness, and with expressions of satisfaction with my visit. Surely this is the Lord's doing; blessed and revered is His Name."

"In 1829, Stephen Grellet had an interview with the Pope at Rome, in which he used a similar plainness of speech. "I represented to him what I had beheld in many places in Europe and the West Indies, of the depravity and vices of many priests and monks, what a reproach they are to Christianity, and what corruption they are the

means of spreading widely over the mass of the people. I then stated what is the sacred office of a minister of the Lord Jesus Christ, a priest of God; what the qualifications for that office should be, and who alone can bestow them. As I was speaking on these and other subjects connected therewith, the Pope said several times, on looking at the priest present, 'These things are true'; and the priest's answer was, 'They are so.' Other subjects were treated upon, as the kingdom of God, the government of Christ in his Church, to whom alone the rule and dominion belongs; that He is the only door, the only Saviour, and that those who attempt to enter in by any other door but Him, are accounted as thieves and robbers. Finally, as I felt the love of Christ flowing in my heart towards him, I particularly addressed him; and queried whether his days were not lengthened out to enable him to glorify God, and exalt the name of the Lord our Redeemer, Jesus Christ, as the only Head of the church." &c.

"In 1824, Stephen Grellet had a meeting in Frederickburg, Va., of which he says: "The prospect of having a meeting at that place, where I have repeatedly seen the poor slaves treated with great cruelty, felt awful to me. But the dear Master helped his poor servant to do the work required. I was enlarged in setting forth the love of Him who has loved us whilst sinners, and has commanded us to love one another as He has loved us. His love is to all men, He has died for all, and we must love all, and do to others as we would they should do to us. Were this the case, could men oppress one another? Could they wage war against one another? Could they hold their fellow-men, of any color or nation, in bondage? The Lord's power came over the meeting in such a manner as to bring conviction to the minds of the people, and seriousness prevailed over all."

"It probably required as much faithfulness to the convictions of duty, thus to proclaim the gospel of freedom in a slave-holding community, as it had before done, to preach the spiritual nature of religion and worship among the priests and officials of the papal church. The same honesty was shown in a meeting held at Lynchburg, Va., about two months afterwards. He says of it: "The Lord was near and good, He strengthened me to proclaim his Gospel. In his love and mercy, the Redeemer has come to deliver us from the bondage of sin, and has commanded us to love one another as He has loved us. Can we say that we love our fellow-men, if we act towards them contrary to what we would they should do towards us? Should we think that those who are now held under the galling yoke of bondage, acted justly towards us, were they to rivet the same heavy chains upon us that they are now laden with? The slaves, equally with us are the children of the same Almighty Father. Much seriousness was over the assembly, and none made any opposition, though I fully set before them the unrighteousness of slavery, and the guilt of slaveholders."

J. W.

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 362.)

1795. Eighth Mo. 19th.—Hiring horses and a man to take them back, we came about thirty miles to Frenchman's Bay, and the next day we reached the house of Paul Dudley, who was a very kind man. He offered his boat and hands to take us near thirty miles; but it being rainy, we tarried here till the day following, and then were taken down Frenchman's Bay to the Blue Hills.

21st.—On the way to Penobscot we had a pleasant passage; and I had to admire the goodness of the Lord, in opening and preparing my way. Blessed be his excellent Name, both my soul say, tremblingly, in awful fear and love!

The next day we hired horses to cross a neck of land about six miles, and then went by water to Penobscot. Feeling poor in mind, and hearing of an opportunity to go on farther by water, we had liked to have gone; but perceiving an opening unexpectedly for a meeting here next day, we concluded to tarry—having one in the morning, and also another in the afternoon—solid and profitable, I hope. The people's behavior was commendable. I was comforted, and some benefit, perhaps, was received by individuals among them.

24th.—After leaving Penobscot, we crossed the bay, about fourteen miles to Ducktrap, and had a small, solid meeting among the people there that afternoon; they behaved well. The next day we hired a man and horses to take us to Camden, on Penobscot Bay; and on the day following had a small meeting there, which I thought was favored. Here I bought a horse, bridle and saddle, and rode to Broad Bay, where (27th) we had a satisfactory meeting at the widow Chapman's house; in which deep impressions were made on some minds, and we were brought near to each other, although outwardly strangers. In the afternoon we proceeded about fifteen miles to the widow Kennedy's, near Sheepscut Ferry; and on the day following, reached to our Friend Jeremiah Hacker's, at Durham.

29th.—From hence, proceeding to Falmouth, in company of several Friends, on First-day we met at meeting there, which was, as I thought, poor and dull. The weather was warm, and riding thus on horseback was trying to my shattered condition; yet I am favored. All praise belongs to the Lord: I have been fully convinced in this my pilgrim-like journey for the good of souls, that nothing belongs to man, nor the contrivance of men, in putting forward the Lord's work.

Ninth Mo. 2nd.—From Falmouth we came to Sandwich, where we had two meetings, one of which was public; the other with our Friends, selected. These were exercising, but I believe they ended well. Hard labor and much poverty seem to be my allotment; but let me not murmur. The Lord has hitherto helped me.

3rd.—From hence we are to journey to Co-hoes, in Vermont; at which place we arrived on the 4th. I was much weary. We had two meetings the day following, being First-day. One of them was held in a school-house, in a good degree solid; the other in a Baptist Meeting-house, large, but interrupted by the people's going out and in. It is often so when we consent to hold meetings in the houses which belong to people of other societies. I believe we ought carefully to feel our way, even when their houses are offered freely. Here I met with my Friend Henry Hull, from Nine Partners.

7th.—I had a meeting in Sharon, near Bassett's, which was large; but I suffered loss by a Friend speaking rather too much about his own conviction. My mind was distressed hereby; and my desires are that Friends of the Ministry may be well guarded against branching out improperly when silence might be more useful near a meeting's conclusion.

9th.—We now set out for Danby, through a mountainous country, which we reached the next day. My journey since I left my habitation, I think, amounts to near two thousand miles by land and water, till I came to this place; and I am thankful that I feel in a good measure comfortable, after the fatigue which has attended such a long travel.

10th.—At Danby we had a meeting that was large, and exercising. I thought the people's minds were too much outward, and not attentive to the true foundation. The next day had a favored meeting at Mount Holly, on the Green Mountain in Vermont, where no meeting of Friends was ever held before. The people sat commendably. Several of them invited us to their houses; but believing myself clear, I chose rather to leave them in the hand of the Lord.

12th.—Next at Walling's Valley, a little village, we had a large and good meeting, where there had not been any held by Friends before. A Baptist minister was present, who seemed to be tendered. The height of the mountain here seemed awful, exceeding any that I had seen. Some people suppose that much more rain and snow fall on them than doth in a level country. Oh! the sympathy I have received from those who dwell in these rough places; many of them in poor cottages covered with bark or straw.

13th.—I was at Danby Meeting again, it being the first of the week, and seemed to be a dull season; yet some ability to labor amongst them was afforded. Several things opened in my mind concerning the free use of distilled spirits, and tobacco; and I had to tell them I was apprehensive these things were not introduced amongst us by the dictates of Truth; but that they rather came in by stealth, as a thief in the night, and stand behind the curtain of custom, as many other evils do; causing weakness among us as a people; yet, that I believed the Lord's refining work would go forward, and prevail over all opposition, but gradually; and that a reformation is begun. Therefore let not the little ones be discouraged. For though the first who step forth to change evil customs may meet with exercise and sore conflicts, yet as they stand single and keep humbly resigned to the Lord's disposal, their reward will be sure.

14th.—Leaving Danby, I came to Easton; and on the 16th crossed the North River, to the week-day meeting at Saratoga; which was a trying season. The day following, I went back to their Monthly Meeting at Easton; at the close whereof the shutters were opened at my request, and I was exercised in close labor with Friends of both sexes on the subject of a reformation, having to touch on the particular things which, as above, were mentioned at Danby; also on the harm arising from extensive trade; advising that children be brought up to industry, &c.

18th.—Travelling to White Creek, the following day I had a large and solid meeting there; after which, an aged man came to me and said, he "had thought much of being a Quaker, yet had been afraid to join them; but this day the Truth had been declared to his comfort;" and at parting he expressed his wish that the Lord might prosper his work in my hand.

20th.—The following (First-day), I was at

Pittstown Meeting—the first which was held in their new meeting-house, being a large gathering, I believe the Truth was in dominion among us; and it seemed marvellous to see such a mixed multitude sit so still and solid.

23rd.—The next meeting was among Friends of Coeyman's Patent; large, and solid. At the close of the public sitting, I had an opportunity with Friends by themselves. Here way opened for close labor respecting the necessity of reformation, as things amongst them were much out of order, and too much lukewarmness prevailed. I was also at their Monthly Meeting next day, where I was engaged to labor with both sexes on the necessity of reformation; and had to touch on the same subjects as in other places, concerning foreign trade, rum, tobacco, &c., exhorting to that of more true moderation, temperance, &c.; with the use of our own country produce.

26th.—After that, I had a meeting at Clincy-kills; a solid, favored season—said to be the largest known to be in that place. A hope was expressed by some that the Lord would bless my labors.

27th.—The next was at New Britain—a large and solid meeting; and another at Steven-town, in the afternoon; where power was given to labor fervently for the good of souls.

I am this day sixty-four years old; and am at times deeply humbled in beholding how my way has been opened, and every kindness necessary have I witnessed from all sorts of people; with a capacity to undergo hard travelling through scenes and places where to human view it seemed impossible. In the arm of the Lord is all strength and sufficiency.

(To be continued.)

Laura Bridgman.

Here was a human being that in girlhood was powerless to see, speak or hear. Her sense of smell was destroyed, and that of taste impaired. Only the sense of touch was left.

Cut off from all intercourse with the world, shut out from communication with a living creature, from all interchange of affection and human sympathy, her being was imprisoned in a darkness that seemed to be forever impenetrable. Mind and soul were apparently entombed where no ray of light or knowledge could reach.

Such was Laura Bridgman when Dr. Samuel G. Howe first saw her. His self-imposed task was to let light into her mind, to enable her to communicate with the world, to rescue her intellect from the darkness in which it was enveloped.

To others the task seemed hopeless. The great philanthropist, realizing its difficulties, undertook it with serene confidence and resolution. By a patience that was simply sublime and a skill which he alone possessed, he achieved a success that has been the wonder and admiration of the world.

In 1873 the teacher wrote of the pupil:

"She enjoys life quite as much, more probably, than most persons do. She reads whatever book she finds in raised print, but especially the Bible. She makes much of her own clothing, and can run a sewing-machine. She seems happiest when she can find some person who knows the finger alphabet and can sit and gossip with her about acquaintances, the news and general matters. Her moral sense is well developed."

It is a beautiful lesson, that with all her afflictions, Laura Bridgman lived a long life of usefulness and happiness.—*New York Herald*.

FOR "THE FOREIGN."

A Visit to Westerly, R. I.

I left home on the 31st of Fifth Month, to attend the funeral of a valued Friend, at Westerly, Rhode Island.

The ride along the Sound from New York to Stonington was interesting. The various public buildings about New York City and harbor, the Battery at the south end of Manhattan Island, the beautiful bridge from the city to Brooklyn (under which we passed), the narrow strait or gate which separates Long Island from the State of New York, where the rocks formerly made the passage dangerous to vessels, until removed by extensive mining and blasting a few years since—all added to the interest of the voyage.

It was a beautiful evening, and we greatly enjoyed the quiet and smoothness of our passage, the glory of the setting sun and the shining of the full moon on the waters. On reaching Stonington, where the boat stops, we remained quietly in our berths, until it was time to prepare for the morning train to Westerly. On the platform at Westerly we were accosted by a hackman, who said he had directions to take us to the house of Charles Perry, the Friend whose funeral we had come to attend. We found the front door unfastened and went in, and took seats in the sitting-room, until some of the family came to welcome us.

In the forenoon we attended their meeting for worship, which Friends keep up at that place. There were some 45 persons present at it, which we were told is about the usual number. It was a good meeting, in which a degree of religious exercise was felt. There are some valuable elderly Friends belonging to this Meeting, and some thoughtful and seriously-minded ones of middle age, who feel in measure the responsibility of rightly training their young children. But in regard to the younger branches of the Society, it seemed evident, that they had felt the effect of being brought up in a community where the number of members was few, and where they had not had the strength to be derived from the example and companionship of those of their own age of the same religious persuasion, and holding the same testimony.

A desire was early felt, and it continued and increased during our tarriance with this interesting group, not only for their own growth in that heavenly knowledge which is permitted to everlasting life, and which is received through submission to the working of Divine Grace in the heart; but that they might be increasingly concerned to uphold the principles and practices and testimonies of the Society of Friends, from a conviction that these are among the fruits of that Spirit of Christ which operates on man for his redemption from sin and evil.

A tender spirit was manifested by some of these dear Friends, especially at the time of the funeral, Second-day afternoon (Sixth Mo. 2d), where we were favored with a very solemn opportunity.

A visitor to this section of country can scarcely fail to be impressed with the multitude of boulders of rock, some of them many feet in diameter, which thickly strew the surface of the ground, and are more or less deeply imbedded in it. In many places one cannot dig far below the surface without striking upon similar boulders. On the farms much of the loose stone has been built into massive walls which enclose the fields. The fields are made small and the walls thick, and thus much of the material is utilized. But some of the fields still retain so many rocks that ploughing them must be a very difficult, if

not impracticable undertaking—so that they are reserved for pasture.

These boulders belong to the *Drift* formation, a term used by geologists to include the gravel, sand and stones which are spread over the surface of some parts of the Continent, without being sorted and deposited in layers by the agency of rivers or waters.

The *Drift* occurs over nearly all Canada, New England, Long Island, and the Western States of the same latitude. It is supposed that in a former period, the northern part of the Continent of America was covered with an immense sheet of ice, or glaciers, and that this in its progress southward carried with it the enormous mass of rocks and other material, which now constitute the drift—just as the glaciers in the Alps and other places are seen to do at the present time. Near the termination of these glaciers, at the place where the melting of the ice equals its onward motion, so that a stop is put to its encroachment on the valleys, there is always to be found a pile or ridge of rocky boulders, which the ice had carried with it, and there deposited as it melted. These piles are called moraines, and mark the limit of the glacier's motion.

Watch Hill, a considerable eminence at the mouth of the Pawtucket River, and a few miles south of Westerly, is believed to be a mass of moraine.

Some of the boulders that have been transported in this way are of a great size. Dana, in his Geology, speaks of one in Bradford, Mass., which is thirty feet every way and weighs not less than 41 millions of pounds.

The material composing the drift is derived from the rocks to the north of where it now lies. This is shown by comparing them with the native rocks of the country. Thus the boulders in Southern New England have been traced to their original beds lying further north. Boulders of iron ore, derived from the iron-ore bed of Cumberland, R. I. have been distributed over the country to the distance of thirty-five miles southward—but none are found to the northward.

The glacial motion to which the formation of the *Drift* is ascribed, must have made considerable changes in the surface of the land, planing off the top of ridges, scooping out deep valleys, in some places, and depositing in others great masses of earth and stone. In this way, I suppose, was formed a pond which I saw on the farm of a Friend in the neighborhood. It was fed by the surface waters and by springs from the surrounding higher grounds; but had no outlet. Such ponds are frequently met with in some parts of the country. A deposit of moraine material had closed up the outlet of a previously-existing valley or depression, and this converted what would otherwise have been the bed of a rivulet into a still receptacle of water. The carrying action of the ice has been aided by water-floods preceded by its melting, or by other causes.

These remarkable changes, no doubt, were effected long ages ago, before the historic period, and very probably before man was an inhabitant of the earth; so that the evidence on which we believe that they must have taken place is traverler to that which would satisfy the mind of a traveller who, on penetrating into a newly discovered country, should find the walls and other remains of a house. He would feel sure that some human being had preceded him, because he could in no other way account for the building of the walls he had found.

In the higher grounds around Westerly, we came to ledges of gneiss—the prevailing rock of Southern and Western Rhode Island. In these ledges are situated the quarries of granite, which have been extensively worked, and have largely contributed to the financial prosperity of the town. Both of these rocks are composed of the same materials (quartz, felspar and mica); but in the gneiss these are arranged in layers, which allows the rock to be readily split into slabs. This slaty structure is wanting in the granite.—So that, in quarrying and in the subsequent shaping of the blocks, resort is had to the expedient of drilling numerous holes a few inches apart, into which wedges are driven, and thus a crack is made, which determines the shape of the resulting block.

Some of the granites have a reddish tinge, caused by the felspar being of a flesh color. The white granite is considered the most beautiful, and that varies in shades of color as there is more or less of the black mica in its composition.

The circumstances under which this visit was paid rendered it improper to give much time or thought to the examination. If the plants which are natural to that region. In crossing a field to the place of meeting, I noticed the presence of some of the weeds common in my own section of country—such as the butter-cup, mallow-ear, chickweed, and the narrow-leaved plantain; but saw nothing new. In riding along the road, we passed a number of wild cherry trees, completely despoiled of leaves by the caterpillars. It reminded me of the remark made by Dr. Darlington, in his botany of Chester County, Pa., that the leaves of this plant are a favorite food of caterpillars. It would have been a matter of interest to have learned somewhat more of the habits of these destructive insects; but it was not the right time for such studies.

J. W.

EXTREMISER is a good thing, but it sometimes gets one into trouble. He who undertakes giving a special exhibition of it ought to be master of his surroundings before venturing too far; especially should he be acquainted with the religious customs of the people among whom he operates, as it is somewhat perilous to work "the smart game" among a set of fanatics. By his ignorance or indifference in these respects a German photographer lately came to grief. Having an eye to his own advantage, he sought to secure the likeness of the Sultan. But he counted not the cost. According to the Koran no one is allowed in any way to reproduce the face or figure of a human being. But the enterprising artist, either not knowing or disregarding this prohibition, selected a suitable place for obtaining a view of his Majesty during one of his regular Friday visits to the mosque, and upon a certain day succeeded in getting a fine negative of him. As he was rejoicing over his success and was folding up his instrument, he was unfortunately "discovered" by an officer of the palace, who had accompanied the Sultan. At once the officer gave vent to his fury and indignation at the sacrilegious act, and as a protest against the Christian barbarism which paid no regard to Islamic law he destroyed the vile instrument by which the wicked deed had been committed, effaced every trace of the picture, and placed the offender under arrest. It looked ominous for the prisoner, as he was tried and sentenced to death. Nothing but his German citizenship saved his life. He appealed to the Ambassador

of Germany, who secured a mitigation of his sentence so that he was let off with a month's imprisonment and banishment from Turkish soil. Turkey is evidently a poor place for the photographic art. Those old Mohammedans don't believe in any nineteenth century descriptions. He who wants to be enterprising among them must find some other trade, or experiment upon some less important and sacred subject than the Sultan, or at least keep out of the reach of his vigilant officers.—Selected.

An Indian Village in Mexico.

BY W. F. MALLALEU.

There are a multitude of such villages, for there are more than four million of Indians in the Republic of Mexico. They are not wild, roving, murderous red men like some of those who supply from time to time the troops in the United States with brief military employment. In Mexico the native population, or rather the Indian population, is manifestly superior to his savage brother of the North. It seems to be an established fact that the Latin races, especially the French and the Spanish, have a way of fraternizing with savages that the Saxon has never learned. The Saxon exterminates, or crowds out, or subjugates all wild people. He will not fraternize with them, and if he mixes his blood he has ordinarily no special love for his offspring, and this fact accounts for the habit of many Virginia planters selling their own children to the slave-drivers for the distant South. There seems to be more humanity if not more Gospel in the Latin method than in that of the Saxon. The former accounts for the present existence of so many millions of Indians in this country.

It is a most remarkable fact that two of the foremost men of recent times in the military and civil affairs of this country have been full-blooded Indians. Juarez, the reformer and reorganizer of the republic, and President Diaz, now at the head of the Government, are the men just referred to. And it is to be noticed that among the educated Indians there is a certain race pride that is quite as pronounced as that among those who trace their ancestry to a pure Spanish origin.

The question of color does not seem to trouble the people in this country. The people of Spanish origin have usually a dark skin and black hair and eyes. The Indians are much darker. The average color will be about the same as that of the Negroes in the South who have one-fourth white blood in their veins. These Indians are not Caucasian. If they are the descendants of the "lost tribes" of the Chinese or Japanese, they are of the tribe of Shem rather than of Japheth. Some of them are very dark, almost as dark as Negroes; but color is no bar to promotion in Church or State.

We leave Orizaba in a hack, or something like it—that is, we started to leave—but before we had gone twenty rods one of the springs broke short off and the body of the vehicle dropped on to the forward axle. It looked like a long delay or a complete break up of our excursion. But not so, for soon a stick was applied as a lever to the body of the hack, the wheel was used for the fulcrum, the spring was brought into position, a cord was produced and wound about the spring, tied tightly, and in ten minutes we were off again.

On examination we saw that cords had been already applied to the other springs, with the

exception of a single point, and so with more confidence in the cords than in the springs we rattled away as fast as four ill-disposed mules saw fit to take us over rough ways and through gullies and deep sands. It took us almost two hours to go six miles, and then we were landed in the Grand Plaza of the Indian village of Atzacan. The coach draws up before the door of the Mayor's office. He is not at home, but his secretary is at his post, and as we alight he receives us with the utmost cordiality. He is a man about forty years of age, nearly bald, slight and trim built, and has a very pleasant and gentlemanly way. He is not an Indian, he is the son of a captain in the navy of Spain, but has come after much wandering to make his home in Mexico. His office is rude and very plain—a coarse brick floor, a plain chair and benches, a large square table; but as we cross the broad piazza and enter the room, the renewed greeting is so cordial that we feel quite at home. After the fashion of a genuine Spaniard, he assures us that he and his whole house and the servant are at our disposal, presses us to have a lunch or a cup of coffee, which being declined, we spend ten minutes in conversation concerning Mexico, the United States, and our mission work in Mexico.

We are to hold service in the village, and having a few moments to spare we set out to explore the village. Remember this village is in the tropics, and as you walk along the vegetation on either hand tells the story. There are various tropical fruits that are not familiar, but we see fig and lemon and orange and coffee. The orange trees are especially beautiful; they are full of buds and rich with fragrant blossoms, and at the same time here and there amid the dark green leaves are the golden globes resplendent in the warm, bright sunshine. But where are the houses of the two thousand people who are said to live in this village? We do not see more than fifty or sixty houses besides those which surround the Plaza. We walk along the streets—unpaved but well trodden and very narrow streets—but the houses of the people are not visible. We need to look more closely, for these groves of coffee and fruit trees come to the very edge of the street, and as we stop and peer in through the branches we see the humble dwellings of the people. They are small and rude and cheap, but they have four walls and a roof, and so afford shelter, and it may be, with Christ as an abiding guest, they hold more of real comfort than the palaces of the rich. This village, with its embowered homes, is more tropical, ideally and really, than any other yet visited.

It is only two years, or thereabouts, that our Mission was planted here; we have now about forty members in full and probationers. A year ago an attempt was made to murder all who were then connected with us. They were assembled for worship in a private house. It was at night. A mob came around the house, fired more than a hundred shots at the house or the people in it; but, strange to tell, not one was hurt.

Thanks to the Government, several of the mob were arrested and punished, and now we have peace. And our friend, the secretary, on whom we called, would protect our people at the peril of his own life.

We have here a small church house, about 20 by 30, neat and plain. It was well filled with neatly-dressed Indians to hear the Gospel. And whether sitting on the floor, or on chairs or benches, they were good listeners, and very helpful to the preacher, who, though unable to reach

them except by an interpreter, still felt that the word of God was having its accustomed power on their willing hearts. We have a school for boys and girls.

After the sermon and other services we repaired to the Mayor's office to take our formal leave. Again we were urged to take refreshments, at least a little soup, but time being short, we resumed our seats in the rickety hack and started back to Orizaba, thanking God in our hearts that in this Indian village the pure Gospel is preached, and the long oppressed people can now worship God without fear of molestation.—*Christian Advocate.*

FOR "THE FRIEND."

[Letter from Thomas Kite to Susanna Lightfoot, then a teacher at Westtown Boarding School.]

Philadelphia, Second Mo. 1st, 1840.

SUSANNA LIGHTFOOT, Dear Friend: * * * Jacob Green is again in the city for the purpose of attending our Quarterly Meeting. He is a sweet spirited Friend, and has been a messenger of glad tidings to many mourners in Zion.

I would willingly enlarge, but time will scarcely admit of it. I feel for thee, as I have long felt, affectionate desires for thy advancement in the path of righteousness; that you may steadfastly adhere to the secret discoveries of the Light of Christ, faithfully follow its holy leadings, and patiently endure those spiritual baptisms by which the great Head of the Church prepares his servants for his own work. Every vessel in his house is to bear the inscription of "Holiness to the Lord!"

With love I remain thy friend,
THOMAS KITE.

THE CHICKEN'S MISTAKE.

BY PHEBE CARY.

A little chick one day

Asked leave to go on the water,
Where she saw a duck with her brood at play,
Swimming and splashing about her.

"Indeed," she began to peep and cry,
When her mother wouldn't let her,
"If the ducks can swim there, why can't I?
Are they any bigger or better?"

Then the old hen answered, "Listen to me
And hush your foolish talking;
Just look at your feet, and you will see
They were only made for walking."

But chickie wistfully eyed the brook,
And didn't half believe her,
For she seemed to say by a knowing look
Such stories couldn't deceive her.

And, as her mother was scratching the ground,
She muttered, lower and lower,
"I know I can go there and not be drowned,
And so I think I'll show her."

Then she made a plunge where the stream was deep,
And saw too late her blunder,
For she hadn't hardly time to peep,
When her foolish head went under.

And now I hope her fate will show
The child my story reading
That those who are older sometimes know
What you will do well for heeding:

That each content in his place should dwell,
Is just as his brother;
And any part that is acted well
Is just as good as another.

For we all have our proper sphere below,
And this is a truth worth knowing;
You will come to grief if you try to go
Where you were never made for going.

—Songs and Rhymes for the Little One.

THE CHANGED CROSS.

SELECTED.

There is a time of sadness, and my heart,
Although it knew and loved the better part,
Felt wearied with the conflict and the strife,
And all the needful discipline of life.

And while I thought on these, as given to me,
My trial tests of faith and love to be—
It seemed as if I never could be sure
That faithful to the end I should endure.

And thus, no longer trusting to his might
Who says, "We walk by faith, and not by sight,"
Doubting, and almost yielding to despair,
The thought arose—My cross I cannot bear:

Far heavier its weight must surely be
Than those of others which I daily see,
Oh! if I might another burden choose,
Methinks I should not fear my crown to lose.

A solemn silence reigned on all around—
E'en Nature's voices uttered not a sound;
The evening shadows seemed of peace to tell,
And sleep upon my weary spirit fell.

A moment's pause—and then a heavenly light
Beamed full upon my wondering, raptured sight,
Angels on silvery wings seemed everywhere,
And angels' music thrilled the balmy air.

Then One, more fair than all the rest to see—
To one whom all the others bowed the knee—
Came gently to me as I trembling lay,
And "Follow me!" he said; "I am the Way."

Then, speaking thus, He led me far above,
And there, beneath a canopy of love,
Crosses of divers shape and size were seen,
Larger and smaller than my own had been.

And one there was, most beauteous to behold,
A little one, with jewels set in gold.
Ah! this one, methought, I can with comfort wear;
For it will be an easy one to bear:

And so the little cross I quickly took;
But, all at once, my frame beneath it shook.
The sparkling jewels fair were there to see,
But far too heavy was their weight for me.

"This may not be," I cried, and looked again,
To see if there was any here could ease my pain;
But, one by one, I passed them slowly by,
Till on a lovely one I cast my eye.

Fair flowers around its sculptured form entwined,
And grace and beauty seemed in it combined,
Wondering, I gazed; and still I wondered more
To think so many should have passed it o'er.

But oh! that form so beautiful to see
Soon made its hidden sorrows known to me;
There lay beneath those flowers and colors fair!
Sorrowing, I said; "This cross I may not bear."

And so it was with each and all around—
Not one to suit my need could there be found;
Weeping, I laid each heavy burden down,
As my Guide gently said; "No cross, no crown!"

At length, to Him I raised my saddened heart;
He knew its sorrows, bid its doubts depart.
"Be not afraid," He said, "but trust in me—
My perfect love shall now be shown to thee."

And then, with lightened eyes and willing feet,
Again I turned, my earthly cross to meet,
With forward foot-steps, turning not aside,
For fear some hidden evil might betide;

And there—in the prepared appointed way,
Listening to hear, and ready to obey—
A cross I quickly found of plainest form,
With only words of love inscribed thereon.

With thankfulness I raised it from the rest,
And joyfully acknowledged it the best—
The only one of all the many there
That I could feel was good for me to bear.

And, while I thus my chosen one confessed,
I saw a heavenly brightness on it rest;
And, as I bent, my burden to sustain,
I recognized my own old cross again.

But oh! how different did it seem to be
Now I had learned its preciousness to see!
No longer could I unbelieving say,
Perhaps another is a better way.

Al! no! I henceforth in my own desire shall be,
That He who knows me best should choose for me
And so, what'er his love sees good to send,
I'll trust it's best, because He knows the end.

SHEPHERD.

Beloved Friend: My mind is often affected as I pass along under a sense of the state of many poor people who sit under that sort of ministry which requires much outward labor to support it; and the loving kindness of our Heavenly Father in opening a pure Gospel ministry in this nation has often raised thankfulness in my heart to Him. I often remember the conflicts of the faithful under persecution, and now look at the free exercise of the pure gift, uninterrupted by outward laws, as a trust committed to us which requires our deepest gratitude and most careful attention. I feel a tender concern that the work of reformation so prosperously carried on in this and within a few years past, may go forward and spread among the nations, and may not go backward through dust gathering on our garments, who have been called to a work so great and so precious. * * * I look at the precious gift bestowed on thee with awfulness before Him who gave it, and feel a desire that we may be so separated to the Gospel of Christ that those things which proceed from the spirit of this world may have no place among us.

Thy friend, JOHN WOOLMAN.

Physical Training in Education.

Extracts from an Address Tenth Mo. 28th, 1886, by James Mac Allister, Superintendent of Public Schools, Philadelphia.

Any statement of the scope and purpose of education worthy of consideration must include the whole being of man. It must be made to cover the development and training of his bodily powers, his intellectual powers, and his moral powers. Education fails to accomplish its end of fitting man to be a useful member of society if it neglects any one of these parts of his nature. We do not want a mere athlete, we do not want an intellectual prodigy with a weak and sickly frame, we do not want a narrow ascetic who looks with contempt alike upon a well-developed body and a cultivated mind. What the great, living, moving world in which we have to play our part demands is a man, strong in bones and muscles and nerves, active in the play of every intellectual faculty, and free in the exercise of sovereign will—a whole man, fitted to think, to do, and to endure, in all the duties and responsibilities which may fall to his lot in life.

While this fundamental principle of human education is self-evident to every thinking mind, yet strange to say it is very far from securing that recognition in the management of schools to which it is entitled. The elaborate schemes of instruction in operation in public and private schools, pay little or no attention to the physical education of the pupils. Everything is done which can possibly stimulate the mind into abnormal activity, while the bodily training upon which the free and healthy play of the mental powers absolutely depends, is almost wholly neglected.

It is to our German-American fellow citizens that the United States owes the original impetus from which the interest taken in gymnastic training in this country was derived. About

half a century ago the best teachers began to feel that the eagerness with which young men pursued their studies in college must be counterbalanced by some kind of physical exercise. Manual labor was first proposed, and to some extent introduced in a most objectionable form. As might have been expected, the results were more injurious than beneficial. But the Germans who had come to make their home in America began to establish their gymnastic societies. They set forth their object to be "the rearing of a people strong in both mind and body," and gymnasia were erected in all the large cities, dedicated to the realization of this great principle.

Under the influence of the German societies the colleges took up the subject, and gradually gymnastic exercises found their way into them, until now at our chief centres of higher education, there are buildings equal to the best in the world, for the physical training of the students.

It is extremely gratifying to be able to state that in the recent movement for the higher education of woman, great pains have been taken to provide for the physical culture of the students. All this is very encouraging; but it is painful to be under the necessity of stating, that while so much has been done in schools of higher grade, the common schools have been but slightly influenced by the general movement. It is true that in all good schools, catholic exercises of some kind are practiced; but regular, systematic, physical training as a necessary part of the education of every child, has yet found no place in the schools where the great mass of our children are educated. Indeed, in many cases what is done is productive of more harm than good, on account of the unsound principles on which it is based and the manner in which it is conducted. The exercises are long too infrequently, and are continued too long at a time; they are not varied enough, and in most cases, no apparatus of any kind is employed. Care is not taken to note the physique or health of the boys and girls, with a view to regulating the kind and amount of training to be given.

It is often said that gymnastic exercises are only a form of recreation, and that there is no time for play in our schools. I beg to express the opinion that a great deal can be used in behalf of putting gymnastics into our schools just because it affords a means of recreation. A good many schools are sadly in need of something to relieve the pressure put upon the minds of their pupils. The harm done to children by mental strain is enormous; and if parents could be made to realize this, they would not set so high a value upon the averages which are used to set up standards of scholarship for the pupils. Any distinction gained by a boy or girl at the cost of sound health is dearly bought.

To be physically strong so far as lies within his power, is not only a duty which every man owes to himself, but it is an obligation which he owes to his family, to society and to the State.

But the strongest argument for physical culture is the relation which it holds to mental and moral power. The old maxim, "a sound mind in a sound body," rests upon a broader basis of fact now than ever before. The intense activity of life in the United States at the present time results in an amount of nervous waste and injury that is unknown in any other civilized country. The absorption of so many men in their business and professional interests, leads them to neglect the care and rest which the body demands, and

must have, at the peril of mental decay and impotence. Hardly a day passes without an instance of a "break-down" from excessive strain of some kind. It is almost always laid to overmental exertion, but it would be quite as correct to charge it to that abuse of the body which deprives it of a sufficient amount of exercise, and the opportunity for recuperating its exhausted energies. If this is the case with adults, much more so is it true of the young during the period of growth. There can be no right development of the mental powers without the coordinate development of the bodily powers. This is the inexorable law of nature, and it cannot be violated without incurring the penalty. The highest exercise of mental power depends upon physical conditions. To seek to cultivate the mind at the expense of the body is to frustrate the very object for which you are striving. A momentary advantage may be obtained, but there can be no permanent gain.

HUMAN responses to human requests are more likely to fall short of the request than to exceed it. But God's responses to human prayers are more likely to exceed the request than to come short of it. There is, perhaps, no time when God in his answers more truly exceeds the bounds of our requests than when he sends us a peculiar affliction. And yet there is no time when we are more likely than just then to look upon our experience as something quite apart from anything that we have asked for, or hoped to receive. We are seeking "light in the dispersion of the cloud," when all the time the "light is in the cloud." We are asking God for an explanation of our darkness, and are "expecting an answer from all quarters but one—the darkness itself." We pray for deeper knowledge "for broader experience, for higher spiritual realizations; but when the best means for obtaining those blessings are brought to our door, we fail to recognize them as the very things for which we have been pleading and hoping. One thing that a Christian may well desire and pray for, is the spirit and power to recognize an answer to prayer when it does come, though it may come in a way as much better and fuller as God's ways are above man's ways, and God's thoughts above man's thoughts.—*Selected.*

Natural History, Science, etc.

Strength and Elasticity of Spiders' Webs.—General O. M. Mitchell, in an edition of his lectures, describes the manner in which he caused a clock to record its beats telegraphically. The required makes and breaks in the battery were effected by means of a cross of delicate wire and a mercury cup. The great difficulty was to procure a fibre sufficiently minute and elastic to connect the top stem of the cross with the clock pendulum. The very finest human hair that could be obtained was too coarse and stiff. Its want of pliancy and elasticity gave the minute wire-cross an irregular motion. After many fruitless attempts, the assistance of the spider was invoked; and his web proved to be exactly the thing required. He says: "In proof of this remark, I need only state the fact that one single spider's web has fulfilled the delicate duty of moving the wire cross, lifting it, and again permitting it to dip into the mercury every second of time for a period of more than three years. How much longer it might have faithfully performed the same service I know not, as it then became

necessary to break this admirable bond, to make some changes in the clock." Here it will be seen that the same web was expanded and contracted each second during the whole period, and yet never, so far as could be observed, lost any portion of its elasticity.—*H. G. McCook.*

Artificial Honey.—An article in the *Popular Science Monthly* speaks of the assertion, that an imitation of honey is made by filling combs with glucose, as a false statement which has no foundation in fact.

Measles in the Fiji Islands.—The terrible scourge was brought here in an English man-of-war (H. M. S. Dido), in which, last January, Taikombau and his sons returned from Sydney, where they had gone to visit Sir Hercules Robinson, and so prove their implicit confidence in their near friends and protectors. At Sydney, Ratu Joe and Ratu Timothy, and the king's younger sons, took measles of a mild type, as did also two servants; and on the return voyage the old chief was slightly unwell—so slightly, that the question of quarantine was never even suggested; and on reaching Levuka, he was allowed at once to go ashore. Vassals and kindred came from all parts of the group to receive him, and, according to custom, frequently sniffed his hands or his face, thereby, alas! breathing the unsuspected poison. A few days later, Mr. Layard held a meeting on the Rewa, to which came chiefs from all parts of the interior of Vitu Levu, representing the mountain tribes, there were about a thousand people present. To this meeting went some from Levuka, who had already caught the measles, without being as yet unwell. The infection spread, and the seeds of the disease were thus carried by the mountain chiefs to their respective districts, where it rapidly extended, proving fatal to a vast number of the people, and to nearly all the chiefs who had been present at the meeting with the white chief (—Layard). Of course it was only natural that they should attribute this to poison, or witchcraft; and that the tribes who had only recently accepted Christianity, or were on the eve of doing so, should conclude that this was a Heaven-sent punishment for forsaking the gods of their fathers, and giving up their lands to the white men. So they retreated to their mountain strongholds, banishing their teachers, returned to heathenism, and only repudiated the recently accepted British rule.

We heard of an instance in which one of the teachers having died, even the Christian villages deemed it expedient so far to return to their old customs as to bury his wife and children in the same grave with him, as a propitiation to the spirit of the murrain. But, as a rule, the Christians stood their ground firmly, and the marvel is that so very few should have relapsed. Among the first victims was a very good man, Ratu Savanatha, one of the most able and intelligent of the chiefs, and who had done all in his power to explain to the Kai Tholos (i. e. people of the mountains) the advantages of English rule.

So, from every corner of the group, came tidings that the plague was raging. Whole villages were stricken down—young men and maidens, old men and children—lay dead or dying. The handful of white people, as a rule, did their utmost to help, and gave all the food and medicine they possessed; but their own laborers and their own children were stricken, and needed more care than they could give; nor were there lacking bad white men who went about telling the natives that the disease had been purposely introduced to kill them and get

their lands. So that the plain medical directions which were at once published were ignored, and the white man's medicine too often refused, from a conviction that it would cause certain death. Native medicines, and bad, ill-cooked food, made matters worse. Of course anything like isolation of the sick was impossible; nor could they be prevented from rubbing to the nearest water to cool their burning fever. How could men who are continually bathing and swimming be persuaded that this could harm them? So the rash was thrown in, and congestion of the lungs and dysentery of the most malignant type were brought on in thousands of cases.

Apart from this irresistible craving to lie down in cool streams, it would have been a hard task for the poor sufferers to keep themselves dry, for an unparalleled rainfall converted whole districts into dreary swamps, where dysentery and starvation completed the work of death. The people were too weak to go to their gardens (which are often far away on some steep hill-side), and so there were none to carry food; besides, a cold, wretched walk through the long wet roads was almost certain doom. At last, the few who were well began to herd together, forsaking the sick, and scarcely exerting themselves to give them a drink of water, or prepare such food as they had. In some districts, as in the Isle of Ono, the people were literally starving, digging up wild roots, and eating old cocoanuts only fit for making oil. Then they lay down, all alike stricken, for the most part awaiting the fate they deemed inevitable, with that strange apathetic calm which characterises a race wholly indifferent to life. At last the living were unable to bury the dead, and there was good cause to dread lest a worse pestilence, in the form of typhus, should be produced by the horrible putrefaction which poisoned the air.

On the king's little Island of Bau (the special home of the nobles, and which is small and overcrowded), all were ill at once. Canoes bearing the dead were ceaselessly crossing to the mainland, where the graveyards lie, the cries of mourners and the death-drums resounded day and night. Then, too, the people were starving; they had no strength to go ashore to the mainland for food. Many of the finest chiefs and teachers died.

At the Missionary Institute all the students were down; but thanks to an unwearied nursing day and night, most of them recovered.

Of course all the native constabulary were seized; but, thanks to the devoted care of Lieutenant Olive, late of the Royal Marines, comparatively few died. He turned Nasova into a great hospital, and distributed his 150 patients all over it, appointing those who were less ill, guards over the very sick, to prevent their yielding to the fatal impulse to rush into the cool blue sea, which lay so temptingly at their very door. By dint of indefatigable exertions, and a generosity that spared not the utmost expenditure of his private means, on comforts; and, indeed, necessities for his sick men, he had the unspeakable satisfaction of saving all but ten, and these fell victims to their own craving for the cool waters. They managed to escape from their guards, and lay down in the sea, thus sealing their own doom.

It appears that the measles, which we consider such a simple and infantile complaint, invariably assumes a character more like the plague when first introduced into one of these South Sea Isles. In 1860 it was unfortunately taken to the Mare Loyalty group, and one-fifth

of the population died. The Dido unfortunately put three persons ashore on Norfolk Island, on her way up to Fiji; they also carried the measles, which spread to the whole community. Afterwards she landed some time-expired laborers at the Isle Malicolo, and there too it is reported that many have died.—*C. F. Gordon Cummings* "At Home in Fiji."

Items.

Divine Power the Source of Spiritual Efforts.—An article on this subject, by Jo. Peck, in the *Christian Advocate*, in commenting on the expression, "The Church needs more power, not more machinery," he says:—

"Approach reverently the Son of God and make inquest for the secret of his influence that shook Judea and undermined philosophers and religions. Power everywhere! Means were everywhere at a minimum and power at a maximum. His words were almost wholly the machinery. But what power with those words! Men stood astonished at his marvellous words. Why? They were the same vocabularies as other men used, but they were surcharged with a power that never yielded. "It is a word," "This is a word," cried. Entrocydon is hushed to rest by that word, and at his bidding the tumultuous sea sleeps! No machinery. If He anoints the blind eyes with clay, moistened with spittle, it is the power in the words, "Receive thy sight," that pours a ravishing vision of beauty on those sightless eye-balls. If He touch the ear of the deaf, it was the power of the word "Ephraim, that opens a whispering gallery of sweet sounds in that aral tomb of silence. It was power in the words that healed lepers and raised the dead. Machinery has little function in Christ's ministry. Divine power is supreme, and when He commissions and sends forth the Apostles to the organized extension of the Church, He continues this philosophy of power, not machinery. "The secret which is the supreme teaching of Christ to those nearest to Him as to the secret of unflinching success in the Gospel? Is there a word about careful attention to organization and ecclesiastical machinery? Organization must be, machinery would develop, but He refers only casually to these.

"Everywhere the recurring idea. The 'secret' was the power of script and wallet and baggage, but were clothed with power over diseases and devils and poisonous reptiles. And as He neared the hour of his departure, leaving his followers to do greater works than He had done, what was the confidential disclosure as to the means of their glorious success? Perfect your machinery, invent new instruments? Not a syllable of this, until ye be endued with power from on high."

"And the early Christians went forth, 'turning the world upside down,' because they had power to do it. They had little machinery, but tremendous power. Poor in all else, they were rich in power. They had not arms to give a crippled beggar, but they had power in Christ, who said to the lame, 'Rise up and walk.' The shadow of an apostle falling on the sick and impotent had more power of healing than all the machinery of modern church organization.

"The disciples had little but the words of Jesus for instrumentality, but they had power after the Holy Ghost came upon them. They were committees and invited no organizations to do the work of Christ, but, individually empowered, proceeded to accomplish his mission.

"That heroic period, which Xander beautifully names the 'time of the planting and training of the Church,' when self-sacrifice was the psalm of life, and martyrdom its coronation; when the gait, wisdom and strength were not used in the primitive work, but in the assaults of Jewish learning and intolerance; to foil the subtleties of Greek philosophy; to live in defiance of imperial persecutions and the universal hatred of barbaric hordes, reveals the least of ecclesiastical machinery, and the presence of tremendous energies of Divine power. When, however, in a few centuries this sacred truth had conquered the Roman world; had admitted

into membership vast hordes of baptized barbarians had become drunk with intoxicating ambitions and lusts of worldly power, and had largely lost the infallible evidences of Divine power, then was machinery invented and multiplied as never in the nineteen centuries. Myths were made dogmas, baseless inventions of priestcraft were foisted into canons of faith; pagan superstitions were organized into Christian verities.

"The era of the least Divine power in the Church was the period of her greatest invention and dependence on machinery; and is not this statement true, that in all ages, and in all denominations the period of the Church's maximum power, as a spiritual body, has been characterized by the minimum of machinery? Has not every genuine reformation in the history of God's Church at large broken up and discarded a vast amount of the complicated machinery which a corrupted period invented? Did not the Reformations of the sixteenth century in Germany and England smash into fragments large quantities of old Romish machinery? And did not those very Reformations fail of realizing the full expectations and promises of efficient and thorough reform, because they retained too much of the worn-out and worthless machinery of Rome? Have not these elaborately organized ecclesiasticisms, with stately forms, imposing cathedrals, and polished machinery, always tended to formalism and feebleness of spiritual power? Has not the machinery of baptismal regeneration, sacramentarianism; ritualism and churchism largely displaced the simple salutary dependence on the power of God in the Holy Ghost?"

Spurious Documents.—A work composed of reputed letters and reports and records of Pontius Pilate in connection with the trial and crucifixion of Jesus, was in circulation, in the early Christian centuries, under the title of *Acta Pilati*.—"The Acts of Pilate." The "documents" given in that work are deemed spurious by scholars generally; yet such as they are, they have been always available as the Apocryphal Gospels, and any claim to have newly discovered them would seem to be based upon ignorance or cupidity. Again, there is a spurious letter from Publius Lentulus to the Roman Senate, giving a description of the person of Jesus, that dates from about the twelfth century. These two "documents" are periculously brought forward as "fresh disclosures of history."—*N. & Times.*

FOR "THE FRIEND."

Weather report for Fifth Month, observed at Westtown, Chester County, Pa., by William F. Wickersham:

Mean Barometer,	29.981 on 22nd
Highest "	30.268 " 5th
Lowest "	29.591 "
Mean Temperature,	51.5 on 1st
Highest "	36 " 9th
Lowest "	30.5 " 9th
Greatest daily range,	11.5 " 11th & 27th.
Least "	5.0 inches.
Total rainfall,	5.90 inches.

Number of fair days,	13.
Number of cloudy days,	10.
Prevailing direction of wind	W. & S. W.

THE FRIEND.

SIXTH MONTH 21, 1890.

The *Churchman* complains that the members of the Episcopal Church manifest "a growing disregard of Lent," and do not practice to the same extent as formerly the abstinence from feasting and social gaiety, which their Church enjoins.

If this were the result of a growing conviction of the spirituality of the Christian religion, and of the importance of heeding the Apostle Paul's caution against the observance of "days and months and times and years," it would furnish

no just cause for regret. But far different should be our feelings, if we believe that it flows from a decline of vital religion, and an unshrinking to reform, even for a brief period, those indulgences to which the unregenerate heart is prone. In commenting on this subject, *The Presbyterian*, of Philadelphia, makes the following suggestive remarks:

"May we not, however, regard the definition which the *Churchman* laments as simply a symptom of a wide-spread disease in all Church life which threatens to work greater evils and, therefore, merit the attention of all thoughtful Christians. That form of spiritual decline which for want of a better word, we call 'worldliness,' infects, more or less, all communions. It spreads like a plague, silently but constantly. It taints all our best services, and tends continually to convert churches which ideally, at least, should be thronged by a worshipping company of Christ's followers, into 'negation-houses,' where worship must first of all be made oppressive and attractive, and win the attention of the children of this world by its outward form and fashion.

"We need no longer defend the Christian faith, as seen in the lives of its representatives, from the charge of austerity. The men of God are needed, but the attention of all thoughtful Christians to those men, whose marked illustrations of the Christian virtues of self-denial and cross-bearing have made the Church in our age glorious, these graces have been manifest in individuals—saints and daughters of the Lord Christ. Upon the great mass a breath, soft, but enervating, seems to be steadily blowing, a healthy testimony to his Christ and sacrifice for his dear name, are thought to be singular—rarely certainly held to be by many not 'good forms.' The intangible, but real and powerful thing called 'society,' touches the Church on every side, and its touch cannot be said to be a tonic. It does not cure a weak faith, or re-inforce and invigorate our Christian resolutions.

"The influence of anything new in saving all this. A quarter of a century ago, and more, Dr. James W. Alexander wrote with great demonstration of influence then at work. He said 'The door at which those influences enter which counteract parental instruction and example, I am persuaded is yielding to the work of the world, and the forces behind the counterpane, an atmosphere is formed which is not that of Christianity. More than ever do I feel that our families must stand by a kind but determined opposition to the fashions of the world, breasting the waves like the Edomites against loose. And I have found nothing yet which requires more decidedly above the par of the religious world around us.

"If this was true in his day it must be acknowledged to be more undeniably and sadly true in our own time. The incursions of alien influences and customs upon the sacred territory of the Church has since been earnestly resisted. The *American* editor's rebuke is saying that the disregard of Lent, furnishes an occasion for 'plain and faithful words' and for consistent and unimpeachable example. Ought not such 'words' and such 'examples'—example be the token of many other deflections by which the 'energy and purity of its disciples of God' are sadly weakened and defiled?"

Alas, is there not reason to fear that the leaven of worldliness is working in our own beloved Society, and gradually wakening its power to bear a living testimony to the self-denying religion of Christ?

Some may seek to excuse their self-indulgence by the plea, that the circumstances in which they are placed are so different from those that surrounded our early Friends, that the same strictness of life is no longer requisite. But the doctrine is immutably and everlastingly true, that there is no salvation except through the opening of the heart to the indwelling of Christ, and experiencing his Light there to lead out of sin and

into purity and righteousness. It is as necessary now, as it was in the days of Edward Burrough to feel the voice of the Lord in our hearts to burn up and beat down all that is contrary to God; to follow the motions of the Lord's pure Spirit, and deny all that stands in the way before us and the Lord.

SUMMARY OF EVENTS.

UNITED STATES.—In the U. S. Senate during the past week the Silver bill was discussed. Up to the 17th instant no vote had been taken upon the bill. On the 16th instant the Deficiency Appropriation bill for pensions and the census was passed.

Superintendent of the Census, Porter has been informed by Wiley, the Supervisor of the Fifth District of Pennsylvania, that his enumerators have notified him that Hungarians and Poles and many Italians in Lackawanna, Luzerne and Carbon counties have refused to give any census information, even to interpreters. Many of these men, he says, are designated by their employers by number, and many wearing his number on his person and answering to it. The Supervisor says that, if so instructed, he will direct his enumerators to take account of such employes by numbers, in this way securing nativity, age and occupation, which, in his opinion, would be better than no information at all.

In his reply Superintendent Porter informs the Supervisor that it is impossible that the Census Office should help to perpetuate such a state of affairs as reported when large numbers of laborers are treated more like beasts of burden than men, and known only by numbers.

Superintendent Porter gives him positive instructions to employ a sufficient number of enumerators and interpreters to thoroughly canvass these people and elicit from them the information called for by the schedule.

In the Conference of the Presbyterian Synod, in session in New York, on the 11th inst., the report of the Committee on Temperance, in which it was asserted that Vice President Morton derived a profit from the sale of liquors in the property which he owns or controls, was read. "It derives a profit indirectly from the sale of liquors."

In an "original package" injunction case in Mason City, Iowa, Judge Sherman has decided that beer can be sold by the bottle, though shipped in cases. He also ruled that the right to drink that liquor on the premises where sold.

Charles Silverman, a dealer in "original packages," in Leechburg, Pa., was tried in Kittanning on a charge of violating State and County liquor laws. He was acquitted on charges of selling without a license and to minors, but was found guilty of selling to persons of known intemperate habits. Silverman is an agent for an Ohio brewing company. This decision, if sustained, will destroy all license, high and low; all local option and prohibition, in every part of the United States.

The exploring expedition sent to Yucatan and Mexico by the U. S. Geol. Surv., under the command of Professor Hailprin, has returned, having made, it is believed, many valuable additions to the various departments of natural history, and important discoveries concerning the formation of those regions.

The exploring expedition sent to the West Indies by the U. S. Geol. Surv., under the command of Prof. Hailprin, has returned, having made, it is believed, many valuable additions to the various departments of natural history, and important discoveries concerning the formation of those regions.

An explosion of fire damp occurred in the Hill Farm Mine at Dunbar, Penna., on the morning of the 16th instant. There were fifty-two men in the mine at the time, and thirty-two are missing. The explosion was caused by the naked light of a miner who went to warn his comrades of their danger from a flow of water in the mine.

The deaths in this city last week numbered 482, 17 more than during the previous week, and 87 more than during the corresponding period last year. Of the foregoing 225 were males and 257 females. 46 died of cholera infantum; 38 of consumption; 35 of heart diseases; 33 of convulsions; 24 of pneumonia; 24 of inflammation of the stomach and bowels; 24 of marasmus; 22 of old age; 19 of inflammation of the brain; 12 of Bright's disease; 11 of typhoid fever; 11 of debility; 11 of paralysis, and 103 of diphtheria.

Markets.—U. S. 4½, 103½; 4's, reg, 121; coupon, 122; currency 6's, 113 a 123.

COTTON was quiet but steady on a basis of 12½ cts. per pound for middling uplands.

FEED.—Winter bran, choice, \$14.50; do, fair to prime, \$14.00 a \$14.25; spring bran, \$13.50 a \$14.

FLOUR.—Western and Pennsylvania super, \$22.5 a \$24.00; do, extra, \$22.75 a \$24.15; No. 2 winter family, \$20.25 a \$23.00; Pennsylvania family, roller process, \$27.5 a \$28.25; Western winter, clear, \$14.00 a \$14.25; do, do., straight, \$4.35 a \$4.65; winter patent, \$4.85 a \$5.25; Minnesota, clear, \$3.50 a \$4.00; do., straight, \$4.25 a \$4.75; do., patent, \$4.85 a \$5.25; Eye flour was unchanged at \$3.25 per barrel.

GRAIN.—White wheat, 34½ cts. No. 2 mixed corn, 41½ a 41 cts.

No. 2 white oats, 34½ a 35 cts.
BEEF CATTLE.—Extra, 5 a 5½ cts.; good, 4¼ a 4 cts.; medium, 4 a 4½ cts.; fair, 4¼ a 4 cts.; common, 4 a 4½ cts.; culls, 3½ a 3 cts.; fat cows, 2½ a 3 cts. **SWINE.**—With heavier receipts and only a fair demand prices declined 1¢ on the upper and 1¢ on the lower grades. Extra, 5¼ a 5 cts.; good, 4½ a 5 cts.; medium, 4¼ a 4 cts.; common, 3½ a 4 cts.; culls, 2½ a 3 cts.; lambs, 5 a 8 cts.

Wool.—Washed, 1½ a 1½¢, and with larger receipts, declined 1¢ per pound. Good light Western, 5¼ a 5½ cts.; common heavy, 5¼ a 5½ cts.

FOREIGN.—In the House of Commons, in the 10th inst., W. H. Smith, the Government leader, replying to a question by Gladstone, said it was the present intention of the Government to maintain the law with the licensing bill. An amendment proposed by James A. Pictou against purchasing the licenses was rejected by a vote of 254 to 190.

The debate on the licensing bill was continued in the House of Commons on the 13th inst. There was a motion for the adoption of a proposal to apply the compensation fund to education.

Gladstone said it had been asserted confidently and loudly that the bill did not sanction the principle of compensation. It was mainly on that ground that the Government had commended it to the House, while conceding that it had no right to insist on its approval, that the bill did establish the principle of compensation. He agreed with the latter. The opponents of the measure considered it a distinctly retrograde step in social reform. They looked upon it as an poison for the people, and demanded that the funds be applied toward education.

The vast investment by great proprietary firms in public houses was a monstrous evil, and entirely the growth of recent times. These firms had invested in public houses under some expectation of a renewal of public law, which would have maintained their rights declared, rested on no legal basis, as the license might under the present law be annulled without compensation. The bill would establish a principle that licenses might be bought up by money from the public taxes at prices virtually fixed by license holders. Was not the law applied to the owners of the houses?

After further debate, Acland's proposal was rejected under cloture—275 to 243.

John Dillon, William O'Brien and John Redmond have been appointed delegates to make a tour of continental Europe, autumn, in the interest of the Irish Nationalist movement.

Thirteen thousand dock laborers at Swansea have struck for higher wages. The shipping business of the place, with the exception of the coal trade, is at a standstill in consequence of the strike.

The *St. James Gazette*, in an article on the negotiations now being carried on by England and Germany relative to territory in Africa, says, it is probable that a settlement will be reached, by the terms of which the Germans will evacuate Witu and abandon their claims to the territory behind Witu. The *Gazette* further says: "The German claims in the district of Victoria Nyanza, one degree south of the equator, to the eastern boundary of the Congo State. All the disputed territory north of this line will be British, and all south of it German. The English will be entitled to construct a road from the Victoria Nyanza to Lake Tanganyika. The English will also be entitled to the territory of the Stevenson road from Lake Tanganyika to Lake Nyassa, and of the region round Lake Bangweulu and the Urungu territory. The action of the British and the treaties he has made with the native chiefs, the *Gazette* says, will be expressly disavowed at Berlin.

Henry M. Stanley has been tendered and has accepted the Governor-Generalship of the Congo Free State. He will not enter upon his duties until the beginning of next year, but he has been called upon to assume them earlier by King Leopold.

By his marriage, Stanley will proceed to the

United States, where he will remain until summoned to enter upon office.

Much alarm is occasioned by the continued spread of cholera at Puebla du Rugat, in Spain. Two-thirds of the inhabitants have fled from the town. The first cases appeared a month ago, the victims all being residents of a street which had been opened up for paving. Seven deaths have occurred at Mitechicola, a village near Puebla du Rugat, and seven fresh cases are reported there. The authorities are making strenuous efforts to stamp out the disease; but so far they have been unsuccessful, and new cases are reported daily. The doctors at Puebla du Rugat are greatly overworked, and the authorities have telegraphed to Valencia asking that physicians be sent from that city to aid them. The supply of drugs is running short, and the town officials have also telegraphed for a fresh supply from Valencia. The total number of cases thus far reported is 91. One of the persons who fled from the town for safety has died from the disease at Albaida. Dr. Candela, who is an expert, declares that the disease at Puebla du Rugat is true Asiatic cholera.

A dispatch from St. Petersburg states that reports have been received there of disastrous conflagrations and great loss of life and property in the mining districts of the Ural Mountains. The iron works at Ufalesk and Newjanck, a thousand dwelling houses, four school houses, three places of worship, the hospitals and magazines at Newjanck, and the barracks of 1000 persons were burned to death, and 18,000 were made homeless by the destruction of the towns.

St. Petersburg, Sixth Mo. 13th.—The Czarewicz will start on a tour of the world on Eighth Mo. 1st. He will return by way of the United States.

NOTICES.

WESTWON BOARDING SCHOOL.—The summer term of 1890 will end Seventh Mo. 1st. The fall and winter term of 1890-91 will begin Ninth Mo. 24, 1890.

Parents and others intending to send pupils to the school, will please make immediate application to

J. G. WILLIAMS, *Sup't.*

Westwton, Pa.

BOARDING, with good rooms, for a few persons on reasonable terms. Address, John S. Wright, M. D., Christiansa, Lancaster Co., Pa.

A teacher of experience, acquainted with "Quincy Methods," and modes of instruction now generally approved, desires a position in Primary Department of a Friends' School. She could enter upon duties at any time in this month.

Address E. B. M., Germantown, Philadelphia.

Two comfortable houses to rent at Lansdown, near meeting and near railroad station. Apply to

ANNA W. WILSON,

Lansdown, Delaware Co., Pa.

Board for two, in a Friend's family—high situation, shade and pleasant room. Ten minutes walk to the train.

Address S. G., No. 40, Port Deposit, Md.

TEACHERS WANTED.—A second, and an assistant teacher at Moorestown Academy, Moorestown, N. J. Commencing with the Fall term of the present year.

Apply to

Samuel L. Allen, 1107 Market St., Phila., or Elizabeth H. Richie, Moorestown, N. J.

Placed in two-story rooms, with good table-board, can be had at moderate rates in a Friend's family.

Address, N Box 164, Media, Pa.

EDITH SHARPLESS.

A few boarders can be accommodated in a Friend's family at No. 480 North Fifth Street, Phila.

Fifth Mo. 1890.

MARRIED, Sixth Month 4th, 1890, at Friends' Meeting, Haverford, Pa., RICHARD S. DEWEES, son of Aaron P. and Eunice Dewees, to MARY, daughter of the late Haydock and Sidney Garrigues.

DIED, at his residence, with his son-in-law, Elwood Bekson, in his 82d year, Fourth Month 9th, 1890, LEVI H. ATWATER, an elderly and venerable member of the Garden Monthly Meeting of Friends, aged 72 years. The active part of his business life was spent in Niagara County, N. Y. He was firmly attached to the ancient principles of the Society and a diligent student of meetings, adorning the truth by a quiet walk and consistent example.

Incidents and Reflections.—No. 229.

TESTIMONY-BEARING.

It is said of the late Sir Robert Peel, that he was at a dinner party in a fashionable part of London, where the conversation of the gentlemen present was dishonoring to Christ our Lord. He took no part in it, but presently asked that the bell might be rung. On the appearance of the servant he ordered his carriage, and with polished courtesy apologized to his host for his enforced departure, "for he was still a Christian."

An interesting incident is told of W. H. Milburn, who for several years acted as Chaplain of the House of Representatives at Washington.

"In the fall of 1845, he made his appearance in the Northern and Eastern States as an advocate for the cause of Education in the West, and was everywhere received with enthusiasm, not only on account of his intellectual qualities, but also for his amiable disposition and eminent social virtues. On his journey North, W. Milburn found himself on board of an Ohio River steamer, on which were three hundred passengers. From the numbers of days the passengers had been together, he had become pretty well informed of their character, and he found most prominent among the gentlemen were a number of members of Congress on their way to Washington. These gentlemen had attracted his attention on account of their exceptional habits. On the arrival of Sabbath morning, it was rumored through the boat that a minister was on board, and W. Milburn, who had up to this time attracted no attention, was hunted up and called upon to "give a discourse." He promptly consented, and in due time commenced a service. The members of Congress were among the congregation, and by common consent had possession of the chairs nearest to the preacher. W. Milburn gave an address suitable to the occasion, full of eloquence and pathos, and was listened to throughout with the most intense interest. At the conclusion he stopped short, and turning his face, now beaming with fervent zeal, towards the "honorable gentlemen," he said: "Among the passengers on this steamer are a number of members of Congress; from their position they should be exemplars of good morals and dignified conduct, but from what I have heard of them, they

are not so. The Union of these States, if dependent on such guardians, would be unsafe, and all the high hopes I have of the future of my country would be dashed to the ground. These gentlemen, for days past, have made the air heavy with profane conversation, have been constant patrons of the bar, and encouragers of intemperance; nay, more, the night, which should be devoted to rest, has been dedicated to the horrid vices of gambling, profanity, and drunkenness. And," continued W. Milburn, with the solemnity of a man who spoke as if by inspiration, "there is but one chance of salvation for these great sinners in high places, and that is, to humbly repent of their sins, call on the Saviour for forgiveness, and reform their lives."

"As might be supposed, language so bold from a delicate stripling, scarcely twenty-two years of age, had a startling effect. The audience separated, and the preacher returned to his stateroom to think upon what he had said. Conscious, after due reflection, that he had only done his duty, he determined at all hazards to maintain his position, even at the expense of being rudely assailed. While thus cogitating, a rap was heard at his stateroom door, a gentleman entered and stated that he came with a message from the members of Congress—that they had listened to his remarks, and in consideration of his boldness and his eloquence, they desired him to accept a purse of money which they had made up among themselves, and also their best wishes for his success and happiness through life.

"But this chivalrous feeling carried these gentlemen to more positive acts of kindness. Becoming acquainted with him, when they separated from him they offered the unexpected service of making him Chaplain to Congress—a promise which they not only fulfilled, but through long years that have passed away since that event, have cherished for the 'blind preacher' the warmest personal regard, and stand ever ready to support him by word and deed."

In the Life of the late William Allen, of London, it is related that owing to the strong testimony which he felt against the system of slavery, he early in life commenced refraining from the use of sugar, the product of slave-labor; and he continued this abstinence more than 40 years, until the British Government set free the slaves in the West India Islands under their control.

When G. W. Alexander visited Holland in 1844, to promote the abolition of slavery by the Dutch Government, P. Elout, a judge, and a person of high consideration, at the Hague, in conversation on the subject of slavery, said, "It is to William Allen I attribute all I have felt and done for the cause of the slave. When he was at the Hague many years since, I was invited, together with a number of serious individuals, to take tea with him. I was then quite a youth. He took no sugar with his tea, which surprised me. I was more surprised by the reason he gave for this. He told the company that he had long abstained from the use of it because he

could not, with peace of mind, partake of that as a gratification, for which thousands of innocent persons were compelled to labor in cruel and helpless bondage. I was struck with this example of self-denial by so great a man as I thought him to be in a thing so seemingly small in itself, and I was led to consider how great must be the evil of a system which could make so deep and so religious an impression upon his feelings. From that period my own sentiments have been engaged in the cause of the negro, and my efforts to procure their emancipation in the colonies of Holland."

On the necessity of bearing a faithful testimony, John Griffith remarks in his journal, "that I have observed a prevailing disposition in some of considerable eminence in the Society, and in a great many others, to cry up for peace and charity, and the maintenance of unity, and not to press any thing very closely, lest the peace of the Society should thereby be endangered; although, perhaps, the things urged cannot well be objected to up-on any other principle than groundless fears and a faint heart not yet quite upright to God, nor wholly redeemed from the praise of men; as there is an unwillingness to displease them, though in maintaining the Lord's cause: 'for if I yet pleased men,' said Paul, 'I should not be the servant of Christ.' What makes me take notice of this is, that I have seen a great snare in it, wrong things being suffered to remain and prevail under it, and the fire of primitive zeal against undue liberty much quenched."

William Allen, who at the time was travelling in Russia as a companion to Stephen Grellet, mentions in his diary being at Tula in 1819. He says:—

"We went out to deliver our letters, and found the benefit of having been furnished, by Prince Alexander Galitzin, with introductions to the governor of the province, as we had a specimen of this morning of what we might expect if we had not been thus provided. Having learnt that the governor was not in the city, we went to the house of his deputy, but were informed that he was at the tribunal; thither we went, and being directed up stairs, entered a very long room where a great number of clerks were writing. There was a broad passage in the middle, and, on entering, we found several persons standing who could speak French. Coming in with our hats on occasioned a general bustle, and some of the clerks began to hiss. We very civilly inquired of a person, dressed like a gentleman, with an order at his button-hole, if the Governor was there; but he immediately asked why we did not pull off our hats. We gave him our reasons, and assured him that it was not from want of respect, but a matter of religious principle with us; he said we ought to respect the place, for there was the Emperor's picture. Stephen told him that the Emperor had permitted us to see him with our hats on; but one of them immediately said, he did not believe it; to this Stephen made no reply. The

place at the farther end of the room, where the Governor and others were sitting, was parted off with glass windows. We had by this time made our way to the door, where there was rather an elderly man who spoke French, and he was the only person who showed us anything like kindness. When Stephen told him that we were of the Society of Friends, called Quakers, this gentleman said that they were persons who, from principle, did not pull off their hats (from courtesy), and smilingly said, 'You are from Pennsylvania.' We at length prevailed upon them to take the letter into the inner room."

The ministers of the Gospel who are constrained to obey the command formerly given to Jonah—"preach the preaching that I bid thee"—often find themselves using great plainness of speech in their testimony against wrong things. Stephen Grellet mentions that in a religious opportunity at Moscow, in Russia, with some high in worldly station—"a portion of my religious communication to them was to reason with them of righteousness, temperance and judgment to come: I laid closely before them the importance of time,—the shortness of it, and the necessity rightly to improve it whilst we have it, calling upon them deeply to consider how trivial and how vain are the enjoyments, compared with the eternal woes that will attend us, if we have neglected that great salvation that comes by our Lord Jesus Christ. As I was speaking, the prince, inclining towards my dear friend, William Allen, whispered, "It is very seldom indeed that such plain and solid truths are proclaimed to us."

J. W.

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 370.)

1795. Ninth Mo. 28th.—This morning I visited a settlement of the people called Shakers, who seemed to receive me kindly, yet were much reserved. I informed them I had felt my mind drawn to visit them in love, and if they were free to sit down with us, if anything arose in any of our minds, we might speak freely; adding also, that I had often heard of them, but did not see any of their sort before now.—One of them then said, he expected some things reported of them might be true, and some false. He then leaving us, I suppose he went to consult with his brethren; but, soon returning, he asked if I was born in this country, and of what profession I was?—I told him I was one of the people called Quakers; and showed my certificate. After he read it, he asked if he might show it to some in the next room; which I allowed him to do. He then went in again, where, by that time, I suppose many were collected in council. I heard them read over my certificate, which after some time was brought back, and I was told they found I was an approved minister of that Society, and was on a long journey. I informed him I was on my return; and if he had freedom, I should be willing to know something of their principles. He then informed me they "believed in Jesus Christ, and in his second appearance, and endeavored to live up to the Scriptures, and to follow Christ; being members of his Church through the baptism of the Holy Ghost, and coming under the cross." This, he said, had crucified every fleshly lust, and given them power to resist the tempter. That also, they held it was not right to marry; but that the world was wrong, and laid in sin, etc. He seemed confident in supposing their tenets to be

right in respect to marriage, and that they take up the cross to lustful desires, and go beyond others in self-mortification, etc.

With respect to their worship, he informed me, they came together every evening, took a solid pause, and if the elders feel anything to arise with weight, they were permitted to speak. They also sing the Songs of Solomon, use dancing, etc. I informed him of our belief concerning the benefit of silence, and of spiritual worship; and advised him to beware of being overconfident in supposing they had witnessed greater attainments than others. He told me they believed George Fox to have been a good man, until he mixed with the world; that then he fell away, and there had been a falling away among us till this time; and we had lost our gift of discerning, and had in our Church many rotten or defected members. But they (the Shakers), he said, had that gift, and had sought out some of the most deep and hidden sins, etc. I let him know I feared they were mistaken, not being so whole as they thought themselves to be.

This man appeared to be sober and well behaved. He said they all lived in love, and in one family, and portioned out each one's labor, according to their ability. They have many mechanics, and some are appearing to inspect the work before it is sold—appearing to maintain credit by honest dealing, etc. They seem to be much united; do not act without consulting together, and move as in a body. This man told me farther, they didn't receive any as members if they had wronged any person, until they had returned four-fold; and when any one joined them, his property is put into public stock; and if he should leave them, he is to take out what he first put in, and no more. They appear to be a decent, industrious people; and on the whole, I thought better of them than before I went to see them.

I understood the women among these people were much by themselves. They spin, knit, sew, weave, and manage the household affairs.

29th.—Moving forward to East Husack, I was at a very large meeting there. This was almost held in silence, yet the people sat quiet and solid. I told them I much commended that, and wished them not to be discouraged; also that, as God was a Spirit, we believed He might be worshipped in Spirit and in Truth, even where no sound or vocal voice is to be heard.

It being a season of mortality here, I visited several sick persons and families, of which our valued Friend, Robert Nisbit's, was one, who deceased soon after. Many others also were called off here about that time.

Tenth Mo. 1st.—The Monthly Meeting at East Husack being held now, I attended it; being a large gathering and a favored season in the fore part. I sat with women Friends while they answered the queries; where a deep search was made into the state of things, to my comfort. I then sat with the men in the like exercise. But life seemed to be wanting; I thought there was a disposition to answer evasively; and unless they were more weighty in the business, the queries might become a snare to them.

2d.—At one place I was grieved at seeing so large preparations for making cider. Doth it not tend to promote excess in drinking? The next day had a small, dull meeting at a Friend's house; and to me, mournful. Then went on our way towards Tyringham.

3rd.—We visited another settlement of those called Shakers. After a solid conference, we were permitted to see the women, who appeared plain

and sober. One of them, an ancient woman, spake in a free and friendly way, asking several questions. She seemed well satisfied with my answers, and invited me to come again. Their head-dress was much in the uniform; and although I had some satisfaction in the visit, I feared they were too much unacquainted with the cross of Christ; yet they speak of living under the cross.

4th.—Had a large and satisfactory meeting at Tyringham; after which, I was in conference with a committee from East Husack Monthly Meeting, in respect to holding a meeting at that place, as the number is small, and the state of things but low. The next day travelled on a rough road through a mountainous country to Charles Richard's house, at Gosben; and on the day following (6th) a large and solemn meeting was held there.

It may be remarked, the people in those parts are long in gathering to assemblies for worship. C. Richards seems to be a singular man in almost all his conduct; and yet, in the main, I esteemed him honest-hearted.

The day following, in the afternoon, we had a dull, heavy meeting at a place called the Branch, and on the 8th, had one at New Milford, which was low in the fore part—until some gay people not of our persuasion came in; unto whom, I believe, the Lord had regard—for ability was received to extend Gospel labor for their benefit; as a lukewarm, drowsy spirit was to be felt before they came in. This was the Preparative Meeting day at New Milford; but matters appeared to be in a low state. At the close of the first meeting, I felt a desire to have a meeting with the inhabitants of New Milford next day; which was united with on being mentioned, at the time and place proposed, and those gay people above-mentioned proposed to spread the notice.

9th.—Agreeable to which proposal, a pretty large number assembled of those not of our Society, in a private house near the town, which was a favored season, not soon to be forgotten.

10th.—Going forward, I had a pretty large and satisfactory meeting at Friends' Meeting-house in the Valley, so called; and next day at Peach Pond, was at a small meeting, where poverty was felt; yet I had some labor.

12th.—Next, I attended the Monthly Meeting at Oblong, which was an exercising time. I feared barrenness prevailed; the crowding cars of the world and the deceitfulness of riches choking the good seed. I had some close labor, which appeared to be well taken. The day following, I attended the Select Meeting at the same place; which was dull and exercising.

14th.—From hence I went to Nine Partners, to their Monthly Meeting; which was very large and somewhat lively, I thought. I perceived some ability to labor satisfactorily. Next day I met with a committee on the subject of a boarding school at the same place. I thought I was led to see more clearly than ever before into the nature or right manner of educating children, which I mentioned, and left with them.

Next, I attended the Creek Monthly Meeting; which I thought was an exercising, poor time. The day following I had a large meeting, which was at my desire appointed for the young people, at the Creek Meeting-house. This was a season of Divine favor. The youth felt more pleasant to me separated from others. I fear the unlawful love of lawful things is a great snare, in which the enemy hath caught many, who have appeared to be well-disposed members of our Society, up and down in this land.

18th.—Had a meeting at Little Nine Partners, so large that the house could not contain all the people. It was exercising; yet, blessed be the God of all power, He gave ability to labor in his cause, to the tending of some hearts. Returning to Nine Partners, I was at a meeting appointed for the youth, at my desire; which was a solid, favored time. Some of these appeared to be of the naughty, rebellious ones. Oh! may the opportunity be as "bread cast upon the waters," to be found hereafter!

20th.—I had also at the same place a large and solid meeting with the parents and heads of families of the Monthly Meeting. I had to revive among them the sense of our primitive Friends respecting fine houses, rich furniture, a worldly spirit, etc.; also my sentiments concerning the free use of tobacco, and other things, heretofore mentioned, which (as it seems to me), have stolen in upon us as a thief in the night, and which in a measure occasion dimness and weakness with respect to a faithful support of the pure testimony of Truth.

21st.—And the next day at the Creek, or Stone-House, a meeting of the same kind was held, with heads of families, large, and owned by the Truth, as many Friends expressed; for many hearts were tendered, and many tears dropped. Here also the example and care of our predecessors for punctuality in dealings, true moderation in living, etc., was brought into view; and a weighty care urged in the education of children; also the ruinous effects of a neglect of that care was mentioned. The day following, I had a large and solid meeting at Stephen Dean's house; and one at Israel Titus's house in the afternoon; which was likewise satisfactory.

23rd.—At Swago also I had a pretty large meeting, which was thought to be favored. On my way the next day to Appoquone, I saw a shameful sight—a bull tied up and dogs allowed to worry him in that condition: those looking on who (no doubt) professed Christianity.

(To be continued.)

Stanley's Testimony.

You, who throughout your long and varied life have steadfastly believed in the Christian's God, and before me have professed your devout thankfulness for many mercies vouchsafed to you, will better understand than many others the feelings which animate me when I find myself back in civilization, uninjured in life or health, after passing through so many stormy and distressful periods. Constrained at the darkest hour to humbly confess that without God's help I was helpless, I vowed a vow in the forest solitudes that I would confess his aid before me. Silence, as of death, was round about me; it was midnight; I was weakened by illness, prostrated by fatigue, and wan with anxiety for my white and black companions, whose fate was a mystery. In this physical and mental distress, I besought God to give me back my people. Nine hours later, we were exulting with a rapturous joy. In the full view of all was the crimson flag with the crescent, and beneath its waving folds was the long-lost rear column. * * *

Again: Between the confluence of the Ithru and the Dai Rivers, in December, 1888, one hundred and fifty of the best and strongest of our men had been despatched to forage for food. They had been absent for many days more than they ought to have been, and in the meantime 130 men, besides boys and women, were starving. They were supported each day with a cup of warm thin broth, made of buttermilk and water,

to keep death away as long as possible. When the provisions were so reduced that there were only sufficient for thirteen men for ten days, even of the thin broth, with four tiny biscuits each per day, it became necessary for me to hunt up the missing men. They might, being without a leader, have been reckless, and been besieged by an overwhelming force of vicious dwarfs.

My following consisted of 66 men, a few women and children, who, more active than the others, had assisted the thin fluid with the berries of the phrynum and ammonum, and such fungi as could be discovered in damp places, and therefore were possessed of some little strength, though the poor fellows were terribly emaciated; 51 men, besides boys and women, were so prostrated with debility and disease, that they would be hopelessly gone if within a few hours food did not arrive. My white comrades and thirteen men were assured of sufficient for ten days to protract the struggle against painful death. We, who were bound for the search, possessed nothing; we could feed on berries until we should arrive at a plantation. As we travelled that afternoon, we passed several dead bodies in various stages of decay, and the sight of doomed, dying, and dead produced on my nerves such a feeling of weakness that I was well-nigh overcome.

Every soul in that camp was paralyzed with sadness and suffering. Despair had made them all dumb. Not a sound was heard to disturb the deathly brooding. It was a mercy to me that I heard no murmur of reproach, no sign of rebuke. I felt the horror of the silence of the forest, and thought intensely. Sleep was impossible. My thoughts dwelt on the recurring disobediences, which caused so much misery and anxiety. Stiff-necked, rebellions, incorrigible human nature, ever showing its animalism and brutishness! Let the wretches be forever accursed! Their utter thoughtlessness and oblivious natures, and continual breach of promises kill more men and cause more anxiety than the poison of the dart, or herbs and points of the arrows. If I met them, I will — but, before the resolve was uttered, flashed to my memory the dead men on the road, the doomed in the camp, and the starving with me, and the thought that those 150 men were lost in the remorseless woods beyond recovery, or surrounded by savages without hope of escape. Then do you wonder that the natural hardness of the heart was softened, and that I again consigned my care to Him who could alone assist us?

The next morning, within half an hour of the start, we met the foragers, safe, sound, robust, loaded, bearing four tons of plantains. You can imagine what cries of joy these wild children of nature uttered; you can imagine how they flung themselves upon the fruit, and kindled the fires to roast and boil and bake, and how, after they were all filled, we strode back to the camp, to rejoice those unfortunates with Mr. Bonny.

As I mentally review the many grim episodes, and reflect on the marvellously narrow escapes from utter destruction to which we have been subjected during our various journeys to and fro through that immense and gloomy extent of primeval woods, I feel utterly unable to attribute our salvation to any other cause than to a gracious Providence, who, for some purpose of his own, preserved us. All the armies and armaments of Europe could not have lent us any aid in the dire extremity in which we found ourselves in that camp between the Dai and Ithru.

An army of explorers could not have traced our course to the scene of the last struggle, had we fallen; for deep, deep as utter oblivion had we been surely buried under the humus of the trackless wilds.

It is in this humble and grateful spirit that I commence this record of the progress of the expedition, from its inception by you to the date when, at our feet, the Indian Ocean burst into view, pure and blue as heaven, when we might justly exclaim, "It is ended!"—Henry M. Stanley, in *Scribner's Monthly*.

FROM "THE FRIEND"

Love and Glory of the World and of God.

We are Divinely commanded to love not the world, nor the things of the world; with the assurance that if any man love the world, the love of the Father is not in him; for we cannot love and serve God and manum at the same time. For "the friend-ship of the world is enmity with God; whosoever therefore will be a friend of the world, is the enemy of God." And here appears to be one of the greatest snares of the enemy; and has been ever since our Saviour was personally among men. That is, in trying to reconcile two discordant elements—the love of the Father and the love of the world.

It appears that the humanity of Jesus was subject to temptations like as we are. So the devil was permitted to take Him up into an exceeding high mountain, and to show Him all the kingdoms of the world, and the glory of them, with a delusive promise that all these things will I give thee if thou wilt fall down and worship me. But the answer was, get thee hence, Satan; for it is written thou shalt worship the Lord thy God, and Him only shalt thou serve. And may not some of us testify, that when we have resisted the devil he has fled from us, and that angels will come and minister to us as a sweet reward for obedience? But is there not something of the same satanical nature still about some of us, inclining to exalt us above the simplicity of Truth? even as high up in the mountains of Gilboa, where even the Lord's anointed are slain, but where there is neither dew nor rain nor fields of offerings.

It is written that though the number of the children of Israel be as the sand of the sea, yet a remnant only shall be saved. How is it with us as a people? Did we not build upon the same foundation that the Israelitish church was built upon? and that the prophets and apostles built upon? Jesus Christ himself being the chief corner-stone. Did not God's grace teach us to deny ungodliness and worldly lusts, and that we should turn our backs upon Satan when he held up the glory of the world before us? saying, get thee hence, for it is written thou shalt worship the Lord thy God, and Him only shalt thou serve. And do not the pride of life belong to the world, and to the glory of the world that lies in wickedness? All unrighteousness is sin, and the grace of God will teach us to deny ourselves of it, and that we should live soberly, righteously and godly in this present world. For the glory and love of the world are in opposition to the glory and love of God. So the glory of the world and the glory of God—have no fellowship one with the other, and hence cannot harmoniously unite in worship to the same living God, as one from Christ and the other from antichrist. For what fellowship has light with darkness? So discord and divisions abound, some saying, I am of Paul, and others, I am of Apollus. But is Christ divided? Doth a fountain send forth

at the same place sweet water and bitter? Can a fig tree bear olive berries? either a vine, figs? But we have the glory and love of God, and the glory and love of the world, very much in the mixture. Yet, blessed be God, we have in adorable mercy, the chance to have the lost favors restored to primitive purity, by accepting and co-operating in faith with Him who came to destroy the works of the devil, and to bring in an everlasting righteousness into every individual heart. But the government must be upon his shoulders before the lost harmony will be restored, and then our peace would flow as a river, and our righteousness as the waves of the sea.

When the enemy comes in like a flood, we have the promise that the Spirit of the Lord shall raise up a standard against him. And surely the enemy has, of late, come in upon us as a people, and also upon other religious denominations as far as I can learn; and where the Spirit of the Lord comes in the strongest, there the opposing power comes in the strongest also, to deceive with his counteracting influence, if it were possible, the very elect. But the foundation of God stands sure, having this seal the Lord knoweth them that are his; and we might remember his creative power, that He is able, even of those who appear as the hard stones around us, to raise us children unto Abraham. And I believe that out of every nation, kindred, tongue and people, they that fear God and work righteousness are accepted of Him. For vital, heart-changing Christianity such as every hungering and thirsting soul is seeking after, is the same wherever we find it.

"Though sects divide and subdivide again,
Like parting rivers seeking still the main,
The nice distinction lies but in the name,
For virtue, grace and goodness are the same!"

D. H.

DUBLIN, IND., Fifth Mo. 29th, 1890.

FOR "THE FRIEND."

The answers to the Annual Queries forwarded by Philadelphia Monthly Meeting, Northern District, to the Quarterly Meeting, under date of Seventh Mo. 28th, 1789, include the following testimonial to the character of Sarah Williams.

G. V.

"Also our minister, our beloved Friend, Sarah Williams (late Dickinson), wife of Charles Williams, who departed this life on the 18th day of the present month, in the 24th year of her age; a minister near seven years. Of whom we are free to add—she was a young woman of an innocent deportment, her ministry edifying and acceptable, and we believe carefully concerned to wait for the renewal of the holy anointing; and when exercised in public, solemn supplication appeared to be favored with near access to the throne of mercy. And although it has pleased Infinite Wisdom thus early to remove her from amongst us, our persuasion is, and hope is, that she died in peace with God and his people; and we desire that the remembrance of her early dedication to the Lord's service, her short continuance and sudden removal from time, may animate the youth and others amongst us, to all diligence in attention to their several callings in Christ Jesus our Lord, bearing in mind his own solemn expression, 'I must work the works of Him that sent me, while it is day; the night cometh when no man can work.'"

Richard Turner, a pious man who died in 1680, joyfully perceived the near approach of death, saying, "Now I have but a few steps to my father's house."

SIGNING THE FARM AWAY.

SELECTED.

Fine old farm for a hundred years
Kept in the family name;
Corn-fields rich in golden ears
Oft as the harvest came;
Crowded barn and crowded bin
And still the loads kept coming in—
Rolling in for a hundred years;
And the fourth in the family line appears.

Orchards covered the slopes of the hill;
Cider—forty barrels, they say,
Sure in season to come from the mill,
To be tasted round Thanksgiving day!
And they drank as they worked and ate,
Winter and Summer, early and late,
Counting it as a great mishap
To be found without a "barrel on tap."

But while the seasons crept along,
And passions into habits grew,
Their appetites became as strong
As ever a drunkard knew;
And they labored less and they squandered more,
Chiefly for rum at the village store,
Till called by the sheriff, one bitter day,
To sign the homestead farm away.

The father shattered and scented with rum;
The mother sick and pale and thin,
Under the weight of her sorrows dumb,
In debt for the bed she was lying in;
Oh! I saw the wrecked household around her stand,
And the justice lifted his trembling hand,
Helping her as in her bed she lay,
To sign the homestead farm away.

Ah, how she wept, and the flood of tears
Swart down her temples bare!
And the father, already bowed with years,
Bowed lower with despair,
Drink! Drink! It had ripened into woe
For them and all they loved below,
And forced them, poor and old and gray,
To sign the homestead farm away.

Oh, many scenes have I met in my life,
And many a call to pray;
But the saddest of all was the drunkard's wife
Signing the farm away
Home, once richest in all the town,
Home, in that fatal cup poured down,
Worse than fire or flood's dismay!
Drunkards signing the farm away!

—Congregationalist.

PRAYER ITS OWN ANSWER.

SELECTED.

(A translation, in "Eccloties," by James Freeman Clarke,

from *l'Allah-el-beh,*.)

"Allah, Allah!" cried the sick man, racked with pain
The long night through;
Till with prayer his heart was tender, till his lips like
honey grew.

But at morning came the Tempter, said, "Call louder,
child of pain!
See if Allah ever hear, or answer 'Here am I' again."
Like a stab, the cruel cavil through his brain
pulses went;
To his heart an icy coldness, to his brain a darkness,
sent.

Then before him stands Elias; says, "My child! why
thou art may?"
Dost repent thy former fervor? Is thy soul of prayer
afraid?"

"Ah!" he cried, "I've called so often; never heard
the 'Here am I'!
And I thought, God will not pity, will not turn on me
his eye."

Then the grave Elias answered, "God said, 'Rise,
Elias, go,—
Speak to him, the sorely tempted; lift him from his
gulf of woe."

"Tell him that his very longing is itself an answer-
ing cry;
That his prayer, 'Come, gracious Allah,' is my answer,
'Here am I'!"

"Every inmost aspiration is God's angel undefiled;
And in every 'O my Father' slumbers deep a 'Here,
my child!'"

MEMORY.

SELECTED.

O memory! The golden chain
That binds us to the past,
And leads us back to youth once more,
When shadows gather fast—
That brings again those balmy days,
With cloudless blue o'erhead,
When all our pathway seemed to be
With fragrant flowers spread.

Far back to those glad, sunny hours
How beautifully fair
The gorgeous castles that we built—
Those castles in the air—
Nor ever dreamed a storm should come
Or ruthless tempest rise
To crush them into nothingness
Before our wondering eyes!

SELECTED.

"On this visit to England I have felt some instructions sealed on my mind, which I am concerned to leave in writing for the use of such as are called to the station of a minister of Christ.

Christ being the Prince of Peace, and we being no more than ministers, it is necessary for us not only to feel a concern in our first going forth, but to experience the renewing thereof in the appointment of meetings. I felt a concern in America to prepare for this voyage, and being through the mercy of God brought safe hither, my heart was like a vessel that wanted vent. For several weeks after my arrival, when my mouth was opened in meetings, it was like the raising of a gate in a watercourse when a weight of water lay upon it. In these labors there was a fresh visitation to many, especially to the youth; but sometimes I felt poor and empty, and yet there appeared a necessity to appoint meetings. In this I was exercised to abide in the pure life of truth, and in all my labors to watch diligently against the motions of self in my own mind.

I have frequently found a necessity to stand up when the spring of the ministry was low, and to speak from the necessity in that which subjecteth the will of the creature; and herein I was united with the suffering seed, and found inward sweetness in these mortifying labors. As I have been preserved in a watchful attention to the Divine Leader, under these dispensations of enlightenment at times hath followed, and the emergence of truth hath arisen higher in some meetings than I ever knew it before through me. Thus I have been more and more instructed as to the necessity of depending, not upon a concern which I felt in America to come on a visit to England, but upon the daily instructions of Christ, the Prince of Peace.

Of late I have sometimes felt a stop in the appointment of meetings, not wholly, but in part; and I do not feel liberty to appoint them so quickly, one after another, as I have done heretofore. The work of the ministry being a work of Divine love, I feel that the openings thereof are to be waited for in all our appointments. O, how deep is Divine wisdom? Christ puts forth his ministers and goeth before them? and O, how great is the danger of departing from the pure feeling of that which leadeth safely! Christ knoweth the state of the people, and in the pure feeling of the Gospel ministry their state is opened to his servants. Christ knoweth when the fruit-bearing branches themselves have need of purging. O, that these lessons may be remembered by me! and that all who appoint meetings may proceed in the pure feeling of duty!

I have sometimes felt a necessity to stand up, but that spirit which is of the world hath so

much prevailed in many, and the pure life of Truth hath been so pressed down, that I have gone forward, not as one travelling in a road cast up and well prepared, but as a man walking through a miry place, in which are stones here and there safe to step on, but so situated that, one step being taken, time is necessary to see where to step next. Now I find that in a state of pure obedience the mind learns contentment in appearing weak and foolish to that wisdom which is of the world; and in these lowly labors, they who stand in a low place and are rightly exercised under the cross, will find nourishment. The gift is pure; and while the eye is single in attending thereto the understanding is preserved clear; self is kept out. We rejoice in filling up that which remains of the afflictions of Christ for his body's sake, which is the church.

The natural man loveth eloquence, and many love to hear eloquent orations, and if there be not a careful attention to the gift, men who have once labored in the pure Gospel ministry, growing weary of suffering, and ashamed of appearing weak, may kindle a fire, compass themselves about with sparks, and walk in the light, not of Christ, who is under suffering, but of that fire which they in departing from the gift have kindled, in order that those hearers who have left the meek, suffering state for worldly wisdom may be warned with this fire, and speak highly of their labors. That which is of God gathers to God, and that which is of the world is owned by the world.

In this journey a labor hath attended my mind, that the ministers among us may be preserved in the meek, feeling life of Truth, where we may have no desire but to follow Christ and to be with Him, that when He is under suffering, we may suffer with Him, and never desire to rise up in dominion, but as He, by the virtue of his own Spirit, may raise us.

1772. JOHN WOOLMAN.

"Grass which is Today in the Field."—The making of hay, and the storing of it as fodder, is not practiced in the East. The grass is cut daily, both for the stall-fed cattle, which are not numerous, the asses and the sheep, to prevent the waste which would be caused by their trampling down the rich herbage. But wood for fuel is very scarce, coal is unknown, and charcoal is only the luxury of the wealthy.

The coarser herbage, including the bright flowers, and especially the gladiolus, is left for a day's exposure to the sun, when it becomes perfectly dry, and is then put into the large, close, dome-shaped ovens, and kindled. As soon as it is consumed, the dough is put in among the hot embers, and the oven closed again. In travelling on the east of Jordan, sometimes for weeks we had no other fuel than the grass of the field, which our men gathered and burned in small heaps—for, of course, we had no oven—and then baked our barley meal and our game by spreading the dough upon the embers and heating the hot ashes over the birds, and then covering them with sods or stones, to retain the heat.

"Bags Which Was Not Old."—The ballantion was the strong leather purse which to this day every Arab carries hung round his neck beneath his clothing, to carry his signet ring, money and valuable tokens. It is so strong and carefully stitched that it would seem impossible it could wear out. It is as though our Lord had said, Provide a bag more imperishable than the imperishable, to hold a yet more imperishable treasure.—H. B. Tristram, in S. S. Times.

Anecdote of Dorothea Dix.—This anecdote of Dorothea Dix exemplifies the nature of the woman. "Dolly" Dix was perfectly fearless, and often travelled hundreds of miles entirely alone. Upon one occasion, she was journeying through a wild and lonely portion of the State of Missouri, which bore a bad name and was infested with outlaws and highwaymen. She rode in a primitive sort of wagon, and noticed that the young man who drove carried a pair of pistols in his belt. She inquired the reason why, and he informed her that sometimes travellers were "held up" by desperadoes, and that he intended to defend himself. After some persuasion he was induced to give the weapons up to her, and she placed them beneath the seat. Shortly afterward, at a turn of the road, the driver's fears were realized, as a rough-looking man jumped out and seized the horses by the bits, and demanded Dorothea's money. But Dolly Dix was a Boston girl; and, far from being frightened, she began to question the man. "Why would you take my money?" said she. "Do you need help, food, or clothing? It is my mission to help the unfortunate. Tell me what you wish, and I will give you all the aid within my power." The man's hands dropped to his side. He looked at her for a moment, and then ejaculating, "That voice!" stood aside to let her pass. It turned out that, while a convict in an Eastern prison years before, Dolly Dix had befriended him. He recognized her, and allowed her to pass unmolested.—E. E. Hale.

True beauty of face is less of feature than of expression; less of surface expression than of the exhibit of light from within. Regularity of feature, fineness of grain, and delicacy of complexion, cannot give beauty where there is no indication of mind and soul below the surface. But features that are unattractive may be so transfigured in the light that shines up through them from the innermost personal character, that they will glow with preternatural beauty. A stained glass window as seen from without is an ugly sight, so long as the light which falls on it comes only from outside. But when the building itself is lighted up, the dead patches of sombre hue on the ugly window take new color and brightness from the light within, and the poetic story of the maker's conception stands out all over it in surpassing beauty. So it is with the human face as the window of the soul; its truest beauty can never be seen from without, save as the soul itself is lighted up with spiritual light from within that streams through the features, and transfigures the entire countenance, showing in all its attractiveness of form and hue the plan of the Maker for this window of his Spirit's temple.—Selected.

The great learning which Moses had as an Egyptian Scholar, and his wisdom and understanding as a man, did not clothe him with authority as the leader of God's people; and he must put all these things off before he could receive the Divine commission. Paul was a wise student of Gamaliel, but all his wisdom and learning and zeal did not constitute a commission to be a leader of Israel—but the bright light must put out his eyes of human learning, so as to be ready to receive the revelation of Jesus Christ, as his commission to preach the Gospel, for he said he did not get his authority from man. God desires a no authority for engaging in the work of the ministry. Here some honest-hearted, well-disposed persons are

misled, and induced to "take upon themselves" the call to be teachers.—Selected.

In the days of the most colossal despotism under which the earth has ever groaned, when the pride of the Roman patrician succumbed to the detested tyrant, and the more towering pride of the Stoic philosopher, that was so brave behind Caesar's back, cringed and cowered in his presence—in Christ's school of self-abnegation, of self-distrust and reliance on another, of the unreserved surrender of the will, the soul, the life, to the government of a Lord and Master, were trained whole communities of meek and simple souls, the abject victims of the Roman domination, the disciplined soldiers of her armies, the diggers in her quarries, the slaves of her slaves, to such acts of personal independence, of the assertion of human rights in the face of all imaginable and unimaginable perils and tortures as the world of that time could not show besides—such as art and poetry and history have never since been able to forget. It is to the music of their martyr-songs that the world's long, weary march towards universal liberty and peace by righteousness has been keeping time from their day to ours. For the source from which they drew their inspirations of heroic courage has been flowing ever since. In our day, as it was in the beginning, the noble independence of the soul, its irrepresible aspirations after perfect freedom, are seen to spring out of its profoundest conscious self-distrust and willing dependence on a Saviour and Master.—S. S. Times.

I stood upon the beach looking off upon the sea; and there was a strong wind blowing, and I noticed that some of the vessels were going that way, and other vessels were going another way. I said to myself: "How is it that the same wind sends one vessel in one direction, and another vessel in another direction?" I found out by looking that it was the different way they had the sails set. And so does trouble come on this world. Some men it drives into the harbor of heaven, and other men it drives on the rocks. It depends upon the way you have your sails set. All the Atlantic and Pacific oceans of surging sorrow cannot sink a soul that has asked for God's pilotage.—T. De Witt Talmage.

Natural History, Science, &c.

Affection in a Bird.—Not far from Niagara River, I overtook my travelling companion. In this region I shot two specimens of the beautiful parrot, *Platycercus pulcherrimus*, under the following remarkable circumstances. An hour before sunset I left the camp with my gun and soon caught sight of a pair of these parrots, a male and a female, that were walking near an ant-hill, eating grass-seed. After I had shot the male, the female flew up into a neighboring tree. I did not at once go to pick up the dead bird—the fine scarlet feathers of the lower part of its belly, which shone in the rays of the setting sun, could easily be seen in the distance.—Soon after, the female came flying down to her dead mate. With her beak she repeatedly lifted the dead head up from the ground, walked to and fro, over the body, as if she would bring it to life again; then she flew away, but immediately returned with some dry straws of grass in her beak, and laid them before the dead bird, evidently for the purpose of getting him to eat the seed. As this too was in vain, she began again to raise her mate's head and to trample on his body, and finally flew away to a tree just as darkness was coming on. I approached the

tree, and a shot put an end to the faithful animal's sorrow.—*Lusholtz's Travels in Australia.*

Poisonous Plants.—Fiji has traps for the unwary quite peculiar to itself. The commonest of these is the tree-nettle, which really is a large forest tree. Beautiful but treacherous are its large glossy leaves, veined with red or white, most attractive to the eye, but anguish to the touch; days will pass ere the pain of that burning sting subsides. However—"forewarned is forearmed"—and you are in no danger of accidentally touching these large showy trees, as you so often do the insignificant but obtrusive little nettle of our own woods.

There are, however, several other trees which are so intensely poisonous, that it is dangerous even to touch them accidentally. One of these is the *Kaukara*, or itch-plant, from which exudes a milky juice causing agony, especially if the tiniest drop should come even near the eye. Instances have occurred when a man has ignorantly selected this wood, either as timber from which to fashion his canoe, or a spar suitable for his mast, and incautiously sitting on the wood while carpentering, has discovered, when too late, that the subtle poison had entered by every pore, and that his whole body was rapidly breaking out in angry spots, causing an irritation utterly unbearable, and lasting for months, sometimes years.—*C. F. Gordon Cummings, "At Home in Fiji."*

Treatment of Lightning-Shock.—A report of a curious case of lightning-shock, with recovery, has been published by Dr. F. B. Paigé of Montreal, with remarks by Drs. Frank Buller and T. Wesley Mills. The subject, a young married woman, was struck by a flash, the intensity of which was shown by its effect on metallic objects to be very great. It passed from a bird-cage, hanging near her, to her head above the left eye, thence along the ear to the central line of the thorax, along the stocking suspender to the top of the stockings, leaving marks on both legs. Thence no trace of the current was detected till the foot was reached, whence it slipped, leaving large rents in the stocking and slipper, but no marks on the skin. The force of the shock was enough to throw the woman from the chair on which she was sitting, upon and across another some two or three feet distant. She was found completely unconscious, motionless, with muscles relaxed, left eye closed, right one open, face purple, pulse imperceptible, and neither heart-sounds nor respiratory murmur audible. Her clothes were loosened and artificial respiration was begun, and the first sign of life appeared about three minutes afterward. Breathing was greatly impeded, when respiration was first resumed, by accumulations of saliva, which were removed. Consciousness began to return, and the muscles of the arm to regain strength, in between half and three quarters of an hour. Sight was restored to the right eye, but it could not be moved. Though the subject could not speak, the paralysis passed away slowly, so that in about two weeks solid food could be swallowed. Twelve or fourteen hours after the accident, intense pain set in about the head, neck, arms, and chest, which did not pass away from the head for seven days, and occurred occasionally after that. At the end of four weeks the patient was able to return to her home. In six months complete recovery had taken place, except in the left eye. To the question whether the patient could have recovered without the assistance rendered just after the accident, Prof. Mills replies, that "consider-

ing that respiration was suspended, that the circulation, even with artificial respiration was so feeble that the temperature fell, that consciousness did not return for so long, it does not seem reasonable to believe in the possibility of spontaneous recovery. But the case does seem to teach, in the clearest way, the importance of using such means as those employed in this instance, promptly and perseveringly."—*Popular Science Monthly.*

Names of Plants.—Rushes are in some places called *seaves*, *si* being the Danish word for the rush. Buckwheat is from the German *Buchwäizen*, or "beechwheat," from the resemblance of its triangular seeds to the beech-nut, while their size is suggestive of wheat-corns. The dandelion is the French *dent-de-lion* ("lion's-tooth"), probably from the segments of the leaves bearing some resemblance to the fangs of the lion; and while the herb bennet is a corruption of the monkish *herba benedicta*.

A very troublesome grass to farmers, from its worthlessness and its extreme vitality—the smallest piece left in the ground being sufficient to start a new plant—is known as the couch-grass, or as scrutch, twitch, or quicken-grass.—These names are all variations from one source, the Anglo-Saxon *civic* ("living"), and clearly refer to the very troublesome and aggressive vitality of the plant. The word "quick" is still used in the English Prayer-book, as opposed to the dead, and a quickest hedge is one made of living hawthorn, instead of mere fence of dead timber or paling.

In former days many plants were associated with the Church, and either received their names from the fact of their flowering about the time of some Church festival, or were actually associated with some saint as an emblem, or in some legendary way. Numerous examples of these names might be given, but it will suffice to mention but a few; as, for instance, the numerous flowers associated with the Virgin Mary—the lady's bedstraw, lady's smock, lady's comb, lady's mantle, and others. Virgin's bower, and virgin's thistle are other examples. Then we get the St. John's-wort, St. James'-wort, St. Patrick's cabbage, and the Michaelmas daisy; while the snowdrop was called fair maid of February, in commemoration of the Feast of the Purification, of the second of February; the daffodils we also call Lent lilies—while one of the anemones is called the pasque-flower, from its association with Easter, the Paschal Feast.

A very large class of names is derived from the resemblance of the plant, or some portion of it, to some other object; though one is sometimes more impressed with the wonderful powers of imagination the early coiners of these names must have had, than with any sense of their appropriateness. Any elongated and fluffy, tail-like form would, of course, be easily discovered and seized upon as an aid to nomenclature; hence, we get the mouse-tail, the cat's-tail, the horse-tail—and others, crane's-bill, stork's-bill, ox-tongue, lamb's-tongue, coltsfoot, larkspur, are other examples of names based on more or less fanciful resemblances. Other names, as the throatwort and fever-fever refers to the medicinal uses of the plants bearing them.—*Hulme's Wayside Sketches.*

Items.

Dublin Yearly Meeting.—The London and British Friends for Sixth Month have arrived, bringing as usual detailed statements of the proceedings of Dublin and London Yearly Meetings.

The former of these commenced at Dublin on the

80th of Fourth Month. There were present at it Friends from London Yearly Meeting, and from several of those on this continent. Among these were our friends Samuel Morris and Thomas P. Cope, from Philadelphia; one of the members referred to their acceptable attendance and desired some recognition of their visit might be made by the Yearly Meeting. Others thought that the returning minute of unity from the Meeting of Ministers and Elders would be sufficient, and the subject was so settled. Samuel Morris concurring in the judgment that under existing circumstances this would be best.

The consideration of the state of Society was made in joint session of men and women Friends. Among the subjects that claimed attention were the opium traffic, the use of intoxicating liquors, and capital punishment.

A proposition was received from Kansas for the establishment of a *Conference*, in which the Yearly Meetings should be represented by delegates; such Conference to have authoritative power in doctrinal and disciplinary matters. No unity with this proposition was expressed.

The whole number of members was reported to be 2,687, showing a decrease of 16 since the previous year. Attention was called to the fact that the number of deaths had been 18 more than that of births. There had been but three marriages during the year in the two Southern Quarters; advice was given to the friends to brighten their lives and views as to the style of living, and to be contented with a humble way.

During the sittings one Friend spoke of the need of individual faithfulness, and referred to George Fox's declaration as to his mission:—"I was to direct men to the light, power and spirit of grace of Christ Jesus in their hearts, by which they might come to know Him to be their Teacher to open Divine mysteries in them; their Shepherd to feed them; and their Bishop to oversee them, &c."

Another thought that there ought to be more readiness to offer prayer and praise. A caution was extended by others against losing our faith in the excellence of silent worship—which is communion between our Heavenly Father and the souls of the worshippers. One speaker said, that (so far as he was concerned) he preferred to be a praying Christian, who have the courage to come together without any pre-arrangement, without minister or prepared service, or any appointment to speak or pray. In the disuse of all outward ordinances, we maintain a standard against all ritualism.

A Committee appointed the previous year to visit all the meetings, was continued.

The Committee on Home Missions was continued for another year; and the Quarterly and Monthly Meetings were recommended to consider whether the work could not satisfactorily be carried out by some other measures of a less elaborate character.

During the week conferences were held on the subjects of Peace and Foreign Missions.

Smoking Tobacco.—We heartily approve of smoking tobacco—when it is done in the right way. Such a case occurred not long ago with a steamer from a Southern port which ran short of fuel; and in order to reach port, the stokers, in place of coal, piled bales of tobacco into the furnace, and the way the tobacco-smoke came out of the steamer's big pipe would have made the ordinary puff of the cigar envious. The literary man who comes into our office once a week with a cigar, and who leaves behind him clouds and fumes, which it requires all the blasts which blow in through our windows and out through our doors to remove, could have taken a lesson in puffing by way of vesicating the lungs. The smoke was dense, and she could be smelled a hundred miles away. We suppose the fuel was expensive, but it was never put to so good use before, and nicotine is an oil which burns well, and we have no doubt that it raised the steam. We heartily wish that all the tobacco which comes to us from Cuba could be brought by way of vesicating the lungs, and that fuel might be so scarce on the Connecticut, Virginia and North Carolina farms where tobacco is raised, that the planters would have to make the same use of it that Kansas farmers sometimes do of their corn. At any rate, if some method

could be devised by which men with cigars in their mouths could be kept out of the society of respectable people, and office doors and parlor doors could be shut against them, we should rejoice.—*The Independent.*

Reformed Episcopal Church in Frankfort.—*The Episcopal Recorder* of Fifth Month, 1890, contains an account of the organization of a new congregation in fellowship with the Reformed Episcopalians at Frankfort, Philadelphia. It appears, from its statement, that a portion of the officers and members of the old Episcopal congregation there had progressed so far in the introduction of ritualistic practices, that the members have become much dissatisfied and determined to withdraw and connect themselves with the Reformed Episcopalians. At a meeting held to consider the subject, 159 persons stood up to be counted as members of the new organization.

Lotteries.—In an article on this subject, published in *The Christian Advocate* of New York, Anthony Comstock, the efficient agent of the Society for the Suppression of Vice, tells of the efforts that were necessary to suppress this evil in New York city.

While Superintendent of Gaming was at the head of the Police Department, lotteries seemed to have things their own way. Nine different lotteries advertised and carried on their unlawful business openly. The newspapers, down to 1877, when the New York Society for the Suppression of Vice took the matter in hand, had columns of advertisements daily of these lotteries. One morning journal had over 8,000 per day of advertising. In the Louisiana, the Kentucky, the Commonwealth Distribution Company, and six other lotteries had most of their head-quarters upon Broadway. At some of the larger offices uniformed policemen could be seen guarding the lines of ticket-buyers, to preserve order, while the managers of these offices violated both the Constitution and statutes of the State in their operations.

The agents of the Society for the Suppression of Vice raided the Louisiana head-quarters at No. 319 Broadway, and when we entered the place we found a policeman present, guarding the interests of these public plunderers. Although our society made numerous arrests from 1877 to 1880, yet so strong was the influence exerted by these lottery managers, that we could scarcely bring a single case to trial in the State Courts during all that time. We persisted in raiding these places. Our brave President, Samuel Colgate, issued orders for us to keep on raiding these places and piling up cases in the District Attorney's office. In 1879 we raided 212 Broadway, the Northern head-quarters of the national scourge—the Louisiana Lottery. We seized the books, papers, tickets, letters, &c., and finally compelled this agency to close its doors and the parties to leave the State. The books now in my possession disclosed the fact that the average daily receipts of this one office amounted to 1,760 letters and \$5,176 per day.

Through the efforts of the New York Society for the Suppression of Vice all the New York headquarters for the sale of lottery tickets in this State have been closed, the advertising in newspapers in New York city stopped, and the smaller and fraudulent lotteries entirely suppressed.

One of the counsel of this Louisiana monster came to our office, and with most plausible manners and speech proposed to contribute \$25,000 per year to the cause if we would only allow him to connect and reinstate itself in a public office upon Broadway, New York city. The offer was promptly declined. There are persons who sell these tickets on the sly, but these persons are arrested as promptly as we can secure evidence against them.

The New York Society for the Suppression of Vice has been in having secured 1,780,000 letters and tickets, 294,414 circulars, 1,522,294 pool tickets, and a vast amount of books, papers, devices, and paraphernalia for conducting lottery policy—one of the meanest forms of gambling."

Sorrow.—*The Christian's and the World's.*—In the Pitti Palace, at Florence, there are two pictures which hang side by side. One represents a stormy sea with its wild waves, and black

clouds, and fierce lightnings flashing across the sky. In the waters a human life is seen, wearing an expression of the utmost agony and despair. The other picture also represents a sea, tossed by as fierce a storm, with its dark clouds, but out of the midst of the waves a rock rises, against which the waters dash in vain. In a cleft of a rock are some tufts of grass and green herbage, with sweet flowers, and amid these a dove is seen sitting on her nest, quiet and undisturbed by the wild fury of the storm. The first picture fitly represents the sorrow of the world when all is helpless and despairing; and the other the sorrow of the Christian, no less severe, but in which he is kept in perfect peace, because he nestles in the bosom of God's unchanging love.—*Selected.*

THE FRIEND.

SIXTH MONTH 23, 1890.

Among the many letters which come to the editor of *THE FRIEND*, one, recently received, calls attention to an apparent inconsistency in the case of Abaziah, king of Judah, who it is stated in 2nd Chronicles, ch. 22, v. 2, was 42 years of age when he began to reign in the place of his father Jehoram. From the previous chapter, it appears that Jehoram was but 40 years of age at the time of his death.

On referring to the records of the Kings of Judah, as contained in the Book of Kings, our correspondent will find in 2 Kings, ch. 8, v. 26, that Abaziah was but 22 years of age at the time of his accession to the throne of Judah. The mistaken age of 42 years, probably arose either from an error in the records made use of by the person who compiled the historical narrative in the Book of Chronicles, or from a slip of the pen in some subsequent copies.

Those who have made a special study of the ancient manuscripts and other sources from which the canon of the Scriptures comes to us, tell us that there are many differences in the different copies, but these are generally unimportant in their character—so that they do not affect the general accuracy of the whole, or bring into question the great historical events, or the principles of religion set forth in them. The result of the most careful and exhaustive labor is to confirm our confidence in the Bible as a record of past events, as well as to convince us of the truth of the statement made by Paul to Timothy, "Every Scripture inspired of God is also profitable for teaching, for reproof, for correction, for instruction in righteousness," etc. (Rev. Version). But at the same time it has shown that the liability to err, which belongs to man, has existed among the transcribers of the sacred writings.

Another letter comes from a valued Friend, whose mind is often under exercise for the welfare of our Society—it says:

"It is the prerogative of Christ alone to call, qualify, and prepare vessels for use in his house. There are several who travel about and to whom staying at home becomes irksome, that have no better foundation than inclination. John Fothergill, in his journal, relates that on his return from a visit to this country, he resumed the occupation of farming, believing it best for ministers in our Society to have occupation, that they might not be in danger of a disposition to be too easily drawn into religious service without the sense of the

clear requirements of our everlasting High Priest. I verily believe the want of occupation at home, and not caring to leave it, has been a snare to several."

We insert the above wholesome caution, although we suppose it is more applicable to some whom it is probable, it will not reach, than to the usual readers of our journal.

A third letter, from a Friend in Dublin, contains the following information respecting the movements of our beloved Friends, S. Morris and T. P. Cope:—

"I have it on my mind to send thee a short account of the recent travels of the dear Friends from your Yearly Meeting, Samuel Morris and Thomas P. Cope, who are now in these countries. They came to Ireland in Third Month, attended the Quarterly Meeting for Ulster, Province of Limerick, and visited most of the meetings in the Province. Then to Leinster Quarterly Meeting, at Mountmelleck, on 30th of same month; taking some meetings afterwards on their way to Munster Quarterly Meeting at Cork, on the 13th of Fourth Month. They then came on towards Dublin, visiting meetings on their way. They were at our Yearly Meeting, and on conclusion of same went towards London, taking some meetings in South Wales. The labors of these beloved Friends in this Island appear now to be concluded, and their company and Gospel services amongst us have been greatly valued by Friends here.

SUMMARY OF EVENTS.

UNITED STATES.—In the U. S. Senate on the 17th instant, when the Silver bill was under consideration, Senator Plumb offered a motion providing that any owner of silver bullion may deposit the same at any mint to be coined into standard dollars for his benefit, provided the deposit is not more than \$100. This amendment was agreed to by a vote of 15 yeas to 24 nays. Several other amendments, equally in the line of free coinage, were adopted, and the bill, as amended, was passed by a vote of 42 to 25. The bill was sent to the House, and by that body it has been referred to its Committee on Coinage.

Colonel R. Bruce Bicketts, of Wilkesbarre, Penna., has closed negotiations with a party of capitalists of London, England, for the sale of 10,000 acres of timber land in Laramie, Wyoming and Sullivan counties. A company for cutting and milling the timber is to be formed, and it is understood that Colonel Bicketts will be the manager.

In the Louisiana House of Representatives, on the 18th instant, the Speaker received from Judge Newman, President of the New Orleans Stock Exchange, a proposition from Benjamin Newsom, of London, England, offering a million and a quarter of dollars yearly for the same lottery privileges applied for by John A. Morris, with the exception of Kansas for Missouri. The payment of the amount annually in the State.

Governor Waterman, of California, has called the attention of Attorney General Johnson to the prize fights in this State, and invokes his aid to have them stopped.

The Kansas (Chautauque) Assembly began a session at Ottawa, last week. When the Assembly had got into good running order then a liquor dealer opened an original package saloon. The prohibition people of Ottawa met on the night of the 21st instant, and formed a defence league. A fund of \$3000 was subscribed to pay the league's expenses, and a resolution was unanimously passed providing that "a committee should capture each original package dealer, tar and feather him and ship him back to Missouri." An original package from Kansas for Missouri.

The General Conference of Congregational Churches of Connecticut, in session in New Haven, last week, framed a petition to the Legislature advocating the passage of a bill providing for the exercise in the State of the same police powers in relation to lotteries brought in from other States, whether in original packages or

not, as may be exercised in relation to liquor within the limits of the State.

John Sharp, who gave her age to the census enumerator as 112 years, is believed to be Philadelphia's oldest inhabitant.

In this city there were 480 deaths reported last week, which is less than the previous week, and 80 more than the corresponding week last year. Of the whole number 244 were males and 236 females; 77 died of cholera infantum; 51 of consumption; 32 of marasmus; 26 of inflammation of the stomach and bowels; 25 of diseases of the heart; 22 of inflammation of the brain; 19 of convulsions; 14 of casualties; 12 of infatuation; 11 of cancer of the breast; 11 of pneumonia; 11 of cancer; 11 of debility and 11 of old age.

Markets.—*U. S.* 4½, 103; 4's, reg., 122; coupon, 123; currency 6's, 113 a 124.

COTTON was quiet but steady on a basis of 12½ cts. per pound for middling uplands.

Wool—Winter bran, choice, \$14.50; do., fair to good, \$14.00 a \$14.25; spring bran, \$13.50 a \$14.

FLOUR—Western and Pennsylvania super, \$2.25 a \$2.60; do., extra, \$2.75 a \$3.15; No. 2 winter family, \$3.25 a \$3.50; Pennsylvania, roller process, \$3.75 a \$4.25; Western, clear, \$4.00 a \$4.25; do., straight, \$4.35 a \$4.65; winter patent, \$4.85 a \$5.25; Minnesota, clear, \$3.50 a \$4.00; do., straight, \$4.25 a \$4.75; do., patent, \$4.85 a \$5.25. Rye flour was in limited request at \$3.25 per barrel for choice.

GRAIN—No. 2 red wheat, 89 a 90 cts.

No. 1 red wheat, 89 a 90 cts.

No. 2 white oats, \$4 a 4¼ cts.

BEEF CATTLE—Extra, 5 a 5½ cts.; good, 4¼ a 4½ cts.; medium, 4¼ a 4½ cts.; fair, 4¼ a 4½ cts.; common, 4¼ a 4½ cts.; culls, 3¼ a 3½ cts.; fat cows, 2¼ a 3¼ cts.

SHEEP—With light receipts and a fair demand the principal competition being really left unmet.

Medium, 4¼ a 4½ cts.; common, 3¼ a 4½ cts.; culls, 2¼ a 3¼ cts.; lambs, 5 a 8 cts.

HOGS were in fair request, and prices closed heavy. Good light Western, 5¼ a 5½ cts.; common heavy, 5 a 5½ cts.

FRENCH.—In the British House of Commons, on the 19th instant, a vote was taken of the licensing bill. The first section was adopted by a majority of four votes only, the Government being taken by surprise in the absence of many of its supporters. The other sections had more than fifty majority.

On the 22d inst., W. J. H. Sturt, the Government leader, announced that it would be impossible to pass the license clause of the local taxation bill in its entirety. They would, however, retain in the bill the provision, that a certain portion of the new taxation on spirits should be appropriated for the purpose of extinguishing licenses.

At a meeting of the temperance leaders, held on the 23d inst., a manifesto was adopted, which declares that the Government's scheme is worse than worthless. The plan proposed, it says, is entirely misleading, the principle compensation being really left unmet.

The party will continue its strenuous opposition to the measure, relying upon the country for support.

An agreement between Germany and England, on the African question has been reached. It is stated that Germany cedes Witu and Somaliland to England and England in turn cedes to Germany the territory of Heligoland. England will assist Germany to obtain the cession of the German coast line hitherto rented from the Sultan, on the payment of an equitable indemnity. England, considering Heligoland useless since the last Hanover will cede it to Germany, subject to the consent of Parliament.

The London correspondent of the *New York Press*, says: "The Anglo-German Convention, concerning the partition of Africa and the mutual concessions of the two powers, does not seem in favor with the House of Commons, with the British public, and German claims to any part of the African Hinterland will be pretty stoutly attacked in Parliament, and the cession of Heligoland to the Berlin Government will also be hotly contested. Several members of Parliament (including the Opposition) are expected to vote, and will shortly start for Heligoland, to take the votes of the islanders on the question of the cession of their home."

The French papers regard the proposed Anglo-German treaty about Africa as a diplomatic defeat for England. They are not satisfied with it, and they fail to see that but one outcome of the proposed treaty is very evident, and that is, that England never intends to give up Egypt. Germany surrenders the Witu country, which would impede access to Abyssinia from the Red Sea, and also, a great part of Africa and key of the Nile region and of Egyptian dependence.

England is building slowly but surely in Africa, and realizes the truth of Major Wisman's utterance, recently made at Cairo, that the whole of Central Africa is not worth a tenth part of Egypt.

The Hamburger *Nachrichten* declares that German commerce in East Africa will be ruined, but admits that the acquisition of Heligoland balances any loss that England might gain. The paper says, has done Germany a real service, to the disadvantage of France, which always requires to be closely watched.

The London *Chronicle's* Berlin correspondent says, that the Franco-Russian alliance has assumed a concrete form since the announcement of the Anglo-German agreement.

The Government of France has recognized the Brazilian Republic.

It is reported that yellow fever has broken out in Malaga, the germs of the disease having been brought in a cargo of cotton by a New Orleans steamer. The disease has also appeared at Valencia, Puebla de Rugat, and other places in Spain.

The London *Times* says: The Vice-Consul of Novorossisk, on the Black Sea, in his last report, says, it is expected that the Imperial Government will shortly sanction the construction of a railway between Tzaritzin, on the Volga, and Tichoreiskai, on the Rostoff-Vladikavkaz line, thus putting the river and its important tributaries in direct communication with the port of Novorossisk. Once the step is taken, the greater part of the Elgh grain produce, now sent by canal and rail to the Black ports and only reaching its destination in the summer of the following year would be taken to the Black Sea by the railway during the time the northern ports and inland canals are closed by ice. Novorossisk should also then become the head centre of import for goods destined for the Nile-Novgorod fair.

Thousands of people in Tokio and other large cities in Japan, are suffering for want of food, owing to the failure of the rice crop. One nobleman is feeding 1,000 people a day at his one expense.

NOTICES.

WESTWON BOARDING SCHOOL.—A Stated meeting of the Committee on Admissions will be held in the Committee-room, Fourth and Arch Sts., on Seventh-day the 5th of Seventh Month, at 10 A. M.

J. S. W. BIDDLE, Clerk.

A few Friends can have country board in a Friend's family—shade, one half mile north of the city.

R. H. THOMAS,

Toughkenamon, Chester Co., Pa.

Sixth Mo. 19th, 1890.

Two comfortable houses to rent at Lansdowne, near Friend's Meeting and near Railroad Station.

Apply to ANNA WOOLMAN,

Lansdowne, Delaware Co., Pa.

WANTED.—A teacher for West Grove Preparative Meeting School. Apply to

P. MORRIS JONES or MARGARET COOK,

West Grove, Pa.

NEW PUBLICATIONS.—The Tract Association of Friends have just reprinted the following Tracts from new plates:

A Visit to the Prisoners at Spandau, in Germany, by Thomas Shillito, 4 pages.

Thomas Shillito's Visit to the Drinking-houses of Ireland, 8 pages.

Popular Announcements, by Jonathan Dymond, 8 pages.

The True Christian's Rule of Life, 8 pages.

A Proper Use of Riches, exemplified in the life of Richard Reynolds, 8 pages.

WESTWON BOARDING SCHOOL.—The summer term of 1890 will end Seventh Mo. The fall and winter term of 1890-91 will begin Ninth Mo. 2d, 1890.

Parents and others intending to send pupils to the school, will please make immediate application to

J. G. WILLIAMS, *Sup't.*

Westwton, Pa.

A teacher of experience, acquainted with "Quincy Methods," and modes of instruction now generally approved, desires a position in Primary Department of a Friend's School. She could enter upon duties at any time in Westwton.

Address E. R. M., Germantown, Philadelphia.

MARRIED, on the 19th instant, at Friends' Meeting-house, Germantown, Dr. JOSEPH STOKES, of Moorestown, N. J., to MARY EMLEN, daughter of Samuel and Sarah Emlen.

DIED, on the 18th of Fourth Month, 1890, at the residence of his son-in-law, Ennior Hollingsworth, in Southwold, England, one of our oldest members, aged 73 years, 6 months and 11 days, a member of Pennsylvania Monthly and Particular Meeting. For several months previous to his decease he experienced great suffering at seasons, which he was enabled to bear patiently; and several times expressed his resignation to the Divine will, and his faith in the merits of God in Christ Jesus. His friends and relatives felt a comfortable hope that he has been gathered into rest and peace.

—, at her residence near Clayton, Indiana, Fifth Month 27, 1890, JANE W. SMITH, wife of Aaron Shaw, a daughter of Eleazar and Ann Bales, aged 63 years, 5 months and 8 days. She was a valuable member and elder of Mill Creek Monthly and Particular Meeting. For about two years she bore a suffering illness with Christian patience and resignation; during which she was afflicted with a painful rheumatism, which she overcame. Her life was one of self-denial, and in her youthful days she gave evidence of her attachment to the Society of Friends, which she maintained unto the end. Before her close she took a solemn leave of the family and those around her, and with a cheerful and a peaceful spirit, she quietly released from his suffering tabernacle, was admitted, we reverently believe, into everlasting rest.

—, Sixth Month 7th, 1890, at his residence in Chesterfield, Morgan Co., Ohio, ELLWOOD DEAN, a minister and member of Chesterfield Monthly Meeting of Friends, aged about 74 years. The Head of the Unitarian Church in this city, and a member of the ministry, the exercise of which during many years had endeared him to many in his native State, and in other parts of the Union where he had travelled. About 16 months before his decease he was prostrated by an attack of paralysis, and continued in a weak, suffering and remaining situation during the remainder of his life. This he bore with great patience and resignation—although it was aggravated by the fears with which he was assailed, and which were probably the result of his weak condition—that, after all his long service in the cause of Christ, he might finally fail to obtain the crown which had been the great object of his life—an entrance into the rest and peace of Heaven. His experience is an affecting illustration of the Scripture query—"If the righteous scarcely be saved, where shall the ungodly and the sinner appear?" This sense of spiritual weakness was keenly felt by our beloved subject, when he exclaimed, "My God, my God, why hast thou forsaken me!" and it is no marvel if his dear children have at times to drink of the same cup. Through all, he manifested an unabated interest in the welfare and preservation of our beloved Society, and that all our members should be animated by the same spirit, remained inviolate. His family and friends are comforted in the belief that he is now released from all his sufferings, and has been safely gathered into the fold of everlasting rest and peace.

—, at the residence of her great-nephew, Richard T. Cadbury, near Swarthmore, Delaware Co., Pennsylvania, on the 7th inst. of Seventh Month, 1890, one of the 91st year of her age, a member of the Monthly Meeting of Friends of Philadelphia.

—, at his residence, in Jackson Township, Henry County, Iowa, of paralysis, EPHRAIM B. RATLIFF, in the 75th year of his age, a beloved member and minister of Salem Monthly Meeting of Friends, in this State, who was a devoted Christian, and a faithful upholder of the principles and practices of early Friends. His health for several months previous to his decease had been gradually failing, and we believe he was conscious to be found ready for the change on the 7th inst. of his 75th year, and he was gathered to his rest suddenly from our midst, his family and friends have the comforting assurance that, through redeeming mercy, he has been gathered into the garner of everlasting rest and peace.

—, suddenly in Philadelphia, PASCHALL MOON, in the 78th year of his age, a member of Sadsbury Monthly and Particular Meeting. He was an affectionate husband, and a loving and tender parent. Although the summons was, as it were, in a moment's time, we reverently trust that, through redeeming love and mercy, his spirit has been gathered to those who stand prepared for the righteous of all generations.

FOR "THE FRIEND."

Incidents and Reflections.—No. 230.

THE WORK OF GRACE.

John Gillie, in his "Illustrations of the Success of the Gospel" relates the following incident.

Old Mr. Studly was a lawyer in Kent, of about £400 a year. He was a great enemy to the power of religion, and a hater of those who were then called Puritans. His son, in his youth, seemed to follow in the same steps, till the Lord called him home, which was as follows. The young man was at London, and being drunk in some company, and going in the night towards his lodging, fell into a cellar, and in the fall was seized with horror, and thought he fell into hell at that time. It pleased God he took little harm by the fall, but lay there some hours in a drunken drowse; his body being heated with what he drank, and his soul awakened, he thought he was actually in hell. After that he was come to himself, he was got home into Kent; he fell into melancholy, betook himself to read and study the Scriptures, and to much prayer, which at length his father perceived, and fearing he would turn Puritan, was troubled, and dealt roughly with him, made him dress his horses, which he humbly and willingly submitted to; and when at that time his father perceived he sat up late at night, reading in his Bible, he denied him candlelight; but being allowed a fire in his chamber he told Mr. Knight he was wont to lie alone and read by the fire-light, and said that while he was dressing his father's horses in his frock, and in that time of reading by the fire, he had those comforts from the Lord, and joys, that he had scarce experienced since.

His father, seeing these means ineffectual, resolved to send him into France, that by the airiness of that country his melancholy might be cured. He went, and being at his own dispose, by the Lord's guiding him he placed himself in the house of a godly Protestant minister; and between them, after they were acquainted—and such is the cognition of saving grace in divers subjects, that a little time will serve for Christians to be acquainted—there grew great endearment. Great progress he made in speaking the language; and his father expecting an account from the gentleman with whom he sojourned to

his proficiency in speaking French, he sent it to him; but soon after he had orders to return home, and the father directing it or he entreating it, the landlord with whom he had sojourned came into England with him, and both were made very welcome at his father's house, he not knowing that he was a minister. At last the father took the French gentleman and his son at prayers together, and was angry, paid him what was due to him, and sent him away.

Then his father, having an interest in a person of honor, a great lady at Whitehall, and his son by his now past education accomplished for such an employ, prevailed with that lady to take his son as her gentleman, to wait upon her in her coach. He thought by a court life to drive away his melancholy (as he called his son's seriousness in religion). The lady had many servants, some given to swearing and rudeness, whom this young gentleman would take upon him to reprove, with that prudence and gravity that sin fell down before him. And if any of the servants had been ill-employed, and they had heard him coming, they would say, Let us cease, or be gone, Mr. Studly is coming. After a year's time his father waits upon the lady, to inquire of his son's gladness. She answered as it was; that she was glad she had seen his son's face, he had wrought a mighty reformation in her family; she, that had formerly been troubled with unruly servants, by his prudent carriage was now as quiet in her house as if she had lived in a private family in the country. After this the father stormed: What! will he make Puritans in Whitehall? told the lady that was no place for her; he would take him with him; which, to her trouble, he did.

When he had him home in Kent, as his last refuge he thought of marrying him; and to that end found out a match fit for his ends—to stifle that work of religion in his son. He bade him one night put on his clothes in the morning; and ordered his servant to make ready their horses in the morning, and himself to wait upon them. When they were riding on the way he bade the man ride before, and spake to his son to this purpose: "Son, you have been matter of great grief to me; and having used much means to reclaim you from this way you are in, to no purpose, I have one more remedy to apply, in which, if you comply with me, I shall settle my estate upon you; else you shall never enjoy a groat of it: I am riding to such a gentleman's house, to whose daughter I intend to marry you." The son said little, knowing that family to be profane, but went with his father, who before had made way there. They were entertained nobly. He had a sight of the young lady, a great beauty; and the young man fell much in love with her. When they had taken their leaves, on his way his father asked him what he thought of her. He answered, "No man living but must be taken with such an one; he feared she would not take him." The father was glad it had taken, bid him care no more for that. The wooing was not long; at three weeks' end they both came to London to buy things for the wedding. The

father had charged that in the time of wooing in that gentleman's house, there should be no swearing or debauchery, lest his son should be discouraged. Wedding clothes were bought. At the day come, the young couple married. At the wedding dinner, at her father's house, the mask was taken off; they fell to drinking healths and swearing among their cups, and amongst the others the bride swore an oath. At which the bridegroom, as a man amazed, took occasion to rise from the table, stepped forth, and went to the stable, took a horse, none observing, all were busy within; he mounted, and rode away, not knowing what to do. He bewailed himself as he rode along, as undone, and deservingly; for that he had been so taken in love, and the business so hurried on in design; he said at that time he had restrained prayer, and slackened his communion with God, when, as in that grand affair of his life he should have been doubly and trebly serious; and so might thank himself that he was utterly undone. He sometimes thought of riding quite away. At last, being among the woods, he led his horse into a solitary place, tied him to a tree, in his distress, and betook himself to his prayers and tears, in which he spent the afternoon. The providence of God had altered his argument of prayer; which was now for the conversion of his new married wife, or he was undone. This he pressed with prayers and tears a great part of the afternoon, and did not rise from prayer without good hope of being heard.

At the bride's house was hurry enough, horse and man (after they missed the bridegroom) sent every way. No news of him; he was wrestling as Jacob once at Peniel. In the evening he returned home, and inquiring where his bride was, went up to her, and found her in her chamber penitence enough; she asked him, "If he had done well to expose her to scorn and derision all the day," he entreated her to sit down on a couch there by him, and he would give her an account of his doing; what he had then done, and tell her the story of his whole life and what the Lord, through grace, had done for him. He went over the story here above mentioned, with many beautiful particulars; not without great affection and tears, the flood-gates of which had been opened in the wood; and ever and anon in the discourse would say, "Through grace God did so and so for me." When he had told her his story over (and by the way this was the Apostle Paul's method, by which many were converted, to tell over the story of his conversion she asked him what he meant by that word, so often used in the relation of his life, "through grace," so ignorantly had she been educated, and asked him if he thought there was no grace in God for her, who was so wretched a stranger to God. "Yes, my dear," said he, "there is grace for thee; and that I have been praying for this day in the wood; and God hath heard my prayer, and seen my tears, and let us now go together to Him about it." Then did they kneel down by the couch side, and he prayed; and such weeping and supplication there was on both

sides that when they were called down to supper they had hardly eyes to see with, so swelled were they with weeping. At supper the bride's father, according to his custom, swore. The bride immediately said, "Father, I beseech you, swear not," at which the bridegroom's father, in a great rage rose from the table. "What," says he, "is the devil in him? hath he been his wife a Puritan already?" and swore bitterly that he would rather set fire with his own hands, to the four corners of his fair built house than ever he should enjoy it." And accordingly he acted, made his will, gave his son, when he should die, ten pounds, to cut off his claim; and gave the estate to some others, of whom Dr. Reeves was one; and not long after died. Dr. Reeves went for the gentleman, paid him his ten pounds, and told him he had been a rebellious son and disobliged his father, and might thank himself. He received the ten pounds, and meekly departed. His wife—the match was so huddled up—had no portion promised, at least that he knew of, who relied on his father; so that she was also deserted by her friends, and having two hundred pounds in her own hands, that had been given her by her grandmother, with that they took and stocked a farm in Sussex, where Mr. Knight hath often been and seen her who had been highly bred, in her red waistcoat, and milking her cows, and was now become the great comforter and encourager of her husband exceeding cheerfully. "God," saith she, hath had mercy on me, and my painstaking is pleasant to me." There they lived some years with much comfort, and had the blessing of marriage, divers children. After some three years he was met in Kent, on the road, by one of the tenants of the estate, and saluted by the name of landlord. "Alas," said he, "I am none of your landlords." "Yes, you are," said he: "I know more than you do of the settlement; your father, though a cunning lawyer, with all his wit could not alienate the estate from you, whom he had made joint purchaser: myself and some other tenants knew it, and have refused to pay any money to Dr. Reeves. I have sixteen pounds ready for you in my hands, which I will pay to your acquaintance, and that will serve you to wage law with them." He was amazed at this wonderful providence, received the money, sued for his estate, and in a term or two recovered it. "He that loath his life for my sake and the Gospel's shall find it."

J. W.

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 379.)

1795. Tenth Mo. 25th.—Attending Appoquage Meeting on First-day, it was so large the house was too small for the people; but too many of them seemed to be of a bad sort; yet they sat commendably for such a mixed number, and I was concerned to lay things close, and scarcely got relieved in the meeting. In the afternoon I had but little strength to hold up my head, believing this a poor place and the faithful number but few.

I went from hence to Oblong again, through a rough mountainous country. A Friend who was educated in the Presbyterian profession informed me that he was convinced of the Truth, on hearing some little children using the plain language of thee, to one another; and they appearing so lamb-like, he believed it was Truth's language. I thought from this instance, how much effect simple plainness hath, even when observable in children; and how much more if grown people and parents were properly concerned to live

up to the pure inward promptings of Truth!—We should then be teachers instead of stumbling-blocks to honest inquirers; and like the salt of the earth, the savor whereof would be perceived for miles around, in a neighborhood where it was retained.

28th.—I attended the Quarterly Meeting at Oblong. It was very large, and comfortable to my mind. Gospel Truths were declared to the tendering of many hearts. The next day, the youths' meeting was said to be the largest known in this place—a solid and favored season, I believe. The people sat quiet, although crowded; and I sat in silence, being comforted in Christ our Lord.

The day following, I travelled towards Nine Partners again (their Quarterly Meeting being near); and on the way stopped at the Ridge Meeting, held the 1st of Eleventh Month, which was very large, solemnity prevailing, though many had to stand up for want of seats. The day before, I stayed at a Friend's house, whose wife was in a weak state of health. She appeared to be of an innocent spirit, and expressed much satisfaction in the visit.

2nd.—This morning, considering how well I fared among my Friends, I feared the danger of forgetting the Lord, who had so remarkably favored and prepared my way. Let him have the praise of his own works, who is alone worthy, forever!

I had a solid opportunity with a naughty young man, the only son of his father; I entreated him to forsake evil company, and in so doing he would be likely to find comfort; otherwise he would not, either here or hereafter;—using much freedom with him, as one who resembled the prodigal son in the parable. He appeared to take it well, and said, he hoped he should not forget my advice.

3rd.—Being at the Select Quarterly Meeting at Nine Partners, I was led to mention my sense of there being no necessity for much school learning for a Gospel minister—that the knowledge of Latin, Greek and Hebrew, is more likely to hinder than to help a Gospel minister—Truth being a simple thing, not needing learned languages to explain it, etc.

The Quarterly Meeting for business, the next day, was very large; and I thought was favored with power from on high to labor for the good cause in a way that is uncommon. I felt my mind impressed with concern to sit with both men Friends and the women, first in one meeting and then in the other, whilst the business of reading the queries, and the answers to them, is attended to; which being mentioned, my request was united with by both men and women Friends. It was a season of favor, as I had an opportunity in both meetings to clear myself respecting the trust which I apprehended the Lord reposed in me, to the satisfaction of myself and my friends. Many hearts were tendered, and openly confessed;—so that we parted in near Love, a sense of which I hope will not soon be forgotten. Let the name of the Lord be blessed!

The day following was a public meeting at the same place, larger than the meeting-house could contain, in which a good degree of solidity prevailed; yet I thought the meeting was hurt by too much preaching. It is necessary a deep travail of spirit should take place, for the arising of that *Spirit and Life* which gives victory over lightness and airy dispositions—without which preaching is in vain.

6th.—Inclining now to go towards Hartford, in Connecticut, I travelled about twenty miles,

and in the afternoon had a meeting near Goshen, in a Baptist Meeting-house. It was remarked that the meeting was solid and quiet.

8th.—Coming to East Hartford, where a number dwell who by conviction have of late been joined to our Society, I attended their meeting on First-day forenoon; also in the afternoon, when notice was further spread; we had a large and favored meeting, but it was somewhat injured by the public appearance of one towards whom care was extended.

In the evening also;—we had the largest meeting ever seen at this place; and though the crowding of the people was some hindrance to its settlement in quietude, yet the seasoning virtue of Truth was perceived by many; inasmuch that near a hundred persons, after the meeting concluded, were loth to depart from the house. I felt my mind engaged in exercise on their account; but went to lie down, that I might rest a little. After they had conferred together, a solid young man came, and told me they desired another opportunity, as the evening meeting was so crowded. This proved to be a time of much favor. To show them that I was no impostor, I caused my certificate to be read near the close. This [meeting] lasted till near midnight—such a solemnity prevailed—that it seemed not easy to separate. I did believe the Truth came into dominion this evening. May the Lord be praised, who is alone worthy, saith you soul!

9th.—Feeling a draught in my mind to go and visit a clergyman named Perkins, in West Hartford, who had shown some bitterness towards Friends, and although some thought it was likely he would treat me with contempt, was most easy to go, being accompanied by two Friends: When we went to him, he treated us friendly beyond our expectation, saying he had attended at one meeting, and was well satisfied with what I said. I replied, if thou wouldst lay aside forms and ceremonies, I think we shall be likely to agree in the parts which are essential. He then said, he believed the Scriptures to be the only rule of faith and practice, and that revelation had ceased. I endeavored to open my sentiments to him in freedom. That the Scriptures appeared to be a sealed book and the true meaning of many parts not to be obtained, except through the assistance of the same Spirit which gave them forth. That the Divine principle of Light and Grace which we preach up, and testify unto, is that, which if attended to, brings to the knowledge of God. That the Spirit of Wisdom which inspired the penmen who wrote the Scriptures, is surely to be preferred before that which was written under its influence, etc.; although he said he believed in free grace, yet he continued to urge the Scriptures being the only rule. Other conversation followed, yet it appeared he was loth to yield to any sentiment differed from what he had been accustomed to endeavor to uphold, according to their creed. I let him know before I parted, that I thought he knew better than he spoke.

10th.—The next day, I had a meeting with Friends of Hartford by themselves, to my comfort and theirs. I saw there was great need of care in this place, as they are but newly converted, and their number small. They hold meetings under the care of Oblong Monthly Meeting, in the Government of New York.—This (viz: Hartford) appears to have been a dark place of formal professors of religion.

12th.—Leaving Hartford, and returning westward about forty miles, I had a solid and satisfactory meeting at Goshen; where some at-

tended that never had been at one of our meetings before; with one of whom I had solid conversation. She was in a tender state, and expressed herself not satisfied with their hiring teachers, believing they ought to work for something towards their own maintenance, without spending their time from week to week in an idle way, etc.

14th.—I went from hence to see a settlement of Indians at Scatecock, about thirty in number, with whom I had a meeting; and afterwards visited them in their families, in which I had satisfaction.

The next day I was at that called the Branch Meeting, being First-day, which was dull and exercising.

16th.—At the Monthly Meeting at Oblong, I also attended, and had a solid session both among men and women; many of the young people were present, to whom, as well as to parents and others, I endeavored to discharge myself honestly, reminding them of the Indians above mentioned, for whom I was concerned, as much of the land had been obtained from that people under value, and some of it very unfairly. That it was now right, kindness towards them should be remembered. Friends uniting with my concern, a committee was appointed to visit the Indians, and administer to their help, if needful. This day's exercise and labor yielded me comfort, and I believe tended to the glory of God. Blessed be his great Name: He is the helper of his people.

17th.—Travelling homewards about thirty miles, I had in the evening, at a Friend's house, some edifying conversation. I fear it is too often otherwise, and that the cause of Truth is, at times, hurt, and perhaps honest enquirers stumbled, and Friends weakened, when they come together, by light conversation on worldly or trifling subjects. Had a meeting at Robert Raudel's house, which was thought to be solid and comforting, as well as pretty large.

19th.—Next, at Ammawock, had a large meeting in the forenoon, which was exercising; and in the afternoon another, at Colebath. This was a comfortable, heart-tendering season, wherein many eyes dropped tears. Blessed be the name of the Lord, who helpeth.

20th.—I likewise had a pretty large meeting in the forenoon, at Shappiqua, where Life was not permitted to rise high; and another in the afternoon, at Isaac Quinby's, which was more satisfactory.

22nd.—Coming on to New York, I was on First-day, fore and afternoon, at meeting with my Friends there, which I thought were the most affecting meetings I had sat in for some time. It was near the close of a season of mortality, wherewith that city had been visited; which should have produced humility, turning people's minds from the pursuit of earthly riches to that treasure which is durable. But, to my grief, I was afraid the inhabitants (when the rod was withdrawn), too many, were turning, like the sow, to that of wallowing in the mire again.

23rd.—Next day, I visited a few families in the city, and had close conversation with a formalist, whose eyes, I thought, were blinded by the god of this world. I told him, in substance, nearly on this wise, that it grieved me to think that while a remnant were trying to prevail with young people and others to come into the practice of more plainness and true moderation, consistent with the simplicity of our profession, consistent with the simplicity of our profession, should those in high station for worldly interest, should those be keeping and holding up articles and things

for sale as a temptation to others to branch out in purchasing, to deck themselves with superfluities, etc.

26th.—In about three days after this time, I reached to my own habitation again, after a journey which took up near eight months; and in which I had to travel about 4,000 miles; and have now cause to praise and magnify the name of the Lord, who in a marvellous manner prepared my way and carried me through; and now vouchsafeth the sense of a reward which is sufficient for all my trials and labors. That of finding my wife and near connexions alive and in pretty good health, was esteemed by me an additional cause for humble thanksgiving.

(To be continued.)

For "THE FRIEND."

In the Swamps.

Business rather than pleasure required us to wend our way through the woods along a railroad during the middle of Fifth Month.

The day was a fine one, and flowers plentiful, so we eagerly availed ourselves of the opportunity to combine pleasure and business.

The first part of our way led through a grassy expanse, from which the trees had been cut. Nature had liberally adorned this otherwise unattractive spot with numerous spikes of white flowers, among which I noticed the *aletris farinosa*, or star grass. *Aletris*, from the Greek, means a female slave that grinds corn; thus referring to the mealy appearance of the tiny star-like blossoms.

An orchid, *spiranthes gracilis*, ladies' tresses, whose flowers viewed near seem as if sparkling with dew, might, by its general appearance, be easily taken for the star-grass, if scanned from a distance. Another orchid, larger and lovelier than this, was the *catopogon pulchellus*, with delicate pink flowers of peculiar shape. I also noticed a smaller specimen of *catopogon*, almost white, which I think must be a distinct species. The name comes from a Greek word, meaning a beautiful beard; this refers to the bearded lip of the flower.

Soon we were in the woods, filling our hands with trophies of our walk, but still mindful to leave enough flowers behind us for seed for the following years.

The blossoms of the low blueberry *vacinium racillans* (called hereabouts, large huckle-berry), were nearly gone; as was also the beautiful *azalia nudiflora*, falsely named honey-suckle.

We were familiar with every step of the two or three miles we had to travel. Before us, on either side, stretch'd forests almost unlimited, it seemed, with a dense undergrowth of bushes—huckleberry, gall-berry, clethra, and many others. What hidden possibilities in the shape of wild animals and reptiles the depths concealed, we neither knew nor cared to know.

The *andromeda ligustrina*, and the *tea virginica* we found in the thickly wooded parts. There was also an evergreen shrub with pink blossoms, varying from bell-shaped to cylinder-shaped, and crowded into a one-sided spike. The perfume from this was almost overpoweringly sweet; but its name I could not discover, though I spent some time in studying the structure of the wax-like blossoms. It is probably one of the Ericaceae.

Another flower, a little yellow orchis which grows in the water, refused to be classified with the flowers of the Northern States.

Near our journey's end, we had to pass through dense swamps. At one side of our road the water flowed sluggishly onward, and from

its green, slimy depths, numerous water-lilies—the well-known *nymphea colorata*—sprang to deck it with verdure and to gladden the eye of the passer-by; were he but on the alert to discover nature's beauties. Here we found the delicate and pink-tinted orchid, *pogonia ophioglossoides*. The larger *pogonia divaricata* we had passed in the grass behind us.

There are not many flowers in the shades beyond, for the sunshine never rests there; the green branches overhead shut out all but a glimpse of sky; and beneath, though flowers are lacking, numerous ferns and lovely mosses spring up in the moist verdure and fill the air with a woody odor. Perhaps the pestilent may suggest—miasma, malaria, and their attendant evils, chills and fever; but having lived long in this neighborhood, and having had no personal experience with such unpleasant diseases, I prefer to dwell on the brighter side. Not on the innumerable obnoxious insects, not on the snakes or the bears which occasionally carry away a pig, or which, more rarely, frighten the poor wayfarer nearly out of his wits; oh, no: I would close my eyes, if possible, to these disagreeable features, and open them to Nature's all-pervading beauty, her oft told but ever new powers to soothe.

Into these swamps several wooden tramways penetrate, on which the lumber from the interior is hauled to the railway by means of mules and trucks. One recently made runs through the swamps for about two or three miles, and on it nearly a year ago, I had an opportunity of observing something of the life of the "swampers," as the men are called who hew and remove the timber. The "boss," a white man, kindly gave us a ride into the woods on an empty returning truck. There in the dense swamps the men cook, sleep, and work day after day, till First-day releases them, for the day after their labor. Their mode of living is very primitive. The shanties they sleep in are simple in structure—open to the south, and roofed and sided with bark from the cedar trees—and just large enough to allow one or two men to lie comfortably, or otherwise, side by side. The roof slants downwards towards the north; at the south side the fire burns, and the men stretch themselves with their feet towards the blaze. Some of the cabins are formed on a different plan. An enclosure, large enough for three or four men to turn around in, is roofed over at one end, and at the other the fire is built. A small hole in the side answers the purpose of a door.

The cooking, too, is exceedingly simple.—While we were there one colored man (these were all colored) was cooking corn bread for his dinner, the dough being merely corn meal, water and salt. This he put in a frying pan, the handle of which was pushed straight into the ground, so that the cake was almost perpendicular in front of the fire. A large dog near by was licking one of the pans; this, the "boss" said, was probably the only cleansing it would receive!

In spite of their many disadvantages, these sons of toil seemed quite contented and happy, making the woods ring with their shouts. All around us, trees were falling, and the sound of the axe was heard on all sides.

But I have wandered far from what was intended to be merely an account of one short walk.

On our return journey, we gathered some of the last blossoms of the sheep lark, *kalnia angustifolia*, sometimes called lamb-kill, from the belief that it is poisonous to lambs.

The partridge-berry, *mitchella repens*, we discovered beneath the bushes, with its lovely almond-scented flowers, which grow in pairs, the two seed vessels being united into one.

So, with our mission accomplished, and with pleasure as well as profit gained, we turned our steps homeward.

NORTH CAROLINA, Sixth Month.

Alaska Indians.

During the summer of 1889, Isabel S. Shepard obtained permission to accompany her husband who was in command of a U. S. Revenue steamer to the Aleutian Islands, where the vessel was ordered, to prevent the killing of fur seals by unauthorized parties. She has written an account of her observations and experiences. In speaking of the Alaska Indians, she says:—

"The fondness the Alutes have for raw fish is ineradicable. They are not an intelligent race, and the quantity they eat of this article disproves the theory that 'fish makes brains.' The flesh and blubber of the seal, sea-otter, and parts of whales are bread and meat to them. They are epicures, preferring the flesh when 'gamey.' They also eat the sea-urchin and other shell-fish, as we do our raw oysters. The octopus, or devil fish, is considered a great delicacy; certain parts only are eaten. Jelly-fish are in demand, perhaps for desert.

"The Alutes are fond of fat of any kind, and greedily devour candles. Our chief engineer told me he knew an Indian to drink the lard-oil used about the machinery in the engine room. This fondness for fat is universal among the tribes of Alaska, including the Eskimos.

"Even after living some time among white people, they will return to their old habits. The following incident was told me by a lady, who lived on one of the Aleutian Islands for several months: 'A white man had a native wife, who became a very good cook under his instructions, for he was a man of cultivated taste, having known plenty. She would cook his meals and set the table nicely with cloth and dishes of various kinds. However, she could not be induced to sit at table and eat with him, but would wait till he was through and had gone away; then calling her friends, they would seat themselves on the floor, rejecting the well-cooked viands, and munch raw salmon with the greatest satisfaction.' They retain these tastes all through life. Eating raw fish is a custom of other more southern islands of the Pacific. A similar incident was related to me of a woman who was a native of the Sandwich Islands."

"During the rule of the Russians, the natives were utterly cowed and subdued. They scarce dared to look into their masters' faces when addressed—the lash was kept in such constant use. On the transfer of Alaska to the Americans, the Indians, little understanding their happy reverse, continued for some time to deport themselves in the old way to their new masters. Mr. D— told me, that twenty years ago, on visiting any of the islands, he was received with more deference and servility than if he had been an admiral. Emulating the example of Sir Walter Raleigh, they would spread their garments or whatever was at hand over the mud, that he might walk over it dry shod. Or, again, he would be lifted on their shoulders, and in this triumphant manner be carried long distances. It was not many years, however, before they realized their independence. Now the motto is with them, as everywhere else through-

out our broad land, 'Liberty, equality, fraternity.'

"The old chief of the Onalaska tribe is a pensioner of the company, and in remembrance of his past services they are all very kind to him. The old fellow often speaks of the good times now, as compared with the 'Russian time,' as he calls it, and shakes his head as if wishing to cast out some unpleasant remembrance of days gone by. He seldom becomes confidential except when under the influence of a goodly allowance of 'quass,' when he will tell how one of the agents of the olden time used to hold him accountable for the good conduct of the other employes of the company, and would take him to the 'big house' and whip him when any of them neglected their work.

"The event of his life, however, was a visit to San Francisco. On his return, he described the cable cars as being propelled by horses underneath the ground. He was ever after of much more importance in the eyes of his tribe.

"I will relate here an anecdote from the 'Thinker tribe.' Another Indian killed a white man, for which he was taken to Sitka, tried, found guilty and sent to San Quentin, a States' prison, near San Francisco, for two years. On his return he expatiated, for the benefit of his brother Indians, on the wonders he had seen. Whereupon, one of the Indians, seeking similar fame and wanting to see the world, attempted to kill another white man. He was prevented, however, and on inquiring of him what 'he wanted to kill him for,' he replied: 'He wanted to go to San Quentin, too.'"

FOR "THE FRIEND."

COME TO THE SEASONS' FEAST.

"For me when I forget the darling theme,
Whether the Blossoms bloom, the Summer-rays
Russets the plain, inspiring Autumn gleams,
Or Winter rises in the blackening east,
Be my tongue mute, my fancy paint no more
And dead to joy forget my heart to bore."

—Thomson.

"Even now my eyes with smiles of rapture glow,
As I wander through the scenes of morn,
Where the fresh flowers in living lustre bloom,
Where thousand pearls the dewy lawns adorn,
A thousand notes of joy in every breeze is borne."

—Beattie.

Hail! tho' balmy breath of morning,

Stealing in thy starry flight

Through a misty maze of blossoms,

And the crystal dew of night;

Freshness from the fields of clover,

Fragrance from each blooming flower,

From ambrosial woodbine arbor,

Luscious grove and grape-vine bower.

Yes, that court unneeded stumber

In your chamber's fetid air;

Come with me and try the savor

Of a morning pure and clear;

Come with me and join the chorus

Floating round where e'er we rove;

Ever auspicious breath vibrating—

Vocal with the voice of love.

Lungs long fed on dusty ration

Can enjoy the odoriferous breeze;

Filtered in the finest fashion

Through the grain-fields, grass and trees.

Standing 'neath the broad celestial

Boundless arch of nature's dome,

Bow to hear the deep orchestral

Waves of living music come

From ten thousand differing voices

Detached in one harmonious choir,

As the soul of song rejoices.

On the chords of nature's lyre.

All ye comrades mute or vocal,

Each in his peculiar sphere,

Come and join in high hosanna

To the Ruler of the year.

C. S. COPE.

WEST CHESTER, Fifth Mo. 27th, 1890.

FOR "THE FRIEND."
LESSONS OF AFFLICTION.

ISAIAH XXX, 29, 31.

Loved ones, who trod the ways of life beside us,
At the dear Master's call, are gathered home,
The "shadowed valley," which doth now divide us
Thro' our yearning love, seems narrower grown.

The home eternal draws a little nearer,
Its golden portals, faith beholds ajar;
And longing hearts regard with vision clearer
The joys of Heaven, where their dear ones are.

When faithful watchmen cease, men cry in pity
O'er Zion's feeble hosts, which here remain,
Forgetting—"tis for the Lord, that keeps the city,"
Sustaining Grace for these, is just the same.

He sees, beyond our narrow human living,
Knows every heart, what best will help to save
A faithful life, here faithful service giving,
Or garnered sheaves, and here, a new made grave.

To spoken truths, we sometimes list unheeding:—
When lips that spoke them lie so still and cold,
On memory's page, they have more faithful reading,
We come to prize what was so kindly told.

"Men see not now the bright light which is shining
Within the clouds." They hang so dark and low
That feeble faith notes not their golden lining,
But stronger grows, hereafter, each shall know.

God's ways we may not doubt. More trustful feeling
Closes close his hand, lest we should find reproach:
At Marah's fount, await his branch of healing
In Achor's Vale, the opening door of hope.

In his own time, shall come complete revealing,
Each child his wisdom then shall clearly know,
And praise Him most, and call most tender deaing
E'en what we often thought severe below.

He would not have us bowed with grief o'er evening,
But asked to learn each lesson He has set,
And to our lives apply their holier meaning:
More fruitful eternal, seek to bear Him yet.

More watchful be:—Upon his errands running,
Or, if He bid, wait humbly at his side,—
Then brighter far, will be our own re-coming,
That glad reunion with our glorified. Y. N. T.

Fourth Month, 1890.

FOR "THE FRIEND."
THE DAILY CROSS.

Each day as it comes brings a trial or loss,
Which must be endured, or where is the need
Of being exhorted to take up the cross
And daily to watch and give earnest heed?

Adam and Eve, they failed in the trial,
Which all have to have, and all must endure,
And walk in the path of true self-denial,
Until we are purged and made inwardly pure.

For we must abide the day of his coming
When He comes as a refiner and fuller with soap,
And remain in the fire which burns as an oven,
Before we receive the fruits of our hope.

So blessed is he that endureth temptation,
For when he is tried he will surely receive
A crown of rejoicing, of life and salvation,
Which God in his goodness and mercy will give.

But while we are here, we shall have tribulation,
But Christ overcome, so be of good cheer,
If our trust is in Him we shall have preservation
And a crown of glory, when He shall appear. D. H.

Third Mo. 8th, 1890.

As the devil spurned against the Light, and is cast out of the Light and is reserved under chains of darkness eternally; even so do they that are his, who kick against the Light of Jesus Christ in the conscience, which convinceth of sin and evil; who will not have this man to reign over them; who love the darkness rather than the light, because their deeds are evil; endeavoring to blind the eyes of others, to the end that the Light of the Gospel of the glory of Christ should not shine unto them.—G. Foz.

FOR "THE FRIEND."

A Visit to New England Yearly Meeting, held at Westerly, Rhode Island.

Having felt a desire to visit this company of Friends for some time past, the right time to do so seemed to open, and on Seventh-day the 14th of Sixth Month, we left our home and reached Westerly at about 5 p. m. Here we were met by kind friends, who conveyed us to their spacious and old-fashioned farm house, where a cordial welcome awaited us. For the week of the Yearly Meeting, this was our home; and as fellow guests we found a large company of Friends—aged, middle-aged and children. Among these were not a few who gave evidence that they were not strangers to the restraints of the cross. But while our home was with these Friends, others were solicitous of our company at their houses, and we found ourselves daily recipients of hospitality from our dear friends of Westerly and its neighborhood.

The Yearly Meeting commenced its sessions with two meetings for worship on First-day. That in the morning was attended by about seventy—in the afternoon, by between eighty and ninety. The Gospel was preached on both occasions, and the Throne of Grace supplicated. A covering of solemnity was felt to our comfort.

Meetings for business commenced on Second-day; two sessions being held. The queries are ten in number, eight of them similar to those we answer in the Second Month Quarterly Meetings. We observed that one of our queries, which embraces several subjects, is still more amplified in theirs, and no doubt ours was originally identical therewith. Some exceptions in the answers were occasion of exercise to concerned Friends.

Epistles were read from the Conservative Yearly Meetings with which New England corresponds, including one of much weight from Canada, in reply to that sent a year ago, for the first time. A letter from a concerned Friend of another Yearly Meeting, was also read to satisfaction.

A concern was introduced to issue an epistle to all Friends in New England and elsewhere, who in sincerity believe in the principles of Fox, Barclay, Penn and Pennington; and an essay approved by the Committee on Epistles was referred to the Meeting for Sufferings for its action.

A proposition for the appointment of a Book and Tract Committee was favorably considered, and a joint committee of men and women was appointed to produce a future sitting the names of suitable Friends to compose it. This committee subsequently reported the names of eight men and nine women Friends, who were approved and appointed to the service. They represent the four States of Massachusetts, Rhode Island, Connecticut and Florida.

A new nomination of members of the Meeting for Sufferings was made, upon which women have been placed for several years, to good satisfaction.

The closing session of the business meeting was held on Third-day afternoon. At this time replies were read and adopted to the epistles received on Second-day. They seemed savory and suitable; that to Western Yearly Meeting was especially touching.

On Fourth-day morning a meeting for worship, appointed to be held by the Yearly Meeting, was well attended, and at its conclusion, Friends separated to return to their several homes.

The impression left upon our minds in our in-

is that their situation calls for the sympathy of all who value our religious principles and testimonies. Because their number is small, is no proper reason that this sympathy should be withheld; but on the contrary that it should be given. For twenty years they were cut off from all bodies of organized Friends, and few individuals came to sit with them. But they "kept the faith," and have been preserved from the agitations of the other and more progressive body, respecting singing in meeting, a paid ministry and the outward ordinances, so-called. This year two of the members of the larger meeting, were accorded the privilege of attending their Meetings for Discipline—a courtesy of which we were glad. The coming together of those who are disaffected with the departures from true Quakerism in their several localities, must tend to bring them closer together. May this disposition be cherished in New England and elsewhere, so that there may be a reunion on the right foundation, of all believers in our primitive principles.

Our visit has left a pleasant feeling in our minds. Iron sharpeneth iron; the social and religious mingling with those of the same faith, is mutually strengthening and encouraging. May the blessing of preservation be vouchsafed to all those with whom we were permitted to associate. May they be faithful to our profession, and thus be as lights to others, who seeing their good works, may glorify our Father who is in heaven.

E. M.

Memorial of the Monthly Meetings of Philadelphia Relative to the Visitation of Yellow Fever in 1793.

Among the many calls and warnings from one time to another, extended to the inhabitants of this city by the Almighty Creator and Ruler of the Universe, in order to draw the attention of the people to himself, and awaken them to diligence in the momentous work of their soul's salvation, may with great propriety be kept in remembrance the late awful visitation by a pestilential disease which hath carried off the stage of time many of our friends and fellow citizens; and we judge it expedient to preserve some account thereof on record, that so future generations may be informed and led to commemorate the judgments and mercies which have been manifested towards us, more especially as there were included among the many who have been summoned from time to eternity in and near this city, a considerable number of our brethren and sisters whom we loved and esteemed for the uprightness and innocency of their lives, and their labors in the cause of truth and righteousness; those as well as the pious and religious of other denominations we hope are removed from the perils and dangers of this probationary state to a place of rest and peace in the heavenly kingdom.

The sickness made its first appearance about the beginning of the Eighth Month, last year. Opinions are various as to the manner of its introduction, whether it was brought from abroad or originated in this city; this enquiry may not appear material to such who have been enabled to look to the great First cause. "Shall there be evil in a city and the Lord hath not done it," saith the prophet. These were led to believe it was the Divine hand, put forth for the humiliation of the people, who in times of ease and prosperity had too much forgotten the great Author of their blessings, and departed in heart and

For the progress and nature of the disease was such, as to confound the researches of human wisdom, making its advances against the skill of the physician and the power of medicine, carrying off numbers of various ranks and ages, notwithstanding all endeavors for their help.

That the disorder was pestilential and contagious there was no reason to doubt, as several families were mostly removed by it, the infection spreading from house to house; and, by reason of the dread and terror which accompanied it, necessary assistance could scarcely be procured for many of the sufferers. It increased gradually through the Eighth and Ninth months, till near the middle of the Tenth Month, when it appeared to be at the height, about one hundred dying of a day for several days. Many of the inhabitants had removed out of the city, a few of whom deceased, but in general the disorder spread but little in country places.

Truly awful and afflicting was the situation of those who remained in the city. Owing to various causes very little intercourse was had between the families of the sick or others, so that needful assistance was hardly attainable. The infected were in some instances almost deserted in their departing moments, even by their nearest relatives, and interments were hurried in an unusual manner for prudential motives.

Business of most kinds was much suspended. These and other reasons not easy to be enumerated, concurred to render the calamity distressing beyond expression, and had a tendency to humble the loftiest minds, inasmuch as there seemed no security for any from present danger. Notwithstanding what is before mentioned as to the deficiency in attention to the infected in general, there were many instances wherein the force of friendship and filial and paternal love prevailed over every discouragement, and the assistance and sympathy which Christian charity demands were afforded; in some of which cases preservation was eminently experienced; divers of those who deceased were remarkably favored in their solemn closing moments with calmness and humble resignation to the Divine will, to the comfort of beholders.

The Yearly Meeting was held at the usual time, and attended by a number of Friends from various parts of the country, and was a time of solid instruction. Our several religious meetings were regularly maintained by a small number of Friends, and were often solemn, heart-searching opportunities. The different Monthly Meetings appointed committees to enquire into and extend relief to those in distress and necessity. Our brethren in New York also liberally contributed on this affecting occasion, donations were likewise received from some of our country meetings.

As this trying dispensation was permitted by Almighty power, so his gracious interposition was evidently conspicuous in the abatement of it when human means proved ineffectual: as in the case of Israel in the time of David, the Divine command went forth to the destroying angel, "It is enough, stay now thy hand," so we humbly trust that He who still delights in mercy graciously interposed for our deliverance, in this day of our affliction.

Towards the end of the Tenth Month, the disorder had considerably abated; in the forefront of the Eleventh Month it subsided, and in the course of the said month and that following, the inhabitants who had removed, mostly returned to their dwellings, many of them, together with those who had remained at their homes,

Lord's doing, and marvellous in the eyes of the people in general.

During the continuance of the sickness, great exertions were made by a public committee for the relief and burial of the poor and destitute. An hospital being provided at Bush Hill, near the city, where a great number were taken care of and supplied with medical aid, several citizens hazarded their lives from benevolent motives for the help and benefit of the infected; very considerable sums of money were given by our citizens and other charitably disposed persons in the neighboring governments, for the humane purpose of relieving the distresses of their fellow creatures.

When the disorder first made its appearance, the city and suburbs were supposed to contain about fifty thousand inhabitants; it is thought one-third or more removed into the country. Upwards of four thousand deceased, and a very considerable proportion of those remaining in town were more or less afflicted with the disorder but recovered, so that the effects of this awful visitation were generally experienced in most families, either by the disease or sickness of some of them, their relations or near friends.

Upon the whole it is our duty to acknowledge that great mercy evidently accompanied this sore judgment, which demands reverent thankfulness from us, both as individuals and as a Society to the Almighty preserver of men, to whom belongs power and glory forever.

PHILADELPHIA, 20th of First Month, 1794.

FOR "THE FRIEND."

Fungus on the Ash Tree.

A Friend in Chester County, Pa., sent to us some leaves of the ash tree, which had been attacked by an orange-colored fungus. He says, some of the ashes in his neighborhood have been entirely stripped of their leaves by this pest.

J. B. Ellis, of Newfield, N. J., who is a reliable authority on such matters, says that this fungus is not an uncommon species, and that its name is *Zedidum Frazini*.

On placing an infected portion of the leaf under the microscope, there are shown a multitude of minute, orange-colored, round grains, connected together by fine threads. These are the spores which, in the fungi, take the place of seeds in the higher plants. They differ from seeds in being simply cells, which have the power of growth in favorable circumstances. True seeds are more complex in their organization, containing germs which develop and form the new plants.

Lindley says the genus *Zedidum* comprises a large number of parasites which grow upon the living parts of plants. The reproductive organs or spores are nearly globose, arranged in little necklaces, which radiate from a thin cellular base; and, as they easily break off, form a little dust-like heap, which is white, yellow, orange, etc., according to the species. They grow on the leaves, petioles, fruit, or young shoots; sometimes producing but little constitutional derangement, but occasionally causing the adjacent parts to swell, or producing great distortion. Where the plant is only partially affected, the general health is not much impaired, but where the parasite is very vigorous, death may ultimately ensue.

Since receiving those ash leaves, we met with a similar looking fungus on the leaves of one of the wild blackberries—bright orange-colored patches overspreading the leaves. On handling them, a fine orange-colored powder was sepa-

rated from the leaf; and under the microscope this was seen to be composed of minute spores connected by fine threads—as in the ash fungus. This fungus is not uncommon, and we have frequently met with it during the past spring and early summer.

J. W.

FOR "THE FRIEND."

Either for or Against the Truth.

"He that is not with me is against me; and he that gathereth not with me scattereth abroad." This is in accordance with our Lord's teaching. He taught that "Every scribe which is instructed unto the Kingdom of Heaven, is like unto an Householder which bringeth forth out of his treasury things new and old." There are many Religions; and many Religionists in the world, who, by their example are not gathering unto Christ. Minds awakened by the Holy Spirit inquire, "Who will show us any good? Unless these inquiries are rightly directed they tend not to profit. But when seeking unto the Lord for right direction—praying in spirit, "Lord lift thou up the Light of thy countenance upon me"—the believer may take courage in believing that the Lord hath undertaken to rescue such from the pit of destruction, from which fallen nature, if left to itself, fails to find deliverance. It is not safe to stand on neutral ground, indifferent to the issues of Life which are in the Divine Hand. The cause of Christ, which embraces the welfare of immortal souls, demands earnest inquiry after that which is good. But, touching this matter great caution should be observed, lest, being deceived, the wrong way instead of the right be chosen, when, under cover of Religion great harm may be done by the substitution of a spurious faith and a spurious zeal, which, being purely at work betrays the innocent Life wherever found.

The Society of Friends as a Religious Organization makes profession of Spiritual-mindedness beyond that of other Religious Bodies. With this profession a serious mistake may be made, by taking the emotional feelings for the moving of God's Holy Spirit. The human mind may be compared to a floating island, carried forward, subject to both wind and tide; therefore liable to dangers of some kind. "The High and Lofty One who inhabiteth Eternity and whose name is holy—hath declared—I dwell also with the humble in spirit to reveal the hearts of the humble and contrite ones." Blessed be his name! He reveals himself by his Spirit to the humble in heart—they worship and adore Him in tenderness of Spirit—having respect to the commandment which is pure, enlightening the eyes—Eyes to see where is the Boundary Line between Truth and Error—between the voice of God speaking in the conscience and the voice which belongs to the imagination, producing emotional feelings, which may induce Ministers to say—"Thus saith the Lord," when albeit He hath not spoken. Thus false ministers are found sowing false seed, which scattereth from Christ. "To be carnally minded is death—but to be spiritually minded is life and peace." Scriptural Truth, when rightly interpreted "is profitable for doctrine, for reproof and for instruction in Righteousness that the man of God may be perfectly thoroughly furnished unto all good works."

P. R. GIFFORD.

PROVIDENCE, Sixth Month 19, '90.

Natural History, Science, etc.

An Australian Spider.—Another spider (*Lathrodectus scabellus*), which is very common here and every where in Queensland, is very dangerous

even to men. It is a small black animal, of the size of our house-spider, with a brilliant scarlet mark on its back. A friend of mine was bitten in the leg by one of these dangerous spiders, which is feared like a snake. The pain was violent, and was followed by paralysis, which lasted for three days. He was able to feel the venom work its way up the leg, pass through the bowels, and descend down the other leg, whereupon it ascended to the breast. But on the third day he had a cold perspiration and recovered.—*Luntholl's Travels in Australia.*

Sagacity of a Mule.—There was a mule at Ounga, which at first nearly frightened the natives to death. It was used at a mine near by. After they found out it was nothing supernatural, they lost some of their awe, at least enough to employ themselves hitting it, and throwing things at it, whereas at first they had run from it in fear and trembling. After a while the sagacious beast seemed to realize the dread it inspired and began to chase its tormentors the moment they appeared in sight, which soon had the desired effect, and it was allowed to roam in peace. Its acuteness in distinguishing an Aleute from a white man was remarkable. With his white owners he was the most docile animal in the world.—"The Cruise of the *Rush*."

The Distribution of Plants.—The influence of animals, and especially of birds and of man, has been very great in the distribution of plants. In the case of the human agency, it has been sometimes deliberate and intentional, but probably quite as often accidental. It will be remembered, probably, how the weeping-willow was thus accidentally introduced into England, a small cutting, found in a box of Turkey figs, being planted, and becoming the parent of all its numerous successors, and there are now no less than two hundred and twenty plants which have been casually introduced into the United States from foreign countries, and chiefly from England. The introduction of the thistle into Australia is another example, as we may probably doubt the commonly accepted story that some enthusiastic Scot deliberately introduced it. A chance thistle seed or two clinging to the old plaid, or floating into some package while the packing at the old home was going on, would be quite sufficient to account for its abundant and unwelcome presence in the new home at the Antipodes.

A curious little incident bearing upon this involuntary distribution came within our own observation. A plant common enough in South Europe, and occurring on chalky soils here and there in England, but absolutely unknown in our own district, came up in one of our garden-beds. We had never till then seen it growing. How could it possibly have got there puzzled us, until we presently remembered that we had the year before had a quantity of flower-seeds from a man a hundred and fifty miles or so away, and this wilding had doubtless come amongst them.

A neighbor of botanical tastes expressed a great wish to have it for his choice collection of dried plants, as it was an altogether new locality for it to be found in England. On our return, the plant was missing; we had omitted to tell our gardener to spare it, and the ruthless hoe had evidently been at work. Knowing where all such *debris* would be put, we turned the heap over, and presently found our plant in two portions. We at once bore it off to the collector, to his great delight. As he had occasion to go out suddenly, he placed it on the mantel-piece. On his return, he found that a similar attack of neatness had seized his domestic, and this time

no after-searching restored it to the sorrowing owner. Thus did an adverse fate contend with us, thus did our choice plant, the delight of two lovers of natural history, suffer at the hands of these two scrupulously neat people, first decapitation, and then annihilation.—*Hulme's Wayside Sketches.*

Items.

London Yearly Meeting.—At the Meeting on Ministry and Oversight, Mary Elizabeth Beck laid before it a proposition to reside for some months in Philadelphia Yearly Meeting and the City of Philadelphia, not with the definite purpose of holding special meetings, but to engage in any service in which way might open to the Lord's guidance.

Isaac Sharp proposed to make another circuit of the globe, visiting Friends in the South of France, Constantinople, Syria, India and Japan; and then, if life and health permitted, to undertake such service as might open before him whilst crossing the American Continent on his return. As I. Sharp is not a member of the Society, his views were expressed as to the propriety of his undertaking so extensive a journey. But both he and M. E. Beck were liberated.

The general Yearly Meeting opened on Fifth Mo. 21st. After the epistle from Iowa Yearly Meeting (the larger body) had been read, uneasiness was expressed with the continuance of correspondence with a body which supported a paid ministry.

Information was given that there were 800 members scattered through Australasia, and it was concluded to address an epistle to them.

A petition to Parliament was agreed upon, protesting against the proposition to make compensation to publicans, whose licenses were not renewed.

The number of members were reported to be 15,386, an increase of 261 during the year.

Henry S. Newman was called upon to give some account of his travels in America. In the course of his remarks on the different Yearly Meetings in this country, he said that when he went to Philadelphia Yearly Meeting, he remembered the counsel "Be swift to hear and slow to speak." "As he sat down," he said, "he felt as if he were under a deep instruction. It was like holy ground, and he enjoyed it much. There was a blessing on that Yearly Meeting to-day, and he did not want any Friends, however Progressive, to suppose that Philadelphia Yearly Meeting was dead or dying."

A proposition from Kansas Yearly Meeting to organize a united meeting of Friends throughout the world, as a delegate body, with ultimate authority of appeal on all matters of faith and practice, was not adopted.

A proposal to appoint a committee to visit the subordinate meetings did not prevail.

At different times several Friends were liberated to visit the Women's Meeting, among them Samuel H. Smith, who was appointed on a visit to be received from a woman Friend, Caroline F. Stephen, who was under a concern that some meetings should be held in the west end of London, where the wealthier part of the community reside. In opening this matter she referred to her own experience before she became a member, and she believed there were many now who felt the same spiritual needs that she herself felt, and who might be helped if she had been by Friends' Meetings. She called upon Friends to consider whether the spirit of worship was so alive within them, that they were holding up a pure testimony to the true worship which was made known to us.

Temperance, Peace, Capital Punishment, Education, and Foreign Missions, the anti-pium-traffic and Slave-trade, were among the subjects which claimed the attention of the meeting.

A suggestion to make an effort to recommence correspondence with Philadelphia Yearly Meeting, was united with by several, but others doubted the wisdom of such a step at the present time—and the Clerk declared that there was not the requisite unanimity which should prevail in taking so important a step.

Gambling.—The *Presbyterian* publishes the following notice of an effort to check the practice of gambling on the continent of Europe.

"Geneva is awakening to the enormity of the plague of gambling, which has so long reigned in this cosmopolitan city. A recent dispatch states that its authorities have succeeded in closing all establishments of this kind. This the first practical demonstration of the moral force which is being enlisted in Europe against gambling houses. Twenty years ago Germany led in a move to close them and succeed. In 1836, the Convention of Baden-Baden, the Kursaal at Hanburg, and other noted resorts of a like character. It was then thought that the impulse given to so worthy an object would result in the entire removal of these pests from European cities. But instead the vile resorts were merely transferred from one place to another. M. Blanc, who had managed the games at Baden-Baden, started the anti-gambling attractions and security in the principality of Monaco at Monte Carlo, which now enjoys the unenviable reputation of having the most famous and successful gambling casino in the world. Hopes were entertained last November upon the death of Charles, the blind Prince of Monaco, and upon the reversion of the Monte Carlo property to Prince Albert, that this den of iniquity would be abolished. The reasons for this expectation were, first, that he was a man of letters, and held in repute for honesty of character and purpose; and, second, that he had married a most refined and charming woman, the Duchess Richelieu. But neither his scholarship and reputed honesty, nor the influence of a noble womanhood, have brought about the anticipated great attractions 'roulette' in his realm. Some have sought to make some allowance for his failure to act in the matter upon the existence of a contract which guaranteed to M. Blanc and his heirs the use of the casino until the year 1913, but this excuse is offset by the consideration that by the provisions of the civil code the acts which are 'upon immoral causes are not validly binding.' He does nothing and allows of the same and voidly paying concern to go on, to his pecuniary profit, and that of all connected with it. Such has been its profitability, that efforts have been lately inaugurated to open similar casinos in other centres of Europe, and even beyond its limits in places like Cairo and Tangiers. It is these schemes to extend the evil which has no more and conscience of those in authority and of the leaders in moral reforms. It is pleasant to see in this Geneva action the initial blow in a crusade upon the gambling hells of the Continent. It is to be hoped that it will not be a mere spasmodic affair, but that it will be followed up until all these cursed institutions are driven out of Europe."

THE FRIEND.

SEVENTH MONTH 5, 1880.

Among the pamphlets which have been recently received, is one bearing the title "Which? One Church or Many?" published at Minneapolis. It is a plea for church unity. It commences with a reference to the prayer of our Lord, that those who believe in Him may be one, "that the world may believe that Thou hast sent me." While this oneness may be spiritual and internal, yet the author thinks there should be some outward manifestation of it, so that the world may be enabled to see and believe.

To show that such a unity existed in the early Christian Church, he quotes from Irenaeus, who lived in the second century, who, after reciting a statement of doctrinal belief, adds: "The Church having received this faith and doctrine, although dispersed through the whole world, diligently preserves it, as though she inhabited but one house, and accordingly she believes these things as though she had but one soul and one heart, and constantly preaches and teaches these things as though she had but one mouth; for, although there are various languages in the world, yet the doctrine is one and the same, so

that the churches in Germany, France, Asia, Egypt or Libya, have not a different faith."

This quotation from Irenaeus reminds one of the remark made respecting the early members of our Society—that from whatever part of the world they came, they all spoke the same language. This uniformity was doubtless owing to the fact that all had the same Teacher—the Spirit of Christ—to the manifestations of whose early Friends directed the attention of all people, as that which most drew into all truth.

There is not and never has been but one real religion in the world, and that is the experience of the Divine Power, changing man from his fallen condition, and leading him to holiness of life and purity of thought. All who have passed through this experience, thereby are made members of the one true, catholic Church; and are in fellowship one with another, although they may differ in their merely intellectual conceptions of doctrine. As Isaac Pennington expresses it—"This is the thing—to feel Christ my root, my life, my foundation; and my soul ingrafted into Him, by Him who hath power to ingraft. To feel repentance given me by Him; faith given me by Him; the Father revealed and made known to me by Him, by the pure shinnings of his Light in my heart; And then to come out of darkness, out of the sin, out of the pollutions of the spirit of this world, into the pure, holy fellowship of the living, by his holy guidance and conduct."

Those who thus "walk in the light," cannot but have fellowship with all those who have the same blessed experience—even although they may be separated by denominational differences or other outward barriers.

Differences in ritual and ceremonies and other outward matters, are among the most fruitful sources of controversy among Christian professors. In proportion as the members become spiritually-minded, and learn to look directly to Christ in them, changing them from darkness to light, and from the power of satan to God, as essential to their salvation, outward things will have to them less and less of significance, and all they will be drawn into closer unity with all the like-minded.

We have received from a correspondent in Great Britain a criticism on a letter by J. E. Southall, which we copied from the *British Friend*, and which was published in our issue of Fourth Month 26th, in the column of "Items," under the heading "*Fruits of the Pastorate.*"

The letter we received speaks of that written by J. E. S. as "obviously incorrect;" but it does not call in question its main statement—that a request was refused which was made that a meeting should be held in the house on the afternoon or evening of First-day, after the manner of Friends, for the accommodation of those who were not satisfied to attend the meeting under the care of the pastor. Indeed it rather confirms the accuracy of the statement, by denouncing the proposition as "simply preposterous."

We have regarded *The British Friend* as a journal of so much respectability, that it was safe to copy from it matters of fact.

AGENT APPOINTED.—Our Clerk Asa Garratson, of Barnesville, Ohio, who has for many years faithfully acted as agent for THE FRIEND, desiring to be released, on account of failing health, his request is acceded to; and William

Stanton, Tacoma, Belmont County, Ohio, is appointed in his place.

SUMMARY OF EVENTS.

UNITED STATES.—General Greely, Chief of the Signal Service, is perfecting arrangements through the Secretary of State whereby the earliest information practicable will be obtained regarding West India cyclones. Auxiliary stations of observation will be established at St. Thomas, Kingston and Santiago de Cuba, whence two observations daily during the hurricane season will be obtained by telegraph. Arrangements are also being made for regular reports from Bermuda, over the cable now being laid between Halifax and Bermuda.

On the 26th of last month, the Secretary of the Interior received a telegram stating that the Pottawatomie Indians in the Indian Territory had in council entered an agreement with the Cherokee Commission, ceding to the Government the surplus lands of their reservation.

The bill for the admission of Wyoming as a State of the American Union, passed the Senate, on the 27th, by a vote of 29 to 12.

The Lottery bill passed the Louisiana House by exactly the two-thirds vote required, on the 25th ult.

Superintendent of the census Porter, from present indications, says the returns of enumerators would show a total population of the United States of 64,500,000, against 55,000,000 in 1870.

The official census of the District of Columbia shows a population of 229,796, a gain in 10 years of over 52,000.

The population of San Francisco is placed at 300,000 by the Census Supervisor. The Chinese population is 24,000, an increase of 2,000 since 1880. Probably 10,000 more Chinese, who are regular inhabitants of San Francisco in the winter, are now at work in the country.

The census of Chattanooga, Tennessee, is officially stated to be 43,500—an increase of nearly 340 per cent since 1880.

The population of Salt Lake City is placed at 49,972, and Ogden at 16,825.

The valuation of railroad property in Alabama for the year 1889, is \$48,000,000. In 1879 it was \$8,000,000. The enormous increase is argued over the fact that the peak of Mount Shasta, in California, has fallen over. It is stated that large quantities of snuok and vapor are rising, and many people fear an eruption.

Five broke out in the Hill Farmstead at Danbar, Pa., on the night of the 27th ult., and all hope of reaching the entombed miners is abandoned. Up to the 1st instant, their bodies had not been recovered.

The deaths in this city last week numbered 526, 46 more than during the previous week and 33 more than the corresponding period last year. Of the whole number 277 were males and 249 females; 251 were under one year of age; 93 died of cholera infantum; 42 of marasmus; 39 of consumption; 31 of inflammation of the stomach and bowels; 25 of consumption; 29 of diseases of the heart; 22 of pneumonia; 17 of old age; 17 of debility; 16 of inflammation; 15 of inflammation of the brain; 11 of Bright's disease; 10 of typhoid fever; 10 of cancer and 10 of congestion of the brain.

MARKETS.—U. S. 4's, 103 1/2; 4's reg, 122; coupon, current market.

COTTON was quiet but steady; 34s sales on a basis of 12 1/2 cts. per pound for middling uplands.

FLOUR.—Winter bran, choice \$14.25; do., fair to prime, \$13.75 a \$14; spring bran, \$13.50 a \$13.75.

FLOUR.—Western and Pennsylvania super, \$22.5 a \$23.00; do., extra, \$22.25 a \$22.75; do., No. 1, \$22.00 a \$22.50; fair, \$22.5 a \$23.50; Pennsylvania, roller process, \$3.75 a \$4.00; Western winter, clear, \$3.75 a \$4.10; do., straight, \$4.25 a \$4.50; winter patent, \$4.05 a \$5.00; Minnesota, clear, \$3.50 a \$4.00; do straight, \$4.25 a \$4.65; do., patent, \$4.75 a \$5.00; do. do., favorite brands high grade. Eye flour was quiet, but firm at \$3.25 per barrel for choice Pennsylvania.

GRAIN.—No. 2 red wheat, 89 1/2 a 89 3/4 cts.; No. 2, mixed, 87 a 87 1/2 cts.

CATTLE.—No. 1 extra, 30 1/2 a 31 cts.; No. 2, 29 1/2 a 30 cts.

BEEF CATTLE.—Extra 5's, 30 1/2 a 31 cts.; 4 1/2 cts.; medium, 4 1/4 cts.; 4's, 29 1/2 a 30 cts.; common, 4 1/4 cts.; culls, 3 1/2 a 3 3/4 cts.; fat cows, 23 a 24 cts.

SHEEP.—Extra 5's 4 1/2 cts.; good, 4 1/2 a 5 cts.; medium, 4 1/4 a 4 3/4 cts.; common, 3 3/4 a 4 cts.; culls, 2 1/2 a 3 1/4 cts.

HOGS.—Good Hightl Western, 53 a 5 1/2 cts.; common heavy, 51 a 5 1/2 cts.

FOREIGN.—In the House of Commons on the night of the 24th ultimo, Timothy Healy asked the Speaker's ruling on the question whether there was any precedent for an ear-mark licensing fund. In making this request T. Healy was supported by W. E. Gladstone and Sir William Vernon Harcourt.

The Speaker, in response, made a long speech, in which he gave it his opinion that there was no precedent for such a fund. To allow an ear-mark license fund to accumulate, as the Government proposed, he thought was a grave innovation, which the House itself ought to decide upon, and he considered that T. Healy was not justified in his question.

In the House of Commons on the afternoon of the 26th, W. H. Smith stated that the Government, finding no alternative, withdrew the proposal relating to the funds for the purchase of publican's licenses. He would say at a future day what ought to be done with the funds thus released.

The London correspondent of the New York *Tribune*, who has a most kindly feeling for the Government, says, in his despatches of the 28th ultimo:

"This collapse is a triumph of obstruction. The Ministry are not to be deceived. True, they were ill-supported by their own followers, many of whom thought their seats in danger on account of this bill, a bill which nobody really liked, except its unlucky author, and which pleased neither the temperance people nor the brewers. It would, however, have been the work of a few days to complete the party of obstruction had now succeeded in defeating two of the three chief measures of the session, and the fate of the third is still uncertain. They rejoice because the Ministry are discredited, and care nothing if Parliament also be discredited."

The committee was sent from France to Panama to investigate the condition of the canal, has made a further report on the prospects of the enterprise. The committee says that the construction of the canal at the calculated level would occupy twenty years, and would cost 1,757,000,000 francs. In the opinion of the committee, the cost would be completed on the basis of an international agreement or a syndicate of the States interested.

The report further states that, taking into account the interest to be paid during so long a period without any receipts, and also the general financial charges, the net necessary must be estimated at three milliards of francs.

A despatch from Madrid, dated Sixth Month 26th, says: Investigation shows that the cholera epidemic at Puebla de Rogat had its origin in the opening up of the city of Mexico, which was the victims of the epidemic of 1885 were buried.

The authorities at all Spanish ports have established a 10 days' quarantine against vessels arriving from Gaudia and Valencia. If there be cholera aboard a vessel the quarantine is extended to 15 days. The total number of the 45 countries to the 25th of last month was 196, of which 113 have proved fatal.

Despatches received in St. Petersburg from Chardjui, Turkistan, say that hundreds of bales of Afghan cotton have arrived there from Kellef. This is the first direct consignment of the 45 countries to the 25th of last month was 196, of which 113 have proved fatal.

The Porte has sent private special envoys to Berlin, Vienna and London on a mission relating to the demands for Bulgarian independence, which are concurrent with Russia's insistence upon the immediate payment of 30,000,000 franc indemnity, by sending the Bey of Bulgaria to Constantinople.

The Sultan has consented to cede the Zanibar coast to Germany.

Active work on the Nicaragua Canal, it is announced, will not begin for about five months.

President Diaz, of Mexico, has vetoed a lottery bill passed by both Houses. The measure was to have been carried on by a syndicate at Tia Juana, 18 miles south of San Diego, California.

The Winnipeg and Hudson Bay Railway Company has been informed that, upon producing satisfactory evidence in last session, and expending over 200,000 dollars of their railway from Winnipeg to Saskatchewan River at or near High Falls, the Government will ask Parliament to grant the company the same aid as that given to the Calgary and Edmonton Railway during the last session. The Government portion of the road is considered as being a colonization railway, which will open up and make accessible a fertile portion of Manitoba and the Northwest Territories, at present without railway communication.

CORRECTIONS.—In the obituary notices in last week's *FRIEND*, for Ephraim Ratcliff, read Ephraim Ratliffe; and for Paschal Moon, read Paschal Moore.

NOTICES.

WESTOWN BOARDING SCHOOL.—A Stated meeting of the Committee on Admissions will be held in the Committee-room, Fourth and Arch Sts., on Seventh-day the 5th of Seventh Month, 10 A. M.

J. W. BIDDLE, Clerk.

WESTOWN BOARDING SCHOOL.—The fall and winter term of 1890-91 will begin Ninth Mo. 2d.

Parents and others intending to send children to the school, will please make immediate application to

J. G. WILLIAMS, Secy.

Westown, Pa.

A teacher of experience, acquainted with "Quincy Methods," and modes of instruction now generally approved, desires a position in Primary Department of a Friends' School. She could enter upon duties at any time in Ninth Month.

Address E. B. M., Germantown, Philadelphia.

FRIENDS' LIBRARY, No. 142, N. Sixteenth Street, Philadelphia, will be open during the Seventh and Eighth months on *Fifth days ONLY, from 4 to 6 P. M.*

MARRIED, on the 19th of Sixth Month, 1890, at Friends' Meeting, Wilmington, Delaware, GEORGE A. RHOADS and FRANCES C. TATUM.

DIED, in Westery, Rhode Island, Fourth Month 29th, 1890, CHARLES PERRY, a member and elder of South Kingston Monthly Meeting of Friends, in the 51st year of his age. He was for many years an elder in our religious Society, a Friend by birth and conviction, sound in the original doctrines of the Society, and an earnest opposer of all innovations. He gave evidence early in life of the operation of that principle of light within which enables those who heed its dictates, first to govern their own spirits and then by precept and example to influence their fellow men. He sympathized deeply with those who were wronged and oppressed everywhere, and especially with those who were held in slavery in this country. He was large hearted and benevolent, exercising a broad and discriminating charity in all things, not only in the relief of the needy, but in tender judgment of the erring. He was much exercised for the maintenance of Friends' principles in their original purity, and toward the close of his life produced and published a concise statement of Friends' acknowledged doctrines. His great concern was to be found walking in the straight and narrow way which has been trodden in all ages by the followers of a crucified and arisen Lord. Though suffering much in his last years with the infirmities of age, he was cheerful in spirit and seemed to regard his work as finished and the time of his departure at hand. He was cherished as a shock of corn high and precious in the sight of the Lord is the death of his saints; and the language is to us, "Whoso believeth on me though he were dead yet shall he live; and whosoever liveth and believeth on me shall never die."

—, Fifth Month 7th, 1890, at the hand of an assassin, PARKER ASHTON, in the 66th year of his age, a member of Middleton Monthly and particular meetings, Columbiana Co., Ohio. Without fear or suspicion this Friend followed his assilant to the appointed place and was there stricken down with but a moment's warning. How terrible and how unaccountable to us, appear some of the doings of men. Yet 't' He who sees the end from the beginning, and is able through his abounding mercy to censure the sorrowing one and assure them that he will be merciful in all places He ever careth for his own.

—, suddenly, of heart disease, Fifth Month 50th, 1890, at his home near Adrian, Michigan, SAMUEL LEEDS, aged 73 years. Formerly a resident of New Jersey. We recently believe that he was found with his lamp trimmed and burning.

—, at his residence in this city, on the 7th of Sixth Month, THOMAS MILLER WATKINS, in the 59th year of his age, a member of the Monthly Meeting of Friends of Philadelphia.

—, MARY E. JESSOP, a member of the Eastern Quarter Monthly Meeting of Friends, N. C. the 19th of Sixth Month, 1890, aged 64 years and six months. "Blessed are the dead who die in the Lord."

FOR "THE FRIEND."

Incidents and Reflections.—No. 231.

In common with many of the members of Philadelphia Yearly Meeting, especially of the generation which was now nearly passed away, I often heard in my younger years of Eli Yarnall, who, when a boy, possessed the remarkable faculty of mentally seeing things at a distance as if they were actually present. The evidence of the existence of this faculty was convincing enough to gain the full confidence of our fathers and mothers. Although there does not seem to be much of moral instruction to be derived from the case, yet, as a well-authenticated account of a very curious phenomenon, the following narrative may prove interesting. It was drawn up by the late Charles Yarnall, a well-known Friend of Philadelphia, one of the originators of Haverford School, and a man of very considerable ability and literary attainments.

About the year 1690, two brothers of the name of Yarnall, emigrated from Worcester, England, and purchased considerable tracts of land in the township of Edgmont—now in Delaware County, Pa. One of these was Philip, the great grandfather of Charles Yarnall, and the other was Francis, the ancestor of Eli, to whom the narrative refers.

"This person, who in his youth was believed to possess a remarkable faculty of seeing what was existing in distant regions, or rather of seeing wholly irrespective of distance, was the son of George and Mary Yarnall. He was born about the year 1788, and was a descendant of Francis Yarnall above-mentioned, a highly respected Friend, who became a prominent citizen of Chester County, a member for several years of the legislature of the Province of Pennsylvania, and the holder of an important trust under the Provincial Government.

"In the early part of this century, Eli Yarnall removed to Red Stone (now Brownsville), Pennsylvania. Having heard of one extraordinary instance of the exercise of this faculty, I was particularly desirous of availing myself of an opportunity of testing the evidence on which this narrative rested. In the year 1843, I was attending the Yearly Meeting at Baltimore. At the house of a friend I was introduced to Eli Haines. I soon found that my friend was from

then attending the Yearly Meeting. I asked him if he had known anything of a boy named Eli Yarnall. He promptly replied that he had known him, and was present at a remarkable interview between him and John Hall from England; and then travelling in the ministry in America, and accompanied by Stephen Grellet.

"I asked him to relate the story. The narrative interested me greatly, the more that the venerable narrator had no theory whatever by which to explain the wonderful features of his narrative. He was evidently absorbed in the memory of what had passed, and told it with the utmost simplicity. On the following day I found myself seated in the railroad car, next to my long known and beloved friend, Stephen Grellet. I asked him if he remembered anything of this occurrence. 'Oh yes,' he said, and proceeded to tell me of what took place, in entire agreement with what Eli Haines had related a few hours previously. On my return to the city I was impressed with the desirableness of obtaining from Eli Haines the statement in writing; but some years were permitted to pass before I wrote to him to favor me with his narrative in writing.

... Soon after I received from my friend a letter, which I think best to record:

"Dear Friend Charles Yarnall: Thy kind letter came to hand in due time. The contents rather amused me than other ways, respecting some conversation that passed between us at Baltimore. In the first place thou says the occurrence took place at my house, which is a mistake, for I was then young and lived with my father in Virginia, not far from Winchester.

"John Hall and Stephen Grellet, on their way from the South, attended our Quarterly Meeting, held at Hopewell. At the close of the meeting Stephen Grellet rose and said they were on their way over the mountains, and would like some young man to accompany them. It was the commencement of harvest—a busy time. I felt willing and my friends also (I went with them something like a servant boy), and when we arrived at Red Stone, we made our home with Reese Cadwalader, an elder of good report, where Eli then lived, a little boy of twelve years old, but smart and active. One evening Stephen Grellet said to our friend Cadwalader, 'We hear there is a young prophet some heraway.' R. C. replied, 'There he is,' pointing to Eli. 'We try to prevent young folks from asking questions they ought not,' etc., etc.; 'but, friends, if you would like, you may ask some questions. After tea we will have him in private. After tea we were invited into a private room, separate from the family. Eli was called in, and the friend R. C. said to him, 'These friends wish to talk with thee; now I wish thee to be sober, and answer them soberly.' After a pause John Hall said to Eli, 'Canst thou tell me how my family are? are they well?' Eli put his hand over his eyes, and leaning forward, resting his elbow on his knee, in about one minute replied, 'I see them all going to bed.' 'What!

Stephen Grellet replied to John Hall. 'Remember it is about ten o'clock at thy house now.' Eli—'All well, and preparing for bed,' and added, 'there is a little babe among them.' This was news to John Hall, who had been from home some two years or more, and had not heard from them for some months. He had a daughter married soon after he left home, but had no such news as Eli told of. J. H.—Eli, what sort of a house are those women in?' Eli—I don't know; I believe it is stone, but never saw any like it.' Then J. Hall replied, 'There is some white marble on the corners; the rest is common in England.' Eli had not seen any such before. J. H.—Well, Eli, what is the house covered with? His reply was, 'I don't know; it is not wood, or iron, or leather; it is most black and not quite.' J. H.—It is slate.' J. H.—Describe the yard.' He did very well and said 'there was a big road running in front of the house and yard, and there was a beautiful piece of woods on the other side of the road.' J. H.—'Well what is there beyond those woods?' Eli, in great surprise, lifting up his hands in amazement, 'Oh, what a water,' which proved to be an arm of the sea. J. H.—'Correct.' I do not remember that J. Hall asked any more questions.

"Stephen Grellet then inquired, 'Eli, canst thou tell me something about my brothers?' 'Yes, I see them all in a row.' 'How many?' He first said 'Six; no, not six; five.' They dressed in a way Eli had not seen, and tried to describe—they were dressed in uniform and well. S. G.—'My father and brothers are what are called King's Life Guards.' This is the substance of what passed that evening, and I do not remember that there was any more that time. There were many reports concerning this very remarkable boy. One I shall mention. Reese Cadwalader's wife told me there was a committee sent by Baltimore Yearly Meeting to visit the Indians out at Wahpoconnet, and her husband was one of that committee. Whilst they were gone she said to Eli, 'Where and how is thy grandfather?' Eli replied, 'I see them all walking through the woods.' 'They are all well?' 'Yes. He fell down and hurt his wrist, and has a red cloth round it; it is well now, and they will soon come home,'—and they did. She went out to meet her husband and friends. She spied the red cloth that Eli spoke of. 'What is the matter with thy wrist?' 'Oh,' he said, 'I was so clumsy, fell down and sprained my wrist; it is all well now.'

"This was in the year 1800, in the Sixth Month. Well, when we returned from over the mountains, and arrived at my father's he had several letters for John Hall, who stepped into another room and read them. In a short time he returned with a smiling face, and said to Stephen Grellet, 'Remember what Eli told me, when my family was preparing for bed; he said there was a babe among them. This is so. My letters inform me that it is so. . . . My love to thee and thy household, and remain thy well-

"The writer was in his eighty-third year when this letter was written, and has now gone where all mysteries are revealed, and we shall know even as he was known.

"In the First Month, 1870, I had been spending some months in Torquay, Devon, England. A Friend, Edward Richardson, lent me a MS. vol. containing a collection of anecdotes and letters by his father, the late well-known and respected Thomas Richardson, of Sunderland, Durham, relating to American Friends. Among them was the following extract of a letter from John Hall, of Cumberland (the friend mentioned in the letter of Eli Haines), addressed to his wife, written immediately after the return of the party to Virginia, giving a contemporary version of the same occurrence, and confirming essentially the statement of Eli Haines and our friend Stephen Grellet. John Hall, being the party most interested in the revelations of the seer, and writing home to his wife, relates those sayings which most affected him and her, and thus his sons and their doings are told as reported, while things which the other friends had retained so freshly in their memories are less particularly given.

Letter of John Hall to his wife, dated Mount Ridge, near Winchester, Virginia, 15th of Seventh Month, 1800.

"Since my last I have been at Redstone Quarter, 157 miles west of this place, where I have met with a boy about twelve years old, who is remarkable for seeing things at a distance. I asked him if he could see thee. He answered he could, and said thou wast dressing thyself. I asked him if he could see my sons, how many I had. He paused awhile, and said, 'I see four; the oldest is packing goods in the shop, and some people with him; the second is riding, and the two little boys are doing nothing.' I asked him if he could see Alice. He said he could, and he could see she had three girls. He described Hannah, and said she was sewing, and had a little boy. He told me I had six daughters. He seems so most extraordinary youth. All the above was perfectly correct. The name of the boy was Eli Yarnall. He was first discovered to have this gift when he was very young, by his laughing as he sat at home in the house. His mother inquiring the cause, he said he saw his father, returning from market, lose a jug of whiskey, and that it rolled down a hill, and father ran after it. This proved to be the case, and jug breaking, the whiskey was lost.

"He was at first not aware this gift was peculiar to himself, and thought people had no need to ask him questions, as they might see for themselves. When desirous of seeing anything at a distance he was in the habit of shutting his eyes and leaning his forehead on his hand and seldom answered a question before he had paused for a time. He was a steady religious boy, and when at any time he had done anything for which he felt reproof, he lost his gift for a time.

"Having told some circumstances that incriminated certain men, they lay in wait to kill him as he went to school, of which having a sense, his life was preserved and the men were discovered, who confessed their wicked designs.

"Copied verbatim from the MS. collection of Thomas Richardson, of Sunderland, now in possession of his son Edward Richardson of Torquay. This MS. is dated 1827.

"CHARLES YARNALL.

"TORQUAY, DEVON, ENGLAND, FIRST MO. 23, 1870."

All on earth is shadow; all beyond is substance.

Joshua Evans.

(Continued from page 387.)

1795. Twelfth Mo. 5th.—At our Select Quarterly Meeting, my mind was closely exercised concerning superfluities that appear, and particularly I had to mention large looking-glasses: whether having them in Friends' houses was not one cause of keeping pride alive in the hearts of those who spend time in standing before them to view their dress, and to have all to appear delicate and nice; and whether such scrupulous nicety in trigging off the body doth not add to the soul's unfitness to approach the presence of a heart-searching God, when we go to places for solemn worship.

7th.—Drowsiness in times of worship was complained of in our answers brought into the Quarterly Meeting for business; whereupon, I was concerned to bring into consideration, whether high, luxurious eating, and drinking cider, wine, &c., plentifully, with smoking tobacco, did not tend in some measure to alter the state of the body, and thereby add to the causes of heavy dullness when Friends come to sit down in our religious meetings.

That of paying a kind attention to the situation of the native Indians who dwell near us, by visiting them, and inspecting as well as helping their necessities, as winter is approaching, and we much indebted to them, as such who possess the land which was theirs, and obtained from them at a cheap rate, was at this time urged to Friends' observation as a Christian duty; my mind is often concerned for that people.

11th.—I was at Evesham Monthly Meeting, in company with several ministering Friends. I have often thought that the time in our meetings for business ought to be occupied in attending thereto, and not taken up with communications in the way of preaching; life and power far exceeds words.

12th.—My mind was turned in feeling sympathy towards the poor and afflicted, divers of whom I visited. One of them was ancient, whose time seemed nearly over, and I feared his day's work was not done; I urged him to use all diligence.

At another house I went to see an afflicted woman and her mother who was a widow. They rejoiced at being visited; and I thought they appeared much in the innocency, like favorites of Heaven.

13th.—At a neighboring meeting; I thought insensibility and forgetfulness of God prevailed, with a worldly spirit, to my grief.

17th.—At our week-day meeting; I hoped for an increase of living faith and life among us. Friends seem to bring out more of the youth to meetings than heretofore. I visited a number more of the poor and afflicted, who appeared thankful in being remembered.

24th.—At Pilegrove Monthly Meeting was a trying time. I seemed almost ready to give out, the appearance was gloomy, and the floods ready to swallow me up; I feared also the Lord was about to hide his face from me. I said, Suffer me not, O Lord, to fall a prey to mine adversary; I know my strength is in thee.

Next day I visited some in deep affliction of body, who I thought were in favor with God; a comfortable feeling.

27th.—At Salem Meeting I had close doctrine to deliver, which seemed well taken. At their Monthly Meeting, next day, my bow seemed to be renewed in strength; and I had close labor to discharge, both amongst men Friends and the

women, to my own satisfaction, and to theirs, so far as appeared. I was led to treat on the pernicious effects of a worldly spirit, and a rich-tions way of living, aiming at fine houses, rich furniture, particularly large looking-glasses, &c.

Returning home, I visited several sick persons to our mutual joy. At our week-day meeting, 31st, were a large number of youth; a good meeting, crowned with the Divine presence.

1796. First Mo. 5th.—For six days I have been about home and doing little good. Instead of attending with other Friends the committee on Indian affairs, I let in reasoning that I was of so little consequence, I might as well stay away; and thus have lost time.

8th.—My mind was inclined to attend a neighboring Monthly Meeting; but the adversary endeavored to defeat me here also. I was kept lingering about home till it was almost too late; when trembling seized me, and I said, "Let me not fall by the hand of Saul." I was favored with a little strength to press through; and my bow was renewed—so that I had a favored opportunity, both amongst men and women Friends. I was engaged to speak to parents and children concerning a worldly spirit and the inconsistency of superfluity in dress and furniture; and had to press in plain language the evil of these things; believing it was not a time for speaking smooth words. It was thought the meeting ended well.

I also attended another Monthly Meeting next day, where my service was pretty much in the same line; and I can say in truth, Blessed be the name of the Lord: He is a rich rewarder of those who serve Him faithfully.

11th.—I was at our Monthly Meeting at Haddonfield, where the minutes of our Yearly Meeting were revised, which advise against a worldly spirit, and mention of its weakening effects in leading to the vain customs of the world in dress, &c., &c. I was led on this occasion to speak plain and closely urge my Friends to a proper attention to this advice, with other matters recommended. It appeared evident to me that giving way to fleshly ease, and a worldly spirit, was the ground cause of a defection in our Society, and a departure from that simplicity which the dictates of the blessed Truth, if strictly observed, would lead into. Some of the rich can scarcely bear this kind of doctrine, especially parents. The children sometimes appear most tender. I had also to express my fears respecting the dangerous consequence of Friends mixing with others in promoting a school at Haddonfield for instructing youth in the French language—as it might be a snare to entangle some of the dear youth and expose them to the company of those of a loose conduct, &c. Though some seemed to disapprove of my freedom in this respect, several, both old and young, united with my sentiments.

12th.—I was at Woodbury Monthly Meeting, where a worldly spirit was again treated on, with its effects. I opened my sentiments with what relates to extortion; and had to advise my Friends not to seek the largest prices when they were about to sell meat or other produce, especially to those in low circumstances. This appeared to be a low time; and I was afraid my Friends in this place had lost ground.

18th.—At our Meeting lately we had the company of four Friends who were ministers. It came into my mind that in a season of drought, we looked to the clouds for rain; sometimes many clouds produce but little rain; so, when divers preachers are in the gallery, and the mind of the people turned towards them, and

not to the bishop of souls, a disappointment often happens.

24th.—I have done no good thing.

For several days after this, I was closely engaged in visiting the sick, and in assisting and pleading the cause of the poor, to my comfort; and I hope to their benefit.

Second Mo. 1st.—I was at Burlington Monthly Meeting, and had some service both amongst men Friends and the women; though it seemed hard work, because of lukewarmness, and I feared the world was likely to gain ascendancy.

2nd.—Attending also the Monthly Meeting at Chesterfield, it appeared to be a low season, and part of the time unprofitably spent. Some who had more of the form than substance, urging sentiments to carry their point, I thought it was distressing to some younger persons; and so it was to me.

3rd.—Springfield Monthly Meeting held to-day, I thought, was a most favored time in the management of their business. Friends seemed to be united, and the youth sat solidly, which was pleasant to observe. I had a comforting time in a family yesterday evening; the children appeared in a good degree of innocence (C. Newbold's).

4th.—At the Monthly Meeting of Mount Holly, I thought matters were in a low condition, sorely manning to the honor of Truth, as life seemed wanting. In the evening I visited one who had been an old professor, hurt by taking strong drink to excess. I dealt closely with him, as I took him to be a deceiver.

I visited a family of Methodists, who seemed well disposed; they were tender, and expressed satisfaction.

5th.—I likewise attended Evesham Monthly Meeting; and was afraid Friends were rather on the decline as to the groundwork of religion. The spirit of the world often gets too much place in the hearts of professors, and then the good seed is choked, so that it cannot flourish to the honor of the Great Husbandman. I felt much stripping after I came home; but on visiting some of the poor, and those in affliction, I was comforted; and had cause to bless and praise the name of Israel's God.

8th.—At our Monthly Meeting I opened my concern to visit the families belonging to our Meeting at Newtown; and to hold a few meetings near the river-side; which my Friends united with. I was induced to express my concern also about to great a concourse of people coming to our Quarterly Meeting, and the disorders often seen among them.

14th.—On First-day we had a favored meeting at Newtown. A searching testimony was delivered by our Friend, S. S. Many hearts, both of young and old, were tendered.

15th.—I thought I had some clear openings, respecting the manner of holding our meetings for discipline, in the authority of Truth.

18th.—Being at a meeting held in a school-house near the river, I was concerned on the subject of dwarfishness; which is apt to overtake Friends, both men and women, in a religious sense—where the spirit of the world is allowed to gain place. O how it hinders the growth of the blessed Truth!

In visiting the poor and afflicted, I find some who are in a good degree tender and sweet-spirited; one of whom I thought had too much confidence in the doctor, which gave me concern. (21st.) Doctors, we see, are often men of loose principles, not fit for religious minds to place reliance on. On further visits to some in straitened circumstances, I find comfort. I am often

tried with great poverty of spirit. I therefore own those as my brethren and sisters in tribulation.

(To be continued.)

FOR "THE FRIEND."

A New Creation Preceding Revelation.

The Bible tells us, that in the beginning God made the world and all things in it, and that it was good; and that He created man also in his own image of uprightness and purity. But man by his disobedience to the commandment of his Maker soon lost the heavenly image, and took upon himself the image or nature of the groveling, twisting, twining serpent, which was to feed upon the dust of the earth, as he had no right to the fruit of the tree of life, or to the garden of God. So Adam and Eve were sent forth with a command to be fruitful and multiply and replenish the earth, which soon became so corrupt as to call down the wrath of God in a flood to the destruction of the ungodly. For it is said, his Spirit will not always strive with man. And the heart had become deceitful above all things, and desperately wicked, who could know it.

But notwithstanding all this God so loved the world, after his creature man had become deluded by the enemy of all righteousness, that He gave his only Son to dwell among us, his children. And He suffered Him to be tempted and to be touched with a feeling of our infirmities, that He might have compassion of his children, and to succor them that are tempted. So He took not on Him the nature of angels, but the seed of Abraham, and came and dwelt outwardly for a season amongst a portion of his own children. But they, as a people, received Him not. But as many as receive Him now, in the heart, to them He gives power to become the sons of God, even to them that believe in his name. But a saving belief must be practical, one that creates us anew in Christ Jesus, and enables us to carry on good works in his power and not in the power of man. For faith without works is dead, and works without faith are dead also. So we want a living faith that works by love to the purifying of the heart. And that stands in the power of God, and not in the power and wisdom of man. For it looks much as if it might be said of us, like the prophet said of Israel, "Return unto the Lord thy God, for thou hast fallen by thine iniquity," Hosea xiv. 1. And also, "When Israel was a child then I loved him, and called my son out of Egypt." And of Ephraim it was said, "When he spake tremblingly, he exalted himself in Israel, but when he offended in Babel he died." How is it now with ministers? Have they not mostly ceased to speak tremblingly, and to exalt themselves in the true Israel of God? But are they not striving to exalt themselves in the praise of men more than the praise of God? They have mingled with others around them, and learned their way and worship, till strangers have devoured their strength and they know it not, and scarcely like to be told of it, but prefer to go on in their strength as ministers of righteousness; and like some of old, saying in effect, let us eat our own bread and wear our own apparel, or live and dress and worship as the world, but let us be called by the name of our worthy forefathers to take away our reproach. Thus we have become a mixed people. Half Jew and half Ashdod; some saying lo here is Christ; others, lo He is there. Brethren these things ought not so to be. Yet in this unsettled condition of self-exaltation some are ready, like the Babel builders, to encourage each other and say, let us build us a tower whose top may reach

to heaven, and let us make to ourselves a name, but it is not leading us into confusion? So that it might be said of us as the poet Cowper said of Israel:

O Israel, of all nations most undone,
Thy diadem displaced, thy sceptre gone,
Thy Levites gone, a consecrated host,
No longer Levites, and their lineage lost,
And thou thyself—oh every country soon,
With none on earth that thou canst call thy own.

So he in speaking of Israel, says:

Of all nations most undone.

And have not we as a people become the most changed of all the religious denominations around? But I am comforted in the belief that we have a tried remnant left, who like David waited patiently for the Lord, till He hath in spirit inclined unto them. And when musing the fire of the Lord has burned. And when such are prompted to speak, they still speak tremblingly and exalt themselves in Israel. But how is it with a large portion now? Has not the gold, much of it, become dim? Does not iniquity abound, so the love of many is waxing cold? But as we become more cold in pure and undefiled religion, are we not becoming proportionately warm in a spurious kind that springs more from the head than from the heart and that we can use in the will of man, without being created anew in Christ Jesus unto good works.

I write more freely on the subject of innovations and the ministry, because I so well remember and so much regret the great change since my boyish days. Then our meetings, which I attended seventy-five or eighty years ago at Deep River, X. C. were certainly more solemn and impressive, and more under the trembling power of the Almighty. More of the light of the glory of God shined; more of the heavenly fire of Divine love-burning. But how is it now? Some appear to be running grossly after the error of Balaam for an earthly reward, and perishing in the gainsaying of Core. But I believe we still have a tried remnant left who, like David, are waiting patiently in our meetings for worship for the Lord, until He inclines unto us and establishes our goings. David was said to be a man after God's own heart; and so he was in many ways; for he was of a humble prayerful spirit. Yet he had his infirmities, which he at times suffered to become sinful. For he found that by nature his heart was not right in the sight of God, so he prayed that God would create in him a clean heart and renew a right spirit within him; not to cast him away from his presence, and take not his Holy Spirit from him; but that He would restore unto him the joy of his salvation and uphold him by his free Spirit; then he would teach transgressors his ways and convert sinners unto God.

So it appears that David thought he must receive this change of heart himself before he could work for God in helping to change others.

D. HIDDLESTON.

Dublin, Indiana, Sixth Month, 1850.

If we were to make our own choice at this moment, whether we should live or die, be sick or well, have poverty or abundance, be in public favor or in general disrepute, we might choose that which would be the worst thing possible for us, although it seemed the thing most to be desired. But if God were to choose for us, He would make no mistake. Which, then, is better,—to choose for ourselves, or to ask God to choose for us?

A straight line is the shortest in morals as in mathematics.—*Maria Edgeworth.*

[An aged Friend in Indiana, a member of Western Yearly Meeting, sends the following communication.—Ed.]

The Yearly Meeting of London, being the oldest one in the world and justly called the parent of several of the Yearly Meetings on this continent, I have long been accustomed to look upon its actions and judgment as a safe and reliable standard in which we can place implicit confidence.

Right here the query has arisen in my mind: Why London Yearly Meeting still keeps up such an intimate and regular correspondence with such Yearly Meetings on this continent as Friends in England well know have either ignored, set aside, or trampled under foot, some of the most precious principles and testimonies which characterized our Society in its earlier days.

I would ask: What is a correspondence worth without a oneness of heart a unity of feeling that will enable us truthfully to say, *We are one people; and of the same household of faith.*

Among those innovations introduced among us is the Pastoral system of hiring ministers to preach for us. This strikes at the very foundation of our faith relative to a pure ministry directed and guided by the great Head of the Church. Another departure is that of singing in our meetings for worship. This is practised and encouraged in all our meetings; and Friends' Meeting-houses are thrown open for the teaching of singing schools.

Soon after the establishment of Western Yearly Meeting, many of the most prominent members, especially ministers, expressed a desire to have the Discipline made much shorter, and have some radical and entirely new changes made. This has been done; and to use a homely phrase, we have been chipping off blocks, till almost nothing else than a skeleton is left.

The Discipline of our Yearly Meeting is not now much larger than half what it was when our Yearly Meeting was established in 1858.

In conclusion I must say, that I sometimes feel almost ashamed that I have a membership in a body that has deviated so much from primitive Quakerism. The language of one formerly may be applicable to us: "By the rivers of Babylon there we sat down and wept; yea, we wept when we remembered Zion."

I wish it were not true that even men who firmly believe, as a general principle, the Divine government of the world, are often betrayed into the impiety of attaching an excessive importance to human agency in its events. How easily a creature of their own species is transformed by a sympathetic pride into a God before them; if what they deem the cause of truth and justice advances with a splendid front of distinguished names of legislators, or patriots, or generals, it must then and must therefore triumph; such talents, accompanied by the zeal of so many faithful adherents, nothing can withstand. If these shining insects of fame are crushed, or sink into the despicable reptiles of corruption, alas, then, for the cause of truth and justice! All this while, there is no solemn reference to the "Blessed and only Potentate." If however the foundations of their religious faith have not been shaken, and they possess any docility to the lessons of time, they will after awhile be taught to withdraw their dependence and confidence from all subordinate agents, and habitually regard the Supreme Being as the only power in the creation.

It strikes me as not improbable, that the grand moral improvements of a future age may be accomplished in a manner that shall leave nothing to man but humility and grateful adoration. His pride so obstinately ascribes to himself whatever good is effected on the globe, that perhaps the Deity will evince his own interposition, by events as obviously independent of human power as the rising of the sun. Perhaps some of them may take place in a manner but little connected even with human operation. Or if the activity of men should be employed as the means of producing all of them, there will probably be as palpable a disproportion between the instruments and events as there was between the rod of Moses and the stupendous phenomena which followed its being stretched forth. No Israelite was foolish enough to ascribe to the rod the power that divided the sea; nor will any witness of the moral wonders to come attribute them to man.—*John Foster.*

SLEEP.

While children sleep,
They know not that their father toils;
They know not that their mother prays—
Bending in blessing o'er their beds,
Imploping grace for after days.

While children sleep,
They never dream that others work
That they may have their daily bread;
When morning comes they rise and eat,
And never ask how they are fed.

While children sleep,
They do not see the shining sun;
They do not know the gracious dew,
In daily miracle of love,
Is ever making all things new.

Do we not sleep?
And know not that our Father works
With watchful care about our way?
He bends in blessing from above—
His love broods o'er us day by day.

Do we not sleep?
And never dream that others work,
Heaping the sheaves that might be ours;
We see not how the shadows fall
Which mark the swift departing hours.

Ah, still we sleep!
Our drowsy eyes see not the light,
See not the hands stretched out to bless,
See not that waiting for us stands
God's kingdom and his righteousness.

—*Good Words.*

UNBELIEF.

There is no unbelief,
Whoever plants a seed beneath the sod,
And waits to see it push away the clod,
Trusts he in God.

Whoever says, when clouds are in the sky,
"Be patient, heart; light breaketh by and by,"
Trusts the Most High.

Whoever sees 'neath winter's fields of snow
The silent harvest of the future grow,
God's power must know.

Whoever lies down on his couch to sleep
Content to lock each sense in slumber deep,
Knows "God will keep."

Whoever says "To-morrow"—"The Unknown"—
"The Future"—trusts that power alone,
He dares disown.

The heart that looks on when the eyelids close,
And dares to live, when life has only woe,
God's comfort knows.

There is no unbelief;
And day by day, and night increasingly,
The heart lives by that faith the lips deny;
God knoweth why.

—*Charles C. Jennings.*

SELECTED.

THE PRAYER OF WHITTIER.

When on my day of life the night is falling,
And, in the winds from sunnied spaces blown,
I hear far voices out of darkness calling
My feet to paths unknown,

Thou who hast made my house of life so pleasant,
Leave not its tenant when its walls decay;
O Love Divine, O Helper ever present,
Be thou my strength and stay!

Be near me when all else is from me drifting,
Earth, sky, home's picture, days of shade and shine
And kindly faces to my own uplifting
The love which answers mine.

I have but thee, O Father! Let thy Spirit
Be with me then to comfort and uphold;
No gate of pearl, no branch of palm, I merit,
Nor street of shining gold.

Suffice it if, my good and ill unreckoned,
And both forgiven through thy abounding grace,
I find myself by hands familiar beckoned
Unto my fitting place.

Some humble door among thy many mansions,
Some sheltering shade where sin and striving cease,
And flows forever through heaven's green expansions
The river of thy peace.

There from the music roared about me stealing,
I fain would learn the new and holy song,
And find at last, beneath thy trees of healing,
The life for which I long.

—*John G. Whittier.*

He who checks a child with terror,
Stops its play and stills its song,
Not alone commits an error
But a great and moral wrong.
Tender twigs are bent and folded,
Art to nature beauty lends;
Childhood easily is moulded;
Manhood breaks but seldom bends.

A COMICAL incident at Constantinople illustrates what thin ice those that use the press have to walk upon under the rule of the Sultan. There is a Greek benevolent society in Constantinople which recently had occasion to publish a pamphlet on its work, and on the title-page there was put a quotation from Paul's Epistle to the Galatians. Very soon after it appeared, a police officer came to the printing-office and demanded of the editor that he should give him information as to who this Paul was who had been writing letters to the people of Galata (one of the suburbs of Constantinople), as he had orders to get a copy of these letters and to bring the aforesaid Paul to headquarters. The editor explained that Paul could not be brought to headquarters; he was dead. But the functionary retorted that his orders were to bring Paul, and if he could not bring Paul to bring the editor. It was of no use to protest that Paul had been in Heaven for eighteen hundred years; and the editor was taken to headquarters and put in prison for several days, until finally the Greek Patriarch interferred and presented the bureau of censorship with a copy of the letter of Paul, which he showed was addressed not to the people of Galata, but to a province of the ancient Roman Empire. This having been at last made clear, the editor was released.—*Ecchase*

Unholy desires for Gain—"May no desires of gain draw any too far into business. May no cares to support customs, which have not their foundation in true wisdom, have place in our minds; but may we build on the sure foundation, and feel our Holy Shepherd to lead us, who alone is able to preserve us, and bring forth from everything that defiles.—*John Woolman.*

Exterior Plain Appearance.

SELECTED.

To accuse any Monthly Meeting of frequently preferring individuals for service in the church, simply or chiefly for their exterior plain appearance, is very unjustifiable. We imagine no one can possibly suppose that a plain exterior is, in itself, sufficient qualification for service in the church; but other things being equal there can be no question of its being a recommendation—if it does not qualify, neither of itself, does it disqualify. Whereas a fashionable exterior, with or without the requisite essentials, must be itself a forbidden element in the character.—*British Friend*, vol. xxiv, p. 119.

China's Great Wall.

Win. P. Sprague, of Kalgan, North China, writes as follows to the *Missionary Herald*:

If any one doubts the existence of China's great wall, let him come with me to Kalgan, and see for himself the identical wall built by the first Emperor Chin, in 200 B. C.

Take a steamer across the Pacific to Tientsen, then a native boat up the Pei Ho River three days, then pack saddle or mule litter five days more, through mountains and plains to Kalgan. Before you reach the city you see a dark line along the hill-tops just beyond the town, and by the time you enter our compound you see the wall stretching away over the mountains as far as the eye can reach, both east and west, with towers on all the prominent elevations. As we pay it a visit for closer inspection, you find it a windrow or ridge of reddish-brown porphyry rock broken, not cut, into irregular blocks. These are so well fitted to each other that the outer surface is tolerably smooth, and has somewhat the appearance of crazy patch-work.

It is about 10 feet broad at the base and 15 feet high, the sides sloping to a sharp ridge like a steep house roof. You may follow this wall eastward to the sea, and westward to Kansuh, the northwestern province; and so doing you will have traversed the entire northern frontier of China, 1500 miles. Though you find several hundred miles of adobe sun-dried mud wall, yet other hundreds of miles are of good brick and higher than at Kalgan. By the time you have traced its length you will be willing to concede not only that China has a great wall, but also that the ruler who could conquer so vast a country, drive out the invading Tartars, and build a fortification 1500 miles long to keep them out, was worthy to be called the first emperor, and to give his name (China) to the country.

If anyone laughs at the folly of spending so much labor on such a useless defense, let him remember that it was a defense only against horseback riders, armed with nothing but bows and arrows. A few guards on the watch towers could, with their signal fires on the mountain tops, easily rouse the villagers, far and near, to the defence of their homes. And this wall accomplished its purpose for over a thousand years, when the great Ghenghis Khan with his brave Mongol followers broke their way through.

This section of the great wall becomes for half a mile the city wall of Kalgan. A beautiful temple is built on this wall to celebrate Ghenghis Khan's victorious passage.

This two thousand year old wall is little known to the world at large, because there is another wall much oftener visited and described by visitors from the western world. It is near Peking and a far more imposing structure.

This is only an inner arm of the great wall, but five hundred miles long, and not so old by seven hundred years. It is built of cut granite and good brick, and is thirty feet wide at its base, twenty-five feet wide at the top, and thirty feet high. It is a fine sight as it winds over the highest mountain tops.

"DIVIDE THE INHERITANCE."—A fondness for civil litigation is one of the characteristics of all Orientals at the present day, and reference to the Talmudical writers shows that the Jews were much given to quarrels and disputes respecting the division of inheritances. This tendency was facilitated by the fact that then, as now, in the East, there is comparatively little wealth in the easily convertible form of coin, that investments so familiar among ourselves are absolutely unknown, but that a man's property is estimated very much as in the days of Abraham, by the number of his flocks and herds and of his household goods; as changes of raiment. A father might leave his property, for instance, as in the case before us, to be divided among his sons, giving his eldest son, as was the ordinary custom, a double portion. Hence arose the difficulty, how was the property, which we should call stock, to be portioned. For the settlement of such disputes the Jews had a special court, called "The court of thou draw, and I will draw." But the consent of both parties was requisite before this tribunal. The Talmud gives as an instance: "When a father had bequeathed to his first-born and younger sons a slave and an unclean beast, which could not be parted in two, then said the one to the other, 'Do thou draw, or I will draw,' or, 'Now do thou redeem thy share, or I will redeem mine.'" But here, as probably in the case in which the man appealed to our Lord, either brother might be perverse, and hinder the redemption.

"A JUDGE OR A DIVIDER."—The court decided whether or not there should be a division; and then the judges referred the actual partition, and the details of the business, to officials called "dividers," who were responsible for the equality of the division.

"THAT HAST MUCH GOODS LAID UP."—As has just been stated, wealth was more commonly accumulated in kind, than, as we should term it, realized. The absence of commerce on a large scale almost necessitated this, though, as we learn from the parable of the talents, the fructification of money by lending it to bankers was not unknown in our Lord's time, but had probably been introduced through intercourse with foreign nations after the return from Babylon. The four staples of agricultural wealth were corn, wool, oil, and wine, and all these could be stored and kept for several years. Corn, especially, preserved from damp in cemented cisterns or granaries, was and is very largely stored for future use by its possessors. The hoarding of wool explains the frequent allusions to the depredations of moths. Many Arab tribes at this day possess great hoards of wool, which they conceal in various places in the desert in what are called *silos*,—underground pits, about eight feet deep, very narrowly cemented, and bottle-shaped, with a narrow neck, just large enough to admit a man. These are carefully cemented up, and the ground leveled, to prevent discovery; and the secret is only known to two or three. These *silos* are frequently left unvisited for months. On one occasion, on the plain of Moab, a tribe of Arabs under whose escort I was travelling came upon a village and camp which had been recently deserted through war. At

once our men began to sound the ground in all directions—with the butt of their spears, knowing or believing there were *silos* near. They soon found one, and speedily opened it. It was full of indigo, then a valuable commodity, with which, in spite of my remonstrances, my guides speedily loaded all our animals, and passed on without the slightest compunction, congratulating themselves on their own cleverness.—*H. B. Tristram*, in *S. S. Times*.

SELECTED FOR "THE FRIEND."

Moderation in Trade or Business.

Seventh Month, 28th, 1858.—I am convinced that the vast business into which some enter, is a great departure from the humility and self-denial which becomes a Christian; and the disposition to overlook this departure, and frame excuses for it, is an evidence that the conscientious obligation, which Friends in the beginning, felt and acted up to, has been much lost among many business men. But I trust the Lord will preserve faithful Friends, and raise up among the young people, those who will be brought, by the convicting power of the Holy Spirit, to keep in moderation in their trade or business; and there-in show the excellency of the religion of the Lord Jesus, and that their eyes are directed to a heavenly inheritance, above everything in this state of being. How has the desire after riches drawn hundreds away from the work of salvation, and a steady walking with God. In this way the glory has departed from many, and the strength and ancient dignity of our religious Society become greatly eclipsed.—*William Evans*.

Egyptian Museum.

The Boolak Museum is, as it might be expected to be, without a rival in the world in the value of its Egyptian antiquities, though the British Museum surpasses it in the single point of historical paper.

In entering the museum one passes first through a small vestibule, containing tombs-stones, columns, and capitals; from different dynasties, and some sarcophagi from the time of the Ptolemys. Then we pass into the grand vestibule, filled with statues, tombstones, pictures, coffins of lime-stone, green shale, some of them covered with pictures and inscriptions.

Entering the museum proper, we find it divided into different halls, in which are the original historical monuments of the different epochs of the long history of Egypt. Egyptian mythology is far more complex than Grecian or Roman, and each succeeding dynasty modified it. In addition to the mummies of Rameses and Sethi, I saw the coffin and mummy of Amephois I., the head wearing a mask; also the coffin and mummy of Thothes II., and one mummy of a priestly scribe in such an astonishing state of preservation that the eye-lashes are visible. The teeth of another mummy are ground to a point. Caskets of wood dating back to fifteen hundred years before Christ are in an excellent condition.

Apart from the mummies, the greatest curiosity in the museum is a wooden statue of an old Egyptian found in a tomb at Sakarra, and belonged unquestionably to one of the earliest dynasties of the primal monarchy.

Feminine Ornaments.—There is a description in the third chapter of Isaiah of the dress of the Hebrew women eight hundred years before Christ: "Tinkling ornaments about their feet," "net-works," "round tires like the moon,"

"chains," "bracelets," "spangled ornaments," "bonnets," "ornaments of the legs," "headbands," "tablets, and the ear-rings," "rings and nose jewels," "changeable suits of apparel," "mantles," "wimples and the crispings-pins," "glasses," "fine linen," "the hoods, and the veils."

Many of these were imitations of Egyptian costumes and decorations, and in the Boolak Museum the originals can be found. I saw a bracelet for the upper arm adorned with turquoise, and a fan of gilded wood, with holes left where the ostrich feathers had been which belonged to it originally. One queer thing was a gold chain with three flies in gold foil. Anklets of massive gold, corresponding to the ornaments for the legs mentioned by Isaiah, and a great number of rings and bracelets. One of these bracelets was formed of pearls strung upon a gold wire.

In one of the cabinets I saw a necklace of gold, the links of which are in the form of cords of rope, cruciform flowers, antelopes chased by lions, jackals, vultures, and winged serpents.

The jewelry actually worn by Queen Ahhotpou one thousand years before Christ, and found in her coffin, is preserved. One of her bracelets had two hinges, and consists of gold figures engraved upon blue glass. A gold diadem was found in her hair, and is also here. A child's ball, whose owner has been dead half the historic period; many hair-pins, mostly made of wood; a chess-board, nearly four thousand years old; ink-pots, both for black and red ink.

The museum contains a great number of bronze statues, some inlaid with gold and enamel; and many large statues, some supposed to be the oldest in the world, are in perfect preservation. The god Osiris, in the form of a mummy, is made of bronze, inlaid with gold. There is a golden boat which rests upon a wooden frame. It has four bronze wheels, and effigies of twelve rowers, a helmsman, and an officer holding a baton.

I passed before the remains of a statue of Taharka. He was that Ethiopian King who figures in the ancient prophets (2 Kings xix, 9; Isaiah xxxvii, 9), and belonged to the Twenty-fifth dynasty, which conquered Egypt and made Thebes their capital. His name is spelled Tihakah in the Bible. It is interesting to note that all the authorities, Mariette, Lepsius, and Wilkinson, agree as to the time of this dynasty, the first putting it at 715, the second at 716, and the third at 714.

This Taharka made an alliance with the kings of Phœnicia and Cyprus against Assyria. He was defeated in Egypt by Esarhaddon, the son of Sennacherib, and compelled to return to Ethiopia. Then the country was divided among twenty princes, of whom Necho was one of the chief. After Esarhaddon died, Taharka undertook to regain Egypt, but he was driven out by Assurbanipal, whose other name was Sardanapalus.—*J. M. Buckley, in The Christian Advocate.*

Natural History, Science, etc.

Boiling Springs in New Zealand.—Ohinemutu is a native settlement on the shores of Lake Rotorua, situated in the very midst of boiling springs of every variety. As you look down on the village, you catch glimpses of the little brown huts appearing and disappearing through veils of white vapor. The whole country round seems to be steaming, and every step requires caution lest you should carelessly plunge through

the thin and treacherous crust of crisp baked soil, into unknown horrors that lie below. If you thrust a walking-stick into the ground, the steam immediately rises from the opening thus made. At every few steps you come to a boiling pool, often well-nigh concealed by a fringe of rare and delicate ferns of the most exquisitely vivid green—a peculiarity shared by all the plants which flourish in this perpetual vapour-bath. In some places a greenish gelatinous or slimy vegetable substance grows in the crevices of the rock, where the boiling spray constantly falls. It belongs to the family of algae, and ranks low in the scale of organization. It is the salamander of the vegetable kingdom.

Here, as in every other region I have visited, I am struck by the exceeding coldness of the springs and streams lying close to boiling fountains—a system of hot and cold water-baths, which the Maoris readily adapt to use by leading a small conduit from each to a rudely constructed tank, in which they can regulate the temperature by turning on the hot or cold stream. Some of the ordinary bathing-pools, which are not thus artificially cooled, are so responsive to the influence of the north and east winds, that while these blow, the temperature rises from 100° to 190°, and bathing becomes impossible until the wind changes. Very often the wind blows from the northeast every morning for weeks together, and dies away at sunset, when the water, (which at noon had reached boiling-point) gradually becomes comparatively cool.

The natives consider these luxurious baths to be a certain cure for all manner of ills. And so they doubtless are; but, as each pool differs from its neighbors in its chemical combination, it follows that bathing here at random must be about as unsafe, though decidedly not so unpleasant, as tasting all the contents of a chemist's shop by turns. But a certain number of the pools have been so long tried by the Maoris, that their beneficial results are well proven; and many sufferers, chiefly those afflicted with rheumatism, are carried up here totally helpless, and in most instances derive immense benefit from drinking and bathing in these mineral waters.

Of the many thousand hot and cold springs which bubble around us in every direction, a limited number only have as yet been analyzed, but these prove that the various chemical combinations are practically without number—no two pools being alike.

All the ordinary cares of housekeeping are here greatly facilitated by nature. She provides so many cooking-pots that fires are needless—all stewing and boiling does itself to perfection. The food is either placed in a flax basket and hung up in the nearest pool, or else it is laid in a shallow hole and covered with layers of fern and earth to keep in the steam. In either case the result is excellent, and the cookery clean and simple. Laundry work is made equally easy. Certain pools are set aside in which to boil clothes; and one of these, which is called Kairua, is the village laundry *par excellence*. Its waters are alkaline, and produce a cleansing lather; and they are so soft and warm that washing is merely a pleasant pastime to the laughing Maori girls. No soap is required. Mother nature has provided all that is needful: sulphate of soda, chloride of potassium and of sodium, enter largely into her preparations for washing-day.—*C. F. Gordon Cummings, in "At Home in Fiji."*

The Australian Bower-Bird.—On one of these excursions on the top of the mountain, I heard

in the dense scrubs the loud and unceasing voice of a bird. I carefully approached it as it sat on the ground, and shot it. It was one of the bower-birds, already mentioned—(*Scenopœus dextrosirois*)—with a gray and very modest plumage, and of the size of a thrush.

As I picked up the bird, my attention was drawn to a fresh covering of green leaves on the black soil. This was the bird's place of amusement, which beneath the dense scrubs formed a square about one yard each way, the ground having been cleared of leaves and rubbish. On this neatly cleared spot the bird had laid large fresh leaves, one by the side of the other, with considerable regularity, and close by he sat singing, apparently extremely happy over his work. As soon as the leaves decay they are replaced by new ones. On this excursion I saw three such places of amusement, all near one another and all had fresh leaves from the same kind of trees, while a large heap of dry withered leaves was lying close by. It seems that the bird scrapes away the mould every time it changes the leaves, so as to have a dark background, against which the green leaves make a better appearance. Can any one doubt that this bird has the sense of beauty?—*Lumholtz's Travels in Australia.*

Chinese Grass-Cloth.—Every one has heard of China grass-cloth—that beautiful fabric made in the Canton Province, and largely exported to Europe and America. The plant which is supposed to produce this [a species of nettle]—(*Urtica nivea*)—is also abundantly grown in the western part of this Province, and in the adjoining Province of Kiangse. Fabrics of various degrees of fineness are made from this fibre, and sold in these provinces; but I have not seen any so fine as that made about Canton. It is also spun into thread for sewing purposes, and is found to be very strong and durable. There are two very distinct varieties of this plant common in Chekiang—one the cultivated, the other the wild. The cultivated variety has larger leaves than the other; on the upper side they are of a lighter green, and on the under they are much more downy. The stems also are lighter in color, and the whole plant has a silky feel about it, which the wild one wants. The wild variety grows plentifully on sloping banks, on city walls, and other old and ruinous buildings. It is not prized by the natives, who say its fibre is not so fine, and more broken and confused in its structure than the other kind. The cultivated kind yields three crops a year.—*Fortune's Travels in China.*

New York Yearly Meeting.—From the printed minutes of New York Yearly Meeting, which assembled for the present year at Poughkeepsie; and from private information and the accounts published in different papers, we learn that it was largely attended, commencing on Fifth Month 9th.

The *Poughkeepsie Daily Eagle* publishes a kindly-worded notice of the meeting as follows:—

"Our city has been visited during the last few days by a body of men and women whose presence among us has not only been an important event in our course in fellowship, but has exercised a decided influence upon the churches and Christian people of all denominations. Dutchess County was settled many years ago by a colony of Friends, or Quakers, and a large number of our prominent families owe their origin to them. Although some have gone away from their ranks, there are still many who continue in fellowship, but has exercised a decided influence upon the churches and Christian people of all denominations. Dutchess County was settled many years ago by a colony of Friends, or Quakers, and a large number of our prominent families owe their origin to them. Although some have gone away from their ranks, there are still many who continue in fellowship, but has exercised a decided influence upon the churches and Christian people of all denominations. While they still retain the quiet and peaceful character that distinguished the found-

ers of the sect, they have developed a capacity for earnest and aggressive Christian work that fully equals that which any other denomination can boast, and excels most others, when numerical strength is considered.

"We note many important changes in externals, which do not seem to detract from the steadfast Quaker nature, bring them into closer relations with other Christians. The distinctive and peculiar dress is seldom seen. The 'plain language' is still heard, but it is uttered with polish and culture, and worldly etiquette is admitted to a place in their consideration. Music is not only permitted but is encouraged, and the sessions of the Yearly Meeting have resounded with hymns of praise, which would have astonished and shocked the good fathers and mothers of the delegates now here. And on Sunday last most of the pulpits of the city were occupied by 'Quaker preachers,' whose exhortations were listened to by crowds of pleased and assenting listeners. Evidently the prejudices born of the time when the 'pilgrim fathers' persecuted the Quakers have long ago disappeared, and a new era of religious unity has arrived."

We suppose few of the members of that Yearly Meeting would think the language of this extract too strong where it speaks of the changes in outward appearance and manners, and in the mode of conducting religious meetings, which are now apparent. It is to be regretted that many of the doctrines and testimonies of the Society of Friends, which George Fox and his associates were taught by the Spirit of Christ, and which they found to be in the accordance with the testimony of the Scriptures.

The Opium Question in Australia.—For the first time, the Opium Question has come under public notice here. In all our Colonies we have some Chinese for whose benefit (?) opium has been imported in quantity sufficiently large to make the Government an item of some importance to the revenue.

The usual depravity and degradation have followed its consumption and now a movement has been commenced, mainly we believe by the Chinese themselves, to obtain prohibitive legislation against its importation.

It is pleasant to find that the leading members of the different colonial governments are consenting to act together in this matter, and that the loss of revenue is not to be permitted to prevent the passing of such Acts as may be needed to bring this immoral traffic to an end.—*The Australian Friend.*

A Sign of Approaching Church Death.—An account is published of a minister's refusing a flattering call. When a friend asked him why, he said: "The church is in such a bad way that I am afraid it will soon die." "You surprise me," said the friend; "I was under the impression that many of its members were wealthy." "That is just the trouble," said the minister, "all its members are wealthy; there is not a poor man among them; and a church with no poor people in it is in my opinion, a moribund church."

Pomp and Vainglory.—Popular churches go beyond cleanliness and neatness both in regard to their person and church buildings: They must paint, cushion and decorate in the latest style; get all the worldly learning and wisdom inside as possible, and acquire the most gorgeous and costly of the popular arts on the outside; besides, costly glasses must be provided for both, stained and unstained, and the addition of as much timber above the comb as possible!

The gentry are proud of their temples, the Chinese players in their pagodas, the Mohammedans proud of their magnificent mosques, the Catholics of their gilded and jeweled cathedrals; and the popular Protestant church has long since sought to imitate and excel the magnificent structures in atheodism. What pride, what pomp, what show!

In order to raise money for such purposes they often resort to monuments of rivalry and selfishness, in the shape of large stones in the pavement alongside the building, with the names of those making the largest donations to the church engraved thereon; and in beautifully colored window-glass, with all kinds of decorations, paintings and works of art, together with the names of parties who furnished funds for such and such windows. What a premium on worldliness and exhibition of wealth in the church.

The long line of formal ceremonies and departure from apostolic simplicity that follows the erection of such temples of show and splendor is too well known to need repetition. The eyes of the world are not closed to such inconsistencies in the churches; they know what real Bible salvation is when they see it, and say:

"The radical people in their plainness, unpretension and strict compliance with the Bible, come nearer—by far—following Christ and his disciples, than those who sit in cushioned seats and listen to their sermons, speeches, and the operatic music by a hired choir."

Truly said, We clip the following from a rank infidel paper in regard to the foolish expenditure of money for stained glass windows too often found in large, high-towering-steeple churches, which will illustrate how the infidel world looks upon such things.

In Ft. Worth a lady asked me to particularly notice the "stained-glass" windows in "our church," which cost \$500 a piece.

"But madam, I don't like to look at those stained glass windows," I replied.

"Don't like to look at them! Why?"

"Because, whenever I look through one of those 'stained-glass' windows, I always see the dirty butts and hovels and ragged children of the poor working-classes whom you have defrauded to get the money to pay for those windows. It all comes from the \$500 laboring window glass, I see the 12,500 loaves of bread that \$500 would buy, that would make happy 12,500 little empty stomachs. I also see the stained 7,500 feet of the 'sells' of 'Christians' who have sold their fellow men in order to get the money for such foolish purposes. Christians? spend enough money every year for rum and tobacco, to feed and clothe all the poor."

The churches have so long conformed to the world that they have brought much reproach upon the cause of Christ. The heads of sin upon Christians—thieves, drunkards and opium eaters—because rum, tobacco and opium are shipped from so-called Christian lands. Who is responsible? The Bible is not, neither the class of persons who strictly adhere to its teachings.

Prison Parole Law.—Wisconsin two years ago passed a Prison Parole law, which permits the paroling of a prisoner when the minimum prescribed for his offence has expired one week before the end of his term. The law gives the warden power thus to offend in the chief executive of that State. He released upon parole two burglars, who, although sentenced to imprisonment for ten years, yet had reached the two years' limit. They are now allowed to go out on good behavior until the expiration of the full term of their sentence. They will be under surveillance, and if they do anything untrustworthy, they will be arrested and remanded again to confinement. They have to report every month where they are and what they are doing. If they neglect to do so, or if from any source it is discovered that they are guilty of improper conduct, they forfeit their privilege and are re-incarcerated. This is a new departure from original intention in our country, and its advantages except from it happy results. It is modelled after the English jurisprudence in this respect. The experiment in the case of youthful offenders has been tried with good consequences at the Elmira Reformatory, New York. Now a Western State proposes to test its efficiency in the case of older criminals. It will be under the public eye, and its merits or demerits will try it. At any rate, it is fair to give them a chance thus to vindicate their manhood, and see if they have truly reformed. This is a better way than the too common practice of com-

mutation, which permits the recipient of executive clemency to leave prison an absolutely free man, and without any legal conditions and restraints. The parole system sets a watch about the released man, and so bedges his way that, while the law relaxes not its hold on him for the community's protection, every inducement is offered him to be honest and true and honorable. Never can thus be exercised without the sacrifice of justice. It is to be hoped that in its practical operation the new law may vindicate its existence.—*The Presbyterian.*

THE FRIEND.

SEVENTH MONTH 12, 1890.

Some weeks ago we received a letter from a correspondent in Kansas, inquiring whether the words translated by "baptize" or "baptism" in our version of the Scriptures import a bringing the thing baptized into a like condition, or character, or an imparting a like quality or character to it, with that with which it is placed in contact.

The primary meaning of the Greek word *bapto*, is to dip; but, as is the case with many other words, it also has secondary meanings which have grown up around it, some of which have but a faint connection with the primary.

R. W. Dale, in his learned treatise on the use of the word by Greek writers, enumerates among the secondary meanings, to dye, to stain, to smear, to gild, to temper, to imbue.

The same author speaks of the allied word *baptizo*, from which our English term is more directly derived.

After a very extended consideration of the various places in which the word is used by ancient Greek writers, and in the Bible, he comes to the conclusion that the essential meaning of the word is to express the fact that the object of it is brought into some particular condition—but without describing the mode by which that is effected. For example, if it be translated *immerse*, this immersion might be effected by a person being dipped or plunged into the fluid, by walking into it, or by its rising around him, as might happen to a person on the sea-shore in the flow of the tide.

Thus Strabo speaks of the soldiers of Alexander marching through floods, "baptized up to their breasts." And we have such expressions as "baptized by anger;" "midnight baptized the city with sleep;" and an extravagant man is spoken of as "baptized by debts."

Professor Harris, of Haverford, in a kind response to an inquiry on the subject, writes as follows:—

"My impression is, that baptize simply means to plunge, to immerse. If it acquires a more subtle meaning, it would be because other circumstances had been mentioned. For example, a fabric dipped in a dyer's solution would naturally acquire the color of the solution; not because that is implied in baptizing. It is better to keep to simple meanings and natural interpretations."

Since the reception of the letter from Kansas, above referred to, another has come to hand from an aged friend residing in Kentucky, who says he "has never seen but one Quaker to know him to be such,"—although now nearly 81 years of age. He sends three questions:—

1. "Where did water baptism have its origin?"
2. "What was the design of water-baptism?"
3. "What good or evil results has water-baptism?"

In answer to the first of these, there seems a strong probability that whatever traces of baptism may be discovered among the heathen nations of antiquity, its introduction into the Christian church came from its practice among the Jews. The laws of Moses and the Jewish customs ordained divers washings as a means of ceremonial purification. It is stated in Mark vii: 4, that when the Jews came from the market "excepting they wash they eat not. And many other things there be which they have received to hold, as the washing of cups and pots, brazen vessels, and of tables." Hence, it early became the custom among them, that when converts to Judaism were received from among other people, they were required to be washed or baptized, being regarded as ceremonially unclean.

The early Christians were Jews, and for a long time held with much tenacity to the customs of their people; hence it was very natural for them, when proselytes were received, especially from the gentile world, to have them baptized with water, as a token of their admission into church membership.

If baptism has always been regarded simply as a sign, that the baptized person was thereby recognized as a fellow-member in the outward Church, it might have been looked upon as a harmless practice. But, according to the natural tendency of the human mind, the form has with many taken the place of the substance, and a mysterious influence has been superstitiously ascribed to the simple rite of sprinkling a few drops of water on the human body. In the records of their labors among the Iroquois Indians, the early Jesuit missionaries relate that they contrived to baptize many of the Indian infants, notwithstanding the opposition of their parents, and thus save them, as they imagined, from perdition, by skillfully dropping into them part of the contents of a spoonful of sugared water which they pretended to convey to the mouths of the sick children! Whatever turns the attention of men away from Christ, the alone Saviour, and leads them to expect spiritual benefit from outward rites, so far tends to hinder their coming to Him who alone can change the heart and prepare the sinner for entrance into his heavenly Kingdom.

A second evil which has followed the use of this rite is, that it has been the source of endless contentions among the professors of Christianity—both as to the different modes of administering it, and as to the classes of people to whom it should be applied.

Edward Burrough remarks respecting the practice of baptism and the supper, "While you are with zeal prosecuting your outward performances and following them, you neglect the inward and the substance, which is *Christ within you, the hope of glory.*"

ITEMS OF NEWS.

The bill for admitting Idaho as a State to the American Union, having passed both Houses, received the signature of the President on the 3rd instant. On the next day our flag received 43 stars in place of the 33 heretofore on it—five states having been admitted since the 4th of Seventh Month last.

The Federal Election bill has passed the House of Representatives; two Republicans voting with the Democrats against it. The Senate, it is believed, will sustain it.

The Census Supervisor of Buffalo, New York, says the population of that city is 250,122. At a meeting of citizens it was decided to ask the Government to have a recount of the city made. The population of Columbia, South Carolina, in 1850, was 10,800; the census just taken shows 16,800. The population of Lancaster, Pa., is placed at 31,800, a gain of 6031.

Both Houses of the Louisiana Legislature having

passed the Lottery bill by a two-thirds vote, it has been vetoed by Governor Nichols. It is to be submitted to a vote of the white suffragis, if passed over the veto. The Governor says: "Who are the six unnamed men who are to join with a seventh and known one to constitute the new lottery company? How comes it that we are not informed as to their identity, and enabled to see the names of the seven named ones? There is a world of meaning in their silence. In the most trifling affairs of life men seek to know with whom they deal. How comes it that, in a matter of this importance, the General Assembly has been willing up to now to close its eyes and move blindly in the dark? It is not until it is too late to take any final step and plunges this State into untold trouble. Is there nothing significant in the vote by which this bill has passed—the exact two-thirds vote in each House? and nothing deeply significant in twelve votes of the House and four of the votes in the Senate by which that exact majority was reached? Is not the future foreboded?" To me it most certainly is.

"I say to this General Assembly in all earnestness, that, should this measure be passed, we will enter upon a period of strife, such as has never been seen before in this land. If the contemplated corporation ever be formed, we shall enter upon an era of corruption and degradation, beside which the era of reconstruction will appear as one of honor and happiness.

"And let me say to you that, should this measure be adopted and carried out, in my opinion, no good will ever be done. If the six mill tax is raised, at the price of our honor and our liberty. Extravagant profligacy and corruption will assuredly follow the receipt as night follows day. I feel thoroughly satisfied that the effect of the adoption of the measure will be that, while the six mill tax would be kept, there will be no immediate falling of the legislative appropriations for charitable and other purposes for which this money will have been directed to be applied, and a wondrous corresponding increase of the application of the general fund to the payment of the interest-bearing debt.

"I believe that every possible outstanding claim against the State, valid or invalid, now rated as safe of payment by the State or otherwise, will be first depreciated, and whilst so depreciated skillfully brought up, to be by subsequent judicious legislation recognized and paid for, through the funding operation or otherwise and that the reduction on one side will be followed by an increase on the other.

"In other words I believe that, at the end of twenty-five years, we will not only find constitutional bonds outstanding to the utmost limit of the funding law, but we will also find an additional amount of interest-bearing debt, which, by that time, will have acknowledged and provided for as to interest, but not as to capital; and that, in those twenty-five years, a vast amount of interest will have been paid out unnecessarily, improperly and illegally. In whose hands those interest-bearing bonds will be found, time will develop.

"At the end of twenty-five years there will be the same claim of poverty of Louisiana, and the same claim on its behalf for the continued existence of the lottery.

"I believe that for the necessity of the present measure is sought to be predicted on the assumed condition of the poverty of Louisiana, L, as its Governor, pronounce it totally without justification or warrant. Some other motive for this measure must be found than that her people are unable, honorably, to carry out the duties of citizenship. Knowing this measure as I do, as one dishonoring and degrading Louisiana, I believe, as it will continue to meet, my most determined opposition."

During the nine days ending Seventh Month 5th, the deaths in the city numbered 623, which is 37 more than during the corresponding week of the year before; and during the corresponding week last year. Of the foregoing 321 were males and 302 females; 276 died under one year of age; 141 died of cholera infantum; 67 of consumption; 44 of marasmus; 30 of influenza; 26 of typhoid fever; 26 of convulsions; 19 of inflammation of the brain; 20 of convulsions; 19 of inflammation of the stomach and bowels; 15 of debility; 13 of typhoid fever; 12 of pneumonia and 2 of congestion of the brain.

In election at Barrow-on-Fraser, on the 24 instant, Duncan, Liberal, was elected over T. P. Cairns, Temperance, and Wainwright, Tory candidates. Cairns has written to Duncan that he is glad the liquor candidate (Wainwright) was defeated.

On the 7th of Sixth Month, Peschko, a non-commissioned soldier, who was at Vladivostok last Eleventh Month on horseback to ride across Siberia, a

distance of nearly five thousand miles, completed his journey successfully. Upon his arrival at St. Petersburg Peschko was immediately made the object of enthusiastic demonstrations on the part of the male inhabitants of the Russian capital, and received several deputations from officers representing all the cavalry regiments of the Russian army, who were eager to congratulate him on his successful accomplishment of an almost unparalleled task.

THE SUMMARY OF EVENTS was prepared this week, as usual; but the copy being lost by the messenger, there was not sufficient time allowed to collate the usual variety, and the above is given to take its place.

DIED, at West Branch, Iowa, on the 14th of Fifth Month last, LYDIA, wife of Peter N. Dyhr, a member of West Branch Monthly Meeting. She was a daughter of James and Eliza Staples (the latter deceased) and was born in North Ferrisburg, Vermont, Third Mo. 25th, 1843. Her life of earnest Christian devotion was adorned by a meek and gentle spirit. Years of great bodily weakness caused by successive strokes of paralysis, were passed in cheerful resignation and continued fulfilment of religious duties. She attended the meeting for worship the last First-day of her life. Some weeks before, she told her husband one morning that she was desirous of going to the West. Her Spiritual instruction and refreshment seemed to abound towards the last, of which she freely conversed with him; yet ever with a humble view of herself. She made preparation for the event, as if it was expected to be near, and the final stroke of paralysis found her ready and waiting.

At Snow Camp, N. C., at the residence of his son, Malon Dixon, Fifth Mo. 5th, 1890, suddenly passed away, JOHN DIXON, in the 80th year of his age, an elder and member of Cane Creek Monthly Meeting.

At her residence near Woodbury, N. Jersey, on Fourth-day, Fifth Month 25th, 1890, ANNA J., daughter of the late Warner T., and Deborah Whitall Cooper, died. She was a member of the West Branch Monthly Meeting, more than ordinarily gifted, and was in youth devoted to intellectual pursuits, which were relinquished with cheerfulness for protracted care of the aged and the suffering in the home sphere, where her quiet conscientiousness and loving ministrations won for her the esteem and affection of all who were brought into her life. Though called in her early prime from much usefulness, which she did not leave without a struggle, she was favored, before the close, with peace and quietness of spirit, and we believe it may be said of her, "That life is long which answers life's great end."

DIED, at her residence in this city, Sixth Mo. 16th, 1890, ABIGAIL HUTCHINGS, widow of the late John, a minister of the Monthly Meeting of Friends of Philadelphia, in the 93rd year of her age. Although in very feeble health for eighteen months previous to her decease, yet she was able to attend our religious meetings until the middle of the Twelfth Month last. About the first of this year she was attacked with a prevailing influenza, from which she partially recovered, but an acute disease afterwards setting in terminated her life after a few weeks confinement to her room. Her communications to the ministry, usually by the faculty of a faint pen, were full of love and humility, and her social disposition endeared her to many, among whom was a number of those much younger than herself, to whom, as well as to the sick and afflicted, she had often been made an instrument of consolation and encouragement. In the Third Month last she wrote to a sister at a distance, "Looking over the leaves of my long life, sensible of omissions and commissions, I feel through the mercy of my holy Redeemer all has been forgiven and blotted out, and the cheering hope when the Lord is pleased to call me home, will be that I may be loved in love, and all the just of all generations who have entered the pearl gates." To a Friend who visited her about this time she remarked, "When I awake in the morning, I feel that my service has been very poor and weak. But soon I am visited with a sense of sweet peace, and I feel that I have been favored with experiencing Divine support, she was enabled to bear her sufferings, which near the close were at times great, with patience and resignation; and although unable to express much during the last few days of her life, she felt the feelings of a faint pen, and she gave evidence to the watchers of her love. Thus, I believe, she was enabled to realize the truth of the language which she had before expressed as applicable to her. "Though I walk through the valley and shadow of death I will fear no evil."

FOR "THE FRIEND."

Incidents and Reflections.—No. 232.

The incidents collected in this paper are all instructive in one direction or another, but in most cases the reader can supply appropriate reflections from his own mind.

VOID FRETTINGS.—"What a pity it is," said a grazier to a small farmer who had just entered on a little farm, "that that pasture of yours is so overrun with thistles!" "It is a pity," was the reply of the small farmer; "but if I fret myself into a consumption, it will not free the thistles out of the ground; so I will try whether abor and good management will not put it into better order."

BE PREPARED.—A few years ago the keeper of a life-saving station on the Atlantic coast, found that his supply of powder had given out. The nearest village was two or three miles distant, and the weather was inclement. He concluded that it was not "worth the while to go so far except for such a trifle;" he would wait for a few days before sending for a supply. That night a vessel was wrecked within sight of the station. A line could have been given to the crew, if he had been able to use the mortar; but he had no powder. He saw the drowning men one by one in his sight, knowing that he alone was to blame.

LAZY PEOPLE TAKE MOST TROUBLE.—There was a man in the town where I was born, who, being lazy-minded, used to steal all his firewood instead of working for it. He would get up on old nights and go and take it from his neighbor's wood-piles. A computation was made, and it was found that he spent more time and worked harder than if he had earned it in an honest way.—*American.*

PROGRESS, APPARENT, NOT REAL.—When Captain Parry and his party were in search of the North Pole, after travelling several days with sledges over a vast field of ice, on taking a careful observation of the Pole-star, the painful discovery was made, that while they were apparently advancing towards the Pole, the ice-field in which they were travelling was drifting to the south, and bringing them nearer to the verge, not of the Pole, but of destruction.

It is related of Abraham Lincoln that, when he was a young man, he boarded with a deacon,

who came one night to his room and told him to rise, for the stars were falling, and the judgment day had come. Young Lincoln rose and looked out of the window, and, sure enough, the stars seemed to be falling in showers. But when he looked away towards the celestial distances, far above the flying meteors, he saw the grand old constellations firm in their places, shining just as he had seen them from his childhood. So he returned quietly to his bed, feeling that there was nothing to fear, that all was well.

P. Jones, in his Annals of Oneida County, N. Y. says:—

Remsen Village in Oneida Co. N. Y., was formerly conspicuous for its intemperance, and the means it furnished to its own and the neighboring inhabitants. A respectable merchant, who has now banished alcoholic drinks from his store, informed the author that at one time he retailed three thousand five hundred gallons of whiskey in five months. He said, "Such was the press, that we did not stop to measure, for when a customer brought a keg, we inquired its capacity, placed it under the tap, and filled it, rolled it away, and under with another." "Yes," said a partner, who was sitting by, "and we did not make one penny by all this liquor traffic, for at the same time we were retailing goods on credit, and with our strong drinks we sent out among our customers such a flood of bankruptcy, ruin, and death, that in the end we lost more than we made by it." The temperance reform has performed wonders for Remsen.

DETECTION, STRANGE MEANS OF.—Once, in a certain part of Germany, a box of treasure that was being sent by railway was found to have been opened and emptied of its contents, and filled with stones and rubbish. The question was, who was the robber? Some said it was found sticking to the box and a clever mineralogist, having looked at the grains of sand through his microscope, said that there was only one station on the railway where there was that kind of sand. Then they knew that the box must have been taken out at that station, and so they found out who was the robber. The dust under his feet, where he had set down the box to open it was a witness against him.

John Foster, in one of his thoughtful essays, says:—

"If a reflective aged man were to find at the bottom of an old chest—where it had lain forgotten fifty years—a record which he had written of himself when he was young, simply and vividly describing his whole heart and pursuits, and reciting verbatim many passages of the language which he sincerely uttered, would he not read it with more wonder than almost every other writing could at his age inspire? He would half lose the assurance of his own identity under the impression of this immense dissimilarity. It would seem as if it must be the tale of the juvenile days of some ancestor, with whom he had no connection but that of name."

MIND, NOT TO BE LEFT UNTILLED.—Thelwall

thought it very unfair to influence a child's mind by inculcating any opinions before it should have come to years of discretion and be able to choose for itself. I showed him my garden and told him it was my botanical garden. "How so?" said he, "It is covered with weeds." "Oh," I replied, "that is only because it has not yet come to its age of discretion and choice. The weeds you see have taken the liberty to grow, and I thought it unfair in me to prejudice the soil towards roses and strawberries.—*Cotteridge's Table Talk.*

In 1821, Nathan Hunt, of North Carolina, paid a religious visit to Great Britain. His ministry was very powerful and effective. Wm. Allen, in his memoranda, thus speaks of it:—

"It seemed to make a great impression; he compared the enemy of souls to a spider, who first wound his web round one leg of his prey, then went away, and returning again, seized upon another thus pursuing his victim until it was completely powerless, and then he poisoned it. Many were affected, and I think his communication will long be remembered."

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 206.)

1796. Third Mo. 15th.—I attended the Meeting at Moorestown, and sat with a committee who had under consideration the subject mentioned in the Yearly Meeting's minutes, relative to a worldly spirit, &c. I had some close labor touching "this root of all evil," the love of money. It seems to go hard with some old folks, and those who are eagerly pursuing outward wealth. So secure were some, they were ready to say, "Touch me not." But I told them, "Joseph, or little David was yet alive; therefore let no man's heart fail him." The next day, at Upper Evesham Meeting, I had to speak of dangers that may happen, if the watchmen fall asleep, and give not the alarm at the approach of the enemy. It appeared that now a worldly spirit was advancing fast into our Society, and for want of faithful, wakeful watchmen, many, with their sons and their daughters, are likely to be taken captive; the rich are getting more rich, but the poor are oppressed; and I believed the time loudly called for an alteration; and that now rye and corn sold for so high a price, and other things high also, Friends' example in moderation might be loud preaching, even if we could submit to supply the poor at one-third lower than the highest price, what a pleasant savor it would yield in the country round us. These sentiments it seemed right for me to press home to my friends closely.

17th.—Attending Haddonfield Meeting, I had to mention the manner in which we ruled the ox and the ass, which are bought with our money, and therefore ought to be subject under us, to come or to go at our bidding. But ourselves, who are bought at a higher price, by the Saviour of the world, do not obey Him as our Great Master, nor keep his holy law. Thus, are we not

more stubborn than the brutes? If the brutes obey not, we give them stripes. And must not the Lord chastise us for disobedience? We may consider for ourselves. As we whip harder for the second offence, may we not look for the same measure ourselves, if still disobedient? As the inhabitants of this place have been lately visited by the rod of sickness, and many numbered to the silent grave, of different ages and sexes, and have not some been raised as from the grave and spared longer, who have made promises of amendment in their affliction, yet have not kept them? Will not the Lord visit it again by sword, famine or pestilence? I had to press these things for close consideration.

19th.—I have several times visited a sick Friend, who said she felt a sweet calm; that she had all she could look for, death was no terror; adding, "Oh, how trying would a wounded conscience be at such a time as this!"

24th.—I was at Pilesgrove Monthly Meeting, as poor and low, I thought, as I ever felt myself. Next day at our Quarterly Meeting, I thought it right to mention the situation of two old Jersey Indians near us, one of whom is about eighty years old, and the other blind, about sixty, for whom I have been concerned, that they may be properly cared for. A committee was appointed to attend to their case.

26th.—Attending our General Spring Meeting in Philadelphia. I believe it was a favored season, remarkably so. Our English friends, Deborah Darby and Rebecca Young attended, being nearly ready to return after accomplishing their religious visit in America; our Friends Samuel Emgen, William Savery and two women Friends, going over with them; they all obtained certificates at this meeting.

Sitting with the Committee on Indian Affairs, I was concerned to open my sentiments concerning the propriety of taking the situation of our Jersey Indians under care, as well as those more remote from our dwellings: as I remember to have heard my father often mention the Indians' kindness to our predecessors in the Jerseys, when they were few, and the Indians many.

Fourth Mo. 3rd.—I attended a meeting, held in a school-house, over Cooper's Creek, a large and solid meeting, which ended well. On the 5th I had a meeting at a school-house, near Gloucester, not very large on account of a burial and visited four families in the afternoon; and the next day five families, which closed our visit to families of Newtown, meeting about ninety, to our comfort and the satisfaction of those visited, for aught that appeared.

10th.—I have visited several other sick persons, not without a reward, and had two pretty large meetings in school-houses to good satisfaction.

11th.—At our Monthly Meeting, I laid before my Friends the continuance of a concern, to pay a farther visit within the governments of New York and Canada, which was referred to the next meeting.

13th.—Visiting sick people, of whom there are many; and some die at short warning. To me the season seems alarming, and I fear hardness of heart increaseth; with extortion in high prices, as though there would not be a living for the poor. Oh, the worldly spirit which prevails. Will not the Lord be angry, and stretch forth his hand more severely?

15th.—Again I have visited several who were under deep bodily infirmity, the state of whom caused serious contemplation concerning some circumstances. Some are falling out with one another by the way, contending about things which appear to be of so little worth in a dying

hour, that there is no name of small enough value to call them by. Oh, that all would try to be rich in good works!

17th.—I thought I saw the enemy had made an inroad amongst us by stirring up discord, and setting Friends at variance with one another in strong parties, both pleading they were right, when it appeared to me both were wrong, and gave way too much to thinking evil. For this I was grieved, and labored with both to be at peace. The love of the world was the beginning of this; when that prevails, such are its fruits.

19th.—I have been visiting the sick; was humbled under a sense of the speedy call from time to eternity, in this day of too general depravity. Many trying days I have to pass through, perhaps all for my good; these are not joyous, but if they the better prepare me for the Lord's work, his will be done. At Pilesgrove Meeting, the 21st, I was enabled to do what I believed to be my part, faithfully. The next day was at a place where a marriage-dinner was soon to be provided for my youngest son. I had to open my mind on the subject of such entertainments freely, and with some weight pressing the necessity of true moderation, and advising against what has crept in relating to the ceremony of particular waiting on the bride and groom so called. My advice had a place in the minds of those concerned. The company at that marriage was small. I attended, and was pleased to see a good degree of right order observed. Much loose and disorderly conduct at marriages might be prevented by timely care, which should be exercised by Friends rightly concerned, whether elder or younger.

25th.—For some days, sorrows, trials and grievous temptations have attended; yet, I believe, I had some service amongst the poor afflicted widows and fatherless children, in and near Salem, whom I have visited. At Salem Monthly Meeting next day, I had much labor both in men's and womens' apartment to good satisfaction.

I have had to review the vanity which prevails with the young people of our time, and the avarice and extortion that seem visible among older ones, which produce mournful feelings. Nor has it felt pleasant to my exercised mind, to observe so much of the free use of silk for clothing in our country, which is so plentiful for wool and flax; might not these seem to be sufficient on many occasions without showing the desire of over-much delicacy. I have been at Greenwich and Woodbury Meetings, where poverty was perceived. I fear the Truth is at a low ebb among too many of us.

Fifth Mo.—I have apprehended the hearts of many professors resemble the stony ground; so that although favor to them is renewed, for want of depth in root, they fall into old customs again.

Close work in answering the queries in our Preparative Meeting. I feared that evasive answers to them would be likely to become a snare.

8th.—I had to minister sound Truths, though it seemed hard work, and hard for people to bear; yet I hope our meeting ended well to-day. Next day was our Monthly Meeting, where my concern mentioned last month was united with, and a certificate granted according to my prospect, signed with unanimity. The day following, I had a desire to see a number of Friends come together at a suitable time and place, who had led in hardness, one against another; which desire prevailed, so that a time was fixed, all uniting therewith, except one person, who had lost his

right amongst us. He went to the others with a view to discourage their attending, and then told me that he had seen them; that they did not purpose to attend, neither did he. I said he might use his pleasure, I intended to go to the place, and if none came I could sit quietly by myself, and had nothing prepared to say; yet, at the same time, the Friends all came, except that man's wife, and we had a favored season, which had a uniting tendency. I could say I was thankful for it, that I loved them, and did believe they loved me.

12th.—The time is near approaching that I must leave near connections and all again, and become as a pilgrim, which, I think, is for the cause of Truth and good of souls. Taking leave of my friends in much love, at our Week-day Meeting, many tears were shed. After I left home I found my mind secretly turned to try to be at Bordentown, and getting there, I had cause to believe it was right, though I see but little way before me.

15th.—On First-day I was at a pretty large meeting there; and at Trenton another in the afternoon. The last, especially, was a favored season. I was now a little revived, believing I was in my proper place thus far. The next day, at Lambertton, where is no religious meeting held, or Meeting-house of any sect, I had a large meeting in an empty store-house, and feeling my heart so much enlarged in love to the people, I seemed constrained to stand near two hours on my feet, which almost surprised me, it having been uncommon with me to stand above half so long. This was a highly favored season, and many hearts were tendered; my mind was also bowed in thankful reverence before my Divine Master. Many of different ranks, both black and white, came to take leave of me, with tears trickling down—my tears also were mingled with theirs. It truly was a comfortable time. A more solid meeting, or greater attention, I think I never saw before at any time or place, than what was observable here on this occasion.

Next day, travelling to Rahway, I thought none had to feel more of inward poverty than poor me; yet as the Lord is not wanting to assist his devoted ones in the needful time, there is no cause for murmuring.

(To be continued.)

FOR "THE FRIEND." Liberty of the Spirit.

When He, the Spirit, is come, He will guide you into all truth, will take of the things of mine and show them unto you. And the promise is that the Father and the Son will take up their abode with his believing children The Spirit is to convince the world of sin, or righteousness and of judgment. "Friends have ever made the work of the Holy Spirit in their hearts one of their prominent doctrines, believing that it convicts the unregenerate for sin and leads, as well as comforts, the redeemed child of God. At the time George Fox commenced his public ministry, history tells us that many held the doctrine, that a certain part of the human family were ordained to salvation, and part to eternal destruction. George Fox thought that the Holy Spirit visits every body, and makes salvation possible to everyone as there is a willingness to close in with the visitation of the dayspring from on high. R. Barclay speaks of the seed of God in the heart, says it is no part or parcel of our nature, but an emanation from God; or, in other words, visitation and quickens into life as we receive it. The Apostle told the Galatians that the Gospe

which he preached, he received "by the revelation of Jesus Christ," and to the Ephesians he exhorts: "Awake thou that sleepest and arise from the dead, and Christ will give thee light." And He says to the Corinthians, "Know ye not that Christ Jesus is in you, except ye be reprobates." Perhaps no branch of the Christian Church, more than the Society of Friends, places stress upon the privilege of being led and guided by the Holy Spirit, that the true public ministry has its origin from this source, that Christ is not only head over his Church, but head over all things to his Church, that if anything is revealed to another that sitteth by, the first is to hold his peace.

GEORGE BRIGGS.

New Sharon, Iowa.

The Moral Question Involved in the Public Service.—A man who filled up his store or factory with workmen chosen because they agreed with him as to the tariff or State's rights, and changed whenever their places were needed for more effective political workers, would probably get into a strait-jacket even before he got into bankruptcy. But to a moralist there would be a vast difference between his behavior and similar conduct on the part of a President, or Governor, or Mayor. After all, he would be but doing as he chose with his own; unless he endangered the rights of his creditors or the comfort of his family, the worst to be said of him would be that he was a fool for his pains. If, during his absence, however, his trusted manager or foreman were to deal thus with his interests, the most charitable critic would recognize in the latter something worse than a fool. His conduct might not be a crime, while the larceny or embezzlement of his employer's goods would be; but this is only because for so unlikely a form of moral obliquity no law has made provision; it would be equally abhorrent to right-thinking men, equally dangerous to society. And this is precisely the conduct of every public officer who creates a vacancy or makes an appointment for personal or partisan gain. A President who deprives the country of an upright and competent officer, to meet the views and advance the ends of selfish and unscrupulous political intriguers, is no less blameworthy than one who should give them the public moneys; he may be, indeed, less keenly conscious of his guilt, if he has lived long years in a moral atmosphere poisoned by the malaria of "spoils" politics, but while he has any honor or conscience left he will feel ashamed of what he has done.

The question is equally clear if regarded in another aspect. All thoughtful and patriotic men agree that bribery, more or less direct and more or less open, in connection with elections, is a great and growing evil, although it is no less evident that this evil can be much more readily recognized and denounced than remedied. But it is a perfectly legitimate and logical outcome of the spoils system in politics, and cannot be consistently condemned by any one who approves of using appointments to influence political action or reward partisan service. Whether a "worker" is paid by a check or by a sinecure—whether a man's vote is bought for \$5 or for the chance to dawdle a fortnight at street-sweeping, can make no difference as to the right or wrong of the matter; or rather, while the man bribed is equally guilty, whatever the form of his reward, it is surely more odious and more noxious to bribe with what is the people's than with what is one's own, to purchase suffrages or influence at the taxpayers' cost than

to pay for these out of the corruptor's pocket.—*From a Paper read by Charles J. Bonaparte, of Baltimore, on "Civil Service Reform as a Moral Question."*

FOR "THE FRIEND"

Hylton's Sand Pit.

Near the place where the Pensauken Creek empties into the Delaware River (a few miles above Philadelphia), it is bordered by high banks of sand and clay, which have been found to have a commercial value, and are largely quarried. The near proximity of a railroad (a branch of which extends into the quarry), and the presence of a navigable stream, so reduce the cost of shipping the material, that it has become a source of much profit to the owner, and many thousands of tons are annually sent away.

On the 27th of the Sixth Month I visited the locality, and examined the layers of gravel, sand and clay, which have been revealed by the excavation. Much of the sand contains a small proportion of clayey material diffused through it, which gives it sufficient tenacity to render it available for making the moulds in which iron castings are made.

The clay is mostly white, being an impure kaolin, of which fire-bricks are made. This formed a thick bed at the base of the diggings.

These pits are situated in the *cretaceous* formation, so called from the Latin word *creta*, meaning chalk. This name was given to this geological formation, because in England it contains great beds of chalk. Although this material is not found in our New Jersey deposit, yet there are other features in common, particularly the kinds of fossil plants or animals, which it contains, which shows that it belongs to the same place in the geological map which has been given to the chalk districts of England.

In New Jersey this formation includes a belt or strip of country which stretches obliquely across the State from Raritan Bay, on the northeast, to the head of Delaware Bay, on the southwest. The northwesterly part of the *cretaceous* formation contains the beds of plastic clays, which include fire-clays and potter's clays; and the southeasterly part is marked by various beds of marl and sand. All these strata are disposed in regular beds, and lie smooth and parallel like the leaves of a book, apparently never having been disturbed since they were first deposited in the ocean. The clay beds are the lowest, and on these lie the marl and sands.

The whole of southern New Jersey, south of a line extending from Trenton to the mouth of the Raritan River, is covered with material derived from pre-existing rocks, which have been broken up, ground and sorted, mainly by the action of water. They cover up the submerged rocks to the depth of many hundred feet. What a wonderful view does this give us of the extent of these processes—by which the Almighty Creator has prepared the earth for the habitation and convenience of man! When the deposition of these strata began, southern New Jersey must have formed part of the ocean; and in course of time the deposited material accumulated to the thickness of nearly 800 feet. After this deposition had ceased, the whole of this ancient shore has been elevated nearly 400 feet above the ocean level. This uplifting was done gently, without disturbing the relative positions of the strata of clay, marl, sand, etc.

After this surface was raised above the ocean

level, the action of the elements gave it the diversified appearance it now presents. The streams which form the drainage system of the State, gradually cut their channels deeper and deeper, and washed out the loose material over which they flowed. The hills, which are left, such as Mt. Holly, Arney's Mount, etc., were probably at one time only a part of the general level, and have been brought into prominence by the surrounding material being washed away.

But in following the train of thought suggested by the layers of sand, gravel and clay, I have wandered from the diggings themselves. The steep sand banks were pierced with hundreds of holes of the bank swallow or sand martin; and crowds of the little birds were flying about in the air, and occasionally entering the holes. These are pierced to the depth of about 2 feet, and the nest placed at the extremity. Nuttall says they raise two broods in the year, the first of which comes forth towards the end of the Fifth Month. This bird has a wide range in the United States, and is common to Europe and South Africa. They leave our latitude for the South in the early part of the Tenth Month.

The Pensauken flows through a wide marsh, which its own waters have excavated, and which is flooded by the tides from the Delaware and across this a causeway has been constructed, by which the traveller can comfortably journey; and along which I made my way to the railroad station. J. W.

FOR "THE FRIEND"

"These are they which follow the Lamb, whithersoever He goeth." Rev. xiv. 4.

When wandering o'er the crazy stage or seeking scanty pasture in desert places, whilst at times the storms of passion or of sin in thunder claps assail, or the noon-tide heat o'erburdens thee, what voice is this I hear? which in the lull is heard, "Come unto me." Its gladly welcome sound comes home to my weary soul, and I cry, "Where art thou O my Lord?" It is the Good Shepherd who thus seeks and calls for his stray lamb. He now invites me to his fold. He heals my wounds and calms my fears. My soul doth bear and cling to Him, who sweetly folds me in his bosom. He swiftly bears me by paths unknown, o'er rocks and defiles deep, to that secluded fold, where rest his flock in pastures green, whilst living waters flow, wherewith to quench their thirst. He says to me, "My sheep do hear my voice, and they do follow me. My peace I give to them. When warring words or anxious doubts assail they flee to me. I teach them all that they require to know, and if to pastures new I lead them, they still obey my voice and follow me." My heart responding said, "O Lord! open thou mine ear, to hear thy voice, and mine eye to see thee in thy ways. Subdue my stubborn will that I may truly say 'Thy will, not mine be done.' Show to me the place where thou makest thy flock to lie down at noon, so shall I abide in thy love, and thy good spirit shall dwell in me." W. W. B.

To allude to people's deficiencies, mistakes, weaknesses and faults, when no good result is likely to follow, is no tribute to truth, but a great breach of good-will and politeness. On the other hand, to emphasize their good points, to give honest praise, to express freely the sympathy and pleasure that are really felt, is both kind and truthful.

FOR "THE FRIEND."

Orange Street Meeting-House.

Although the Orange Street Meeting-house is a comparatively modern structure, having been erected in 1832, as indicated by the date stone in the eastern wall of the building, yet the site upon which it stands has long been identified with Friends. The plot of ground of which the site is a part, originally contained three acres and about twenty-two perches, and was bounded by Spruce and Locust and Seventh and Eighth streets and the southwest angle of Washington Square. The lot was L shaped like the original burial ground at Arch and Fourth streets, and the exterior lines of approximately similar length. Whether this was by design or a coincidence, does not appear.

The property was purchased in 1774 for a burial ground from the Penn family, the price fixed being £500 and five shillings a year quit rent. Owing to the decease of Thomas Penn in 1775 and the difficulties incident to the American revolution, the title was not perfected until 1785. In the Eleventh Month of that year, a patent for the tract was issued by the Supreme Executive Council of Pennsylvania to James Pemberton and others, the grant being "for the purposes of a burial ground and other religious uses." The consideration finally paid was £719.8.8. equal to about two thousand dollars.

In 1788 a portion of the ground, one hundred feet square frontage on Seventh street, and probably at the corner of Spruce street, was enclosed and prepared for burial purposes. The residue of the lot was rented out at £12 for the season, probably for a pasture field. The first interment, and probably the only one, seems to have been that of a child, and was made about New Year's Day, 1789. The grave was shallow, but the water collected so that the body could not be lowered into it "to the no small discomposure of the attending relatives and friends." A general examination of the ground was then made by sinking pits in various places, with the result that, in each instance, water was found at the depth of three feet from the surface.

It was very apparent that the ground was not suitable for burial purposes. There was an underlying bed of clay which held the water and prevented it from soaking away. It was concluded, however, to attempt to remedy the difficulty by digging a well six feet in diameter, in the centre of that part of the lot which had been enclosed. This well was walled and securely arched over. But the plan was not successful, and the use of the ground for burial purposes was in consequence abandoned. This seems to have been as early as 1795, and a part of the lot, probably the Seventh street front, was sold. This left a frontage on Spruce street of 252 feet, which the Monthly Meeting directed to be disposed of in 1801.

In 1814, the plan of using a portion of this lot for a site for a meeting-house, seems to have been first suggested, and the Monthly Meeting for the Southern District adopted it. Upon conferring with the other three Monthly Meetings, the Middle and Northern Districts readily gave their consent to the plan, but the Western District objected and declined to approve. The whole scheme was, in consequence, indefinitely postponed.

In 1817, a partition was made between the Monthly Meetings of a considerable part of the real estate owned by them, which had previously been held in common. This partition does not

appear to have been based upon an equal division of values, but rather to meet the exigencies of different meetings, and to provide for the more convenient management of the different estates.

A part of this management was the conveyance to trustees for the Southern District of a lot of ground at the northeast corner of Eighth and Orange streets, 176 feet on Eighth street and 252 feet on Orange street, "for the purpose of procuring a site and erecting a new meeting-house," with the provision that if such new meeting-house were not erected, and a meeting established therein within fifteen years, then the whole lot should again become the joint property of all the Monthly Meetings in the city.

In 1821, the subject of building a meeting-house on this site was revived, and the Southern District Monthly Meeting which now had control of the lot, decided to sell the Eighth street front, the proceeds of which sale, it was estimated, would be sufficient in amount to defray the cost of erecting a new building of ample size, and inclosing the grounds with a substantial brick wall. In accordance with this decision, the front on Eighth street was sold for about fifteen thousand dollars, which left a lot about 140 feet square for the meeting-house site. Immediately after this, the committee who had charge of making the sale, was instructed to prepare a plan for a house, with estimates of the probable cost. The committee reported in the Twelfth Month, 1822, a plan for a building, similar in size and arrangement to the old one on Pine street, and estimated the whole cost would not exceed fourteen thousand dollars. The subject received the further consideration of several succeeding Monthly Meetings, but it was finally decided "best not to proceed any further therein," at that time.

For some years no steps were taken toward the erection of the proposed new building. It is probable that the difficulties then agitating the Society were an obstacle. After the separation of 1827, the subject again claimed the attention of the Monthly Meeting, and in the Ninth Month, 1829, it was decided to provide materials for the proposed structure, and to have them deposited on the Orange street lot. A difficulty occurred, however, in procuring possession of it, which involved delay. These difficulties being removed, the Monthly Meeting in the Second Month, 1832, decided to proceed with the building, and so rapidly did it progress, that it was nearly ready for occupancy in the Tenth Month following. The first meeting held in the new house was opened on the first First-day in the Twelfth Month, 1832, with the approbation of the Quarterly Meeting.

The total cost of the new structure, including the enclosure and improvements of the grounds, was about twenty-two thousand dollars. The building is so well-known, that a description of it is not thought necessary. It may be incidentally stated, that the sales of those portions of the lot, not reserved as a site for the Orange Street Meeting-house, produced a very large sum of money to the Society. The cost of erecting the building was almost entirely realized from the proceeds of the sale of a portion of the Eighth street front, whilst about fifty thousand dollars was obtained for other parts of it, out of which the Western Burial Ground on Sixteenth street was paid for, as well as other valuable property. Thus an investment of about two thousand dollars in 1785, had in less than half a century increased nearly, if not quite, fifty fold.

G. V.

SELECTED

A HUNDRED YEARS FROM NOW.

The surging sea of human life
Forever onward rolls,
Bearing to the eternal shore
Each day its freight of souls;
But through our bark sail bravely on
The death-sites of the grow,
And few shall know we ever lived,
A hundred years from now.

Oh mighty human brotherhood,
Why fiercely war and strive,
While God's great world has ample space
For every thing alive?
Broad fields uncultured and unclaimed,
Are waiting for the plough
Of progress, that should make them bloom
A hundred years from now.

Why should we toil so earnestly
In life's short narrow span,
On golden stairs to climb so high
Above our brother man?
Why blindly at an earthly shrine
Our souls in homage bow?
Our gods will rest, ourselves be dust,
A hundred years from now.

Why prize so much the world's applause?
Why dread so much its blame?
A fleeting echo is its voice
Of centure or of fame;
The praise that thrills the heart, the scorn,
That dyes with shame the brow,
Will be as long-forgotten dreams,
A hundred years from now.

Earth's empire rise and fall, O time!
Like rancers on thy shore,
They rush upon the rocks of doom,
Are seen—and seen no more;
The starry wilderness of worlds
That gem night's radiant brow,
Will light the skies for other eyes,
A hundred years from now.

Oh, thou, before whose sleepless eyes
The past and future stand
An open page, like babes we cling
To thy protecting hand;
Change, sorrow, death are naught to us,
If we may satisfy our need,
Beneath the shadow of thy throne:
A hundred years from now.

SELECTED.

INTRA, MINTRA, CUTRA, CORN.

Ten small hands upon the spread,
Five forms kneeling beside the bed,
Blue eyes, Black eyes, Curly head,
Blonde, Brunette; in a glee and a glow,
Waiting the man who says—Such a row,
Seven years, six years, five, four, two,
Fifty fingers, all in a line,
(Yours are thirty and twenty are mine)
Ten sweet eyes that sparkle and shine.

Motherly Mary, age of ten,
Evens the finger tips again,
Glances along the line—and then—

"Intra, mintra, cutra, corn,
Apple seed and apple thorn,
Wire, brier, limber lock,
Three grass in a flock,
Eagle, rattle, rattle and roud,
T. O. U. T.—

OUT P.

Sentence falls on Curly head;
One wee digit is "gone and dead,"
Nine-and-forty left on the spread.

"Intra, mintra," the fat goes,
Who'll be taken, nobody knows,
Only God may the lot dispose.

Is it more than a childish play?
Still you sigh and turn away.
Why? What pain in the sight, I pray.

Ah, too true. "As the fingers fall,
One by one, at the magic call,
Till, at the last, chance reaches all,

So in the fateful days to come,
The lot shall fall in many a home
That breaks a heart and fills a tomb.
Shall fall, and fall, and fall again,
Like a Law, that counts our love but vain;
Like a Fate, unheeding our woe and pain;

One by one—and who shall say
Whether the lot may fall this day,
That calleth of these dear babes away?

True, too true. Yet hold, dear friend;
Evermore doth the lot depend
On Him who loveth, and loves, to the end.

Blind to our eyes, the fat goes,
Wh'ill be taken, no mortal knows,
But, *only Love will the lot dispose.*

Only Love, with his wiser sight;
Love alone, in his infinite might;
Love, who dwells in eternal light.

Now are the fifty fingers gone
To play some new play under the sun
The childish fancy is past and gone.

So let our boiling prophecies go
As childish, for do we not surely know
The dear God holdeth our lot below?
—*J. K. Writing, in the Salem (Mass.) Gazette.*

SCARCELY the slightest word or deed
Nor deem it void of power,
There's fruit in each wind-wafted seed
Waiting its natal hour.

Work and despair not; give thy mite
Nor care how small it be!
God is with all that serve the right,
The holy, true, and free.

A Beautiful deed.—A prettier and more pathetic story has seldom been told than one published in the *Daily Telegraph*. A hospital for sick children in the East End of London was a tumble-down old wharf warehouse. But it had to do for the sick children simply because there was no money to build a better place. One day, up the rickety stairs, holding on by the rope that served for banister, came a shabby, gruff old man, asking in a tone that seemed to threaten an action for damages, if this were a children's hospital, and if they did not want a proper "hospital." The secretary, with faint hopes of a guinea, answered these questions and received—a check for £1,000! They went over the place and when this unexpected angel of blessing had seen the children he came back, asked again for pen and ink, and wrote—a second thousand! Then with his coat buttoned, he was about to go, but one story after another of healing and of child-heroinism flowed from the secretary's lips, until, with a gruff "Ha!" the coat was thrown back once more, the magic book produced, and a third thousand laid beside the others. "I found my way up and I can find my way down. Good-day!" The man of shabby coat and gruff voice was gone, but the secretary had the new building in his hands.—*Christian Advocate.*

To the thoughtful observer of child-life, nothing is more noticeable than the sudden and seemingly unaccountable changes in the child's mental and moral attitudes,—his interests, his motives, his habits, and his desires. In a single day there may be a whole change of front toward all that to him has been essential and familiar. We smile at this, if we do not seriously oppose it; we call it spasmodic, fickle, whimsical. But the path of a child's life is a path broken by sharp angles. Childhood is a period of startling revelation, an expedition of discovery. Almost daily the child is a voyager on the Challenger, an Agassiz in Brazil, a Faraday in the laboratory. As a result of a little boy's

first day in a kindergarten, he exhibited to his father a bird's-nest on a branch, with a little bird beside it,—all modeled in clay. "See!" he exclaimed; "there is the birdie, there is the nest, and there are the three little eggs for the birdie to eat!" That child's only idea of eggs was an article of diet. But when his father exclaimed, "Oh, not for the birdie to eat!" and followed it up with the facts in the case, that child had turned a sharp angle in his onward way. Here was a wholly new direction for thought. That was a larger discovery, a longer stride, in his little life, than a new species would provide to the naturalist, or a new star to the astronomer, or a new element to the chemist. Such revelations in the varied realm of truth pour in upon the child-mind in volleys. No adult mind could stand them without reeling in confusion. Yet how little do we dream of this multitude of new vistas daily opened to a child! How little do we realize the working of those secret forces whose surface outcroppings we somewhat impatiently condemn as mere instability,—as fickleness and whim? The children are taught to respect their elders; do their elders sufficiently reverence them?—*Exchange.*

THE business pursuits of men are beset with Satan's devices. A few years ago a noted evangelist from England delivered a discourse to business men in New York on "Curious Arts," in which he sought to expose some of the tricks which are frequently practiced in trade in order to secure gain. The sermon created some sensation at the time, but if the preacher had been able to drag into the light all the dishonest schemes resorted to in the transaction of secular pursuits, he would have astonished the world. The devices by which some men and some powerful corporations and companies accumulate money at the expense of their employees, prey on the community and steal from each other, and the schemes by which the poor sometimes seek to get their own, as they say, have often been subjects of comment and debate; but still they continue and multiply every year. Many suppose that these are merely plans invented by shrewd men for getting gain; but they are more. They are the inventions of the devil for destroying souls. Those who practice them and those who witness them are intent on the temporal prize; but in the mind of the tempter there is a deeper design and a larger prize.—*Exchange.*

THE difference between the American Republic and that of France was never more manifest than at the present time. The comfort and safety experienced by the nation while passing from one administration to another is an evidence of the solidity and stability of our institutions and Government. The uncertainty and doubt and suspicion which prevail in France are indications of the instability and the insecurity of the Republic. The fault is not so much with the form of Government as with the foundations of personal and social character on which the Government must rest. In France the inculcation of religion as a necessary part of education has been discouraged. Fear of God, respect for the name and authority of the Supreme Ruler, and confidence in the moral law as an expression of the Divine will are too little held on the French heart. Religion is at no low an ebb that it has little influence on the social order and practical life of the people. If certain apostles of modern thought could have their way our Republic would soon be found tottering on similar shifting sands.—*Christian Advocate.*

An Unfortunate Millionaire.

A newspaper reporter recently congratulated a well known millionaire on his prosperous condition—a splendid establishment, high position, wife and daughters leaders of society, fine horses, everything in fact, that could be desired to make life pleasant. The reply was, "You are greatly mistaken. There are few men in moderate circumstances, not pinched by poverty and content with their position, who are not infinitely more happy than I am. Whatever may be a man's wealth, he can use for himself but a small portion of it. Like the poor man, he must eat, drink, sleep, and wear clothing. What he has more than this goes to the benefit, possibly it might be more nearly correct to say to the injury of others, who regard what they receive as their right, and do not understand that any obligation of gratitude, love or duty is impressed upon them as a consideration. The poor man more frequently enjoys good health, partakes of his simple meals with better appetite, enjoys sound sleep, and goes to his daily labor refreshed, and with but little care. If he is blessed with a good-tempered and sensible wife, not tainted by social ambition, his home becomes a little Heaven upon earth. Not so with the rich. The care of property is a constant source of anxiety. The ambition of the wife is to be a leader in society; the daughters waste life in utter uselessness; the sons become dissipated spendthrifts. For myself I confess with much regret that I have very little intercourse, socially or otherwise, with my family. Other company is more congenial to them; the daughters keep their beds until near noon—then dress for lunch; the afternoons are devoted to making calls, receiving visits, attending receptions; the evenings to operas, concerts, or some kind of dissipation; no useful work forms any part of the daily or weekly program of their lives.

The life of the boys is even more unsatisfactory. I give my sons at college an allowance of \$200 per month; they cannot live on it, and bills are sent to me for payment.

"But," said the reporter, "you must have some pleasure; you have fine horses, and are fond of riding and driving." "Yes! when I am permitted such indulgence; but I have no rights that wife or children consider themselves bound to respect. My only privilege is to pay bills. I am a locomotive tank. Wants are legion, and every want must be gratified, cost what it may; to object would be to destroy what little comfort remains in the family; it is only by letting its members do as they please, that outbursts of dissatisfaction are prevented.

"You referred to the opportunities for recreation in riding. I will give an illustration: Yesterday I ordered my man to bring my saddle horse; the reply came, 'Very sorry, but Miss Julia has loaned him to her young man to take a ride with her in the Park.' Then bring the dog-cart; I will drive.' 'That's gone, too; Master Charles has taken it for a drive with a friend.' 'Then I will take the two-horse carriage.' The madam has taken that with the footman to make calls.' So it goes. Do you envy me my wealth when I am not able to secure with it the ordinary enjoyments of life?"—*Church Union.*

Natural History, Science, etc.

Intelligence in a Dog.—Margaret Deland of Boston, has sent to "Our Dumb Animals," the following anecdote of a favorite mastiff dog, Eric.—It seems that during the past year Eric has made friends with a kind Norwegian man,

who has lived in the neighborhood. It has been the habit of the dog to meet this old man and walk along with him, to be rewarded, perhaps, by a pleasant word or a pat on the head. On Saturday last a friend of this man and of my own came in to see me, and said to me, "Did you know that Mr. Bernsten is very ill, that he is dying? He cannot live through the day," Eric was lying at my feet watching us with his bright, intelligent eyes, and we talked of Mr. Bernsten for some little time,—his kindness and goodness, and his dignity in facing death that was so surely coming. A little later Eric left us and I did not see him again until late in the evening.

This is what occurred in the meantime. Eric went out upon the street and followed some people, who, it seems, were lodgers in the same house in which Mr. Bernsten lived. When they reached the door of this house, Eric quietly entered with them, without any hindrance or any guidance from them. He walked up one flight of stairs and then another flight of stairs, until he came to a closed door. Here he stopped and softly scratched. Within that room was the dying man, with his children near him. When they heard this soft noise outside the door, some one rose and opened it, and there stood Eric. He entered, went over to the bedside and licked Mr. Bernsten's hand gently. The dying man patted him feebly on the head, and then Eric turned and left the room and went down-stairs again.

Who shall say how much he understood of the conversation about his friend, or what strange instinct led him to the door of that dying chamber?"

Preserving Lions and Alligators.—Neither lions nor alligators would appear at first sight to be indispensable to the welfare of a civilized and orderly community. Nevertheless, the Government of India has just felt itself constrained to issue a strict prohibition against killing the few remaining lions which have escaped the destructive rifle of the British sportsman; while nearer home the authorities of Louisiana have recently made public an order forbidding the shooting of alligators on the Mississippi, between Baton Rouge and New Orleans. By a strange coincidence, the proclamation issued at Calcutta bears the very same date as that of the Governor of Louisiana. The action of the Governor does not seem to be dictated by any special love of the scaly monster, but by fear of rats, which do an immense amount of damage to the corn on the riverside plantations. The alligators are "rough on rats," when not interfered with by eager sportsman. But of late years they have been persecuted by man, and the rats have in consequence had everything their own way. While the reasons advanced by the New Orleans proclamation are entirely satisfactory and comprehensible, it is difficult to understand the object which the British Government has in view in "preserving" lions.—*New York Tribune.*

An Ingenious Device for Lighting the Bottom of the Sea.—In the investigations that were undertaken by the Prince of Monaco in deep sea soundings, an ingenious method was adopted to obtain specimens of the living creatures existing at the bottom of the ocean. The apparatus used was shown at the Paris exhibition. The cage in which the submarine animals were caught, according to *Le Genie Civil*, consisted of a cylinder of wire, having three conical entrances, like those of a lobster pot, and weighted for submersion with detachable weights. It was, however, very unlikely that at these immense depths,

where the darkness is practically total, any fish would voluntarily find their way into the trap, and steps were taken to attract them by a light placed inside it. Obviously, no light was available but an electric light, but to get an electric light to burn a mile or two under water was not easy.

The only resource was to supply the incandescent wire from a battery in the trap. Here, however, another difficulty occurred. It was necessary to inclose the battery, which had to be of considerable power, in a box of some kind, and, as the hydrostatic pressure at such depths was six or seven hundred pounds to the square inch, it was found impossible to make a box which was not crushed before it reached its destination. At last, however, this trouble was overcome by the curious device of connecting the box with a balloon. The balloon was made of cloth, dipped in India rubber, and so arranged that the air in it was in communication with that in the battery box.

On sinking the apparatus, the hydrostatic pressure, being virtually uniform all round the balloon, compressed it equally on all sides, forcing the air out of it into the battery box, until the pressure inside the box and balloon exactly balanced the pressure outside. This process went on to any extent, so that at the bottom of the sea, although the balloon was reduced by the enormous force exerted on it to a small fraction of its original size, it still kept the internal and external pressure equal. On raising the apparatus again, it expanded as the pressure diminished, and brought the battery box to the surface uninjured. So successful was this device that, not content with capturing deep-sea fish, the Prince and his assistants propose, on their next expedition, to send down a photographic apparatus and bring back negatives of the bottom of the ocean, as seen by the electric light.—*Gas Lighting Journal.*

Bravery of Sparrows.—Captain Holzworth, of Cleveland, tells a curious story of a flock of sparrows. The cat belonging to his house was in the habit of capturing one of the birds to satisfy her own appetite, while the Captain's wife fed the sparrows with crumbs. This was not practised many times before the wily little birds took precautions against further depredations by a constant lookout, all flying in a body on the first indication of a spring from Tabby. At last, one day, after she had been frustrated by this manoeuvre and sat patiently awaiting the return of the birds, they held a convention on the fence, conducted, like many human conventions, with much unintelligible chattering, and resumed their repast. After the cat had become satisfied that they were too much engrossed in eating to notice her, she made another spring. The birds were up in an instant, and, instead of flying away as usual, they formed themselves into a hollow square, and charged upon the foe. Some got upon the cat's back, and scratched and pecked with all their might, others flew right into her face, while the balance chased her. The cat was so surprised at first that she stood, unable to move. The birds became more and more infuriated, and fought so savagely that they drove the foe down the garden path on a full gallop and under the barn. They returned to their feast, and were left unmolested the rest of the winter, the cat keeping at a safe distance whenever they appeared.—*Cleveland Leader.*

Submarine Divers.—Water exerts great pressure on a diver, even at moderate depths. Every 30 feet of descent represents an additional weight

of about 15 pounds on the square inch. Practice has shown that a submarine worker breathes without much effort, has control over all his organs, and preserves his presence of mind down to about 120 feet, but below 150 feet the external pressure produces uncontrollable physiological effects upon his internal organs, and life is endangered.

Native Peruvian Cotton.—*Gossypium herbaceum peruvianum*, an article used very extensively in Europe, in the manufacture of woollen goods, with which it mixes readily, on account of its rough, strong, and long fiber, is produced abundantly throughout the State after the rainy seasons, which are periodical, and occur generally every seven years, and is cultivated always along the banks of rivers on lowlands irrigated by the overflow of streams.

The plant is arborescent and perennial, and after fully developing, continues producing cotton for five or six years in succession, provided there be some moisture in the ground, needing, however, very little of it on account of its deep rooting, thus reaching moisture at great depths.

The system of cultivation of this plant is quite primitive, the seeds being planted by making holes in the ground with spades, without tilling or manuring the soil. The plant becomes developed and begins to bear cotton, in dry and sandy soil about six months after planting, and about nine months in rich and wet lands, continuing to yield at short intervals for five or six years more in succession. It is wonderful to behold the same plant in blossom, with pods, buds, and cotton, all at the same time, and giving a continual yield for the time above stated.

The soil is wonderfully rich, and in the valley of Payta, Columbus, has been under cultivation by the aborigines, from time immemorial, as its fertility is kept up unimpaired, by the deposit left by the inundations—which occur about once in seven years.

The cotton is collected when the pods open, by women and children, who are paid about 40 cents for every quintal (100 pounds). It is taken from the fields to the ginning house, where it is cleaned and made into bales of about 175 pounds each.

The quantity exported annually averages from 65,000 to 70,000 bales, the gross value of which, at current prices here, is about \$2,000,000 in current money—(Bolivian silver dollars, equal to 68 cents each). Seeds are now also exported for oil making. Europe is the market for both products.—*Consular Reports of the U. S., 1890.*

Items.

Satan is a Skilful Soul-winner.—His schemes are laid with marvellous success. Prizes have frequently been offered for good conduct and proficiency in studies at school, but the prize system is not monopolized by the day-school and Sunday-school teachers. It is said that a teacher in Chicago recently discovered in the possession of her scholars cards which had been given them by a saloon-keeper near the school. The cards were punched for every drink taken by the boys, one punch for beer, two for straight drinks, and three for mixed drinks. At the expiration of each month prizes were given, the boy having the largest number of holes punched in his card received a revolver, the second a line of Jesse James, and the third a meerschaum pipe. Surely this is crying on the drink-business with a high hand.—*Christian Advocate.*

Indian Logic.—In the *New American Review*, there is an exceedingly interesting article by Bishop Whipple, in which he describes his experiences among the Red Indians. From the following amusing story we learn that even among the Indians example preaches much more eloquently than pre-

cept. The Bishop had been blaming *Wabasha*, a chief in the *Dacotah* nation, for holding a scalp dance over a murdered *Chippeway*, and threatening him with Divine vengeance on the great accounting day. This was the Indian's response:—

"The old chief smiled, drew his pipe from his mouth, blew a cloud of smoke upward, and said:—'White man come to war with his own brother in the same country; kill more men than *Wabasha* can count in all his life. Great Spirit smiles, says 'good white man; he has my book; I love him very much; I have a good place for him by-and-by.' The Indian is a wild man; he has no Great Spirit book; he kills one man; has a scalp dance; Great Spirit is mad, and says, 'bad Indian, I will put him in a bad place by-and-by.' *Wabasha* don't believe it."—Selected.

Secret Societies.—The increase of secret societies, the separate organization of classes, and the efforts of each class to obtain legislation for its own exclusive benefit bodes no good to the general public. This special and class legislation is sought through secret combination, the members of the society taking an extra-judicial oath of secrecy. The result is that what ought to be a united people is becoming separated into segments, each organization for itself and against all the other people of the Commonwealth. The result is that we do not organize and combine together for their own protection are left at the mercy of these combinations, and it is the honest, industrious, well-doing class who do not combine to promote their own pecuniary interest. I may say it is secret societies for the promotion of the pecuniary interest of the members which are objectionable, and it is these societies which are the cause of the trouble that comes to the community at large. Of course our religious or beneficial societies of any kind or partnership for business purposes are not objectionable, but they are never connected by any element of oath-bound secrecy. The fruits of secret society policy are beginning to ripen. Those of *Mollie Maguire*, *anarchists*, and *San-nan-Gaels* have all received their just and bitter due. The result is that, by their admitted necessity for secrecy they declare that their ends and purposes are such as will not bear the light.—*Associate Presbyterian*.

A Question of Morals.—The *Christian Advocate* publishes the following Query and Answer.

Q. 3152. If two unconverted persons wager a sum of money, and before the bet is decided the victorious person becomes religious, would it be right for the said person to accept the stakes, provided that he used wholly for Christian purposes?

A. The writer of this question informs us that he is a young man of eighteen years of age. We take great pleasure in answering him:

First, the proviso is without meaning, for it would be just as right to receive and expend it upon a bicycle or a watch or a dog as to spend it upon Bibles or taking care of the poor. It would not be right in any case to receive it, because he who is converted cannot voluntarily receive the result of an incomplete wrong act begun before conversion.

Suppose he had gone into partnership with some one to rob a house, and the robbery had been perpetrated, but the plunder had not been divided, who would suppose it right for the Christian to take his share? We do not say these cases are parallel in any way, but they are parallel in the element of wrong, and show the principle.

It is his duty to say, "When I made that bet I was not a Christian. I now think gambling in all its forms is wrong, and I will not take the money."

Adorning.—"Whose adorning let it not be that outward adorning of plaiting the hair, and of wearing of gold, or of putting on of apparel; But let it be the hidden man of the heart, in that which is not corruptible, even the ornament of a meek and quiet spirit. . . . For after this manner in the old time the holy women also, . . . adorned themselves."—1 Peter iii. 3-5.

The apostle here gives plain instruction to Christian women in regard to their attire. In this reference to dress agreeing as it does with the whole

tenor of Scripture, it would be sufficient to convince an honest seeker for light.

We can hardly conceive that Jesus our Saviour ever decked himself with worldly ornaments as many church members do in these days. Simplicity and humility so mark every act of his life and characterize all his teachings, that even the skeptic and infidel can but admire. To be a Christian is to be like Christ, in all the workings of his life and in all his sayings. How then can a *holiness* woman wear worldly attire? A person's taste is usually shown in her dress. When one is following Jesus, living for Him alone, will she desire to deck herself with earth's adornments? Surely, to one whose heart has been washed in the blood, superfluities in dress will be utterly distasteful. Such an one can truly sing,

"There's no thirsting for earth's pleasures,

Or adorning rich and gay;

For I've found a richer treasure,

One that fadeeth not away."

We once heard a preacher say, "You cannot shake the dead leaves off a tree, but just let the new life in the spring course through the branches and they will fall off easily and naturally. So it is difficult to get unsave women to dress plainly, but let them get eternal life in their hearts and see how quickly the garb changes."—*Adelaide L. Beer*, in *Earned Christian*.

New England Yearly Meeting, (Larger Body).—This was held at Newport, R. I., commencing on Sixth Mo. 13th.

The number of members was stated to be 4468, an increase of five over last year.

The Normal Institute for colored pupils at Maryville, Tennessee, was reported to be in a flourishing condition, with an average attendance of 144. Benjamin Knobel, a Friend who had done much during his lifetime to forward the work of this institution, had died during the year and left a bequest by his will for its continued support.

The health and progress in their studies of the pupils at Providence Boarding School were stated to have been very good. The number of boarders was 192, and of day scholars, 81. The introduction of a new system of instruction in the institute drew the attention paid to art, &c., do not seem to us favorable to the training of the young in the self-denying principles of the Gospel as held by the Society of Friends.

The proposition from Kansas Yearly Meeting for a permanent conference of the Yearly Meetings, was declined.

A special feature was the devotion of an hour to special religious service in memory of Friends who had deceased during the last year.

A petition was adopted to the governments of the world, to discountenance the liquor traffic, and cease to legalize it.

It was decided to discontinue the practice of giving retainer minutes by the Yearly Meeting to ministers from abroad.

The meeting next year is to be held at Portland, Maine.

The *Philadelphia Press* of Sixth Mo. 26th, contains a report of the Yearly Meeting from a special correspondent, which says:—"A number of changes in our rules and practices in the members were apparent, the younger members being much more progressive in their methods, while the older and more conservative people are gradually changing from their adherence to many of the old-time customs." Evidences of this change are seen in the noticeable increase in the use of singing in meetings; and in the degree of support given to ministers.

Our eyes are guided by our hearts. They are quick to catch a sight of that for which our longings are alive. We can see a dear one's face a long way off, when we are watching for it at a crowded railway exit. A college student can see the colors of his own college in the buttonhole of a street-passer, when one less interested would never notice that tint of blue or enamel. It is the same in every sphere of being. "Spiritual things are spiritually discerned." What we fix our eyes on outside of ourselves

depends on what we are within. What we see shows what we are.

Weather report for Sixth Month, observed at Westtown, Chester County, Pa., by William F. Wickham:

Mean Barometer,	30.010
Highest " "	30.318 on 9th
Lowest " "	29.783 " 12th
Mean Temperature,	71.6
Highest " "	89.2 on 23th
Lowest " "	59 " 9th
Greatest daily range,	30.5 " 1st & 9th
Least " "	6 " 21st
Total rainfall,	4.283 inches.
Number of clear days,	15.
Number of fair days,	8.
Number of cloudy days,	7.
Prevailing direction of wind West.	

THE FRIEND.

SEVENTH MONTH 19, 1890.

The published reports of the proceedings of both Dublin and London Yearly Meetings refer to the fact that there is at the present time no epistolary correspondence kept up between either of those Yearly Meetings and that of Philadelphia. From the tone of several letters recently received from Great Britain, we infer that there exists a willingness among many Friends in those Yearly Meetings that such correspondence should be reopened. Indeed, a letter from London says, "The door is locked on your side only."

We have little doubt that the visit (as yet uncompleted) which has been paid by two members of Philadelphia Yearly Meeting in various parts of Great Britain has tended to strengthen the desire for closer and more unrestricted intercourse. The general testimony which has reached us, in regard to this visit, is one of satisfaction—that it has been acceptable to the churches. One letter, addressed to the editor, finds fault with our Friends for speaking on one occasion on the subject of dress, but notwithstanding, says they are "very acceptable with us." The presence and labors of acceptable ministers could scarcely fail to awaken a query as to the causes which prevented an interchange of epistles, such as takes place between London Yearly Meeting and other similar bodies in America.

But the letters received do not all speak the same language, as to the desirability of a renewal of correspondence. One from Great Britain says: "I feel full unity with the Philadelphia Yearly Meeting in *not* corresponding with London Y. M., and I long to be able to strengthen your hands in keeping your very important position in upholding the principles of Truth as held by the early Friends. As long as you keep to yourselves, although you may be weak, yet you are as a body, a living epistle, read and known by all around you."

In thinking upon the underlying causes, which have rendered possible the suspension of a correspondence, which had been carried on for so many years—ever since the first settlement of Friends in this country, the writer well remembers the high estimation in which London Y. M. was held among us in his youthful days; and the unity which was felt with such faithful laborers from that country as George and Ann Jones, Thomas Shillito and Daniel Wheeler. The first serious wound which this bond experienced, was by the course pursued

by English Friends in reference to writings issued by some of their members, designed to promote the study of the Holy Scriptures, but containing sentiments inconsistent with the teachings of early Friends, teachings which had always been regarded among us as expressing the true principles of the Gospel. The *Brief Narrative of the Position of Philadelphia Yearly Meetings* clearly sets forth the concern which was felt by that body on this subject, and the practical refusal of London Y. M. to take any effective steps to discourage the circulation of the unsound doctrines alluded to. The natural effect of this was to lessen the confidence with which that body had been regarded as a standard bearer of primitive Quakerism. This confidence was still further weakened by its subsequent acts in giving countenance to sections of the Society in this country, which our Yearly Meeting refused to acknowledge as true representatives of the Society of Friends in their respective limits—especially in the case of the division in Ohio Yearly Meeting.

And an additional cause of uneasiness has been the belief that, in some of the benevolent or professedly religious movements that have developed among Friends of Great Britain, there has been a neglect and disregard of those limitations, which would be imposed by a faithful adherence to our principles.

While these considerations, as we believe, have had an important influence in discouraging Friends of Philadelphia from the continuance of correspondence, yet we do not doubt that there are in the limits of London and Dublin Yearly Meetings, many Friends of deep religious experience, who are sincerely desirous of maintaining the profession of our faith without wavering, and many others, who are well-disposed, and desirous of promoting the Redeemer's kingdom among men, although in some respects they may lack clearness of spiritual vision. It is right to feel sympathy with such, and to cherish a desire that a clear testimony for the truth may be upheld in that land where the light of the Gospel so gloriously shone forth 250 years ago.

But if an effort were made officially to manifest sympathy with such by epistle, it would seem necessary to accompany it with a clear protest against some things that have received countenance in London Yearly Meeting, or else we should be looked upon as drawing back from the position we had taken in defence of the Truth; and so would practically weaken the hands of those who are endeavoring to support the ancient principles of the Society. Such a protest, it would be unpleasant to send, nor could we expect that it would be kindly received.

The outlook of the times indicates that it will be necessary to wait in patience until the Head of the Church himself gives the command and opens the way for the resumption of epistolary correspondence.

SUMMARY OF EVENTS.

UNITED STATES.—The President has signed the act for the admission of Wyoming as a State. He has also signed the Silver bill, which provides that the Secretary of the Treasury shall purchase 4,500,000 ounces of silver per month, or so much thereof as may be offered at market price, not exceeding \$1 for 371.25 grains of pure silver. Treasury notes are to be issued therefor, redeemable in gold or silver at the discretion of the Secretary.

Senator Allison has discovered that the reckless profligacy of the present Congress will bankrupt the

Treasury, and cause a probable deficiency of nearly one hundred millions per annum.

Major General John C. Fremont died suddenly at his residence in New York, on the afternoon of the 13th instant of peritonitis. He was in the 78th year of his age.

On the 8th instant, the Lottery bill passed the Lower House of Representatives over the Governor's veto—yeas, 65; nays, 31. The bill would have passed the Senate also, but for the sudden illness of one of the Senators. So the Senate, to avoid being beaten, adopted a report to the effect that the Governor's signature was not necessary to a constitutional amendment. The House adopted the same view, and the bill has been sent to the Secretary of the Commonwealth for promulgation without the Governor's signature and without having been passed over his veto. There will arise out of this a law question to be decided by the Courts.

According to a Dover special to the *New York Tribune*, "not a single carload of peaches will be shipped this season from Delaware. Very few growers will have even a basket for their own use, and very many of them not a single peach. It isn't, however, in Delaware that the peach has been so much hurt, with there be many peaches. In some sections there will be none. California will have a moderate crop, and the growers will realize handsome profits. The California peaches are already being bought up by speculators."

Coroner's jury in the Hill Farm mine disaster at Dunbar, Penna., has rendered a verdict holding Robert Lang, the Superintendent, criminally responsible. All the victims are believed to have been burned to death.

The 13th instant a tornado devastated the country on the northern side of St. Paul, causing great damage to property and loss of life. Five people are stated to have been killed outright and twelve injured. The same night an explosion steamer was sunk by the tornado, on Lake Pepin, Minnesota. Over 60 bodies have been recovered.

An explosion occurred on the Lake steamer Tioga, on the 11th instant, while she was being unloaded. The cause of the explosion is unknown, but it was followed by fire and the vessel went to the bottom of the Chicago River. Twenty-two bodies had been recovered up to date.

The official census of Wilkesbarre, Pa., shows a population of 37,750, a gain of 60 per cent. since 1880. It is expected that the total population of Luzerne County will be over 200,000. The estimated population of Hudson County, New Jersey, is 272,000. The population of Pennsylvania, is reported to be 20,700, a gain of 6800 since 1880.

The Bogoslov Volcano, in the Aleutian Islands, is in active eruption, after having been quiescent since 1796. It is less than a thousand feet high, but the flames rise 2000 ft. above its summit. Mount Shifon, 5000 feet high, on another of the islands, is emitting steam and smoke.

Deaths in this city last week numbered 533; 70 less than during the previous week and 54 less than during the corresponding period last year. Of the whole number: 200 were males and 293 females; 222 were under one year of age; 97 died of cholera infantum; 39 of consumption; 32 of marasmus; 28 of diseases of the heart; 27 of inanition; 23 of convulsions; 22 of inflammation of the stomach and bowels; 17 of inflammation of the lungs; 12 of pneumonia; 12 of debility; 14 of old age; 13 of typhoid fever; 12 of bronchitis; 12 of Bright's disease and 10 of casualties.

Markets, &c.—U. S. 4½'s, 103½; 5's 120; currency 6's, 113 1/2.

COTTON was quiet but steady, on a basis of 12½ cts. per pound for middling upland.

FEED.—Winter barn, choice \$14.25; do, fair to prime, \$13.50 a \$14; spring barn, \$18 a \$13.50.

FLOUR.—Western and Pennsylvania super, \$2.25 a \$2.60; do, do, extras, \$2.75 a \$3.00; No. 2 winter family, \$2.25 a \$2.50; Pennsylvania, roller process, \$3.50 a \$4.25; Western winter, \$3.90 a \$4.40; do, straight, \$4.40 a \$4.75; winter patent, \$4.75 a \$5.25; Minnesota, clear, \$3.75 a \$4.25; do straight, \$4.35 a \$4.75; do, patent, \$4.90 a \$5.25; do, do, family, \$4.50 higher. Bye flour was steady, and sold at \$3.25 per cwt. for choice Pennsylvania.

GRAIN.—No. 2 red wheat, 92½ a 93 cts. No. 2 mixed corn, 43½ a 44 cts.

No. 2 white oats, 37½ a 38 cts.

BEEF CATTLE.—Extra, 4½ a 5½ cts; good, 4½ a 5 cts.; medium, 4½ a 4½ cts.; fat, 5½ a 6 cts.; common, 4 a 4½ cts.; culls, 3 a 3½ cts.; fat cows, 2½ a 3 cts.

SHEEP.—Extra 5½ a 6½ cts.; good, 5 a 5½ cts.; medium,

4½ a 4½ cts.; common, 3½ a 4 cts.; culls, 2½ a 3½ cts.; lambs, 4½ a 5 cts.

HOGS.—Good light Western, 5½ a 5½ cts.; common heavy, 5½ a 5½ cts.

FOREIGN.—On the 10th instant, in the House of Commons, W. H. Smith, the Government leader, stated that, in view of the late period of the session, the Government had decided not to proceed with any outstanding order relating to the postponement of the consideration of bills from one session to another. It had also decided to drop the Irish Land Purchase bill and the Tithes bill during the present session, but to again introduce them at the next session, which would open in Elevated Month.

The Turkish Government has sent a new note to the British Government demanding that it fix a date upon which Egypt will be evacuated by the British troops, without the right of again occupying that country.

A dispatch from Muscat, dated the 9th instant, says: "A terrible cyclone has prevailed here and in the adjacent country. Great damage was done in the city and surrounding country. Many houses, both here and on the plantations, were demolished. The loss of life was appalling. Reports thus far received show that 1000 people were killed."

The French traveler Bonvalot, accompanied by Prince Henry of Orleans, has crossed Thibet, and arrived at Tatsien, in the Province of Se-Chuen, China.

At Osaka, Japan, on the 15th of last month, over 50 people were drowned during the launching of a new steamer, the *Muscat*, dated the 9th instant, and the owner, becoming apprehensive, ordered 100 of them ashore. When the launch commenced it was ebb tide, and the ropes used in securing her being too short the vessel keeled. The people on board immediately rushed to the other side, which had the effect of turning the vessel completely over, and those on board were precipitated into the water. At last accounts 55 bodies had been recovered and four persons were missing. About 20 persons were injured.

A dispatch from Zanzibar states that Dr. Peters, the German explorer, returned to the coast from the interior of Africa on the 8th instant.

The London agent of the National Bank of Uruguay received a cable dispatch from Montevideo, on the 9th inst., stating that a law suspending the conversion into specie of the notes of the National Bank for a maximum of three months has been decreed. The Government guarantees the payment of the notes of the bank cedulas and Government debts, all of which are payable in gold. The emission of bank notes will be limited to \$12,500,000, and will be guaranteed by the proper officials. This emission will be received everywhere in the world, and the notes will be convertible that absolute confidence prevails in monetary circles.

Buenos Ayres, Seventh Month 10.—At a meeting of prominent foreign bankers to-day a deputation was appointed to confer with the Minister of Finance on the question of a forced currency. The panic is increasing. It is at 320 premium. The run on the banks continues.

The ferry landing stage at Dartmouth, Nova Scotia, collapsed on the night of the 11th instant, precipitating a large crowd of men, women and children into the water. At last accounts 104 bodies had been recovered, and it was believed that four others were still in the water.

Advices from St. Johns, Newfoundland, say that there have been 2671 cases of diphtheria and 503 deaths since the outbreak of the epidemic. The disease is now under control.

RECEIPTS.

Received from William H. Corse, M. D., Del. \$2.00 64, and for Maria A. Ann Sizer, \$2.00 64; from Caleb Wood, Philadelphia, \$2.00 64; from Benjamin H. Lightfoot, Pa., \$2.00 64, and for Daniel Koll, O., \$2.00 64; from Deborah Satterthwaite, N. J., \$2.00 64; from Abner Allen, Cal., \$2.00 64.

66½ Remittances received after Third-day evening will not appear in the Receipts until the following week.

NOTICES.

WESTWON BOARDING SCHOOL.—The fall and winter term of 1890-91 will begin Ninth Month 20.

Parents and others intending to send children to the school, will please call on the following address:

J. G. WILLIAMS, Sup't., Westwton, Pa.

DIED, at his residence, near Concordville, Delaware Co., Pa., on Second-day, the 12th of Fifth Mo. 1890, CALEB EYRE THOMAS, in the 72nd year of his age. An esteemed member and overseer of Concord Monthly Meeting, Penna.

FOR "THE FRIEND."

Incidents and Reflections.—No. 233.

TEACHING BY ILLUSTRATIONS.

William Williams, of Wern, near Wrexham, a highly gifted and esteemed Welsh preacher, living from 1781 to 1840; "was essentially a man of peace. He would always avoid everything that tasted of contention in the church. Often would he say that, the law of the house of God was love. He visited many churches during his last illness, and his words to them all were, 'Love one another.' He would repeat a remark he heard in an annual meeting in Liverpool, that 'of all birds, the one that is scared most by the sound of the gun, is the dove.' 'Remember, Mr. Williams would say, 'that the Holy Spirit is likened to a dove, and that if you shoot at one another, the dove will soon leave you.' He made the following impressive remarks in a meeting at Rhos: 'I remember once being in the company of an old seaman, who recounted to me some of his hardships and adventures. He said that the most terrible battle he ever was in, was that which took place in the night between his own ship and another British vessel. The one mistook the other for an enemy. Many were killed on both sides, and the two vessels were greatly damaged; but when the dawn appeared, they found they had been fighting their own friends, for both had the British flag. They at once drew near and saluted each other, and wept over the dreadful calamity. It is just the same with Christians in this world, one set mistaking another for an enemy. It is night and they do not see. What will be their amazement when they look in one another's faces in the light of eternity, after having been fighting fiercely in this world? They ought, at least, to have patience enough to wait for the light before they begin to fight, lest they fire at their own friends by mistake.'

"He was once visiting a family of his friends in Denbighshire. In the morning, when an opportunity was given, he asked the servant, 'Mary, do you think anything of religion, Jesus Christ and your own soul in these times?' 'No, indeed,' was the reply. 'Did you ever before think of these things, Mary?' 'Oh! I did, indeed, many times in years gone by; but that is now over.' The window was open, and there was an apple-tree growing in the garden before it, and it was

then in blossom. 'Well, Mary,' said Mr. Williams, 'you see this apple-tree, so full of beautiful blossoms?' 'Yes,' she said, 'Well, if you were to go to it and shake the blossoms off, no fruit would come; I am afraid that you have shaken off those feelings, Mary,' said he; 'If ever you feel so again, beware of shaking them off, rather foster and cherish them.' Soon after the preacher departed; but in a short time her mistress noticed Mary wiping the tears away from her cheeks, and she asked her what was the matter, whether she was ill or not. She replied that she was not, but that a word which Mr. Williams had said before he went away that morning had made a deep impression upon her. The result of it was that she gave herself to Christ without delay; and she spent a happy life in his service.'—From some of the great preachers of Wales. By Owen Jones, M. A., 1886.

An illustration of faith may be found in the following anecdote:—

"A number of years ago, I read an account of a visit made by the Prince of Wales, in company with an eminent man of science, to a great iron foundry. They stood together by a stream of red-hot iron, flowing slowly out of the smelting furnace. 'Do you believe in science?' said his companion to the prince. 'I do,' was the reply. 'Then thrust your moistened finger into that stream.' The prince at once divided the stream with his finger, and the finger was not burned.

Whether this particular incident occurred or not, the same thing is not unfrequently done by workmen in foundries. On the instant of the contact of the hand with the fiery liquid, there ensues what the scientific men call the 'spheroidal state,' in the water on its surface. The sudden evaporation is somehow attended by a repulsion that perfectly shields the flesh, for the moment, from contact with the burning substance through which it passes. A learned professor has related to me, that having had occasion to refer, in a popular lecture, to the principle of the spheroidal state, and to explain how a stream of molten iron could be thus parted by the naked hand with impunity, a lad among his hearers, informed him that his father, a workman in a foundry near by, had often done it. The lecturer repaired to the place, and the workman repeated the experiment in his presence, but, in reply to an inquiry, informed him that the other workmen were afraid to do it.

We may suppose a person to understand the principle of the spheroidal state, yet the sight of the red-hot liquid might induce a recoil which his faith in the principle would not suffice to overcome."

The account that is given of a Scotch tenant's interview with his landlord, is an instructive illustration of the folly of trusting in spiritual matters to any lower power than Him who rules all things:—

"A certain Scottish nobleman lived quite a retired life, and left his affairs very much in the

hands of others. Donald, one of his tenants, rented a farm, upon which his forefathers had lived for above two hundred years. The lease which he held was on the point of expiring, and the steward refused him a renewal, wishing to put the farm into the hands of a friend of his own. Poor Donald tried every argument in his power with the steward, but in vain; and, at length, he bent his steps to the castle, determined to make his case known to his lordship. Here, however, he was again repulsed; the porter had received orders from the steward, and refused him admittance.

Donald turned away almost in despair, and resolved upon a bold measure, as his only chance of success. He climbed the garden wall in an unfrequented part, and entered the house by a private door. At length he approached the private apartment of the nobleman. He heard a voice, and drawing near, found it was his lordship's, and that he was engaged in prayer. Retiring to a short distance, he waited until the prayer was concluded, and could not but hear his lordship pleading earnestly with the Virgin Mary and St. Francis, for their intercession on his behalf.

At length his lordship ceased. Donald, who had stood trembling with anxiety for the result, now gently knocked at the door. 'Come in,' was his lordship's reply, and Donald entered. 'Who are you, man? and what do you want?' was the inquiry. Donald stated his case. The peer listened, was touched with the tale, and having heard something of Donald, assured him of his protection, and that his lease should be renewed. Many artless but earnest thanks followed, and he was departing, when a thought of anxiety for his noble master entered his mind. Donald returned and spoke thus: 'My lord, I was a bold man, and you forgive me, and have saved me and my poor family from ruin. Many blessings attend you! I would again be a bold man, if I might, and say something further to your lordship.'

'Well, man, speak out.'

'Why, my lord, I was well-nigh a ruined man; so I was bold and came to your lordship's door, and as I stood there, I could not but hear your lordship praying to the Virgin Mary and St. Francis, and you seemed unhappy. Now, my lord, forgive me, but I cannot help thinking the Virgin Mary and St. Francis will do you no good, any more than your lordship's steward and porter did for me. I had been a ruined man if I had trusted to them; but I came direct to your lordship, and you heard me. Now, if your lordship would but leave the Virgin Mary and St. Francis, and just go direct to the Lord Jesus Christ himself, and pray to Him for what you need, He will hear you; for He has said, 'Come unto me, all ye that labor and are heavy laden;' and again, 'Him that cometh to Me, I will in no wise cast out.' Will your lordship forgive me, and just try for yourself?'

It is said that his lordship was struck with this simple argument, and that he afterwards found, what a poor penitent sinner trusting in

Jesus will always find—pardon, peace and salvation.”

J. W.

FOR "THE FRIEND."

Joshua Evans.

(Continued from page 402.)

1796. Fifth Mo. 18th.—At a kind Friend's house there was sent in the afternoon a fine riding wagon with nice horses, for that Friend's wife and me to ride in to visit her mother and some others. I told her I had no objection to going, yet was not free to ride in that carriage, nor with such horses; but I could go on foot, and she might ride in it, as a late rain caused the roads to be wet and unpleasant walking. This was a trial to us both, as she appeared to be a good-spirited woman; but I believed it best for me to hold forth my testimony for simplicity and lowly-mindedness.

19th.—I was at Rahaway Monthly Meeting, and at an evening meeting appointed by my Friend, J. S., held here. These seemed to be laborious seasons, though attended by many Friends on their way to Yearly Meeting at New York—reaching to that city next day. I was somewhat comforted; many Friends kindly came to see me.

21st.—The Yearly Meeting of ministers and elders began at 10 o'clock, [where] were our Friends, John Wigham and Martha Routh, from Europe, with others out of other parts; a second sitting thereof was in the afternoon; low times to me. I thought many of us were got into a state of easy indulgence in many things, and are not soon to be removed from both of case. I tried at it a little, yet not much purpose. I hinted that the benefit and well-ordering of this large Yearly Meeting would much depend on the wise conduct of those in high stations—guarding well their own example and conversation; and then watching over younger people carefully: checking their going on formal visits from house to house; that if favored to receive a little good, they might not lose its savor, or learn bad fashions or unprofitable customs, by getting into companies and indulging vanities, so as to be in danger of returning from such a solemnity worse than when they came to it;—that of sitting up late in the evenings, and laying in bed late in the mornings. I had also to mention my belief, it was unprofitable for body and soul. I thought this kind of doctrine seemed rather hard or close for me to deliver among brethren and sisters of high rank in a large city; and though lately visited with alarming mortality, I fear too many are not enough humbled.

23rd.—The meeting of business began, which in most of its sittings seemed times of exercise: the stream being low, as I thought—members being too generally tintured more or less with a worldly spirit—know not the proper value of the precious Truth, and thus become captivated, barren and dwarfish.

At one sitting of the Select Meeting, on Fourth-day morning, the Truth appeared to have comfortable dominion; my mind in the liberty thereof was emboldened to inform my brethren and sisters of my exercise on observing a custom to prevail in the city which I thought was not right; and if I differed from all my Friends in sentiment, I hoped I might be excused. It was that of employing men to do women's work in houses, etc. That I did not doubt there being women enough, healthy and capable of business, if their minds were applied thereto, to do all that was necessary in families; and as provisions were dear, and men's labor

high rated, they had better be employed in the field, or outdoor business, than at women's work. If the young women were to be brought up in a course of family industry, and to rise early in the morning, I believed it might contribute to health, and tend to fit many of them better for business and the management of household affairs; if they should come to need that, than if brought up in an easy, delicate manner; having seen some such in my time who have been reduced to great hardship and unable then to minister to their own necessities; and perhaps there may be instances of this kind proceeding out of families where men had been employed to do women's work, and children indulged in a delicate, idle life. Though my testimony on this head seemed to go hard with some to whom it might seem applicable, yet I found it had the concurrence of many Friends, who expressed their agreement therewith. It was also proposed by one Friend that a minute of the substance of the concern be taken on their book, which was agreed to.

This was a memorable time; the power of Truth in dominion; lofty spirit chained down; the rich and the great having to submit to the simple discipline prevalent in the present season.

In a following sitting of ministers and elders, the same concern was strengthened by others; and Friends in the city and country closely advised to attend to the contents of what was taken on minute at the former sitting. The bow seemed (as I believed) to be at this season renewed and strengthened by the Lord's Power, in the hands of some little ones, who had to shoot their arrows against the queen of pride. I did not find myself cleared without also hinting my exercise on the growing custom of Friends having fine carpets and floor coverings in their rooms; which I believed were not brought into use by the dictates of simple Truth; and that a number of such matters might well be spared, and thus help be administered towards warming and covering many of the poor.

28th.—The Yearly Meeting ended the 28th, with a public meeting. I was exceedingly stripped that evening; having to confess, with the prophet of old, "I am a worm, and no man." So great was my poverty, that I feared I should murmur; there seeming to be no sense of good left. But I tried to get into quietude, therein to know what further the Lord had for me to do. Next day being the first of the week, there were held three meetings in the city; the last of which was appointed for the youth of all descriptions. These were large, and I thought ended well, yet not so highly favored as some have been. Here I parted with my beloved Friends, J. Wigham and M. Routh, each turning to our own allotments in the Master's work: John, to Long Island, Martha to the Northern Meetings in this government, and I towards the Genesee country and Upper Canada.

30th.—Musing on the state of things, I feared that since the late mortality, the people in this city are grown rather worse than better. This is cause of grief to many as well as myself; though I do not see I have any further to do in the place. Next day I left New York, as one having no inheritance on earth. (31st.) Travelled about 40 miles to Croton River, and had a pretty large meeting that evening, on short notice, which proved reviving and satisfactory, believing it ended to the honor of Truth.

Sixth Mo. 1st.—I went about 40 miles further to a Friend's house near the North River; and the next day was at their week-day meeting at Swago, which was small, yet in measure favored,

After which I visited an aged Friend under bodily affliction, but in a heavenly frame of mind, who, although his pain was great, refused the taking of laudanum as a medicine, lest it might tend to stupefy his senses, near the close of life, by its benumbing effects. I much approved of his religious caution herein; fully believing it has often been handed out by doctors in an unrighteous manner; which in some instances may injure the clear understanding of departing souls, in their last moments.

I am informed by a Friend, who says he has it from the mouths of two merchants in New York, who were in partnership, that in the summer of last year they imported from the East Indies teas and silks, on which the duties which were to be paid amounted to more than one hundred thousand dollars; and, as it is said, much of those duties goes towards defraying the expenses of war; I do not see how Friends can, consistently with a clear testimony to that pure principle which stands against all cruelty and bloody measures, freely purchase and use the goods on which such duties are laid; it being (as I take it), generally agreed that those who use or consume the articles so circumstanced do pay the duties. Such are my tender scruples and testimony; and so I leave it for others to look at it, perhaps when I am dead and gone—believing it to be what was given me to bear, and attend to, in simplicity and integrity of heart.

The 3rd, I proceeded on my way, and came to Z. Green's; had a solid time in his family; several young women were there, and it was a satisfactory season. I also visited an aged woman Friend of a heavenly mind, as I believed. I have to wait a little for a companion; feeling inward calmness. This I take to be a Divine gift, to support a tottering mind.

5th.—I was at a Creek Meeting (Nine Partners), where strength was given me to labor (I believe) to the honor of Truth, and my own comfort. Next day, my companion coming, we rode to Little Nino Partners; and the day after that, upon short notice, had a pretty large meeting, to good satisfaction, at Catskill, amongst the Presbyterians.

8th.—Crossing the North River here, we proceeded westward towards Unadilla. I felt myself as a stranger in a strange land; yet perceived a little something which inwardly sweetened the mind. The next day we went much the same course, through a wilderness, where the mountains were admirably high, which seemed awful; and travelling very difficult among roots, rocks and mire. Sometimes we seemed to be surrounded in such a manner with mountains as though there would be no way. Here it was hinted to mind, "Look not outwardly, but to the Lord, and the path." I then felt more easy, scarcely daring for a while to raise my head or look about me. The road also continued difficult the next day, but I was favored with a sweet calm. I thought perhaps many of my Friends were, in another way, toiling themselves, in trying to get riches, and leave their children rich—and I, struggling along thus, might come to die outwardly poor. But my mind was touched on this wise: Thy riches come another way; if thou art faithful, thy reward shall be sure, and sufficient.

(To be continued.)

BLESSED is the man who learns to profit by his wants and infirmities, and who, in all the privations he endures is submissive to the will of God.—Selected.

FOR "THE FRIEND."

Marl Pits.

In a notice of a visit to Hylton's sand pits on the Pensauken Creek, in Tyr: FENIX, of last week, it was stated that they are in the Cretaceous formation—which extends in a long belt or strip across New Jersey in a direction from northeast to southwest.

The lowest of the layers which are included in this formation come to the surface or crop out on the northwest side. These are the plastic clays—the fine clays and potters' clays—such as we found at Hylton's, under the beds of sand and gravel. As we cross the Cretaceous belt at right angles to its length, by travelling to the southeast, these clays sink deeper and deeper into the earth; or, in other words, have more of other layers lying on top of them. Above the plastic clay is a thick bed of clay marl—a dark-colored clay, with some of the green-sand grains intermixed. Above this are three marl beds, separated by beds of red and yellow sands.

Through the kindness of a friend living at Glassboro, N. J., I had the opportunity on the 9th of Seventh Month, of visiting the excavations for marl made by the West Jersey Marl Company on the banks of Mantua Creek. The company had adopted the plan of removing the material lying on the surface of the marl, and then excavating the marl to the depth of the layer—of, perhaps 15 feet—provision having been made for drainage by the construction of a drain into the creek a mile or more further down its channel. This process had been carried on, until they worked so far back into the bank, that the overlying layers of gravel and sand became so thick, that it was too expensive to move them; and another place was selected for the scene of similar operations. These pits were now deserted, and the place presented a view of an uneven bed of gravel lying where the marl had formerly been—in the edge of the excavation; the banks showed the dark green marl in its natural position, overlaid with gravel and sand.

As we go in a southeast direction, the layers of clay, marl sand, etc., sink deeper and deeper into the earth, at the general rate of from 20 to 30 feet per mile; so that one does not travel many miles in that direction before the marl is so far below the surface, that it is not exposed in any of the valleys or gulleys made by the washing of the streams; and then we may be said to have passed the marl district, although the marl still exists as is shown by the boring of deep wells at the ocean side, where beds of marl are pierced several hundred feet below the surface.

In the article on the clay pits, these layers of materials in Southern New Jersey were said to lie on each other like the leaves of a book. To make the comparison a clearer illustration of the actual condition, we may regard the strata of Southern New Jersey as a huge book lying on its side on a bed of primitive rocks, such as we find to the west of the Delaware. The bed on which it rests is not entirely level, but slopes downward at the rate of about 25 feet to the mile. So that the leaf which would be at the level of tide-water on the Delaware River above Philadelphia, would be 1,000 or more feet below ocean level at the sea-shore by Atlantic City.

The marl beds of New Jersey are rich in fossils. On a former visit to the West Jersey pits, at a time when digging operations were being carried on, I obtained many interesting specimens; but the locality where they were

then most abundant, was now so overgrown with bushes and briars, that search there was fruitless. We found, however, a pile of shelly deposit thrown up by some diggings at the mill on Mantua Creek, which yielded many specimens of interest. Large shells appeared allied to the oyster of to-day, were numerous; and I was interested to notice the outer part of many of these shells perforated with numerous small holes, such as we now see on the shells of our present species—and which are made by a boring sponge—thus giving us a proof that such sponges existed in the waters of the ocean where these shells grew long ages ago.

Another fossil that interested us much was a smooth, round crystalline formation one-half an inch or less in diameter, and from two to four inches long, and tapering to a blunt point at one end. These are sometimes found in great abundance, and are the remains of an ancient species of cuttle-fish. At the larger end, in its unbroken state, there is an expanded hollow portion, which the living animal inhabited. The specimens we found were all imperfect;—indeed this thin enlargement which formed the home of the cuttle-fish is so fragile, that comparatively few of the thousands of specimens that have been picked up have any part of it left unbroken.

The bones and teeth of many varieties of fish and reptiles have been found in the marl formation—proving that these layers of sand, clay, etc., must have been deposited beneath the waters of the ocean, which then reached the vicinity of Trenton. This was probably then the point where the Delaware River emptied its waters into the sea.

Some fish-ponds had been constructed by the banks of the Mantua Creek, in which we could see the gold-fish swimming about. Across the top of these ponds, in places, were stretched sheets of wire netting, the object of which we supposed was, to protect the fish from depredation of the heron and other water-birds which prey on fish. Some parts of the pond were covered with a growth of water-lilies.

In a shallow part of the creek we noticed a little school of perhaps 20 very little catfish, looking somewhat like tadpoles. They were clustered around a large stone.

J. W.

Storehouse and Fortress.—The poor peasant or fellow, who lives from year to year, or rather from month to month, conceals his scanty store, which is to supply him till the next harvest, in a *siló*, or underground pit, carefully covered over, either in his little plot or in the yard of his house, and drives his goats every night into his court-yard; but when a man becomes richer, in a land where wealth consists in flocks and herds, and in stores heaped up, rather than in money, this wealth in kind cannot be so easily concealed, and his first aim is to secure his possessions against the surprise of marauding parties. With this object he prepares to build a storehouse, or defensible tower, such as we see still among the Druses of the Haran, where he can bestow all his fruits and his goods. As the robber parties are generally only a troop of light-armed horsemen, a simple square building of stone, loopholed in the upper story, is sufficient for security, these towers not being intended to resist regular military operations. Such a tower still exists at Carmel in Judah, the home of Nabal, and is attributed to Abigail's churlish husband by the country folk around, though in reality of no earlier date than the time of the Crusades, having probably taken the place of

an earlier and ruder building. The need for these towers, and the way in which stores were kept by the poorer classes, is illustrated in Jeremiah 41: 8, where ten men plead for their lives, "Sith we have no treasure in the field, of wheat, and of barley, and of oil, and of honey; that is, hidden in stores, buried underground, which they could reveal to their captor, if their lives were spared."—*H. B. Tristram, Canon of Durham.*—From S. S. Times.

FOR "THE FRIEND."

Divine Intelligence.

We are told there is a spirit in man, and that the inspiration of the Almighty, through the medium of this spirit, gives an understanding in relation to heavenly things. And we have plenty of words outwardly, from the natural man, in relation to the works of the Spirit. But to hearken to the living eternal Word inwardly, which gives Divine intelligence to the soul, is better than all; for it is not only able to comfort at present, but to save forever. And this is that living Word of faith which has been preached inwardly to every intelligent son or daughter of Adam since the world began; and is said to be nigh to us all, even in our hearts and in our mouths as a swift witness to help us to discern between good and evil. For it is a discerner of the thoughts and intents of the heart. So that which may be known of God is manifest in man, for God has shown it unto us by his Spirit. Yet our vanity and self-confidence are so great, that many appear to prefer the letter to that Spirit which searcheth all things, even the deep things of God. And in this searching Daniel says, "many shall be purified and made white and tried; but the wicked shall do wickedly, and none of the wicked shall understand, And they that be wise shall understand. And they that be wise by Divine intelligence, shall shine as the brightness of the firmament; and they that turn many to righteousness, as the stars for ever and ever." But we all have to be tried. Paul was a chosen vessel of the Lord; yet a messenger of Satan was permitted to buffet him for a season, as a thorn in the flesh. So he besought the Lord that it might depart from him. But the answer of the Lord was, "my grace is sufficient for thee, for my strength is made perfect in weakness." So we should "count it all joy when we fall into divers temptations, if his preserving grace is around us, knowing that the trying of our faith worketh patience. But we must let patience have its perfect work, that ye "may be perfect and entire, wanting nothing." And when this condition of perfection unto salvation is attained, it places us back as into the garden and paradise of God. For Christ says: "To him that overcometh will I give to eat of the tree of life which is in the midst of the paradise of God," like our primeval parents were before sin entered into the world, and death by sin.

Here we may partake, at intervals, even this side the grave, in a joy unspeakable and full of glory, as a foretaste of the full fruition in the world to come. It is spoken of a being unspeakable because it is deeper and more sublime than human language can reach. Yet we have modern experts who profess to explain it all out with the enticing words of man's wisdom, when we are plainly told that the world by its wisdom knows not God. But a sufficient portion is revealed to God's little ones by his Spirit, whether they have ever seen the Scriptures or not.

But I believe that Paul meant what he said, where he says, "All Scripture is given by inspiration of God," and is profitable some for one

thing and some for another, that the *man of God* may be thoroughly furnished. Having the Scriptures without and the immediate inspiration of the Almighty within, as a heavenly anointing—an unction from the Holy One—together with various gifts, all from the same Spirit, we are thoroughly furnished up to all good works, and left without excuse.

Now from what I have written the reader may see that I believe in a Divine intelligence shining upon the heart or the spirit in man, as the inspiration of the Almighty, which gives to all who in faith open their hearts and receive it, an understanding in the ways of life and salvation. And that this saving seed of grace is universal. And surely this saving seed of life and grace is universal, for the ways of light and life are as extensive as the ways of sin and death.

DUBLIN, IND., Sixth Mo. 27th, 1890.

FOR "THE FRIEND."

The Growth of Language.

The main feature of the gradual development of our spoken language, as a human institution, may, perhaps, be the more or less continued origination and multiplication of abstract or general terms, as we are privileged to rise from the plodding contemplation of particular details or items of common experience, to the perception of classes, and the apprehension of principles. It thus becomes the rich heritage of us on whom the ends of the world are come, and who are equipped with the comparatively recent science of philology, that we can even trace the historic development of human thought, in the corresponding development of language, such as the formation of the habitable surface of the globe we thus temporarily inhabit, is inferred by the geologist from an inspection of strata and fossils. The fossils seem to stand for particular literary productions, and the strata for the contemporary degree of development in current language.

A notable intimation of the primeval paucity of general terms, is that in the first chapter of the Book of Genesis, where, by that law of "poesis," which we must ever follow in the expression of advanced thought, the word "day," is used to signify "period,"—the concrete item to stand for the, as yet, unnamed class, or abstraction. All original utterance demands an effort of the imagination, such as that which is here implied. So, again, when "the prophet [Habakkuk] upon Shigionoth" was contemplating the possibilities and the demands of what, in our day, would be designated as "the living present,"—the truly awful transition instant between the tremendous past and the pregnant future,—he resorts to the very concrete primeval phrase, "in the midst of the years." The abstract present seems then to have been so shadowy a thing to have a non-substantive specially devoted to it. "In the midst of the years make known!" Give us of thy undefeatable knowledge—give us adequate light and certainty in the continual crisis of our life-battle! "In wrath, remember mercy." Let "the sun of righteousness arise with healing in his wings." Atone for the past in indeed precious as a preliminary mercy, but the ounce of prevention is even more than the pound of cure. Give us understanding and we shall live (Ps. cxix, 144). Our spirit will then indeed sustain our infirmity (Prov. xviii, 14), for we will work and even sing praises, "with understanding," even as the whole men which thou hast designed us to be! For

the prophet had already complained, "O Lord, I have heard thy speech, and was afraid." That was indeed a speech, in which there was no uncertain sound, and in the light of which all current plausibilities were exposed in their inherent deformity. His first thought was for a revival of the simplicity and sensibility which quickly forsake the votary of pleasure. The pursuit of pleasure is nothing but the pursuit of surfaces; and depth of experience is essential to the satisfaction of spiritual beings, who, by yielding to the strivings or solicitations of the Divine Father of spirits, have been quickened to the consciousness of their own spiritual nature. The so-called revivals of religion in our day, have been too largely characterized by a superficiality of faith, which has admitted and condoned a superficiality of life and of aim, and forged, at best, but a slightly improved conventional fetter, or mould for the forming mind. When the prophet petitioned, "Revive thy work in the midst of the years," he, doubtless, had reference to a work which begins in introversion, and which included self-examination, and a scrupulous controversy with maxims and methods, which have no present warrant, but a prevalent worldly consent and practice. The life of the church is the ordained "light of the world;" not the life of the world, the light of the church. The true members of the church universal in all ages, inasmuch as they individually build upon the immediate revelation of that Divine Word, which, in the fulness of time, "was made flesh and dwelt among men," are in all ages prepared to sound the warning, "say ye not a confederacy," but "sanctify the Lord God in your hearts." Build upon the real rock of Peter, upon that true and abiding mystery of Christ, which underlies, or has underlain, all true precedent, ritual, and history; but build not upon even the best precedent, ritual, or history, not even upon the knowledge, or tradition of Christ himself after the flesh, or you must tend, however gradually and insensibly, to that self-styled "Catholic church" of which it is an essential tenet, not so much that its life shall be "hid with Christ in God," as that it shall be a visible institution in the sight of the world.

RICHARD RANDOLPH.

Sixth Month, 19th, 1890.

FOR "THE FRIEND."

Canada Yearly Meeting.

The different sittings of this Meeting commenced on Sixth-day, the 20th of Sixth Month, at 10 o'clock, A. M., with an attendance of representatives from the Quarterly Meetings equal to other years, but the number of members present was less than usual.

There were also in attendance, Friends from North Carolina, New Jersey, Pennsylvania, Ohio, Iowa, and New York, some of whom presented certificates, expressive of unity, from their Monthly, and Quarterly Meetings; their company, and labors in the meeting were received as a further token of the Lord's goodness to, and remembrance of us as a people.

Epistles were received from Western, Kansas, Iowa, Ohio, and New England Yearly Meetings, the reading of which was minuted as having been comforting, encouraging, and instructive.

The session on Seventh-day, and a part of that on Second-day, were principally taken up with reading the Queries and Answers.—This examination of the state of the church, elicited much good counsel and advice, an epitome of which was placed on the minutes to be sent to the Subordinate Meetings.

Information was received of a change in the

times of holding Norwich Monthly, and Preparative Meetings; the latter is now held on the first Fourth-day in each month, at 10 o'clock, A. M., in the Fourth to the Tenth Months inclusive, and at 11 A. M., in the Eleventh to the Thirteenth Months inclusive. The Monthly Meeting is held on the second Fourth-day in each month, at the same hours.

Norwich Quarterly Meeting is to be held on the first Seventh-day, after the second Fourth-day, in Third, Sixth, Ninth, and Twelfth Month, at 10 A. M., in Sixth and Ninth Months, and at 11 A. M., in Third and Twelfth Months.

A Testimony of Norwich Monthly Meeting of Women Friends, concerning that faithful Friend and minister, Lydia P. Stover, deceased, was read and ordered to be printed with the minutes of the Yearly Meeting.

The Meetings for Divine Worship, on First-day, at 10 o'clock, A. M., and 3 o'clock, P. M., held in the Yearly Meeting-house, were well attended, many from the neighborhood coming in to sit with Friends; and may well be said to have been times of refreshing from the Lord.

A committee was appointed to procure the printing of a sufficient number of copies of our discipline, so that each family may be provided with one; and to distribute the same when obtained.

The following Friends were appointed correspondents for the meeting: Allan M. Dorland, Wellington, Ont.; William V. Richardson, Pickering, Ont., and George Korke, Thornbury, Ontario.

The meeting concluded on Third-day the 24th; commemorating the condescension and love of our Heavenly Father, in granting the overshadowing of his presence, during the different sessions thereof.

A Meeting for Worship was held at 3 P. M., which was a solemn parting session, in which covenants were made of greater faithfulness to, and a closer walk with God.

Friends, with few exceptions, left the following morning by early trains, for their respective destinations; many expressing thankfulness for the enjoyment of the meeting, which they believed amply repaid the sacrifice necessarily made in attending.

The above account was forwarded by a member of Canada Yearly Meeting. A letter received from another Friend in that country, says:—

"A deep baptism has been poured out on our younger Friends, at this Yearly Meeting—many of them afresh realizing the great responsibility resting upon them, seeing so many of the fathers and mothers are being removed, and how soon they will be called to fill their places. * * * Love and harmony has prevailed in all our meetings, and Friends have been brought very near together in spirit."

A *Soft Answer*.—The Bible says: "A soft answer turneth away wrath." The *Irish Times* tells of a case in which a gentle action served the same purpose: "A brave, active, intelligent terrier, belonging to a lady-friend, one day discovered a monkey, belonging to an itinerant organ-grinder, seated upon a bank within the grounds, and at once made a dash for him. The monkey, who was attired in jacket and hat, awaited the onset, in such undisturbed tranquillity that the dog halted within a few feet of him to reconnoitre. Both animals took a long, steady stare at each other, but the dog evidently was recovering from his surprise, and was about to

make a spring for the intruder. At this critical juncture, the monkey, who had remained perfectly quiet hitherto, raised his paw and gracefully saluted by lifting his hat. The effect was magical. The dog's head and tail dropped, and he sneaked off to the house, refusing to leave it until his polite but mysterious guest had departed." It takes two to quarrel always, and if one won't, the other can't.

The "Dies Irae."

BY PROFESSOR PHILIP SCHAFF.

Three hymns stand in the first rank of Latin Church poems, and perhaps of all religious lyrics: the *Dies Irae* of Thomas a Celano, the *Stabat Mater* of Giacopone da Todi, and the *Jesu dulcis Memoria* of St. Bernard. They have certainly never been surpassed. The first is the sublimest, the second the tenderest, the third the sweetest, hymn of the Middle Ages. The *Dies Irae* is a judgment hymn, the *Stabat Mater* a passion hymn, the *Jesu dulcis Memoria* a Jesus hymn. All date from the ages, which built the cathedrals, witnessed the crusades, produced the systems of scholastic philosophy and theology, and, at a later stage, prepared, through the revival of letters, the way for the Reformation and the higher modern civilization. The Middle Ages have passed, and can never be resuscitated, but what was pure and true and good in any age is immortal, and "a thing of beauty is a joy forever."

The *Dies Irae* takes its name from its first two words, "Day of Wrath," which are borrowed from the Bible; namely, the description of the terrible day of judgment in Zephaniah 1: 15, 16, according to the Latin Version of St. Jerome which was in universal use in Western Christendom during the Middle Ages, as it still is in the Roman Catholic Church. Those words strike the keynote, and should not be changed in a translation. The poem is usually traced to Thomas of Celano, in Italy, a friend and biographer of St. Francis of Assisi, and Superior of the Franciscan convents at Cologne, Mayence, Worms and Spire. He died in his native country in the middle of the thirteenth century, about A. D. 1260 (five years before the birth of Dante). This pious monk wrote the hymn in his lonely cell for his own edification, without dreaming that he would thereby edify unborn millions in languages and countries he never heard of. Like the cathedral builders, he never heard of his own name in the grandeur of his theme. He felt that nothing is great but God, and nothing real but eternity.

The hymn is a soliloquy, a meditation on the terrible day of judgment, when all men shall be summoned before the throne of an infinitely holy God to answer for every thought, word, and deed. It brings before us all the awful theme with a few startling words from the Scriptures, describes the collapse of the world, the resurrection of the dead, the appearance of the Judge, the opening of the books, the trembling of sinners, the award of eternal bliss and eternal woe. It expresses the sinner's sense of guilt and dismay, and ends with a prayer for the mercy of our Saviour, who died for sinners, who pardoned Mary Magdalene and promised the penitent robber on the cross a seat in Paradise.

But what constitutes the infinite superiority of the *Dies Irae* over all judgment hymns, in any language? It is, in the first place, the intensity of pious feeling with which the poet brings his awful theme before the reader. He hears, as it

were, the trumpet of the archangel and the commotion of the graves; he sees the rising of the dead, and the Son of man, in tremendous majesty, opening the books of ages, dividing the sheep from the goats, and pronouncing the irrevocable sentence of life and death eternal; and he pleads in the spirit of the sincerest repentance for mercy, mercy, and nothing but mercy. The poem is a cry from the depth of personal experience of sin and grace, and irresistibly draws every earnest reader into sympathetic excitement.

The second element of the incomparable power of the *Dies Irae* is its classical diction, which for simplicity and sublimity, brevity and force, dignity and melody has no equal, still less a superior, in any literature.

The *Dies Irae*, as a whole, has been more frequently translated than any other poem or book except the Bible. There are from eighty and a hundred German, and over one hundred and fifty English translations. America has taken a very prominent part in this work. I have collected translations from Roman Catholics, Lutheran, Presbyterian, Baptist, Episcopal, German and Dutch Reformed ministers and laymen, which would make a little volume by themselves.

The most distinguished American translator is a physician, Dr. Abraham Coles, of Scotch Plains, in New Jersey. He has made no less than seventeen distinct versions.

Among the double-rhymed translations of English writers, that of Dr. William Irons, who died in 1883, is considered the best. I give it here at the close.

The following is Dr. Irons' version:

1. Day of Wrath! O Day of mourning!
See! once more the cross returning—
Heav'n and earth in ashes burning!
2. O what fear man's bosom rendeth,
When from heav'n the Judge descendeth,
On whose sentence all dependeth!
3. Wondrous sound the Trumpet singeth,
Through earth's sepulchres it ringeth,
All before the throne it bringeth!
4. Death is struck, and Nature quaking—
All creation is awaking,
To its Judge an answer making!
5. Lo, the Book, exactly worded,
Wherein all hath been recorded,—
Thence shall judgment be awarded.
6. And when the Judge his seat attaineth,
Amid each hidden deed arraigneth,
Nothing unaveng'd remaineth.
7. What shall I, frail man, be pleading?
Who for me be interceding?—
When the just are mercy needing.
8. King of majesty tremendous,
Who dost free salvation send us,
Fount of pity! then befriend us!
9. Think, kind Jesus—my salvation
Caust' thy wondrous Incarnation;
Leave me not to reprobation!
10. Faint and weary Thou hast sought me,
On the Cross of suffering bought me?—
Shall such grace be vainly brought me?
11. Righteous Judge of retribution,
Grant Thy gift of absolution,
Ere that reckoning-day's conclusion!
12. Guilty, now I pour my moaning,
All my shame with anguish owning;
Spare, O God, Thy suppliant groaning!
13. Thou the sinful woman savest;
Thou the dyving thief forgavest
And to me a hope vouchsafest.
14. Worthless are my prayers and sighing,
Yet, good Lord, in grace complying,
Rescue me from fires undying!

15. With Thy favor'd sheep, O place me!
Not among the goats abuse me;
But to Thy right hand upraise me.
16. While the wicked are confounded,
Doom'd to flames of woe unbounded,
Call me, with Thy saints surrounded.
17. Low I kneel, with heart-submission;
See, like ashes, my contrition—
Help me in my last condition!
18. Ah! that Day of tears and mourning!
From the dust of earth returning,
Man for judgment must prepare him;—
Spare! O God, in mercy spare him!
Lord, who didst our souls redeem,
Grant a blessed Requiem! Amen.

S. S. Times.

FOR "THE FRIEND"

Some Observations on Missionary Labor in the Society of Friends.

[The following remarks have been forwarded for insertion in THE FRIEND, by a concerned member who thinks they will give satisfaction to many of its readers. We are quite prepared to enlarse the view it upholds—that it is the Master's immediate call to each one personally, that becomes his authority to enter into any particular field of labor. If it were not for the outward views of some under our name at the present day, it would not seem necessary to remark, that where the writer speaks of "baptizing," he refers not to the use of water, but to the bringing of the hearers under the influence of the Spirit of Christ—a power which the Head of the Church at times bestows upon those whom He calls into service as his ministers.—Ed.]

With the object which the missionary organizations labor for, every Christian Friend must be in sympathy, and ought to stand ready for his required part therein; namely, the promotion of the kingdom of our Lord and Saviour in the hearts of men.

Whether each individual's place is in a foreign field or nearer home, is to be known only by a sense of the Master's will, under the immediate witness of his Spirit. A sense of the desirableness of labor in any particular locality, is not the requisite authority for entering upon it. It is not our sense of the need, but the Master's immediate call, to one personally, that becomes his authority to enter in.

No text of Scripture is my call to go hither or thither, except as livingly applied to use by the Spirit as my marching order. For instance, the injunction: "Go ye into all the world and preach the Gospel to every creature," or, "Go ye, therefore, and make disciples of all nations, baptizing them into the name of the Father and of the Son and of the Holy Ghost," is an injunction to "go, baptizing;" for which, without authority to baptize into the Divine name, there is no commission. What God hath joined together—the "Go and preach" and the "baptizing"—let not men put asunder, or assume authority in the former without authority in the latter. So the commission to go is confined to the baptizing power of the Holy Spirit, constraining the messenger, showing him his field—covering his flock under the authority of his ministry, and gathering them into the name of Him to whom the gathering of the people shall be. No society can bestow this commission; but a Christian Society, if it be gathered under the right sense of it, may acknowledge that the messenger has the commission, or their unity with him in it. A society while acknowledging gifts may not undertake to supply fields. It may

pray the Lord of the harvest to do that, and it may speed the laborer on his mission by material contributions. But as an organization for filling places, because it apprehends a need in those places, it would presume upon a Divine prerogative. It can go no farther than to be a society for the encouragement of individual faithfulness to the word of Life as manifest to each soul.

The Society of Friends is established to be such a missionary society as this. It is banded together for the upholding of certain principles of life. It must have confidence in any who propose to labor as representatives of its Christian profession, before giving its official credentials to them; that they do truly represent the Gospel as held by us. It has the right of jurisdiction over all publications or persons operating under its name, to represent its profession in the world at large. If irresponsible and volunteer associations of its members arise independently of its Discipline, still to represent its name in professed Christian work abroad, they travel on the firm's name without the firm's endorsement, and force the parent Society to clear itself from the unauthorized responsibility.

A Yearly Meeting cannot assume the responsibility of every movement which portions of its members may enter upon borrowing its name, or a name bearing that construction. It may have sympathy with the same cause, but cannot be responsible for any private or social movement that may come up under its assumed name, no matter how good the cause.

Natural History, Science, etc.

House Wrens.—The following letter describes some of the habits of these lively little songsters. "We have been more than usually interested this year in a pair of house wrens, that built their nest in a box that I had fastened against the end of our carriage house for that purpose, they appeared here near the last of Fourth Mo.; the male coming a few days in advance of the female, which I believe is common among most birds that go south to winter, and after inspecting the box and surroundings for several days, commenced carrying twigs, hair, feathers, etc. into the box in a very industrious manner, and while the female laid her eggs, and during the time of incubation, the male was very merry, singing at times with great energy; and when the young birds appeared, the care-takers were very industrious, and would feed them with spiders, caterpillars, etc., every few minutes during the day, and the male would frequently dart down and strike us on the head when we came near the box, and we often amused ourselves by encouraging his pugnacious habits, by holding a hand up towards him, when he would fly down and strike it with his bill. However about two days before the young birds were ready to leave the nest, we missed him and his vivacious song, and of course were fearful that "Kitty Gray" had made a meal of him, and we watched and listened in vain for him and his cheerful notes. The mother wren doubled her diligence in the mean time and got the six young birds out of the nest and safely away during the second day after we missed the male bird. And about nine days after that we noticed two wrens about the trees in the yard, and I put up a new box a few feet from where the old one had been, but one day my wife saw one of the birds alight where I had removed the old box from to thoroughly heat it in the oven of the stove to destroy any insects that might be in it, and from the fact of its alighting on that spot against a perpendicular

part, we concluded that at least one of the same pair of wrens had returned, and I then fastened up the old box in the same place, and they soon began to fix up and refit the old nest, and the female is now sitting on another nest of eggs, and the male proves himself to be the same identical bird that was here before, by his pugnacious habit of darting down and striking us on the head or hand, and which we often encourage him to do. We have often thought from their tameness that the same pair of wrens return from year to year to the same place or box. And several years ago we had proof that some of the same brood return to the same neighborhood. It happened that a pair of wrens that had built in a box in our yard brought out a brood of seven young birds, one of which had one leg bent back at a right angle at the knee joint, and two years afterwards, that bird or one with a leg situated in the same inconvenient position came to our yard in the spring of the year, but left in a few days, but we do not know where it settled that summer.—Charles L. Warner.

Chinese Plants.—At Chusan I met for the first time, the beautiful *Glycine sinensis* wild on the hills, where it climbs among the hedges and on trees, and its flowering branches hang in graceful festoons by the sides of the narrow roads, which lead over the mountains. The *Ficus nitida*, so common around all the houses and temples in the south, is here unknown; and many of those beautiful flowering genera which are only found on the tops of the mountains in the south have here chosen less exalted situations. I allude more particularly to the *Azalea*, which abound on the hill-sides of the island. Most people have seen and admired the beautiful azaleas which are brought to the Chiswick fêtes, and which, as individual specimens, surpass in most instances those which grow and bloom on their native hills; but few can form any idea of the gorgeous and striking beauty of these azalea-clad mountains, where on every side, as far as our vision extends, the eye rests on masses of flowers of dazzling brightness and surpassing beauty. Nor is it the azalea alone which claims our admiration; clematises, wild roses, honey-suckles, the *Glycine* noticed above and a hundred others, mingle their flowers with them, and make us confess that China is indeed the "central flower land."

The tallow-tree (*Stillingia sibirica*) is abundant in the valleys of Chusan, and large quantities of Tallow and oil are yearly extracted from its seeds; tallow-mills are erected in several parts of the island for this purpose.

The *Laurus camphora*, or camphor-tree, is also abundant, but the camphor is extracted or exported from the island. The green-tea shrub (*Thea viridis*) is cultivated everywhere; but, if we except a small quantity which is annually sent over to the main-land—to Ning-po and the adjacent towns—the whole of the produce is used by the inhabitants themselves. Every small farmer and cottager has a few plants on his premises, which he rears with considerable care, but seems to have no wish to enter on its cultivation on a larger scale. Indeed, it is questionable if it would answer, as the soil is scarcely rich enough; and, although the shrub grows pretty well, it is far from being so luxuriant as it is in the larger tea districts on the main land. The forests of different varieties of bamboo are very striking, and give a kind of tropical character to the Chusan scenery. I do not know anything more beautiful than the yellow bamboo, with its clean and straight stem, and graceful

top and branches waving in the breeze.—*Fortune's travels in China.*

Snakes.—One of the snakes most commonly eaten is the Australian python (*Morelia variegata*) the largest snake found in Australia, which here in Northern Queensland may even attain a length of more than twenty feet. During winter it seems to prefer staying in the large clusters of ferns found on the trunks of trees. At night it seeks shelter from the cold among the leaves, but during the daytime it likes to bask in the sunshine, which enables the natives to discover and kill it with their clubs. If attacked it may bite with its many and sharp teeth, but the wound produced is not dangerous. These ferns grow in wreaths round the large trunks of trees and look like the topsails of a ship, but they are far more numerous, and like the orchids, which grow pretty much in the same manner, are constant objects of interest to the natives, for in them they find not only snakes, but also rats and other small mammals. They, therefore, as a rule, take the trouble to climb the trees to make the necessary search. They discover the snakes at a great distance, though the wreaths may be fifty to sixty yards above the ground.

We were at one time travelling along one of the mountain streams, while the blacks as usual kept a sharp look-out and examined the numerous clusters of fern in the scrub. Suddenly they discovered something lying on the edge of one of these fern clusters, but very high in the air. Notwithstanding their keen eyesight, they were unable to make out whether it was a serpent or a broken branch, so a young boy, whom I usually called Willy, climbed up in a neighboring tree to investigate the matter. Ere long he called down to us, "*Vindolek! vindolek!*"—that is, Snake! snake! I was very much surprised, as the object looked to me like an old leafless limb of a tree. Willy came down at once, and lost no time in ascending the tree where the serpent was lying.

When he had obtained a foothold near the fern wreath, he broke off a large branch and began striking the serpent, which now showed signs of life. The lazy snake soon received so many blows on the head that it fell down, and proved to be more than ten feet long. While we were taking a look at it we heard Willy, whom it was almost impossible to discover so high up in the tree, call down that he had found another snake, and this made the blacks jubilant.

It seemed, however, to be more difficult for Willy to get this snake down, for it was protected among the leaves, and he was obliged to use his stick with all his might in order to drive it out. At last it tried to make its escape, and crept out over the edge of the wreath of ferns in order to lay hold of the tree-trunk, but the distance was too great and it slipped. It could not get back, for Willy stood there striking it, and so this serpent, which was more than sixteen feet long, fell off; in coming down it struck the crown of a palm-tree, which broke its fall, and quick as lightning, it coiled itself round the trunk of the tree like a corkscrew. Willy did not give up. He came down, and immediately climbed up in the palm-tree to his victim, which was, however so tenacious of life that it did not let go its hold until its head was crushed.

When we came to look for the former serpent we were astonished to find it gone. We all searched carefully every where among the stones on the bank of the river, but it was not to be found, and we had given up the search when Willy, to our surprise, came dragging it behind

him. He had found it at the bottom of a hole in the river, and had dived after it.

These serpents are wonderfully tenacious of life. The one in question was apparently dead and motionless when we left it, still it had been able to crawl twenty paces and keep itself hidden at the bottom of a hole in the river-bed.

The natives, being anxious to secure themselves against other mishaps of this sort, decided to roast the serpents at once. But, as we had not time for this, they procured a withy band from a lawyer-palm, tied the two together until we returned in the evening, and made them fast to a tree, round the trunk of which the serpents coiled themselves. When we passed the place in the afternoon there was still life in them, but they were soon despatched, put together in bundles, and carried to the camp to be roasted for supper.—*Lunholtz's travels in Australia.*

Newspaper Lotteries.—Joshua W. Leeds publishes in *The Christian Statesman* a protest against a scheme that has been lately introduced in some of the newspapers of endeavoring to increase their circulation by offering prizes to such buyers of their papers as make successful guesses as to the base ball club which will be successful in winning a game.

To the managers of such papers he commends the following language of Governor Nicholls of Louisiana:—
“If the idea recently advanced that the presence among us of a lottery is a blessing and a boon, were entertained seriously, and really by any large part of our population, it would not be considered to be very high in the scale of civilization or of morality, either private or public. That institution ought to be destroyed on both political and moral grounds. Lotteries not only fall under the classification of gambling, but of gambling of the very worst description. The Supreme Court of the United States, speaking on that subject, said: ‘Experience has shown that the common mode of gambling is innocuous when placed in contrast with the wide-spread pestilence of lotteries. The former is confined to a few persons and places, but the latter infests the whole community. It enters every dwelling, it reaches every class, it preys upon the hard earnings of the poor and it plunders the ignorant and simple.’”

W. Leeds adds the following comment:—

“In the present instance, it is not the expenditure of a cent or ten cents in the scheme that is of any particular consequence, but it is the principle which is involved of per chance getting a large return on a very small outlay. It is the mischief which is done when one so far loses his sense of self-worth and integrity as to lend himself, at least to any undertaking or scheme that bears the taint of gambling. And what is to become of base-ball as a game, when it is thus brought into such disreputable association? What, likewise, is the value to be placed on the editorial condemnation of the Louisiana lottery, when it emanates from a paper which issues a prospectus of guessing or betting, with valuable prizes, to promote its circulation?”

The Christian Advocate of New York, in its correspondence with England, says:—

“A very important step in the direction of putting down gambling has been taken by the Government. For some time the newspapers in their advertising columns have offered prizes for competitions. These competitions, in which the public have been invited to take part, have been literal or in any way educational. They have been of the nature of lotteries; they have not depended on the skill of the competitors, but on sheer chance; and they have undoubtedly fostered the spirit of gambling, which has been rapidly spreading among all classes. Such competitions are now declared to be illegal, and a strong blow has been struck at what threatened to be a very grave evil.

Total Abstinence from a Business Point of View.—The Baltimore and Ohio Railroad Company has

sent to each of its employes a circular containing these words: “This company will not, under any circumstances, employ men who are in the habit of becoming intoxicated. All employes known to be habitual drinkers of wine must be warned to discontinue the practice or quit the company’s service. Employes will be discharged if intoxicated either on or off duty. No person discharged for intoxication will be re-employed.” Similar action has been taken by other companies. This movement is not inaugurated in the interest of prohibition or temperance, but in the interest of the safety of travellers depends on the sobriety of railroad employes. The saloon would wreck trains and slaughter travellers on every railroad every day in the year if it could have free course.

Christianity Among Convicts.—The following is extracted from a tract issued by the *Howard Association*, London:

“One of the most striking instances of the power of Christianity over prisoners is afforded by the successful labors of a Medical Officer of Convicts, Dr. Colin A. Browning, R. N.

“Between the years 1831 and 1848, Dr. Browning was engaged as Surgeon-superintendent of convict ships, during the long voyages between England and Tasmania. Nine times he was entrusted with the direction of large parties of these wretched outcasts from their country. They included a number of the most depraved and desperate characters. When these were congregated together, within a small space, on shipboard, for periods of four or five months, the difficulties of management were necessarily very great. Indeed, the voyages of convicts usually presented such scenes of horrible corruption and riotous insubordination, that the tranquility ever present was commonly spoken of as ‘floating hell.’ Dr. Browning’s parties formed a most remarkable contrast to the general rule.

“He records one of his later voyages. ‘The last words uttered to me by the prison officers of Millbank, were designed to impress on my mind that the men destined for embarkation were a most depraved set, including some most desperate characters. A friend, moreover, advised me to entertain myself among them at night, or alone, or unarmed. Their character from England had reached Tasmania before they did, and the gentleman who came on board before debarkation told me that he understood that I had brought out the worst body of men that had ever been landed in the Colony.’”
“The result, however, was—‘I met with the confidence and gratitude of their behavior while under my authority, instruction, and discipline. Not a lash was inflicted, not an iron was seen on the prisoner’s decks. The behavior of my men, after they had been a few weeks under Scriptural instruction, prayer, and discipline, exceeded, in correctness and superiority of character, that of any other body of men I ever saw.’”
“The advancement in Christian knowledge was amazing, though their fearful and most appalling ignorance of the Bible and of Redemption, when they came on board, was truly astounding and heartrending.”

“When this party of 200 left Woolwich, for Hobart, 135 could neither read nor write. On their leaving the vessel, all under my authority, I presented six hundred to the Society of the ‘British and Foreign Temperance Society,’ who possessed the ‘Total Abstinence,’ and 150 the ‘Temperance’ pledge. All were supplied with a Bible or Testament. And the Doctor mentions, ‘Out of their few remaining shillings, the prisoners, without my knowledge, subscribed among themselves the sum of £7, 8s. 10d., as an expression of their gratitude to the British and Foreign Temperance Society, for the gift of the more money, the sum would have been greater. Many of them gave all they had left in my hands.’”

“When in charge of another party of 220 convicts, sent out from England in the *Theresa*, the Doctor established thirty-three schools, in active operation on board, and again lauded all the men to be seen. ‘I could not do so, nor do I wish to do so, on any occasion throughout the voyage. During the voyage in another ship, Dr. Browning proved that his decidedly religious, whilst practical and strict mode of treatment, was also successful in the management of female convicts, who are generally even more difficult to govern than the worst of men.’

“But one of his greatest triumphs was his voyage

from Norfolk Island (of horrible history to Tasmania, in charge of 346 ‘old hands.’ A number of these had agreed to take a terrible revenge on some comrades who had been employed as constables over the others. But under the instruction and discipline of Dr. Browning, this purpose was entirely abandoned. (Murder was a common crime among the Norfolk Island convicts at that period.) The Doctor landed his large party at their destination without having had a single punishment. He remarks: ‘The men were given to me in double iron. I declared them without iron, declaring among them.’ I am told this is the first and only instance of convicts removed from Norfolk Island having had their irons struck off during the voyage, and being landed totally unfettered. They are almost uniformly double-cross-ironed, and often chained down to the deck, every body being afraid of them. I was among them at all hours, and the prison doors were never once shut during the day. — God be all the glory.’”

THE FRIEND.

—SEVENTH MONTH 26, 1890.

There is much instruction to be derived from some of the controversial writings of our early Friends, who, in their efforts to refute error often unfold the principles of the Gospel with much clearness.

In commenting on a Catechism, written or endorsed by one Samuel Eaton, Edward Burroughs quotes from it the assertion, “That the one standing rule, according to which God is to be sought, worshipped and served, is the Holy Scriptures; in which God hath revealed himself in all things which He would have believed and done.”

To this he replies: “It is the Spirit of God that gave forth the Scriptures, which spirit was and is within the saints, that lendeth into all truth, and teacheth to know all things; and that Spirit of God only, is the standing rule to walk in, and to walk by; it was the rule to Abel, Enoch, and Abraham, and the rest of the holy fathers, that lived before any Scripture was written; and it was the rule to the prophets, to Christ and to the holy apostles; they all followed the Spirit and walked in it; and spoke, and wrought, and acted as the Spirit of God within them moved them and led them; it was not the Scriptures, but the Spirit that gave forth the Scriptures, that was the standing, unchangeable, unerring rule of worshiping, serving and obeying the Lord God; and that same Spirit is the standing rule to us also: For the Apostle commandeth to walk in the Spirit; and that which we are to walk in is our rule; and as many as are the sons of God, are led by the Spirit of God; and then the Spirit is their rule, and that guides the feet in the way of peace; and in the Spirit is God worshipped; for they that worship Him must worship Him in the Spirit and in the Truth; and such He seeketh to worship Him; for it is in the hearts of his people, and within them, that God revealeth himself by his Spirit: For it is the Spirit that revealeth the things of God; and none knoweth the things of God, saving by the Spirit of God, and that revealeth God, and teacheth to worship the God and to serve Him; and the Scriptures they declare of the rule and of the revelation of God, and are a declaration of all things which are to be believed and practised by the children of the Lord; so that the Scriptures are not the standing rule, but the Spirit that gave forth the Scriptures, that is the standing rule, in and through all generations.”

This is one of many evidences that might be produced to show that while our early Friends highly valued the Scriptures as containing authentic records of the history of the Church in former ages, predictions of future events, statements of doctrine, and lively exhortations, which "holy men of old spake as they were moved by the Holy Spirit;" yet they were careful not to put anything in the place of Christ, as the Teacher and Guide of his people. They believed that the Scriptures were profitable for doctrine, for reproof, for correction and for instruction in righteousness; but at the same time they taught, as E. Burrough says, that "the knowledge of God's kingdom, [the personal experience of his reign over all in the heart of each one of his servants], is not received from books, nor the teachings and traditions of men; but by the manifestation of the eternal Spirit, which doth lead into all truth, and reveals the mysteries of salvation."

SUMMARY OF EVENTS.

UNITED STATES.—On the 22d instant, in the House of Representatives an original package bill was passed by a vote of 176 to 38. It is a substitute for the Senate bill, which applies to intoxicating liquors only; being applied to all articles of commerce imported from one State to another.

The Secretary of State has followed up his Reciprocity proposal, originally made to Congress in an official communication through the Executive, by a letter to Senator Frye, which has been generally received by the press and written up with expressions of approbation. The political parties, however, while approving of the sentiments expressed in the letter, are widely divergent in their explanation. The Republicans think they are not inconsistent with the policy of protection, while the Democrats contend that they are decidedly free trade. Secretary Blaine says of the McKinley bill:

"There is not a section or a line in the entire bill that will open a market for another bushel of wheat or another barrel of pork."

Our foreign market for breadstuffs grows narrower, Great Britain is exerting every nerve to secure her bread supplies from India, and the rapid expansion of the wheat area in Russia gives us a powerful competitor in the markets of Europe."

A despatch from Paris, Texas, says that the proprietors of the Choctaw Orphan Asylum Lottery Company have not abandoned the scheme yet. They declare that the United States Government has no right to interfere, and that they intend to proceed to hold a drawing and test their rights.

Andrew Haney, of Chamberlain, South Dakota, has obtained his temporary injunction closing the original package houses in that city. The grounds given for the decision are that the Enabling act admitting South Dakota to Statehood authorized the enactment of the prohibition clause in the State Constitution. The court is not obliged to pass by Congress subsequent to the passage of the Inter-State Commerce law, therefore the Prohibition law has received the sanction of Congress, and the Supreme Court decision does not apply to South Dakota.

When the citizens of Leland, Iowa, learned that parties from a neighboring town contemplated opening an "original package" saloon in that place, they held a meeting and passed the following: That it be unlawful to sell intoxicating liquors of any kind in Leland, and that any person violating this ordinance should be tarred, feathered, and conducted out of the village.

Nearly all the celluloid companies of this country are about to form a trust with \$6,000,000 capital.

This year's wheat yield in Northern Minnesota and North Dakota promises to be the best that it has been for many years.

Superintendent Porter, on the 16th instant, received a message from the Census Supervisor of Chicago, saying that his count makes the population of that city 1,101,293. This puts Chicago in second place. The count is not official, but the variation is probable. Chicago has also completed the official count of the population of the city of New York. The result shows a population of 1,513,501, which is an increase of about 25.4 per cent. during the last decade.

A telegram from Minneapolis says that the burning of 525 tons of binding twine in the great fire in that city on the 15th inst., will cause a sharp advance in the price of that article, especially in the Northwest. It is estimated that the 525 tons represent from one-half to three-fourths of the entire amount on hand in the Twin Cities, and prices will go up from a half cent to over five cents a pound. This rise will affect the entire country.

A terrible explosion occurred on the afternoon of the 15th inst. at King's Powder Mills, on the Little Miami Railroad, 29 miles east of Cincinnati. Twelve persons were killed and a dozen or more seriously injured. Two empty freight cars were being rolled on to a side track where a car containing 500 kegs of gunpowder was standing. As the cars struck there was a terrific explosion, and immediately afterward another car, containing 800 kegs of gunpowder, exploded, making 1300 kegs altogether.

Up to the 16th of this month, twenty-five more bodies of victims of the Lake Pelee disaster had been recovered, making a total of 100 thus far. It is believed that from 10 to 15 are still missing.

The upper stories of the Western Union building in New York were destroyed by fire on the morning of the 18th instant. The flames spread with great rapidity, and the employes had difficulty in making their escape, seven being lowered from the roof by the Acadie Press, one occupied one of the floors, and suffered great damage. The total loss is estimated at \$1,000,000, the switchboard in the operating room alone costing \$250,000.

Deaths in this city last week numbered 437; 116 less than during the previous week and 96 less than during the corresponding period last year. Of the foregoing, 208 were males and 229 females; 157 were under one year of age; 67 died of cholera infantum; 46 of consumption; 34 of diseases of the heart; 31 of marasmus; 19 of inanition; 19 of inflammation of the stomach and bowels; 12 of pulmonary; 12 of inflammation of the brain; 12 of enteritis; 12 of Bright's disease; 12 of convulsions; 11 of cancer; 11 of old age; 10 of paralysis and 10 of casualties.

Markets.—C.—U. S. 4½, 103; 4½ 12½; currency 6½, 113 a 123.

Wool—Washed firm, but quiet. Small sales on a basis of 125 cents per pound for middling ups.

FEED.—Winter bran was firm at \$37.75 a \$14.50 a ton as to quality.

FLOUR.—Western and Pennsylvania super, \$2.25 a \$2.60; do, do, extras, \$2.75 a \$3.00; No. 2 winter wheat, \$2.60; Pennsylvania, \$2.60; do, do, \$2.60; \$3.50 a \$4.25; Western winter, clear, \$3.90 a \$4.35; do, straight, \$4.40 a \$4.75; winter patent, \$4.75 a \$5.15; Minnesota, clear, \$4.00 a \$4.50; do, straight, \$4.50 a \$4.75; do, patent, \$4.80 a \$5.15; do, do, favorite brands higher. Eye flour is quiet but firm at \$32. per ton for choice.

GRAIN.—No. 2 red wheat, 93 a 93½ cts.
No. 2 mixed corn, 46 a 47 cts.
No. 2 white oats, 41½ a 42 cts.

BEEF CATTLE.—Extra, 51 a 51½ cts; good, 44 a 5 cts; medium, 39 a 41 cts; fat, 41 a 41½ cts; common, 33 a 35 cts; culls, 31 a 33 cts; fat, 29 a 31 cts.

SHEEP.—Extra, 51 a 60 cts; good, 51 a 55 cts; medium, 41 a 45 cts; common, 4 a 4½ cts; culls, 3 a 3½ cts; lambs, 44 a 48 cts.

HOGS.—Western, 53 a 53½ cts; common heavy, 51 a 52 cts.

FOREIGN.—The *New York World's* London correspondent says: "It is expected that before the session ends, Balfour will state whether he intends to accept Parnell's proposal to constitute by statute a Board of Arbitrators to settle the disputes between landlord and tenant on the subject of the Land Law, and the plan of campaign is in operation. Tories and landlords have the idea that the funds for the support of the evicted tenants held by Parnell are nearly exhausted. They are influencing Balfour to refuse Parnell's offer in this hope, and the tenants may be starved out. This hope is the mainstay of the Tories at present. They believe that if the struggle can be kept going for one year or two more, the Irish party will have no funds to fight at the general election. As Parliament will recess in the November, Balfour does not dare to introduce the Land Law Bill, and the Land Law Bill. The attacks in Parliament during the last fortnight have caused a relaxation of its most irritating features, even in Tipperary."

A meeting of the residents of the island of England, held on the 15th inst., was held at the 21st inst. at which a gratuity of £1000 was voted to the Queen of England was adopted.

On the 15th instant the *Madrid Gazette* stated that in the last two months there have been 445 cases of cholera in Spain. Of these, 251 were fatal.

Ribot, the French Minister of Foreign Affairs, has notified the Powers that treaties have been concluded whereby the native chiefs on the Upper Niger agree to a French protectorate.

A despatch from Vienna, dated the 16th instant, says: Intense heat prevails in Central Austria and in the Alps, from Graubünden to Lower Austria. The melting of the snow on the mountains has caused the affluents of the Danube to rise. The inhabitants are greatly alarmed. Much damage has already been done.

Despatches dated the 16th instant, from Constantinople, state that a fire on the 12th, in the Stamboul quarter, destroyed 125 timber merchants. The losses are estimated at \$5,000,000; insurance, \$320,000, in British companies.

An English woman, resident in Syria, reports the discovery near Beyrout, of a bedstead made of gold and silver and inlaid with precious stones. An inscription upon it in English characters states, that it belonged to Eleanor, Queen of England. The bedstead was discovered in a cave, and is supposed to have been placed there for security when Edward I left the East.

The Premier of Melbourne, Australia, has introduced in Parliament a railroad bill providing for the construction of 107 miles of country lines, and 39 miles of suburban lines, the whole to cost £12,500,000, besides a grant from the Treasury of £2,000,000. He said that the scheme was necessary in order to meet the growth of the population which, as the census proved, was increasing faster than the population of America. The bill was well received.

It is reported from the City of Mexico that a Guatemalan army, 9,000 strong, has been defeated by the San Salvadorians, in their own territory, with heavy loss. The Guatemalan army has been completely routed, and the accuracy of the statement is doubted. A more recent despatch states that the fight was with Salvadorian insurgents.

Wag Yin Wan, a wealthy Chinaman of San Francisco, has just purchased 15,000,000 acres of land on the Isthmus of Tehuantepec, in Mexico, and will establish large Chinese colonies there at once.

RECEIPTS.

Received from Anna Horst, Pa, \$1, to No. 27, vol. 64; from Elizabeth Wright, N. J., vol. 64; from Joshua T. Ballinger, N. J., \$2, vol. 64; from Mary R. Deacon, Pa., \$2, vol. 64; from Samuel P. Leeds, N. J., \$2, vol. 64; from Henry W. Leeds, N. J., \$2, vol. 64; from George P. Stokes, N. J., \$2, vol. 64; from I. Powell Leeds, N. J., \$2, vol. 64; from Lydia T. King, Pa., \$3, vol. 62, \$2 each for herself, Thomas Evans, Joseph E. Mickle, and Lydia K. Edge, vol. 64; from Henry Briggs, O., \$4, to No. 52, vol. 64; from William J. Smedley, Pa., \$2, vol. 64; from Parson Tucker, R. I., \$2, vol. 64; from Samuel C. Gilbert, Pa., \$12, being \$2 each for Martha Cook, Sarah A. Gilbert, Albert Cook, George C. Gilbert, Dorcas Price, and Ann Case, vol. 64; from David Darnell, N. J., \$2, vol. 64; from Ezra Kelley, Mass., \$1, to No. 27, vol. 64; from Charles Darnell, N. J., \$2, vol. 64, and for Hannah Panton, \$2, vol. 64; from Clarkson Sheppard, Mary S. Walton, and John B. Woods, \$2 each, vol. 64; from Samuel Biddle, Phila., vol. 64; from John W. Biddle, Phila., \$4, vol. 64, 2 copies; from S. W. Post, L. I., \$6, being \$2 each for Henry K. Post, Lydia Post, and Henrietta Titus, vol. 64; from Thomas Smith, Neb., \$1, to No. 27, vol. 64; from Martha D. Allen, W. Va., \$1, to No. 27, vol. 64; from Amos W. House, Benjamin S. House, and Sarah T. House, Pa., vol. 64; from Alfred Coe, Pa., \$2, vol. 64; from William M. Parker and Rachel F. Parker, Pa., \$2 each, vol. 64.

Remittances received after Third-day evening will not appear in the Receipts until the following week.

NOTICES.

WESTWON BOARDING SCHOOL.—The fall and winter term of 1890-91 will begin Ninth Mo. 2d.

Parents and others intending to send children to the school, will be glad to receive a prospectus, by applying to

J. G. WILLIAMS, Sup'l., Westwton, Pa.

FRIENDS' LIBRARY, No. 142, N. Sixteenth Street, Philadelphia, will be open during the Seventh and Eighth months on Fifth days ONLY, from 4 to 6 P. M.
